ETHNIC STUDIES BANNED IN ARIZONA:
An Effective Pedagogy and Curriculum for Latin@ Students

Sean Arce will discuss HB2281, racist legislation passed in Arizona that has effectively eliminated the Mexican American Studies program in the Tuscon Unified School District. This is in spite of the fact that the program has received national praise and honor for its effectiveness in retaining & graduating Latin@ students, preparing them for college, critically engaging them in their education & their learning, and successfully getting students active in their communities.
