Leadership Opportunities

With TRIANGLE, leadership opportunities are endless. As a rebuilding chapter on campus, you could have the chance to step in and have an immediate impact in one of many leadership roles such as social chair, membership development, and on the executive council. TRIANGLE also holds one of the best leadership schools in the Greek community and every chapter sends two representatives to this school. You could be one of those men.

Networking

With over 22,000 lifetime members that are in similar disciplines, TRIANGLE offers great opportunities for networking. We have alumni that are working for Sprint, Honeywell, Amana, and Hallmark, and that is just from our chapter! And by using the TRIANGLE national listserv, you can always find job opportunities as well as put your resume out for your brothers to see and send out for you.

Organizational Management

By being a non-profit social organization, you can learn how the structure and operation of one of these organizations works. Areas like financial management, activity planning, legal issues, and membership retention are all areas that you could learn about. There are also opportunities for project management, such as event planning and recruitment programming. As you can see, TRIANGLE offers a lot of chances to get involved with organizational management.

Academic Assistance

Academic assistance is one of the longest running programs TRIANGLE has to offer. By restricting our membership to technical majors, we have established a great system for assistance and tutoring. And this is a two way street. Everyone has a chance to benefit from one of the other members in TRIANGLE in some way, and academics is one of the areas that we like to focus on.
