

Name David Alan Rintoul

Title Associate Professor and Director of the Division of Biology

Publications

Morrow, J., J. Colofiore, and D. Rintoul. 1973. Azaguanine-resistant hamster cell lines not deficient in hypoxanthine-guanine phosphoribosyl transferase. *J. Cell. Phys.* 81:97-100.

Rintoul, D., J. Colofiore, and J. Morrow. 1973. Expression of differentiated properties in fetal liver cells and their somatic cell hybrids. *Exp. Cell Res.* 78:414-422.

Rintoul D., R. F. Lewis, Jr., and J. Morrow. 1973. Aldehyde dehydrogenase isozymes in rat hepatoma-mouse fibroblast hybrids. *Biochem. Genet.* 9:375-387.

Rintoul, D. and J. Morrow. 1975. The use of selective markers in the study of differentiated gene function in normal and malignant cells of hepatic origin. in Gene Expression and Carcinogenesis in Cultured Liver, Academic Press, New York (ed. L. Gerschenson), pp. 311-324.

Rintoul, D. and R. D. Simoni. 1977. Incorporation of a naturally occurring fluorescent fatty acid into lipids of cultured mammalian cells. *J. Biol. Chem.* 252:7916-7918.

Rintoul, D., L. Sklar, and R. D. Simoni. 1978. Membrane lipid modification of Chinese Hamster Ovary cells. Thermal properties of membrane phospholipids. *J. Biol. Chem.* 253:7447-7452.

Rintoul, D. and R. D. Simoni. 1978. Isolation and preliminary characterization of rat liver cells resistant to 7-keto-cholesterol. *Biochim. Biophys. Acta* 531:322-330.

Rintoul, D., S.-M. Chou, and D. F. Silbert. 1979. Physical characterization of sterol-depleted LM cell plasma membranes. *J. Biol. Chem.* 254:10070-10077.

Welti, R., D. A. Rintoul, F. Goodsaid-Zalduondo and D. F. Silbert. 1981. Gel-phase phospholipid in the plasma membrane of sterol-depleted mouse LM cells: Analysis by fluorescence polarization and X-ray diffraction. *J. Biol. Chem.* 256:7528-7535.

Rintoul, D. A., N. Neungton, and D. F. Silbert. 1982. Isolation and characterization of filipin-resistant LM cell variants not auxotrophic for sterol. *J. Lipid Res.* 23:405-409.

Goodsaid-Zalduondo, F., D. A. Rintoul, J. C. Carlson, and W. Hansel. 1982. Luteolysis-induced changes in the phase composition and fluidity of bovine luteal cell membranes. *Proc. Nat. Acad. Sci., U.S.A.* 79:4332-4336.

Kinders, R. J., D. A. Rintoul, and T. C. Johnson. 1982. Ganglioside GM₁ sensitizes tumor cells to growth inhibitor glycopeptide. *Biochem. Biophys. Res. Commun.* 107:663-669.

Rintoul, D. A., L. J. Takemoto and M. M. Gooden. 1983. Evidence for reduced lipid order in

- plasma membranes from cataractous human lenses. *Current Eye Res.* 2:367-375.
- Rintoul, D. A. 1984. Glaucous gulls in Riley County. *Kansas Ornithol. Soc. Bull.* 35(2):22-23.
- Rintoul, D. A. and M. S. Center. 1984. The involvement of plasma membrane fluidity in adriamycin resistance. *Cancer Research* 44:4978-4980.
- Rintoul, D. A., R. Creed and G. W. Conrad. 1984. Changes in chick corneal lipids during development. *Invest. Ophthalmol. and Vis. Sci.* 25:1151-1155.
- Bascom, C. C., B. G. Sharifi, L. J. Melkerson, D. A. Rintoul, and T.C. Johnson. 1985. Gangliosides are not cell surface receptors or co-receptors for cell surface glycopeptides that inhibit protein synthesis and cell growth. *J. Cell. Phys.* 125:427-435.
- Gooden, M., D. Rintoul, M. Takehana and L. Takemoto. 1985. Major Intrinsic Polypeptide (MIP26K) from lens membrane: Reconstitution into vesicles and inhibition of channel forming activity by peptide antiserum. *Biochemical and Biophysical Research Communications* 128:993-999.
