Desktop Capture with Mediasite Desktop Recorder

1. Go into your K-State Online (Canvas) course and open you My Mediasite, and click on the “+ Create Presentation” button.
2. Name your presentation; give it a description, and select where you want your presentation to go (channel, shared folder, etc.).
3. Click the “Launch Desktop Recorder” button and wait for it to load, and then select “Record Now.” Desktop Recorder allows Video Capture from a webcam, or Audio Capture alone.
4. Go through the select the type of recording you with to capture (screen and video, audio, etc.).

Choose Appropriate Video and Audio Settings:

Video Capture – Camera Size, Camera Input, and Microphone Input must be specified.

Audio Capture – Microphone Input must be specified.

* Follow the on screen prompts and explanations

Capture Area Presets

**Desktop** - allows the capture of the entire screen. If you have multiple monitors, you will be asked to specify one screen to capture.

**Window** - allows you to capture the entirety of an application’s window, such as an Internet browser or word processor.

**Region** - allows you to customize a capture area of your own choice, by clicking and dragging the sides or corners. You may also specify a 4:3 or 16:9 region of any size, which will stay proportional as you adjust it.

- Once you have selected your capture area, the Summary page will allow you to review the choices you have made. Once everything is satisfactory, hit Record.
- Once you have finished recording, select Finish. Mediasite will automatically begin uploading the presentation to the area you designated in your Mediasite account.
