

Student Learning Outcomes

B.S/B.A. Biochemistry
CIP Code 260202

Graduates from the Biochemistry program will have demonstrated:

1. understanding of the structures and functions of biological molecules.
2. understanding of intermediary metabolism and its control.
3. understanding of molecular genetics.
4. understanding of physical concepts and techniques of the discipline.
5. ability to design and conduct experiments (safely) and interpret experimental data.
6. ability to use computers as information and research tools.
7. ability to collaborate with other scientists, including people of diverse backgrounds.
8. ability to present concepts in oral, written, and visual forms.
