Prior to 2007, reporting methods for inventory were based upon a different set of categories.

added vols for FY08 include over 360,000 new e-books

^^ beginning in FY07, numbers include cataloged government documents

^^ beginning in FY08, reflects only cataloged items in the online catalog

All numbers for collections are reported based on titles, volumes or pieces linked in the online catalog.

* Where u/a is noted, previous years' numbers included old manual counts added to the automated counts: this led to increasingly unreliable reporting as more items were retrocon'd.

* Other u/a (for serials in particular), reflect changes in the way materials were coded: beginning FY08 there is more accurate coding for consortial packages

The reporting categories are those found in NISO Z39.7-2004, *Information Services and Use: Metrics & statistics for libraries and information providers--Data Dictionary*
