Attended: Don Crawford, Sherry Harr, Jason Bengston, Joe Lear, Betsy Draper, Diana Blake, Carolyn Ferguson, Andrew McKittrick, Karen Blakeslee, Nathan nelson, Lisa Craft

- Approve Minutes
 - Approved Minutes from October 4, 2016 meeting

- KSIS Update – Diana Blake
 - KSIS will be upgraded to a new release Fall 2017. The new release will deliver mobile-friendly features and major changes to the user interface. Additional project updates and product news will be published in the coming months.

- Enterprise Architect (EA) program – Betsy Draper
 - Viewed a YouTube video explaining what an EA Program is and that we are working towards implementing this at KSU. Betsy will keep up posted as discussions and progress continues.

- Email and Phishing – Joe Lear
 - The KSU.edu and the K-state.edu domains have been de-whitelisted in Office 365. There have been emails from IT and K-State Today articles regarding this change. This was done in an effort to stop the spam emails that are spoofs of our actual emails. This means that all emails now go through the SPAM filter and everyone should be checking their junk email folder to ensure that no emails that you actually wish to receive are there.
