President Frank Spikes called the meeting to order at 3:30 p.m.

2. The October 29, 2007 minutes were approved.

3. Division of Continuing Education Issues - Betty Stevens, John Allard, David Stewart
   President Spikes introduced representatives from the Division of Continuing Education (DCE), Betty Stevens, John Allard, and David Stewart to update Senate in a couple of areas.
   1. iSIS Planning
      Betty Stevens indicated that DCE staff has been involved in the planning for iSIS since the beginning of the LASER project. John Allard reviewed DCE involvement in iSIS. DEC staff identified well over 100 requirements to discuss with the LASER team and most of these have been met. DCE staff members are continuing to meet with various departments such as the Registrar’s office staff to determine new processes as iSIS is implemented. He indicated that iSIS integration for DCE will work very well. They will be delaying Graduate School integration for one year so will continue business as usual in this area. If a student is degree seeking they will go through the regular registration process. There was a discussion about the 9-hour limit for non-degree seeking students in certificate programs. Senator Guzek inquired about the grading of non-standard classes and Senator Gehrt replied that all classes will be graded electronically.
   2. Course and Program Development for International Distance Education
      David Stewart discussed international distance education initiatives. There were some agreements at some levels that the university would be working with persons in Turkey. They were interested in general business and bachelor degree completion and possible future areas such as masters programs in engineering. He began to collaborate with departments and faculty to focus on general business and interdisciplinary studies and discovered there were nine courses that needed to be developed online to offer these programs. He then went to specific departments to explore online course development. As he went to various departments and faculty he received a tremendous response of support but lack of resources was an issue. The effort in Turkey was not successful as the negotiated agreement broke down with one primary reason being price of K-State courses. In going through this process there were lessons learned on how to approach these future opportunities. One observation from Stewart is that these programs will take a long time to develop. Senator Hosni commented that there was a perception at the time that DCE did not take into consideration the faculty load and thanked them for explaining their efforts. Stewart had concerns about faculty capacity from the very beginning. Stevens indicated DCE does not plan to find their own faculty but rather each department must identify faculty to meet the distance education needs of their own department. Stewart indicated that key players need to be brought together early in the process. Also, a program should not just focus on one country but rather programs to be offered more widely. There needs to be basic marketing research. President-elect Fairchild suggested that we should focus on potential programs that utilize the strengths at K-State. Stewart said we need to look at our strengths, the marketing research information, then identify current connections, then build relationships, then finally the program. Senator Carroll suggested that faculty need to be re-tooled to better teach to an online international audience. President Spikes requested that DCE assist Faculty Senate in urging the administration to develop a strategic plan to address international online programs.

Senator Guzek suggested that FSCOUUP or some group begin strategic planning in this area. Past President Adams indicated that the draft Strategic Plan addresses this in a non-specific way. President Spikes suggested that he discuss this matter with the provost and with the strategic planning group. He said it was important to start
a conversation on campus regarding this topic. He also suggested that this topic be included in the DCE working group that he participates in. The committee agreed with his recommendations.

4. Academic Calendar 2008-2013 - Attachment 4-page 44

President Spikes discussed the Academic Calendar. There has been no response from senators to have a meeting to further discuss the calendar in a small group. Any request to the Board of Regents to modify the number of required class days would be a long process. He also mentioned that the calendar needs to go to the Board for approval in January. Senator Hosni moved to place the Academic Calendar on the December agenda for approval. The motion was seconded. Senator Cauble understood that the calendar committee was going to review suggestions and possibly submit changes back to the Senate. President-elect Fairchild suggested that President Spikes needs to find out what happens if the proposed calendar is defeated. Senator McCulloh commented that the instructions that the Faculty Senate have given the calendar committee have somewhat tied the committee’s hands in modifying the calendar. President Spikes would like to continue to have conversations about the calendar with Faculty Senate and the Registrar as a condition of approval for this proposed calendar. President Fairchild suggested that either the Calendar Committee be expanded to a broader, more representative membership or Faculty Senate needs to be more involved in the process. Motion carried.

5. Reports from Standing Committees and Student Senate

A. Academic Affairs Committee – Doris Carroll
   1. Course and curriculum changes - Pages 4- 40; includes Attachments 1 and 2
   2. Academic Fresh Start and Forgiveness Policies – Second reading and vote – Attachment 3-page 41

B. Faculty Affairs Committee – Betsy Cauble
   1. Update on Graduate Student Grievance Procedure Proposed Handbook Changes
      Senator Cauble announced they are still negotiating with the Graduate School on where this policy should reside.
   2. Update on University Handbook change, Appendix G – GGB Policy and Hearing Procedures
      Senator Cauble announced that one of the committee members suggested including an appeal process for extension of the appeal filing deadline. The committee will continue to research and review this possibility before the policy comes forward to Faculty Senate for a vote. President-elect Adams recommended including an implementation date in the policy. The committee is also reviewing persons with at least a .10 administrative appointment, per President-elect Adams, and considering how that may be addressed within the policy.
   3. Update on University Handbook change, Section D40 - Consulting days
      Senator Cauble distributed a proposed revised policy regarding consulting days. Senator Cauble moved to place the University Handbook change to Section D40 – Consulting Days on the December Faculty Senate agenda for vote. Motion carried.
   4. Senator Cauble announced that the committee will be discussing administrative reviews.
   5. Senator Cauble indicated that the Regents Council of Business Officers is discussing the retirement health insurance bridge program for possible system-wide implementation. Also, there is interest in elimination of the health insurance waiting period for Regents institutions.

C. Faculty Senate Committee on University Planning – Roger Adams
   Past President Adams announced that the committee sponsored an IT forum last week with about 60 participants. The notes from the meeting will be distributed. President Spikes thanked him and Senator Michael North for taking the lead on this successful forum.

D. Faculty Senate Committee on Technology – Michael North
   Senator North will request that Lynn Carlin, Interim Vice Provost for Information Technology, and James Lyall, Associate Vice Provost for Information Technology Services, attend the January 15 Faculty Senate meeting. He reported that the only topic they have been dealing with is the k-state.edu and ksu.edu domain names and how search engines find and report information from these domains. Dale Askey will meet with James Lyall and Lynn Carlin about this topic. The e-mail task force and IT task force continue to meet.
E. Report from Student Senate – Nick Piper – no report

6. Announcements

A. Presidential announcements
   1. President Spikes reminded the committee that Dr. Holland’s evaluation is on-going and comments may be
      made through December 7.
   2. He announced that the recent grievance panel has upheld the evaluation of the grievant.

B. Faculty Senate Leadership Council
   1. President Spikes discussed the recent meeting with President’s Staff regarding the Olathe Campus. He reported
      the next meeting will include Lynn Carlin regarding IT issues.
   2. President Spikes reported that he spoke with the Targeted Excellence Committee.

C. Kansas Board of Regents

7. Old Business - none

8. New Business - none

9. For the Good of the University
   1. Senator Kearns announced that the General Education task force will have open meetings next week.
   2. Senator McCulloh announced that he started Phased Retirement this semester so Senator Clark will represent
      the Arts & Sciences caucus next semester on the Executive Committee.
   3. Past President Adams announced that Robert Sawyer, an internationally recognized, award winning author,
      will keynote the opening of the library’s Science Fiction, Fantasy, and Horror Collection tomorrow.

10. The meeting was adjourned at 5:45 p.m.

Submitted by:
Jennifer Gehrt
ACADEMIC AFFAIRS

1. Course and Curriculum Changes
   A. Undergraduate Education
      1. Senator Carroll moved to place on the December Faculty Senate agenda for approval the following course and curriculum changes as approved by the College of Agriculture on October 8, 2007:

       **COURSE CHANGES**
       *Animal Sciences and Industry*
       Changes to:
       ASI 395 Advanced Meat Evaluation
       Add:
       ASI 333 Equine Enterprise Management

       *Horticulture, Forestry and Recreation Resources*
       Changes to:
       HORT 275 Concepts of Horticultural Design I
       HORT 508 Landscape Maintenance
       HORT 510 Horticultural Design II
       HORT 515 Turf Management Basic Turfgrass Culture
       HORT 517 Golf Course and Sports Turf Operations
       HORT 551 Landscape Contracting and Construction The Business of Landscape Contracting
       HORT 555 Landscape Irrigation Design and Contracting The Fundamentals of Landscape Irrigation Design
       HORT 582 Foundations of Horticultural Pest Management
       Add:
       HORT 325 Introduction to Organic Farming
       HORT 360 Public Horticulture
       HORT 516 Intensive Culture of Golf and Sports Turf
       HORT 552 Horticultural Landscape Construction
       HORT 583 Survey of Horticultural Ornamental and Food Crop Pests
       HORT 587 Turfgrass Diseases and Their Management
       HORT 588 Turfgrass Weeds and Their Management
       HORT 589 Turfgrass Insects and Their Management
       Drop:
       HORT 519 Turfgrass Pest Management

       *Plant Pathology*
       Changes to:
       PLPTH 575 Special Topics in Plant Pathology
       Add:
       PLPTH 576 Special Topics in Plant Pathology
       PLPTH 583 Survey of Horticultural Ornamental and Food Crop Pests
       PLPTH 587 Turfgrass Diseases and Their Management

   **CURRICULUM CHANGES**
   *(Attachment 1)*

   Motion carried.
2. Senator Carroll moved to place on the December Faculty Senate agenda for approval the following course and curriculum changes as approved by the College of Human Ecology on October 8, 2007:

**COURSE CHANGES**

*School of Family Studies and Human Services*

Changes to:
- FSHS 585 Professional Seminar in Family Life Education

*Department of Hotel, Restaurant, Institution Management and Dietetics*

Changes to:
- HRIMD 120 *Introduction to Survey of* the Hospitality Industry
- HRIMD 221 Topics in Hospitality
- HRIMD 463 Convention Services and Event Management

Add:
- HRIMD 443 Food Writing

**CURRICULUM CHANGES**

*Department of Apparel, Textiles, and Interior Design*

- Changes to the Bachelor of Science in Apparel and Textiles: Add STAT 325 as a course option under General studies courses. (See page 3 of white sheets for rationale)

*Department of Hotel, Restaurant, Institution Management and Dietetics*

- Changes to the Bachelor of Science in Hotel and Restaurant Management: Replace ENGL 516 with ENGL 517 under general requirements. Under Professional Studies, HRIMD 120 has increased one credit hour thus increasing Professional Studies from 37 to 38 credit hours. Under Professional Electives, delete HRIMD 425 and HRIMD 665, and increase the credit hours in HRIMD 463 from 2 to 3 thus changing professional electives from 15 hours to 14 hours. Total credit hours for graduation have not changed. (See pages 5-7 of white sheets for more detail).

Motion carried.

3. Senator Carroll moved to place on the December Faculty Senate agenda for approval the following course and curriculum changes as approved by the College of Technology & Aviation on October 16, 2007:

**COURSE CHANGES**

Changes to:
- AVM 315 Advanced Avionics

Add:
- PPIL 251 Private Pilot Helicopter Ground School
- PPIL 252 Private Pilot Helicopter Flight Lab
- PPIL 281 Instrument Helicopter Pilot Ground School
- PPIL 282 Instrument Helicopter Pilot Flight Lab
- PPIL 291 Commercial Pilot Helicopter Ground School
- PPIL 292 Commercial Pilot Helicopter Flight Lab
- PPIL 351 Flight Instructor Helicopter Ground School
- PPIL 352 Flight Instructor Helicopter Flight Lab
- AVM 242 Navigational Aids and Communication Systems for Avionics
- COT 020 University Honors Program
- COT 189 Introduction to University Honors Program
Drop:
PPIL 310 Aircraft Certification

CURRICULUM CHANGES

• Changes to the Associate of Technology in Engineering Technology, Mechanical Engineering Technology Option: Replace CMST 101 with CMST 110. Delete ETA 020. Total hours required for graduation have changed from 67 to 68.

• Changes to the Associate of Technology in Engineering Technology, Electronic and Computer Engineering Technology Option: Replace CMST 101 with CMST 110. Delete ETA 020. Total hours required for graduation have changed from 67 to 68.

Motion carried.

4. Senator Carroll moved to place on the December Faculty Senate agenda for approval the following curriculum changes as approved by the College of Education on October 23, 2007:

CURRICULUM CHANGES

Department of Secondary Education
Degree Name Change:
FROM: Bachelor of Science
TO: Bachelor of Science in Education

Department of Elementary Education
Degree Name Change:
From: Bachelor of Science in Elementary Education
To: Bachelor of Science in Education

Rationale: The College of Education would like to unify the degree name for both Elementary and Secondary to better describe their program.

Effective Date: Fall 2008

Motion carried.

B. Graduate Education – Senator Carroll moved to place on the December Faculty Senate agenda approval of the following curriculum change approved by the Graduate Council on September 4, 2007:

New Certificate Program
Interdisciplinary Graduate Certificate in Stem Cell Biotechnology (Attachment 2)

Motion carried.

C. General Education

1. The following courses have been approved by the UGE Council for continued UGE status:
   (Informational item only)

   ASI 303 History & Attitudes of Animal Use
   ASI 330 Horse as a Window to the World
   ART 100 Two Dimensional Design
   ECON 110 Principles of Macroeconomics
D. Academic Fresh Start and Forgiveness Policy – Attachment 3, page 41
Senator Carroll moved to place the Academic Fresh Start and Forgiveness Policy on the December Faculty Senate agenda for a second reading and vote.

Senator Carroll indicated they have received no additional information from anyone except that the financial aid office has no problems with the proposal.

Motion carried.
Animal Sciences and Industry
Business Option

FROM: BUSINESS & ECONOMICS  
(Required)
ACCTG 231 Accounting Business Operations
ACCTG 241 Accounting Investments & Finance

Select 6 Courses
Agricultural Economics - Any course numbered 202 or higher except 490
Accounting – Any course
Family Studies – FSHS 105
Finance – Any course
Management – Any course
Marketing – Any course

TO: BUSINESS & ECONOMICS  
(Required)
ACCTG 231 Accounting Business Operations
ACCTG 241 Accounting Investments & Finance

Select 6 Courses
Agricultural Economics - Any course numbered 202 or higher except 490
Accounting – Any course
Economics – Any course 500-level and above
Family Studies – FSHS 105
Finance – Any course
Management – Any course
Marketing – Any course

RATIONALE: 500-level economics courses are worthwhile choices for the "Business and Economics" section.

IMPACT: We do not anticipate a significant impact on the Economics Department.

EFFECTIVE DATE: Fall 2008
Science/Pre-Vet Option

FROM: Physics/Math/Statistics Requirement
(Minimum 6 hours)
Select From:
PHYS 113, 114
MATH 205, 210, 211, 220, 221, 222
STAT 325, 340, 350, 351

TO: Physics/Math/Statistics Requirement
(Minimum 6 hours)
Select From:
PHYS 113, 114
MATH 100, 205, 210, 211, 220, 221, 222
STAT 325, 340, 350, 351

RATIONALE: Science/Pre-Vet Option students who choose to complete the Science/Pre-Vet option, but are not planning on going to Vet School would be allowed to use MATH 100, College Algebra, to meet the 6 hours of math requirements of the option. All of our other options require MATH 100, but also require only 3 additional hours of Math/Statistics/Computers.

IMPACT: No impact on other departments

EFFECTIVE DATE: Fall 2008

Bioscience/Biotechnology, Business, Communications, Production/Management, and Science/Pre-Vet Options

FROM: Currently we allow students majoring in Animal Sciences and Industry within the Bioscience/Biotechnology, Business, Communications, Production/Management, and Science/Pre-Vet Options to have the option of taking FDSCI 302, Introduction to Food Science, as one of their Ag elective courses outside of Animal Science.

TO: We are proposing that the same set of students have the option of also taking FDSCI 305, Fundamentals of Food Processing, or FDSCI 690, Principles of HACCP as one of their Ag elective courses.

RATIONALE: Courses in this area are intended to provide breadth to a student's curriculum. We currently allow only FDSCI 302 to meet this requirement. FDSCI 305 and FDSCI 690 would be equally beneficial to our students.

IMPACT: We anticipate this will have little impact on the Food Science and Industry program.

EFFECTIVE DATE: Fall 2008
Production/Management Option

**RATIONALE:** Several of our students change options from the Science/Pre-Vet option to the Production/Management option after their first three years. Most of these students have taken ASI 520, Companion and Lab Animal Management. They would like to use it in this option. This change would require these students to take at least two of our production courses. 500-level economics courses are worthwhile choices for the “Business and Economics” section.

**IMPACT:** We do not anticipate a significant impact on the Economics Department.

**EFFECTIVE DATE:** Fall 2008

Add new category:

**Specialization Electives (select 4 hours)**

- GRSC 610 Elec./Grain Proc
- GRSC 500 Milling Science I
- GRSC 745 Fund. Bioprocessing
- GRSC 720 Extrusion Proc. Fd. & Fd.
- EDLST 212 Intro to Lead concepts
- FDSCI 690 HACCP
- GRSC 712 Vib. Spect. Anal
- GRSC 713 Cont. Chromotographic Anal.

Free Electives: 6 hrs
Total hours required: 128 hrs
RATIONAL: The above changes are being made to allow students in the Cereal Chemistry option as much flexibility as possible to prepare for careers in the baking of food industries while still gaining a foundation of the newer technologies prevalent in the industry.

CHM 220/250 are being dropped as alternates and CHM 210/230 will be used for this option.

GRSC 150 will replace GRSC 101 for this option. GRSC150 is more appropriate for students in this option.

GRSC 630 Management Applications will be dropped to make room for addition hours of specialization electives.

ATM 540 is no longer offered and will be replaced with GRSC540. GRSC 541 will be added.

BIOCH 265 is being dropped as an alternate and BIOCH 521 and BIOCH 522 will be required for this option.

ASI 318 and HN 132 are being dropped as alternates and HN400 will be required for this option.

For Cereal Chemistry majors the suggested and Specialization electives are more clearly defined and their scope has been broadened to introduce students to additional, most current topics in the Grain industry.

IMPACT: No major impact outside of department.

EFFECTIVE DATE: Fall 2008

FDSCI 501 Food Chemistry 3 hrs

or

FDSCI 305 Fund Food Processing 3 hrs

ATM 540 Food Engin Tech 3 hrs

Select 9 hours from the following:

Business Electives (select 9 hours)

ACCTG 241 Acctg Investment Finance 3 hrs
ACCTG 331 Acctg Processes and Controls 3 hrs
ECON 530 Money and Banking 3 hrs
FINAN 450 Principles of Finance 3 hrs
IMSE 501 Industrial Managment 3 hrs
MANGT 300 Intro to TQM 3 hrs
MANGT 530 Industrial & Labor Relations 3 hrs
MKTG 400 Marketing 3 hrs
MKTG 542 Prof Selling and Sales Mangt 3 hrs

Add new category:

Specialization Electives (select 3 hours)

GRSC 610 Elec./Grain Proc 3 hrs
GRSC 500 Milling Science I 4 hrs
GRSC 745 Fund. Bioprocessing 3 hrs
GRSC 720 Extrusion Proc. Fd. & Fd. 4 hrs
EDLST 212 Intro to Lead concepts 3 hrs
FDSCI 690 HACCP 2 hrs
GRSC 712 Vib. Spect. Anal 1 hrs
GRSC 713 Cont. Chromotographic Anal. 1 hrs

Free Electives 9 hrs

Free Electives 8 hrs

Total hours required 128 hrs

Total hours required 128 hrs

RATIONALE: The above changes are being made to allow students as much flexibility as possible while still integrating courses covering the newest technologies in the food industry. Total number of hours required for graduation has not changed; however 3 hours of specialization electives have been added and total hours of free electives has been reduced from 25 to 17.

GRSC 150, Principles of Milling will provide production managers and baking professionals a more through understanding of the flour and the milling process.

CHM 350 and BIOCH 521 are being dropped as an alternates and BIOCH 265 will be required for this option.

ME 212 will be replaced with GRSC 110, Flow Sheets. GRSC 110 will be more applicable for later GRSC senior level courses and for use in the bakery production layout and design areas.

MATH 210 and alternate MATH 220 will be replaced with MATH 205 General Calculus and Linear Algebra. MATH 205 uses an algebra approach more appropriate for students in this option.

ATM 540 is no longer offered and will be replaced with GRSC540. GRSC 541 will be added.
EDLST 212 Introduction to Leadership Concepts will be added as a Specialization elective choice in response to our industry’s repeated requests that BSM students would benefit from additional leadership education.

For all BSM majors the suggested Specialization Electives are more clearly defined and their scope has been broadened to introduce students to additional, most current topics in the Grain industry.

IMPACT: Letters have been written to the departments of Mechanical Engineering and Mathematics advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008

Total hours required 126 hrs Total hours required 124 hrs

RATIONALE: The above changes are being made to allow students as much flexibility as possible in the program to prepare for careers in the feed and allied industries, but also having the background for careers in plant management and operations in the biofuels and related industries. Students will still be able to complete the Pre-Vet Professional Requirements to apply for veterinary medicine if they desire.

Many of the students entering the program have already completed enough math to begin with MATH 205 which is a higher level course that remains in the degree program. Additionally, most students come into the program with the necessary computer skills and do not need a PC course.

Currently all students in the program are required to take both AGEC 220 and AGEC 420 which have some similar areas of content. Only one of these classes is needed for the Feed Science students.

The new GRSC 745 course will allow our students the opportunity to add knowledge and skills beneficial to understanding the production of biofuels and their related co-products.

IMPACT: Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008
Milling Science and Management - Management Option

FROM:

Required courses:

- MATH 220 Anal. Geom. & Calc. I 4 hrs

Free Electives 3 hrs
Total hours required 128 hrs

RATIONALE: MATH 220, will be replaced with MATH 205, General Calculus and Linear Algebra. MATH 205 has an algebra approach more appropriate for students in this option.

Replace BIOCH 265 with CHM 350 and CHM 351. This will upgrade the level of organic chemistry to better prepare students for chemistry related functions in the milling process.

GRSC 731 Milling Science II Lab (2) will be required for all milling science graduates. It will allow students to apply principles taught in GRSC 730 to increase technical understanding and meet expectations of industry.

Require all milling science graduates take GRSC 610 Elec/Grain Proc. Ind. Understanding of electrical principles and management is important in both options to safely manage and direct an electrically powered operation system.

Create new common specialization electives category for all options, including the previous elective choices for the management option plus selected grain science courses. With addition of GRSC 720 Extrusion and GRSC 745 Fundamentals of Bioprocessing, these changes strengthen the MSM degree program.
IMPACT: Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

RATIONALE: Chemistry requirements are changed to be consistent with the other two options in the major. All students will now take CHM 350 and 351 as part of the core requirements.

Create new common specialization electives category for all options, including the previous elective choices for the management option plus selected grain science courses. With addition of GRSC 720 Extrusion and GRSC 745 Fundamentals of Bioprocessing, these changes strengthen the MSM degree program.

IMPACT: Letters have been written to the affected departments outside of Grain Science advising them of the courses being dropped and added.

EFFECTIVE DATE: Fall 2008
Horticulture, Forestry and Recreation Resources

FROM: Horticulture Major with Options in:
- Fruit/Vegetable Production
- Greenhouse Management
- Nursery Management
- Landscape Design
- Landscape and Turf Management
- Horticultural Therapy
- Golf Course Management
- Horticulture Science

TO: Horticulture Major with Options in:
- Fruit/Vegetable Production
- Greenhouse and Nursery Management
- Landscape Design
- Landscape Management
- Horticultural Therapy
- Golf Course Management
- Horticultural Science
- Sports Turf Management
- Public Horticulture

RATIONALE: Option name changes more accurately reflect the curriculum. Combining the nursery management and greenhouse management options recognizes the considerable overlap that currently exists and recognizes the fact we can serve our students better within the context of one specialization. Renaming the landscape and turf management option reflects associated changes in the curriculum which will increase focus on landscaping, and the development of the new option in sports turf management with greater focus on turf management. Two new options in sports turf management and public horticulture reflect both changing demands of the horticultural industry for graduates and changing interests of students. Additional more specific rationale statements follow the detailed curriculum changes outlined on the following pages.

IMPACT: All impacted units have been contacted.

EFFECTIVE DATE: Fall 2008

HORT 589  Turfgrass Insects & Mgt

Horticulture elective  3
Pest management elective  3

Free electives ................................................. 7-9

RATIONALE:

Quantitative sciences: the change from CHM 210 to CHM 110/111 is due to our recognition that CHM 110/111 offers the knowledge of chemistry necessary for the horticulture major; BIOCHM 265 is required rather than one of two Organic chemistry electives, this change is required since the other elective requires CHM 210; removing computer science elective choices in recognition that the majority of our students come to us with acceptable computer skills

Horticulture requirement: the pest management elective has been incorporated into each of the specialization curricula, all hort students will be required to take HORT 582 Foundations of Hort Pest Management and depending on the specialization, also choose 1-3 additional credits from a list of approved courses; the addition of HORT 599 The Horticultural Professional is a new course required of all hort majors, this is a capstone course of a 3-course series (HORT 190, 590, 599) that focuses on the hort industry and serves as a mechanism to collect end-program assessments

Specializations: Changes within each specialization reflect changes in existing courses being put forth at this time and the addition of new courses being put forth at this time. Specialization name changes more accurately reflect the curriculum. Combining the nursery management and greenhouse specializations recognizes the considerable overlap and the fact we can serve our students better within the context of one specialization

IMPACT: All units who will be impacted by the above changes have been contacted.

EFFECTIVE DATE: Fall 2008
### Sports Turf Operations Management (New Option under the Horticulture major)

**Technical Core** ........................................ 20 hours

**Hospitality** ........................................ 4 hours
- HRIMD 220 Environmental Issues in Hosp. 2
- HRIMD 340 Contemporary Issues in Controlled Beverages 2

**Free Electives** ............................... 7 hours

Total Credit Hours Required for Graduation: 130
RATIONALE:

Sports Turf Operations Management is proposed as a new specialization under the Horticulture major in the Department of Horticulture, Forestry and Recreation Resources. There is a growing demand for professionals in this area and we believe the proposed curriculum is unique and will prepare graduates well for careers in this area. The Sports Turf Operations Management option was prepared with input from the Board of Directors of the Sports Turf Managers Association (STMA). This included comments from sports turf managers overseeing sports turf and related operations for major league baseball, the NFL, and K-12 school districts (see following pages). The national sports turf sales manager for the Toro Corporation is an adjunct faculty in our department, and will be involved in student instruction for 1 to 2 weeks every year.

Modeled after our Golf Course Management program, the Sports Turf Operations Management option places an emphasis on horticulture and turfgrass science, and complements this with course work in communications, business, and hospitality. The STMA members repeatedly emphasized the importance of business and communications and supported the inclusion of some hospitality courses. The importance of work experience prior to graduation is again emphasized with 6 credits of internship required.

In summary, we believe the proposed Sports Turf Operations Management option will be unique in the U.S., much as our current Golf Course Management program is, and will produce graduates well prepared for the challenges of this growing industry.

IMPACT:

All impacted units have been contacted.

EFFECTIVE DATE:

Fall 2008
## Public Horticulture (new option)

### Communications .................................. 11 hours
- ENGL 100 Expository Writing I 3
- ENGL 200 Expository Writing II 3

- MC 180 Fundamentals of Public Relations
- PSYCH 564 Psychology of Organizations 3
- RRES 635 Methods of Environmental Interp

### Free Electives ..................................... 13 hours

### TOTAL CREDITS FOR GRADUATION 130
RATIONALE:

The public horticulture option is intended for students interested in professional careers which promote horticulture and emphasize people and their education and enjoyment of plants. Such careers include director of a botanical garden or park; city or urban horticulturist; extension agent, teacher, educational director, or program coordinator; professional garden writer/editor or publication manager; public garden curator; and plant collections manager. Initial work on developing this specialization was based on recent and current student interest and the fact that very few universities offer this specialization. Additionally, with the continuing development of the K-State Gardens, K-State has the unique opportunity to become a model university garden demonstrating dynamic linkages between the Gardens and an academic unit of the University. While university gardens are not unique, embedding an academic discipline within a university garden is unique. The creation of the Public Horticulture specialization is one step in the Horticulture Divisions plan to establish K-State Gardens as a model university garden.

IMPACT:

No impact outside our department.

EFFECTIVE DATE:

Fall 2008
The Midwest Institute for Comparative Stem Cell Biotechnology (the Institute) was created in 2005 based upon emerging research and intellectual property development resulting from the discovery by Kansas State University personnel of a stem cell population in the matrix of the umbilical cord of humans and also domestic and laboratory animals. A website has been created for the institute: http://www.vet.ksu.edu/research/stemcell/index.htm

As is apparent from the website, stem cell research, development of related intellectual property and education in stem cell-related biotechnology are the primary goals. Significant progress has been made in research. All components of the pending patent have been licensed. Fees paid, while confidential under the licensing agreement, are the largest licensing fees ever received by the KSU research foundation by a large margin. The third element of the Institute’s aims, education, is the subject of the present proposal.

Learning objectives

The overarching purpose of the proposed certificate program is to add value to other degrees in the biological and life sciences, specifically including animal sciences, veterinary medicine, biology and biochemistry.

Specific learning objectives are enumerated in the assessment plan.

Courses

The core courses in the certificate are:

AP 711. Stem Cells and Comparative Biomedicine. (2) II, S. Characteristics of major categories of stem cells. Applicable or potential clinical uses, including their utilization in tissue engineering or targeted delivery of therapeutics.

AP 850 Stem Cell Techniques. (2) I, S. Cellular and molecular techniques and techniques on tissue culture. Lecture and laboratory hours to be determined.

ASI 802. Gametes, Embryos, and Stem Cells in Farm Animals. (2) I, in odd years. A study of gametes, embryos, pregnancy, and stem cells in farm species including supporting information from laboratory species and humans. Emphasis will be on the regulation of stem cells, gametes, and embryos and on the conceptus-maternal interactions to establish and maintain pregnancy and program conceptus and postnatal development. Two hours lec. a week. Pr.: BIOCH 521.

ASI 902 Topics in Stem Cell Biotechnology. (1) A journal club course in stem cell biotechnology in fall semesters. One semester is required. It can be repeated twice for a total of three credits in the stem cell certificate. Students will evaluate the contribution of scientific papers to the field of stem
cell biology, present scientific data, lead discussions of scientific literature, and become familiar with current concepts in the field of stem cell biology and biotechnology.

Elective courses for emphasis in research or entrepreneurship are:

**AP 710 Microanatomy.** Origin, development and microscopic structure of the cells and tissues for the animal body. Three hours lecture and six hours lab/week. Pr: First year standing in college of veterinary medicine. Fall semester.

**AP 995. Problems in Physiology.** (Var.) I, II, S. Special problem-involving techniques utilized in studying the function of various organ systems of the body. Pr.: Consent of instructor.

**ASI 600. Applied Animal Biotechnology.** (2) II. Emphasis will be placed on the current and future of animals in biotechnology related to food production as well as human medicine applications. Rec. Pr.: Senior standing, BIOCH 521 and ASI 500.

**ASI 961. Graduate Problem in Animal Sciences and Industry.** (1-3) I, II, S. In-depth study of a topic supervised by a member of the graduate faculty. Pr.: Permission of supervising faculty member.

**BIOL 510. Developmental Biology.** (3) II. Introduction to the stages and mechanisms of embryonic animal development. Integrated approach that includes classic experimental embryology and the genetic and molecular regulation of invertebrate and vertebrate animal development. Three hours lec. per week. Pr.: BIOL 450.

**BIOL 670. Immunology.** (4) II. Chemical, genetic, and biological properties of the immune response, acquired immunity, and antibody production. Pr.: Two courses in biology; and a course in biochemistry or equiv.

**BIOL 671. Immunology Lab.** (2) II. Laboratory exercises in immunology. Pr.: BIOL 670 or conc. enrollment. Three-hour lab a week plus one hour rec.

**BIOL 705. Eukaryotic Genetics.** (3) I. An integrated exploration of transmission genetics and molecular genetics of eukaryotic organisms. The focus will be on genetic model organisms and their contributions to our understanding of mechanisms of genetic transmission and exchange, mutagenesis, gene expression, and regulation of cell division and development. Modern approaches to genomic analysis will be discussed. Pr.: BIOL 450 and BIOCH 521.

**BIOL 707. Advanced Cell Biology.** (3) I. Selected current topics in cell biology which reflect recent advances in the field. Major topics include membranes and transport, protein sorting, signal transduction, cell adhesion and motility, cell cycle, apoptosis, and specialized cell functions. Pr.: BIOL 541.

**BIOL 886. Confocal, Fluorescence and Light Microscopy.** (3) I, in odd years. An introduction to theories, functions and applications of confocal, fluorescence and light microscopy, and fluorescent
molecules. Lab emphasis on students working on independent research projects requiring microscopy. Two hours of lecture and three hours of lab per week.

**DMP 705. Principles of Veterinary Immunology.** (2) II. Innate and adaptive defense mechanisms in domestic animals. Topics include vaccinology, immunopathology, autoimmunity, immunodeficiency, and immunomodulation. Pr.: BIOCH 521 and BIOL 455

**DMP 850. Immunology of Domestic Animals.** (3) I. This course is designed to introduce graduate students to immune responses of domestic animals to pathogens and parasites. Pr.: BIOL 541.

**MANGT 845 Technology Entrepreneurship and Strategies.** (3)
No pre-requisites other than enrollment in graduate school. This is an evening course taught by Professor Katz and two practitioners in the technology entrepreneurship field.

**GRAD 820. Leadership Practicum.** (3) I, II. Develops the connections between leadership theory and practice. By conducting a practicum project, students demonstrate the ability to apply concepts and ideas from the study of leadership to a practical leadership problem within an organization. Pr.: GRAD 801 and MANGT 845. The practicum will be developed for stem cell certificate students with the theme “Leading an innovation to market”.

**PLPTH 610. Biotechnology.** (3) I. The use of biotechnology and molecular genetic approaches in plant and animal sciences. Emphasis is on the use of molecular techniques for plant and animal improvement. Three hours lec. per week. Pr.: ASI 500. Same as AGRON 610.

**Requirements**

Students with graduate standing and a 3.0 GPA in a field in the biological sciences or with a cumulative GPA of 3.0 or higher in the DVM curriculum are eligible to enroll. Exceptions are possible upon approval by the coordinator in consultation with the faculty.

Fifteen hours are required:
AP850, ASI802, ASI902 and AP711 are required. ASI 902 may be taken either two or three times.

Any three of the remaining courses qualify for the remaining credit hour requirements. If BIOL707 is taken, BIOL541 may be required as a pre-requisite.

**Meeting learning objectives**

The core courses (AP711, AP850, ASI802, ASI902) are designed to ensure a benchmark level of knowledge about stem cell biotechnology. Elective courses are intended to allow for: (1) specific advancement toward research competence in the field or (2) commercialization of stem cell and related technology.
Courses in the certificate may be included in graduate programs upon approval of the student’s major professor and advisory committee. Inclusion of courses from other institutions and programs may be substituted for credit in the certificate in stem cell biotechnology with the approval of the program director in consultation with associated faculty.

**Need for the proposed program**

Stem cell biotechnology and regenerative medicine are emerging as central to the future of human and animal medicine and animal production. A supply of new scientists in basic disciplines with orientation to, or specific training in, stem cell biotechnology will be a necessary part of advancing this area of science, especially as political and social issues are untangled. The research and entrepreneurship tracks provided in the program will allow career flexibility that is becoming an ever-greater necessity for students.

It seems evident that, at this stage of the Institute’s development, a graduate level certificate is best suited to capitalize upon the on-going research and intellectual property development. Once a certificate program is successfully established and a significant track record has accrued, consideration will be given to proposal of an interdisciplinary degree. However that would be premature at this juncture and in the near future.

The target audience for the proposed certificate includes graduate students in all the biological sciences, specifically including animal science, veterinary medicine, biology and biochemistry. Also some residents in clinical medicine and surgery may find it advantageous to gain increased expertise in the rising field of regenerative medicine. In addition students in the DVM curriculum that have aspirations toward research or corporate careers would find the certificate in stem cell biotechnology valuable.

**Organization and Administration**

The governing faculty for the certificate in stem cell biotechnology is comprised of the Kansas State University Founding Fellows of the Midwest Institute for Comparative Stem Cell Biology (see website [http://www.vet.ksu.edu/research/stemcell/index.htm](http://www.vet.ksu.edu/research/stemcell/index.htm)). The program director will be Duane L. Davis.

The administrative home of the certificate program will be the Institute. The governance of the Institute is explained on the website. Briefly, the Institute is situated administratively in the Office of the Vice President for Research. Oversight is provided by a liaison committee comprised of the Vice President for Research, the Dean of the College of Veterinary Medicine, the Dean of the College of Agriculture and the Vice Chancellor for Research of the University of Kansas Medical Center and an Executive Committee described in the website.

An extensive list of scientists and other faculty members are affiliated with the institute and are listed in the website. These individuals provide a ready source of highly qualified advisors to students in the certificate program.
Budget

The budget is anticipated to be nominal in that all of these courses in the program will be taught for other purposes also.

Faculty

The Founding Fellows of the institute at Kansas State University are Dr. Duane Davis, ASI; Dr. Deryl Troyer, AP; Dr. Mark Weiss, AP. These individuals, along with the program director, will supervise the program.

Program Director

The program director will be Dr. Duane L. Davis, Professor of Animal Sciences and Industry.

Learning outcomes and assessment

Learning outcomes and an assessment plan is attached.
Cover Sheet for Student Learning Outcomes

Directions: For each program (e.g., degree, certificate, minor, secondary major, etc.) and level (undergraduate and graduate), please complete separate cover sheets. Feel free to make copies of this sheet if needed. Those graduate programs with an integrated master’s and doctoral program may provide one set of cover sheets.

Department / Unit: Midwest Institute for Comparative Stem Cell Biology
Title of Academic Program: Graduate Certificate in Stem Cell Biotechnology

Faculty contact(s) for the list of student learning outcomes for this academic program:

Duane Davis

Type of Degree (check one):

- Bachelor’s
- Master’s
- Ph.D.
- Ed.D.
- U. Certificate
- Minor
- Secondary major
- Associate
- G. Certificate
- Joint Degree (list the degree types): ________________
- Other: ________________

List of Student Learning Outcomes for this Degree Program

Please provide an attached list of learning outcomes or copy and insert them below.

1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

2. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.

3. Students completing the Graduate Certificate in Stem Cell Biotechnology will understand the emerging areas of application of stem cells in regenerative medicine and food animal health and production.

4. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess skills in culture of mammalian stem cells.
5. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biology.

Please check the description(s) that best reflect the information being submitted.

☐ Faculty for The Midwest Institute for Comparative Stem Cell Biology have reviewed and endorse the list of student learning outcomes being submitted.

Degree Program

Graduate Certificate in Stem Cell Biotechnology

Assessment of Student Learning Three-Year Plan

Student learning outcomes:

1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

2. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.

5. Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biotechnology.

Relationship to K-State Student Learning Outcomes (insert the program SLOs and check all that apply):
### University-wide SLOs (Graduate Programs)

<table>
<thead>
<tr>
<th>Program SLOs</th>
<th>Knowledge</th>
<th>Attitudes and Professional Conduct</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.</td>
<td>1. Direct measure—Capstone exam.</td>
<td>Program SLO is consistent with University SLO.</td>
</tr>
<tr>
<td>2. Posses the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.</td>
<td>2. Indirect measure—</td>
<td>Program SLO is consistent with University SLO.</td>
</tr>
<tr>
<td>5. Posses the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biology.</td>
<td>X</td>
<td>Program SLO is consistent with University SLO.</td>
</tr>
</tbody>
</table>

### How will the learning outcomes be assessed? What groups will be included in the assessment?

<table>
<thead>
<tr>
<th>Program SLOs</th>
<th>Knowledge</th>
<th>Skills</th>
<th>Attitudes and Professional Conduct</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Know cellular and molecular qualities that define stem cells; where</td>

<tr>
<td></td>
<td>2. Indirect measure—</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.

a. Upon completion of the coursework requirements for the Graduate Certificate in Stem Cell Biotechnology, all certificate seeking students will be expected to take a web-based comprehensive capstone exam covering fundamental aspects of stem cell biology (exam will be updated annually to reflect new developments in the field). Results of the exam will be shared with individual students upon completion. It is expected that students completing the Certificate will score 80% or greater on the capstone exam. It is recommended that Ph.D. students take the exam prior to, or as a part of, their preliminary examinations and, at the discretion of their graduate committee, it could serve as a part of the determination of their readiness to enter candidacy for the Ph.D. degree.

b. Core scientists in teaching courses and conducting research through the Midwest Institute for Comparative Stem Cell Biology will be heavily engaged in training students that ultimately are awarded the Graduate Certificate in Stem Cell Biotechnology. It is expected that these students will secure employment in academia or allied industries in biomedical sciences. Therefore, placement of all graduate and DVM students after completion of their degrees will be tracked to gain indirect evidence

<table>
<thead>
<tr>
<th>stem cells may be found; and how stem cells can be isolated.</th>
<th>Career placement of certificate graduates.</th>
<th>2. Posses the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.</th>
<th>1. Direct measure—Paper presentations and participation in paper discussions in ASI 902 Topic/Stem Cell Biotechnology.</th>
</tr>
</thead>
<tbody>
<tr>
<td>5. Posses the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell Biotechnology.</td>
<td>1. Direct measure—Oral paper presentations and participation in paper discussions in ASI 902 Topic/Stem Cell Biotechnology.</td>
<td>1. Direct measure—Attitude survey administered in ASI 902 Topics/Stem Cell Biotechnology</td>
<td>Program SLO is consistent with University SLO.</td>
</tr>
</tbody>
</table>

When will these outcomes be assessed? When and in what format will the results of the assessment be discussed?
1. Students completing the Graduate Certificate in Stem Cell Biotechnology will know cellular and molecular qualities that define stem cells; where stem cells may be found; and how stem cells can be isolated.
that the Certificate may be adding value to master, doctoral and DVM degrees. Data will be gathered via a web-based survey of graduates administered within 12 months of graduation.

2. **Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge and skills that allow them to critically evaluate the peer-reviewed literature in stem cell biology.**

   a. All students completing the Graduate Certificate will be required to enroll in ASI 902 Topics/Stem Cell Biotechnology. A rubric has been developed (attached) to assess student’s working knowledge of stem cell biology as well as their oral communication skills in discussing stem cell biology.

3. **Students completing the Graduate Certificate in Stem Cell Biotechnology will understand and have the skills to articulate the emerging areas of application of stem cells in regenerative medicine and food animal health and production.**

4. **Students completing the Graduate Certificate in Stem Cell Biotechnology will possess skills in culture of mammalian stem cells.**

5. **Students completing the Graduate Certificate in Stem Cell Biotechnology will possess the knowledge, skills and social understanding to critically evaluate and articulate the range of ethical issues associated with stem cell biology.**

   a. All students will complete a survey that evaluates attitudes toward the diversity of ethical views surrounding the use of stems cells in animal research and therapeutics. The ability of students to be tolerant and understanding of diverse views will make them more effective professionals once in the workplace. This web-based survey will be updated annually to include developing concerns and views and will be administered to all students in their first semester of enrollment in ASI 802 and again in their final semester in ASI 902 (coincident with completion of the coursework requirements for the Certificate). Completion of both surveys will be a requirement for successful completion of the Certificate.

**What is the unit’s process for using assessment results to improve student learning?**

The faculty coordinator for ASI 902 in each fall semester offering of the course will be responsible for summarizing assessment data for Certificate graduates from the previous academic year, as well as comprehensive data accumulated from all Certificate graduates (at least three years may be required to accumulate sufficient numbers of Certificate graduates to obtain some measure of reliability of the data). The data will be presented to both core faculty and graduate students sometime during the first four meetings of ASI 902. The data will be discussed (among faculty and students) and where results of assessment point to failure to attain the expected outcome, a corrective course of action will be recommended. This course of action may point to appropriate changes in curriculum and(or) fine tuning of assessment tools.
ATTACHMENT 3
ACADEMIC FRESH START GPA AND ACADEMIC FORGIVENESS GPA POLICY
CAPP POLICY – APPROVED BY CAPP ON 9-12-07
APPROVED BY ACADEMIC AFFAIRS ON 9-18-07

Expanded Rationale Statements for Recommended Changes to Academic Fresh Start Policy
(now includes the additional Academic Forgiveness Policy)

1. Although the numbers are small, since the Academic Fresh Start policy was initiated it has helped students with retention and persistence to graduation. There have been 140 students granted this option between 1997 and 2006, and the vast majority of these students who have benefited from Academic Fresh Start have graduated.

2. The addition of the Academic Forgiveness policy will minimize academic penalties to students who are subject to extenuating circumstances beyond their control, which have caused drastic changes to their academic performance for one or two consecutive semesters.

3. The resulting action of the Academic Fresh Start and Academic Forgiveness policies does not change grades or the cumulative GPA. The effect of these policies is to provide a second GPA (Academic Fresh Start GPA or Academic Forgiveness GPA) that excludes the effect of a student’s atypical performance caused by situations considered by these two policies. This second GPA is therefore a truer expression of a student’s academic abilities and performance.

4. The Academic Fresh Start GPA and the Academic Forgiveness GPA would remove the undesirable stigma of a GPA below a student’s abilities, and may allow under specified conditions the consideration of the student for university academic honors, scholarships, and professional programs. Some GPA requirements would not be affected, such as graduate school requirements and those leading to teacher licensure.

5. Having a written policy in place will create a consistent guideline to be used across colleges. Students and advisors will be aware that Academic Forgiveness is an option for students for whom extenuating circumstances caused drastic changes to their academic performance.

6. In order to be in line with the current Academic Dismissal Policy (12 hours with 2.2 semester GPA for immediate reinstatement), the proposed semester GPA required to apply for either of the Academic Fresh Start and Academic Forgiveness policies is a 2.2 (whereas the present Academic Fresh Start policy requires a 2.5 GPA).

7. A student may apply only once, and to only one or the other policy, and the process cannot be reversed.

8. Deans or their designees will still have the discretion to approve or not approve an application for Academic Fresh Start or Academic Forgiveness.
ACADEMIC FRESH START GPA POLICY and
ACADEMIC FORGIVENESS GPA POLICY
Approved by CAPP 9-12-07

The Academic Fresh Start and Academic Forgiveness Policies enable an undergraduate student to neutralize, in part, the grade impact of prior academic performance. Academic Fresh Start and Academic Forgiveness provide for the computation of an alternative GPA and for the use of that GPA in most academic situations. A student may apply only once, and to only one or the other, and the process cannot be reversed. A student may not apply for either policy until he or she has been reinstated into his or her college.

I. Conditions for a readmitted student to be eligible to apply for Academic Fresh Start are:

A) The student was not enrolled in a K-State course for three (3) calendar years prior to readmission.

B) After readmission, the student earned a K-State GPA of 2.2¹ or higher at the end of the academic session in which the twelfth credit was earned.

C) Up to 60 consecutive hours² of course work and K-State GPA may be restricted from the regular GPA calculation. The beginning point for the Academic Fresh Start GPA shall be the first, second, third, fourth, or fifth³ academic semester of enrollment following the student’s initial K-State date of entry. The choice of the starting point is designated by the student at the time of application for Academic Fresh Start and hours excluded from the calculation must be consecutive.

II. Conditions for a student to be eligible to apply for Academic Forgiveness are:

A) The student experienced one or more extenuating circumstances which caused a drastic change to the student’s academic performance in one or two semesters.

B) After the session(s) affected by the extenuating circumstance, the student earned a K-State GPA of 2.2 or higher at the end of the academic session in which the twelfth credit was earned.

C) Grades from up to two (2) consecutive semesters may be excluded from the regular cumulative GPA calculation.⁴

D) The student’s dean or designee may request documentation confirming the extenuating circumstances with the application for Academic Forgiveness.

¹ Rationale: This is the GPA standard to which all students are held in the Academic Dismissal Policy.
² Rationale: This change will accommodate students who do not take traditional full-time semesters.
³ Rationale: This change will accommodate students who do not take traditional full-time semesters.
⁴ Rationale: It is assumed that the negative impact of the extenuating circumstance(s) will be diminished within two semesters.
III. The calculation and reporting of Academic Fresh Start or Academic Forgiveness GPA and their uses in academic evaluation are:

A) **Academic Fresh Start** or **Academic Forgiveness** deletes nothing from the student's academic record. Grades earned before the Academic Fresh Start or Academic Forgiveness will remain on the transcript along with the cumulative GPA for all hours taken.

B) The transcript will clearly indicate the starting point of the Academic Fresh Start/Academic Forgiveness as well as the Academic Fresh Start/Academic Forgiveness GPA.

C) University-wide academic policies based on a cumulative GPA generally will use the Academic Fresh Start or Academic Forgiveness GPA. However, academic programs are not required to use Academic Fresh Start or Academic Forgiveness GPAs. Some programs, such as those in the graduate school or those leading to teacher licensure, may use all grades for the calculation of the GPA.

D. In order for students in the Academic Fresh Start or Academic Forgiveness program to be eligible for university academic honors, they must complete a minimum of 60 hours in residence, with at least 50 hours in graded courses after the Academic Fresh Start or Academic Forgiveness begins. Other academic policies will not be affected.

IV. Procedures for applying for Academic Fresh Start or Academic Forgiveness are:

A) A student applies for Academic Fresh Start GPA or Academic Forgiveness GPA through the deans or their designees of the college in which the student is enrolled.

B) A student must apply no later than the academic term prior to the one when the degree will be granted. (Students wishing to apply are encouraged to do so as soon as possible after qualifying).

C) When applying, the student must indicate the point at which he or she wishes the Academic Fresh Start or Academic Forgiveness GPA to begin.

   1. For readmitted students applying for Academic Fresh Start, the choices are: the end of the first, second, third, fourth or fifth semester, following the student’s initial K-State date of entry.

   2. For students who experienced extenuating circumstances and are applying for Academic Forgiveness, the semester(s) will be selected in consultation with the deans or their designees.
