Degree Requirements: 127—128

Degree Requirements: 125 – 126

RATIONALE:

- (a) The ART 425 and MUSIC 405 classes required in the program have been moved into general education humanities from the pre-professional category. Since more emphasis is placed in the courses on arts appreciation for elementary teachers, this movement into general education is justified.
- (b) Narrowing the range of choices for social sciences classes will provide more focused preparation for students when they take the content tests required for teacher licensure. Preparation for the content tests also necessitates a requirement in political science and economics. To enable this change, the previous requirements for non-western cultures and a restricted elective have been removed. Recent results on the state contents document the need for students to have improved background in history, geography, political science, and economics.
- (c) Lower the course number for EDEL 350 Health and Movement Education to be EDEL 250 since students are sophomores when they take the class. Course numbers at the 200-level are typically sophomore-level courses.
- (d) Currently, students need 50 completed hours to be eligible for admission to teacher education. Since 8 credits have been removed from the pre-professional component (3 credits for art, 3 credits for music, and 2 credits for educational technology), the credits for admission to teacher education have also been reduced by 8 credits to become 42 credits needed for admission to teacher education.
- (e) Three new courses have been added. Data from program reviews (e.g., practicum performance, SLO results, exit survey and graduate survey results; and teacher education advisory committee recommendations) document the need to provide more complete coverage in the program on core teaching skills, classroom assessment, and classroom management and discipline, thus justifying these new courses.
- (f) Several professional courses have been renumbered to reflect their new placement in the program sequence. This renumbering will also facilitate student advising. In some cases, a minor change in title has been entered.
- (g) The Language Arts Methods and the Reading Methods courses have been changed to become Teaching Literacy: Grades K-2 and Teaching Literacy Methods: Grades 3-6 in an effort to avoid duplication of content and to provide more appropriate grade-level attention to literacy methods. They also have been placed in different Blocks in the program so they are taken in an appropriate sequence.

- (h) For the Teaching Diverse Learners class, content has been added on culturally and linguistically diverse students, the title has been changed to reflect that new content, and one credit has been added to the course. Data from program reviews (e.g., practicum performance, SLO results, exit survey and graduate survey results; and teacher education advisory committee recommendations) document the need to provide more complete coverage in the program on culturally and linguistically diverse students.
- (i) A minor change in title has been entered to make the title more descriptive. Also, the credits have been reduced by one to reflect the 15-week semester that the Board of Regents builds into course clock hour requirements.
- (j) The area of concentration for modern foreign language is being dropped because (1) taking this area does not lead to licensure as a foreign language teacher (students must go through the secondary education program for that), (2) elementary teachers do not have responsibility to teach foreign languages, and (3) having students take one of the other content-related areas of concentrations would provide more appropriate background for areas they would have responsibility teaching in the K-6 grades.

EFFECTIVE DATES:

- Spring 2009: The requirement of 42 completed credits for admission to teacher education would go into effect.
- Fall 2009 and Spring 2010: Any student admitted to teacher education and starting the Professional Education courses (i.e., Blocks A, B, and C) would follow the new requirements for Professional Education courses. Those students would be permitted to use either the former requirements or the new requirements for Pre-Professional Education and General Education.
- Fall 2010: Any student admitted to teacher education and starting the Professional Education courses (i.e., Blocks A, B, and C) would follow all requirements for the new program (including General Education, Pre-Professional Education, and Professional Education).
