Accessing Horizon 2020 Research Funding for the Global Community

A Complimentary Webinar Presented by INORMS
The International Network of Research Management Societies

with support from NCURA, National Council of University Research Administrators

Presented Live: Friday, June 23, 2017
Available on Demand: Monday, June 26, 2017

Session Description:
Horizon 2020 is the biggest EU Research and Innovation programme ever with nearly €80 billion of funding available over 7 years (2014 to 2020). Horizon 2020 is open to everyone around the globe. Nevertheless, it still requires knowledge and skill to navigate towards a successful grant!

This webinar will cover the basics about Horizon 2020 for non EU-members. How to apply, to which programs and when, what gets funded and where might our own resources be necessary. The session will also deal with special considerations of 1) a European applicant wishing to partner with a non-european partner and 2) a non-european institution wishing to partner on a H2020 grant application. And what does the recently signed "Implementing Arrangement" between the US and the EU actually mean?

Learning Objectives:

This webinar is aimed at mid to senior level research managers who are interested in accessing H 2020 funding either as European applicants or their non-european partners.

Webinar participants will learn the basics of how to apply for H2020 and special considerations of 1) a European applicant wishing to partner with a non-european partner and 2) a non-european institution wishing to partner on a H2020 grant application.

Moderator: ***Martin Kirk*****,** Director,Office of Research Services, University of British Columbia **Panelists:** ***Annika Glauner,*** Senior Policy and Research Development Officer, ETH Zurich / University of Zurich; ***Jennifer Ponting***, Director, Pre-Award Services, Harvard University
