The Seaton Globe

Kansas State University Department of Geography 14 April 2008

This newsletter is viewable on the department's website (www.k-state.edu/geography). Note that links found in the newsletter will work if you go to the online version.

Presentation

April 24 Dr. Kendra McLauchlan: “Terrestrial Ecosystem Change during the Very Late Holocene: Evidence from Paleorecords,” 4:00 pm, 101 Thompson Hall.

Publication

Events and Other Things of Note

Goodin, D. G., Koch, D.E., and Ghimire, K. "Landscape Constraints on Hantavirus Distribution in Paraguay." This invited paper was presented by Doug Goodin in the Symposium on Landscape Ecology of Infectious Disease held at the US-IALE 2008 meeting in Madison, WI.

Sumanth Reddy has been selected to receive the 2008 College of Arts and Sciences William L. Stamey Teaching Award. Sumo was the only GTA in the College to be so honored this year and this is the second year in a row that the winner is a geographer (L. Scott Deaner in 2007). Sumo will be recognized at the College of Arts and Sciences Spring Commencement on Saturday, 17 May 2008 at 8:30am in Bramlage Coliseum. Congratulations Sumo on a truly outstanding achievement!

Scott Deaner recently acted as a consultant for a play called MY APPALACHIAN HEART. The play was presented at Penn State - Harrisburg on January 21 as part of their 10th Annual Martin Luther King Celebration. MY APPALACHIAN HEART was set in Keystone, WV, the predominately African-American coal mining community that Scott researched for his M.A. thesis. His writings aided the playwright, Dorothy King, with historical background on the area as well as helped her better understand the importance of Keystone for African-Americans in Appalachia. Also, Scott’s maps and photographs helped set designers replicate a 1950s version of the town.

Please contact Jeremy Aber (aber@ksu.edu) or Bimal Paul (b kp@ksu.edu) if you have items for the Globe.
