1. Doris Carroll, chair, called the meeting to order at 3:35 p.m. Carroll requested permission from the committee to address items 2 and 4B before beginning at the start of our agenda to accommodate our guests. Committee members had no objections.

2. The October 16, 2007 minutes were approved as submitted.

3. Ad Hoc Course and Curriculum Policy Proposal – Kelli Cox (Attachment 3)
   Carroll thanked Cox for attending and turned the floor over to her. Cox briefly described what the charge of the committee was, as outlined at the beginning of the document, and explained that the committee tried to the best of their ability to follow through on this charge. She then went on to explain a change regarding undergraduate programs including interdisciplinary programs. The proposal contains an outline for an expedited review of changes that are minor enough that they do not need to go all the way through to Academic Affairs or Faculty Senate. The major change is the introduction of an Undergraduate Coordinator. Committee members briefly discussed what types of things may fall under this person’s purview. Having a coordinator would help just in the sense of having consistency in developing programs as well as for other reasons. Committee members gave feedback to Kelli Cox and she will adjust the proposal based on this feedback. The revised proposal will then be sent to the committee for a vote at our next meeting.

4. Course and Curriculum Changes
   A. Undergraduate Education
      1. A motion was made by Chengappa and seconded by Holcombe to approve the following course and curriculum changes as approved by the College Agriculture of on October 8, 2007:

   **COURSE CHANGES**
   
   *Agricultural Communications and Journalism*
   Add:
   AGCOM 450 Digital Video Storytelling
   AGCOM 500 Web 2.0 & The Diffusion of Innovation

   *Animal Sciences and Industry*
   Changes to:
   ASI 395 Advanced Meat Evaluation

   Add:
   ASI 333 Equine Enterprise Management

   *Horticulture, Forestry and Recreation Resources*
   Changes to:
   HORT 275 Concepts of Horticultural Design I
   HORT 508 Landscape Maintenance
   HORT 510 Horticultural Design II
   HORT 515 Turf Management Basic Turfgrass Culture
   HORT 517 Golf Course and Sports Turf Operations
   HORT 551 Landscape Contracting and Construction The Business of Landscape Contracting
   HORT 555 Landscape Irrigation: Design and Contracting The Fundamentals of Landscape Irrigation Design
HORT 582 Foundations of Horticultural Pest Management

Add:
HORT 325 Introduction to Organic Farming
HORT 360 Public Horticulture
HORT 516 Intensive Culture of Golf and Sports Turf
HORT 552 Horticultural Landscape Construction
HORT 583 Survey of Horticultural Ornamental and Food Crop Pests
HORT 587 Turfgrass Diseases and Their Management
HORT 588 Turfgrass Weeds and Their Management
HORT 589 Turfgrass Insects and Their Management

Drop:
HORT 519 Turfgrass Pest Management

Plant Pathology
Changes to:
PLPTH 575 Special Topics in Plant Pathology

Add:
PLPTH 576 Special Topics in Plant Pathology
PLPTH 583 Survey of Horticultural Ornamental and Food Crop Pests
PLPTH 587 Turfgrass Diseases and Their Management

CURRICULUM CHANGES
(Attachment 1)

There was discussion around the Milling Science and Management, Chemistry Option. It was suggested to
delete the first sentence in the rationale and this was agreed upon by the Agriculture representative. Also, it
was noted that the total graduation hours may be incorrect on the Management, Operations, and Chemistry
Options. (Since the meeting, Fairchild has confirmed this and the changes are noted to read 128 hours not
129 hours.) Motion carried.

2. A motion was made by Chengappa and seconded by Staggenborg to approve the following course and
curriculum changes as approved by the College of Human Ecology on October 8, 2007:

COURSE CHANGES

School of Family Studies and Human Services
Changes to:
FSHS 585 Professional Seminar in Family Life Education FSHS

Department of Hotel, Restaurant, Institution Management and Dietetics
Changes to:
HRIMD 120 Introduction to Survey of the Hospitality Industry
HRIMD 221 Topics in Hospitality
HRIMD 463 Convention Services and Event Management

Add:
HRIMD 443 Food Writing

CURRICULUM CHANGES
Department of Apparel, Textiles, and Interior Design
• Changes to the Bachelor of Science in Apparel and Textiles: Add STAT 325 as a course option under General studies courses. (See page 3 of white sheets for rationale)

**Department of Hotel, Restaurant, Institution Management and Dietetics**

• Changes to the Bachelor of Science in Hotel and Restaurant Management: Replace ENGL 516 with ENGL 517 under general requirements. Under Professional Studies, HRIMD 120 has increased one credit hour thus increasing Professional Studies from 37 to 38 credit hours. Under Professional Electives, delete HRIMD 425 and HRIMD 665, and increase the credit hours in HRIMD 463 from 2 to 3 thus changing professional electives from 15 hours to 14 hours. Total credit hours for graduation have not changed. (See pages 5-7 of white sheets for more detail).

Motion carried.

3. A motion was made by King and seconded by Staggenborg to approve the following course and curriculum changes as approved by the College of Technology & Aviation on October 16, 2007:

**COURSE CHANGES**

Changes to:
AVM 315 Advanced Avionics

Add:
PPIL 251 Private Pilot Helicopter Ground School
PPIL 252 Private Pilot Helicopter Flight Lab
PPIL 281 Instrument Helicopter Pilot Ground School
PPIL 282 Instrument Helicopter Pilot Flight Lab
PPIL 291 Commercial Pilot Helicopter Ground School
PPIL 292 Commercial Pilot Helicopter Flight Lab
PPIL 351 Flight Instructor Helicopter Ground School
PPIL 352 Flight Instructor Helicopter Flight Lab
AVM 242 Navigational Aids and Communication Systems for Avionics
COT 020 University Honors Program
COT 189 Introduction to University Honors Program

Drop:
PPIL 310 Aircraft Certification

**CURRICULUM CHANGES**

• Changes to the Associate of Technology in Engineering Technology, Mechanical Engineering Technology Option: Replace CMST 101 with CMST 110. Delete ETA 020. Total hours required for graduation have changed from 67 to 68.

• Changes to the Associate of Technology in Engineering Technology, Electronic and Computer Engineering Technology Option: Replace CMST 101 with CMST 110. Delete ETA 020. Total hours required for graduation have changed from 67 to 68.

Motion carried.

4. A motion was made by Chengappa and seconded by King to approve the following course and curriculum changes as approved by the College of Education on October 23, 2007:

**CURRICULUM CHANGES**

*Department of Secondary Education*
Degree Name Change:
FROM: Bachelor of Science
TO: Bachelor of Science in Education

Department of Elementary Education
Degree Name Change:
From: Bachelor of Science in Elementary Education
To: Bachelor of Science in Education

Rationale: The College of Education would like to unify the degree name for both Elementary and Secondary to better describe their program.

Effective Date: Fall 2008

Motion carried.

B. Graduate Education – A motion was made by Martin and seconded by Chengappa to bring back to the floor for approval the following curriculum change approved by the Graduate Council on October 2, 2007. Motion carried.

   **New Certificate Program**
   Interdisciplinary Graduate Certificate in Stem Cell Biotechnology (Attachment 2)

   Carroll introduced Ernie Minton and Duane Davis, who were present to address the questions regarding the certificate program. Both guests gave a brief overview of the program and how it came into existence. The certificate requires 15 credit hours, 8 of which are required. The rest are elective. Hubler raised a concern about student learning outcome number 5. Her concern is that none of the course descriptions seem to address that specific learning outcome. She wondered what course will be used to address this concern. They plan to use the topics course 902 to meet this desired outcome. Hubler mentioned possibly having a different course created instead of the topics course so that the course description could more accurately reflect the intent of the course. Both Davis and Minton concurred that it could eventually be turned in to this. There was also discussion about use of the word “ethics” and possibly using a different word, such as societal issues, or awareness. After all concerns were addressed, a motion was made by Chengappa and seconded by Staggenborg to approve the new graduate certificate in Stem Cell Biotechnology. Motion carried.

C. General Education

1. The following courses have been approved by the UGE Council for continued UGE status:
   (Informational item only)

   ASI 303 History& Attitudes of Animal Use
   ASI 330 Horse as a Window to the World
   ART 100 Two Dimensional Design
   ECON 110 Principles of Macroeconomics
   ECON 536 Comparative Economics
   ENGL 220 Fiction into Film
   ENGL 231 Medieval and Renaissance
   ENGL 234 Modern English
   ENGL 440 Themes in Literature
   FREN 514 Contemporary France
   FREN 520 Introduction to French Literature I
   FSHS 670 Working With Parents
   GEOG 221 Environmental Geography I
   GEOG 500 Geography of the United States
5. Committee Reports
   A. University Library Committee – Mohan Ramaswamy
      No report.
   B. Committee on Academic Policy and Procedures (CAPP) – Doris Carroll
      Carroll reported that we will have on the agenda for our next meeting both the Final Exam Policy and an updated version of the plagiarism definition.
   C. Student Senate – Tim Weninger
      No report.
   D. Course and Curriculum ad hoc committee (proposal reviewed under item 3)
      This item was discussed at the beginning of the meeting. A second reading will take place at our next meeting.
   E. General Education Task Force – Melody LeHew
      No report.

6. Old Business
   A. Final Exam Policy update (CAPP)
      An updated version will be on our next agenda.
   B. Plagiarism Definition (CAPP) – no new information
      An updated version will be on our next agenda.

7. New Business
   Carroll reported that David Delker from the iSIS task force would like to have more faculty input that will reach them in a timely manner. Montelone suggested that persons involved in course and curriculum changes in the colleges might be a good place to look. Carroll will talk more in depth with Delker before bringing this back to the committee.

8. For the good of the University

9. The meeting was adjourned at 4:45 p.m.
Animal Sciences and Industry

Business Option

FROM: BUSINESS & ECONOMICS
(Required)
ACCTG 231 Accounting Business Operations
ACCTG 241 Accounting Investments & Finance

Select 6 Courses
Agricultural Economics - Any course numbered 202 or higher except 490
Accounting – Any course
Family Studies – FSHS 105
Finance – Any course
Management – Any course
Marketing – Any course

TO: BUSINESS & ECONOMICS
(Required)
ACCTG 231 Accounting Business Operations
ACCTG 241 Accounting Investments & Finance

Select 6 Courses
Agricultural Economics - Any course numbered 202 or higher except 490
Accounting – Any course
Economics – Any course 500-level and above
Family Studies – FSHS 105
Finance – Any course
Management – Any course
Marketing – Any course

RATIONALE: 500-level economics courses are worthwhile choices for the “Business and Economics” section.

IMPACT: We do not anticipate a significant impact on the Economics Department.

EFFECTIVE DATE: Fall 2008
Science/Pre-Vet Option

FROM: Physics/Math/Statistics Requirement
(Minimum 6 hours)
Select From:
PHYS 113, 114
MATH 205, 210, 211, 220, 221, 222
STAT 325, 340, 350, 351

TO: Physics/Math/Statistics Requirement
(Minimum 6 hours)
Select From:
PHYS 113, 114
MATH 100, 205, 210, 211, 220, 221, 222
STAT 325, 340, 350, 351

RATIONALE: Science/Pre-Vet Option students who choose to complete the Science/Pre-Vet option, but are not planning on going to Vet School would be allowed to use MATH 100, College Algebra, to meet the 6 hours of math requirements of the option. All of our other options require MATH 100, but also require only 3 additional hours of Math/Statistics/Computers.

IMPACT: No impact on other departments

EFFECTIVE DATE: Fall 2008

Bioscience/Biotechnology, Business, Communications, Production/Management, and Science/Pre-Vet Options

FROM: Currently we allow students majoring in Animal Sciences and Industry within the Bioscience/Biotechnology, Business, Communications, Production/Management, and Science/Pre-Vet Options to have the option of taking FDSCI 302, Introduction to Food Science, as one of their Ag elective courses outside of Animal Science.

TO: We are proposing that the same set of students have the option of also taking FDSCI 305, Fundamentals of Food Processing, or FDSCI 690, Principles of HACCP as one of their Ag elective courses.

RATIONALE: Courses in this area are intended to provide breadth to a student's curriculum. We currently allow only FDSCI 302 to meet this requirement. FDSCI 305 and FDSCI 690 would be equally beneficial to our students.

IMPACT: We anticipate this will have little impact on the Food Science and Industry program.

EFFECTIVE DATE: Fall 2008
Production/Management Option

FROM:  

**BUSINESS & ECONOMICS**  
(Required)  
ACCTG 231  Accounting Business Operations  
ACCTG 241  Accounting Investments & Finance  
OR  
AGEC 308  Farm and Ranch Management  

**Select 4 Courses**  
Agricultural Economics - Any course numbered 202 or higher except 490  
Accounting – Any course  
Family Studies – FSHS 105  
Finance – Any course  
Management – Any course  
Marketing – Any course  

**ANIMAL SCIENCE**  
(Required)  
ASI 105  Animal Science Lab  1  
ASI 106  Dairy/Poultry Lab  1  
ASI 318  Fundamentals of Nutrition  3  
ASI 320  Principles of Feeding  3

ASI 315  Livestock & Meat Eval  3  
ASI 405  Fund Milk Processing  3  
ASI 640  Poultry Product Tech  3  
FDSCI 607  Food Microbiology  4  

**Select 3 Courses**  
ASI 515  Beef Science  3  
ASI 521  Horse Science  3  
ASI 524  Sheep Science  3  
ASI 535  Swine Science  3  
ASI 621  Dairy Science  3  
ASI 645  Poultry Management  3  
ASI 655  Behavior of Domestic Anmls  3  

TO:  

**BUSINESS & ECONOMICS**  
(Required)  
ACCTG 231  Accounting Business Operations  
ACCTG 241  Accounting Investments & Finance  
OR  
AGEC 308  Farm and Ranch Management  

**Select 4 Courses**  
Agricultural Economics - Any course numbered 202 or higher except 490  
Accounting – Any course  
Economics – Any course 500-level and above  
Family Studies – FSHS 105
Finance – Any course  
Management – Any course  
Marketing – Any course  

**ANIMAL SCIENCE**  
*(Required)*

- ASI 105 Animal Science Lab 1 
- ASI 106 Dairy/Poultry Lab 1 
- ASI 318 Fundamentals of Nutrition 3 
- ASI 320 Principles of Feeding 3 
- ASI 400 Farm Animal Repro 4 
- ASI 510 Animal Breeding Principles 3 
- ASI 580 Senior Seminar 1 

**Select 1 Course**

- ASI 350 Meat Science 3 
- ASI 361 Meat Animal Processing 2 
- ASI 601 Phys of Lactation 3 

**Select 1 Course**

- ASI 315 Livestock & Meat Eval 3 
- ASI 405 Fund Milk Processing 3 
- ASI 640 Poultry Product Tech 3 
- FDSCI 607 Food Microbiology 4 

**Select 3 Courses**

- ASI 515 Beef Science 3 
- ASI 521 Horse Science 3 
- ASI 524 Sheep Science 3 
- ASI 535 Swine Science 3 
- ASI 621 Dairy Science 3 
- ASI 645 Poultry Management 3 

*Only one of the courses below can be used to fulfill the above requirement*

- ASI 520 Comp/Lab Anml Mngt 3  
- ASI 655 Behavior of Domestic Anmls 3

**RATIONALE:** Several of our students change options from the Science/Pre-Vet option to the Production/Management option after their first three years. Most of these students have taken ASI 520, Companion and Lab Animal Management. They would like to use it in this option. This change would require these students to take at least two of our production courses. 500-level economics courses are worthwhile choices for the “Business and Economics” section.

**IMPACT:** We do not anticipate a significant impact on the Economics Department.

**EFFECTIVE DATE:** Fall 2008

**Grain Science and Industry**

**Baking Science and Management - Cereal Chemistry Option**

GRSC 712 Vib. Spect. Anal 1 hrs

GRSC 713 Cont. Chromotographic Anal. 1 hrs

Free Electives 6 hrs

Total hours required 128 hrs
RATIONALE: The above changes are being made to allow students in the Cereal Chemistry option as much flexibility as possible to prepare for careers in the baking of food industries while still gaining a foundation of the newer technologies prevalent in the industry.

CHM 220/250 are being dropped as alternates and CHM 210/230 will be used for this option.

GRSC 150 will replace GRSC 101 for this option. GRSC150 is more appropriate for students in this option.

GRSC 630 Management Applications will be dropped to make room for addition hours of specialization electives.

ATM 540 is no longer offered and will be replaced with GRSC540. GRSC 541 will be added.

BIOCH 265 is being dropped as an alternate and BIOCH 521 and BIOCH 522 will be required for this option.

ASI 318 and HN 132 are being dropped as alternates and HN400 will be required for this option.

For Cereal Chemistry majors the suggested and Specialization electives are more clearly defined and their scope has been broadened to introduce students to additional, most current topics in the Grain industry.

IMPACT: No major impact outside of department.

EFFECTIVE DATE: Fall 2008

GRSC 712 Vib. Spect. Anal 1 hrs
GRSC 713 Cont. Chromotographic Anal. 1 hrs

Free Electives 9 hrs  Free Electives 8 hrs
Total hours required 128 hrs  Total hours required 128 hrs

RATIONALE: The above changes are being made to allow students as much flexibility as possible while still integrating courses covering the newest technologies in the food industry. Total number of hours required for graduation has not changed; however 3 hours of specialization electives have been added and total hours of free electives has been reduced from 25 to 17.

GRSC 150, Principles of Milling will provide production managers and baking professionals a more thorough understanding of the flour and the milling process.

CHM 350 and BIOCH 521 are being dropped as an alternates and BIOCH 265 will be required for this option.

ME 212 will be replaced with GRSC 110, Flow Sheets. GRSC 110 will be more applicable for later GRSC senior level courses and for use in the bakery production layout and design areas.

MATH 210 and alternate MATH 220 will be replaced with MATH 205 General Calculus and Linear Algebra. MATH 205 uses an algebra approach more appropriate for students in this option.

ATM 540 is no longer offered and will be replaced with GRSC540. GRSC 541 will be added.
EDLST 212 Introduction to Leadership Concepts will be added as a Specialization elective choice in response to our industry’s repeated requests that BSM students would benefit from additional leadership education.

For all BSM majors the suggested Specialization Electives are more clearly defined and their scope has been broadened to introduce students to additional, most current topics in the Grain industry.

IMPACT: Letters have been written to the departments of Mechanical Engineering and Mathematics advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008

Feed Science and Management

</tbody>
</table>

Specialization Electives 8 hrs Specialization Electives 18 hrs
Add to list: GRSC 745 Fund Bioprocessing 3 hrs

Total hours required 126 hrs Total hours required 124 hrs

RATIONALE: The above changes are being made to allow students as much flexibility as possible in the program to prepare for careers in the feed and allied industries, but also having the background for careers in plant management and operations in the biofuels and related industries. Students will still be able to complete the Pre-Vet Professional Requirements to apply for veterinary medicine if they desire.

Many of the students entering the program have already completed enough math to begin with MATH 205 which is a higher level course that remains in the degree program. Additionally, most students come into the program with the necessary computer skills and do not need a PC course.

Currently all students in the program are required to take both AGEC 220 and AGEC 420 which have some similar areas of content. Only one of these classes is needed for the Feed Science students.

The new GRSC 745 course will allow our students the opportunity to add knowledge and skills beneficial to understanding the production of biofuels and their related co-products.

IMPACT: Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008

AGEC 513 Ag Finance                            3 hrs
AGEC 515 Food & Agri. Bus. Mktg.                3 hrs
AGEC 632 Agri. Bus. Logistics                   3 hrs
ENGL 516 Writ. Comm. For the Sciences          3 hrs
MANGT 390 Bus. Law I                            3 hrs
MANGT 420 Mgmt. Conc.                          3 hrs
MANGT 530 Ind. Labor Relations                  3 hrs
MANGT 531 Pers. & Human Res. Mgmt.              3 hrs
SPCH 311 Bus & Prof. Speaking                   3 hrs
GRSC 720 Extrusion Proc. in the Fd & Fd.        4 hrs
GRSC 745 Fund. of Bioprocessing                 3 hrs
GRSC 712 Vibrational Spect. Analysis           1 hrs
GRSC 713 Cont. Chromotographic Anal.            1 hrs

Free Electives                                  3 hrs
Total hours required                            128 hrs

RATIONALE:  MATH 220, will be replaced with MATH 205, General Calculus and Linear Algebra. MATH 205 has an algebra approach more appropriate for students in this option.

Replace BIOCH 265 with CHM 350 and CHM 351. This will upgrade the level of organic chemistry to better prepare students for chemistry related functions in the milling process.

GRSC 731 Milling Science II Lab (2) will be required for all milling science graduates. It will allow students to apply principles taught in GRSC 730 to increase technical understanding and meet expectations of industry.

Require all milling science graduates take GRSC 610 Elec/Grain Proc. Ind. Understanding of electrical principles and management is important in both options to safely manage and direct an electrically powered operation system.

Create new common specialization electives category for all options, including the previous elective choices for the management option plus selected grain science courses. With addition of GRSC 720 Extrusion and GRSC 745 Fundamentals of Bioprocessing, these changes strengthen the MSM degree program.
IMPACT: Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008

### RATIONALE:
Chemistry requirements are changed to be consistent with the other two options in the major. All students will now take CHM 350 and 351 as part of the core requirements.

Create new common specialization electives category for all options, including the previous elective choices for the management option plus selected grain science courses. With addition of GRSC 720 Extrusion and GRSC 745 Fundamentals of Bioprocessing, these changes strengthen the MSM degree program.

### IMPACT:
Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

### EFFECTIVE DATE:
Fall 2008
Horticulture, Forestry and Recreation Resources

FROM: Horticulture Major with Options in:
   Fruit/Vegetable Production
   Greenhouse Management
   Nursery Management
   Landscape Design
   Landscape and Turf Management
   Horticulural Therapy
   Golf Course Management
   Horticulture Science

TO: Horticulture Major with Options in:
   Fruit/Vegetable Production
   Greenhouse and Nursery Management
   Landscape Design
   Landscape Management
   Horticulural Therapy
   Golf Course Management
   Horticulture Science
   Sports Turf Management
   Public Horticulture

RATIONALE: Option name changes more accurately reflect the curriculum. Combining the nursery management and greenhouse management options recognizes the considerable overlap that currently exists and recognizes the fact we can serve our students better within the context of one specialization. Renaming the landscape and turf management option reflects associated changes in the curriculum which will increase focus on landscaping, and the development of the new option in sports turf management with greater focus on turf management. Two new options in sports turf management and public horticulture reflect both changing demands of the horticultural industry for graduates and changing interests of students. Additional more specific rationale statements follow the detailed curriculum changes outlined on the following pages.

IMPACT: All impacted units have been contacted.

EFFECTIVE DATE: Fall 2008.

Free electives ................................................. 7-9  Free electives .................................................. 6-8

RATIONALE:

Quantitative sciences: the change from CHM 210 to CHM 110/111 is due to our recognition that CHM 110/111 offers the knowledge of chemistry necessary for the horticulture major; BIOCHM 265 is required rather than one of two Organic chemistry electives, this change is required since the other elective requires CHM 210; removing computer science elective choices in recognition that the majority of our students come to us with acceptable computer skills

Horticulture requirement: the pest management elective has been incorporated into each of the specialization curricula, all hort students will be required to take HORT 582 Foundations of Hort Pest Management and depending on the specialization, also choose 1-3 additional credits from a list of approved courses; the addition of HORT 599 The Horticultural Professional is a new course required of all hort majors, this is a capstone course of a 3-course series (HORT 190, 590, 599) that focuses on the hort industry and serves as a mechanism to collect end-program assessments

Specializations: Changes within each specialization reflect changes in existing courses being put forth at this time and the addition of new courses being put forth at this time. Specialization name changes more accurately reflect the curriculum. Combining the nursery management and greenhouse specializations recognizes the considerable overlap and the fact we can serve our students better within the context of one specialization

IMPACT: All units who will be impacted by the above changes have been contacted.

EFFECTIVE DATE: Fall 2008

Total Credit Hours Required for Graduation 120
RATIONALE:

Sports Turf Operations Management is proposed as a new specialization under the Horticulture major in the Department of Horticulture, Forestry and Recreation Resources. There is a growing demand for professionals in this area and we believe the proposed curriculum is unique and will prepare graduates well for careers in this area. The Sports Turf Operations Management option was prepared with input from the Board of Directors of the Sports Turf Managers Association (STMA). This included comments from sports turf managers overseeing sports turf and related operations for major league baseball, the NFL, and K-12 school districts (see following pages). The national sports turf sales manager for the Toro Corporation is an adjunct faculty in our department, and will be involved in student instruction for 1 to 2 weeks every year.

Modeled after our Golf Course Management program, the Sports Turf Operations Management option places an emphasis on horticulture and turfgrass science, and complements this with course work in communications, business, and hospitality. The STMA members repeatedly emphasized the importance of business and communications and supported the inclusion of some hospitality courses. The importance of work experience prior to graduation is again emphasized with 6 credits of internship required.

In summary, we believe the proposed Sports Turf Operations Management option will be unique in the U.S., much as our current Golf Course Management program is, and will produce graduates well prepared for the challenges of this growing industry.

IMPACT:

All impacted units have been contacted.

- MC 120 Principles of Advertising 3
- MC 180 Fundamentals of Public Relations 3
- PSYCH 564 Psychology of Organizations 3
- RRES 635 Methods of Environmental Interp 3

### Free Electives ................................. 13 hours

TOTAL CREDITS FOR GRADUATION 130
RATIONALE:

The public horticulture option is intended for students interested in professional careers which promote horticulture and emphasize people and their education and enjoyment of plants. Such careers include director of a botanical garden or park; city or urban horticulturist; extension agent, teacher, educational director, or program coordinator; professional garden writer/editor or publication manager; public garden curator; and plant collections manager. Initial work on developing this specialization was based on recent and current student interest and the fact that very few universities offer this specialization. Additionally, with the continuing development of the K-State Gardens, K-State has the unique opportunity to become a model university garden demonstrating dynamic linkages between the Gardens and an academic unit of the University. While university gardens are not unique, embedding an academic discipline within a university garden is unique. The creation of the Public Horticulture specialization is one step in the Horticulture Divisions plan to establish K-State Gardens as a model university garden.

IMPACT:

No impact outside our department.

EFFECTIVE DATE:

Fall 2008
Introduction

The Midwest Institute for Comparative Stem Cell Biotechnology (the Institute) was created in 2005 based upon emerging research and intellectual property development resulting from the discovery by Kansas State University personnel of a stem cell population in the matrix of the umbilical cord of humans and also domestic and laboratory animals. A website has been created for the institute: http://www.vet.ksu.edu/research/stemcell/index.htm

As is apparent from the website, stem cell research, development of related intellectual property and education in stem cell-related biotechnology are the primary goals. Significant progress has been made in research. All components of the pending patent have been licensed. Fees paid, while confidential under the licensing agreement, are the largest licensing fees ever received by the KSU research foundation by a large margin. The third element of the Institute’s aims, education, is the subject of the present proposal.

Learning objectives

The overarching purpose of the proposed certificate program is to add value to other degrees in the biological and life sciences, specifically including animal sciences, veterinary medicine, biology and biochemistry.

Specific learning objectives are enumerated in the assessment plan.

Courses

The core courses in the certificate are:

**AP 711. Stem Cells and Comparative Biomedicine.** (2) II, S. Characteristics of major categories of stem cells. Applicable or potential clinical uses, including their utilization in tissue engineering or targeted delivery of therapeutics.

**AP 850 Stem Cell Techniques.** (2) I, S. Cellular and molecular techniques and techniques on tissue culture. Lecture and laboratory hours to be determined.

**ASI 802. Gametes, Embryos, and Stem Cells in Farm Animals.** (2) I, in odd years. A study of gametes, embryos, pregnancy, and stem cells in farm species including supporting information from laboratory species and humans. Emphasis will be on the regulation of stem cells, gametes, and embryos and on the conceptus-maternal interactions to establish and maintain pregnancy and program conceptus and postnatal development. Two hours lec. a week. Pr.: BIOCH 521.

**ASI 902 Topics in Stem Cell Biotechnology.** (1) A journal club course in stem cell biotechnology in fall semesters. One semester is required. It can be repeated twice for a total of three credits in the stem cell certificate. Students will evaluate the contribution of scientific papers to the field of stem
cell biology, present scientific data, lead discussions of scientific literature, and become familiar
with current concepts in the field of stem cell biology and biotechnology.

Elective courses for emphasis in research or entrepreneurship are:

**AP 710 Microanatomy.** Origin, development and microscopic structure of the cells and tissues for
the animal body. Three hours lecture and six hours lab/week. Pr: First year standing in college of
veterinary medicine. Fall semester.

**AP 995. Problems in Physiology.** (Var.) I, II, S. Special problem-involving techniques utilized in
studying the function of various organ systems of the body. Pr.: Consent of instructor.

**ASI 600. Applied Animal Biotechnology.** (2) II. Emphasis will be placed on the current and future
of animals in biotechnology related to food production as well as human medicine applications. Rec.
Pr.: Senior standing, BIOCH 521 and ASI 500.

**ASI 961. Graduate Problem in Animal Sciences and Industry.** (1-3) I, II, S. In-depth study of a
topic supervised by a member of the graduate faculty. Pr.: Permission of supervising faculty
member.

**BIOL 510. Developmental Biology.** (3) II. Introduction to the stages and mechanisms of embryonic
animal development. Integrated approach that includes classic experimental embryology and the
genetic and molecular regulation of invertebrate and vertebrate animal development. Three hours
lec. per week. Pr.: BIOL 450.

**BIOL 670. Immunology.** (4) II. Chemical, genetic, and biological properties of the immune
response, acquired immunity, and antibody production. Pr.: Two courses in biology; and a course in
biochemistry or equiv.

**BIOL 671. Immunology Lab.** (2) II. Laboratory exercises in immunology. Pr.: BIOL 670 or conc.
enrollment. Three-hour lab a week plus one hour rec.

**BIOL 705. Eukaryotic Genetics.** (3) I. An integrated exploration of transmission genetics and
molecular genetics of eukaryotic organisms. The focus will be on genetic model organisms and their
contributions to our understanding of mechanisms of genetic transmission and exchange,
mutagenesis, gene expression, and regulation of cell division and development. Modern approaches
to genomic analysis will be discussed. Pr.: BIOL 450 and BIOCH 521.

**BIOL 707. Advanced Cell Biology.** (3) I. Selected current topics in cell biology which reflect
recent advances in the field. Major topics include membranes and transport, protein sorting, signal
transduction, cell adhesion and motility, cell cycle, apoptosis, and specialized cell functions. Pr.:
BIOL 541.

**BIOL 886. Confocal, Fluorescence and Light Microscopy.** (3) I, in odd years. An introduction to
theories, functions and applications of confocal, fluorescence and light microscopy, and fluorescent
molecules. Lab emphasis on students working on independent research projects requiring microscopy. Two hours of lecture and three hours of lab per week.

**DMP 705. Principles of Veterinary Immunology.** (2) II. Innate and adaptive defense mechanisms in domestic animals. Topics include vaccinology, immunopathology, autoimmunity, immunodeficiency, and immunomodulation. Pr.: BIOCH 521 and BIOL 455

**DMP 850. Immunology of Domestic Animals.** (3) I. This course is designed to introduce graduate students to immune responses of domestic animals to pathogens and parasites. Pr.: BIOL 541.

**MANGT 845 Technology Entrepreneurship and Strategies.** (3) No pre-requisites other than enrollment in graduate school. This is an evening course taught by Professor Katz and two practitioners in the technology entrepreneurship field.

**GRAD 820. Leadership Practicum.** (3) I, II. Develops the connections between leadership theory and practice. By conducting a practicum project, students demonstrate the ability to apply concepts and ideas from the study of leadership to a practical leadership problem within an organization. Pr.: GRAD 801 and MANGT 845. The practicum will be developed for stem cell certificate students with the theme “Leading an innovation to market”.

**PLPTH 610. Biotechnology.** (3) I. The use of biotechnology and molecular genetic approaches in plant and animal sciences. Emphasis is on the use of molecular techniques for plant and animal improvement. Three hours lec. per week. Pr.: ASI 500. Same as AGRON 610.

**Requirements**

Students with graduate standing and a 3.0 GPA in a field in the biological sciences or with a cumulative GPA of 3.0 or higher in the DVM curriculum are eligible to enroll. Exceptions are possible upon approval by the coordinator in consultation with the faculty.

Fifteen hours are required:
AP850, ASI802, ASI902 and AP711 are required. ASI 902 may be taken either two or three times.

Any three of the remaining courses qualify for the remaining credit hour requirements. If BIOL707 is taken, BIOL541 may be required as a pre-requisite.

**Meeting learning objectives**

The core courses (AP711, AP850, ASI802, ASI902) are designed to ensure a benchmark level of knowledge about stem cell biotechnology. Elective courses are intended to allow for: (1) specific advancement toward research competence in the field or (2) commercialization of stem cell and related technology.
Courses in the certificate may be included in graduate programs upon approval of the student’s major professor and advisory committee. Inclusion of courses from other institutions and programs may be substituted for credit in the certificate in stem cell biotechnology with the approval of the program director in consultation with associated faculty.

**Need for the proposed program**

Stem cell biotechnology and regenerative medicine are emerging as central to the future of human and animal medicine and animal production. A supply of new scientists in basic disciplines with orientation to, or specific training in, stem cell biotechnology will be a necessary part of advancing this area of science, especially as political and social issues are untangled. The research and entrepreneurship tracks provided in the program will allow career flexibility that is becoming an ever-greater necessity for students.

It seems evident that, at this stage of the Institute’s development, a graduate level certificate is best suited to capitalize upon the on-going research and intellectual property development. Once a certificate program is successfully established and a significant track record has accrued, consideration will be given to proposal of an interdisciplinary degree. However that would be premature at this juncture and in the near future.

The target audience for the proposed certificate includes graduate students in all the biological sciences, specifically including animal science, veterinary medicine, biology and biochemistry. Also some residents in clinical medicine and surgery may find it advantageous to gain increased expertise in the rising field of regenerative medicine. In addition students in the DVM curriculum that have aspirations toward research or corporate careers would find the certificate in stem cell biotechnology valuable.

**Organization and Administration**

The governing faculty for the certificate in stem cell biotechnology is comprised of the Kansas State University Founding Fellows of the Midwest Institute for Comparative Stem Cell Biology (see website [http://www.vet.ksu.edu/research/stemcell/index.htm](http://www.vet.ksu.edu/research/stemcell/index.htm)). The program director will be Duane L. Davis.

The administrative home of the certificate program will be the Institute. The governance of the Institute is explained on the website. Briefly, the Institute is situated administratively in the Office of the Vice President for Research. Oversight is provided by a liaison committee comprised of the Vice President for Research, the Dean of the College of Veterinary Medicine, the Dean of the College of Agriculture and the Vice Chancellor for Research of the University of Kansas Medical Center and an Executive Committee described in the website.

An extensive list of scientists and other faculty members are affiliated with the institute and are listed in the website. These individuals provide a ready source of highly qualified advisors to students in the certificate program.
Budget

The budget is anticipated to be nominal in that all of these courses in the program will be taught for other purposes also.

Faculty

The Founding Fellows of the institute at Kansas State University are Dr. Duane Davis, ASI; Dr. Deryl Troyer, AP; Dr. Mark Weiss, AP. These individuals, along with the program director, will supervise the program.

Program Director

The program director will be Dr. Duane L. Davis, Professor of Animal Sciences and Industry.

Learning outcomes and assessment

Learning outcomes and an assessment plan is attached.
Cover Sheet for Student Learning Outcomes

Directions: For each program (e.g., degree, certificate, minor, secondary major, etc.) and level (undergraduate and graduate), please complete separate cover sheets. Feel free to make copies of this sheet if needed. Those graduate programs with an integrated master’s and doctoral program may provide one set of cover sheets.

Department / Unit: Midwest Institute for Comparative Stem Cell Biology
Title of Academic Program: Graduate Certificate in Stem Cell Biotechnology

Faculty contact(s) for the list of student learning outcomes for this academic program:

Duane Davis

Type of Degree (check one):

☐ Bachelor’s  ☐ Master’s  ☐ Ph.D.  ☐ Ed.D.
☐ U. Certificate  ☐ Minor  ☐ Secondary major  ☐ Associate
☒ G. Certificate
☐ Joint Degree (list the degree types): ________________
☐ Other: __________________________

List of Student Learning Outcomes for this Degree Program

Please provide an attached list of learning outcomes or copy and insert them below.

1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

2. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.

3. Students completing the Graduate Certificate in Stem Cell Biotechnology will understand the emerging areas of application of stem cells in regenerative medicine and food animal health and production.
4. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess skills in culture of mammalian stem cells.

5. Students completing the Graduate Certificate in Stem Cell Biotechnology will posses the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biology.
Please check the description(s) that best reflect the information being submitted.

☐ Faculty for The Midwest Institute for Comparative Stem Cell Biology have reviewed and endorse the list of student learning outcomes being submitted.  

Date of Endorsement:

Degree Program

Graduate Certificate in Stem Cell Biotechnology

Assessment of Student Learning Three-Year Plan

Student learning outcomes:

1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

2. Students completing the Graduate Certificate in Stem Cell Biotechnology will posses the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.

5. Students completing the Graduate Certificate in Stem Cell Biotechnology will posses the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biotechnology.

When will these outcomes be assessed? When and in what format will the results of the assessment be discussed?

1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

   a. Upon completion of the coursework requirements for the Graduate Certificate in Stem Cell Biotechnology, all certificate seeking students will be expected to take a web-based comprehensive capstone exam covering fundamental aspects of stem cell biology (exam will be updated annually to reflect new developments in the field). Results of the exam will be shared with individual students upon completion. It is expected that students completing the Certificate will score 80% or greater on the capstone exam. It is recommended that Ph.D. students take the exam prior to, or as a part of, their preliminary examinations and, at the discretion of their graduate committee, it could serve as a part of the determination of their readiness to enter candidacy for the Ph.D. degree.

   b. Core scientists in teaching courses and conducting research through the Midwest Institute for Comparative Stem Cell Biology will be heavily engaged in training students that ultimately are awarded the Graduate Certificate in Stem Cell Biotechnology. It is expected that these students will secure employment in academia or allied industries in biomedical sciences. Therefore, placement of all graduate and DVM students after completion of their degrees will be tracked to gain indirect evidence that the Certificate may be adding value to master, doctoral and DVM degrees. Data will be gathered via a web-based survey of graduates administered within 12 months of graduation.

2. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.

   a. All students completing the Graduate Certificate will be required to enroll in ASI 902 Topics/Stem Cell Biotechnology. A rubric has been developed (attached) to assess student’s working knowledge of stem cell biology as well as their oral communication skills in discussing stem cell biology.
3. Students completing the Graduate Certificate in Stem Cell Biotechnology will understand and have the skills to articulate the emerging areas of application of stem cells in regenerative medicine and food animal health and production.

4. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess skills in culture of mammalian stem cells.

5. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biology.

   a. All students will complete a survey that evaluates attitudes toward the diversity of ethical views surrounding the use of stem cells in animal research and therapeutics. The ability of students to be tolerant and understanding of diverse views will make them more effective professionals once in the workplace. This web-based survey will be updated annually to include developing concerns and views and will be administered to all students in their first semester of enrollment in ASI 802 and again in their final semester in ASI 902 (coincident with completion of the coursework requirements for the Certificate). Completion of both surveys will be a requirement for successful completion of the Certificate.

**What is the unit’s process for using assessment results to improve student learning?**

The faculty coordinator for ASI 902 in each fall semester offering of the course will be responsible for summarizing assessment data for Certificate graduates from the previous academic year, as well as comprehensive data accumulated from all Certificate graduates (at least three years may be required to accumulate sufficient numbers of Certificate graduates to obtain some measure of reliability of the data). The data will be presented to both core faculty and graduate students sometime during the first four meetings of ASI 902. The data will be discussed (among faculty and students) and where results of assessment point to failure to attain the expected outcome, a corrective course of action will be recommended. This course of action may point to appropriate changes in curriculum and(or) fine tuning of assessment tools.
