

Subject: RE: Collaborate2Cure is Back!

All,

There will also be a \$50,000 grant for new collaborative research in this space at the conclusion of the program.

To be eligible, there must be inter-institutional collaboration, and one must make a Collaborate2Cure presentation.

Debbie,

Thanks for spreading the word.

Thank you,

Wayne

Subject: FW: Collaborate2Cure is Back!

Hi All,

I wanted to share information on the Collaborate 2 Cure that KCALSI is hosting in KC. Faculty doing research in this area can attend via Zoom. If you know of any faculty doing research in this area, can you forward it to them and Cc me and Wayne Carter so we can follow up if needed. We want to make sure we have interested faculty participate!

THANKS!

Debbie

**COLLABORATE2CURE
STARTS NEXT WEEK!**

and the topic is...

Mitochondrial Dysfunction

Mitochondria are the energy powerhouse of the cell and are responsible for creating more than 90% of the energy needed by the body to sustain life and support organ function. The parts of the body, such as the heart, brain, muscles and lungs, requiring the greatest amounts of energy are also the most affected by mitochondrial dysfunction. Diseases linked to mitochondrial dysfunction range from Alzheimer's, to obesity to heart disease.

[About Collaborate2Cure: Mitochondrial Dysfunction](#)

When:

Every Monday, 4:00 – 6:00pm

•Presentations: 4:00 – 5:00pm

•Networking: 5:00 – 6:00pm

Who:

Anyone and Everyone –
Scientists, clinicians,
entrepreneurs, students and
anyone interested in learning,
contributing and collaborating

Where:

KUMC Fairway Campus
4350 Shawnee Mission Parkway
Fairway, KS

or **join us virtually using
ZOOM.**

You're Invited to Present:

Please email Dr. Wayne Carter,
wcarter@kclifesciences.org, with
a presentation title and a phone
number for follow-up. All
presentations will be 15-20
minutes.
