

# Tips for creating online study groups

## Online Resources:

[OpenStudy](#) | [StudyBlue](#) | [Kahoot](#) | [Go Congr](#) | [Samepage](#) | [Google Docs](#)

## 01 Identify if any of your peers are interested in forming a study group.

- If using Zoom, put a message in the chat asking for interest. Use your Learning Management System (LMS) (Canvas) to send an email to students in your class. [Instructions here](#).
- Ask your instructor to create a discussion board or announcement for students to respond to.
- An ideal study group is 4-5 people.

## 02 Structuring the group.

- Decide when your group will meet.
- Decide how you will meet (Zoom, Teams, FaceTime, etc.)
  - Ensure everyone knows how to access the format you choose.
- Decide if you will use Google Docs, Teams, Dropbox, etc. to keep track of notes during study groups.
- Determine guidelines for the functionality of the group.
  - How will questions be asked, who will take notes, who schedules the study groups.
- Consider setting up a chat group through messenger or social media to send reminders or ask questions as they arise.

## 03 Conducting the study group.

- Do a check-in with everyone before starting to review content.
- Take breaks as needed.
- Do not schedule more than an hour for a study session (really no longer than 45 minutes).
- Review the material at the end of each session.
