## GENERAL

### 42-2 Higuchi Award (KU)

Each year, the Higuchi-Endowment Association Research Achievement Awards honor great researchers at Regents Institutions in a diversity of fields. To select next year's Higuchi award winners, you are encouraged to nominate a colleague who is deserving of this high honor. Nominations from previous years remain active for five years and are considered along with new nominees in each year's review and recommendation process. Past Higuchi Award recipients may be re-nominated after ten years.

Deadline: 12/3/2004

### 42-3 Study of the United States Institutes (STATE)

The Branch for the Study of the U.S., Office of Academic Exchange Programs, Bureau of Educational and Cultural Affairs, announces an open competition for public and private non-profit organizations to develop and implement the Study of the United States Institutes: U.S. Institute on Religious Pluralism, U.S. Institute on Foreign Policy, U.S. Institute on Contemporary American Literature, and U.S. Institute on American Politics and Political Thought. These institutes, for a multinational group of 18 experienced university faculty, are intended to provide

participants with a deeper understanding of American life and institutions, past and present, in order to strengthen curricula and to improve the quality of teaching about the United States at universities abroad. The institutes should be designed as intensive academically rigorous seminars for scholars from outside the United States and should have a strong central theme and focus. Each should also have a strong contemporary component. ECA/A/E/USS-05-030RP, FP, AML, AP.

## ENGINEERING, MATHEMATICS & PHYSICAL SCIENCES

### 42-6 Hydrologic Research (DOC)

This program represents a NOAA/NWS effort to create a cost-effective continuum of basic and applied research through collaborative research between the Hydrology Laboratory of the National Weather Service Office of Hydrologic Development and academic communities or other private or public agencies which have expertise in the hydro meteorologic, hydrologic, and hydraulic routing sciences. These activities will engage researchers and students in basic and applied research to improve scientific understanding of river forecasting. Ultimately these efforts will improve the accuracy of forecasts and warnings of rivers and flash floods by applying scientific knowledge and information to NWS research methods and techniques, resulting in a benefit to the public. Deadline: Preproposals 12/17/2004

### 42-7 Brownfields Job Training Grants (EPA)

EPA is requesting proposals for brownfields job training grants. The goals of the Job Training Program are to prepare trainees for future employment in the environmental field and facilitate cleanup of brownfield sites contaminated with hazardous substances, pollutants, or contaminants and petroleum. Grants funds may be used to train residents for the handling and removal of hazardous substances, which includes training for jobs in sampling, analysis, and site remediation. Funds also may be used for the following:

1) training in the management of facilities at which hazardous substances, pollutants, contaminants or petroleum contamination are located; 2) training for response activities often associated with cleanups - for example, landscaping, demolition, and groundwater extraction; and 3) development/refinement of existing curriculum for the training. Grant funds may be used to recruit job training participants from communities impacted by brownfields and for outreach activities directed toward engaging prospective employers to be involved in the job training program. ## HEALTH & LIFE SCIENCES

### 42-8 Grants for Traumatic Injury Biomechanics Research (CDC)

The Centers for Disease Control and Pre-

vention is soliciting investigator initiated research that will help expand and advance our understanding of non-occupational unintentional and violence-related injuries, and to minimize the consequences of injuries when they do occur. The National Center for Injury Prevention and Control (NCIPC's) public health approach draws on biomechanics in seven topic areas: 1) Preventing Injuries at Home and in the Community; 2) Preventing Injuries in Sports, Recreation, and Exercise; 3) Preventing Transportation Injuries; 4) Preventing Intimate Partner Violence, Sexual Violence, and Child Maltreatment; 5) Preventing Suicidal Behavior; 6) Preventing Youth Violence; and 7) Acute Care, Disability, and Rehabilitation. ### SOCIAL SCIENCES

#### 42-11 Violence-Related Injury Prevention Research; Youth Violence, Suicidal Behavior, Child Maltreatment, Intimate Partner violence, and Sexual Violence (CDC)

The National Center for Injury Prevention and Control (NCIPC) is soliciting investi-

gator-initiated research that will help expand and advance our understanding of violence, its causes, and prevention strategies. The following research themes are the focus of this investigator-initiated solicitation: 1) Conduct studies to build knowledge on methods, structures, and processes to implement evidence-based interventions, programs and policies to prevent intimate partner violence, child maltreatment and youth violence. 2) Evaluate the efficacy, effectiveness, and cost effectiveness of primary interventions, programs and policies to prevent perpetration of intimate partner violence, sexual violence, child maltreatment (includes physical, sexual, emotional abuse and neglect, youth violence or suicidal behavior. 3) Identify protective factors across at least two levels of influence (e.g., individual, family, peers, school/workplace, neighborhood, community) that reduce risk for the perpetration of intimate partner violence, sexual violence, child maltreatment, youth violence or suicidal behavior among populations at elevated risk for engaging in such behaviors. **Deadline: Letters of Intent 12/6/2004; Applications 2/2/2005**

#### 42-12 Science Policy Fellowship Program (APA)

The purpose of this program is to provide psychologists an invaluable learning experience in research administration and policy, to contribute to more effective use of psychological knowledge within federal research funding agencies, and to broaden the awareness about the value of the psychology-government interaction among psychologists and within the federal government. The Fellow will spend one year working as a special assistant in an executive branch research funding/ coordinating office. Past Fellows have worked in the White House Office of Science and Technology Policy, the Office of Behavioral and Social Sciences Research, and the National Institute of Child Health and Human Development at the National Institutes of Health, and the National Science Foundation.
