

CREDIT CARD SAFETY ON THE INTERNET

TIPS:

- 1. Choose one credit card with a low credit limit as your primary card for all transactions done via the Internet.**
- 2. When purchasing multiple items on different days from the same company, try to use the same card used on prior purchases.**
- 3. Before making a purchase on line, check to make sure the company exists by looking it up in the yellow pages.**
- 4. Make sure you trust the company and that it is a secure (encrypted) site.**
- 5. Read all fine print.**
- 6. Thoroughly review your credit card statements immediately and report any charges you did not make.**
