

Kansas State University Faculty Senate
Faculty Senate Committee on Technology

Minutes

March 7th, 2017

3:30 p.m. – Room 401 Hale

Attended: Lisa Shappee, Rob Caffey, Nathan Nelson, Andrew McKittrick, Don Crawford, Loren Wilson, Sherry Harr, Stacy Hutchinson, Karen Blakeslee, Josh McCune

- Approved Minutes from February 7th Meeting
- Student Response System – Scott Finkeldei
 - In the past KSU supported one system, got away from that about 10 years ago when more options came about. I-clicker has been the predominate tool of choice.
 - Top hat wants exclusivity, which will not work. The big question is does KSU pick one system and support it or let everyone pick what they want and not offer technical support as the cost is too high to support multiple systems that offer the same services. We need to discuss with our constituents and give Scott the information.
- Data Access Report- Rob Caffey and Josh McCune
 - It is a case by case basis if users are notified, however most individual are sent a letter saying they are responsible for keeping info on a case. Sometimes the ability to delete email is taken away by ITS. The only time an individual is not informed is when ITS is specifically told not to inform the user.
 - Email is public...always assume someone could see your email.
