

WOMEN MANAGING THE FARM

*“A Comprehensive Program
for Farm Owners,
Partners & Rookies”*

Women play an active role in all aspects of financial and risk management of farm operations. The changing dynamics and economics of the farm operation and the farm household lead to the changing roles women play on the farm today.

To aid women who are helping to grow the nations food supply whether by design, marriage or inheritance, the Women Managing the Farm conference is slated for Feb. 9-10 in Hutchinson, Kansas.

Over the 1-1/2 days of the conference, presentations regarding business planning, managing employees and more will be interspersed with opportunities for networking and learning from others attending the conference.

The WMF conference has been developed for all women involved in an operation from the fulltime manager to the absentee landowner needing a bit of insight about managing their investment
