Resolution Regarding Inter-Greek Relations

On behalf of the Kansas State University Interfraternity and Panhellenic Executive Councils and collegiate Chapter Presidents, in order to maintain the high level of respect that exists between member chapters and to continually promote safety within the Greek Community, the following position will be emphasized.

The destruction of personal property through any act of trespassing onto private property, any act that jeopardizes the personal safety of chapter members, and/or any act that leads to additional risk management concerns is discouraged. Chapters are encouraged to contact the appropriate authorities if at anytime member safety is in question or permanent property damage occurs.

This position statement is not intended to discourage the long time traditions that exist within our Greek Community. It should however continue to promote safety and respect between Kansas State University member chapters.
