A Snapshot of the Kansas Infrastructure in response to the AUVSI Economic Report

Intent of this poster session is to highlight Kansas Infrastructure across entities conducting related activities within the unmanned systems industry. This poster presentation will include a graphical map, showing Kansas entities involved various topical/functional “industries” that will include services, manufacturing and R&D based on taxonomies that pertain to this industry; a graphic “mind map” presentation that depicts a framework across government, industry and academia that will be filled in by conference participants and used for follow on detailed assessment and identification of individual entities within Kansas for this industry; and a survey that will be used to garner initial information from conference participants.

Joel Anderson will coordinate this poster session with AMI.
