### Attachment 4

Consent Agenda items For the May 8, 2012 Faculty Senate meeting

Human Ecology undergraduate changes (approved 3-13-12) Pages 2-3

Agriculture undergraduate changes (approved 3-15-12) Page 4-17

Business Administration undergraduate changes (approved 3-28-12) Pages 18-21

Arts and Sciences undergraduate changes (approved 2-12-12 and 4-5-12) Pages 22-30

Engineering undergraduate changes (approved 4-5-12) Pages 31-58

<u>Technology and Aviation (K-State Salina) undergraduate changes (approved 4-6-12)</u> Pages 59-66

Graduate changes (Approved by Graduate Council on 3-6-12 and 4-3-12) Pages 67-75

## COLLEGE OF HUMAN ECOLOGY (approved 3-13-12)

# **Department of Apparel, Textiles, and Interior Design** Changes to the BS in Apparel and Textiles

**Rationale:** The addition of MKTG 450 to the professional studies of the apparel marketing students will permit the program to enhance student learning outcomes.

**Impact**: Student enrollment numbers will increase in MKTG 450. The department head from ATID has obtained approval from the Department of Marketing for this curriculum change.

#### Effective Date: Fall 2012

## **COLLEGE OF AGRICULTURE (approved 3-15-12)**

#### COURSE CHANGES

#### General Agriculture

- ADD: GENAG 210. Human and Cultural Diversity in the Food and Agricultural Sciences. (3) II. The purpose of this course is to introduce students to the concepts of diversity by learning about cultural awareness, issues and the historical contributions made by different ethnic groups to the field of agriculture. K-State 8 Areas: Human Diversity within the U.S.; Historical Perspectives.
- RATIONALE: Cultural differences have a profound effect on food preferences and minorities in the agricultural workplace. Students need an understanding of the impact cultural diversity has on food choices and production practices, as well as an appreciation of the positive impact minorities have had on the food and agricultural sciences.
- IMPACT: No impact on other departments.
- EFFECTIVE DATE: Spring 2013

#### Agricultural Communications and Journalism

- ADD: AGCOM 210 Agricultural Layout & Print Production Techniques. Lec. (3) II. In-depth, integrated use of leading industry-adopted software (such as Adobe Creative Suite) to develop printed communications pieces to the point of being printed, addressing layout aspects and file preparation critical to successfully printing a project. Assignments focus on developing communications tools for use in agricultural strategic and data-driven communications programs, which includes working with University Printing to troubleshoot print production issues, set up documents for variable data printing, digital versus offset printing considerations, 4-color versus 2-color and other printing technologies, and produce print plates. Pre-req: AGCOM 110. K-State 8: Aesthetic Experience, Interpretive Understanding.
- RATIONALE: Agricultural Communications and Journalism students enter a variety of careers, requiring proficiency in the comprehensive and integrated use of layout software to successfully develop and produce printed materials. This course will give students an in-depth working knowledge of the latest industry-standard software so they can excel in upper-level courses in the curriculum that applies these skills, in internships and student work experiences, and in entry-level agricultural communications positions. There is not a course at KSU that combines this depth and breadth of software proficiency in multiple communications media and addresses the technologies of today's printing processes.
- IMPACT:Charles Pearce, Mass Communications and Journalism was contacted, and he has<br/>responded by email and a follow up meeting to clarify the changes took place.

ADD:	AGCOM 425. Undergraduate Research in Agricultural Communications. Rsh. (1-3) I, II, S. This course uses qualitative, quantitative or mixed methods to conduct an agricultural and environmental communications research project. A faculty coordinator will assist students through the stages of conducting a research project and reporting its outcomes. Pre-req: Instructor permission. K-State 8: Empirical and Quantitative Reasoning.
RATIONALE:	Agricultural Communications and Journalism students go into varying careers and graduate programs post-graduation. These positions often require students to have an understanding of the scientific method and critical thinking skills. In addition, many ACJ students have an interest in conducting communications research but are not members of the College of Agriculture Scholars program or the University Honors program. This course provides them an opportunity to develop and employ research skills and to earn academic credit for their work. There is not a course in our program that allows ACJ faculty to work with undergraduate research projects and that provides students an opportunity to systematically work through a research project.
IMPACT:	Charles Pearce, Mass Communications and Journalism was contacted, and he has

RATIONALE:	The curriculum is revised to provide enhanced opportunities for students to acquire strong quantitative reasoning and analytical skills, which are increasingly called for by their employers. To provide foundation for these skills earlier in the curriculum, a new required course in decision tools (AGEC115) replaces the previously required course in computer applications (AGEC490). A new capstone course on data analysis and optimization (AGEC501) is added, and the statistics requirement is changed from STAT325 to STAT350, given the course content. Another change is to enhance consistency across the options while strengthening the overall curriculum by requiring that all students in this degree program take a finance course (AGEC513 or FINAN450). The addition of the ASI 107 course is appropriate for the pre-vet option and was recommended for this option by ASI faculty. All other options were approved in fall 2011; this option was accidentally left out of the packet.
IMPACT:	The Department Head of Statistics (Jim Neill) was contacted; he responded that the department could accommodate by adding an additional section during fall term. We agreed on October 17, 2011 to proceed with this understanding and that the Department of Agricultural Economics will advise their students to enroll in STAT 350 as much as possible in the fall. The Department Head of Finance (Eric Higgins) was contacted and responded that the department is fine with the changes.

RATIONALE: The ATM curriculum changes provide students more elective opportunities in ATM courses. BAE faculty believe it is important to provide students the opportunity to select 15 hours from the BAE/ATM elective course list that best fit their career interest rather than requiring all BAE/ATM courses taught.

IMPACT: No impact to other departments.

EFFECTIVE DATE: Spring 2013

RATIONALE: This revision is an effort for further harmonization of the Cereal Chemistry options of the BSM & MSM Programs. The proposed changes					
-	Add 3	nours of soc	al science electives which facilitat	es the c	completion
of K-State 8 requirements without having to exceed the credit hours					
	require	u of the curr	iculum.		

- Moves the specialization and free elective totals to 3 & 5 hour respectively. This opens many more opportunities for fulfilling these requirements without taking extra hours above the degree requirements.
- Moves GRSC 540 & 541 to the category most appropriate (specialization electives) to Cereal Chemistry Option students.

IMPACT:Proposed changes will not impact other departments except for the change from<br/>COMM 106 to COMM 105. About 20% of students in BSM program pursue<br/>Cereal Chemistry Option. We anticipate an increase (or decrease) of 2-4 students<br/>each year in these courses. Charles Griffin, Department of Communication<br/>Studies, Theater and Dance, has been contacted as has responded in support of<br/>the changes by email.

RATIONALE: This revision is an effor	rt for further harmonization of the Cereal Chemistry

This revision is an effort for further harmonization of the Cereal Chemistry options of the BSM & MSM Programs. The proposed changes

- Move AGRON 340, GRSC 712/713 from "core requirement" to "specialization elective"
- Drop CHM 350 and 351 due to redundancy in course content. CHM 531 and 532 covers same concepts in a deeper extent.
- Add MATH 221 to bring the Math requirement to the same level as BSM-Cereal Chemistry Option.
- Upgrade PHYS 113 and 114 to PHYS 213 and 214, which better prepare the students for graduate school (most of the Chemistry Options students apply for graduate programs). This changes also bring the Physics requirement to the same level as BSM Cereal Chemistry option.
- Add CHM 371, which is a requirement in BSM-Cereal Chemistry Option. This class provides a strong foundation for quantitative analysis.
- Add AGEC 500, GRSC 540 and 541, GSRC 610 and GRSC 640 to "specialization electives". These are required courses for MSM-Operations Option. These additions will provide an opportunity to Chemistry Option students to take them if they are interested in.

IMPACT:About 10% of students in MSM program pursue The Cereal Chemistry Option.<br/>Some of the proposed changes might impact CHM, MATH and PHYS course<br/>capacities. In most cases, we would anticipate an increase (or decrease) of 1-3<br/>students each year in these courses. Dr. Dogan is currently in the process of<br/>contacting these departments. Hikaru Peterson of AGEC has been contacted and<br/>responded in support of the changes by email. Erick Maatta in the Chemistry<br/>department has been contacted and responded in support of the changes by email.<br/>John Unruh in Food Science has been contacted and responded in support of the

changes by email. Mick O'Shea in Physics has been contacted and responded in support of the changes by email. Andy Bennett, Mathematics, has been contacted.

## College of Business Administration (Approved on March 28, 2012)

#### **COURSE CHANGES**

#### **Dean's office**

Add:

#### **GENBA 350 New Venture Creation**

#### Credits: (3)

This course examines the entrepreneurial process, especially as it relates to creating a business plan and launching a venture. We will address the process of creativity and innovation and its impact on the success of business start-up. Specific topics covered include new venture planning, marketing, financing, and management. This course will serve as a strong foundation for those aspiring to own and operate their own businesses as well as a real-world heads-up course for students who acknowledge that their future with larger businesses could very well include dealing with entrepreneurs/small businesses.

#### Requisites

Pre-Requisites: GENBA 340, ENGL 455, Student admitted in the minor in Entrepreneurship

#### When Offered

Spring

#### K-State 8

Empirical and Quantitative Reasoning Ethical Reasoning and Responsibility

#### Rationale

This proposed course will be a required capstone course for the Minor in entrepreneurship. (see minor proposal for additional information on rationale for entrepreneurship courses)

#### **Impact on Other Units**

The Department of English will be impacted by the new Entrepreneurship Minor. They have been notified.

#### **Effective Date**

Fall 2012

#### **CURRICULUM CHANGE**

#### **Changes to the Certificate in International Business:**

#### **Rationale:**

The CBA has seen a very large increase of international students at the undergraduate level over the last few years, from approximately 80 in fall 2007 to more than 300 in fall 2011. Many of these students have expressed an interest in the CIB. Most of the international students in the college are pursuing English as their second language and therefore it is unreasonable to expect them to pursue a third language.

Mr. Jim Lewis, K-State international student recruitment coordinator, has shared with student services representatives that prospective international students have an interest in pursuing academic options with an international emphasize, such as a major, minor or certificate program. Therefore, changing the CIB requirements to make it more feasible for international students to complete it may serve as a recruitment tool for the CBA and K-State.

Competing business schools such as the School of Business at KU has amended their international certificate to make it more feasible for international students to complete it.

**Impact:** The changes to the Certificate in International Business will have a slight impact on the demand for courses in the following departments: Communication, English, English Language Program, Geography, History, Music, Political Science, Sociology, Anthropology, and Theatre. All departments have been notified.

FROM:	TO:

Effective Date: Fall 2012

## COLLEGE OF ARTS AND SCIENCES (approved 2-12-12 and 4-5-12)

#### Geography

ADD: GEOG 506 – Geography of South Asia. (3) I. This course will provide a survey of the physical and human geography of South Asia. More specifically, it will cover the major environmental, economic, demographic, and cultural geography patterns, processes, and issues of the region. Problems related to religious, ethnic, and linguistic diversity, along with environmental problems associated with global climate change and others will be examined in the context of modernization and economic development. This will be a lecture type course and each relevant topic will be covered in some detail. Pr: Three hours of Social Science or junior standing.

K-State 8: Social Science and Global Issues and Perspectives.

RATIONALE: The future of GEOG 505: South Asian Civilization, which is a team taught course and cross listed under several K-State departments, is uncertain with retirement of Dr. Aruna Michie- professor in Political Science. Although several K-State faculties have been involved with this course, departments of Political Science, and Sociology, Social Work and Anthropology traditionally took leading role in offering this course. Currently, these two departments are unwilling to play that role. Given this uncertainty with the South Asian Civ course, the College of Arts and Sciences is considering a proposal to introduce a minor in South Asia Studies. The proposed course us the only geography course listed as a required course for the minors in South Asia.

IMPACT: This will not impact another unit, rather it will help to introduce minor in South Asia.

EFFECTIVE DATE: Fall 2013

### **Journalism and Mass Communication**

- FROM: MC 331 Digital Photography for Mass Media. (3) I, II, S. Basics of composition, exposure, cropping and editorial judgment using converted analog and digital images and image-building software. Introduction to uses of digital photography in mass media such as newspapers, magazines, brochures and web sites. Pr.: 2.5 overall GPA on completion of 6 MC credits.
- MC 331 Digital Photography for Mass Media. (3) I, II, S. Basics of composition, exposure, cropping and editorial judgment using converted analog and digital images and image-building software. Introduction to uses of digital photography in mass media such as newspapers, magazines, brochures and web sites. Pr.: MC 110 with a grade of C or better, or permission of the instructor.
- RATIONALE: Review of prerequisites for this course indicated a need to change them in order to do away with our current permission system and let ISIS check prerequisites.
- IMPACT: Required course in EDENJ and Journalism-Second Teaching Field in Secondary Education.

- FROM: MC 411 Yearbook Editing and Management. (2) I. Planning, editing, layout, writing and financing a publication. Pr.: Instructor Permission.
- TO: MC 411 Yearbook Editing and Management. (<u>3)</u> I. Planning, editing, layout, writing and financing a publication. Pr.: <u>None.</u>

RATIONALE: To increase the credit hours from 2 to 3, contact hours and out-of - class hours are already the same in MC411 as in similar existing JMC courses in which students receive 3 hours of credit.

IMPACT: Listed as an elective in EDJOR curriculum.

EFFECTIVE DATE: Fall 2012

- FROM: MC 456 Advertising Techniques. (3) I, II, S. The planning, creation, and production of advertising messages for various mass communications media. Pr.: MC 221 with a grade of C or better.
- TO: MC 456 Advertising Techniques. (3) I, II, S. The planning, creation, and production of advertising messages for various mass communications media. Pr.: <u>MC majors and</u> minors and AG communication majors only. MC 221 with a grade of C or better.
- RATIONALE: Review of prerequisites for this course indicated a need to change them in order to do away with our current permission system and let ISIS check prerequisites.

IMPACT: Allows only MC majors and minors, and AGCOMM majors to enroll.

EFFECTIVE DATE: Fall 2012

- FROM: MC 466 Law of Mass Communication. (3) I, II, S. A study of the legal issues relating to mass communication. Emphasis on defamation, privacy, copyright, administrative controls and other areas related to mass media. Pr.: Junior standing.
- TO: MC 466 Law of Mass Communication. (3) I, II, S. A study of the legal issues relating to mass communication. Emphasis on defamation, privacy, copyright, administrative controls, and other areas related to mass media. Pr.: Junior standing and MC110 with a grade of C or better, or permission of instructor.

RATIONALE: Prerequisite change deemed necessary to assure that enrolling students would have foundation in mass communication principles, history and practices.

IMPACT:This course is required for College of Education students in Journalism – Second<br/>Teaching Field in Secondary Education, Journalism Teacher Licensure Program<br/>(EDJOR) and English and Journalism (EDENJ) Teacher Licensure Program.

EFFECTIVE DATE: Fall 2012

- FROM: MC 480 Public Relations Techniques. (3) I, II. Focuses on the use of communication techniques in achieving organizational goals. Includes planning, application and ethics of messages for print, electronic and on-line media, and for special events. Pr.: MC 280 with grade of C or better.
- TO: MC 480 Public Relations Techniques. (3) I, II. Focuses on the use of communication techniques in achieving organizational goals. Includes planning, application and ethics of messages for print, electronic and on-line media, and for special events. Pr.: <u>MC majors and minors and AG communication majors only. MC 280 with a grade of C or better.</u>
- RATIONALE: Review of prerequisites for this course indicated a need to change them in order to do away with our current permission system and let ISIS check prerequisites.
- IMPACT: Allows only MC majors and minors, and AGCOMM majors to enroll.

EFFECTIVE DATE: Fall 2012

### Women's Studies

ADD: WOMST 305 – Advanced Fundamentals of Women's Studies. (3) I, II. An advanced examination of the origins of the Women's Studies field provides core concepts and research methodologies.

K-State 8: Human Diversity within the US; Ethical Reasoning and Responsibility.

RATIONALE: The new WOMST 305: Fundamentals is the REQUIRED foundational course for the major. It introduces Women's Studies majors to the history of the discipline, the core concepts of the field, and methodological practices of women's studies scholarship. The foundational course for majors, it provides an introduction that is both in-depth and consistent for each cohort of majors. It will serve as the preparation for advanced coursework in Women's Studies. (Introduction to Women's Studies, WOMST 105, is no longer required for majors. 105 is still offered within our curriculum, and can still count as an elective within the overall major, but is no longer required for the major, and is more explicitly a general education course (teaching over 850 students a year).) Creation of WOMST 305, and the changes in requirements are part of the overall curriculum change that was approved by the full Women's Studies faculty in November 2011.

IMPACT: None.

ADD: WOMST 405 – Resistance and Movements for Social Change. (3) I. Examines Women's Resistance and movements against gender violence and discrimination in the context of colonialism, globalization, war, militarism, and occupation. Pr.: WOMST 105 or 305.

K-State 8: Global Issues and Perspectives, Historical Perspectives

- RATIONALE: This course fills a gap in our curriculum. Taken as a part of our newly revised curriculum, this course is being added to provide Women's Studies majors with a global historical overview of women's resistance to gender violence and women's movements for social change.
- IMPACT: None

EFFECTIVE DATE: Fall 2012

- ADD: WOMST 510 Research Methods and Methodology in Women's Studies. (3) II. An advanced course in practices of research in Women's Studies, with attention to what distinguishes interdisciplinary, feminist research from traditional, disciplinary practices. Methods explored may include survey, interview, oral history, ethnography, hermeneutics, content analysis, case study, experimental, and action research. Pr.: WOMST 305 and WOMST 410.
- RATIONALE: This course fills a gap in our curriculum. Taken as part of our newly-revised curriculum, this course will prepare students with the understanding of research methods and methodologies in the field of Women's Studies that they will need in order to successfully complete the Capstone Seminar (another part of our new curriculum).
- IMPACT: None

## **CURRICULUM CHANGES**

## Undergraduate (Non-expedited)

## ART

BA in Art

FROM:

TO:

The BA degree in art consists of four parts: the	The BA degree in Art (studio track) consists of the

425, 426, 430, 432, 435, 450, 460, 470, 475, 480,	425, 426, 430, 432, 435, 450, 460, 470, 475, 480,
525, 526, 535, 545, and 630.	525, 526, 535, 545, and 630.

RATIONALE: A single change is proposed: to make the minor in Communication Studies available to students whose undergraduate degrees are not from K-State. We have a case now where a Ft. Riley spouse who will be here for two semesters, and who already has a Bachelor's degree from another institution, desires to do the coursework for a minor in Communication Studies to add to her academic credentials. As things now stand, she could take the required coursework, but never have credit for completing the minor recorded anywhere on her transcript. That is a scenario likely to recur with the transient population at Ft. Riley. Military personnel and their spouses are not here long enough to do so. We want to make that possible. All coursework is on the KSU campus and already in place. We have an approved minor in Communication Studies already in the catalogue.

PROPOSED DELIVERY MECHANISM: The post baccalaureate K-State students and the non-K-State students taking the minor will take courses face-to-face as traditional classes.

NEED FOR ADDITIONAL RESOURCES: None

PROJECTED ENROLLMENT / EVIDENCE OF NEED: 5-10 annually

ADMISSION REQUIREMENTS: Must have a BA/BS or equivalent from an accredited institution of higher learning in U.S. or abroad.

COMPLETION REQUIREMENTS: The same as our minor now. 18 hours, including six hours of core courses (COMM 320, COMM 330).

PROGRAM ASSESSMENT: The same as in place for our minor right now. Review by the faculty annually of the curriculum and needs of the program. Exit interviews. We have not been asked to develop SLO's for our existing minor, so developing SLOs for the postbaccalaureate minor option would be inappropriate at this time.

IMPACT:This will allow both current students as well as post-baccalaureate students the<br/>opportunity to earn a minor in Communication Studies. There is no impact outside the<br/>department of Communication Studies, Theatre and Dance.

EFFECTIVE DATE: Fall 2012

<ul> <li>Credits: (3)</li> <li>WOMST 480 - Seminar in Gender, Environment &amp; Justice Credits: (3)</li> </ul>

RATIONALE: The nine members of the Board of Directors for the NRES program evaluated GENAG 670 and found that at least 50% of the course content dealt with natural resources or the environmental sciences. They therefore approved addition of the class to the NRES curriculum by unanimous vote on 24 January 2012.

IMPACT: None

## **COLLEGE OF ENGINEERING (approved 4-5-12)**

## <u>COURSE CHANGES</u> <u>Computing and Information Sciences</u>

#### Change From:

#### To:

CIS 111 <del>Fundamentals of</del> Computer Programming		CIS 111 Introduction to Computer Programming Credits: 3
Credits: 3 Description:	Introduction to <del>object</del> - <del>oriented</del> programming. Principles and applications of programming fundamentals: state, control, <del>data structures,</del> methods, <del>objects,</del> and <del>packages</del> . Programming projects.	Description: Introduction to programming. Principles and applications of programming fundamentals: state, control <u>structures</u> , methods, and <u>arrays</u> . Programming projects
		This course is intended for non-majors.         Note:       Two hours lecture, two hours lab per week
Note: Two hours I week.	ecture, two hours lab per	week.
Rationale:	These changes better reflect the w	ay the course is being taught.
Impact:	<ul> <li>The following programs list this course as either required or recommended:</li> <li>Actuarial Mathematics Program</li> <li>Business Teacher Licensure Program</li> <li>Mathematics Teacher Licensure Program</li> <li>Mathematics Teacher Preparation Program</li> <li>Mathematics</li> <li>Mathematics Pre-Graduate Program</li> <li>Mathematics – Second Teaching Field in Secondary Education</li> <li>Statistics</li> </ul>	
	We have informed Prof. Louis Pig Mercer (Assoc. Dean, Education), these proposed changes.	no (Dept. Head, Mathematics), Prof. Debbie and Prof. James Neill (Dept. Head, Statistics) of

Effective: Fall 2012.

Change:

From:

CIS 200 Fundamentals of Software Design

Credits: (4)

Description: Principles of algorithm design and their application to procedural programming: state, control structures, functions, modules. Patterns of conditional and iterative control structure. Program testing. Introduction to data structures, classes, and objects. Programming projects.

Format: 3 hrs. lec., 2 hrs. lab a week.

Prerequisites: MATH 100 and either CIS 105, CIS 111, AP computer science credit, or equivalent experience To:

CIS 200 Programming Fundamentals

Credits: (4)

Description: Principles of algorithm design and their application to procedural programming: state, control structures, <u>methods</u>. Patterns of conditional and iterative control structure. Program testing. Introduction to <u>arrays</u>, classes, and objects. Programming projects.

Format: 3 hrs. lec., 2 hrs. lab a week.

Prerequisites: MATH 100 and either <u>CIS 115</u> or ECE 241 Rationale: The revised title and course description better reflect the way the course is currently being taught. The format reflects the way we are currently offering the course, but it has not been in the Catalog. The prerequisite change is intended to discourage students from taking this course in their first semester, as well as to ensure that they have seen a little bit of programming. We hope that the prerequisite change will improve our student retention.

Impact: The following programs list this course as either required or recommended:

- Applied Mathematics
- Computer Engineering
- Mathematics
- Statistics

We have informed Prof. Louis Pigno (Dept. Head, Mathematics), Prof. Bill Kuhn (Electrical and Computer Engineering), and Prof. James Neill (Dept. Head, Statistics) of these proposed changes.

Effective: Fall 2012

#### **CURRICULUM CHANGES**

#### **Department of Computing and Information Sciences**

#### Information Systems Curriculum and Computer Science Curriculum

**Drop:** 

- DEN 325 (1 Credit)
- Unrestricted Elective (2 Credits)

#### **Total Dropped Credits:** 3

Add:

• Communication Elective (3 Credits)

#### **Total Added Credits: 3**

Add the Following Note: The Communications Elective must be chosen from:

- COMM 326 Small Group Discussion Methods
- COMM 322 Interpersonal Communication
- MANGT 420 Management Concepts
- THTRE 261 Fundamentals of Acting
- THTRE 265 Fundamentals of Improvisation

**Rationale:** While the majority of our students have jobs and internships before graduation, thus having some experience in professional settings, and derive some benefit from DEN325, consistent feedback from alumni, current students, and organizations hiring our graduates indicates that more developed interpersonal skills, both in interacting on small teams and individuals, would enhance our students' value to their future employers. We therefore feel the need to increase our students' confidence and abilities when interacting with others, particularly in

group/professional settings with non-engineers. In addition, we plan to incorporate other personal and professional development topics in other courses in our curricula, particularly in CIS 115 Introduction to Computing Science. We note the existing curriculum requires public speaking (COMM 105 or COMM 106), for one to many interactions, and written communication (ENGL 516), which includes formal writing, email, and research. It is lacking, however, in small group skills or experience in reading and reacting to interpersonal interactions while maintaining a clear focus on the purpose of the interaction. We anticipate most students will take COMM 322, COMM 326, or MANGT 420 to satisfy the revised requirement, but THTRE 261 and THTRE 265 both offer more innovative options for developing interpersonal skills and increasing confidence. The heads of these departments have indicated they feel these classes would adequately address our needs.

#### Effective: Fall 2012

**Impact:** We have been in contact with the Department of Communication Studies, Theatre, and Dance, and the Department of Management. Both have indicated that they are equipped to handle the additional load.

Electrical Engineering Curriculum Change:

Add C prerequisite requirement:

Effective: Fall 2012

### **Rationale:**

### • Add a C-prerequisite policy

In previous years, the College of Engineering required C grades or better in prerequisite courses before a student could enroll in a subsequent course. This policy was dropped in 2002 due in part to difficulties in enforcement (although it remained on the books with respect to the Calculus sequence). With recent improvements in the student information system (ISIS), efficient enforcement is now practical, opening the option of re-introducing a C-policy.

While the College of Engineering currently has not settled on a uniform college-wide re-introduction of a C-policy, several departments now have C policies in their individual curriculums. Some departments require that students must earn C grades to graduate (C-graduation policy), while other engineering departments at K-State and peer schools require that students earn C's in prerequisite courses (C-prerequisite policy).

Following extensive discussions, the ECE department voted to re-introduce a C-policy into the EE and CMPEN curricula. Moreover, it was determined that nearly all courses which could be prerequisites are offered each semester, so that the C-graduation type policy used by some departments is not the best option for our students. The ECE department faculty believes that the more rigorous C-prerequisite policy in the Notes section of the curriculum change below is in the best interest of our students' learning and preparation for their careers.

**Impact (i.e. if this impacts another unit):** The following units could see an increase in retakes as a result of this policy: CHM, PHYS, MATH, STAT, CIS, DEN, ENGL, ME

Entire curriculum, curriculum description or admission criteria must be shown below.

<b>Bioengineering option</b>	<b>Bioengineering option</b>

Bioengineering is the application of engineering principles to measurement, analysis, and design issues faced by the medical and life science communities. The health care industry is one of the fastest-growing business sectors in the United States. Through the bioengineering option, undergraduate students can obtain a BS degree in electrical engineering while acquiring a highly marketable biotechnology skill set. Areas of emphasis within this option are medical instrumentation (biosensors and data acquisition tools), biosignal analysis, and biomedical product design.

Candidates for this option include undergraduate electrical engineering and pre-medicine students who seek a multidisciplinary environment focused upon using technology to increase quality of life. Instructors from various colleges at K-State contribute to this curriculum.

The curriculum accommodates pre-medicine students through the acceptance of core premedicine courses as complementary electives. Students pursuing a <u>pre-</u><u>medicine program</u> should contact the <u>dean's office</u><u>in the College of Arts and Sciences</u> for additional information.

### Notes

\*Students must complete the appropriate prerequisite credits for ENGL 415, but may apply only three hours of ENGL 415 prerequisite credits towards degree requirements.

\*\*Humanities and Social Science electives are to be selected from the list of courses approved by the College of Engineering. Students should select these courses as needed to complete the requirements of the <u>K-State 8</u> General Education program.

\*\*\*Technical electives must be selected to complete one of the areas of specialization.

**IMPORTANT NOTES:** Students who first enroll in Summer 2011 or later must meet the requirements

Bioengineering is the application of engineering principles to measurement, analysis, and design issues faced by the medical and life science communities. The health care industry is one of the fastest-growing business sectors in the United States. Through the bioengineering option, undergraduate students can obtain a BS degree in electrical engineering while acquiring a highly marketable biotechnology skill set. Areas of emphasis within this option are medical instrumentation (biosensors and data acquisition tools), biosignal analysis, and biomedical product design.

Candidates for this option include undergraduate electrical engineering and pre-medicine students who seek a multidisciplinary environment focused upon using technology to increase quality of life. Instructors from various colleges at K-State contribute to this curriculum.

The curriculum accommodates pre-medicine students through the acceptance of core premedicine courses as complementary electives. Students pursuing a <u>pre-medicine program</u> should contact the <u>dean's office in the College of Arts and Sciences</u> for additional information.

# Notes

\*Students must complete the appropriate prerequisite credits for ENGL 415, but may apply only three hours of ENGL 415 prerequisite credits towards degree requirements.

\*\*Humanities and Social Science electives are to be selected from the list of courses approved by the College of Engineering. Students should select these courses as needed to complete the requirements of the <u>K-State 8</u> General Education program.

\*\*\*Technical electives must be selected to complete one of the areas of specialization.

IMPORTANT NOTES: Students who first enroll in Summer 2011 or later must meet the requirements of the K-State 8 General Education Program.

Students who began their programs of study in earlier terms under the University General Education (<u>UGE</u>) program may complete their degrees with UGE requirements or may choose to move to the K-State 8. Students should check with their academic advisors to determine which choice would be better. To switch, students must consult with their academic advisors.

Students who are readmitted in Summer 2011 and later will be designated as meeting the K-State 8 by the Office of Admissions. Deans' offices can make an exception for the readmitted student who has completed UGE or who would prefer to complete UGE requirements.

For additional information about the University General Education program, check the <u>requirements</u> specified by the <u>College of Engineering</u>.

**Total hours required for graduation** (129)

of the <u>K-State 8</u> General Education Program.

Students who began their programs of study in earlier terms under the University General Education (<u>UGE</u>) program may complete their degrees with UGE requirements or may choose to move to the K-State 8. Students should check with their academic advisors to determine which choice would be better. To switch, students must consult with their academic advisors.

Students who are readmitted in Summer 2011 and later will be designated as meeting the K-State 8 by the Office of Admissions. Deans' offices can make an exception for the readmitted student who has completed UGE or who would prefer to complete UGE requirements.

For the good and benefit of the student and their future employer, the ECE department enforces a Cprerequisite policy for all courses listed by number in the curriculum table above and for any in-major technical elective course applied toward the degree. A grade of C or better must be earned in all prerequisites to such a course before enrolling in that course.

For additional information about the University General Education program, check the <u>requirements</u> specified by the <u>College of Engineering</u>.

### Computer Engineering Curriculum Change:

Add a C prerequisite policy

Effective: Fall 2012

### **Rationale:**

### There is one edit:

### • Add a C-prerequisite policy

In previous years, the College of Engineering required C grades or better in prerequisite courses before a student could enroll in a subsequent course. This policy was dropped in 2002 due in part to difficulties in enforcement (although it remained on the books with respect to the Calculus sequence). With recent improvements in the student information system (ISIS), efficient enforcement is now practical, opening the option of re-introducing a C-policy.

While the College of Engineering currently has not settled on a uniform college-wide re-introduction of a C-policy, several departments now have C policies in their individual curriculums. Some departments require that students must earn C grades to graduate (C-graduation policy), while other engineering departments at K-State and peer schools require that students earn C's in prerequisite courses (C-prerequisite policy).

Following extensive discussions, the ECE department voted to re-introduce a C-policy into the EE and CMPEN curricula. Moreover, it was determined that nearly all courses which could be prerequisites are offered each semester, so that the C-graduation type policy used by some departments is not the best option for our students. The ECE department faculty believes that the more rigorous C-prerequisite policy in the Notes section of the curriculum change below is in the best interest of our students' learning and preparation for their careers.

**Impact (i.e. if this impacts another unit):** The following units could see an increase in retakes as a result of this policy: MATH, CIS, PHYS, STAT, DEN, ENGL, ME

# College of Technology & Aviation (K-State Salina) (Approved on 4-6-2012)

### **COURSE DELETION:**

### Department of Aviation

- DELETE: PHYS 342. Aviation Meteorology. (4) Fall, Spring. Basic aviation related meteorology concepts through the study of atmospheric elements and how they generally affect the weather: Introduction to the subject, water in the atmosphere, variables which cause local weather changes, specific aviation associated hazards, understanding meteorological reports and forecasts, meteorological techniques used in predicting weather patterns. Same as PPIL 342.
- K-State 8: None
- RATIONALE: The Aviation Department changed PPIL 342 to AVT 242 and therefore this course can no longer be considered an equivalent course. Furthermore, there isn't a need or demand by students to offer an aviation meteorology course in addition to AVT 242 created by the Aviation Department.
- IMPACT: The Department of Physics has been notified.

EFFECTIVE DATE: Fall 2012

### COURSE ADDITIONS:

Department of Arts, Sciences, and Business

ADD: COT 499. Advanced Problems in Arts, Sciences, and Business. (Var.) Fall, Spring, Summer. Opportunity for advanced independent study in specific subject areas in the Department of Arts, Sciences, and Business. Pr.: Consent of instructor. K-State 8: None

RATIONALE: This course will provide a means by which faculty in the Arts, Sciences, and Business Department can offer an upper-level "Problems" course. Currently one does not exist in the Department.

IMPACT: No impact on any other department.

EFFECTIVE DATE: Fall 2012

Department of Engineering Technology

ADD: CMST 317. C# Programming. (3) Fall. An in-depth study of the Microsoft C# language and its applications. C# is a development tool within the .NET framework. Students use the language to develop a wide variety of applications including stand-alone applications and those providing access to databases and Web services. Pr.: CMST 347.

K-State 8: Empirical and Quantitative Reasoning.

RATIONALE: This course will allow students to learn a widely used programming language. This course is designated as "empirical and quantitative" as it will require

students to use logic to design C# programming language solutions to problems. Problems will involve calculations, moving and manipulating data, querying data from databases, and creating applications to run on a variety of computer platforms.

IMPACT: No impact on any other department.

EFFECTIVE DATE: Fall 2012

Spring semester (17 credit hours)	CMST 247 Java Programming I
CMST 130 Introduction to PC Administration	CMST 250 Networking I
CMST 137 Fundamentals of Visual Literacy	CMST 332 Web Development Project
CMST 155 Web Page Development II	CMST 335 Web Programming
CMST 180 Introduction to Database Systems	ETA 020 Engineering Technology Seminar0
CMST 247 Java Programming I3	
COMM 105Public Speaking IA2	Programming language electives (6 credit hours)
	Choose two courses from:
Sophomore	CMST 310 Visual Basic Programming
Fall semester (18 credit hours)	CMST 317 C# Programming
BUS 110 Introduction to Business	CMST 341 C++ Programming
CMST 250 Networking I	CMST 347 Java Programming II3
CMST 335 Web Programming	Other programming electives may be used if approved by the
ENGL 302 Technical Writing	AETA-WD program coordinator.
Humanities/social science/business elective	
Level 2 programming language elective*3	
	Other requirements (27 credit hours)
Spring semester (16 credit hours)	COMM 105 Public Speaking IA2
CMST 332 Web Development Project	ENGL 100 Expository Writing I3
ECON 110 Principles of Macroeconomics	ENGL 302 Technical Writing
Level 2 programming language elective*3	Mathematics requirement*
Humanities/social science elective	BUS 110 Introduction to Business
Science elective/lab4	ECON 110 Principles of Macroeconomics
	Humanities/Social Science/Business elective
*Choose from the list under the Computer Systems	Humanities/Social Science elective
Technology option	Science elective with lab4
	* Choose from MATH 100, MATH 150, MATH 205 or
	MATH 220.

RATIONALE:	Changes to the arrangement of courses in the curriculum guide will make the format consistent with the AETA-CP and AETA-DM options. The change to the programming language elective list reflects the addition of a new course. The change to the Mathematics requirements is to prevent transfer students who have already passed a higher math class from being required to take the lower-level MATH 100, College Algebra.
IMPACT:	This will have minimal impact on the Department of Arts, Sciences, and Business mainly by keeping students who are more advanced in math out of College Algebra, where they shouldn't be anyway.
EFFECTIVE DATE:	Fall 2012

RATIONALE:	Changes to the list of course electives are needed to eliminate courses that are no longer being taught and to add newer courses. The change to the Mathematics requirement is to prevent transfer students who have already passed a higher math class from being required to take the lower-level MATH 100, College Algebra.
IMPACT:	This will have minimal impact on the Department of Arts, Sciences, and Business mainly by keeping students who are more advanced in math out of College Algebra, where they shouldn't be anyway.

**EFFECTIVE DATE:** Fall 2012

# **GRADUATE COURSE CHANGES AND CURRICULUM ADDITIONS** (Approved by the Graduate Council 3-6-12 and 4-3-2012)

### **COURSE ADDITIONS:**

### College of Arts and Sciences

- ADD: GEOG 712 Internet GIS and Distributed Geographic Information Services. (3) II. Introduces the development and deployment of Internet maps and GIS-related web services. Students will use virtual globes and Internet map servers to learn the techniques of Internet mapping and development/delivery of geodata and geoprocessing services via the Web. Studio-style classes will focus on building the necessary skills for creating, as well as the practical applications of, customized GIS map applications and "mashups", web-based GIS services, and mobile GIS applications. Pr.: GEOG 708.
- RATIONALE: The Internet is increasingly being used as the means to deliver maps, geographic data, and spatial data processing services to end users. This proposed course fills a void in our current geographic information science (GIScience) curriculum at the senior undergraduate and graduate levels by building on prerequisites such as GEOG 508 GIS I and GEOG 708 GIS II to better understand client-server computing from a GIScience perspective and practice the techniques required to author and serve Internet-based map products and web-based geographic services.
- IMPACT: None

### EFFECTIVE DATE: Spring 2013

- ADD: MATH 635 Dynamics, Chaos, and Fractals. (3) I. An introduction to one dimensional real and complex dynamics: attracting and repelling cycles, iterations of quadratic polynomials, bifurcation theory, chaos, Hausdorff measures and Hausdorff dimension, fractals, Julia and Fatou sets, and Mandelbrot sets. Pr.: MATH 221.
- RATIONALE: Dynamics and chaos are becoming a major area of mathematics, which also provides an excellent area for REU projects. We need to add an additional elective course for our undergraduates in this area. Recent hires in the department include faculty with research specialties in this area to teach the course.
- IMPACT: None

EFFECTIVE DATE: Fall 2012

ADD: MATH 843 – Advanced Probability I. (3) I. Review of measure theory notions specific to probability, including classical limit theorems, constructions of Brownian motion, Stochastic integration, the martingale representation theorem and martingale-based function spaces. Pr.: STAT 510 and MATH 821.

RATIONALE: The mathematical foundations of probability theory were laid down during the twentieth century and established an entirely new branch of mathematics with many applications to the physical sciences and beyond. In the last two decades, probability has found applications to traditional mathematical subjects such as complex analysis, functional analysis, matrix theory, Fourier analysis and numerical analysis. One of the recent Fields medals was awarded to Stas Smirnov for his work on random conformal mappings and percolation. Faculty members in our department have taught some of these new developments in the context of topics courses and currently two candidates for PhD, Santosh Ghimire and Xiaojing Zhang, are writing their thesis in probability-related questions.

We feel, as a department, that our graduate students would benefit from a more comprehensive training in the field of probability. The first semester, Math 843, is dedicated to the rigorous mathematical foundations and the development of Brownian motion (the building block for many of the subsequent developments). The second semester, Math 844, is more open-ended but concentrates on the many applications that have recently been forged in various fields of analysis, geometry and group theory, some of which even touch base with statistical mechanics.

We contemplate that this two-semester sequence, although focused toward graduate students in Mathematics, could appeal to other graduate students at the University, such as Statistics, Electrical and Computing Engineering, Physics and others.

IMPACT: Statistics has been informed and has approved.

EFFECTIVE DATE: Fall 2012

- ADD: MATH 844 Advanced Probability II. (3) II. Topics may include stochastic processes, random matrix theory, free probability, random fractals and random analytic maps. Pr.: MATH 843.
- RATIONALE: The mathematical foundations of probability theory were laid down during the twentieth century and established an entirely new branch of mathematics with many applications to the physical sciences and beyond. In the last two decades, probability has found applications to traditional mathematical subjects such as complex analysis, functional analysis, matrix theory, Fourier analysis and numerical analysis. One of the recent Fields medals was awarded to Stas Smirnov for his work on random conformal mappings and percolation. Faculty members in our department have taught some of these new developments in the context of topics courses and currently two candidates for PhD, Santosh Ghimire and Xiaojing Zhang, are writing their thesis in probability-related questions.

We feel, as a department, that our graduate students would benefit from a more comprehensive training in the field of probability. The first semester, Math 843, is dedicated to the rigorous mathematical foundations and the development of Brownian motion (the building block for many of the subsequent developments). The second semester, Math 844, is more open-ended but concentrates on the many applications that have recently been forged in various fields of analysis, geometry and group theory, some of which even touch base with statistical mechanics.

We contemplate that this two-semester sequence, although focused toward graduate students in Mathematics, could appeal to other graduate students at the University, such as Statistics, Electrical and Computing Engineering, Physics and others.

IMPACT: Statistics has been informed and has approved.

EFFECTIVE DATE: Fall 2012

### Music

- ADD: MUSIC 605 Lower String Pedagogy. (2) S. Study of low string technique and related teaching methods. Intended for teachers of string, concert/jazz bands and vocal music if they use a bass with accompaniment combos for pit orchestras or swing choirs.
- RATIONALE: The graduate program of the Department of Music has a course focused for upper string pedagogy but needs a course for the summer program to complete the content.

IMPACT:	None	
EFFECTIVE D	DATE:	Summer 2012

### Statistics

- ADD: STAT 843 Statistical Inference. (3) II. Distributions (commonly used univariate and multivariate distributions, including exponential families of distributions and properties), order statistics and distributional properties, (asymptotic) unbiased estimation and the information inequality, likelihood inference for parametric statistical models (including the multi-parameter case, regular and non-regular cases), confidence sets, functional parameters and statistical functional, density estimation and nonparametric function estimation, permutation methods. Pr.: STAT 842; MATH 634 or equivalent, or concurrent enrollment in MATH 634.
- RATIONALE: The proposed course STAT 843 reflects the desirability for Statistics PhD students to encounter certain material that is in the current STAT 981 course at an earlier point in the curriculum, suitable for an 800 level offering. The course description reflects such, and includes additional modern topics in statistical inference, also suitable for an 800 level offering. Pre/co-requisites reflect the changes to accommodate this curriculum change. The remaining content of the current STAT 981 course will be covered as STAT 941, along with additional modern topics suitable for a 900 level offering.
- IMPACT: None

EFFECTIVE DATE: Fall 2012

ADD: STAT 905 – High-Dimensional Data and Statistical Learning. (3) I, Even years.
 Statistical methods for the analysis of large scale data. Data mining, supervised and unsupervised statistical learning techniques for prediction and pattern recognition.
 Methods for model selection, multiple testing control, and estimation in high-dimensions.
 Applications in various fields, including the sciences and engineering using computer software. Pr.: STAT 713 and 771, plus one introductory course in statistical computing (e.g. STAT 726 or equivalent background).

- RATIONALE: Data of unprecedented scales and complexities are now routinely generated from diverse fields as science and technology advance (e.g. genomics). The curses and blessings of dimensionality have been reshaping statistical thinking and methodological development. Accordingly, extensive research beyond classical statistical inference techniques has been conducted to address the challenges associated with high-dimensionality. The department has previously offered coverage of such materials as STAT 950 (Advanced Studies in Probability and Statistics). Expertise of the current faculty, coupled with graduate student demand, would allow research and instructional enhancements consistent with the discipline, and thus make such course a significant addition to the curriculum.
- IMPACT: None

EFFECTIVE DATE: Fall 2012

- ADD: STAT 907 Bayesian Statistical Inference. (3) I, odd years. Principles of Bayesian inference. Methods of Bayesian data analysis with applications in the sciences. Hierarchical and non-hierarchical models, including linear and generalized linear models. Model checking, Model selection, Model comparison. Bayesian computation including Markov Chain Monte Carlo algorithms. Applications in the sciences utilizing computer software. Pr.: STAT 720 and 771, plus one introductory course in statistical computing (e.g. STAT 725 or 726 or equivalent background).
- RATIONALE: The Bayesian approach to statistical inference and statistical computing is of mainstream importance and utility for data analysis. Nowadays, this approach represents a functional mode of statistical thought, along with the frequentist (Fisherian) approach based on likelihood methods. The department has previously offered coverage of such material as STAT 950 (Advanced Studies in Probability and Statistics). Expertise of the current faculty, coupled with graduate student demand, would allow research and instructional enhancements consistent with the discipline, and thus make such course a significant addition to the curriculum.

IMPACT: None

EFFECTIVE DATE: Fall 2012

### College of Veterinary Medicine

Department of Clinical Sciences

ADD: CS 793. Surgical Skills. (1) II. Manual surgical skills will be taught using surgical models and cadaver tissues. Students will be taught the following skills and techniques: instrument handling, speed and efficiency, hand ties, ligature under tension, suture patterns, closure under tension, anastomosis and enterotomy technique and excision of circular lesions. Pr.: CS 729, Surgery I and 3rd year standing in the College of Veterinary Medicine

RATIONALE: CS 729 does not provide enough time to develop the hands on skills needed by any veterinarian that is performing surgery. The purpose of this new course is to teach only manual surgical skills in a small group setting to make students more proficient.

EFFECTIVE DATE: Spring 2013

- ADD: CS 882. Advanced Small Animal Endocrinology. (2) II. Advanced topics in small animal endocrinology. Emphasis on comparative aspects of endocrine gland disease and its clinical manifestations in dogs and cats. Primary literature, review articles, and advanced texts will be the principle sources of information. Pr.: DVM degree.
- RATIONALE: This course will offer veterinarians in the graduate curriculum an opportunity to pursue the advanced study of relevant topics in small animal endocrinology. Graduate veterinarians will explore select topics in canine and feline endocrinology through a comparative medicine approach that relies on in-depth review of basic and clinical research. The course expands the number of advanced medicine courses offered to veterinarians enrolled in the graduate curriculum. The current graduate catalog does not offer a similar course.

EFFECTIVE DATE: Spring 2013

### Department of Anatomy & Physiology

- ADD: AP 896. Introduction to Responsible Conduct of Biomedical Research (2) I. This course will focus on providing graduate/professional students an introduction to the regulations, practices, ethical considerations, and professional interactions that define responsible conduct of biomedical research. Investigator responsibilities associated with initiating and establishing a research program, conducting experimental studies, analyzing and reporting data, publishing in peer-reviewed journals, considerations for submitting grant applications, and understanding compliance issues and regulations will be emphasized. Students will learn through reading journal articles and discussion of pertinent topics to identify and consider issues that are germane to the biomedical research environment.
- RATIONALE: Funding agencies have enhanced the scrutiny of graduate student training programs. Responsible conduct of research is an important area of training for graduate students and it is imperative that students are able to demonstrate to funding agencies that they have received focused and direct training in this area of their graduate program. Therefore, we would like to include this class in the curriculum so it will reflect on the students' transcripts

### EFFECTIVE DATE: Fall 2012

### **COURSE CHANGES:**

### College of Arts and Sciences

### Geography

- FROM: GEOG 705 Remote sensing of the Environment. (3) I, II. Remote sensing and its application to earth study, especially environmental problems and land use. Course employs both readings and the use of imagery. Note: Two hours lecture, two hours lab. Pr.: One course in physical science and one in biological science. Cross-listed with AGRON 706.
- TO: <u>GEOG 605</u> Remote sensing of the Environment. (3) I, II. Remote sensing and its application to earth study, especially environmental problems and land use. Course employs both readings and the use of imagery. Note: Two hours lecture, two hours lab. Pr.: One course in physical science and one in biological science. Cross-listed with AGRON 706.
- RATIONALE: Change in the course number from 705 to 605 more accurately reflects the level at which the class is currently being taught.
- IMPACT: College of Agriculture/Agronomy (AGRON 706)

### EFFECTIVE DATE: Fall 2012

- FROM: GEOG 740 Fluvial Geomorphology. (3) I. This course is a basic introduction to the field of Fluvial Geomorphology, the study of the forms and processes found within streams and rivers. Topics will include: Review of watershed hydrology and hill slope processes, mechanics of open channel flow, sediment entrainment and transport, channel geometry, longitudinal profile and gradient, effective flows/formative events, channel patters, pool- and river management and restoration. Note: The course meets for three hours of lecture per week with one required weekend field trip. Pr.: GEOG 221 or permission of instructor.
- TO: GEOG 740 Fluvial Geomorphology. (3) I. This course is a basic introduction to the field of Fluvial Geomorphology, the study of the forms and processes found within streams and rivers. Topics will include: Review of watershed hydrology and hill slope processes, mechanics of open channel flow, sediment entrainment and transport, channel geometry, longitudinal profile and gradient, effective flows/formative events, channel patters, pool- and river management and restoration. Note: The course meets for three hours of lecture per week with one required weekend field trip. Pr.: GEOG 221 or permission of instructor.

### K-State 8: Natural and Physical Sciences

RATIONALE: The course takes a natural and physical science approach to rivers by examining the physical processes whereby rivers shape the surface of the earth. Reading and lecture materials are scientific in nature. And include the physics of fluid flow and sediment movement through rivers. As a small seminar class, the course involves active learning on the part of students over topics dealing with the Natural and Physical Sciences. For
that reason, we would like to see the course tagged in K-State 8 in the "Natural and Physical Sciences".

IMPACT: None

EFFECTIVE DATE: Fall 2012

- FROM: MC 605 Supervision of School Publications. (3) S. A methods course for those planning to teach secondary or community college journalism courses and advise high school or community college publications.
- TO: <u>MC 505 Supervision of School Publications</u>. (3) S. A methods course for those planning to teach secondary or community college journalism courses and advise high school or community college publications.
- RATIONALE: To lower the course level from 600-level to 500-level, which will allow non-graduate faculty to teach it without obtaining an exception from the Graduate School each year. The history of this course in the past five or more years is that no one has taken it for graduate credit.
- IMPACT: The College of Education will be impacted because the course is taken by secondary education students seeking certification in journalism.

EFFECTIVE DATE: Summer 2012

FROM: STAT 980—Probability and Asymptotics. (3) I. Probability theory, including independence, conditioning, modes of stochastic convergence, laws of large numbers, central limit theory, martingales. Statistical applications to asymptotic approximations and efficiency for inference in parametric and nonparametric models based on likelihood methods and statistical functional. Pr.: Math through at least two semesters of advanced calculus and STAT 771.

TO: <u>STAT 842 – Probability for Statistical Inference.</u> (3) I. <u>Probability spaces and random</u> elements, distributions, generating and characteristic functions, conditional expectation, convergence modes and stochastic orders, continuous mapping theorems, central limit theory and accuracy, laws of large numbers, asymptotic expansions for approximating functions of random variables and distributions. Pr.: STAT 770 &771, or equivalent; MATH 633 or equivalent, or concurrent enrollment in MATH 633.

RATIONALE: The change in course number (980 to 842) reflects the desirability for Statistics PhD students to encounter material similar to that in the current 980 course at an earlier point in the curriculum. The revised course description and pre/co-requisites reflect the changes to accommodate this curriculum change, suitable for an 800 level course offering.

IMPACT: None

EFFECTIVE DATE: Fall 2012

## Women's Studies

- FROM: WOMST 610 Seminar in Women's Studies. (3) I. Rec. This course surveys interdisciplinary, feminist methods of research and contemporary applications of this scholarship.
- TO:
   WOMST 610 Capstone Seminar in Women's Studies. (3) I. Rec. An advanced

   seminar for in-depth investigation of a specific topic. Students will conduct independent

   research and produce a substantial project or paper. Pr.:WOMST 510.
- RATIONALE: As part of our overall curriculum revision, this course will now serve as the capstone for our curriculum. The general survey by the previous description is more applicable now to other courses; this course will be for undergraduates to undertake serious research as the culmination of their major. The change in title and description makes this clear in the catalog.
- IMPACT: None
- EFFECTIVE DATE: Fall 2012

## **CURRICULUM CHANGE**

College of Education

Online Course Design (Graduate Certificate Program)

FROM:	TO:
Digital Teaching and Learning Graduate Certificate	Online Course Design Graduate Certificate
Contact: Rosemary Talab	
E-mail: talab@ksu.edu	Contact: Rosemary Talab

state.edu/education/curriculum-instruction/certificate	Home Page: http://www.dce.k-
	state.edu/education/curriculum-instruction/certificate
This online Curriculum and Instruction graduate	
program offers a <del>15</del> -hour <del>-graduate certificate (not</del>	This online Curriculum and Instruction graduate
licensure) in digital teaching and learning. The program	program offers a <u>14-hour KSU Graduate School</u>
provides graduates with a broad overview of	Certificate in Online Course Design. The program
Educational Technology research, theory, skills,	provides graduates with instructional design models,
strategies, methods, and models for designing and	research, theory, instructional strategies and
assessing active and effective student learning	technologies for the development of online learning
experiences. Open to licensed teachers, an educator	course design, including workshops, webinars, and other
must have a current teaching certificate, classroom	technology-enhanced instruction. Graduates will model
teaching experience, and a commitment to enhance	best practices in the redesign of existing instruction,
student learning through technology. Graduates have	creation and management of instructional development
taken leadership roles in technology integration and	projects and project timelines.
positions in technology rich schools. Others have	
become technology lead teachers, technology directors,	
and curriculum technologies, or have gone on to	

receive their masters and doctorates in this field.	
Certificate Requirements:	
EDCI 718 - Learning Technologies Credits: (3)	Prerequisite Course
EDCI 750 Emerging Technologies in Education (3)	EDCI 718 - Learning Technologies (3)
EDCI 786 Topics in Curriculum and Instruction	or similar graduate level introductory technology course
Wireless Connections (3)	Required Courses (8 hrs. total)
EDCI 786 Topics in Curriculum and Instruction	EDCI 763 Principles of Instructional Design (3)
Digital Video (3)	EDCI 863 Online Course Design (3)
EDCI 858 - Digital Teaching and Learning	EDCI 858 Online Course Design Project/e-Portfolio (2)
Project/ePortfolio (2)	Elective Courses (6 hrs. total)
EDCI-887 Proseminar I: Educational Computing,	EDCI 786 Topics in Curriculum and Instruction –
Design, and Distance Education (3)	Game-Based Learning (3)
-	EDCI 786 Topics in Curriculum and Instruction -
	Virtual Learning/Immersive Spaces (3)
	EDCI 786 Topics in Curriculum and Instruction -
	Design for Diverse Populations (3)

## IMPACT: None.

**RATIONALE:** This is a change of the title of the Graduate Certificate Program and its requirements. The current title and two of the courses are being updated in order to reflect increased demand for the design of online learning courses and curricula, which involve the use of instructional design models and newer technologies. This program curriculum change will enable KSU to be one of the few institutions, nationwide, to offer an online Certificate in Online Course Design. The number of required hours will change from 15 to14 hours. EDCI 858 Digital Teaching and Learning Project/e-Portfolio will be modified to EDCI 858 Online Course Design Project/e-Portfolio. EDCI 863 Interactive System Design will be modified to EDCI 863 Online Course Design.

## **EFFECTIVE DATE:** Fall 2012
