

PRE-OCCUPATIONAL THERAPY

PRE-PROFESSIONAL ADVISING CENTER

PRE-HEALTH AT K-STATE

K-State's Pre-Professional Advising Center provides students with a comprehensive, individualized and guided experience to explore and develop their interests in pre-health. The centralized office, conveniently located in the Berney Family Welcome Center, serves as a hub for advising and support to help students succeed in their pre-health goals.

Students interested in a health career will select one of the 250 majors offered at K-State and then declare their pre-health designation. Students are able to select a major of interest and take courses that will provide a strong educational foundation for professional school.

Common majors: biochemistry, biology, chemistry, human development and family science, integrative physiology, kinesiology, life sciences, nutrition and health, psychology

Personalized health
career advising

Hands-on career
preparation

Dedicated student
organizations

Above average
placement

PRE-HEALTH ADVISING

Pre-Health students have at least two advisors, an academic advisor; sometimes called a major advisor, and a pre-professional advisor; sometimes called a health professions advisor.

Major advisors help students understand what they must do to complete the requirements of their major (degree). Health professions advisors help students understand what they must do to become competitive applicants to health professional schools and programs.

STUDENT INVOLVEMENT

The Pre-Occupational Therapy Club provides an opportunity to meet other pre-occupational therapy students and become involved both professionally and socially. The club holds regular meetings that feature guest speakers from professional schools, community service agencies and providers.

START YOUR APPLICATION PROCESS NOW

Pre-Health students begin their application to professional school the first day they step onto their college campus.

Becoming a competitive applicant to any health professional school is a process that builds over time. Here are some ways to get a head start while in high school:

1. Take the highest-level courses available to you, particularly in math and science.
2. Study to learn, not to memorize; work to develop critical thinking skills and effective study habits.
3. Learn about your desired health care career through shadowing, serving as a CNA or researching the profession thoroughly online.
4. Volunteer and serve your community to show your interest in helping others.
5. Broaden your knowledge base to develop an appreciation for different ways of thinking and living through reading or interacting with those who have a different background, socioeconomic status or lifestyle.

PREPARING FOR OCCUPATIONAL THERAPY SCHOOL

- Students must earn a bachelors degree prior to admission to occupational therapy (OT) school.
- There is no preferred major.
- In addition to earning a bachelor's degree, students must complete the courses required by the OT schools to which they plan to apply.
- Some schools require completion of the Graduate Record Exam (GRE).
- Requirements at individual OT schools vary.
- Students who complete occupational therapy school will receive a Doctor of Occupational Therapy degree.

PREREQUISITE COURSES

<u>COURSE</u>		<u>HOURS</u>
