

K-State 2025 Strategic Action and Alignment Plan

College or Major Unit: Agriculture & K-State Research and Extension

Department: Entomology

1. What are your Department’s mission and vision and how does your organization contribute to achieving the University’s and your College’s/Major Unit’s vision for K-State 2025?

Our Strategic Vision: Become one of the Top 5 Departments of Entomology in the United States. We are currently ranked #8 by the National Research Council’s Assessment of Doctorate Programs among all entomology and entomology-related departments in the United States offering PhD degrees. The NRC assessment integrates many of the metrics of critical interest to our department, including scholarly publications, research funding, instructional quality, PhD student mentoring, student experience, and other valuable measurements. The NRC rankings will be used to evaluate our progress.

Our Mission:

- Provide entomological knowledge for safe, sustainable, and competitive plant, animal, and human health through integrated research and education
- Maintain a stakeholder/clientele-driven focus to research, extension, and teaching
- Generate knowledge to advance science, society, and our environment
- Train students for professions in education, government, business and industry
- Disseminate useful, unbiased information

Success in achieving our strategic vision will support and accelerate the K-State 2025 Vision by strengthening institutional research quality (Theme 1); broadening educational and research experiences for undergraduate and graduate students (Themes 2 and 3); strengthening extension and outreach delivery and engagement (Theme 4); supporting recruitment, development, and retention of students, staff, and faculty (Theme 5); and enhancing and optimizing use of facilities (Theme 6).

2. What are your Department’s key strategic activities and outcomes?

3. Identify [in brackets] which of your Department’s strategic outcomes are directly linked to your College’s/Major Unit’s outcomes. (If your Department or similar unit is not in a College or Major Unit, skip this question.) Links to College of Agriculture Strategic Plan Outcomes are noted as “[CoA x]”, where “x” represents the specific outcome.

4a. What resources and/or opportunities exist for your Department to achieve its vision and outcomes?

- We have a highly motivated faculty and staff who are committed to the success of the department and university, and who have been successful in scholarly productivity, as evidenced by refereed publications, grants awarded, invited presentations, and awards.
- We have active Memoranda of Understanding with multiple international institutions, and have active research programs with international colleagues and are mentoring a number of international graduate students in the department
- Entomology is a strength on campus, with linkages across departments, as well as through the USDA facilities in Manhattan
- Kansas State University houses the Ecological Genomics Institute, Arthropod Genomics Center, and Interdepartmental genetics Program, all of which are strongly linked to Entomology and provide strong collaborative opportunities
- The College of Agriculture has provided resources that have permitted us to renovate formerly antiquated lab and teaching space, and this renovated space will facilitate the function of the department in research, teaching, and extension

4b. What resources and/or opportunities are needed for your Department to achieve its vision and outcomes?

Our strategic plan incorporates some very ambitious goals, including a new building that will integrate all aspects of entomological sciences (ecology, evolutionary biology, genomics, field crop pest management, medical and veterinary/vector biology, remote sensing and sampling, stored products pest management, etc.). The needs are:

- Funds to support renovation of existing space, most of which is severely limiting and antiquated, for near-term progress
- Capital funding for development and construction of a building to house and integrate all arthropod-related research on campus
- Resources to incentivize the recruitment and retention of exceptional faculty, staff, and students
- Support to expand extension programming and personnel lines
- Funds to increase the number of graduate student assistantships and stipends and of research associate salaries, and to provide tuition waivers
- Resources to support experiential development opportunities for undergraduate and graduate students, staff, and faculty
- Information technology support for a system to more efficiently address procurement, inventory, sponsored funding, and travel processing; and to improve departmental website aesthetic and functionality

5. How do you propose to acquire the resources needed for your Department to accomplish its vision and outcomes?

- Request support from central administration and the College of Agriculture for short-term renovations of existing space
- Request administrative support for addition of at least one Extension FTE
- Identify and encourage potential donors to support student funding and capital projects
- Increase acquisition of extramural funds to support research, teaching, and extension activities
- Continue nurturing international linkages to build long-term research and teaching opportunities
