

How to Search for the Cheapest Flights!

Office of International Programs • 304 Fairchild Hall • 785-532-5990 • www.k-state.edu/oip/

There are three different types of airfare websites:

1. **Aggregators** are search engines that check airfare prices out the many different airlines.

www.farechase.com

www.kayak.com

www.sidestep.com

www.dohop.com

www.airgorilla.com

www.farecast.com

www.skyskanner.com

www.ebookers.com

www.airfarewatchdog.com

2. **Booking Engines** check multiple websites and tack on around a \$6 fee that's added onto the original price of the flight.

www.orbitz.com

www.expedia.com

www.cheaptickets.com

www.hotwire.com

www.priceline.com

www.statravel.com

International Booking Engines:

www.skyscanner.com

www.momondo.com

www.mobissimo.com

www.trabber.com

www.ebookers.com

www.snowflake.com

www.spainair.com

www.skyeurope.com

www.etn.nl/lcosteur.htm

3. **Airline's own website** (A good thing to do is call the airlines directly to find out if there are any special rates for students or any specials going on)

AirtranAlaska

America West

American Airlines

Continental

Czech Airlines

Delta

Frontier

Jet Blue

Lufthansa

Midwest Express

Northwest

Sun Country

Spirit

U.S. Airways

United Airlines

Varig

It is important to use these resources in a combination in order to get a variety of prices that will help narrow down your search. One good formula would be to start looking at the prices on the aggregators' websites, then move to the booking engines, then to compare the cheapest tickets you find on the major airlines websites.

When it comes time to book your flight, it is definitely recommended you buy a round trip ticket.
