Chemistry

ADD: CHM 372 – Forensic Analytical Chemistry. (3) II, S. Quantitative chemical analysis and its application to the area of forensic (crime scene) analysis will be covered. The course will focus on sample collection, chemical equilibria, titrations, gravimetry, spectrophotometry, electrochemistry, chromatography and data analysis and the specific applications of these techniques to forensics. Pr.: CHM 230 or equivalent.

RATIONALE: This course is intended to replace a popular intersession class in criminalistics offered in the late 1980s and early 1990s (CHM 195) with an online class offered through the DCE. The class is intended to meet the interests/requests of K-State students, law enforcement personnel, and life-long learners for a class in forensic chemistry. Additionally this course should help K-State meet its distance available quality degree programs and professional development opportunities available to students throughout Kansas, the nation, and the world.

IMPACT: This course will be offered through the DCE and has been approved by DCE.

EFFECTIVE DATE: Spring 2010

Communication Studies, Theatre and Dance

DROP: COMM 090 – Teaching Public Speaking I and IA. (0) I, II. Seminar for graduate teaching assistants in strategies, techniques, and materials for the introductory public speaking course; includes current practices in research in communication education.

RATIONALE: Graduate Teaching Assistants in the public speaking program are required to attend a weekly staff training meeting. In order to monitor attendance, they are required to enroll in COMM 090. Under the new iSIS system, they are having difficulty doing so, because of the low-level line number attached to the class. We are merely changing the class to a graduate level line number so that it will be easier for our students to complete the enrollment process. No other changes are being requested, except to update the department’s nomenclature from “Speech” to “Communication Studies, Theatre and Dance.”

EFFECTIVE DATE: Spring 2010
ADD: COMM 575 – Internship in Communication Studies. (3) I, II, S. Students will work for/within an organization during the course of a semester. Interns must complete a minimum of 100 work hours to earn course credit. The internship work experience is intended to help apply formal classroom education to “real World” work experience. Ideally internships are pre-professional and project based experiences allowing students the opportunity to make meaningful contributions to the organization. Each intern will complete a series of deliverables to the internship director as well as work under a site supervisor at the host organization. Prior to registration, the internship director must approve all internships.

RATIONALE: An internship is a wonderful way to give students experience in their chosen career field and are an extension and application of academic skills. An internship will also offer the chance to seriously consider what type of work environment and occupation you might want to pursue upon graduation. As such, this course is designed to provide an opportunity to reflect on the internship experience and examine the ways in which course work is applicable to a variety of work environments. Additionally, this class will focus on developing skills that will help promote the communication degree outside of the university.

History

TO: HIST 543 – U.S. World Affairs to 1920. (3) I. History of U.S. foreign relations from its origins in the colonial era through World War I. Pr.: Sophomore standing.

RATIONALE: The subject matter of HIST 543 is sufficiently rich and complex to justify addressing it over two courses (see proposal for HIST 544 as well). By spreading out the coverage to two courses, the subject material can be significantly enriched with a depth of material pertaining to the political, economic, cultural, and social factors that influences U.S. engagement with the world. The department notes as well that a two course coverage of this topic is typical of other institutions.

EFFECTIVE DATE: Spring 2010

ADD: HIST 544 – U.S. World Affairs since 1920. (3) I. History of U.S. foreign relations from the end of World War I through the present day.
Explores how the United States engaged the world as a global power. Pr.: Sophomore standing.

RATIONALE: The subject matter of the original HIST 543 is sufficiently rich and complex to justify addressing it over two courses (see proposal for changed HIST 543 as well). By spreading out the coverage to two courses, the subject material can be significantly enriched with a depth of material pertaining to the political, economic, cultural, and social factors that influenced U.S. engagement with the world. The department notes as well that a two course coverage of this topic is typical of other institutions.

EFFECTIVE DATE: Fall 2010

ADD: HIST 547 – Economic History of the United States. (3) I. Major topics in American economic history from the colonial period to the present. Focus is on nineteenth- and twentieth- century issues, including the rise of big business; the expanding role of the government in the economy; the Great Depression; the postwar boom and its end; issues of class, race, and gender; America’s shifting roles in the global economy. Pr.: Sophomore standing.

RATIONALE: This course will provide coverage of a topic too long ignored or under-examined within a number of curricula: the historical grounding of major economic trends in American History, particularly form the late 19th century forward. A prototype version of this course has been offered and its enrollment reveals that the course attracts from a broad spectrum of majors, both within Arts and Sciences as well as from the professional colleges, particularly the College of Business.

EFFECTIVE DATE: Spring 2010

RATIONALE: By taking a subject students take for granted as a presence in their daily lives – mass media – and situating it within a broader historical context, this course confronts popular misperceptions about the “power” of mass media over its audience. Students will be introduced to a more sophisticated way of looking at the historical relationship between media and American society, particularly in regard to how societal influences themselves impact the shape and nature of American Mass media in ways that are often difficult to discern. In the process, notions of “technological determinism” (the view that technologies are autonomous actors that “impact” societies but are not a part of them) can be replaced with more sophisticated, historically-based, and interdisciplinary
understandings of the relationship between a society and its technology. This in-depth topical approach is consistent with the nature of other upper-division history courses.

IMPACT: Journalism and Mass Communication [Dr. Steve Smathers is contact person: 532-5286; smathers@ksu.edu]. This course has been reviewed by the faculty of JMC.

**Kinesiology**

ADD: KIN 499 – Honors Project. (3) I, II, S. Open only to Arts & Sciences students who are active members of the University Honors Program.

RATIONALE: Currently, the Department does not have a course listing for honors students to take as their Honors Projects in Kinesiology. Such a course is listed in most departments (typically as Senior Honors Thesis – but this is being changed to Honors Project) and serves as a “course” which is actually independent study. Students in the University Honors Program are required to do an Honors Project their junior/senior year and this course number allows them to receive credit.

EFFECTIVE DATE: Spring 2010

**Military Science**

ADD: MSCI 499 – Honors Project. (3) I, II, S. Open only to Arts & Sciences students who are active members of the University Honors Program and Advanced Military Science Curriculum (must have completed the Basic Military Science Curriculum or received US Army Cadet Command credit through prior military service or completion of the Leaders Training Course).

RATIONALE: Currently, the Department does not have a course listing for honors students to take as their Honors Projects in Military Science. Such a course is listed in most departments (typically as Senior Honors Thesis – but this is being changed to Honors Project) and serves as a “course” which is actually independent study. Psychology

ADD:  PSYCH 550 – Advanced Psychological Research Methods.  (4) I, II.  Students will read primary literature, design research studies, employ the instruments and technology currently used in psychological research. Pr.: PSYCH 350, STAT 325 (or equivalent). CoR.: Majors only, Grade of B or better in PSYCH 350.

RATIONALE:  This class is for students in the DCE degree completion program who are trying to get a degree in Social Sciences.

EFFECTIVE DATE:  Fall 2010

ADD:  PSYCH 556 – Multicultural Psychology.  (3) I, II  Introduce and familiarize students with the concept of multicultural psychology. Pr.: PSYCH 110.

RATIONALE:  This class will be cross-listed for Psychology and American Ethnic Studies. It will serve as a 500-level elective for both majors and provides content that is currently lacking in both majors.

IMPACT:  None

EFFECTIVE DATE:  Fall 2010

ADD:  PSYCH 570 – Psychopharmacology. (3) II.  Survey of basic principles of neural communication and pharmacology, the etiology and bio-behavioral bases of substance abuse, and chemical treatments of psychiatric disorders. Pr.: PSYCH 202, PSYCH 470.

RATIONALE:  Kansas State University students currently do not have a course that explores psychopharmacology at the advanced undergraduate level. An advanced undergraduate course in this topic will serve students who pursue careers in medicine, biotechnology, or behavioral sciences as well as students that pursue advanced degrees in Psychology, Psychiatry/Medicine, Neuroscience, or other life science disciplines. The course complements Drugs & Behavior (PSYCH 202), which provides a lower-level survey of drug effects and related behaviors and is somewhat focused on abused drugs and drug dependence. This course provides more depth in the topics that are shared with Drugs & Behavior (i.e., addictions). This course also has an additional focus on treatments for psychiatric disorders which is not shared by Drugs & Behavior.

IMPACT:  The Division of Biology and the Department of Biochemistry have been contacted. They do not object to our offering this course.

Geography

ADD: GEOG 833 – Seminar in Sustainability Science, Thought, and Approaches. (3) I. Exploration of scientific, social, and philosophical aspects of sustainability, including concepts, approaches, and decision-making. Environmental, economic, and social considerations will be included.
RATIONALE: Sustainability is a relatively new field, but is deeply related to the geographic tradition of human-environment studies. Building on the UN initiative that lead to publication of Our Common Future ("The Brundtland Report"), and followed up with Our Common Journey (a National Research Council (National Academy of Sciences) effort), geographer Robert Kates and others proposed a Sustainability Science approach in a 2001 Science article. Students should be exposed to ideas related to scientific, social, and philosophical aspects of sustainability, and to the breadth of related approaches and foci (relevant to social, environmental, and economic sustainability, e.g.). With development of numerous sustainability-related initiatives now existing locally to internationally, the time is right to offer coursework related to sustainability concepts to our graduate students in Geography.

According to the department’s 2007 priority-setting document (www.k-state.edu/provost/planning/strategy/priority/collegedep/as/priorities/geography.pdf), the Department of Geography “strives to have leading undergraduate and graduate geography programs in the State of Kansas, in the region, and nationwide among land grant universities, with an emphasis on rural geography and sustainability.” Sustainability is central among departmental core areas (www.k-state.edu/geography/academics.html). The Department of Geography already offers an undergraduate course (GEOG 360) in Sustainability Science. The proposed course will expand sustainability-focused offerings to include graduate students in a seminar format. The course also should be of interest to graduate students in other programs.

IMPACT: None likely at the 800 level. No other A&S graduate seminars focused on sustainability are known.

Geology

FROM: GEOL 640 – Introduction to Geophysics. (3) I. Introduction to a broad area of solid earth geophysics and exploration geophysics, such as plate tectonics, earthquake study, structure and dynamics of the Earth’s deep interior, and geophysical exploration for natural resources. Pr.: PHYS 114

TO: GEOL 743 – Introduction to Geophysics. (3) I. Introduction to geophysics, its uses in studies of the earth’s interior, its utility of illuminating subsurface geological features, and its applications in fields such as groundwater studies and the development of energy resources. Pr.: PHYS 114; MATH 220

RATIONALE: Our new geophysicist is teaching this course at a higher level, suitable for graduate students but accessible to senior-level geology majors.
EFFECTIVE DATE: Spring 2010

TO: GEOL 745 – Exploration Geophysics. (3) II. Principles and applications of seismic, gravity, magnetic, and other geophysical methods used in energy, mining, and other industries to locate subsurface targets of interest. Pr.: GEOL 743.

RATIONALE: Our new geophysicist is teaching this course at a higher level, suitable for graduate students but accessible to senior-level geology majors.

EFFECTIVE DATE: Spring 2010

ADD: GEOL 872 – Biogeochemistry of Soils and Sediments. (3) II. Review and discussion of current understanding of the chemical, biological, and mineralogical interactions of groundwater, soils, shallow and deep sediments. This course will deal with biotic controls on chemistry of the environment and with the geochemical control of the structure and function of ecosystems. Pr.: GEOL 711, GEOL 605.

RATIONALE: Recent discoveries in the interactions of groundwater, soils, and sediments are important to the career development of geology students and recent graduates in the fields of hydrogeology and environmental geology.

Political Science

ADD: POLSC 638 – Ethnic Conflict. (3) II. Ethnic Conflict in Comparative Prospective. Comparative examination of ethnic conflicts across regions with the emphasis on Africa. Pr.: Sophomore standing.

RATIONALE: With the creation of African Studies Certificate and Minor, students need additional courses aside from the current offered courses to fulfill these programs.

IMPACT: None

EFFECTIVE DATE: Spring 2010

RATIONALE: To date, the Department of Political Science has not had a faculty member with expertise to offer courses on the vitally important subject of international human rights. We have now added a faculty member
with this expertise, and would like to offer an upper division undergraduate course on Global Human Rights on a consistent basis.

IMPACT: None
EFFECTIVE DATE: Spring 2010

ADD: POLSC 670 – Law, Politics, and Literature. (3) I, II, S. Classic and contemporary works of literature, including novels, plays, short stories, and poems, are used to explore themes in law and politics. Pr.: POLSC 301 or junior standing.

RATIONALE: This is a new, interdisciplinary course that uses classic and contemporary works of literature to explore themes in law and politics. Many law schools offer a course on law and literature and some political science undergraduate programs offer a course on politics and literature. This class combines features of both of those types of courses. This course can be used to fill our upper-level major requirement in political thought or used as an elective. Students may also take the course for credit in the Primary Texts certificate program and as part of the Pre-Law studies curriculum within political science.

IMPACT: English. This course has the support of the English faculty and the course will be cross-listed as ENGL 570.
EFFECTIVE DATE: Summer 2010

ADD: POLSC 739 – Intergovernmental Relations. (3) I, II. Evolution of the intergovernmental system in the United States and internationally. Emphasis on federal, state, and local interrelationships.

RATIONALE: This course is a staple in most public administration programs (a subfield within KSU’s political science department), and would be an important addition to our undergraduate and Master in Public Administration curriculums. We now have faculty capable of teaching this course.

RATIONALE: Concepts and processes involved in the understanding of the psychological development of the person throughout the lifespan. Major theoretical systems relevant to Developmental Psychology are examined with emphasis upon the study of cognitive, affective, social, and psychomotor changes. Developmental research will be presented, discussed, and analyzed. Its purpose is to provide a core foundation for psychology students.

ADD: PSYCH 851 – Practicum in Health Psych. (3) I, II. Independent health research designed in conjunction with major faculty advisor plus another faculty member to produce a journal submission and departmental presentation. Pr.: Consent of Instructor.

RATIONALE: Independent health research designed in conjunction with major faculty advisor plus another faculty member. Should result in a research write-up for journal submission and departmental presentation. Conference presentation submissions are encouraged. Its purpose is for students to garner hands-on experience with health-related research as well as developing professional skills used in the field.

ADD: THTRE 610 – Internship in Theatre. (0-6) I, II, S. Supervised participation in an internship at a professional theatre. May be repeated for a maximum of 12 credit hours. Pr.: THTRE 261 or THTRE 368;
junior standing and consent of supervising faculty member and approval of faculty.

RATIONALE: The Theatre Division of CSTD has a course designated for rehearsal credit (for being cast in plays) and for practicum credit (working on a department production in a non-acting capacity), but not for internships that happen off campus in other locations. We wish to be able to offer students credit for learning opportunities on site at professional theatres. Many such opportunities are available during the year and in the summer areas ranging from theatre management to scenic design, to acting. These opportunities enhance the skills of our students and help prepare them for the professional theatre.

EFFECTIVE DATE: Spring 2010

ADD: THTRE 880 – Creative project. (3) I, S. Major creative project undertaken to demonstrate competence in a specific area of theatre or drama therapy as required for the Master’s Degree. Pr.: Sixteen hours of graduate credit in theatre.

RATIONALE: Theatre MA students do creative projects rather than theses or reports. These are highly labor-intensive projects which demonstrate the student’s competence in at least one area of emphasis, such as scenic design, costume design, lighting design, directing, acting, playwriting, or drama therapy. Artistic work is required, as is research, script analysis, and written reflection. Currently, students do not receive credit for their Creative Project and the graduate theatre faculty feel that it should be acknowledged on their transcripts.

Graduate Certificate in Applied Statistics:
The certificate requires 15 hours of graduate level courses in applied statistics. Specific courses which may be included on the list of courses claimed are:
- Stat 702 or Stat 703 or Stat 706,
- (Stat 704 and Stat 705) or Stat 713,

A maximum of three credit hours can be earned from coursework taken outside the Department of Statistics, either in another department on campus or at another university. Persons wishing to apply such credits will gain approval from the director of the certificate program. Courses so approved must clearly be of an applied statistics nature, of a duration commensurate with the number of credit hours claimed on the certificate, and at a graduate level (under no circumstances will undergraduate courses be considered). Persons seeking for this exception will need to supply such information as deemed necessary by the director for such approval.

**RATIONALE:** A number of students who have claimed the Graduate Certificate in Applied Statistics or who have expressed an interest in doing so have taken significant coursework in other departments or universities which is consistent with the aims of the certificate, and would like to be able to count some of those hours toward the certificate.

**IMPACT:** No negative impact expected.
