Student must earn at least 75% of credits that apply to the certificate program from Kansas State University OR an approved university affiliate of Kansas State University in a foreign country. <u>Certificate can be completed by degree seeking students at Kansas State University or obtained as a credential on its own (free-standing). Students who do not intend to become a candidate for a bachelor's degree at Kansas State University must apply for admission as a non-degree, certificate-seeking student. Such students must submit the admission application, application fee, and transcripts. Applicants must provide documentation of high school or GED completion and, if college courses have been attempted, official transcripts demonstrating a cumulative GPA of 2.0 or higher for all post-secondary coursework. Students who later choose to pursue a bachelor's degree must apply for admission as a degree-seeking student.</u> The number of students admitted into the CIB will be based on resource availability. <p>Total Credit Hours: (15)</p>
---	---

Rationale:

Change is being made so certificate can be completed as a free-standing certificate by a non-degree seeking student.

Impact on Other Units

Effective Date

Spring 2017

College of Education (9-27-16)

Non-Expedited Undergraduate New Courses Curriculum and Instruction

#1 EDCI 505. Introduction to Online Teaching and Learning. (3) Summer, Intersessions. Provides an overview of the history, current status, and anticipated future directions of online teaching and learning (OTL). Examines the impact of OTL within K-12 contexts. Pre-Requisite: Admission to Teacher Education or valid K-12 teaching license.

IMPACT: No other academic unit will be impacted by this proposal.

RATIONALE: As today's K-12 schools become more receptive to online interactive learning, virtual schools represent a significant paradigm shift in delivering and acquiring knowledge. The proposed Online Teaching and Learning Certificate for Undergraduates prepares participants to design and teach online courses within K-12 settings. It is expected that the Kansas Department of Education (KSDE) will declare online teaching as a dedicated area of licensure in the near future; the Certificate will allow the K-State College of Education to position ourselves at the vanguard of this new era.

Following this rationale, we propose designing, developing, and implementing a new Online Teaching and Learning Certificate for Undergraduates. EDCI 505 is the first course within the proposed four-course, 12-credit program. Upon completing this program, participants will be able to create appropriate online environments to facilitate effective teaching and meaningful student learning in K-12 settings. Furthermore, the courses constituting the program will themselves serve as exemplars of effective online instruction.

EFFECTIVE DATE: Spring 2017

#2 EDCI 506. Online Instructional Design and Development I. (3) Summer, Intersessions. This course introduces participants to (a) key instructional systems design approaches to design and prototype online lessons for diverse learners and contexts, and (b) technology tools to develop and implement these lessons. Pre-Requisites: (1) Admission to Teacher Education or valid K-12 teaching license; (2) EDCI 505.

IMPACT: No other academic unit will be impacted by this proposal.

RATIONALE: As today's K-12 schools become more receptive to online interactive learning, virtual schools represent a significant paradigm shift in delivering and acquiring knowledge. The proposed Online Teaching and Learning Certificate for Undergraduates prepares participants to design and teach online courses within K-12 settings. It is expected that the Kansas Department of Education (KSDE) will declare online teaching as a dedicated area of licensure in the near future; the Certificate will allow the K-State College of Education to position ourselves at the vanguard of this new era.

Following this rationale, we propose designing, developing, and implementing a new Online Teaching and Learning Certificate for Undergraduates. EDCI 506 is the second course within the proposed four-course, 12-credit program. Upon completing this program, participants will be able to create appropriate online environments to facilitate effective teaching and meaningful student learning in K-12 settings. Furthermore, the courses constituting the program will themselves serve as exemplars of effective online instruction.

EFFECTIVE DATE: Spring 2017

#3 EDCI 507. Online Instructional Design and Development II. (3) Summer, Intersessions. Participants develop online teaching and learning modules employing a variety of technology tools. Pre-Requisites: (1) Admission to Teacher Education or valid K-12 teaching license; (2) EDCI 505; (3) EDCI 506.

IMPACT: No other academic unit will be impacted by this proposal.

RATIONALE: As today's K-12 schools become more receptive to online interactive learning, virtual schools represent a significant paradigm shift in delivering and acquiring knowledge. The proposed Online Teaching and Learning Certificate for Undergraduates prepares participants to design and teach online courses within K-12 settings. It is expected that the Kansas Department of Education (KSDE) will declare online teaching as a dedicated area of licensure in the near future; the Certificate will allow the K-State College of Education to position ourselves at the vanguard of this new era.

Following this rationale, we propose designing, developing, and implementing a new Online Teaching and Learning Certificate for Undergraduates. EDCI 507 is the third course within the proposed four-course, 12-credit program. Upon completing this program, participants will be able to create appropriate online environments to facilitate effective teaching and meaningful student learning in K-12 settings. Furthermore, the courses constituting the program will themselves serve as exemplars of effective online instruction.

EFFECTIVE DATE: Spring 2017

#4 EDCI 508. Online Teaching and Learning Practicum. (3) Summer, Intersessions. Participants create a full-fledged, multi-module online course that is ready to implement in a real-life instructional setting related to their current or prospective work contexts. Pre-Requisites: (1) Admission to Teacher Education or valid K-12 teaching license; (2) EDCI 505; (3) EDCI 506; (4) EDCI 507.

IMPACT: No other academic unit will be impacted by this proposal.

RATIONALE: As today's K-12 schools become more receptive to online interactive learning, virtual schools represent a significant paradigm shift in delivering and acquiring knowledge. The proposed Online Teaching and Learning Certificate for Undergraduates prepares participants to design and teach online courses within K-12 settings. It is expected that the Kansas Department of Education (KSDE) will declare online teaching as a dedicated area of licensure in the near future; the Certificate will allow the K-State College of Education to position ourselves at the vanguard of this new era.

Following this rationale, we propose designing, developing, and implementing a new Online Teaching and Learning Certificate for Undergraduates. EDCI 508 represents the final capstone experience within the proposed 12-credit program. Upon completing this program, participants will be able to create appropriate online environments to facilitate effective teaching and meaningful student learning in K-12 settings. Furthermore, the courses constituting the program will themselves serve as exemplars of effective online instruction.

EFFECTIVE DATE: Spring 2017

Non-Expedited
Undergraduate New Program
Curriculum and Instruction

Online Teaching and Learning Certificate for Undergraduates

This 12-credit Online Teaching and Learning Certificate for Undergraduates prepares participants to create appropriate online environments to facilitate effective teaching and meaningful student learning in K-12 settings.

Program Goals

- To provide a foundation in the pedagogy of online teaching and learning.
- To prepare undergraduates to create online courses, all built on up-to-date best practices in Learning Management Systems.
- To provide the knowledge and skills necessary to design, implement and teach effective online courses in the K-12 Virtual Schools.

Student Learning Objectives

Upon completing this 12-credit Certificate program, participants will be able to:

1. Explain the key principles and practices of effective online teaching. (Addressed in EDCI 505)
2. Analyze target online learner populations to determine their current knowledge gaps and ascertain their learning/performance needs. (Addressed in EDCI 506 & 508)
3. Design effective online instruction employing instructional and generative strategies that are appropriate to student learning objectives. (Addressed in EDCI 506 & 508)
4. Develop effective online instructional modules that feature the use of optimally appropriate media technologies. (Addressed in EDCI 507 & 508)
5. Plan for appropriate formative and summative evaluation of student learning and instructional effectiveness. (Addressed in EDCI 507 & 508)

Required Courses (12 credit hours)

EDCI 505: Introduction to Online Teaching and Learning (3 Credits)

EDCI 506: Online Instructional Design and Development I (3 Credits)

EDCI 507: Online Instructional Design and Development II (3 Credits)

EDCI 508: Online Teaching and Learning Practicum (3 Credits)

IMPACT: No other academic unit will be impacted by this proposal.

RATIONALE: As today's K-12 schools become more receptive to online interactive learning, virtual schools represent a significant paradigm shift in delivering and acquiring knowledge. The proposed Online Teaching and Learning Certificate for Undergraduates prepares participants to design and teach online courses within K-12 settings. It is expected that the Kansas Department of Education (KSDE) will declare online teaching as a dedicated area of licensure in the near future; the Certificate will allow the K-State College of Education to position ourselves at the vanguard of this new era.

EFFECTIVE DATE: Spring 2017

ADDENDUM

Online Teaching and Learning Certificate for Undergraduates

Introduction—In response to questions from the Faculty Senate regarding the Online Teaching and Learning Certificate for Undergraduates, this document provides the Department of Curriculum and Instruction's responses to the specific areas that further clarification is desired. If further responses are needed, please contact, Dr. Brad Burenheide, Chair of COE Academic Affairs Committee.

bburen@ksu.edu

Assessment Procedures—In regards to the Assessment Plan, in Appendix A of this addendum a set of SLO's and courses have been aligned.

Delivery of Courses—The courses will be delivered online and specifically targeted during Intersessions and Summer semesters.

Estimated Budget and Staff—The courses will be offered online through KSU Continuing Education. These programs are self-sustaining and will not require additional funding. Furthermore, the current staff will be able to offer these classes through the unique terms which will not require additional staffing.

Targeted Student Enrollment—While open to students wanting only the online certificate, it will be targeted towards current students in the College of Education. To be eligible for the certificate, one must be admitted to the professional program or a current licensed teacher.

APPENDIX A

Online Teaching and Learning Certificate for Undergraduates: Assessment Plan

EDCI 505

Learning Objectives

- LO1 Describe key considerations in the design and delivery of online teaching and learning (OTL) modules. [COE CF #3 & #11]
- LO2 Explain the major principles of OTL in K-12 settings. [COE CF #3 & #11]
- LO3 Describe the characteristics of the optimally effective virtual classroom. [COE CF #7 & #11]
- LO4 Distinguish between synchronous vs. asynchronous OTL. [COE CF #8 & #11]
- LO5 Explain the importance of complying with copyright and fair use regulations. [COE CF #9 & #12]
- LO6 Explain the importance of ensuring accessibility and equitable access to OTL modules. [COE CF #2 & #14]

- LO7 Formulate ways to enhance interactivity via the selection of appropriate teacher- and learner-centered strategies. [COE CF #8 & #15]
- LO8 Compare principles and practices of brick-and-mortar v. virtual online schools. [COE CF #3 & #11]
- LO9 Describe the key aptitudes, roles, competencies, and communication skills required of teachers planning to teach in virtual K-12 settings. [COE CF #9 & #15]

Assessments of Record

- Reflective Essay [Assesses LO1-LO9 above]
- Position Paper [Assesses LO1-LO9 above]
- Final Examination [Assesses LO1-LO9 above]

EDCI 506

Learning Objectives

- LO1 Analyze target online learner populations to determine their current knowledge gaps and ascertain their learning/performance needs. [COE CF #2 & #12]
- LO2 Design effective online instruction employing instructional and generative strategies that are appropriate to given student learning objectives. [COE CF #8 & #11]

Assessments of Record

- Instructional Analysis Document [Assesses LO1 above]
- Instructional Design Document [Assesses LO2 above]

EDCI 507

Learning Objectives

- LO1 Develop effective online instructional modules that feature the use of optimally appropriate media technologies. [COE CF #3 & #11]
- LO2 Plan for appropriate formative and summative evaluation of student learning and instructional effectiveness. [COE CF #6 & #15]

Assessments of Record

- Online Instructional Module-1 [Assesses LO1 & LO2 above]
- Online Instructional Module-2 [Assesses LO1 & LO2 above]

EDCI 508

Learning Objectives

- LO1 Analyze target online learner populations to determine their current knowledge gaps and ascertain their learning/performance needs. [COE CF #2 & #15]
- LO2 Design effective online instruction employing instructional and generative strategies that are appropriate to given student learning objectives. [COE CF #8 & #11]
- LO3 Develop effective online instructional modules that feature the use of optimally appropriate media technologies. [COE CF #3 & #11]
- LO4 Plan for appropriate formative and summative evaluation of student learning and instructional effectiveness. [COE CF #6 & #15]

Assessments of Record

- Multi-Module Online Course [Assesses LO1-LO4 above]
- Reflective Essay [Assesses LO1-LO4 above]

College of Arts and Sciences (9-28-16)

NON-EXPEDITED COURSE PROPOSALS

Courses Numbered 000-599

ART

ADD: ART 106 – Art Appreciation. (3) II. Introduction for non-art majors to basic elements (line, color, form, etc.) and principles (balance, repetition, proportion, etc.) of composition and explore some of the purposes (political, spiritual, philosophical, etc.) of art. Explore the relationship of art to historical contexts and examine the concept of style. Pr.: None. K-State 8: Aesthetic Interpretation.

K-STATE 8 RATIONALE: The course provides an introduction to the aesthetic interpretation of visual art.

RATIONALE: We do not currently offer an introductory course in understanding art for non-majors. This course will familiarize students with basic elements and principles of composition and explore some of the purposes of art, with the goal of increasing student's ability to think critically about images and how they communicate information. Students will also acquire knowledge of basic terms used to describe and analyze art and the various media and techniques through which works of art have been made.

IMPACT: None

EFFECTIVE DATE: Spring 2017

English

ADD: ENGL 384 – Multicultural Children's Literature. (3) I, II, S. Theories of differences and underrepresented experiences as related to, for example, ability, gender, ethnicity, and sexuality, through children's literature. Pr.: None. K-State 8: Aesthetic Interpretation; Human Diversity within the US.

K-STATE 8 RATIONALE: As a literature course, multicultural children's literature considers aesthetic form and function and stimulates interpretation. As a course engaging with issues of diversity in children's literature, it offers insight into human diversity in the US.

RATIONALE: A class in multicultural children's literature supports the Department's 2025 plan to offer more courses on diverse literatures and to serve the needs of our majors and of Education students. Pilot versions of the course have affirmed the value and interest of such an offering to a diverse array of students. The Department of English also plans to develop a minor in children's literature in the future.

IMPACT: Education, American Ethnic Studies. Dr. Todd Goodson, College of Education has stated that there is no objection for the new course (dated December 18, 2015). Dr. Yolanda Broyles-Gonzalez, American Ethnic Studies, has commented that the course duplicates and overlaps with the specialization and courses taught by Dr. Isabel Millan and that they request the English Department

coordinate with American Ethnic Studies in an effort to avoid offering our very similar course(s) in the same semester.

EFFECTIVE DATE: Spring 2017

Sociology, Anthropology, and Social Work

ADD: ANTH 351 – Special Studies in Anthropology. (1-3) Occasional. Explores topics in anthropology through guided field trips (study abroad or domestic excursion). (Repeatable course). K-State 8 – None. Pr.: None.

RATIONALE: The anthropology program would like to have an open-ended, non-specific course set aside for study abroad trips (or field excursions to distant domestic sites). The anthropologists at K-State work all over the world, from Asia to Africa, so it would be problematic to attach a geographic location to this course proposal. Since study abroad courses are not a usual part of our program, but we want to offer them when possible, we need a catch-all course that will accommodate any faculty who wants to offer a field study experience to students. We are renumbering our classes, and this class falls into the “multi-disciplinary” category, so it will count for elective credit, but not credit in a specific sub-field. We have attached a syllabus for a planned study abroad to Australia being proposed by a colleague for summer 2017.

IMPACT: None

EFFECTIVE DATE: Spring 2017

ADD: ANTH ~~388~~ 380 – Introduction to Human Evolution. (3) I. Survey of the human fossil record, including an introduction to evolutionary theory and a discussion of the place that humans occupy among the other primates. Pr.: None. K-State 8: Natural and Physical Sciences.

K-STATE 8 RATIONALE: This class will cover a variety of subjects in the natural and physical sciences, including basic genetics and mechanisms of inheritance, biology and behavior of primates, basic evolutionary theory, and the human fossil and archaeological record.

RATIONALE: The Anthropology program recently added a tenure-track faculty member with a specialty in Paleoanthropology (Human Evolution). This faculty addition provided an opportunity to add breadth to the course offerings in the subfield of biological anthropology. Due to the interest in the subject matter, this course provides an opportunity for non-majors without a background in anthropology to receive an introduction to evolutionary theory and the human fossil record in a course without prerequisites.

IMPACT: None

EFFECTIVE DATE: Fall 2017

NON-EXPEDITED CURRICULUM PROPOSALS

Undergraduate

English

English Minor

FROM:

~~Students have two options for the minor in English, one emphasizing literature, the other emphasizing writing.~~

Students must achieve a C or better in all courses taken for minor credit.

English minor with an emphasis in literature

- ENGL 310 – Introduction to Literary Studies **Credits:** (3)

Select two of the four American and/or British survey courses (6 credit hours)

Choose two:

- ENGL 361 – British Survey I **Credits:** (3)
- ENGL 362 – British Survey II **Credits:** (3)
- ENGL 381 – American Survey I **Credits:** (3)
- ENGL 382 – American Survey II **Credits:** (3)

Select two courses numbered 300–599 or above (6 credit hours)

- ENGL 315 – Introduction to Cultural Studies **Credits:** (3)
- ENGL 325 – Literature and Technology **Credits:** (3)
- ENGL 330 – Fiction **Credits:** (3)
- ENGL 335 – Film **Credits:** (3)

TO:

Students have three options for the minor in English: emphasis in literature, emphasis in writing, and emphasis in children’s and adolescent literature and culture.

Students must achieve a C or better in all courses taken for minor credit.

English minor with an emphasis in literature

- ENGL 310 – Introduction to Literary Studies **Credits:** (3)

Select two of the four American and/or British survey courses (6 credit hours)

Choose two:

- ENGL 361 – British Survey I **Credits:** (3)
- ENGL 362 – British Survey II **Credits:** (3)
- ENGL 381 – American Survey I **Credits:** (3)
- ENGL 382 – American Survey II **Credits:** (3)

Select two courses numbered 300–599 or above (6 credit hours)

- ENGL 315 – Introduction to Cultural Studies **Credits:** (3)
- ENGL 325 – Literature and Technology **Credits:** (3)
- ENGL 330 – Fiction **Credits:** (3)

- ENGL 340 – Poetry **Credits:** (3)
- ENGL 345 – Drama **Credits:** (3)
- ENGL 350 – Introduction to Shakespeare **Credits:** (3)
- ENGL 355 – Literature for Children **Credits:** (3)
- ENGL 385 – Selected American Ethnic Literatures **Credits:** (3)
- ENGL 386 – African American Literatures **Credits:** (3)
- ENGL 387 – American Indian Literatures **Credits:** (3)
- ENGL 388 – Asian American Literatures **Credits:** (3)
- ENGL 389 – Latina/o Literatures **Credits:** (3)
- ENGL 390 – Fable and Fantasy **Credits:** (3)

- ENGL 663 – Advanced Creative Writing: Poetry **Credits:** (3)
- ENGL 665 – Advanced Creative Writing: Nonfiction **Credits:** (3)
- ENGL 755 – Studies in Composition and Rhetoric **Credits:** (3)
- ENGL 761 – Creative Writing Workshop: Short Fiction **Credits:** (3)
- ENGL 762 – Advanced Playwriting **Credits:** (3)
- ENGL 763 – Creative Writing Workshop: Poetry **Credits:** (3)
- ENGL 765 – Creative Writing Workshop: Creative Nonfiction **Credits:** (3)
- ENGL 769 – Creative Writing Workshop/Special Topic **Credits:** (3)
- ENGL 771 – Creative Writing Workshop: Novel/Novella **Credits:** (3)

Note:

Course is open only to engineering majors.

- ENGL 415 – Written Communication for Engineers **Credits:** (3)

English Minor with an emphasis in Children's and Young Adult Literature and Culture

Required courses (12 credit hours):

- ENGL 310 – Introduction to Literary Studies Credits: (3)
- ENGL 355 – Literature for Children Credits: (3)
- ENGL 384 – Multicultural Children’s Literature Credits: (3)
- ENGL 545 – Literature for Adolescents Credits: (3)

Electives (6 credit hours)

Electives may be chosen from any English course with a focus on children’s or young adult literature and culture in consultation with an English Department advisor.

One elective from an ENGL course numbered 315–599 Credits: (3)

Depending on topic, possibilities may include, but are not limited to

- ENGL 390 – Fable and Fantasy Credits: (3)
- ENGL 420 – Topics in Film Credits: (3)
- ENGL 440 – Themes in Literature Credits: (3)
- ENGL 445 – Literary Kinds Credits: (3)
- ENGL 450 – Literature and Society Credits: (3)

One elective from an ENGL course numbered 600–799 Credits: (3)

Depending on topic, possibilities may include, but are not limited to

- ENGL 630 – Readings in Nineteenth Century British Literature Credits: (3)
- ENGL 670 – Topics in British Literature Credits: (3)

	<ul style="list-style-type: none"> • <u>ENGL 680 – Topics in American Literature</u> Credits: (3) • <u>ENGL 695 – Topics in Literature</u> Credits: (3) • <u>ENGL 703 – Critical Approaches to Children’s Literature</u> Credits: (3) • <u>ENGL 710 – Studies in a Literary Genre</u> Credits: (3) • <u>ENGL 720 – Studies in a Major Author</u> Credits: (3) • <u>ENGL 725 – Studies in Children’s/Young Adult Literature</u> Credits: (3) • <u>ENGL 730 – Studies in a Literary Period</u> Credits: (3) <div style="background-color: #4a397b; color: white; padding: 5px; text-align: center; font-weight: bold;">Total credit hours: (18)</div>
--	---

RATIONALE: Part of the English Department’s 2025 Plan is to implement a minor in children’s literature. The initiative reflects the Department’s strengths, and it offers a way for students in English, Education, Human Ecology, and other fields to register a concentration in the area.

IMPACT: None

EFFECTIVE DATE: Spring 2017

College of Architecture, Planning, and Design (10-6-16)

Non-Expedited Proposals – Courses Numbered 000-599

Department of Landscape Architecture and Regional & Community Planning (Master of Landscape Architecture Program, Non- & Post-Baccalaureate)

New Courses

Effective: Spring 2017

Impact on other units: None

Course: **LAR 311 Unlocking Creativity**

Catalog Description: Do you want to become creative? Good news, you already are! For students in all majors, this course is designed to help you access your creative potential and become more imaginative, innovative, and courageous. Learning outcomes include overcoming blocks, refining your creative process, practicing activities to enhance creativity, and effectively communicating ideas.

Credits: (3)

When Offered: Fall, Spring

K-State 8: Aesthetic Interpretation; Empirical and Quantitative Reasoning

K-State 8 Tag Rationale: (1) *Aesthetic Interpretation: Unlocking Creativity provides students with experiences to develop their understanding and responsiveness to literature and visual arts, and to a smaller extent performing arts. In the course, students will: Interpret artistic works of art and graphic communication; Read and create works of literature including observational writing, self-reflection, and poetry; Develop critical thinking in aesthetics by engaging in activities of drawing, diagramming, creative public presentation techniques, and film-making.* (2) *Empirical and Quantitative Reasoning: The course provides students with experiences to develop their abilities to gather information, develop and evaluate alternatives, and consider potential outcomes. In the course, students will: Learn about a variety of creative problem-solving processes and working methods; Engage in investigative processes aimed at deriving novel, tenable, and valuable solutions; Develop an individual creativity ethos and creative problem-solving process.*

Rationale: *Course has been offered under a topics number but we would like the course to have its own course number in order to cover K-State 8 tags. Two course numbers would be bound so that it may be taken as either undergraduate (311) or graduate credit (811).*

Course: **LAR 580 Planning & Design Intro to GIS**

Catalog Description: This course will provide students with the essential background in geospatial analysis and information systems for the design and planning fields. Students will learn basics about data models and management, vector and raster analysis and cartography. Students will learn how to use these skills to develop suitability analyses to evaluate the performance of plans and designs or to identify which location would be best for a particular purpose.

Credits: (2)

When Offered: Fall, Spring, Summer

K-State 8: Empirical and Quantitative Reasoning

K-State 8 Tag Rationale: *The course gives students the opportunity to collect, analyze and synthesize spatial data through a structured suitability modeling exercise. Students will use spatial analytical techniques, mathematical logic, and cartographic techniques to identify critical needs for planning and communicate those needs through maps.*

Rationale: *Splitting LAR 704 (currently a 5 credit hour course) into two separate laboratory and studio based courses to provide students more flexibility.*

Graduate Course additions (10-4-16)

Veterinary Medicine – Department of Anatomy & Physiology

ADD: AP 873. Physiologically Based Pharmacokinetic Modeling. (4) II. This modeling course is designed for life science graduate students with an interest in computational toxicology and pharmacology. Development of physiologically based pharmacokinetic (PBPK) models for environmental chemicals, drugs, and nanomaterials in laboratory animals, food-producing animals, companion animals, and/or humans will be introduced. Applications of PBPK models in food safety, toxicology, risk assessment, and pharmaceutical industry will be discussed. This course will cover theory, application software, experimental design, model development, optimization, validation, evaluation, and extrapolation. The expected outcome is that the student will have PBPK modeling knowledge and skills to develop a PBPK model with some mentoring from an experienced PBPK modeler. Format will include both weekly lectures and hands-on computer lab exercises.

Course objectives:

- (1) To provide the student with working knowledge of physiologically based pharmacokinetic models and their applications in toxicology
- (2) To provide students with the technical ability to develop PBPK models for use in their graduate research and careers

Course evaluation:

- (1) Grades will be determined from two written tests (20% each), computer lab simulation exercises/assignments (20%), a project presentation which demonstrates the development of a PBPK model and the application of the PBPK model in toxicology (40%).
- (2) All grading will be administered through K-State online.

Pr: Consent of instructor and 1 semester of calculus, physiology, pharmacology, pharmacokinetics, toxicology or biochemistry.

RATIONALE: Physiologically based pharmacokinetic (PBPK) models are widely recognized as helpful and necessary tools in the fields of drug development, risk assessment, nanomedicine, and food safety. Due to its wide applications, there is a need of PBPK modelers in the job market. Currently, there is a shortage of education or systemic training programs for the next generation of PBPK modelers and no semester-based comprehensive “PBPK modeling” course in any universities in the U.S. This is because the majority of senior PBPK modelers are working in industry, governmental agencies, national laboratories, or nonprofit research organizations, where the major mission is to apply PBPK modeling techniques, not to teach. Some short-term training workshops are offered, and they are very popular, but the workshops do not provide not enough time to train a qualified PBPK modeler. This course is a key course of the proposed Institute of Computational Comparative Medicine’s online graduate program in Computational Comparative Medicine.

Impact (i.e. if this impacts another college/unit): None

EFFECTIVE DATE: Spring 2017

ADD: AP 875. Structure-Based Drug Design. (3) II. This course is designed for students in the life or physical sciences with interest in computational medicine and drug design. The course focuses on the basics of protein architecture and the thermodynamics of protein–ligand binding, virtual screening of drug candidates, modeling of unknown protein structure, the pharmacophore concept, explicit-solvent molecular dynamics simulation, the thermodynamics of protein–ligand association, and free-energy calculation techniques. For each of these topics, practical knowledge is developed through computer-based practical exercises using professional and academic grade software. In addition to treating the traditional focus of drug design, i.e. maximizing the binding affinity of a candidate drug for the target biomolecule, the course also addresses the increasing use of similar techniques for predicting other interactions important for the safety and efficacy of a drug, such as screening for side effects due to interactions with off-target biomolecules. PR: permission of the instructor or 1 semester of introductory computer programming, numerical methods, or other course involving computer programming (e.g. statistics courses using R)

Course Objectives:

- (1) Provide the student with basic knowledge of protein–ligand binding and drug design concepts
- (2) Enable the student to effectively use computational tools to predict protein–ligand interaction and apply these predictions to drug design
- (3) Give the student the ability to apply the tools and concepts of this course in their graduate research and careers

Course Evaluation:

Grades will be determined from two written tests (10% each), weekly computer-based laboratory assignments (50%), and a final drug design project (30%).

RATIONALE: Structure-based drug design makes use of three-dimensional structures of biomolecules to rationally design pharmaceutical compounds, invariably requiring computer modeling to visualize and analyze these structures and understand their interactions with candidate drugs. There is demand for structural and computational drug design skills in the job market; for instance, searches on NatureJobs or LinkedIn regularly turn up postings by pharmaceutical companies looking for applicants with experience in "computational chemistry" and "computer-aided drug design."

Although it was noted as long ago as 2004 in the journal *Science* (DOI: 10.1126/science.1096361) that "all top pharmaceutical companies have substantial structural biology and computational chemistry groups," few opportunities exist at US universities to learn the concepts and computational tools of structure-based drug design. As another indication of demand for educational opportunities covering the topics of the proposed course, The American Chemical Society offers similarly named, two-day "Structure Based Drug Design" course. The University of Massachusetts Amherst has intermittently offered a "Drug Design Course", which seems have two lectures structure-based drug design. However, it seems that the proposed course would be unique in allotting a full semester to structure-based drug design and the associated computational tools.

This course will be a core focus for the development of an online certificate program in Computational Comparative Medicine.

Impact (i.e. if this impacts another college/unit): None

EFFECTIVE DATE: Spring 2017

September 28, 2016

Professor Teresa Hartman,
Chair, Faculty Senate Academic Affairs Committee
Faculty Senate Office
211 Fairchild Hall
CAMPUS

Dear Professor Hartman:

On behalf of the Department of Mechanical and Nuclear Engineering, I am writing to request that our continued standing to accept non-K-State graduates for the Minor in Nuclear Engineering be approved.

The new minor and the offering of it to non-K-State graduates was approved by Faculty Senate on February 15, 2011. The effective date for the offering was Fall 2011. Therefore, this Fall of 2016 it has been in place for five years. In accordance with University Handbook, Section F160, a request is necessary every five years in order to continue offering it to non K-State graduates.

Below is the required information:

1) Number of Graduates Admitted/Completed: Report the number of K-State and non-K-State students admitted to the minor program during the last five-year period, the number in each category who completed the minor program, and their GPA for the completed minor.

	# of K-State students admitted	# of K-State students who completed the minor	# of Non K-State students admitted	# of Non -K-State students who completed the minor	GPA
2011-12	74	10	0	0	3.00
2012-13	68	15	0	0	2.86
2013-14	61	10	0	0	2.88
2014-15	62	7	0	0	2.82
2015-16	69	10	0	0	2.95
Totals:	334	52	See note below	0	2.91

NOTE: 152 non-K-State students enrolled and completed one or more of the nuclear engineering distance course for the minor program but didn't take all required course to obtain a minor from K-State.

2) Program Assessment Results: Report program assessment results in terms of its rationale, quality, and cost. Include a discussion of the way in which the minor has enhanced the non-K-State graduate's professional standing, income, or interest in pursuing a graduate degree at K-State as a result of the availability of the minor program.

One hundred fifty-two non-K-State students enrolled and completed one or more of the nuclear engineering distance course for the minor program but didn't take all required course to obtain a minor from K-State. Many of the students indicated that by completing the distance courses, they were able to enhance their credentials, and the additional expertise gained by completing the distance courses helped them find jobs and with better starting salaries. These courses on an average basis resulted in about \$50,000 revenue for K-State.

Please let us know if any additional information is requested.

Sincerely,

Sincerely,

A handwritten signature in black ink that reads "M. H. Hosni". The signature is written in a cursive style with a small dot at the end.

M. H. Hosni, Ph.D.
Professor and the Frankenhoff Chair in Engineering
Director, University Engineering Alliance
