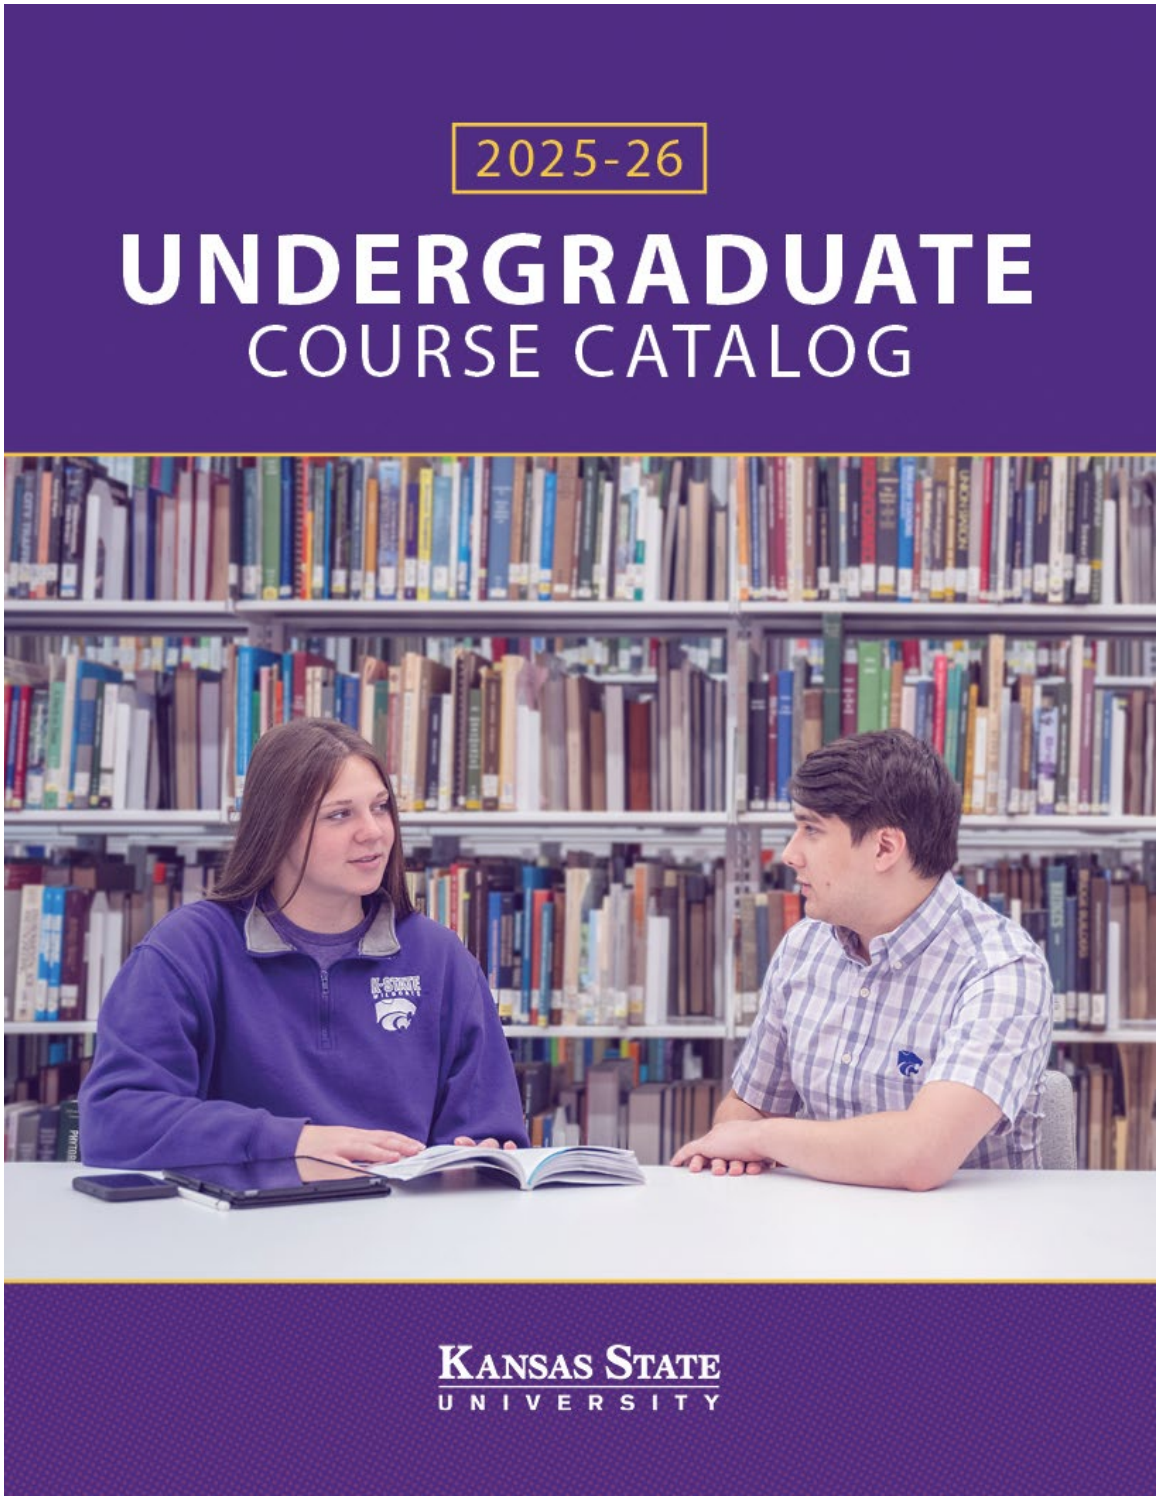
2025-2026 Undergraduate Catalog



Governance and Faculty

Governance Councils

Faculty

The faculty at Kansas State University is dedicated to excellence in teaching, student advising, research, extension education, scholarly achievement, and creative endeavor.

K-State recognizes superior teaching with annual faculty awards. Citations for the Outstanding Teachers of the Year and for Distinguished Graduate Faculty Members are presented at commencement. The university also honors faculty members who contribute to the expansion of knowledge in their respective fields.

The faculty assumes a major responsibility to participate in outreach activities that serve the citizens of the state, and many hold leadership positions in their disciplines and in professional organizations.

Faculty Senate

Undergraduate student learning outcomes

Kansas State University strives to create an atmosphere of intellectual curiosity and growth, one in which academic freedom, breadth of thought and action, and individual empowerment are valued and flourish. We endeavor to prepare citizens who will continue to learn and will contribute to the societies in which they live and work.

Students share in the responsibility for a successful university educational experience. Upon completion of their degree, all undergraduates are expected to demonstrate ability in at least five essential areas.

Knowledge

> Students will demonstrate a depth of knowledge and apply the methods of inquiry in a discipline of their choosing, and they will demonstrate a breadth of knowledge across their choice of varied disciplines.

Critical thinking

> Students will demonstrate the ability to access and interpret information, respond and adapt to changing situations, make complex decisions, solve problems, and evaluate actions.

Communication

> Students will demonstrate the ability to communicate clearly and effectively.

Diversity

> Students will demonstrate awareness and understanding of the skills necessary to live and work in a diverse world.

Academic and professional integrity

Students will demonstrate awareness and understanding of the ethical standards of their academic discipline and/or profession.

Assessment of student learning

K-State is committed to student learning and to providing the highest quality educational experiences for its students. The university upholds the assessment of student learning and the use of the results of the assessment as key strategies to ensure continuous improvement of student learning. Student learning outcomes at the university, degree program, and support program levels provide a shared vision of what we value and what students are expected to learn.

Within a culture of reflection, scholarship, trust, and shared responsibilities, faculty, with participation from students, administrators, alumni, and K-State constituents, develop and implement ongoing and systematic assessment strategies to understand what, how much, and how students learn. Through the use of both direct and indirect sources of evidence of student performance, results from assessment guide collective actions for, among others, curricular change, better learning opportunities for students, improvement of teaching, and more effective academic support services.

Further information can be found on the K-State Office of Assessment web page.

All-University Regulations

Student Conduct

Philosophy of Student Conduct

At Kansas State University students have a direct and primary role in the establishment and enforcement of campus and living group policies and regulations. The basic philosophy of discipline is one of education and enforcement of community standards. Since that is the ultimate purpose, we focus on the growth and development of the student. Most efforts are directed at preventing problems, or at least correcting them, rather than concentrating on punishment. The responsibility for proper conduct is put upon the student, not the university, with the assumption that most students do not try to intentionally cause violations, and will generally respect the rights and property of others.

The following principles govern the disciplinary process. Every effort is made to bring about outcomes that are positive for all parties involved; students will be members of all Student Governing Association judicial bodies; formal hearing processes are fundamentally fair and respect the rights of the individuals involved; confidentiality will be respected; records of proceedings will be released only on written authorization of the student(s) involved unless otherwise authorized by law or court order. The procedures are outlined in the SGA Judicial Code, included in the by-laws to the SGA Constitution.

Descriptions of the judicial structure and process, as well as university policies, are free and are available in the Office of Student Activities and Services in the K-State Student Union and on their web page.

Prohibited conduct

Neither this nor any other university policy is violated by actions that amount to expression protected by the state or federal constitutions or by related principles of academic freedom.

Student Code of Conduct

https://www.k-state.edu/sga/judicial/student-code-of-conduct.html

The following described conduct is prohibited by this Code and subject to sanctions by the University:

1. Acts of dishonesty, including but not limited to the following:
    1. Providing and/or supplying false information to any University official, faculty/staff member, or office.
    2. Forgery, alteration, or misuse of any University document, record, or instrument of identification.
    3. Tampering with the election of any organization or student governing body.
2. Conduct that substantially disrupts or interferes with teaching, research, administration, disciplinary proceedings, or other University-sponsored activities.
3. Conduct directed towards another person(s) that is intended to and does substantially disrupt or interfere with another's educational or employment opportunity, peaceful enjoyment of residence, or physical security.
4. Attempted or actual theft of property.
5. Intentional damage to property or vandalism.
6. Engaging in hazing of a member or third party for the purpose of initiation into, or admission into, affiliation with, or continued membership within a recognized student organization (RSO), is strictly prohibited. Hazing includes, but is not limited to any action, activity, or situation by which an RSO member intentionally, negligently, or recklessly endangers the physical or mental health, welfare, or safety of an individual, creates excessive fatigue, consumption of any substance or liquid (including but not limited to alcohol), sleep deprivation, mental or physical discomfort, exposes a person to extreme embarrassment or ridicule, involves personal servitude, destroys or removes public or private property, or implicitly or explicitly interferes with the academic requirements or responsibilities of a student. Apathy, acquiescence, or consent to hazing shall not be a defense to this violation.
7. Telephone or Internet harassment, which shall include: (KSA 21-6206)
    1. Making calls containing or making or transmitting any comment, request, suggestion, proposal, image or text which is lewd or obscene remarks.
    2. Making or transmitting calls, whether or not conversation ensues, or any comment, request, suggestion, proposal, image or text with intent to substantially interfere with another person's educational or employment opportunity, peaceful enjoyment of residence, or physical security, including the unwanted distribution of personal information. Transmission of comments, requests, suggestions, proposal, images, or texts may include any transmission utilizing electronic means, including but not limited to sending text, picture, video, or audio messages over social media websites, social media applications, instant messenger or chat services, message boards or any other electronic format.
8. Failure to comply with directions of University faculty, staff, or law enforcement officers acting in performance of their duties or failure to identify oneself to these persons when requested to do so.
9. Unauthorized possession, duplication or use of keys, or other devices that provide access to any University property or services.
10. Unauthorized presence in or use of University premises, facilities, or property.
11. Use, possession or distribution of alcoholic beverages in an unlawful manner or otherwise in violation of a university policy.
12. Use, possession, distribution of a controlled substance in an unlawful manner or otherwise in violation of a university policy.
13. Possession or use of firearms, explosives, weapons, or dangerous chemicals on University premises or at a University Education Program and Activities or any other violation in violation of the University's Weapons Policy.

14. Intentionally initiating or causing to be initiated, any false report, warning or threat of fire, explosion or other emergency, or tampering with, misusing, or disabling university-installed safety equipment.
15. Participation in a campus demonstration which unreasonably disrupts the normal operations of the University included but not limited to the following examples:
    1. infringing on the rights of;
    2. inciting others to disrupt scheduled and/or normal;
    3. intentional obstruction which unreasonably interferes with freedom of movement, either pedestrian or vehicular;
    4. inciting another person to breach the peace.
16. Intentionally engaging in conduct that prevents another person from exercising freedom of expression protected by law.
17. Conduct that is disorderly, lewd, or obscene; breach of peace; or inciting another person to breach the peace.
18. Any violation of "KSU Information Technology Usage Policies."
19. Abuse of the SGA Judicial Program, including but not limited to:
    1. Falsification, distortion, or misrepresentation of information.
    2. Disruption or interference with the orderly conduct of a judicial proceeding.
    3. Knowingly initiating a complaint without cause.
    4. Attempting to discourage an individual's proper participation in, or use of, the judicial system.
    5. Attempting to influence the impartiality of a member of a judicial board prior to, or during the course of, the judicial proceeding.
    6. Verbal, written, phone, or physical harassment, and/or intimidation of a member of a judicial board.
    7. Influencing or attempting to influence another person to commit an abuse of the judicial program.
20. Failure to comply with the sanction(s) imposed under this Code.
21. Any illegal or unauthorized taking, selling, or distribution of class notes.
22. Violation of University policies, rules, or regulations.
23. Violation of federal, state or local law that causes a substantial disruption to university operations.

Honor and Integrity System

Camilla Roberts, Director
K-State Honor and Integrity System
785-532-2595
E-mail: honor@k-state.edu

The Honor and Integrity System operates with the belief that college students are still developing in integrity–the ability to make wise choices in dilemmas. Students who are reported and found in violation are given educational sanctions in hopes of helping those students become better citizens in their professions.

- The honor and integrity system uses the Faculty Senate approved definition of academic dishonesty found in the Faculty Handbook and at the honor and integrity system web page.
- Students' rights are enumerated under Article XII of the Student Governing Association constitution.
- The Honor Council constitution can be reviewed in the student handbook section of the campus phone book. The investigation and adjudication procedures can be reviewed on the web page.

Kansas State University's honor and integrity system is based on personal integrity, which is presumed to be sufficient assurance that, in academic matters, each student's work is performed honestly and without unauthorized assistance. Students who register at K-State acknowledge the jurisdiction of the honor system.

The policies and procedures of the graduate and undergraduate honor and integrity system apply to all students enrolled in courses on campus, off-campus, or via distance learning.

A vital component to the Honor and Integrity System is the inclusion of the Honor Pledge which applies to ALL assignments, examinations, or other course work undertaken by undergraduate and graduate students.

Honor Council

The honor and integrity system trusts students to perform their academic work honestly and with integrity. It is based on trust and administered jointly by students and faculty members of the Honor Council. Having students equally share in the process increases the visibility of Honor Council procedures and promotes a community of trust.

The members of the Honor Council can be found here.

Reporting Academic Dishonesty

All academic community members, students, and faculty are urged to report acts of academic dishonesty. Contact the honor and integrity system director at honor@k-state.edu to discuss or report an alleged violation.

Plagiarism

Plagiarism covers unpublished and published sources, taking someone else's intellectual work and presenting it as your own. Borrowing another's semester paper, handing in a paper purchased from an individual or agency, or submitting papers from a living group, club, or organization file are all punishable as plagiarism. The current definition of plagiarism is in the University Handbook, Appendix F.

Each discipline sets the standard for attribution and acknowledgment of literary indebtedness. If in doubt, students should consult with their department or with recognized handbooks in their field.

The guidelines apply to faculty and research assistants who may use students' and colleagues' research and ideas, as well as students who use source materials and authorities and students who use other students' ideas and work.

Other Forms of Academic Cheating

Other forms of academic dishonesty subject to penalties may be found here.

University Policies

Students, faculty, staff, and administrators are community members dedicated to individual growth and development.

Enrollment at K-State entails responsibilities as well as privileges. Acceptance of and adherence to University policies are necessary to protect the rights of others and the health of the community.

The most current versions of these policies are available on the website.

Advertising, Sales, and Solicitation

Facilities of Kansas State University are primarily for University purposes of instruction, research, and public service; they are not available for unrestricted use by non-university groups. The regulation of commercial activity and the posting and distribution of advertising materials on campus are necessary so that they do not interfere with the academic mission of the University and that income gained from activities held on campus benefits the University. The regulations governing fund-raising and the posting and distributing of literature are available in the PPM, Chapter 8580.

Alcohol and Cereal Malt Beverage Policy

The legal drinking age in Kansas for alcoholic beverages is 21. The Kansas Board of Regents policy permits the service and consumption of alcoholic beverages under authorized and appropriately controlled conditions and regulations. The K-State policy includes information on alcohol and cereal malt beverage service and consumption in residence halls, at athletic events, and for student organizations. Additional information is available in the PPM, Chapter 3053.

Drug-free Workplace Policy

In 1988, Congress passed the Drug-Free Workplace Act, which applies to all institutions holding and applying for federal grants and contracts. K-State adopted the policy that the unlawful manufacture, distribution, dispensing, possession, or use of controlled substances is prohibited in its workplace. Additional Information is housed under the Clery Compliance reporting located here.

Facilities Usage

K-State facilities are available for authorized groups to use for activities that complement the university's teaching, research, and service programs. Policies and procedures for using K-State facilities (other than the K-State Student Union) are available in the PPM, Chapter 7840.

Policies and procedures for use of the K-State Student Union are available on the website here or in the PPM, Chapter 8540: Student Organization Recognition Policy.

Gender

The university seeks to create an environment where all students, faculty, and staff interact solely based on individual strengths and characteristics without having those interactions shaped by generalizations, stereotypes, or valuations based on gender. Policy on Gender and Policy on Prohibiting Discrimination, Harassment, and Sexual Violence, the Office of Civil Rights, and additional resources and support are available in the Center for Advocacy, Response, and Education (CARE).

HIV/AIDS University Guidelines

nder the direction of the Kansas Board of Regents, the university has developed guidelines to assist students, staff, and faculty members in situations involving acquired immunodeficiency syndrome (AIDS) or the causative agent, human immunodeficiency virus (HIV). Current guidelines are available upon request from the Lafene Health Center.

Political Activity Guidelines

The students, faculty, and administration at Kansas State University encourage all members of the University community to take advantage of any and all opportunities to educate themselves regarding the candidates and issues relating to national, state, and local elections. Guidelines are available in PPM, Chapter 8560. In addition, a comprehensive collection of political activities, laws, regulations, and policies is available on the webpage.

Discrimination, Harassment, and Sexual Harassment

Kansas State University is committed to maintaining academic, housing, and work environments free of discrimination, harassment, and sexual harassment. Discrimination based on race, color, ethnicity, national origin, sex, sexual orientation, gender identity, religion, age, ancestry, disability, genetic information, military status, or veteran status is prohibited. Retaliation against a person for reporting or objecting to discrimination or harassment or for participating in an investigation or other proceeding violates this Policy, whether or not discrimination or harassment occurred. This

Policy is not intended for, and will not be used to, infringe on academic freedom or to censor or punish students, faculty, employees, or staff who exercise their legitimate First Amendment rights.

Harassment under these definitions should be reported to the university administrator responsible for the department or unit or to the Office of Institutional Equity. Copies of the policy can be found in PPM, Chapter 3010, and the University Handbook, Appendix J.

Sexual Violence

No form of sexual violence will be tolerated or condoned at Kansas State University. This policy prohibits not only those acts commonly understood to constitute "sexual assault" but all attempts to coerce sexual activity as well. Although the university cannot assure protection from sexual violence, it can state expectations of conduct and impose sanctions on any university student who fails to meet those expectations. Support and resources are available in the Center for Advocacy, Response, and Education (CARE), the Office of Student Support and Accountability, or the Office of Institutional Equity.

Intellectual Property

PPM:7095.100

1. **Student Academic Creations**

   Under Kansas State University and Kansas Board of Regents policies, copyrightable materials created by students in fulfillment of academic or course requirements are considered the property of the student, except when the student collaborates with faculty or staff to create works as part of research or development activities. The University retains a license (permission) to mark, modify, handle, and retain the work as required for instructional or record-keeping purposes. The University cannot use the work in other ways without the consent of the student.

2. **Student Employees**

   Kansas State University retains an ownership interest in creations, inventions, and discoveries developed by students within the scope of their duties as employees of the University. Full details may be found in the Intellectual Property Policy of the Kansas Board of Regents and the Intellectual Property Policy of Kansas State University. The Kansas State University Intellectual Property Policy may be found online at https://www.k-state.edu/policies/ppm/7000/7095.html in the KSU Policies and Procedures Manual. The Kansas Board of Regents policy may be found at http://www.kansasregents.org/policies_procedures.html.

Undergraduate Student Grievance Policies

Undergraduate Student Grievance procedures are located in the University Handbook, Appendix V.

Community Principles

Principles of Community

https://www.k-state.edu/about/values/community/

Kansas State University is a land-grant, public research University committed to teaching and learning, research, and service to the people of Kansas, the nation, and the world. We believe our collective mission is best accomplished when every member of the University community acknowledges and practices the following principles:

We affirm the inherent dignity and value of every person and strive to maintain an atmosphere of justice based on respect for each other.

We affirm the value of human diversity and inclusion for community. We stand united against all forms of discrimination.

We affirm the right of each person to freely express thoughts and opinions in a spirit of civility and decency. We believe that diversity of views enriches our learning environment, and we promote open expression within a climate of courtesy, sensitivity, and mutual respect. For more information, please see the University's Statement on Free Speech and Expression and the University's Statement on Academic Freedom.

We affirm the value of honesty and integrity, and will act accordingly in all professional endeavors and expect the same from our colleagues.

We acknowledge that we are a part of multiple communities, and we have a responsibility to be engaged in a positive way with our civic partners.

We recognize our individual responsibilities to the University community and to the principles that sustain it. We will each strive to contribute to a positive spirit that affirms learning and growth for all members of the community.

Academic Policies and Procedures

Academic Standing

Academic Standing is a formal notice of a student's academic progress. The rules are intended to define what is expected of the students and give them an opportunity to meet the University's academic expectations. At the end of each semester (fall, spring, summer), each student's academic standing is reviewed for action.

University Handbook, F100-103

Good Academic Standing

Undergraduate students are expected to maintain a 2.000 or higher cumulative K-State GPA. Students are in good standing if they meet the minimum GPA standards based on GPA hours. A student must be in good academic standing in order to graduate.

Students on warning/probation or dismissal are not considered to be in good academic standing.

Academic Deficiencies

Undergraduate students are notified of their academic status on KSIS and by the appropriate academic deans from information supplied by the registrar's Office. The academic record of each undergraduate is evaluated twice yearly -- at the end of the fall semester and at the end of the spring semester. The student's academic status does not change as a result of work taken in the summer term or intersession.

Students (excluding students in the College of Veterinary Medicine) are placed on academic warning or dismissal according to the following two sections:

- Status of students who earn less than a 1.000 GPA in a given semester. Students who earn less than a 1.000 GPA in any semester are considered to have neglected their academic responsibilities.

- Any student (freshman or transfer) who earns less than a 1.000 GPA in his or her first semester at Kansas State University will be dismissed.

- Any continuing student enrolled at Kansas State University not dismissed by university academic standards policies but who earns less than a 1.000 semester GPA will have an academic hold placed on their account pending review by the academic dean of the dean's representative(s).

Academic Warning

Undergraduate students (excluding students in the College of Veterinary Medicine) are placed on academic warning or removed from it as follows:

1. Students who earn less than a 2.000 Kansas State University semester or cumulative GPA, excluding transfer credit, will be placed on academic warning.

2. Students will be automatically taken off an academic warning when the Kansas State University semester and cumulative GPA reaches the required level (2.000) in Spring or Fall end-of-term grade posting.

Academic Dismissal

Undergraduate students (excluding students in the College of Veterinary Medicine) are placed on academic dismissal or removed from it as follows:

1. Credit hours used to determine the appropriate threshold will include a maximum of 60 hours of transfer credit hours accepted, Kansas State University graded credit hours, and miscellaneous credit hours completed.

2. Credit hours used in calculating semester and cumulative grade point averages will include only Kansas State University graded credit hours. Grades for courses accepted in transfer from another institution will not be used in the grade point average calculation.

3. Students with a cumulative GPA of 1.000 or greater will not be dismissed until they have accumulated at least 20 semester credit hours as defined in 1) above. (Exception: A student who earns less than a 1.000 semester GPA in his or her first semester at Kansas State University will be dismissed.)

4. Students must be on academic warning the semester prior to dismissal. (Exception: A student who earns less than a 1.000 semester GPA in their first semester at K-State will be dismissed.)

5. Students will be academically dismissed if their Kansas State University cumulative GPA is below the following threshold values:

Total hours accumulated*/Kansas State University GPA

*Defined in Item 1 above

Credits	**GPA**
20-29	1.500
30-45	1.750

46-60	1.800
61-75	1.850
76-90	1.900
91-105	1.950
106+	2.000

6. Students who earn a Kansas State University semester GPA, excluding transfer credit, of 2.200 or more on 12 or more graded hours (or the minimum grade point average established by the student's college, if higher) during the semester in question will not be dismissed.

7. Students who neglect their academic responsibilities may be dismissed at any time on the recommendation of the academic dean.

8. Dismissed students will be readmitted only when approved for reinstatement by the Academic Standards Committee of the college the students are attempting to enter. Normally students must wait at least two semesters before being considered for reinstatement and are on academic warning at the time of readmission.

9. Students who have been dismissed or have had their registration withheld will receive a letter providing a contact person and information about reinstatement or registration procedures.

10. In such instances where an undergraduate student is dismissed from the university and is subsequently admitted into a Kansas State University graduate program, graduate program admission supersedes the need for a student to complete the undergraduate reinstatement process. Such students may be admitted to degree-seeking undergraduate programs without the consent of the Academic Standards Committee.

Credit

K-State is responsible for determining the credit hours awarded for coursework in its programs in accordance with the definition of a credit hour for Federal program purposes. A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency

Credit/No-Credit Courses

Certain courses for which the learning experience is based primarily on participation and/or attendance may be offered on a Credit/No Credit basis. Courses in research numbered 898 (report), 899 (thesis), and 999 (dissertation) are offered only on a Credit/No Credit basis. Letter grades may not be given for any other such Credit/No Credit courses offered by the university. {*University Handbook, F13*}

For courses that are normally given for a grade, the designation Credit may be obtained in the case of credit by examination.

Course Level Key

To maintain a common system of classification of academic information for all state universities, course levels are to be identified by the first
digit of the catalog course number as follows: {University Handbook, F51}

000-099	No credit courses. (Developmental/Pre-College/Remedial)
100-299	Lower-division, undergraduate. Designed as freshman-sophomore courses.
300-499	Upper-division, undergraduate. Designed as junior and senior courses.
500-699	Upper-division, undergraduate. Primarily for juniors and seniors, with an enrollment of less than 50% of master's students.
700-799	Graduate and Upper-Division. Primarily for master's students, with an enrollment of less than 50% of undergraduate students.
800-899	Designed primarily for master's students.
900-999	Designed primarily for doctoral students.

Master's: Courses and thesis for master's students who will ordinarily have accumulated from 1 through 30 graduate hours and students enrolled in professional schools (Law, Veterinary Medicine, M.D., Architecture, etc.).

Doctoral: Courses for specialists and doctoral students who will ordinarily have completed more than 30 hours of graduate work.

The dual listing of courses may be permitted on a limited basis with the written approval of the graduate dean of each institution. A current list of such dually listed courses shall be maintained by each university.

The course numbering system for Kansas Regents institutions as defined in the Kansas Board of Regents Policy and Procedures Manual, Chapter 2, Section A.2.

Definition of a Credit Hour

{*University Handbook, F115 & 115.1*}

One Credit Hour: the amount of effort required to attain a specific amount of knowledge or skill equivalent to three hours of effort per week for 15 weeks.

- Any combination of contact time and effort outside of class is allowed. A common practice is for one academic hour of credit to be composed of a lecture or class to meet for one hour (50 minutes) per week, with two hours per week of outside assignment and study effort expected each week for 15 weeks.

- A laboratory class period equivalent to an academic hour of credit would either meet for one three-hour period each week for 15 weeks with all effort by the student expected to be completed during the laboratory period; or one two-hour laboratory period with one hour of student effort expected outside the class period, each week for 15 weeks.

- Shortened academic sessions (including condensed semesters, intersession classes, or summer classes) and all other modalities (online, distance, etc.) are expected to maintain an equivalent amount of time (contact and outside of class time) as those classes in the 15-week semester.

It should be noted that the judgment of the amount of academic effort that comprises one hour of credit for any class is ultimately a faculty decision, from the development of the course syllabus to the approval through Faculty Senate. Additional time outside of class may be required for graduate coursework. For further detail please refer to the Course Scheduling in the Department Head's manual. {FS 2/14/12}

One-Half Credit Hour: the amount of effort required to attain a specific amount of knowledge or skill equivalent to 22.5 hours of effort.

- Any combination of contact time and effort outside of class is allowed.
- Academic sessions, including full or condensed semesters, intersession classes, summer classes, or other defined periods of time, as well as all other modalities (e.g., online, distance, etc.), are expected to maintain an equivalent amount of time (contact and outside of class time).

It should be noted that the judgment of the amount of academic effort that comprises a one-half hour of credit for any class is ultimately a faculty decision, from the development of the course syllabus to the approval through Faculty Senate. Additional time outside of class may be required for graduate coursework.

Additional Course Information

passed by Faculty Senate on June 14, 2022

Cross-listed Course(s):

Cross-listing is an administrative way for two or more academic units to share responsibility for a single course. The same course is offered collaboratively by *two or more academic units* and identified by the *same course hundred level (i.e. both 2xx, 3xx, etc.), course name***,** *course description, K-State 8 tags, and learning objectives*. Cross-listed courses are combined in the course catalog and when scheduled in KSIS and are subject to the retake policy as repeated courses.

Cross-listed courses must be identical in every way, apart from the subject code (prefix) and course number, and should only be created as a benefit to students. If a course is important to students in another program, that alone is not a valid reason for cross-listing as this can be handled in other ways within the curriculum. Cross-listing is not meant to be used for combining or merging (for purposes of getting one section in CANVAS) the same course taught by the same faculty member into one section (i.e., four sections of ENGL *101 being rolled into one CANVAS section). Trying to do this presents problems with faculty load, enrollment numbers, and reporting.

Dual-Listed Course(s):

The same course is offered by *the same academic units* and is identified typically by the *same course name*, but with different course prefixes, numbers, and levels. Each course should have clear learning outcomes that address the differences in the course level combinations, between an undergraduate/graduate course combination or master/doctoral course combination.

These courses are typically for undergraduate/graduate combinations and do not typically deviate from more than one course (hundred) level as defined by KBOR (e.g., 500/600 or 600/700) or for master/doctoral combinations (e.g., 700/800 or 800/900). Justification must be provided for deviations of more than one-course description level.

Combined, Co-Convened Course(s):

The temporary linking of one or more separate courses that are independent of each other but are combined into one class offering (same time/day and Facility ID) for administrative convenience. Co-Convened courses will have a similar course title and can be used for dual offerings of the same course (both undergraduate and graduate) or courses within different subject areas.

These courses are typically smaller cohorts of students in similar courses by topics but will vary in course level. The academic department is maximizing teaching and space resources by co-convening the course into a common day/time and space offering to ensure maximum utilization of a studio or lab space. Each course offering that is taught in a co-convened manner is independent of the other and has clear learning outcomes that address the specific course level.

Equivalent Course(s):

Courses offered by *one or more academic units* with different course numbers and course names may have a similar or different course prefix. Equivalent substitute courses are noted in the catalog that they cannot be taken for credit if credit has been received in specified equivalent course(s). Equivalent courses are subject to the retake policy as repeated courses.

Enrollment Status

Enrollment Definition
Enrollment is defined as consisting of three major components:
Application: Students provide the information requested by the University for purposes of establishing and administering academic and financial relationships that exist between the University and its students.
Registration: Students register for a course(s) and provides information needed to assess fees and tuition.
Payment of Fees: Students must pay all assessed tuition and other special fees and satisfy all due and/or delinquent amounts payable to the University.
Students who withdraw will be considered no longer enrolled at the time of withdrawal.
Certification of Enrollment
Kansas State University reports enrollment status based on the definitions listed below. Information on enrollment is reported through the National Student Clearinghouse (NSC) and is available for the semester beginning the first week of classes.

- Students participating in internships are not automatically considered full-time for the semester of their internship. The number of hours for an internship is based upon the credit hours granted for the internship.
- Non-degree students' enrollment status is reported based on the level (i.e. undergraduate, graduate, etc...) of the non-degree program.
- Students enrolled in a dissertation, thesis, or cooperative education are considered full time regardless of the hours enrolled.
- Students who withdraw are not considered enrolled in the course once the withdrawal has been processed, and the enrollment status will be adjusted and reported as of that time.
- Students receiving Financial Aid should confirm requirements for financial aid eligibility.

The following tables detail the credit hours that are used to verify full-time, three-quarter time, and half-time enrollment status for students at Kansas State University. Credit hours can be any combination of undergraduate, graduate, and veterinary medicine credit.

Fall/Spring Terms				
Status	**# of Undergraduate Credits**	**# of Graduate Credits**	**# of Grad Assistant Credits (0.4 - 0.9)**	**# of Vet Med Credits**
Full-Time	12 or more	9 or more	6 or more	9 or more
Three Quarter Time	9-11	7-8	5	7-8
Half-Time	6-8	5-6	3-4	5-6
Less Than Half-Time	1-5	1-4	1-2	1-4

Summer Terms

Status	Undergraduate Domestic	Undergraduate International *	Graduate without Assistantship	Gradaute with Assistantship	Vet Med
Full-Time	12 or more	6 or more	6 or more	1	9 or more
Three-Quarter Time	9-11	5	5	-	7-8
Half-Time	6-8	3-4	3-4	-	5-6
Less Than Half-Time	1-5	1-2	1-2	-	1-4

**Applies to students admitted to K-State as an Undergraduate International Transfer or International First-time Freshman Only*

Revised: 10/9/2019

- Undergraduate Student-Veterans receiving V.A. Educational Benefits enrolled in a (non-standard) part of term will have their training time determined by the Veteran Affairs Administration.
- Graduate Student-Veterans receiving V.A. Educational Benefits enrolled in a (non-standard) part of term will have their training time reported according to the length of a session as defined by the Veteran Affairs Administration.

Classification of Students

Classification of students {*University Handbook, F40*}. A student who is a high school graduate, or who offers 15 acceptable units of high school work, is classified as a freshman. A student is advanced to a higher classification upon successful university completion of sufficient credit hours as listed below:

0-29 credit hours	Freshman
30-59 credit hours	Sophomore
60-89 credit hours	Junior
90+ credit hours	Senior

Examinations

University Handbook, F70-74

Semester final examinations are scheduled by the Committee on Academic Policy and Procedures. Once the final examination time for a course is published in the Course Schedule it may be changed only with the concurrence of the Provost and Executive Vice President. Faculty members may assign take-home examinations, projects, papers, or other media in lieu of a written final examination. In such instances, the deadline for the submittal of the alternative assessment may not be earlier than the end of the scheduled final examination period for the course. Course schedules can be found on the university's academics website.

Except for honors, problems, seminars, reports, research, laboratory practical, language, 8-week evening college, studio, and fine arts performance classes, the last examination (either unit or comprehensive) must be given during the final examination period. No examination (unit or final) may be scheduled seven calendar days prior to the first scheduled day of semester examinations. (FSM 5/13/03)

Faculty members may not give the final examination at a time other than that published in the class schedule. The final examination may be given to an individual student under special circumstances at another time during final examinations. In particular, students who have more than two examinations
scheduled in a 24-clock hour period (a 24-hour period starting at any time) and students who have conflicting exam times may petition the instructor(s) of the highest numbered non-group exam course(s) and schedule an alternate time for taking the final examination(s) at some other time during final
examinations. If a student is unable to arrange the necessary rescheduling through the instructors involved, then the

dean will resolve the overload problem, if all the scheduled examinations are within the same college. If the examinations in question are within the jurisdiction of different colleges,
decisions regarding rescheduling shall be made by the Provost and Executive Vice President. (FS 2/12/08, revised)
University-sponsored events, on- and off-campus (such as extracurricular events, social activities, athletic events, and field trips) shall not be scheduled between 24 hours before the first scheduled final examination and the end of the last scheduled final examination. In addition, off-campus events shall
not be scheduled to prohibit a student from being on campus between 24 hours before the first scheduled final examination and the end of the last scheduled final examination.

Exceptions to the scheduling restrictions for university events can be made under the following conditions:

- Approval for events must be obtained from the Provost and Executive Vice President and President of the Faculty Senate.
- For events scheduled well in advance, approval must be obtained at least 18 weeks in advance.
- Consideration may be given to approval of events whose scheduling is not known as long as 18 weeks in advance.
- Students who plan to participate in approved events that conflict with final examinations may obtain from the Office of the Provost and Executive Vice
- Present a statement certifying their participation in the event. Faculty may choose to make special arrangements for final examinations for students who are involved in such approved events.

Grades

Grades

Grading System

Per the *University Handbook, F80-82* - grades will be reported in the following manner:

Grade	Description	Grade Point
A	Excellent work	4.000
B	Good work	3.000
C	Fair work	2.000
D	Poor Work	1.000
F	Failure	0.000
XF	Honor Code Violation	0.000
CR	Credit in courses for which no letter grade is given (non-graded courses)	N/A
EP	Exam Pass of standardized national exams	N/A

I	Incomplete	N/A
IH	Incomplete Hold	N/A
NC	No credit in courses for which no letter grade is given (non-graded courses)	N/A
NH	Non-reported Hold	N/A
NR	No Grade Reported	N/A
P	Grades of B, C, or D in courses taken A/Pass/F courses	N/A
W	Withdrawn	N/A

Grade points are assigned to determine graduation requirements, academic warning and dismissal levels, and scholastic honors.

Beginning in Spring 2012, all grades of 'F' (Fail) and/or 'NC' (No Credit) will require a "Yes/No" statement as to the student's participation in Academically related activities. This statement is required due to the federal mandate regarding the issuance of federal financial aid.

Grade changes are submitted directly to the student information system (KSIS). Grade Change Rosters will remain open for five years from the original posting date to submit changes. On-line changes to certain grades such as 'W' and 'XF' will not be allowed, nor to grades related to a completed
program of a graduated student. Any changes not accommodated by KSIS must be handled by submitting a Grade Change Memorandum form to the Dean of the College.

Courses in which a 'CR' or 'P' grade is received may be used in fulfilling graduation requirements. Only the grades 'A', 'B', 'C', 'D', and 'F' are used in calculating resident grade averages.

Grade Point Average (GPA) Types

Definitions of GPA Types and Calculating the Grade Point Average - refer to Grade Point Average (GPA) Types for additional information.

Incomplete Grade Policy

{*University Handbook, F83*}

The instructor will make an appropriate report on any student who does not complete a course in accordance with these definitions:

- If a drop in a full-semester course occurs in the first 36 calendar days, no grade is reported. The deadline for other courses will be pro-rated based on the course length.
- If a student drops a full-semester course after the first 36 calendar days, but before the start of the eleventh week, a withdrawal (W) is reported. The deadline for other courses will be pro-rated based on course length. See the Office of the Registrar website for details.
- After the tenth week of classes, a course may not be dropped.
- The grade of incomplete is a temporary grade given at the discretion of the faculty upon request of the student. An incomplete grade is appropriate when verifiable circumstances beyond the student's control prevent completion of course requirements by the grade submission deadline, and the student was engaged

and participating in the class prior to the circumstances that prevented completion of course requirements. The grade of incomplete is not to be used to avoid assigning a poor grade that results from unsatisfactory academic work.

In most instances, the requirements for completion of a course are detailed in the original course syllabus. It is in the student's best interest to confirm in writing with the faculty member the remaining requirements to be completed in order to replace the grade of incomplete. If the faculty member
requires anything other than the syllabus requirements or chooses to have a time frame for completion other than the end of the next regular term, the faculty member must provide written notification to the student. A sample notification form is available on the Office of the Registrar's website. Typically, requiring student participation in the entire course in a subsequent semester without enrolling is not an appropriate means to satisfy requirements for the incomplete.

Incompletes are expected to be finished by the conclusion of the next regular academic term (fall or spring), or the student's graduation term – whichever is earlier. Any incomplete remaining after the next regular term is reassigned to an 'F' (regardless of student's enrollment status) and will be computed in the student's GPA, weighted at 0.000-grade points per credit. In extreme cases, a student may be granted an extension of an incomplete beyond the next regular term. To request such an extension, the student must complete with appropriate signatures the Incomplete Extension Request Form.

Undergraduate research courses, internship courses, theses, dissertations, directed research courses, and other courses with the 'IH' grading option are exempt from the one regular term limit for completion.

A student with incompletes will only be cleared for graduation if receiving 'F's in every incomplete class earned in Fall 2018 or later will satisfy the requirements for graduation. Upon approval for graduation, all grades of incomplete earned Fall 2018 or later remaining on the record will be changed to grades of 'F'.

Auditing

Auditing is participating in a class regularly without submitting classwork and without receiving credit. Permission to audit is granted by the instructor, with the approval of the dean of the college in which the class is offered. Laboratory and activity courses may not be audited. Audits are not recorded on the permanent record. Students should not enroll in courses they plan to audit. {*University Handbook, Section F66.1*}

Any Kansas resident 60 years of age or older upon the presentation of sufficient proof of age shall be permitted to audit courses at state universities on a space-available basis with no requirement for payment of tuition and fees required of every student as a condition of enrollment. A person meeting these requirements shall be considered a non-degree seeking student for purposes of K.A.R. Articles 88-29, 29a, and 29b. Special academic fees shall be paid by the student. All determinations as to residency, the age of the applicant, and the space available for the auditing of courses by such persons shall be made by the state university involved. {*University Handbook, Section F66.2*} - For more information, see the Kansas Board of Regents Policy Manual.

Non-Permissible Changes to the Academic Record after Degree Posting

Grade changes may not be made after a degree has been posted, for courses taken prior to that degree posting. In addition, backdated withdrawals will not be processed after a degree has been posted, for any term prior to that degree posting.

'A'/Pass/Fail Policy

Per the *University Handbook, F91-93*, Undergraduate students, except first-term freshmen and students on academic warning, may enroll in certain courses for which they have the normal prerequisites under the 'A'/Pass/Fail grading option. Under this option, students earning a grade of 'A' in a course will have an 'A' recorded on the transcript for that course; a grade of 'B', 'C', or 'D' will be recorded as Pass; a Grade of 'F' will be recorded as 'F'.

Students may request the 'A'/Pass/Fail grading option for eligible courses at the time of enrollment through the third and fourth weeks of each regular semester or during the second week of the summer semester. Deadlines for courses running on other calendars (e.g. intersession) will be prorated. Students requesting the use of the 'A'/Pass/Fail option must obtain the signature of their advisors. The decision by a student to use the 'A'/Pass/Fail option is treated with strict confidentiality.

It is the responsibility of a student requesting enrollment under the 'A'/Pass/Fail grading option to be sure that such enrollment is valid in the declared degree program. A course originally completed under the 'A'/Pass/Fail grading option may not be converted at any time to a graded basis.

Students should be aware that some institutions, scholarship committees, and honorary societies do not find work taken on a non-graded basis (Pass) acceptable. Furthermore, many employers do not view non-graded (Pass) coursework favorably. All students should be cautious in using the 'A'/Pass/Fail grading option.

Each department or division may specify which courses its majors may take under the 'A'/Pass/Fail grading option consistent with the university requirements listed below.

1. Students may enroll under the 'A'/Pass/Fail option for any free elective course offered under this option. Courses that are specified by name or number and courses that meet general distribution requirements are not considered free electives. Students should not choose this option for any course related to their curriculum.
2. Students may enroll under the 'A'/Pass/Fail option for any general distribution requirement offered under this option, provided that the course is in the upper-division level (300 and above). General distribution requirements consist of those courses which are listed by areas, for example, three courses in the humanities.
3. Students may not enroll under the 'A'/Pass/Fail option in any course that is required by name or number as part of their degree programs. It is the responsibility of students requesting enrollment under the 'A'/Pass/Fail option to be sure that such enrollment is valid in their degree program.
4. A course originally completed under the 'A'/Pass/Fail option may only be converted to a graded basis with the consent of the instructor and academic dean.
5. Undergraduate students may submit Pass hours for graduation requirements up to and not exceeding one-sixth of the total number of hours required for a bachelor's degree.
6. Students may request the 'A'/Pass/Fail option for eligible courses at the time of enrollment through the third and fourth weeks of each regular semester or during the second week of the summer semester. Deadlines for courses running on other calendars (e.g. intersession) will be pro-rated.
7. Students requesting the use of the 'A'/Pass/Fail option must obtain their advisor's signature. The decision by a student to use the 'A'/Pass/Fail option is treated with strict confidentiality.

A student may enroll under the 'A'/Pass/Fail option for any free elective course offered under this option, that is, in any course that is in no way specified even in general terms in their curriculum, secondary major, or minor. Courses that are specified by name or number and courses that meet general distribution requirements and courses to be applied in a secondary major or minor are not considered free electives.

Students may submit Pass units for graduation requirements up to and not exceeding one-sixth of the total number of units required for a bachelor's degree (e.g. one-sixth would be no more than 20 credit hours of a 120 credit hour bachelor's degree program). That is, five-sixths of all units submitted for the degree must be units submitted on a graded or credit basis.

Undergraduate Retake Policy

Students may retake courses in order to improve the grade. If a course is retaken, the original grade is noted as retaken and removed from the cumulative grade point average. Retakes can be accomplished only by re-enrolling in and completing a Kansas State University course.

Courses originally taken on a letter grade basis may be retaken on an 'A'/Pass/Fail basis if appropriate, or if originally taken on an 'A'/Pass/Fail basis may be retaken on a letter-grade basis. The retake grade will always be used in the

cumulative grade point average computation regardless of whether it is higher or lower than the original grade. The original course remains on the academic record.

Although there is no limit to the number of times a course may be retaken, a student may retake a course with subsequent removal of the prior grade from the calculation of the grade point only once for each course, and only for the first five retaken courses during the student's academic career at K-State.

Any grades obtained from retaking courses beyond these limitations will be used in calculating the cumulative grade point average. A retaken course will count only once toward meeting degree requirements.

Any course retaken after completion of a bachelor's degree will not affect the credits or the GPA applied to that degree. {*University Handbook, F65.1*}

Courses that were retaken before Fall 1986 are not able to be used in determining whether five courses have been retaken.

Academic Fresh Start and Academic Forgiveness

The **Academic Fresh Start** and **Academic Forgiveness** Policies enable an undergraduate student to neutralize, in part, the grade impact of prior academic performance. **Academic Fresh Start** and **Academic Forgiveness** provide for the computation of an alternative GPA and for the use of that GPA in most academic situations. A student may apply only once, and to only one or the other, and the process cannot be reversed. A student may not apply for either policy until he or she has been reinstated into his or her college. To read the policy in its entirety refer to the *University Handbook, F104 - Academic Fresh Start, and Academic Forgiveness GPA Policies*.

Credit and Grades

Total units, including Pre-Academic Fresh Start, transfer work accepted, K-State resident graded units attempted and miscellaneous units completed establish the level for academic warning and dismissal calculation. However, transfer units and grades are not computed in K-State grade point averages.

The following definitions are used when determining a student's scholastic deficiency:

1. Credit hours used to determine Total Hours Accumulated will include transfer hours accepted, all K-State graded hours, and miscellaneous hours completed.
2. Grades used in calculating term and cumulative grade point averages will include only K-State graded hours. Grades for courses accepted in transfer from another institution will not be used in the grade point average calculation.

Release of Grades

A student's grades may be accessed only by the student through KSIS or by ordering an academic transcript. {*University Handbook, F43*}

Report of Grades

Academic progress reports for new freshmen are available in KSIS to students and deans' offices approximately six weeks into the spring and fall semesters.

The instructor reports final term grades, based on examinations and course work, to the Office of the Registrar via the KSIS grade roster.

In case of absence from the final examination, the instructor reports a mark of 'I' for incomplete or computes the grade on the basis of zero for the final examination. If an Incomplete is reported, a reasonable time, usually not over one month, is allowed in which to take the examination.

Grade Appeals/Grievances

Grievances involving a change of grade (but not academic dishonesty). {*University Handbook, Appendix V: 1.3*}

1. All efforts will be made by the student and instructor involved in any grievance to settle all disputes that may arise. Grade appeals must be initiated within six months following the issue date of the grade in question.
2. If a grade-change grievance is not resolved by the student and instructor, the student may appeal in writing to the department head concerned, who will act as a mediator in the dispute. This appeal should be made within two weeks of the date of the decision of the instructor. At this time, the student may petition the dean of his college for an ombudsperson. The duties of the ombudsperson are to arrange meetings of all concerned parties and report actions taken at each level to the appropriate persons or groups. The role of the ombudsperson is to expedite the process and to ensure a fair hearing.
3. If the grievance has not been settled to the student's satisfaction at the department level, a written appeal may be made to the dean of the college in which the course is taken. This appeal should be made within two weeks of the date of the decision of the department head.
4. If the student does not feel that an adequate solution has been reached in the grade appeal dispute, he or she may appeal in writing to the Undergraduate Grievance Board which will arbitrate the dispute. This appeal should be made within two weeks of the date of the decision of the dean. Appeals received during the summer will be heard the following fall term. Appeals should be addressed to the Undergraduate Grievance Board, c/o Chair (look for the name of the Chair for Committee 3030 at http://www.ksu.edu/provost/committeehb/).
5. The two-week time limits given in the sections above are intended to move the grievance process along at a reasonable rate. The limits may be modified for reasons such as illness, scheduled academic holidays, or mutual consent of both parties.

Grade Point Average (GPA) Types

All GPA types listed below are reflected in the student's academic record. *K-State GPA's are rounded to the 3rd decimal place*.

Term GPA:

The term GPA is the sum of all quality points earned for KSU courses divided by the number of all KSU hours attempted in a specific term/semester (except those hours with grades of CR, I, IH, P, NC, NR, NH or W, and KSU hours repeated for which the retake policy or academic fresh start and academic forgiveness policy was subsequently invoked). The resulting quotient is the term GPA, which is rounded to the third decimal place.

Overall Cumulative GPA:

The overall cumulative GPA is the sum of all quality points earned at KSU divided by the number of all KSU hours attempted (except those hours with grades of CR, I, IH, P, NC, NR, NH, or W, and KSU hours repeated for which the retake policy or academic fresh start and academic forgiveness policy was subsequently invoked. The resulting quotient is the overall cumulative GPA.

Note: Grades and GPA from transfer coursework are **NOT** included in the calculation of the K-State GPA and are not reflected in the term or overall cumulative GPA. Transfer GPA is only considered at the time of admission to the

university. All GPA types listed above are reflected in the student's academic record. K-State GPAs are rounded to the third decimal place.

Grade Point Averaging and Deficits

The term *average* refers to the grade point average (GPA) for work completed in the current or most recent academic program attended at Kansas State University. Grades received at other institutions are NOT averaged with grades received at K-State for the purpose of meeting the **university/institutional cumulative GPA** requirements. Other agencies and honorary societies will compute averages in accordance with their own standards and policies.

Averages are determined by computing the ratio of grade points to semester credits attempted. For the grade point average computation formula, please refer to the example below.

Calculating the Grade Point Average

Grade Point Averages (GPA) are calculated by dividing the total number of Grade Points by the number of Credit Hours enrolled. Each grade has a specific number of points assigned to it:

A: 4.000
B: 3.000
C: 2.000
D: 1.000
F: 0.000

To determine the grade points earned per class, first multiply the points by the number of credit hours.

For example: if you earned a "C" in ENGL 251 (a 3 credit hour course), then you multiply 2 points times 3 credit hours to get 6-grade points.

To determine the total grade points earned per semester, determine the points for each class and add them together for the **total grade points** that semester.

Example: If you enrolled in 13 credit hours (three 3-hour courses and one 4-hour course), and earned a "B", a "C", an "A" in the 3-hour courses, and a "D" in the 4-hour course this is how you would calculate your total grade points:

*A = 4 points * 3 credit hours = 12 grade points*

*B = 3 points * 3 credit hours = 9 grade points*

*C = 2 points * 3 credit hours = 6 grade points*

D = 1 point * 4 credit hours = 4 grade points

Total: 13 credit hours = 31 grade points

To determine your grade point average, divide the total grade points by the total credit hours under consideration. From the example above: **Divide 31-grade points by the 13 credit hours to equal a 2.380 GPA.**

Special Notes:

Grades of CR (Credit Awarded), I (Incomplete), IH (Incomplete Hold), P (Pass), NC (No Credit Awarded), NH (Non-Reported Hold), NR (No Grade Reported), or W (Withdrawn) do not impact your GPA. Do not include the credit hours for these courses in your credit hour total for calculating GPA.

A grade of F and XF is equal to 0.000 points.

* Unresolved Incomplete grades automatically will be changed to 'F' per the Incomplete Grade Policy via processes run within the Office of the Registrar.

Graduation

{*University Handbook, F121*}

Intent to Graduate:

Students must file their intent to graduate via the application for graduation clearance via KSIS. The deadline for students to declare their intent to graduate must be submitted no later than the fourth (4th) during the first four weeks week of the semester (first two weeks for the summer semester) in which the degree is to be completed. Students are prompted to verify their curriculum, and graduation term, and to give their desired name (within reason) for the commencement program as well as their diploma.

Graduation Application for Completion of a Major, Minor, or Certificate:

Graduation applications reflect the most updated version of the DARS, which is used for final graduation certification. Graduation applications are reviewed electronically within KSIS utilizing the student's DARS in consultation with their advisor(s) at each department where the student is enrolled in a major, minor, or certificate program of study. Students seeking to graduate should review their DARS in KSIS to ensure all requirements are in progress or complete. A review of Graduation applications showing an approval status must be completed by the application deadline of the student's graduation term.

Off-Campus Completion of Degree Requirements:

It is the student's responsibility to be certain that transcripts from all transfer institutions are on file and have been articulated/reflected in the DARS in the Registrar's Office before the end of the semester the degree requirements will be completed and no later than the deadline date designated on the Academic Calendar.

Commencement (Graduation Ceremonies)

Students may graduate in the Fall, Spring, or Summer semesters. K-State celebrates Commencement Ceremonies twice a year, at the end of each Fall and Spring semester. Candidates for spring graduation should attend the spring commencement exercises in May. Fall graduates are asked to participate in the fall commencement exercises in December or the following Spring. Approved summer degree candidates may participate in the fall or spring exercises before or after graduation.

Graduation (degree awarding/conferral) occurs when students complete all degree requirements, it is confirmed and certified, and then officially posted to a student's academic record (official transcript).

Commencement is a formal ceremony, celebrating the graduation of K-State students twice a year. When students participate in Commencement, they are considered candidates for graduation but attendance at the ceremony does not mean that a student has officially graduated from K-State.

Graduation Process

Degree Requirements

All degree requirements must be complete by the last day of the semester for which the graduation application is submitted. Students whose Graduation Application is denied for any reason or do not meet the requirements for graduation must submit a new application for the semester in which the requirements are met.

Good Standing Status

A student must be in good standing to receive a K-State degree. Accordingly, any student who is subject to academic warning/probation or dismissal for scholastic or disciplinary reasons will not graduate until the conditions of suspension or probation have been satisfied.

Timeline

The Office of the Registrar will begin reviewing potential graduates approximately one week after grades are due. Awarding of degrees should be completed approximately 4-6 weeks (excluding weekends and holidays) following the review. Once your degree has been posted (conferred), your unofficial and official transcript will reflect this information. Be sure to review the step-by-step instructions for Viewing your Academic History in KSIS.

Please see the Scholastic Honors portion of the Undergraduate Academic Catalog for specific information used to determine scholastic honors. Be aware, that honors indicated on the commencement program are tentative since current semester courses are not included in the cumulative GPA.

Diplomas

Upon completion of a degree, students will receive one complimentary diploma. Diplomas will be mailed to the DIPLOMA MAILING ADDRESS indicated on the student's graduation application approximately six (6) to eight (8) weeks (excluding weekends and holidays) after graduation.

All financial/academic holds must be cleared before a diploma can be mailed. Check your KSIS Student Center for hold and departmental contact information. (How to View Holds)

Students have 90 days after graduation to clear holds without delaying the mailing of a diploma. If holds are cleared after such time, students will need to notify the Office of the Registrar to arrange the release and mailing of a diploma. Diplomas will be retained for two years after the graduation date and will then be destroyed. After that time, any request for a diploma by the student will incur all charges associated with ordering a duplicate or replacement diploma. Refer to the Registrar's Website for additional information.

Honorary Degrees

Regents' institutions may award honorary degrees upon approval by the Kansas Board of Regents (Board of Regents Policy and Procedures Manual Chapter III, Section A.7). {*University Handbook, F140}*

Posthumous Degrees

A student who dies while actively pursuing a degree at Kansas State University may be considered for a posthumous degree. The dean may nominate the student for consideration by the Academic Affairs Committee and the Faculty Senate. If approved, it will be noted on the transcript and the diploma that it is a posthumous degree. {*University Handbook, F150*

Registration

Assignment of Classes

In addition to consulting with their advisor, students should be familiar with the current undergraduate and graduate catalogs regarding assignments and curricula. The catalogs are the official source of information and are maintained on the university's academics website. {*University Handbook, F8*}

Registration

University Handbook, F10-F12

Students may not attend classes without being properly registered for them, they cannot receive credit for courses in which they are not registered, and students may not register or add individual courses retroactively without approval and within appropriate deadlines. For more information visit the Office of the Registrar website.

Registration and assignment to classes take place on specific dates as shown on the academic calendar. No student may add a full-semester course after the seventh calendar day of the semester without the permission of the instructor. Students should enroll during the regularly scheduled registration periods in order to avoid late fees. More registration details, including dates for classes that run less than a full semester, can be found on the Office of the Registrar's website.

An undergraduate student may not enroll for more than 21 credit hours in a semester unless the student is granted permission to do so by the student's academic dean or the dean's representative. See the Committee on Academic Policy and Procedures (CAPP), or the Office of the Registrar, for more information on the limitation for intersession hours.

Dropping and Adding Courses; Changing Colleges; Withdrawing from the University

University Handbook, F64.1 to F64.7

During the regular session, if a student wants to drop or add a course or if an instructor recommends a change, the student should confer with an advisor.

No student may add a course with 70 or more calendar days (10 or more weeks in length) after the 7th calendar day of classes without the consent of the instructor.

An instructor may drop a student from any or all components (e.g., lecture, recitation, lab, etc.) of a course if the student is absent at the beginning of the first class period of any component of the course. Students who cannot be in attendance should arrange prior permission from the instructor in order to avoid being dropped. For purposes of this procedure, enrollment in and payment of fees for a course do not constitute sufficient notification of intent to take a course.

The last day for dropping courses with 70 or more calendar days (10 or more weeks in length), without a 'W' being recorded is at the 36th calendar day of the term. After the 68th calendar day of the term, courses may not be dropped. For courses less than 70 days (10 or more weeks in length), the drop
dates are prorated. For more information see the Academic Policy.

A student may transfer from one college to another with permission from the dean or the dean's representative of the college into which the student proposes to transfer. For more information see the Academic Policy.

Students who decide to withdraw from Kansas State University must begin the official withdrawal process at the dean's office of their college. Note that dropping all classes requires withdrawing. For more information see Dropping All Classes or Withdrawing from K-State.

- If a student withdraws during the first 36 calendar days of a 70 or more calendar day course (approximately 10 or more weeks in length), no mark will be recorded on the student's transcript.
- Thereafter, a mark of 'W' is recorded; a course less than 70 calendar days (approximately 10 or more weeks in length), is prorated.
- The deadline for withdrawing is the end of the 68th calendar day of the term; for a course less than 70 calendar days (approximately 10 or more weeks in length), the withdrawal date is prorated.

Retake Policy

University Handbook, F65.1

Students may retake courses in order to improve the grade. If a course is retaken, the original grade is noted as retaken and removed from the cumulative grade point average. Retakes can be accomplished only by re-enrolling in and completing a Kansas State University course.

Courses originally taken on a letter grade basis may be retaken on an 'A'/Pass/Fail grading basis if appropriate, or if originally taken on an 'A'/Pass/Fail grading basis may be retaken on a letter-grade basis.

The retake grade will always be used in the cumulative grade point average computation regardless of whether it is higher or lower than the original grade.

The original course remains on the academic record.

Although there is no limit to the number of times a course may be retaken, a student may retake a course with subsequent removal of the prior grade from the calculation of the grade point only once for each course, and only for the first five retaken courses during the student's academic career at K-State.

Any grades obtained from retaking courses beyond these limitations will be used in calculating the cumulative grade point average. A retaken course will count only once toward meeting degree requirements.

Any course retaken after completion of a bachelor's degree will not affect the credits or the GPA applied to that degree.

Scholastic Honors

University Handbook, F110

Graduation Honors

Bachelor's degree candidates who will have completed a minimum of 60 undergraduate hours at Kansas State University with at least 42 credit hours in graded undergraduate courses at Kansas State University are considered for graduation with honors as follows:

- Students with a 3.950 or above K-State cumulative grade point average are designated as Summa Cum Laude.
- Students with a 3.850-3.949 K-State cumulative grade point average are designated as Magna Cum Laude.
- Students with a 3.750-3.849 K-State cumulative grade point average are designated as Cum Laude.

Graduation honors for undergraduate students are based on undergraduate coursework. Any concurrent graduate or professional credit earned is excluded from the calculation of bachelor's degree graduation honors.

Students seeking a Doctor of Veterinary Medicine degree are eligible to receive graduation honors based on courses completed in the professional program.

For the purpose of the commencement ceremony, unofficial graduation honors are recognized for Bachelor's degree candidates who possess the required K-State cumulative grade point average prior to the start of the semester in which they plan to participate in the commencement ceremony, and have completed or are currently enrolled in enough credit hours to satisfy the credit hour requirements.

Semester Honors

Students with at least 12 graded hours whose semester (term) grade point average for a given semester (term) is 3.750 or above will be awarded semester honors. *This designation is determined by a snapshot of grades taken on grade day for fall and spring semesters only, and any updates resulting from grade changes will not be reflected in the honors calculation.*

Graduate School and Veterinary Medicine students are ineligible for semester honors.

Student Records

University Handbook, F41-42 & F44

FERPA

Kansas State University is in compliance with the Family Educational Rights and Privacy Act (FERPA) of 1974, as amended; this law established specific guidelines concerning the release of information and the student's privileges to inspect and review their own educational records. The Kansas State University student records policy can be found on the Registrar's website. For additional information about student records see Student Confidentiality.

Directory Information

Certain information concerning students is considered to be open to the public upon inquiry. This public information is called directory information. See the Student Records Policy.

Full Confidentiality Hold

In rare cases, a student may need additional privacy protection that is not covered in suppressing their directory information (see Directory Information section above). If a student elects to place a Full Confidentiality Hold on their

record, it means that the student's entire educational record will be suppressed and that they will not be able to discuss any part of their educational record with K-State staff remotely (telephone, FAX, or regular mail) but instead will have elected to have all conversations about their educational record in person or via their K-State email only.

It is important to remember that by choosing this option or withholding Directory Information above, other areas related to the student record may be affected. Some of these areas include but are not limited to, all future requests for Directory Information from non-institutional persons or organizations will be denied; degree or enrollment verifications for future employment through the National Student Clearinghouse will not be available; etc.

Restriction of Records

In the case of a student who is delinquent in an account to the university, including unpaid traffic or parking violations, or about whom official disciplinary action has been taken, the appropriate university official may request that the student's record not be released. The effect of this action is that transcripts are not released, and registration forms are withheld. In order for the action to be rescinded, the hold must be cleared via KSIS, indicating that the student has met the obligation. For more information about when records may be withheld, see the Student Records Policy.

Death of a Student

In accordance with the Family Educational Rights and Privacy Act (FERPA), Kansas State University's policy regarding the disposition of records held pertaining to a deceased student states that the privacy interests of an individual expire with that individual's death.

Undergraduate Degree Requirements

University Handbook, F121

Requirements for a bachelor's degree from K-State are listed below. Colleges and departments may have requirements that exceed these minimums. Students should refer to the Degree Progress Audit (DARS) to review degree requirements. To graduate, a student must complete an approved curriculum and the degree audit must indicate all requirements have been completed. Courses applied to degree requirements must be completed no later than the term in which a degree is awarded. Under special conditions, substitutions to the curriculum are allowed if approved by the department head and dean. Please consult the individual departments for details. *Professional curricula may impose additional degree requirements.* {FS 02/14/23 - Effective Fall 2023}

Minimum Credit Requirement:

A bachelor's degree requires a minimum of one hundred and twenty (120) semester hours; in an approved program; however, individual programs in some colleges and departments may exceed the minimum..

Minimum Grade Requirement:

There are two-grade point averages a student must meet to be awarded a degree

- at least 2.000 on Kansas State University graded courses that are applied toward the degree and,
- at least 2.000 cumulative GPA for all graded courses taken at Kansas State University

At least eighty-three percent (83%) of the credit hours taken at Kansas State University and applied toward a degree must be graded hours (e.g., one hundred (100) credit hours of one hundred and twenty (120) credit hour bachelor's

degree program). Required courses of an internship or practicum nature or credit by examination, offered on a Credit/No Credit basis only, are to be considered as graded hours in implementing this requirement.

Upper-Division Credit Requirement:

A minimum of forty-five (45) credit hours must be at a course level of 300 or above to meet the upper division course requirements established by KBOR {KBOR Policy Manual, Chapter III, Section A(9)(b)}.

In-Residence Requirement:

Each student must complete at least twenty-five percent (25%) or a minimum of thirty (30) credits in-residence at Kansas State University to be considered for a degree {per HLC requirements}.

Resident work includes all K-State scheduled course instruction (e.g., course component types), given by the university faculty.

Senior Year Requirement:

Of the last thirty (30) semester credits earned (course level 300 or higher), at least fifteen (15) must be completed at K-State. Credits earned in an authorized education abroad program and designated or approved domestic exchange programs or agreements may apply to this requirement. Courses in the student's major field shall be taken at Kansas State University unless an exception is granted by the major department on the petition of the student. That department shall have jurisdiction over the acceptance of major courses by transfer for fulfillment of the major requirement.

Exceptions to the senior year requirement may be made by the Dean of the college and the department head in the student's major program with submission to the Office of the Registrar and Provost Designee for approval. Exceptions may be requested if the student has completed a total of three years of work acceptable to Kansas State University.

University Requirements:

Up to half of the credits required for a normal four-year degree may be completed at an accredited two-year college (e.g., sixty (60) transfer credits for a one hundred and twenty (120)-credit hour bachelor's degree program). Colleges/Departments may have transfer agreements in place that would allow for an exception to exceed the sixty (60) semester credit hours in transfer towards a baccalaureate degree {KBOR Policy Manual, Chapter III, Section A(9)(ii)(2)(d)}.

No more than twenty-five percent (25%) of credit hours applied to degree requirements may be from Credit for Prior Learning (CPL) sources. CPL may include standardized national exams, recognition of military or workforce training, or portfolio assessment (e.g., thirty (30) credits of CPL for a one hundred and twenty (120)-credit hour bachelor's degree program) {per HLC requirements}.

Standing Requirement

A student must meet all university academic standing requirements as established in section F100-103 to receive a K-State degree. Accordingly, any student who is subject to dismissal or suspension for scholastic or disciplinary reasons will not graduate until the conditions of the dismissal or suspension have been satisfied.

The individual whose education has been interrupted may have to meet new degree requirements if a change has occurred in the approved curriculum.

Off-Campus Completion of Degree Requirements:

It is the student's responsibility to be certain that transcripts from all transfer institutions are on file and have been articulated/reflected in the Degree Progress Audit (DARS) within the semester the degree requirements will be completed and no later than the deadline date designated on the Academic Calendar.

Modification to Graduating Requirements for Students with Disabilities

Modification of Graduating Requirements for Students with Disabilities. A student may request a program modification if he or she can document a disability that directly impairs his/her ability to meet the normal requirements of the program. Students must contact the Student Access Center or the K-State Salina Student Accommodation Services unit for assistance. {FS 02/14/23} {*University Handbook, F122*}

Additional Degree Requirements

Dual Degrees

A dual degree is two unique degree types that a student has elected to pursue at one time (e.g., B.S. in Mathematics and B.S.B.A/ in Business Administration). The requirements for both degrees must be satisfied. {ARN Manual}

Minors, Secondary Majors, and Certificates

Major

A program of courses that meets the requirements for a degree in a field of study. Major (discipline): "A subject of academic study chosen as a field of specialization… characterized by the majority of courses required at the junior/senior level, generally from a specific academic department." The subject or subject areas upon which a student chooses to place principal academic emphasis. {ARN Manual}

Double Major

A double major is two majors in the same degree type being pursued by a student at one time (e.g., B.S. in Mathematics and B.S. in Geography). The requirements for both degrees must be satisfied. {ARN Manual}

Secondary Majors

An interdisciplinary major that must be completed along with a primary major course of study. A secondary field of specialization is an interdisciplinary program of study that is completed in addition to a major. These programs are administered by a director and a supervisory committee of faculty representing the various academic departments offering courses for the secondary major. Secondary majors cannot be earned outside of the completion of the primary major. {ARN Manual}

Undergraduate Academic Minors

A systematic program of study in an area of emphasis outside a student's major. A program of study with a minor emphasis in a field of specialization outside a student's major field of study. Minors are offered by academic departments and administered by a director, who is a faculty member of the academic department that offers the minor. For additional information, please refer to the University Handbook, Section F160.

Effective Spring 2026:

F160 Undergraduate minors are a sequence of related courses that, upon completion, provide a student with limited competency in a designated field of study. Minor programs of study are optional and are offered only at the undergraduate level.

General Requirements:

- A minor program will require completion of at least fifteen (15) designated credit hours of required coursework outside of the major.
- Courses forming a minor may be used to satisfy the general requirements of a major curriculum, including free electives.
- No more than six hours of transfer courses may be used for the minor.
- A minimum cumulative grade point average of 2.000 is required on courses applied to a minor.

Students who have declared an approved minor and completed all requirements for it will receive official recognition for that emphasis upon completion of the degree requirements in the major field of study and the minor field of study, the minor will be recorded on the students' academic record (official transcript) at the time of the degree posting.

A higher cumulative grade point average or minimum course grade of "C" or higher may be specified.

- Apart from "credit for prior learning," all courses applied to the minor must have letter grades.

Undergraduate Academic Credit Certificates

F170 A program of courses that emphasizes a focused specialty area of study as part of or beyond the requirements for the B.S., M.S., or Ph.D. degrees. It is designed to increase the knowledge and skills of individuals, such as to enhance their employability and opportunities for promotions and salary benefits. For additional information, please refer to the University Handbook, Section F170.

General Education: K-State Core

K-State Core is the foundation for an impactful life and career after time at K-State.

English (Written Communication Outcomes): 6 credit hours

Requirement #1 {010}

- ENGL 100 - Expository Writing I **Credits:** 3

Choose 1 from the following:

- ENGL 200 - Expository Writing II **Credits:** 3
- *ENGL 210 - Honors English* **Credits:** 3

Communication (Oral Communication Outcomes): 3 credit hours

Requirement #2 {020}

- COMM 106 - Public Speaking I **Credits:** 3
- COMM 109 - Public Speaking 1A, Honors **Credits:** 3
- * COMM 322 - Interpersonal Communication **Credits:** 3

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Math & Statistics (Quantitative Literacy Outcomes): 3 credit hours

Requirement #3 {030}

- MATH 100 - College Algebra **Credits:** 3
- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3

Note 1: Some programs require an advanced math course beyond the general education curriculum requirements. In these situations, students who qualify to enter the advanced math course should do so, thereby fulfilling general education and program requirements.

Note 2: Some students qualify to enter an *advanced math course.* Students should take the math course they are eligible for, thereby fulfilling general education requirements.

Note 3: If Math placement scores are not met, then the student will need to enroll in the appropriate co-requisite course.

Natural & Physical Sciences (Natural & Physical Sciences Outcomes): 4-5 credit hours

Requirement #4 {040}

At least one subject area which must include a lab

Core Discipline/Subjects Under this Area
Anatomy; Astronomy; Biochemistry; Biology; Botany; Chemistry; Earth Science; Ecology; Environmental Science; Geology; Meteorology; Microbiology; Physical Geography; Physical Sciences; Physics; Physiology; Zoology; other subjects that the offering institution determines fit within the natural and physical sciences area.

- AGRON 120 - Crop Science **Credits:** 3
- AGRON 121 - Crop Science Laboratory **Credits:** 1
- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4
- BIOCH 110 - Biochemistry and Society **Credits:** 3
- BIOCH 111 - Biochemistry and Society Laboratory **Credits:** 1
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- BIOL 101 - Concepts of Biology **Credits:** 4

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 255 - General Microbiology **Credits:** 4
- *BIOL 441 - Human Body I **Credits:** 4
- *BIOL 442 - Human Body II **Credits:** 4
- CHM 110 - General Chemistry **Credits:** 3
- CHM 111 - General Chemistry Laboratory **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
- GEOG 121 - Introductory Physical Geography: Earth Systems Science **Credits:** 3
- GEOG 122 **-** Introduction to Physical Geography: Earth Systems Science Laboratory **Credits:** 1
- GEOG 235 - Atmospheric Science **Credits:** 4
- GEOL 100 - Earth in Action **Credits:** 3
- GEOL 103 - Geology Laboratory **Credits:** 3
- GEOL 115 - Environmental Geology **Credits:** 3
- GEOL 125 - Natural Disasters **Credits:** 3
- GEOL 200 - Earth Through Time **Credits:** 3
- HORT 201 - Principles of Horticultural Science **Credits:** 4
- KIN 220 - Biobehavioral Bases of Physical Activity **Credits:** 4
- PHYS 101 - The Physical World **Credits:** 3
- PHYS 103 - The Physical World Laboratory **Credits:** 1
- PHYS 106 - Concepts of Physics **Credits:** 4
- PHYS 113 - General Physics I **Credits:** 4
- PHYS 114 - General Physics II **Credits:** 4
- PHYS 115 - Descriptive Physics **Credits:** 5
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 214 - Engineering Physics II **Credits:** 5
- PHYS 223 - Physics I, Mechanics, and Thermodynamics **Credits:** 5
- PHYS 224 - Physics II, Electromagnetism, and Sound **Credits:** 5

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Social & Behavioral Sciences (Social & Behavioral Sciences Outcomes): 6 credit hours

Requirement #5 {050}

At Least Two Courses from Two Subjects Under this Area

Core Discipline/Subjects Under this Area
Anthropology; Criminal Justice; Economics; Ethnic and/or Gender Studies; Geography; Political Science; Psychology; Social Work; Sociology; other subjects the offering institution determines fit within the social & behavioral sciences area.

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- AMETH 160 - Introduction to American Ethnic Studies **Credits:** 3
- ANTH 200 - Introduction to Cultural Anthropology **Credits:** 3

- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3
- ANTH 210 - Introduction to Cultural Anthropology, Honors **Credits:** 3
- ANTH 220 - Introduction to Linguistic Anthropology **Credits:** 3
- ANTH 260 - Introduction to Archeology **Credits:** 3
- CRIM 261 - Introduction to Criminology and Criminal Justice **Credits:** 3
- ECON 101 - Contemporary Economic Issues **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 111 - Principles of Macroeconomics - Honors **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3
- GEOG 100 - World Geography & Globalization **Credits:** 3
- GEOG 200 - Human Geography **Credits:** 3
- GEOG 201 - Human Geography (Honors) **Credits:** 3
- GWSS 105 - Introduction to Gender, Women, and Sexuality Studies **Credits:** 3
- GWSS 220 - Climate Justice Movements **Credits:** 3
- GWSS 230 - Intersectionality and Health Justice **Credits:** 3
- GWSS 275 - Gender, Race, and Sex in Science Fiction **Credits:** 3
- HDFS 110 - Introduction to Human Development **Credits:** 3
- HDFS 250 - Interpersonal and Family Relationships **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- LEAD 212 - Introduction to Leadership Concepts **Credits:** 2-3
- LEAD 225 - Fundamentals of Global Food Systems Leadership **Credits:** 3
- MANGT 220 - Principles of Management **Credits:** 3
- MANGT 230 - Business Law I **Credits:** 3
- PLAN 115 - Introduction to Regional and Community Planning **Credits:** 3
- PLAN 215 - World Cities **Credits:** 3
- POLSC 107 - Political Science Colloquium **Credits:** 2
- POLSC 110 - Introduction to Political Science **Credits:** 3
- POLSC 111 - Introduction to Political Science, Honors **Credits:** 4
- POLSC 115 - U.S. Politics **Credits:** 3
- POLSC 135 - Introduction to Comparative Politics **Credits:** 3
- POLSC 145 - World Politics **Credits:** 3
- POLSC 155 - Introduction to Political Thought **Credits:** 3
- POLSC 250 - Environmental Political Thought: The Future of Food, Air, Water, and Soil **Credits:** 3
- PSYCH 110 - General Psychology **Credits:** 3
- PSYCH 115 - General Psychology (Honors) **Credits:** 4
- PSYCH 202 - Drugs and Behavior **Credits:** 3
- PSYCH 280 - Psychology of Childhood and Adolescence **Credits:** 3
- PSYCH 290 - Innovative Studies in Psychology **Credits:** 1-6
- SOCIO 211 - Introduction to Sociology **Credits:** 3
- SOCIO 214 - Introduction to Sociology, Honors **Credits:** 4
- SOCIO 260 **-** Social Problems **Credits:** 3
- SOCWK 100 - Social Work: The Helping Profession **Credits:** 3
- SOCWK 200 - Basic Skills for Working with People **Credits:** 3

Arts & Humanities (Arts & Humanities Outcomes): 6 credit hours

Requirement #6 {060}

At Least Two Courses from Two Subjects Under this Area

Core Discipline/Subjects Under this Area
Art; Communications; Cultural Studies; Dance; English; General Humanities; History; Literature; Modern and Classical Languages; Music; Philosophy; Religion; Theatre; and other subjects the institution determines fit within the arts and humanities area.

- AGCOM 222 - Agricultural Business Communications **Credits:** 3
- AMETH 185 - Race, Film, and American Stories **Credits:** 3
- ARAB 101 - Arabic I **Credits:** 4
- ARAB 102 - Arabic II **Credits:** 4
- ARAB 201 - Arabic III **Credits:** 5
- ARCH 299 - Appreciation of Architecture **Credits:** 3
- ART 102 - Ceramics for Non-majors **Credits:** 3
- ART 103 - Jewelry Design and Processes for Non-majors **Credits:** 3
- ART 104 - Digital Photography for Non-majors **Credits:** 3
- ART 106 - Art Appreciation **Credits:** 3
- ART 108 - Introduction to Modern and Contemporary Art for Non-Majors **Credits:** 3
- ART 111 - Photography, Civil Rights, Art and the Environment **Credits:** 3
- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 190 - Drawing I **Credits:** 3
- ART 194 - A and D: Community and the Environment Experience **Credits:** 3

- THTRE 299 - Vocal Expression for Actors **Credits:** 3

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Free Electives (Institutionally Designated Area): 6 credit hours

Requirement #7 {070}

This area provides flexibility for each institution to define requirements to account for societal issues, local needs, and institutional priorities.

This includes ALL 100-200 Level Courses at K-State or in Transfer.
NOTE: *One course may be used to satisfy more than one requirement. However, students must complete 34-36 credit hours of general education courses.*

You may search the university course catalog individually for a Full List of K-State 100/200-level courses.

General Education: K-State Core Elementary Education PK-6

K-State Core is the foundation for an impactful life and career after time at K-State.

English (Written Communication Outcomes): 6 credit hours

Requirement #1 {010}

- ENGL 100 - Expository Writing I **Credits:** 3

Choose 1 from the following:

- ENGL 200 - Expository Writing II **Credits:** 3
- *ENGL 210 - Honors English* **Credits:** 3

Communication (Oral Communication Outcomes): 3 credit hours

Requirement #2 {020}

- COMM 106 - Public Speaking I **Credits:** 3
- COMM 109 - Public Speaking 1A, Honors **Credits:** 3
- * COMM 322 - Interpersonal Communication **Credits:** 3

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Math & Statistics (Quantitative Literacy Outcomes): 3 credit hours

Requirement #3 {030}

- MATH 160 **-** Introduction to Contemporary Mathematics **Credits:** 3

Natural & Physical Sciences (Natural & Physical Sciences Outcomes): 4-5 credit hours

Requirement #4 {040}

Choose one course with a laboratory from the following courses (100-200 level courses):

- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4
- BIOCH 110 - Biochemistry and Society **Credits:** 3
- BIOCH 111 - Biochemistry and Society Laboratory **Credits:** 1
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- BIOL 101 - Concepts of Biology **Credits:** 4
- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 255 - General Microbiology **Credits:** 4
- *BIOL 441 - Human Body I **Credits:** 4
- *BIOL 442 - Human Body II **Credits:** 4
- KIN 220 - Biobehavioral Bases of Physical Activity **Credits:** 4

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Social & Behavioral Sciences (Social & Behavioral Sciences Outcomes): 6 credit hours

Requirement #5 {050}

Choose two courses from two of the following areas (100-200 level courses):

Core Discipline/Subjects Under this Area
Anthropology; Economics; Geography; Political Science; Psychology; Sociology

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- AMETH 160 - Introduction to American Ethnic Studies **Credits:** 3
- ANTH 200 - Introduction to Cultural Anthropology **Credits:** 3
- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3

- ANTH 210 - Introduction to Cultural Anthropology, Honors **Credits:** 3
- ANTH 220 - Introduction to Linguistic Anthropology **Credits:** 3
- ANTH 260 - Introduction to Archeology **Credits:** 3
- ECON 101 - Contemporary Economic Issues **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 111 - Principles of Macroeconomics - Honors **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3
- GEOG 100 - World Geography & Globalization **Credits:** 3
- GEOG 200 - Human Geography **Credits:** 3
- GEOG 201 - Human Geography (Honors) **Credits:** 3
- HDFS 110 - Introduction to Human Development **Credits:** 3
- HDFS 250 - Interpersonal and Family Relationships **Credits:** 3
- POLSC 107 - Political Science Colloquium **Credits:** 2
- POLSC 110 - Introduction to Political Science **Credits:** 3
- POLSC 111 - Introduction to Political Science, Honors **Credits:** 4
- POLSC 115 - U.S. Politics **Credits:** 3
- POLSC 135 - Introduction to Comparative Politics **Credits:** 3
- POLSC 145 - World Politics **Credits:** 3
- POLSC 155 - Introduction to Political Thought **Credits:** 3
- POLSC 250 - Environmental Political Thought: The Future of Food, Air, Water, and Soil **Credits:** 3
- PSYCH 110 - General Psychology **Credits:** 3
- PSYCH 115 - General Psychology (Honors) **Credits:** 4
- PSYCH 202 - Drugs and Behavior **Credits:** 3
- PSYCH 280 - Psychology of Childhood and Adolescence **Credits:** 3
- PSYCH 290 - Innovative Studies in Psychology **Credits:** 1-6
- SOCIO 211 - Introduction to Sociology **Credits:** 3
- SOCIO 214 - Introduction to Sociology, Honors **Credits:** 4
- SOCIO 260 - Social Problems **Credits:** 3
- SOCWK 100 - Social Work: The Helping Profession **Credits:** 3

Arts & Humanities (Arts & Humanities Outcomes): 6 credit hours

Requirement #6 {060}

- HIST 151 - History of the United States to 1877 **Credits:** 3
  OR
- HIST 152 - History of the United States Since 1877 **Credits:** 3

Choose one course beyond HIST 151 or HIST 152 from the following areas (100-200 level courses)

Core Discipline/Subjects Under this Area
Art; Literature; Music; Theatre

- ART 102 - Ceramics for Non-majors **Credits:** 3
- ART 103 - Jewelry Design and Processes for Non-majors **Credits:** 3
- ART 104 - Digital Photography for Non-majors **Credits:** 3
- ART 106 - Art Appreciation **Credits:** 3
- ART 108 - Introduction to Modern and Contemporary Art for Non-Majors **Credits:** 3
- ART 111 - Photography, Civil Rights, Art and the Environment **Credits:** 3

- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 190 - Drawing I **Credits:** 3
- ART 194 - A and D: Community and the Environment Experience **Credits:** 3
- ART 195 - Survey of Western Art History I **Credits:** 3
- ART 196 - Survey of Western Art History II **Credits:** 3
- ART 197 - Survey of Non-Western Art History **Credits:** 3
- ART 200 - AandD: Visual Representation and Fabrication **Credits:** 3
- ART 202 - Art and Insects **Credits:** 3
- ART 290 - Visual Communication Design I: Typography and Design Principles **Credits:** 3
- ART 291 - Introduction to Drawing **Credits:** 3
- COT 150 - The Humanities Through the Arts **Credits:** 3
- COT 175 - Introduction to Cultural Studies **Credits:** 3
- EDEL 270 - Arts for Elementary Schools **Credits:** 3
- ENGL 185 - Race, Film, and American Stories **Credits:** 3
- ENGL 187 - Book Club **Credits:** 3
- ENGL 220 - Fiction into Film **Credits:** 3
- ENGL 224 - Television as Literature **Credits:** 3
- ENGL 227 - Video Games as Literature **Credits:** 3
- ENGL 230 - Classical Cultures **Credits:** 3
- ENGL 231 - Medieval and Renaissance **Credits:** 3
- ENGL 233 - Reformation to Enlightenment **Credits:** 3
- ENGL 234 - Modern **Credits:** 3
- ENGL 251 - Introduction to Literature **Credits:** 3
- ENGL 253 - Short Story **Credits:** 3
- ENGL 260 - British Literature **Credits:** 3
- ENGL 270 - American Literature **Credits:** 3
- ENGL 280 - Studies in World Literature and Culture **Credits:** 3
- ENGL 285 - Introduction to American Ethnic Literatures **Credits:** 3
- ENGL 287 - Great Books **Credits:** 3
- *ENGL 355 - Literature for Children **Credits:** 3
- ENTOM 202 - Art and Insects **Credits:** 3
- MUSIC 100 - Introduction to Music Theory **Credits:** 3
- MUSIC 103 - Voice Class I **Credits:** 1
- MUSIC 104 - Voice Class II **Credits:** 1
- MUSIC 111 - Concert Choir **Credits:** 0-1
- MUSIC 112 - University Choir **Credits:** 0-1
- MUSIC 113 - University Band **Credits:** 0-1
- MUSIC 114 - Cat Band **Credits:** 0-1
- MUSIC 115 - Marching Band **Credits:** 0-1
- MUSIC 116 - Concert Band **Credits:** 0-1
- MUSIC 117 - Wind Symphony **Credits:** 0-1
- MUSIC 118 - Jazz Ensemble Lab A **Credits:** 0-1
- MUSIC 119 - Madrigal and Motet Ensemble **Credits:** 0-1
- MUSIC 120 - Recorder Ensemble **Credits:** 0-1
- MUSIC 121 - Collegiate Chorale **Credits:** 0-1
- MUSIC 129 - University Orchestra **Credits:** 0-1

- MUSIC 130 - Symphony Orchestra **Credits:** 0-1
- MUSIC 131 - Theatre Orchestra **Credits:** 0-1
- MUSIC 135 - University Tenor/Bass Choir **Credits:** 0-1
- MUSIC 140 - University Treble Chorus **Credits:** 0-1
- MUSIC 150 - History of Musical Instruments **Credits:** 2-3
- MUSIC 151 - Women in Music **Credits:** 3
- MUSIC 152 - Introduction to Film Music **Credits:** 3
- MUSIC 153 - History of Jazz **Credits:** 3
- MUSIC 154 - Salsa: Afro-Cuban Music of the Past and Present **Credits:** 3
- MUSIC 155 - Jazz in Kansas City and the Southwest **Credits:** 2-3
- MUSIC 156 - Introduction to the Broadway Musical **Credits:** 3
- MUSIC 157 - Introduction to American Music **Credits:** 3
- MUSIC 160 - Experiencing Live Music **Credits:** 2-3
- MUSIC 170 - History of Rock and Roll **Credits:** 3
- MUSIC 171 - Inventing the Future: Underground Rock: 1968-1993 **Credits:** 3
- MUSIC 172 - History of Country Music **Credits:** 3
- MUSIC 173 - Music as Protest and Propaganda in the United States **Credits:** 3
- MUSIC 174 - History of Hip Hop **Credits:** 3
- MUSIC 203 - Vocal Techniques I **Credits:** 1
- MUSIC 204 - Vocal Techniques II **Credits:** 1
- MUSIC 205 - Music for Elementary Teachers **Credits:** 3
- MUSIC 208 - Guitar Class I **Credits:** 1
- MUSIC 210 - Music Theory I **Credits:** 3
- MUSIC 211 - Piano Class I **Credits:** 1
- MUSIC 212 - Piano Class II **Credits:** 1
- MUSIC 213 - Piano Class III **Credits:** 1
- MUSIC 214 - Piano Class IV **Credits:** 1
- MUSIC 220 - Topics in Music **Credits:** 1-3
- MUSIC 230 - Music Theory II **Credits:** 3
- MUSIC 231 - Aural Skills I **Credits:** 1
- MUSIC 233 - English Diction **Credits:** 1
- MUSIC 240 - Advanced String Techniques and Materials **Credits:** 1
- MUSIC 241 - Italian Diction **Credits:** 1
- MUSIC 242 - French Diction **Credits:** 1
- MUSIC 243 - German Diction **Credits:** 1
- MUSIC 244 - West African Drumming and Percussion **Credits:** 2
- MUSIC 246 - Drumset Techniques **Credits:** 1
- MUSIC 248 - Songwriting **Credits:** 3
- MUSIC 249 - Introduction to Music of the World **Credits:** 3
- MUSIC 250 - Introduction to Music **Credits:** 3
- MUSIC 251 - Applied Study for Non-Music Majors **Credits:** 1-2
- MUSIC 254 - Secondary Performance **Credits:** 1-2
- MUSIC 255 - Lower-Division Performance **Credits:** 1-4
- MUSIC 268 - Vocal Pedagogy **Credits:** 2
- MUSIC 280 - Lower-Division Ensemble Performance **Credits:** 1
- THTRE 111 - Production Participation **Credits:** 1
- THTRE 171 - Fundamentals of Acting **Credits:** 3

- THTRE 201 - Drugs and Alcohol in Theatre and Film **Credits:** 3
- THTRE 202 - Taboo! Transgression and Censorship in Theatre and Film **Credits:** 3
- THTRE 203 - Stage to Screen: Theatre into Film **Credits:** 3
- THTRE 205 - Contemporary American Theatre **Credits:** 3
- THTRE 211 - Run Crew **Credits:** 0-2
- THTRE 212 - Wardrobe Crew **Credits:** 1
- THTRE 235 - Introduction to the Art of Film **Credits:** 3
- THTRE 260 - Stage Movement **Credits:** 3
- THTRE 263 - Oral Interpretation of Literature **Credits:** 3
- THTRE 265 - Fundamentals of Improvisation I, II **Credits:** 3
- THTRE 268 - Techniques of Makeup **Credits:** 1
- THTRE 269 - Fundamentals of Technical Production **Credits:** 3

- THTRE 271 - Intermediate Acting **Credits:** 3
- THTRE 280 - Script Analysis **Credits:** 3
- THTRE 299 - Vocal Expression for Actors **Credits:** 3

* This course will NOT show in the list for K-State Core in uAchieve/DARS, but will apply via Statewide Transfer (SWT) if a student takes the equivalent Community College Course – it will pull in and list the 300 or 400-level K-State course currently listed under SWT.

Elementary Education Designated Area: 6 credit hours

Requirement #7 {070}

As part of the Systemwide (PK-6) Elementary Universal Transfer Pathway, this is a deviation from Bucket #7 Institutionally Designated Plan. **The course cannot have been used in another bucket.**

- AMETH 160 - Introduction to American Ethnic Studies **Credits:** 3
  OR
- POLSC 115 - U.S. Politics **Credits:** 3

- Choose one free elective {100-200}: **Credits:** 3

You may search the university course catalog individually for a Full List of K-State 100/200-level courses.

Glossary and Abbreviations

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z

A/Pass/F: A grading option in which a student earning a grade of A in a course will have an A recorded for that course; a grade of B, C, or D will be recorded as a Pass; and a grade of F will be recorded as an F.

Academic good standing: (as displayed on enrollment verification form)

- YES = Student is in good standing; eligible to re-enroll; not dismissed
- NO = Student is not in good standing; not eligible to re-enroll; dismissed

Academic load: The total number of credit hours enrolled in during one term.

Academic warning: (Warning) An indication that a student is in academic difficulty which could lead to dismissal from the university.

Add/Drop: Changing the student's course schedule by adding and/or dropping a course.

Advanced standing: Having credit awarded for previous work or testing.

Advisor: A department or college-based faculty member who helps a student achieve her or his educational goals by providing guidance on courses, program requirements, prerequisites, programs of study, and policies and procedures.

Audit: Auditing is participating in a class regularly without submitting class work and without receiving credit. {University Handbook, F66.1-F66.2}

B.A. degree: (Bachelor of Arts) Courses selected from a variety of disciplines with concentrations in one or two areas. A modern language is required for a B.A. degree.

B.S. degree: (Bachelor of Science) A specified program of required courses with fewer electives than the B.A. A modern language is not required.

Baccalaureate: Refers to the bachelor's degree.

Certificate programs: A non-degree credential designed to provide students with specialized knowledge that is less extensive than, and different from an undergraduate or graduate degree program. A certificate program represents a focused collection of courses that, when completed, affords the student some record of coherent academic accomplishment in a given discipline or set of related disciplines.

Classification: Level of progress toward a degree with classifications of freshman, sophomore, junior, or senior, depending on the number of term hours completed.

College: An academic unit of the university. Kansas State University has nine colleges.

Combined, Co-Convened Course(s): The temporary linking of one or more separate courses that are independent of each other but are combined into one class offering (same time/day and Facility ID) for administrative convenience. Co-Convened courses will have a similar course title and can be used for dual offerings of the same course (both undergraduate and graduate) or courses within different subject areas.

Cooperative education (co-op): The integration of academic experience with planned employment experiences that relate to a student's academic major or career goals. The work experience supplements and complements the curriculum.

Concurrent enrollment: (Conc.) This term usually means the student is enrolled in High School and is taking college credit at the same time.

Course: A unit of study a student enrolls in during a term.

Credit by examination: Credit is received when a student takes an oral or written examination without enrolling in a course.

Credit hour: (Cr.) The amount of effort required to attain a specific amount of knowledge or skill is equivalent to three hours of effort per week for 15 weeks. Any combination of contact time and effort outside of class is allowed {University Handbook: Section F115}.

Credit/No Credit: (C/NC) A grading option with successful completion of a course recorded as Credit and failure as No Credit. No other grades are given for such courses and they are not figured into the grade point average.

Cross-listed course: Cross-listing is an administrative way for two or more academic units to share responsibility for a single course. The same course is offered collaboratively by *two or more academic units* and identified by the *same*

*course hundred level (i.e. both 2xx, 3xx, etc.), course name***,** *course description, K-State 8 tags, and learning objectives*. Cross-listed courses are combined in the course catalog and when scheduled in KSIS and are subject to the retake policy as repeated courses.

Curriculum: A program of courses that meets the requirements for a degree in a particular field of study, also referred to as a major.

Degree program: Courses required for completion of a particular degree.

Department: A unit within a college representing a discipline.

Discipline: An area of study representing a branch of knowledge, such as mathematics.

Dismissal: (Dismissed) A student who neglects his or her academic responsibilities may be dismissed on the recommendation of an academic dean.

Double major: A double major is two majors in the same degree type being pursued by a student at one time (e.g., B.S. in Mathematics and B.S. in Geography). The requirements for both degrees must be satisfied.

Drop/Add: Changing the student's course schedule by adding and/or dropping a course, or both.

Dual degrees: A dual degree is two unique degree types that a student has elected to pursue at one time (e.g., B.S. in Mathematics and B.S.B.A in Business Administration). The requirements for both degrees must be satisfied.

Dual-listed Courses: The same course is offered by *the same academic units* and is identified typically by the *same course name*, but with different course prefixes, numbers, and levels. Each course should have clear learning outcomes that address the differences in the course level combinations, between an undergraduate/graduate course combination or master/doctoral course combination.

Ed.D.: Doctor of Education degree. A post-baccalaureate degree is awarded upon completion of at least three years of full-time specialized study, together with a major research contribution to the field of education that demonstrates independence as a scholar. The degree culminates with a formal dissertation.

Ed.S.: Education Specialist degree. An Ed.S is an advanced degree for teachers who want to keep working while gaining specialized proficiency in a particular area of interest, such as administrative leadership, education technology, or early childhood.

Electives: Courses chosen by a student that is not required for the major or minor. The number of hours of electives required varies according to a student's major.

Enrollment: The process of selecting course(s) and being enrolled/registered in the course(s).

Equivalent course: (Equiv.) Courses offered by *one or more academic units* with different course numbers and course names may have a similar or different course prefix. Equivalent substitute courses are noted in the catalog that they cannot be taken for credit if credit has been received in specified equivalent course(s). Equivalent courses are subject to the retake policy as repeated courses.

Extracurricular: Activities such as band or debate for which a student may earn credit toward graduation. Extracurricular activities are counted as electives.

Financial aid: Help provided to a student to pay for college. Aid is available from grants, loans, scholarships, and work/study employment.

Grade point average: A measure of a student's academic achievement at a college or university; calculated by dividing the total number of grade points received by the total number attempted.

Graduate student: A student who has completed a bachelor's degree and has met all the requirements for admission to Graduate School.

Intersession: Courses offered in-between terms.

K-State 8: Indicates that the course has been approved for the K-State 8 General Education Program which encourages students to be intellectual explorers. Students who first enroll in Summer 2011 or later must meet the requirements of the K-State 8 General Education Program.

Lecture: (Lec.) A course wherein the teaching is done primarily through oration.

M.A.: Master of Arts degree. A post-baccalaureate degree is awarded upon completion of at least 30 term hours of graduate credit, usually in the humanities or social sciences. May or may not include research and a thesis, depending on the field of study.

Major: A program of courses that meets the requirements for a degree in a particular field of study.

Minor: A systematic program of study in an area of emphasis outside a student's major.

M.S.: Master of Science degree. A post-baccalaureate degree is awarded upon completion of at least 30 term hours of graduate credit, usually in the sciences or professions. Research and a thesis are required in most of the sciences.

Non-Degree seeking student: A student taking courses at K-State, but not admitted to a program leading to a degree.

Non-Standard Course: A course that is not scheduled in the full fall/spring scheduling guidelines of a term.

One-Half Credit Hour: The amount of effort required to attain a specific amount of knowledge or skill equivalent to 22.5 hours of effort. Any combination of contact time and effort outside of class is allowed. Academic sessions, including full or condensed semesters, intersession classes, summer classes, or other defined periods of time, are expected to maintain an equivalent amount of time (contact and outside of class time). {University Handbook: Section F115.1}

Option: An approved group of courses creating a specialty within a major field of study.

Orientation: Activities designed to help new students become acquainted with the university.

Ph.D.: Doctor of Philosophy degree. A post-baccalaureate degree is awarded upon completion of at least three years of full-time specialized study, together with a major research contribution to the discipline that demonstrates independence as a scholar. The degree culminates with a formal dissertation.

Prerequisite: (Pr.) A requirement, usually credit in another course, must be met before a particular course can be taken.

Probation: Probation is an academic warning that a student is in academic difficulty which could lead to dismissal from the university.

Recitation: (Rec.) A small section is usually taken in conjunction with a lecture.

Regular Session Course: A course that meets for the first time during the first 7 calendar days of the semester and that has its last class meeting during the final 7 calendar days of the semester.

Repeatable Course: A course that may be taken multiple times without being subject to the retake policy. There may be a credit hour or course count limit associated with a repeatable course.

Scholastic honors: An award an undergraduate receives based on the excellence of K-State academic work.

Secondary major: Interdisciplinary major which must be completed along with a primary major course of study. A secondary field of specialization is an interdisciplinary program of study which is completed in addition to a major. These programs are administered by a director and a supervisory committee of faculty representing the various academic departments offering courses for the secondary major. Secondary majors cannot be earned outside of the completion of the primary major.

Special student: An undergraduate student taking courses at K-State but not regularly enrolled in work toward a degree.

Transcript: An official copy of a student's permanent academic record.

Transfer student: A student who terminates enrollment in another college or university and subsequently enrolls at K-State.

Undergraduate student: A university student who has not received a bachelor's degree.

Variable: (V/Var.) The credits earned in some courses may vary.

Course Description Key

Course Descriptions

The following course description key explains the system used for courses listed throughout the catalog.

Sample undergraduate course description

GEOG 221 - Introductory Physical Geography
Credits: (4)
A basic physical geography course examining the atmosphere, biosphere, geosphere, and hydrosphere, with emphasis on processes, patterns, and physical background.
Note: Three hours of lecture and one two-hour lab a week.
Requisites: Prerequisite: None.
Typically Offered: Fall, Spring, Summer
K-State 8: Empirical and Quantitative Reasoning; Natural and Physical Sciences

Sample graduate course description

GEOG 895 - Topics in Spatial Analysis
Independent advanced study of a selected topic. An example is the use of remote sensing and GIS in environmental modeling.
Credits: 1-3
Requisites: Pr.: Consent of instructor.
Typically Offered: Fall, Spring, Summer

Course number

The letters **GEOG** generally denote the department in which the course is offered (in this case, the Department of Geography).
The three digits of the course number **321** (undergraduate) and **899** (graduate) represent the level of the course (e.g., 100-199 = first year, 200-299 = second year, etc.)

Refer to the Course Level Key in Academic Policies and Procedures within the Credit Section

The number in parentheses (4) indicates the units of credit given for the course.

The **Fall, Spring, Summer**, and/or **intersession** indicates the semester or semesters, each course is usually offered.

K-State 8 indicates that the course has been approved for the K-State 8 General Education Program which encourages students to be intellectual explorers. Students who first enroll in Summer 2011 or later must meet the requirements of the K-State 8 General Education Program.

The abbreviation **Pr**. indicates prerequisites for the course. In the sample course, students would be required to have completed Environmental Geography I before enrolling. Some courses list **Recommended pr**., which means a previous course is strongly recommended, although not required.

Some courses may allow or require concurrent or co-requisite enrollment in other courses. This is indicated by the abbreviation **Conc**.

Courses

AAI 301 - Career Readiness for Applied and Technical Professions

Credits: 3

This course will allow students to synthesize career and academic opportunities related to their technical coursework into viable career pathways. Exploration of career interests and values will be accomplished through selected assessments, applied learning projects, and online resources. Identification of defined academic and career pathways are curated through evaluation, decision-making, and defining short and long-term career goals. Since the course is foundational for the degree completion program in Applied and Interdisciplinary Studies, it is assumed that a student will already have completed 30 credit hours or an associate's degree completed.

Repeat for Credit
N

Requisites
Requisite: Completed 30 Hours of Undergraduate Coursework and enrolled as an Applied and Interdisciplinary Studies student (AIS)

Typically Offered
Fall or Spring

AAI 395 - Undergraduate Topics in Applied and Interdisciplinary Studies

Credits: .5-3

Selected undergraduate topics in applied and interdisciplinary studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 495 - Undergraduate Special Topics in Applied and Interdisciplinary Studies

Credits: .5-3

Special Topics in Applied and Interdisciplinary Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 501 - Internship in Applied and Interdisciplinary Studies

Credits: 3

This internship course provides students in interdisciplinary fields with hands-on experience in a professional setting. Students are responsible for finding their own internship site(s) prior to enrolling in the course. The course includes reflections and discussions where students can share their experiences and insights by integrating their academic knowledge with practical application.

Note
Required of all Applied and Interdisciplinary Studies Majors.

Repeat for Credit
Y

Requisites
Students should have senior standing and have completed AAI 301: Career Readiness for Applied and Technical Professionals. Permission to enroll will be granted when the student has verified an internship location has been secured.

Typically Offered
Fall, Spring, Summer

AAI 502 - Applied Studies Seminar

Credits: 3

This applied studies seminar is designed to bridge the gap between undergraduate academic experiences and the professional world. Students will connect their research, writing, and exploration with real-world issues in their intended career fields. The course also focuses on expanding the critical skills necessary for new employees, with topics ranging from professional communication to navigating employment challenges in an evolving landscape.

Repeat for Credit
N

Requisites
A student must have completed AAI 301: Career Readiness for the Applied and Technical Professions and be senior standing to register for this course. While not required for this course, it is recommended that student have take AAI 501: Internship in Applied and Interdisciplinary Studies prior to this course.

Typically Offered
Fall, Spring, Summer

AAI 595 - Undergraduate Advanced Topics in Applied and Interdisciplinary Studies

Credits: .5-3

Advanced undergraduate topics in Applied and Interdisciplinary Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 695 - Special Topics in Applied and Interdisciplinary Studies

Credits: .5-3

Special topics in Applied and Interdisciplinary Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 795 - Topics in Applied and Interdisciplinary Studies

Credits: .5-6

Selected topics in applied and interdisciplinary studies.

Note
100% Lecture

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 797 - U.S. Animal Politics and Policymaking

Credits: 2

The goal of this course is for students to become familiar with basic concepts of politics and policymaking related to animals in the United States. The course will examine the role of interest groups, elected representatives, and government agencies in the creation and implementation of policies involving companion animals, wildlife, farm animals, and animals used in research.

Repeat for Credit
N

Typically Offered
Spring

AAI 801 - Interdisciplinary Process

Credits: 3

The overall goal of this course is for students to develop an understanding of and practice in interdisciplinary and multidisciplinary thinking, problem solving, and team based leadership, using models that allow interdisciplinary and cross-function teams to work together and to generate imaginative and creative solutions to complex challenges and problems.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AAI 840 - Regulatory Aspects of Drug and Vaccine Development in the Animal Health Industry

Credits: 2

This course explores the topic of regulations associated with animal health product development and manufacturing. Topics for discussion will include an overview of the regulatory affairs process in the U.S. and other countries, drug and vaccine classifications and the approval process, GCP/GLP guidelines, drug and vaccine

efficacy and safety testing, human and environmental safety issues, and future challenges and current industry needs.

Note
100% Lecture

Repeat for Credit
N

Typically Offered
Fall, Spring

AAI 841 - Strategies in Pre-Clinical and Clinical Research for Regulatory Affairs in Animal Science

Credits: 2

In this course, students will review the history of regulations as well as gain an understanding of the integration of science into successful product approval outcomes. Students will learn how to achieve target claims for developing new products while ensuring safety. Students will also be introduced to the planning, design, and conduct of preclinical and clinical studies. The topics covered include protocol design and the evaluation and assessment of regulatory submissions. The course will consider practical issues in regulatory affairs. Students may participate in case study exercises.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AAI 842 - Strategies in the Stewardship of Licensed Pharmaceuticals and Biologics in Animal Health

Credits: 1

In this course, students will learn about the role of regulatory affairs in the stewardship of animal health products. The topics covered include expected activities primarily post product approval, compliance, strategies for supply management, product life cycle management, risk management, and the role of industry in policy development. Communication with various stakeholders, including regulatory agencies, research and development, manufacturing, and marketing and sales are covered. The course will consider practical issues in regulatory affairs. Students may participate in case study exercises.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AAI 843 - Regulatory Development of Animal Pharmaceuticals - FDA

Credits: 2

In this course, students will focus on the regulatory strategies that support product development and maintenance regulated by the Food and Drug Administration (FDA) Center for Veterinary Medicine (CVM). This includes product development strategies based on clinical and nonclinical data, key manufacturing and supply chain regulations, and post approval product life cycle management, including pharmacovigilance. Variances between food animal and non-food animal targets in developing regulatory strategies will be reviewed. Special topics, current topics and FDA enforcement actions will be covered.

Repeat for Credit
N

Requisites
Prerequisite: AAI 840, STAT 703

Typically Offered
Summer

AAI 844 - Regulatory Development of Animal Pesticides - EPA

Credits: 2

In this course, students will focus on the regulatory strategies for the development of products deemed to be regulated by the Environmental Protection Agency (EPA). This course will focus on product development strategies, manufacturing and supply chain regulations, and post marketing product life cycle management, including pharmacovigilance. Environmental laws and risk assessment will also be covered.

Repeat for Credit
N

Requisites
Prerequisite: AAI 840, STAT 703

Typically Offered
Fall

AAI 845 - Regulatory Development of Animal Biologicals and Diagnostics - USDA

Credits: 2

In this course, students will focus on the structure and detailed approach for developing animal biologicals and diagnostics regulated by the United States Department of Agriculture (USDA). Students will gain solid understanding of the critical pathway to successful product development, manufacturing, compliance, and product life cycle management, including post marketing surveillance. The course also addresses adapting new technology to emerging and re-emerging diseases.

Repeat for Credit
N

Requisites
Prerequisite: AAI 840, STAT 703

Typically Offered
Fall

AAI 846 - Special Topics: Regulatory Affairs in Animal Health

Credits: 1

This course will be used as the final culminating experience in the Animal Health Regulatory Affairs (AHRA) graduate certificate program, where it will require the completion of a final project that integrates learning following the completion of program courses.

Repeat for Credit
N

Requisites
Prerequisites: AAI 840, AAI 841, AAI 842, AAI 843, AAI 844, AAI 845, and STAT 703 or advisor approval.

Typically Offered
Fall, Spring, Summer

AAI 852 - Vaccinology

Credits: 3

This multidisciplinary course is designed to provide the student with an understanding of vaccine development (including technology) from conceptualization through development, testing, and utilization. This course will specifically cover topics on the principles of pathogenesis of infectious diseases, immune protection, and eliciting protective immunity by vaccination; application of traditional and new technologies to vaccine development; principles of pre-clinical development, manufacturing, and clinical evaluation of a vaccine; importance of the regulatory process to vaccine development; and utilization of epidemiology to measure vaccine need and effectiveness.

Repeat for Credit
N

Typically Offered
Spring

AAI 858 - Capstone Experience I

Credits: 1

This course provides students the opportunity to synthesize and integrate knowledge in its application to professional practice. It is designed for students who intend to work in an applied professional setting where they are expected to critically apply existing knowledge and methods to solve problems. Students will complete a project proposal on a topic of interest and related assignments, in consultation with the instructor.

Note
100% Individual Instruction

Repeat for Credit
Y

Requisites
Prerequisite: Only Professional Science Master's degree students may enroll in this course.

Typically Offered
Fall, Spring, Summer

AAI 859 - Capstone Experience II

Credits: 2

This course provides students the opportunity to synthesize

and integrate knowledge in its application to professional practice. It is designed for students who intend to work in an applied professional setting where they are expected to critically apply existing knowledge and methods to solve problems. Students will produce written reports and oral presentations on their project of focus.

Note
100% Individual Instruction

Repeat for Credit
Y

Requisites
Prerequisite: AAI 858. Only Professional Science Master's degree students can enroll in AAI 859. Instructor approval is required.

Typically Offered
Fall, Spring, Summer

AAI 860 - Introduction to Systems and Data in Animal Health

Credits: 2

The field of Animal Health data analytics is comprised of the application of data systems, data computing, and data programming. This course is focused on data systems and data acquisition within animal health systems.

This is an interdisciplinary course for students interested in data insights and digital technologies in animal health that explores life cycle and data collection systems encountered in Animal Health for both production and companion species, including the realities of data acquisition, data types, and analytics that may exist within those systems.

Repeat for Credit
N

Typically Offered
Fall

AAI 861 - Research Strategies to Drive Development of Animal Health Products

Credits: 2

Develop a working knowledge of the product development pipeline and continuous discovery techniques using both research and market insights as drivers for innovation in the Animal Health industry.

Repeat for Credit
N

Typically Offered
Spring

AAI 862 - Applied Analytics in Animal Health

Credits: 3

The field of Animal Health data analytics is comprised of the application of data systems, data computing, and data programming. This course will cover all three areas of data systems, data computing, and data programming in an applied format that is specific to the animal health industry.

This is an applied course for students interested in developing skills in analytics and data science as they apply to animal health. Students will be expected to assess relevant outcomes in animal health systems while deducing proper methods for data preparation and manipulation, extrapolating understanding of data analytics to select the appropriate analysis approach, performing supervised and unsupervised machine learning, and effectively communicating both analysis and interpretation of outcomes as they apply to the field of animal health. Students will be asked to use Python and other software systems. Students will formulate reasons why working in interdisciplinary teams benefits analytic projects in animal health.

Note
Course does not have prerequisites but it is recommended that students take AAI 864 or similar course for those without a data analytics or data programming background.

Repeat for Credit
N

Requisites
Prerequisite: Recommend AAI 864 or similar course for those without a data analytics or data programming background.

Typically Offered
Spring

AAI 863 - Special Topics: Data Analytics and Insights in Animal Health

Credits: 1

This course is the final component of the Data Analytics and Insights in Animal Health Graduate Certificate program. Students will demonstrate core certificate objectives by completing a project proposing a new data analytic and insight technology for the animal health industry. Students will describe the necessary components for project execution, requirements to develop the analytic tool or technology, and how the analytic tool or technology will be used in animal health.

Repeat for Credit
N

Requisites
AAI 860, AAI 861, and AAI 862

Typically Offered
Fall, Spring, Summer

AAI 864 - Introduction to Computing for Animal Health

Credits: 3

The field of Animal Health data analytics is comprised of applications of data systems, data computing, and data programming. The focus of this course is on data computing and programming as applied to animal health data.

The purpose of this course is to introduce students to the application of essential data-driven approaches to tackle the challenges facing animal health. The use of computational approaches is considered to be more valuable in helping scientists study specific hypotheses in animal health. The Introduction to Computing for Animal Health course will focus on intuitive computational methods to address animal health questions with interdisciplinary philosophy. Students will understand the analysis workflows and computational methods that unravel and translate complicated data from animal health into a comprehensive demonstration.

Repeat for Credit
N

Typically Offered
Spring

AAI 865 - Assessing Effectiveness of Animal Therapeutics and Vaccines

Credits: 1

This interdisciplinary course is designed for students working with data derived from animal health systems to expand their knowledge and understanding of the pathophysiology of common animal diseases. This course will familiarize students with animal disease processes and basic principles behind the use of clinical laboratory assays, including their use in assessing efficacy of drugs or vaccines. Laboratory data from animal studies will be used to apply principles discussed during the course.

Repeat for Credit
N

Typically Offered
Fall

AAI 867 - Zoonotic Pathogens in the Food Chain

Credits: 2

This interdisciplinary course is designed for students to expand their knowledge of how modern food production systems contribute to the risk of zoonotic diseases, and where mitigation strategies need to be focused. Through case study discussions, students will examine attributes of microorganisms that allow potential contamination of food sources, as well as how new trends in animal production, such as organic livestock farming and raw milk consumption, influence safety in the food chain.

Repeat for Credit
N

Typically Offered
Summer

AAI 870 - Seminar in Applied and Interdisciplinary Studies

Credits: 1-6

Student presentations and discussion of current topics and recent findings in applied and interdisciplinary studies.

Note
100% Seminar

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 880 - Problems in Applied and Interdisciplinary Studies

Credits: 1-6

Opportunity for advanced independent study of a specific problem or technique in applied and interdisciplinary studies. Topics selected jointly by student and instructor.

Note
10% Independent Study

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 895 - Advanced Topics in Applied and Interdisciplinary Studies

Credits: 5-6

Focus on advanced topics in applied and interdisciplinary studies.

Note
100% Lecture

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAI 899 - Research in Applied and Interdisciplinary Studies.

Credits: 1-6

Research with a focus on applied science and interdisciplinary studies.

Note
100% Research

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AAM 472 - Large Fixed-Wing Operations Flight Lab

Credits: 2

In this course, students will learn to fly a larger than small UAS. This will require students to fly within a regulatory environment outside of 14 CFR Part 107. Course delivery will focus on safety and crew resource management. Emphasis is on experiential learning.

Note
3 hours of lab per week. Students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 471 and UAS 367

Typically Offered
Spring

AAM 601 - Introduction to Advanced Air Mobility Systems

Credits: 1

Students will be introduced to the Urban Air Mobility and Uncrewed Traffic Management ecosystem. Additional learning areas will include an overview of regulations, airspace structures, enabling technologies and subsystems, and principles of systems engineering.

Repeat for Credit
N

Typically Offered
Fall

AAM 605 - System Architectures in Advanced Air Mobility Systems

Credits: 2

Using a Systems Engineering approach, students will be introduced to the major technical components of Advanced Air Mobility frameworks and critical subsystems such as Autonomous Systems, Guidance and Navigation, Cyber-Physical Systems, Sensory Platforms, Ground Systems, and Uncrewed Traffic Management Systems. Other emerging topics will be included.

Repeat for Credit
N

Typically Offered
Fall

AAM 732 - Aerospace Communication Systems

Credits: 3

Students will be introduced to radio systems, air-to-air, air-to-ground communications, and an overview of current approaches to line-of-sight and beyond-line-of-sight techniques. Additional learning areas include Airspace integration UAS/UAM/ATM/ATC Technologies, BLOS and Satellite Data Link Connectivity, Communications system design, Review of models and techniques (e.g. Uplink/Downlink Model, Noise, SNR), Antennas design and propagation, and Cyber-attack challenges and mitigations.

Repeat for Credit
N

Typically Offered
Fall

AAM 762 - Guidance and Navigation Systems

Credits: 3

Students will develop an understanding of classical and advanced guidance and navigation theories to critically select design guidance and navigation systems. Topics include corridor planning, uncrewed guidance, conventional and advanced guidance approaches, such as proportional navigation, geometric guidance, optimal guidance, GNSS (Global Navigation Satellite Systems), terrain-based navigation, SLAM (Simultaneous Localization and Mapping), cooperative guidance and collision avoidance.

Repeat for Credit
N

Typically Offered
Spring

AAM 801 - Electromagnetic Threats and Mitigation Design for Advanced Air Mobility Systems

Credits: 3

Fundamentals of Electromagnetic Environmental Effects (E3) for AAM systems and mitigation using analytical and software tools. Emphasis will be placed on understanding and hazard mitigation of electromagnetic (EM) energy coupling processes through various transfer paths to onboard receptor devices. E3 sources to be studied include lightning, high-intensity radiated fields (HIRF), portable electronic devices (PED), and precipitation static (P-static).

Repeat for Credit
N

Typically Offered
Spring

ACCTG 231 - Introduction to Managerial Accounting

Credits: 3

Introduces the concepts associated with managerial accounting including cost accounting, job order costing, activity-based costing, cost-volume profit, and incremental analysis. Introduction to budgetary planning, variance analysis, and data analysis is included.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: MATH 100.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

ACCTG 241 - Introduction to Financial Accounting

Credits: 3

Introduces the concepts associated with the accounting cycle, the revenue cycle, the expenditure cycle (including business investments), and the financing cycle. Included is introduction to financial statements and data analysis.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

ACCTG 331 - Intermediate Accounting and Analytics I

Credits: 3

Enhances the understanding of the conceptual framework, the accounting information system, the financial statements, revenue recognition, and current assets. These topics will be enhanced using analytics.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 241.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ACCTG 342 - Taxation I

Credits: 3

Fundamental concepts of income determination in federal and state income tax regulations; examination of the impact of tax regulation on business and personal financial planning and decision making.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 331 or [ACCTG 241 and Senior Standing (90 credit hours)]

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ACCTG 413 - Accounting Information Systems

Credits: 3

This course describes how information flows through an enterprise, the sources and nature of documents, and the controls necessary to insure the accuracy and reliability of information. The course will also incorporate information technology controls, current computer systems, data analytics, and software applications into the course.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 241.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ACCTG 431 - Problems in Accounting

Credits: 1-18

Problems in Accounting

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for the problems undertaken in accounting and consent of instructor.

Typically Offered
Fall, Spring

ACCTG 432 - Cost Accounting

Credits: 3

Identifying relevant accounting data and organizing, summarizing, and analyzing that data into information useful for planning and budgeting, decision making, controlling, and evaluating functions of management.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 331, MANGT 421.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ACCTG 433 - Intermediate Accounting and Analytics II

Credits: 3

Enhances the understanding of long-term assets, current liabilities, long-term liabilities, and stockholders' equity concepts. These topics will be enhanced using analytics.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 331.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ACCTG 442 - Auditing I

Credits: 3

An introduction to the environment of auditing and the objectives and techniques of both financial and operational auditing.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 433 and Restricted to Accounting majors

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ACCTG 445 - Financial Statement Analysis

Credits: 3

This course will develop a student's skills and knowledge in the analysis and interpretation of corporate financial statements and their related footnotes. The class will encourage the student to think logically and creatively about the strengths and weaknesses of accounting information available to investors and shareholders. The main course objective is for the student to be capable of doing an in-depth analysis of a company's financial and operating performance from several financial statements.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231 and ACCTG 241, and FINAN 450.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

ACCTG 490 - Accounting Analytics

Credits: 3

This course will develop in-depth knowledge of the use of Microsoft Excel and other technology to analyze complex accounting information. The course will focus on using large volume data sets to simulate real world analytical problem solving.

.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 241.

Typically Offered
Fall, Spring, Summer

ACCTG 494 - Law for Accountants

Credits: 3

An intensive study of an accountant's professional

responsibilities to the public and the profession and the knowledge of the legal implications of business transactions, particularly as they relate to accounting and auditing.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

ACCTG 622 - Fraud and Forensics

Credits: 3

This is a full semester course focused on the tools needed to conduct a fraud-sensitive audit or to conduct a fraud investigation. As a part of this course, the student will learn numerous techniques used by fraudsters to deceive their victims as they misappropriate resources. In addition, the student will learn how to investigate accusations or suspicions of fraud from the initial gathering of evidence to the ultimate resolution of the investigation which could include criminal and/or civil lawsuits. Such understandings are important to the practicing auditor. Given the recent scandals in financial reporting, the auditor needs to be alert to signals of fraud in order to discharge his or her responsibilities to the profession, client, and public.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 331

Typically Offered
Spring

ACCTG 625 - International and Multijurisdictional Taxation

Credits: 3

Explores the fundamental principles underpinning the US tax law with regard to multijurisdictional activity (primarily international, some interstate).

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 342.

Typically Offered
Spring

ACCTG 631 - Accounting Internship

Credits: 0-3

Provides a full semester of practical accounting experience prior to entering graduate accounting program.

Repeat for Credit
N

Typically Offered
Fall, Spring

ACCTG 641 - Intermediate Accounting and Analytics III

Credits: 3

Builds on the second intermediate class. Enhances the understanding of investments, accounting for income taxes, pensions and post-retirement benefits, leases, accounting changes (including errors), the statement of cash flows, and disclosures. These topics will be enhanced using analytics.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 331

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ACCTG 642 - Accounting Research and Communication

Credits: 3

Use of the sources of authoritative guidance in resolving

complex, professionally oriented problems that include auditing, financial reporting, and tax reporting. Students analyze numerous unstructured cases and present their conclusion with written reports and oral presentations.

Note
Students may be enrolled concurrent in ACCTG 442. For accounting majors only.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 342, 433, and 442.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ACCTG 710 - Foundations of Accounting

Credits: 3

A study of business transactions, including identification of relevant economic events and how those events are recorded in financial statements, and a study of managerial accounting information for decision making, planning, and control.

Note
Not open to Master of Accountancy students.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 205.

Typically Offered
Fall

ACCTG 811 - Advanced Financial Reporting

Credits: 3

An examination of the reporting requirements of large (often multinational) corporations, e.g., foreign currency translation, interim and segment reporting, and business combinations.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 433.

Typically Offered
Fall, Spring

ACCTG 830 - Professional Ethics in Accounting

Credits: 03

Examination of ethical issues in industry and public accounting, including auditing standards, code of professional conduct, fraud, and internal controls.

Repeat for Credit
N

Requisites
Must be admitted to Master of Accountancy (MAcc) program.

Typically Offered
Spring

ACCTG 831 - Fraud and Forensics

Credits: 3

This is a full semester course focused on the tools needed to conduct a fraud-sensitive audit or to conduct a fraud investigation. As a part of this course, the student will learn numerous techniques used by fraudsters to deceive their victims as they misappropriate resources. In addition, the student will learn how to investigate accusations or suspicions of fraud from the initial gathering of evidence to the ultimate resolution of the investigation which could include criminal and/or civil lawsuits. Such understandings are important to the practicing auditor. Given the recent scandals in financial reporting, the auditor needs to be alert to signals of fraud in order to discharge his or her responsibilities to the profession, client, and public.

Repeat for Credit
N

Requisites
Prerequisite: Must have graduate school status.

Typically Offered
Summer

ACCTG 832 - Advanced Auditing

Credits: 3

An in-depth exposure to authoritative auditing pronouncements and specialized topics, e.g., statistical methods, EDP auditing, internal auditing, operational auditing, and audit management.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 442 and ACCTG 642.

Typically Offered
Fall

ACCTG 833 - Corporate Taxation

Credits: 3

A study of the federal taxation of corporations with emphasis on tax planning.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 342 and ACCTG 642.

Typically Offered
Fall, Spring

ACCTG 834 - Partnership Taxation

Credits: 3

Intensive study of the federal taxation of partnerships.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 342 and ACCTG 642.

Typically Offered
Fall

ACCTG 835 - Business Consulting & Advanced Managerial Accounting

Credits: 3

This class develops skills in consulting and advising businesses using advanced managerial accounting techniques and practices

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 432.

Typically Offered
Fall

ACCTG 840 - Introduction to Academic Accounting Research

Credits: 3

An introduction to academic accounting research, with an emphasis on educational/pedagogical research; practitioner research and basic research (archival, behavioral, and qualitative).

Repeat for Credit
N

Requisites
Prerequisites: ACCTG 642

Typically Offered
Spring

ACCTG 841 - Advanced Accounting Theory

Credits: 3

A critical examination of accounting theory with emphasis upon information economics, agency theory, and capital market information.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 641.

Typically Offered
On sufficient demand

ACCTG 842 - Advanced Topics in Taxation

Credits: 3

Intensive examination of selected topics in taxation.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 342 and ACCTG 642.

Typically Offered
On sufficient demand

ACCTG 844 - Design of Accounting and Business Information Processes

Credits: 3

This course focuses on understanding and designing contemporary business and information processes in organizations, providing an introduction to database systems, project management and information systems controls and technology.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 810, MANGT 830 and instructor permissions for MBA students or ACCTG 331 for Masters of Accountancy students or instructor permission.

Typically Offered
Fall

ACCTG 845 - International Accounting

Credits: 3

An examination of comparative international accounting systems, efforts to harmonize accounting standards internationally, problems of international financial analysis, accounting and tax issues of particular relevance to U.S. multinational enterprises.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 342 and ACCTG 641.

Typically Offered
On sufficient demand

ACCTG 846 - International and Multijurisdictional Taxation

Credits: 3

To explore the fundamental principles underpinning the US tax law with regard to multijurisdictional activity (international, interstate). At the conclusion of the course, students should be able to identify, analyze and evaluate the following: The theoretical basis of the U.S. approach to international taxation; the U.S. tax treatment of the foreign activity of U.S. citizens, residents and domestic corporations; the U.S. tax treatment of foreigners engaged in business or investment activity in the U.S.; the key issues surrounding state and local taxation.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 342.

Typically Offered
Spring, Summer

ACCTG 847 - Merger and Acquisition Taxation

Credits: 3

A study of the federal taxation of corporations, with an emphasis on tax planning related to mergers and acquisition.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 342 and ACCTG 642.

Typically Offered
Fall

ACCTG 852 - Accounting Research and Communication

Credits: 3

This is a team taught course that focuses on developing

skills at the higher levels of Bloom's Taxonomy (analysis, synthesis and evaluation) to conduct technical research and communicate the results of that research in both oral and written forms.

Note
May be taken currently with ACCTG 442.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 342 and ACCTG 443.

Typically Offered
Fall, Spring, Summer

ACCTG 855 - Financial Statement Analysis and Business Valuation

Credits: 3

This course is about the analysis of financial information for making decisions to invest in businesses. The methods of fundamental analysis will be examined in detail and applied in cases and projects involving listed companies. Topics include models of shareholder value, a comparison of accrual accounting and discounted cash flow approaches to valuation, the analysis of profitability, growth and value generation in a firm, diagnosing accounting quality, forecasting earnings and cash flows, pro-forma analysis for strategy and planning, and the determination of price/earnings (P/E) and market-to-book (P/B) ratios.

Repeat for Credit
N

Requisites
Prerequisite: Must have graduate school status.

Typically Offered
Fall, Spring, Summer

ACCTG 856 - Accounting Analytics

Credits: 3

This course will develop in-depth knowledge of the use of Microsoft Excel and other technology to analyze complex accounting information. The course will focus on using large volume data sets to simulate real world analytical problem solving.

Repeat for Credit
N

Requisites
Prerequisite: Must have graduate school status.

Typically Offered
Spring, Summer

ACCTG 857 - Accounting for Not-For-Profit Entities

Credits: 3

An introduction to the source of authoritative guidance, rules and regulations that govern current reporting to external entities by not-for-profit entities.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 641.

Typically Offered
Summer

ACCTG 860 - Management Accounting and Business Problem Solving

Credits: 3

A study of managerial accounting information for decision making, planning, and control.

Note
Not open to Master of Accountancy students.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 710, ECON 815, FINAN 715, MANGT 710, MANGT 720, MANGT 830, MKTG 705 and STAT 702.

Typically Offered
Fall

ACCTG 870 - Problems in Accounting

Credits: 3

An in-depth study of specified topics in accounting.

Note
Consent of instructor and department head.

Repeat for Credit
Y

Typically Offered
On sufficient demand

ACCTG 884 - Enterprise Information Systems Assurance

Credits: 3

This course focuses on types of assurance available in an enterprise-wide information systems environment and methods for providing assurance from the view of management, external auditors and consultants. Assurance topics discussed include assurances related to systems security, fraud, business and information process integrity, and operational efficiency. Focus is on designing systems to increase the level of inherent assurance as well as auditability. This course also includes a service learning component.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 810, MANGT 830 for MBA students or ACCTG 331 for Masters of Accountancy students or instructor permission.

Typically Offered
Spring

ACCTG 890 - Seminars in Professional Accounting

Credits: 1-6

Reviews content and skills for professional certification.

Note
Students should enroll for one credit hour in the first semester they complete the seminar and two credit hours during the second semester they complete the seminar.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ACCTG 895 - Accounting Internship

Credits: 3

This course provides an opportunity for students to experience firsthand the work performed by typical accountants on a day to day basis.

Repeat for Credit
N

Requisites
Prerequisite: Must have graduate school status.

Typically Offered
Fall, Spring, Summer

ACCTG 896 - Accounting International Experience

Credits: 1-6

Students will experience a faculty supervised travel abroad experience that will expose them to international issues related to accounting and general business.

Repeat for Credit
Y

Requisites
Prerequisite: Must have graduate school status.

Typically Offered
On sufficient demand

ADC 200 - Introduction to Addiction

Credits: 3

Analyzes one's knowledge, beliefs, and attitudes concerning addiction, within the

context of professional addiction counseling values and ethics. Examines evidence-based treatment strategies of addiction prevention, treatment, recovery, and relapse. Discusses the impact of addiction on the individual, family, and society.

Repeat for Credit
N

Typically Offered
Fall

ADC 315 - Addiction Pharmacology

Credits: 3

Evaluate drug use in modern society. Understand the impact of commonly-used substances on the body. Review pharmacological treatment approaches to withdrawal, treatment, recovery, and relapse prevention.

Repeat for Credit
N

Typically Offered
Spring

ADC 325 - Professional, Ethical, and Legal Issues in Counseling

Credits: 3

Explores professional, legal, and ethical issues facing addiction counselors or those in similar helping professional roles. Topics include client rights and responsibilities, confidentiality, and other legal considerations. Follows a discussion of general principles of ethics and major principles of professional conduct.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

ADC 395 - Holistic Recovery and Addiction Services Coordination

Credits: 3

Introduces students to holistic recovery and the roles administrators, counselors, and case managers play in assisting clients in achieving their treatment and recovery goals. Explores life challenges that affect a person's ability to enter recovery and maintain it. Examines advocacy skills, coordination of services across multiple systems, and referral activities used to connect clients with community resources.

Repeat for Credit
N

Typically Offered
Fall

ADC 561 - Methods of Individual Counseling

Credits: 3

Provides comprehensive examination of substance use treatment and rehabilitation, and includes a thorough examination of the treatment models of addiction, recovery, and relapse. Equips students with the theoretical basis of treatment and ability to clinically assess individuals with substance-related problems and provide evidence-based interventions.

Note
Instructor permission required

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
SOCWK 561

ADC 562 - Practicum in Addiction Counseling

Credits: 3-10

Integrates and applies knowledge and skills from coursework to addiction counseling settings for a practicum field experience consisting of 400 clock-hours. The practicum experience will consist of clinical activities that

integrate didactic learning supporting the diagnosis and treatment of substance use disorders. Students will be under the supervision of a LAC or LMAC.

Repeat for Credit
Y

Requisites
Corequisite: ADC 564 or SOCWK 564; instructor permission required

Typically Offered
Fall, Spring, Summer

ADC 564 - Professional Seminar

Credits: 2

Integrates academic learning, values exploration and skills acquisition in order to make a successful transition from student to professional. Extensive classroom sharing and discussion will enable students placed in one addiction counseling setting to learn the various facets of the vast array of placement experiences of their classmates.

Repeat for Credit
N

Requisites
Corequisite: ADC 562

Typically Offered
Fall, Spring, Summer

ADC 570 - Methods of Group Counseling

Credits: 3

Provides the theoretical framework for effective practice with groups. Facilitates the development of group leaders who possess an understanding of group dynamics and effective leadership skills. Provides students with opportunities to acquire the knowledge base, values, and practice skills necessary for evidence-based work with multicultural populations. Explores methods to establish group goals and treatment outcomes. Defines stages of group development and the challenges and tasks associated with each stage. Identifies value and ethical dilemmas that are common in group practice.

Note
Instructor permission

Repeat for Credit
N

Typically Offered
Fall, Spring

ADC 575 - Addiction and Family

Credits: 3

Explores family, social, and community systems in relation to substance use disorder problems. Identifies addictive and intergenerational patterns within families and evaluates family, parenting, and couples counseling methods in relation to various ethnicities and cultures.
Reviews relational clinical models including developmental, systemic, solution-focused, and narrative approaches and develops an understanding of the relationship between family factors and recovery.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences

ADC 630 - Co-Occurring Disorders and Addictions Treatment

Credits: 3

Explores co-occurring disorders and treatment needs of those who have a psychiatric or mental health disorder in combination with a substance abuse disorder. Examines assessment and treatment of persons with co-occurring disorders, along with evidence-based strategies for managing risks associated with treating individuals who have co-occurring disorders.

Repeat for Credit
N

Typically Offered
Spring

AERO 099 - Aerospace Studies Lab

Credits: 0

Leadership Laboratory (LLAB) is a dynamic and integrated

grouping of leadership developmental activities designed to meet the needs and expectations of prospective Department of the Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and Operations Flight Commander. Objectives are proficiency-based or characterized as task knowledge or performance. It is required to teach all lesson objectives and track the proficiency level for each student using the AFROTC-approved LLAB Objectives Tracker. LLAB objectives may be presented throughout the academic year in any order. Proficiency levels defined for each objective are based on the minimum skill level required for successful completion.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring

AERO 110 - The Foundation of the United States Air Force - Heritage and Values I

Credits: 1

"Heritage and Values," is a survey course designed to introduce students to the Department of the Air Force (DAF) and provides an overview of the basic characteristics, missions, communications and organization of the Air and Space Forces.

Note
One hour of class a week .Recommended Foundation Course for AERO 111

Repeat for Credit
N

Typically Offered
Fall

AERO 111 - The Foundations of the United States Air Force-Heritage and Values II

Credits: 1

A continuation for AERO 110. Represents the second semester of a two semester class. "Heritage and Values," is a survey course designed to introduce students to the Department of the Air Force (DAF) and provides an overview of the basic characteristics, missions, communications and organization of the Air and Space Forces.

Note
One hour of class a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AERO 110.

Typically Offered
Spring

AERO 210 - Team and Leadership Fundamentals I

Credits: 1

"Leadership Foundation," provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment.

Note
One hour of class a week. Recommended Foundation Course for AERO 211

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

AERO 211 - Team and Leadership Fundamentals II

Credits: 1

A continuation for AERO 210. Represents the second semester of a two semester class. "Leadership Foundation," provides a fundamental understanding of both leadership and team building. The lessons and course flow are designed to prepare students for field training and leadership positions in the detachment.

Note
One hour of class a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AERO 210.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

AERO 215 - AFROTC Field Training

Credits: 1-4

Provides cadets with a 13-day program designed to evaluate military leadership and discipline, determine potential for entry into the Professional Officer Course (POC), and stratification amongst their peers.

Repeat for Credit
N

Typically Offered
Summer

AERO 310 - Officer Leadership Studies 3A

Credits: 3

"Leading People," utilizes student's field training experience to take a more in-depth look at leadership. Special emphasis is placed on enhancing communication skills, and why that is important as a leader. Students have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

Note
Three hours of class a week.

Repeat for Credit
N

Requisites
Pre-requisite for AERO 311

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AERO 311 - Officer Leadership Studies 3B

Credits: 3

A continuation for AERO 310. Represents the second semester of a two semester class. "Leading People," utilizes student's field training experience to take a more in-depth look at leadership. Special emphasis is placed on enhancing communication skills, and why that is important as a leader. Students have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors.

Note
Three hours of class a week.

Repeat for Credit
N

Requisites
Prerequisite: AERO 310

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AERO 410 - Regional Studies and Defense Policy

Credits: 3

Designed for college seniors and provides them the foundation to understand their role as military officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level.

Note
Three hours a week.

Repeat for Credit
N

Requisites
Pre-requisite for AERO 411

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

AERO 411 - Aerospace Studies/Civil Military Relationships

Credits: 3

A continuation for AERO 410. Represents the second semester of a two semester class. Designed for college seniors and provides them the foundation to understand their role as military officers and how they are directly tied to our National Security Strategy. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level.

Note
Three hours of class a week.

Repeat for Credit
N

Requisites
Prerequisite: AERO 410

Typically Offered
Spring

AERO 499 - Problem Solving in Aerospace Studies

Credits: 1-3

Work offered in any of the AFROTC general or professional courses for students out of phase for graduation; material covered in a basic or advanced course.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AFRI 400 - African Study Abroad

Credits: 1-4

The study abroad educational trip will provide students the opportunity to apply their knowledge of an African language and to learn first hand about various African societies and cultures, farming systems, environment, health and other issues related to their host country.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AFRI 501 - Seminar I

Credits: 3

Economics of Poverty and Wealth Creation in Africa (social science component). Explores opportunities for breaking the cycle of poverty across the continent using strategic wealth creation techniques that overcome poverty. Focusing on the agriculture and food system, the environment and natural resources, and the health of the African people.

Repeat for Credit
N

Typically Offered
Fall

AFRI 502 - Seminar II

Credits: 3

African Development. Introduction to current political and economic conditions facing Africa from historical, social, economic, political, and human context. Solutions to the current problems confronting the African continent are analyzed.

Repeat for Credit
N

Typically Offered
Spring

AGCOM 100 - Agricultural Communications Orientation

Credits: 1

Orientation to the agricultural communications and journalism industry, on-campus resources, and college-level skill building.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 110 - Introduction to Agricultural Communications

Credits: 2

Introduction to agricultural communications programs, activities, careers, and trends. This course will cover audience analysis across media platforms, Associated Press writing style, and understanding target audiences.

Note
Two hours lecture per week.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 210 - Layout and Design Principles

Credits: 3

This course uses leading industry-adopted software to develop printed communications pieces to the point of being "printer ready", addressing design concepts and layout aspects critical to successfully printing a project. Assignments will integrate software functionality and design concepts with print production technology requirements.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: AGCOM 110.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

AGCOM 222 - Agricultural Business Communications

Credits: 3

Written communications as used in agricultural industries. A writing course emphasizing the tools and techniques of writing memos, letters, short and long reports, proposals, and presentations.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 100

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

AGCOM 286 - Topics in Agricultural and Natural Resources Communications

Credits: 0-3

Examination of current topics in undergraduate agricultural communications.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGCOM 296 - Problems in Agricultural and Natural Resources Communications

Credits: 1-3

Independent guided studies in any of the many fields associated with agricultural and natural resources

communications.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGCOM 300 - Careers in Agricultural Communications

Credits: 3

This course provides students with advanced knowledge regarding careers in agricultural communications. Students will learn about how to find, apply for, and manage a position in agricultural communications, including topics related to job search, professional development, workplace conflict, portfolio development, interview skills, writing in a professional environment, and salary negotiation. An emphasis in workplace ethics through case studies and service learning will be provided.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing AND AGCOM 110 or concurrent enrollment.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AGCOM 310 - Communicating in the Agricultural Industry

Credits: 3

The purpose of this course is to help students identify the influence of communication styles and theories related to issues in agriculture and natural resources. The course will build skill in oral and visual communication through formal and informal presentations and discussions.

Note
Three hours lecture per week.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 345 - Application of Layout and Printing Techniques in Agriculture and Natural Resources

Credits: 3

This course advances students' understanding of how industry-adopted software and hardware are used to develop printed communications pieces, going from individual application functionality to application integration for developing and managing production projects.

Repeat for Credit
N

Requisites
Prerequisite: AGCOM 210 or MC 341.

Typically Offered
Fall

Cross-listed
MC 345

AGCOM 410 - Agricultural Student Magazine

Credits: 1-5

Planning, interviewing, and preparing stories, headlines, layouts, advertising, and editing, for the *Kansas State Agriculturist* published by students in the College of Agriculture.

Repeat for Credit
Y

Requisites
Prerequisite: AGCOM 345 and MC 200, MC 221 or MC 280.

Typically Offered
Fall, Spring

AGCOM 420 - Topics in Agricultural Communications

Credits: 1-3

Discussions of topics, studies, and activities important to agricultural communications.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGCOM 425 - Undergraduate Research in Agricultural Communications

Credits: 0-3

This course uses qualitative, quantitative or mixed methods to conduct an agricultural and environmental communications research project. A faculty coordinator will assist students through the stages of conducting a research project and reporting its outcomes.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

AGCOM 435 - Video in Agriculture and Food

Credits: 3

Theory of visual storytelling is combined with basic and intermediate video camera and non-linear editing instruction to produce TV documentaries, magazine-type stories, and personal videos for web and broadcast distribution.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing AND AGCOM 110 or concurrent enrollment.

Typically Offered
Spring

AGCOM 550 - Internship in Agricultural Communications

Credits: 1-3

The intern works in a professional capacity in areas such as print journalism, electronic media, advertising, photography, and public relations. Student is supervised by a professional and a faculty member. One hour of credit for each four weeks of supervised work. Internship report and presentation required.

Note
Independent study. Instructor permission.

Repeat for Credit
Y

Requisites
Prerequisite: AGCOM 300

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

AGCOM 590 - New Media Technology

Credits: 3

This course focuses on the study and application of emerging "new media" technologies to effectively communicate information and market products and programs to general and targeted audiences. Students will study underlying communication theories such as Roger's Theory of Innovation Diffusion to provide a context of how society adopts and incorporates new technology.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites

Prerequisite: Junior standing AND AGCOM 110 or concurrent enrollment.

Typically Offered
Fall

K-State 8
Social Sciences

AGCOM 600 - Capstone Seminar in Agricultural Communications

Credits: 3

A capstone experience and project for agricultural communications and journalism students. Includes analysis of trends and issues in the field and discussion of communications planning.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisites: AGCOM 310, AGCOM 435, and AGCOM 590.

Typically Offered
Spring

AGCOM 610 - Crisis Communication

Credits: 3

Focus is placed on the application of effective crisis communication practices and techniques. Students will learn relevant interpersonal and organizational communication theory, assess/evaluate organizational risks, and develop a crisis communication plan. Students will partner with a community business to create and deliver a comprehensive crisis plan.

Note
Three hours lecture a week. Prerequisite or instructor permission.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing AND AGCOM 110 or concurrent enrollment

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

AGCOM 635 - Advanced Multimedia Production in Agriculture and Food

Credits: 3

Provides an understanding and application of advanced digital media production techniques. This is a "practicum-based" course focused on creating multimedia products for educational purposes. Students will create short-format, multi-media pieces on both agricultural research and activities conducted at Kansas State University and the Kansas agriculture industry.

Note
Instructor permission.

Repeat for Credit
N

Requisites
Prerequisite: AGCOM 435 or MC 301

Typically Offered
Fall, Spring

AGCOM 650 - Study Experience in Agricultural Communications and Journalism

Credits: 3

Seminar and travel course to prepare students before and after the experience and for students to analyze, critique and report their experiences associated with study tours and short courses.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGCOM 712 - Environmental Communication

Credits: 3

Combines theoretical discussions with practical experience regarding communication about environmental issues and provides introduction to natural and applied science topics related to the communications plan.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring

Cross-listed
MC 712

AGCOM 716 - Technical Communication in Agricultural Education and Communications

Credits: 1

Audience identification, writing, editing, formatting and production of social science-based materials for publication. Communicating information relevant to human subject research in agriculture, natural resources, and life sciences to research peers.

Repeat for Credit
N

Typically Offered
Spring

AGCOM 717 - Proposal Development in Agricultural Education and Communications

Credits: 1

Assist graduate students in the preparation of their thesis or dissertation research proposal. Students will produce the first three chapters of their thesis by the end of the course.

Repeat for Credit
N

Typically Offered
Spring

AGCOM 718 - Grantwriting in Agricultural Education and Communications

Credits: 1

Experience of navigating the research grant writing process, covering the process from idea conception through planning, proposing, receiving, executing grant-funded projects. Independent grant proposal as a major assignment in this course.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 733 - Graphical Design and Theory in Agricultural Communications

Credits: 3

Graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences using industry-standard software to prepare text and graphics and package them for use in print production.

Repeat for Credit
N

Typically Offered
Summer

AGCOM 738 - Utilizing Online Media in Agricultural Communications

Credits: 3

Identify agricultural audiences, conduct analyses, and use results to evaluate and produce online media that utilizes design fundamentals, visual communication theories, and new media technology.

Repeat for Credit
N

Typically Offered
Summer

AGCOM 786 - Topics in Agricultural Communications

Credits: 1-3

Examination of current topics in agricultural communications.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGCOM 800 - Foundations of Agricultural Communications

Credits: 3

Historical foundations of agricultural communications philosophical concepts, changes over time, industry today and the future. In-depth analysis and discussion of communication theories, application and current issues.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 810 - Scientific Communication

Credits: 3

Written, visual, and oral communications for scientists. Attention is focused on literature reviews, scientific papers, graphics, poster presentations, and oral paper presentations. Grant applications, ethics, and communications with non-science audience are discussed.

Note
Three hours lecture per week. Instructor permission.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing and instructor permission.

Typically Offered
Fall

AGCOM 814 - Graduate Studies in Leadership Communication

Credits: 3

This course examines the intersections of community-engaged scholarship and leadership through practices of relationship, story, strategy, and action. Students are introduced to resources and opportunities for pursuing public engagement, community-engaged scholarship, and successful program completion.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
COMM 814, LEAD 814

AGCOM 815 - Seminar in Leadership Communication

Credits: 1

This seminar provides doctoral students opportunities for collaboration and mentorship with peers, faculty, and visiting scholars, and exploration of career pathways in public engagement.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

Cross-listed
COMM 815, LEAD 815

AGCOM 820 - Communicating Ethical Issues in Agriculture

Credits: 3

This course provides an introduction to communicating ethical theories in the context of agriculture. Ethical theory and current research are used to critique contemporary issues in agriculture.

Note
Three hours of lecture a week.

Repeat for Credit
N

Typically Offered
Spring

AGCOM 830 - New Media Technology

Credits: 3

This course focuses on the study and application of emerging "new media" technologies to effectively communicate information and market products and programs to general and targeted audiences. Students will study underlying communication theories such as Roger's Theory of Innovation Diffusion to provide a context of how society adopts and incorporates new technology.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 840 - Diffusion of Innovations

Credits: 3

This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introductions, adoption, and diffusion of technological change.

Note
Great Plains Ag*IDEA Course Delivery.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGCOM 844 - Theory in Agricultural Communications

Credits: 3

The study of major communication theories and theorists in the context of agricultural communications.

Repeat for Credit
N

Typically Offered
Fall

AGCOM 845 - Approaches to Public/Community Engagement

Credits: 3

The course will provide students a survey of key concepts and theoretical frameworks associated with deliberative democracy and public engagement. A specific focus will be given to how forms of community-engaged scholarship intersect course content in both theory and practice.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
COMM 845, LEAD 845

AGCOM 850 - Knowledge Management in Agriculture and Natural Resources

Credits: 3

Knowledge Management is a discipline that takes a comprehensive, systematic approach to the information assets of an organization by identifying, capturing, collecting, organizing, indexing, storing, integrating, retrieving and sharing them. This strategy turns an agricultural and natural organization's intellectual assets into greater productivity and increased competitiveness. It encourages collaboration for the sharing of expertise and knowledge of the best practices. This course examines knowledge management as it is emerging and being applied in agriculture and natural resources.

Repeat for Credit
N

Typically Offered
Spring

AGCOM 890 - Master's Project

Credits: 1-2

The project is designed for students to complete a practitioner-based scholarly project that integrates theory, research and application in relationship to a current need or issue approved by the student's supervisory committee. While research is included in this project, the focus will be on demonstrating an ability to apply the knowledge and skills learned within the context of a for-profit or not-for-profit enterprise, school, community, organization or policy process.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGCOM 899 - Master's Thesis

Credits: 1-6

Students investigate an academic problem in their chosen area of interest and document this investigation in a thesis. The investigation integrates and applies knowledge from courses in the program to address unstructured problems. The thesis is a practice in applying scientific criteria on a problem or topic approved by the student's supervisory committee and also is practice in applying scientific methods.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGCOM 916 - Communication Theories and Engagement

Credits: 3

Focusing on the intersections of communication theory and engagement, this course reviews the paradigmatic evolution of communication theories as they relate to culture, organizations, leadership, social influence, emerging media technologies and other pertinent areas. Additionally, students will be exposed to philosophical and theoretical work pertaining to community engaged research.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
COMM 916, LEAD 916

AGCOM 945 - Social Science Research for Public Problem Solving

Credits: 3

This course is a rigorous and applied exploration of the fundamentals of social science research, social sector evaluation, and knowledge mobilization.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
COMM 945, LEAD 945

AGCOM 999 - Research in Leadership Communication

Credits: 1-15

Doctoral research demonstrates the candidate's ability to conduct significant original research related to leadership and communication, to analyze the information obtained from the research, and to present the results in a dissertation format appropriate to the field.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

Cross-listed
COMM 999, LEAD 999

AGEC 100 - Special Topics in Agricultural Economics/Agribusiness

Credits: 0-6

Seminars of special interest. Will be offered upon sufficient

demand in selected areas relating to agricultural economics and agribusiness.

Repeat for Credit
Y

Typically Offered
Fall, Spring

AGEC 105 - Agricultural Economics and Agribusiness Orientation

Credits: 1

Introduction to agricultural economics and agribusiness programs, activities, resources, and careers. Required of all freshmen in agricultural economics or agribusiness at K-State.

Note
Meets first half of the semester.

Repeat for Credit
N

Typically Offered
Fall

AGEC 115 - Decision Tools for Agricultural Economics and Agribusiness

Credits: 2

Development of foundational computer-based empirical skills that address economic and business issues in food and agriculture. Students will learn how to model information on an issue or problem using mathematical spreadsheets to find relevant answers for decision makers and stakeholders.

Note
Two hours recitation per week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 120 - Agricultural Economics and Agribusiness

Credits: 3

A course suggested for all students interested in the agricultural economy. A study of economic principles, with emphasis on their application to the solution of farm, agribusiness, and agricultural industry problems in relationship to other sectors of the United States economy and foreign countries.

Note
Two hours lecture and one hour recitation per week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

Empirical and Quantitative Reasoning
Social Sciences

AGEC 121 - Honors Agricultural Economics and Agribusiness

Credits: 3

A course suggested for all honors students interested in the agricultural economy. A study of economic principles, with emphasis on their application to the solution of farm, agribusiness, natural resource and agricultural industry problems in relationship to other sectors of the United States economy and foreign countries. The course will include extensive discussion, writing, and computer assignments on application of economic principles to real-world problems and issues.

Note
Three hours lecture a week. Prerequisite or instructor permission and eligible for honors program.

Repeat for Credit
N

Requisites
Prerequisite: Admitted to university honors or college scholars program

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 202 - Small Business Operations

Credits: 3

Opportunities in business ownership, principles governing the starting of a small enterprise; importance, status, problems, and management of a small business.

Note
For non-majors.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 or AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Human Diversity within the U.S.

AGEC 220 - Grain and Livestock Marketing Systems

Credits: 3

Survey of the institutions and mechanisms that facilitate and regulate the sale and marketing of grain and livestock commodities. Topics include the physical and informational flows in the commodity supply chains, cash pricing, commodity grades to improve market efficiency and the governmental regulations and agencies influencing commodity trading.

Note
Intended for non-majors.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

AGEC 308 - Farm and Ranch Management

Credits: 3

Decision-making process, cost concepts, farm records and financial management, budgeting, time value of money, and introduction to whole farm/ranch planning.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 315 - Contemporary Issues in Global Food and Agricultural Systems

Credits: 3

A survey of contemporary economic issues affecting world agricultural systems including population growth, trade, globalization, natural resource and environmental policy.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120, AGEC 121, ECON 110, or ECON 120.

Typically Offered

Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

AGEC 318 - Food and Agribusiness Management

Credits: 3

A study of marketing, production, risk, human resource management, and financial management in agribusiness firms. Particular attention is given to the application of economic principles to the management of marketing and farm supply firms.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120; and MATH 100.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 411 - Agricultural Policy

Credits: 3

Institutional and analytical treatment of historical and current economic problems, public policies and government programs affecting agriculture and rural America.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120 or ECON 110.

Typically Offered
Fall

K-State 8
Historical Perspectives

AGEC 420 - Commodity Futures

Credits: 3

This course is designed to introduce students to the purpose, operation, and use of commodity futures and options markets. The objectives are to: (1) understand why futures exchanges and commodity futures contracts exist; (2) understand and be able to forecast basis; (3) understand hedging and be able to design hedging strategies for various commodity producers and users; (4) understand both put and call options and their potential use in a commodity risk management program; and (5) understand the usefulness and shortcomings of fundamental and technical analysis.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

AGEC 441 - Agricultural Economics and Agribusiness Seminar

Credits: 1-18

Seminars of special interest will be offered upon sufficient demand in selected areas relating to agricultural economics and agribusiness or competitive teams qualifying for academic credit.

Repeat for Credit
Y

Typically Offered
Other

AGEC 445 - Agribusiness Internship

Credits: 1-3

Approved and supervised work-study programs in various areas of agribusiness.

Note

Project reports required. Instructor permission.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGEC 450 - Agricultural Economics and Agribusiness Problems

Credits: 1-18

Agricultural Economics and Agribusiness Problems

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGEC 460 - International Food and Agribusiness Study Tour

Credits: 0-6

An experiential learning course to prepare students for and to immerse them in an international study tour of selected food and agribusiness industries. The topics vary by the tour and the industries studied.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

AGEC 470 - Cooperative Management

Credits: 3

This course focuses on the unique aspects of the cooperative business model and its evolution over time. Students will utilize course material to gain a deeper understanding of the history and need for cooperatives by applying economic, finance, marketing, and management tools to cooperatives.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

AGEC 480 - Farm and Ranch Income Tax Management

Credits: 3

This course introduces unique income tax provisions that apply to commercial agricultural producers. Students will better understand the importance of accounting records, the income tax impact of farm management decisions, and tools available to manage income taxes. Emphasis will also be placed on the importance of considering income taxes when planning for transition of the family farm or ranch from one generation to the next.

Note
3 hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231,and AGEC 308 or AGEC 318

Typically Offered
Fall

AGEC 500 - Production Economics

Credits: 3

Application of economic principles to problems of agricultural production. Analysis of consumer demand for agricultural products and input and output decisions of the agricultural firm. AGEC 505 is a continuation of this course and they are intended to be taken in consecutive

semesters.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120 and MATH 205. Recommended Foundation Course: AGEC 115.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 501 - Data Analysis and Optimization

Credits: 3

Analysis of agricultural business and economic data and optimization for decision making. Study applications of regression, time series analysis and forecasting to agricultural and economic data. Introduction to mathematical programming to model optimization of problems commonly encountered in agricultural economics.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 115, AGEC 120 or AGEC 121 or ECON 120, MATH 205, STAT 250.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 505 - Agricultural Market Structures

Credits: 3

Theory and application of economic principles to marketing problems in agriculture. Pricing of agricultural output and productive services under various forms of economic organization and competition; regional specialization, location, and trade; determinants of economic change; evaluation of economic and consumer welfare.

Note
Three hours lecture.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120 and MATH 205 and AGEC 500. Recommended Foundation Course: AGEC 115.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 513 - Agricultural Finance

Credits: 3

Analysis of capital investments, interpretation of financial statements, capital structure considerations for agricultural firms, and farm real estate pricing.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 308 or AGEC 318 and ACCTG 231. Recommended Foundation Course: AGEC 115.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 515 - Food and Agribusiness Marketing

Credits: 3

A broad view of marketing; food markets and consumption; marketing functions and institutions; prices, competition, and marketing costs; functional and organizational issues; food marketing regulations; commodity marketing.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 516 - Agricultural Law and Economics

Credits: 3

The legal framework for decision making by farm firms, families, and individuals; liabilities, real and personal property, contracts, uniform commercial code, organization of farm firms, intergeneration property transfers, water law, fence law, federal and state regulatory power, insurance, income tax, and social security.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 or AGEC 120 or AGEC 121 or ECON 120 and junior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

AGEC 520 - Market Fundamentals and Futures/Options Trading

Credits: 3

This is an experiential course in the trading of commodity futures and options. Attention is focused on the study of market price determination, the implications of market efficiency notions, and on actual trading of futures and options. Students invest in a commodity educational trading fund. Class approves recommendations by vote, orders are placed with a broker, and the class monitors open trades. The pool balance at the end of the semester is redistributed to students.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 420.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AGEC 525 - Natural Resource and Environmental Economics

Credits: 3

Emphasis on the application of demand, supply, and price concepts in the study of natural resource use, policies, and management. Interdependence between environmental quality and economic actions are examined through discussion of property rights, economic incentives, externalities, and economic components of environmental policies.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120 or ECON 110 and junior standing.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 535 - Agricultural Sales

Credits: 3

Agricultural Sales will introduce students to the role of sales and sales management in the agricultural industry.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or ECON 120 or AGEC 121 or ECON 110.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

AGEC 541 - Agricultural Economics and Agribusiness Seminar

Credits: 0-18

Seminars of special interest will be offered upon sufficient demand in selected areas relating to agricultural economics and agribusiness.

Repeat for Credit
Y

Typically Offered
Other

AGEC 550 - Undergraduate Research in Agricultural Economics

Credits: 0

Mentored undergraduate research experience in agricultural economics and agribusiness.

Note
Consent of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120

Typically Offered
Fall, Spring, Summer

AGEC 560 - Data Analytics for Agricultural Economics

Credits: 3

Advanced collection and applied analysis of agricultural business and economics data for decision making. Applied communication of results and implications.

Note
Students who have not completed AGEC 501 may secure instructor consent if they can verify a working knowledge of regression.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 501

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics

Credits: 3

Advanced study of the economic and business aspects of the food industry from processing to distribution to retailing. Emerging trends in nutrition, food consumption, food safety and supply chain arrangements along with management and marketing issues in the food industry will be studied.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 318 or MANGT 220.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

AGEC 598 - Farm Management Strategies

Credits: 3

A study of management concepts, tools, and decision strategies applied to farm firms. Alternative measures of farm business performances, as well as planning and evaluation techniques for an uncertain environment, are examined.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 308, AGEC 500, and AGEC 513 or FINAN 450.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

AGEC 599 - Food and Agribusiness Management Strategies

Credits: 3

This course integrates the risk, production, marketing, and financial management strategies of agribusiness firms. Special attention is given to the application of economic theory and quantitative analysis to business decision-making processes. In addition to case studies, a variety of analytical techniques will focus on both markets and firms involved in the production and marketing of food commodities.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 318, AGEC 500, and either AGEC 513 or FINAN 450. Recommended Foundation Course: AGEC 515.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

AGEC 605 - Price Analysis and Forecasting

Credits: 3

The analysis of selected agricultural prices; application of regression analysis to price analysis, the role of futures markets and market efficiency, optimal hedging strategies, commodity option pricing, and price forecasting.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: A course in statistics; AGEC 501; AGEC 505 or ECON 520.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

AGEC 610 - Current Agriculture and Natural Resource Policy Issues

Credits: 3

Current issues in agricultural and natural resource policy from divergent perspectives. Classroom discussion, debate, writing assignments, and student presentations. Current events are analyzed and synthesized from both economic and noneconomic perspectives. Topics may include environmental issues, international agricultural development, the politics of farm programs, and the relationship between technology, agriculture, and society.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 505 and either AGEC 525 or AGEC 411.

Typically Offered
Fall

K-State 8
Social Sciences

AGEC 615 - Global Agricultural and Economic Development

Credits: 3

This course covers contemporary challenges in global development, with an emphasis on agricultural issues. Students will analyze problems using economic models, and develop empirical skills by learning key data collection concepts, and working with survey data. Topics include poverty, technology adoption, agricultural policy, health, and program evaluation.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 315 and AGEC 500.
Prerequisite OR Corequisite: AGEC 501.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

AGEC 623 - International Agricultural Trade

Credits: 3

Applied economics of agricultural trade. Emphasis on why trade occurs, current agricultural trade patterns, the effects of agricultural policy on trade, and the institutions of trade.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 505.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

AGEC 632 - Agribusiness Logistics

Credits: 3

Planning for efficient use of transportation, storage and processing facilities in the handling of raw materials and products for agribusiness firms, controlling shipments and inventory in coordination with warehouse and handling operations, and scientific selection of routes, schedules, and equipment.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120, and junior standing.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Historical Perspectives

AGEC 641 - Agricultural Economics and Agribusiness Seminar

Credits: 1-18

Seminars of special interest will be offered upon sufficient demand in selected areas relating to agricultural economics and agribusinesses.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and instructor permission.

Typically Offered
Other

AGEC 680 - Risk Management

Credits: 3

Analytical concepts and quantitative tools to make better decisions in risky situations. Identifying various types of risk an operation faces, measuring the degree of risk, and exploring ways to manage risk. Includes portfolio analysis, futures and options, contracting, and insurance. Emphasis on computer applications. Topics are focused on agriculture

but are applicable to other industries and household decisions.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 420, AGEC 513 or FINAN 450, and a course in statistics.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AGEC 700 - Applied Agribusiness Economics

Credits: 3

Applications of economic principles to problems of agricultural production and agribusinesses. Demand theory and economic forecasting will be used to examine changes in demand and business trends. Cost minimization and profit maximization will be used to examine firm and market issues.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100, ECON 120 or AGEC 120.

Typically Offered
Summer

AGEC 701 - Introduction to Computer Decision Tools for Agribusiness

Credits: 1

Development of decision tools for agribusiness using spreadsheets. Topics include internet as a data source, budget development and analysis, financial calculations, regression, search techniques, and optimization.

Repeat for Credit
N

Requisites
Prerequisite: CIS 110.

Typically Offered
Spring

AGEC 710 - Comparative Food and Agriculture Systems

Credits: 3

This course provides a comparative analysis of the business and economic situation of the food and agriculture sector around the world. The course will cover the European Union, the Former Soviet Union, MERCORSUR, and Southeast Asia, Oceania and possibly other regions. The course will focus briefly on the historical development, the current situation, and the future outlook of the food and agriculture sector. Upon completion of this course, students will be able to evaluate the comparative advantage of the United States in the production of food and fiber.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or AGEC 121 or ECON 120.

Typically Offered
Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

AGEC 712 - Optimization Techniques for Agricultural Economics

Credits: 3

Application of optimization techniques including linear programming and nonlinear programming for research and decision analysis in agricultural economics.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 500 and AGEC 501, or graduate standing.

Typically Offered
Spring

AGEC 713 - Agribusiness Financial Management

Credits: 3

This course covers financial management, long-term investment analysis, the performance of alternative investments, and the theory of efficient markets. Topics covered include comparative financial analysis, short-term budgeting, and capital budgeting. Applications include agribusiness decision making and project analysis.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231, AGEC 513.

Typically Offered
Spring

AGEC 720 - Agribusiness Risk Management

Credits: 3

Various forms of risk inherent to firms operating in agricultural and food product markets are explored. Risk management techniques including diversification, insurance, forward contracting, hedging and options are examined through applied problems with the use of simulation. Emphasis is placed on managing risk associated with input prices, output prices, enterprise organization and financial instruments.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 713 and AGEC 761.

Typically Offered
Fall

AGEC 730 - Applied Agribusiness Logistics

Credits: 3

A study of agribusiness logistics and the fundamental concepts underpinning logistical decisions and their impact on a firm's sustainability. Topics include supply chain management, transportation and storage, contracting and out sourcing, strategic logistic planning, network analysis, and B2B e-commerce in food and agriculture. Focus will be on agribusiness logistics issues in grain and grain-based food supply chains and in the livestock and meat supply chains, including global logistics.

Repeat for Credit
N

Requisites
Prerequisite: AGEC 120 or ECON 120, and AGEC 505.

Typically Offered
Spring

AGEC 735 - Sales and Marketing in the Global Animal Health Industry

Credits: 3

This course is designed to introduce students to marketing and sales in the complex world of animal health industry. Understanding product life cycles; product development; forecasting; planning; positioning and branding; as well as promotion and compliance. Markets addressed include business to business food animal markets and companion animal consumer markets.

Repeat for Credit
N

Typically Offered
Summer

AGEC 740 - Seminar in Agricultural Economics Analysis

Credits: 0-18

Seminar on methods of economic analysis.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGEC 750 - Agricultural Economics and Agribusiness Problems

Credits: 1-18

Agricultural Economics and Agribusiness Problems

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of the instructor.

Typically Offered
Fall, Spring, Summer

AGEC 751 - Risk Management Fellows Seminar

Credits: 1

This course serves as The Center for Risk Management Education and Research Student Fellows seminar course. Students will conduct a risk management research project.

Note
Consent of the instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing, admitted to the Risk Management Fellows Program

Typically Offered
Fall, Spring, Summer

AGEC 760 - Applied Econometric Analysis

Credits: 3

Use of econometrics to enhance agribusiness decision making is the focus. Concepts of simple and multiple regression and limited dependent variable models are presented. Econometric issues of functional form, relevant variables, predictive performance, and model diagnostics will be examined. Numerous applications of techniques to agribusiness problems are used.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 and AGEC 701.

Typically Offered
Spring

AGEC 761 - Optimization Techniques for Agribusiness

Credits: 2

This course is an introduction to optimization techniques designed to provide quantitative support for agribusiness decision making. Upon completion of this course, students will be able to construct and evaluate optimization models useful for evaluating linear problems, integer problems, and nonlinear program.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 and AGEC 701.

Typically Offered
Fall

AGEC 770 - International Agribusiness and Policy Analysis

Credits: 3

Policies affecting agribusiness firms will be examined. These topics may include U.S. agricultural policies, fiscal and monetary policies, international trade agreements, environmental issues, and current policies influencing agribusiness firms.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 and AGEC 701.

Typically Offered
Fall

AGEC 780 - Economics of the Global Animal Health Industry

Credits: 3

Economic Issues in the Global Animal Health Industry (AGEC 780) provides a forum to study the economics and business challenges and opportunities confronting the animal health industry. Policy issues in the various significant animal sectors are examined to provide tools to develop the appropriate responses to ensure **sustainable superior performance**.

Repeat for Credit
N

Typically Offered
Spring

AGEC 805 - Agricultural Marketing

Credits: 3

The study of the demand for supply of agricultural commodities, alternative market structures, the dynamics of marketing institutions that affect market structures, governmental intervention in agricultural markets, futures markets in agriculture, and international agricultural commodities trade.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 505 or ECON 520.

Typically Offered
Spring

AGEC 810 - Price, Income and Trade Policies in Agriculture

Credits: 3

This course examines the effects of agricultural policies on the welfare of society and the distribution of benefits and costs within the global market. Modern tools are developed to examine the causes and consequences of policies.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 500 or ECON 520, ECON 510.

Typically Offered
Spring

AGEC 812 - Advanced Farm Economics

Credits: 3

A study of managerial techniques and processes applied to farm firms involved in production and marketing of agricultural products. This study includes managerial planning, evaluation, and control of farm businesses.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 308.

Typically Offered
Fall

AGEC 815 - International Agricultural Development

Credits: 3

To study the principles of economic development when applied to the development of the agricultural sector. This includes the examination of national and international strategies and policies that inhibit and/or encourage the development of the agricultural sectors in low income countries. Individual study is encouraged to meet student interest: (a) in understanding the process and including an appreciation of the interdependence between low and high income countries and (b) receiving an introduction to agricultural project analysis.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 500 or ECON 520.

Typically Offered
Spring-Even Years

AGEC 823 - Production Economics II

Credits: 3

Economic theories of choice under conditions of imperfect knowledge (i.e. under risk and uncertainty) and the application of these theories to production decisions.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 500 or consent of instructor.

Typically Offered
Fall

AGEC 825 - Natural Resource Policy

Credits: 3

The economic tolls of welfare analysis, non-market valuation, and dynamics are used to evaluate natural resource use, natural resource policies, and conflicts among users, conservationists, and preservationists.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 505 or ECON 520; and MATH 205.

Typically Offered
Fall

AGEC 840 - International Markets and Agricultural Trade

Credits: 3

International Markets and Agricultural Trade bridges the fundamental concepts of international trade with the practical analysis of trade policies. The course seeks to develop a solid foundation for future practitioners at industry or public institutions and for those who will undertake more in-depth empirical research involving trade issues.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 720.

Typically Offered
Fall

AGEC 880 - Agribusiness Industry Structures

Credits: 3

Applied industrial organization and competitive relationships in agriculture markets. Emphasis on the role of bargaining power, vertical coordination and integration, contracting, and other forms of vertical control. Product differentiation, branding and advertising of commodities and anti-trust laws.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 720, ECON 830 (or concurrent enrollment).

Typically Offered
Spring

AGEC 890 - Advanced Food and Agribusiness Management

Credits: 3

The objective of the course is to demonstrate how economic concepts underscore strategic management principles. Applications to food and agribusiness firms are used to show how managers and firms function when the assumptions of perfect competition are relaxed. Students will complete a market analysis study as part of the course requirements.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 599.

Typically Offered
Fall

AGEC 898 - Agricultural Economics Master's Report

Credits: 1-18

Master's report.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGEC 899 - Agricultural Economics Master's Research

Credits: 1-18

Research for master's thesis.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGEC 901 - Research Methods in Economics

Credits: 3

A study of scientific methodology in economic research including the history of various debates regarding methodology in economics. The course also deals with problem definitions, formulation of hypotheses, listing of hypotheses, and presentation of research results.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring

AGEC 905 - Agricultural Demand and Commodity Marketing

Credits: 3

A study of the demand for and supply of farm products, price information and markets, the causes of price variations and instability, the dynamic analysis of agricultural prices.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: AGEC 805, ECON 930, ECON 945.

Typically Offered
Spring

AGEC 923 - Economics of Agricultural Production

Credits: 3

A study of agricultural production response to prices; methods of estimating supply response and price expectations; the effects of government and institutions on agricultural supply and the role of risk, technical change, and the number and size of farms on agricultural supply.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 830, AGEC 823, ECON 945.

Typically Offered
Fall

AGEC 925 - Advanced Resource and Environmental Economics

Credits: 3

Dynamics analysis of natural resource and environmental problems, including the optimal extraction of nonrenewable resources, optimal management of renewable resources, and the optimal regulation of stock pollutants.

Note
Three hour recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 905, ECON 945.

Typically Offered
Spring

AGEC 936 - Quantitative Topics in Agricultural Economics

Credits: 3

A study of recent developments reported in the literature concerning quantitative methods of analysis in agricultural economics and economics. The study will include assigned projects to apply selected techniques of analysis.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 930.

Typically Offered
Spring

AGEC 940 - Seminar in Agricultural Economics

Credits: 1-18

Problems and current developments in agricultural economics.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGEC 955 - Independent Study of Advanced Topics in Agricultural Economics

Credits: 1-18

Advanced independent study of an agricultural economics topic based upon a student proposal approved by the student's supervisory committee

Repeat for Credit
Y

Requisites
Prerequisite: Completion of 24 credits of graduate study.

Typically Offered
Fall, Spring, Summer

AGEC 999 - Agricultural Economics PhD Research

Credits: 1-18

Research for Ph.D. Dissertation.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGED 100 - Orientation in Agricultural Education

Credits: 1

Develop an understanding to the expectations of college and program responsibilities. A foundation of the high quality teaching and secondary agriculture programs. Active learning will include discussions, applications and a day long tour of education systems.

Note
Required of all freshmen entering the Agricultural Education major.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education majors only

Typically Offered
Fall

AGED 101 - Foundations of Diversified Agriculture

Credits: 1

Exploration of the program requirements, responsibilities, methodology, organization, current trends, and issues. Active involvement in discussions of the agriculture industry and design a program plan to meet career aspirations.

Repeat for Credit
N

Typically Offered
Fall

AGED 210 - Equipment and Material Management

Credits: 1

Provides a foundation for teaching and managing laboratories related to power, structural and technical systems. Laboratory safety procedures and practices will be applied to the instructional setting. Includes material selection & management, project planning & design and facility management.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education Major.

Typically Offered
Fall, Spring

AGED 286 - Topics in Agricultural Education

Credits: 0-3

Examination of current topics in undergraduate agricultural communications.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGED 296 - Problems in Agricultural Education

Credits: 1-3

Independent guided studies in any of the many fields associated with agricultural education.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGED 300 - Introduction to Agricultural Education

Credits: 1

Introduction to the program responsibilities, methodology, organization, current trends and issues, and future direction of programs in agricultural education. Students will be actively involved in the discussion and application of course material both in the classroom and in early field experiences conducted as a part of this course.

Repeat for Credit
N

Typically Offered
Fall

AGED 301 - Diversified Agriculture Foundations

Credits: 1

Discussion and exploration of the program requirements, distance learning considerations, organization, current trends, and issues. Design a program plan to meet career aspirations in the agriculture industry.

Repeat for Credit
N

Typically Offered
Fall, Spring

AGED 305 - Field Experience in Agricultural Education

Credits: 1

A course for prospective teachers to help bridge the gap between classroom theory and student teaching. Emphasis will be on observation of and participation in school and community organizations and programs.

Repeat for Credit
N

Requisites
Prerequisite: AGED 100 or AGED 101 or AGED 300 or AGED 301 or concurrent enrollment.

Typically Offered
Fall, Spring

AGED 400 - Leadership and Professional Development in Agricultural Education

Credits: 2

This course provides an introduction to the leadership skills needed in the role of FFA advisor and professional agricultural educator including career, professional, and student leadership development and FFA chapter management.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education Major

Typically Offered
Spring

AGED 430 - Leadership Development in Agricultural Youth Organizations

Credits: 3

Facilitate leadership development in youth through participation in FFA. Explores youth development stages, how to help youth grow their leadership skills through agriculture youth organizations and activities, and organizational structures.

Repeat for Credit
N

Requisites
Agricultural Education majors only

Typically Offered
Fall or Spring

AGED 433 - Agricultural Project Management

Credits: 3

Applied project management methodology, tools, and techniques for agricultural industries. Project organization, planning, execution, and communications; the project life cycle; risk analysis; and best practices in project management.

Repeat for Credit
N

Typically Offered
Fall or Spring

AGED 434 - Undergraduate practicum in agricultural-related occupations

Credits: 1-3

Related occupational or professional experiences in approved industry, school, Cooperative Extension Service, or similar agency setting under faculty supervision.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Summer

AGED 486 - Topics in Agricultural Education

Credits: 0-3

Examination of current topics in undergraduate agricultural education.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGED 490 - Undergraduate Research in Agricultural Education

Credits: 0-3

This course uses qualitative, quantitative or mixed methods to conduct an agricultural education research project. A faculty supervisor will assist students through the stages of identifying, conducting and reporting the results of a social science research project connected to an agricultural

education topic.

Note
Instructor permission

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGED 500 - Methods of Teaching Agriculture in the Secondary and Middle Schools

Credits: 3

Principles of teaching applied to content area instruction in the secondary and middle schools; motivation; organization of subject matter; lesson planning; evaluation and reporting; challenging the levels of ability; organization and management of the classroom; methodology and materials of the secondary schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDSP 323, and EDCI 320. Concurrent enrollment required for EDSEC 455, EDSEC 477, AGED 520, AGED 600, and EDSEC 525.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AGED 520 - Block II Lab: Content Area Methods and Field Experience

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate agricultural education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDSP 323, and EDCI 320. Concurrent enrollment required for EDSEC 455, EDSEC 477, AGED 500 and EDSEC 525.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AGED 533 - Educating the Public about Agriculture

Credits: 3

Organization and preparation of materials and methods used in educating public audiences about agriculture through non-formal settings, businesses, and extension disciplines.

Repeat for Credit
N

Typically Offered
On sufficient demand

AGED 537 - Planning Programs in Extension & Non-Formal Education

Credits: 3

Principles and procedures used in planning and conducting Extension programs. Including workshops, traninings, and 4-H programing.

Repeat for Credit
N

Typically Offered
Fall, Spring

AGED 600 - Senior Seminar in Agricultural Education

Credits: 1

Discussion and application of Block II learning outcomes in the student to professional educator transition. Topics will include professional development, licensure, professional opportunities and the community of Agricultural and Extension Education.

Repeat for Credit
N

Requisites
Requisite: AGED 500

Typically Offered
Fall

AGED 615 - Laboratory Instructional Techniques in Teaching AgriScience

Credits: 3

Provides knowledge and skills to design, organize, and conduct programs in agriscience instruction in secondary agricultural education. Experiences in lab planning, safety and student management.

Repeat for Credit
Y

Typically Offered
Fall, Summer

AGED 620 - Principles and Philosophy in Agriculture and Career and Technical Education

Credits: 2

Principles of career and technical education in Kansas and other states and countries; principles and philosophy underlying such education, relation of career and technical education to school objectives and community, state, and national needs.

Repeat for Credit
N

Typically Offered
Fall, Summer

Cross-listed
EDSEC 620

K-State 8
Historical Perspectives

AGED 621 - Program Planning in Agricultural Education

Credits: 3

The program development and planning process; development of guides for teaching and evaluating reimbursable secondary programs.

Repeat for Credit
N

Requisites
Agricultural Education majors only.

Typically Offered
Fall

AGED 625 - Inquiry-Based Curriculum in Agricultural STEM and Biotechnology Education

Credits: 2

Provides students with knowledge of inquiry-based techniques related to STEM and Biotechnology in the context of Agriculture. Students will experience activities, labs, and projects developed for inclusion in secondary agriculture classrooms. The learning environment will be grounded in specific agricultural content area, offered on a rotational basis (ex.comprehensive agriculture, animal systems, plant systems, ag power and technology, etc).

Repeat for Credit
Y

Requisites
Agricultural Education Majors only

Typically Offered
Fall, Summer

AGED 630 - Exploration of Global Agricultural Education

Credits: 3

Education Abroad for the exploration of the agriculture industry and agricultural education system in an international location.

Repeat for Credit
Y

Typically Offered
Spring, Summer

AGED 635 - Inquiry and Literacy in Agricultural STEM and Biotechnology

Credits: 3

Knowledge of inquiry-based instruction in STEM and Biotechnology in the context of Agriculture. Literacy and reading techniques will be highlighted. Includes activities, labs, projects, and literacy developed for inclusion in secondary agriculture classrooms.

Repeat for Credit
N

Requisites
Agricultural Education majors only

Typically Offered
Fall or Spring

AGED 704 - Extension Organization and Programs

Credits: 3

Development and objectives of Cooperative Extension and other university adult education programs; with emphasis on programs and procedures.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
On sufficient demand

AGED 705 - Organization Problems in Teaching Agricultural Mechanics

Credits: 2-3

Analysis of the agricultural mechanics course of study; needs and interests of students; learning difficulties; skills and technical knowledge required; correlation with agriculture; application of laws of learning to the teaching process; determination of objectives.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 586.

Typically Offered
On sufficient demand

AGED 706 - Principles of Teaching Adults in Extension

Credits: 3

Methods and principles of adult teaching with emphasis on Cooperative Extension Service; application to various adult education programs.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
On sufficient demand

AGED 732 - Leadership Analysis Through Film

Credits: 3

Builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films.

Repeat for Credit
N

Typically Offered
Summer

AGED 734 - Practicum in Agriculture-Related Occupations

Credits: 1-6

Related occupational or professional experiences in approved industry, school, Cooperative Extension Service, or similar agency setting under faculty supervision.

Note

Consent of instructor

Repeat for Credit
N

Typically Offered
On sufficient demand

AGED 735 - Methods of Technological Change in Agriculture

Credits: 3

Structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introductions, adoption, and diffusion of technological change.

Repeat for Credit
N

Typically Offered
Fall, Spring

AGED 736 - Practicum in Extension Education

Credits: 1-6

Related occupational or professional experiences in approved industry, school, Cooperative Extension Service, or similar agency setting under faculty supervision.

Note
Consent of instructor

Repeat for Credit
N

Typically Offered
On sufficient demand

AGED 737 - Teaching Diverse Learners in Agricultural Education

Credits: 3

Practical application of learning theories as they apply to diverse learners. Specific instruction relevant to secondary agricultural instructors such as Supervised Agricultural Experience Projects through the lens of diverse students, global leadership and intercultural competence.

Repeat for Credit
N

Typically Offered
Summer

AGED 738 - Assessing Learning in Agricultural Education

Credits: 3

Develop an understanding and application of assessment relevant to agricultural education. Students develop, administer, and analyze formal, informal, and performance assessment techniques to monitor and evaluate student learning and guide modification.

Repeat for Credit
N

Typically Offered
Spring

AGED 786 - Topics in Agricultural Education

Credits: 1-3

Examination of current topics in agricultural education.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGED 790 - Agricultural Education Methods and Practicum for Teaching and Learning

Credits: 3

Principles of teaching applied to agriculture education instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: Must be enrolled in Graduate Certificate for Teaching and Learning or Master of Arts in Teaching.

Typically Offered
Fall

AGED 797 - Agricultural Education Colloquium I

Credits: 2

This course explores key concepts within the field of Agricultural Education. Focus will be on advancing the development of disciplinary content knowledge and pedagogical content knowledge.

Repeat for Credit
N

Requisites
Prerequisite: Enrolled in the Master of Arts in Teaching program.

Typically Offered
Summer

AGED 798 - Agricultural Education Colloquium II

Credits: 2

This course explores additional key concepts within the field of Agricultural Education. Focus will be on advancing the development of disciplinary content knowledge and pedagogical content knowledge.

Repeat for Credit
N

Requisites
Prerequisite: AGED 797. Enrollment in the Master of Arts in Teaching.

Typically Offered
Fall

AGED 799 - Agricultural Education Colloquium III

Credits: 2

Class explores the content knowledge of the candidate in regards to the Agricultural Education content curriculum, identifies areas of strength and weakness in content knowledge, and provides enrichment and remediation to prepare the candidate for the internship experience.

Repeat for Credit
N

Requisites
Prerequisite: AGED 798. Enrollment in the Masters of Arts in Teaching.

Typically Offered
Intersession

AGED 800 - Research Methods in Agricultural Education and Communications

Credits: 3

This graduate-level course will focus on applying the principles, practices, and strategies for conducting research in the social sciences, particularly dealing with the interface of the human dimension in the agricultural and natural sciences.

Note
Great Plains Ag*IDEA Course Delivery.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGED 810 - Social Data Analysis in Communications and Agricultural Education

Credits: 3

A course in measurement and analysis as related to social science research and evaluation. The course takes an applied approach to organizing data, analyzing data according to research and evaluation objectives and/or hypotheses, using descriptive and inferential statistics, and interpreting data. Students gain practical experience in data entry and using SPSS for calculating statistics through laboratory exercises.

Repeat for Credit

N

Typically Offered
Fall

AGED 820 - History and Philosophy of Agricultural and Extension Education

Credits: 3

The primary purpose of this course is to provide the student with an examined grounding in the seminal events and people in the history of agricultural and extension education (history), principle divisions of thought (philosophies), and decisions made (policy), resulting in the current state of affairs in agricultural and extension education. The convergence of these factors has a notable impact on the current challenges and future direction of agriculture and extension education.

Note
Great Plains Ag*IDEA Course Delivery.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGED 823 - Agricultural Education for Beginning Teachers

Credits: 1-3

Securing and organizing information and planning teaching activities which will help the beginning vocational agriculture teacher.

Repeat for Credit
N

Requisites
Prerequisite: Graduation from the curriculum in agricultural education.

Typically Offered
Fall, Spring

AGED 824 - Young Farmer and Adult Farmer Education in Agriculture

Credits: 2-3

Organization, objectives, and procedures of conducting young farmer and adult farmer classes. Designed for teachers in service.

Note
Experience in teaching vocational agriculture.

Repeat for Credit
N

Typically Offered
On sufficient demand

AGED 830 - The History and Leadership of the Land Grant University

Credits: 3

The course will provide a historical overview of the evolution and development of land-grant colleges/universities. It will reflect on the fundamental beliefs of those who conceptualized and implemented the land-grant college and university system. The course will enable students to examine early public mandates and subsequent successes of these special institutions of higher education, as well as evaluate significant education, research, and public service developments and new initiatives needed for land-grants to effectively serve society in the future. It is expected that students will gain an understanding of and benefits derived from the institutions that comprise the land-grant college and university family, as well as envision developments and opportunities that will mold the future of these special institutions that represent the land-grant legacy.

Repeat for Credit
N

Typically Offered
Fall

AGED 831 - Survey Development in Agricultural Education and Communications

Credits: 3

Provide the expertise required to design and conduct survey research. Instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments, SPSS and Qualtrics.

Repeat for Credit
N

Typically Offered
Summer

AGED 832 - Foundations and Theory of Agricultural Leadership

Credits: 3

Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes.

Repeat for Credit
N

Typically Offered
Fall

AGED 834 - International Agriculture and Extension Education

Credits: 3

This course focuses on a broad range of topic areas in the field of extension education as it impacts agriculture and rural community development. The primary purpose is to further students' understanding about extension systems' influence on agricultural development and the interface of agriculture with rural communities throughout the world. Emphasis will be placed upon research, theory, history and conceptual models of extension for establishing a strong philosophical foundation.

Repeat for Credit
N

Typically Offered
Spring, Summer

AGED 838 - Qualitative Design in Agricultural Education and Communications

Credits: 3

Overview of philosophies, approaches toward, design, data collection, analysis and reporting of qualitative research.

Repeat for Credit
N

Typically Offered
Fall, Spring

AGED 840 - Advanced Theory and Methods of Teaching Agriculture

Credits: 3

This course will use contemporary and foundational theory and research on teaching and learning processes in the application and organization of instructional methods and techniques in formal and non-formal educational settings particularly in agriculture, food and natural resources disciplines.

Repeat for Credit
N

Typically Offered
Fall, Spring

AGED 850 - Curriculum Development in Agriculture I

Credits: 2-3

Curriculum problems; planning local programs in agriculture; developing facilities and plans for meeting current and advanced problems in the teaching of agriculture.

Note
One year of teaching in agriculture.

Repeat for Credit
Y

Typically Offered
Spring

AGED 852 - Curriculum Development in Agriculture II

Credits: 2-3

Continuation of AGED 850.

Repeat for Credit
Y

Requisites
Prerequisite: AGED 850.

Typically Offered
Summer

AGED 855 - Field Studies in Agricultural Education

Credits: 2-3

Planning, organizing, and coordinating the various phases of the local program of vocational education in agriculture.

Note
Experience in teaching agriculture.

Repeat for Credit
Y

Typically Offered
On sufficient demand

AGED 858 - Program Planning and Evaluation in Agricultural and Extension Education

Credits: 3

This course is designed for students who are interested in the development and evaluation of agricultural and extension education programs. The course is designed to help students in the following areas: Acquire an understanding of program development from theory to practice; Strengthen their skills in planning, designing, implementing, evaluating, and accounting for educational programs of targeted audiences; and Provide application of program planning and evaluation concepts through experiential learning and class projects.

Repeat for Credit
N

Typically Offered
Spring

AGED 859 - Management of Volunteers in Agricultural and Extension Education

Credits: 3

This course is intended to prepare students to be effective managers of volunteer programs, or to challenge those students already engaged in those roles to improve on their existing skills. Theory will be emphasized in the course, only in so much as it is essential to be grounded in theory in order to apply it. Major topics of the course will include, but are not limited to: volunteer recruitment, training, evaluation and reward. This is an active course where students will be required to be active in and outside of class sessions.

Repeat for Credit
N

Typically Offered
Summer

AGED 860 - Program Evaluation in Agricultural and Extension Education

Credits: 3

Evaluation principles, models, and procedures used in developing and analyzing agricultural, vocational, technical, and extension education programs; role of comprehensive evaluation in needs assessments, program planning, program implementation, and the marketing of outcomes to major stake-holders; designs for evaluating agricultural and extension programs. Evaluation logic model is presented to identify and describe program inputs, activities, outputs, and outcomes.

Note
Great Plains Ag*IDEA Course Delivery.

Repeat for Credit
N

Typically Offered
Spring

AGED 880 - Portfolio Development in Agricultural Education and Communications

Credits: 0-1

The final semester of the MS in Ag Ed and Comm non-thesis/project option requires the completion of a portfolio. Completion, scoring and tracking will be completed through this course.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGED 890 - Master's Project

Credits: 1-3

Students select and prepare a project designed to improve their professional practice. It may be the construction of a professional portfolio or project to represent the student's learning throughout the master's degree program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGED 899 - Master's Thesis

Credits: 1-6

A master's thesis presents the results of an original investigation or a problem or topic within the student's classroom or educational field approved by the candidate's supervisory committee.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 101 - Agronomy Orientation

Credits: 1

Introduction to agronomy options, activities, resources, and careers. Required of all freshmen in agronomy at K-State.

Note
One hour lecture per week.

Repeat for Credit
N

Typically Offered
Fall

AGRON 115 - Special Topics in Agronomy

Credits: 1-6

Discussion and lectures on selected topic areas related to Agronomy.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 120 - Crop Science

Credits: 3

Principles underlying practices used in the culture of grain and forage crops. Crop classification, structure, growth, and improvement. Crop response to environmental factors, soils, and pests and associated management practices. A basic course for majors in agronomy and others interested in crop production.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

AGRON 121 - Crop Science Laboratory

Credits: 1

Hands-on application of principles underlying practices used in the culture of grain and forage crops. Crop classification, crop botany, crop development, crop management, and problem solving for majors in agronomy and others interested in crop production.

Repeat for Credit
N

Requisites
AGRON 120 or concurrent enrollment

Typically Offered

Fall, Spring

K-State Core
4 Natural and Physical Sciences

AGRON 202 - Introduction to Precision Ag Software

Credits: 3

Introduction to software commonly used for the management and analysis of various forms of agronomic data pertaining to soils, crops, and weather for the purpose of generating site-specific recommendations in crop production.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AGRON 205 - Soils

Credits: 3

Fundamental chemical, physical, and biological properties of soils; significance of these properties to soil classification and mapping, soil-plant relationships, soil management, and the environment.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 or 210.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

AGRON 206 - Soils Laboratory

Credits: 1

Hands-on lab and field experience in fundamental chemical, physical, and biological properties of soils; significance of these properties to soil classification and mapping, soil-plant relationships, soil management, and the environment.

Note
Two hour laboratory each week.

Repeat for Credit
N

Requisites
Prerequisite or corequisite: AGRON 205

Typically Offered
Fall, Spring

AGRON 251 - Range Management

Credits: 3

Fundamental ecological principles of production, conservation, and use of grasslands. Application of these fundamental principles to management.

Note
Three hours lecture each week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 260 - Field Identification of Range and Pasture Plants

Credits: 1

Identification of range and pasture plants through observing them in their natural environment.

Note
Two lab periods each week for first half of the semester.

Repeat for Credit

N

Typically Offered
Fall-Odd Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 302 - Agronomy International Study Tour

Credits: 0-6

An experiential learning course to prepare students for and to immerse them in an international study tour of selected agronomic industries. The topics vary by the tour and the industries studied.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
ENTOM 202

K-State 8
Global Issues and Perspectives

AGRON 325 - World Food Crops

Credits: 3

An introduction to the production and consumption patterns of major global food crops. Examine relationship between staple crops and food security. Guest speakers from around the world will discuss important crops grown in their home country. Hands-on activities with edible plant parts and food products.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

AGRON 330 - Weed Science

Credits: 3

For those interested in crop production, crop protection, and agricultural education. Considers the origin of weeds, their relations to crops, and control systems emphasizing cultural, mechanical, biological, and chemical practices. Includes weed identification.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 120.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 335 - Environmental Quality

Credits: 3

An examination and survey of topics in environmental quality. Includes classification of soil, air, and water pollutants and their interaction with the environment, including the human food chain. Discussion of remediation techniques, risk assessment, and environmental legislation.

Note
Three lectures a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHM 110 or CHM 210.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

AGRON 350 - Plant and Seed Identification

Credits: 2

Identification of crops and weeds by seed and vegetative characteristics. Analysis of seed samples for impurities.

Note
Four hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

AGRON 360 - Crop Growth and Development

Credits: 3

Comparative growth and development of warm- and cool-season monocot and dicot crops. Environmental influences on growth and development processes and management techniques to minimize stresses.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 or CHM 210. Recommended Foundation Courses: AGRON 120 and AGRON 205.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 375 - Nutrient Cycling and Fertilizer Management

Credits: 3

Detailed information on nutrient cycling and management in soils and agroecosystems, including plant nutrition, nutrient interactions with soil, nutrient availability, and fertilizer management. Numerous soil biological, physical, and chemical properties on nutrient availability to crops will be emphasized.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 205. Recommended Foundation Course: AGRON 120.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AGRON 380 - Introduction to Grassland Monitoring and Assessment

Credits: 2

Vegetation sampling techniques used in rangeland research and for grassland monitoring and assessment. Use of statistics for sampling, analysis, and presentation of data.

Note
Meets during first half of the semester. Four hours lecture each week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 251 and STAT 240.

Typically Offered
Fall-Even Years

AGRON 381 - Introduction to Grassland Monitoring and Assessment Lab

Credits: 1

A field laboratory course designed as a companion to AGRON 380. Focus on methods used for determination of biomass, basal cover, frequency, and density. Additional time will be spent on basic statistics, experimental design, and analyzing data sets.

Note
Meets during the first half of the semester. One hour of lecture and one lab each week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 380 or concurrent enrollment.

Typically Offered
Fall-Even Years

AGRON 385 - Soil Analysis and Nutrient Recommendations

Credits: 2

Detailed information on (1) techniques for soil sample collection, (2) chemical methods for routine soil analysis, (3) development of fertilizer recommendations, and (4) fertilizer characteristics. Laboratory exercises reinforce the theoretical principles presented in lectures.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 375 or concurrent enrollment.

Typically Offered
Spring

AGRON 400 - Undergraduate Topics in Agronomy

Credits: 1-3

Special topics in agronomy not completely treated in other courses.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring

AGRON 405 - Internship in Agronomy

Credits: 0-3

Supervised professional experience in any agronomic area. One credit is equivalent to 120 hours of supervised and evaluated work experience. Cooperating employers and interns will complete a learning contract and set learning outcomes. Student presentation required upon completion of internship.

Repeat for Credit
Y

Requisites
Prerequisite: AGRON 120 and AGRON 205.

Typically Offered
Fall, Summer

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AGRON 415 - Soils Judging

Credits: 0-1

Techniques employed in writing descriptions of soil morphology and in classifying soils for intercollegiate soils judging.

Note
Six hours lab a week for the first half of the semester.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: AGRON 205.

Typically Offered
Fall, Spring

AGRON 425 - Forage Quiz Bowl Team

Credits: 0-1

Prepare quiz bowl team members with review of forage history, soils and fertility, establishment, grazing management, plant physiology, poisons and toxicity, forage quality, hay and silage, and identification of forages and weeds.

Repeat for Credit

Y

Typically Offered
Fall

AGRON 446 - Introduction to Environmental Soil Physics

Credits: 3

A conceptual and quantitative introductory study of vadose zone soil physical properties and processes in relation to the main components of the hydrologic cycle and the soil surface energy balance.

Note
Three hours of lecture a week

Repeat for Credit
N

Requisites
Recommended Prerequisites: AGRON 205 and PHYS 113

Typically Offered
Spring

AGRON 450 - Crops Team

Credits: 0-2

Grain grading, seed and plant identification, and seed analysis. Studies lead to participation in intercollegiate crops contest.

Note
Four hours lab a week.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: AGRON 350.

Typically Offered
Fall

AGRON 462 - Range Grasses

Credits: 2

Field and laboratory study of range and pasture plants, with special emphasis on grasses and their distinguishing characteristics.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall-Even Years

AGRON 490 - Introduction to Range Management Planning

Credits: 3

Inventory and analysis of rangeland resources and development of detailed management plan. Emphasizes range management principles and practices useful in maximizing production from rangelands.

Note
Two hours lecture and one lab each week, may include field trips to ranch operations.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 251

Typically Offered
Spring-Odd Years

AGRON 502 - International Experience in Agronomy

Credits: 0-6

Students will apply knowledge gained in their undergraduate curriculum in a culminating learning experience focused on international crops, soils, and agronomic systems. Topics vary by offering depending on the agronomic systems studied and locations visited.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 120 and AGRON 205 and 8 hours of any AGRON course

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

AGRON 550 - Forage Management and Utilization

Credits: 3

Production and utilization of forage crops. Development of forage programs for livestock production, including pasture and stored forages.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 120 and junior standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 551 - Forage Management and Utilization Laboratory

Credits: 1

Identification of forage species, techniques for estimating forage quality, forage physiology, and field trips.

Note
One two-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Completion of or concurrent enrollment in AGRON 550.

Typically Offered
Spring

AGRON 598 - Undergraduate Research in Agronomy

Credits: 0-18

Independent research experience guided by faculty in crop science, weed science, range science, or soil science.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGRON 600 - Problems in Agronomy

Credits: 1-18

Independent study may be chosen in any area of agronomy: genetics, crop improvement, forages, ecology, weed control, plant physiology, crop production, soils, fertility, genesis, or conservation. Study conducted under the guidance of a faculty member, with topic jointly selected by student and instructor. Course format and number of credit hours determined by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 602 - Agronomy Capstone Experience

Credits: 3

A culminating learning experience to apply the knowledge gained by the student in the undergraduate curriculum, to apply the skills of problem-solving and critical thinking, and to develop the ability to work in teams and participate in civil discourses. Current issues in Agronomy will be discussed and a team project will be completed.

Note
Three hours of seminar a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AGRON 605 - Soil and Environmental Chemistry

Credits: 3

A study of inorganic and organic chemistry of soils with a detailed examination of the solid, liquid, and gaseous phases. Includes discussions of mineral solubility, electrochemical and adsorption phenomena, acidity, salinity, and fertility. Emphasis is placed on the biogeochemical cycling of plant nutrients and important soil contaminants.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 375 or AGRON 205 and CHM 230.

Typically Offered
Spring

Natural and Physical Sciences

AGRON 610 - Biotechnology

Credits: 3

The use of biotechnology and molecular genetic approaches in plant and animal sciences. Emphasis is on the use of molecular techniques for plant and animal improvement.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500 or BIOL 398.

Typically Offered
Fall

Cross-listed
PLPTH 610

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

AGRON 615 - Topics in Agronomy

Credits: 1-3

Discussion and lectures on important topics in the field of Agronomy.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 620 - Applied Crop Physiology

Credits: 3

Study of cultivated crop botany, whole plant and canopy physiology, impact of abiotic (water, temperature, and plant nutrition) and biotic stresses (weeds, insects, and diseases), crop seed physiology, and global climate change effects on crops.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 120 or HORT 201.

Typically Offered
Fall

AGRON 630 - Crop Improvement and Biotechnology

Credits: 3

Techniques in basic plant breeding and biotechnology used to genetically improve crops and procedures to increase, distribute, and maintain breeding stocks and varieties.

Note
Two hours lecture and one two-hour lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 120 and ASI 500.

Typically Offered
Spring

Natural and Physical Sciences

AGRON 635 - Soil and Water Conservation

Credits: 3

Principles, prediction, and effects of soil erosion from water and wind. Conservation practices for erosion control and promoting soil, water, and air quality. History of soil and water conservation and the Dust Bowl. Past and present government agencies and policies for soil and water conservation.

Note
Two hours recitation and 1 three-hour lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 205.

Typically Offered
Fall

Historical Perspectives

AGRON 640 - Cropping Systems

Credits: 3

Principles for developing and managing cropping systems in the Great Plains for the efficient use of natural resources, primarily water. Emphasis on dryland cropping systems, management of crop rotations, and the plant/soil/environment interaction. Includes the efficient use of natural resources via an understanding of yield limiting factors, impact of crop rotations and cultural practices, climate, plant growth, and development.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 375.

Typically Offered
Fall

Natural and Physical Sciences

AGRON 645 - Soil Microbiology

Credits: 3

The nature and function of soil microorganisms in the soil ecosystem. The role of soil microbial activity to soil organic matter, mineral transformations, plant nutrition, and environmental quality.

Note
Three hours lecture each week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 205 or BIOL 255.

Typically Offered
Fall

Natural and Physical Sciences

AGRON 646 - Soil Microbiology Laboratory

Credits: 1

Discuss and perform laboratory procedures for enumerating soil microorganisms, quantifying soil biological activities, and nutrient cycling.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 645 or concurrent enrollment.

Typically Offered
Fall

Natural and Physical Sciences

AGRON 650 - Integrated Weed Management

Credits: 3

The development of weed management systems based on diagnosis of weed and crop problems, understanding crop-weed associations and interactions with the environment, and integrating weed control tactics such as chemical, biological, cultural, and mechanical practices into recommendations.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 330.

Typically Offered
Spring

Natural and Physical Sciences

AGRON 655 - Site Specific Agriculture

Credits: 3

Introduction to spatial analysis and management of agricultural and environmental resources using Geographic Information Systems (GIS) technology. Emphasis on collecting, displaying, and analyzing spatial or georeferenced soil, crop, or other land surface data.

Note
Two hours lecture, and two hours lab.

Repeat for Credit
N

Requisites
Required Pre-requisite: AGRON 202 Recommended Foundation Course: AGRON 375 and GEOG 508 and GEOG 605.

Typically Offered
Spring

Natural and Physical Sciences

AGRON 660 - Grassland Monitoring and Assessment

Credits: 2

Vegetation sampling techniques used in rangeland research and for grassland monitoring and assessment. Use of statistics for sampling, analysis, and presentation of data.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 251 and STAT 240.

Typically Offered
Fall-Even Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 661 - Grassland Monitoring and Assessment Lab

Credits: 1

A field laboratory course designed as a companion to AGRON 660. Labs will consist of methods used for determination of biomass, basal cover, frequency, and density. Additional time will be spent on basic statistics, experimental design, and use of the microcomputer in analyzing data sets.

Note
Meets during the first half of the semester.

One hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AGRON 660

Typically Offered

Fall-Even Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 662 - Rangeland Watershed Management

Credits: 3

Study of the management of physical/biological settings and processes along with human activities on water and watersheds considering preventative and restorative strategies in a natural resource rangeland setting. Web-based distance AG*IDEA course.

Repeat for Credit
N

Typically Offered
Spring

AGRON 665 - Soil Genesis and Classification

Credits: 3

Factors and processes of soil formation, classification of soils according to soil taxonomy, and use of soil survey information. Practical field experience describing soil properties. Required field trips.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GEOL 100 or AGRON 205.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AGRON 670 - Range Management Problems

Credits: 1-18

Range Management Problems

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 680 - Plant Genetics

Credits: 3

Concepts and application of basic genetic principles in higher plants.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500 or BIOL 398. Recommended Foundation Course: AGRON 610 and AGRON 630.

Typically Offered
Spring

AGRON 681 - Range Ecology

Credits: 3

Application of ecological principles to range ecosystem management. Study of plant-soil-animal interactions with rangelands, and discussion of plant succession, environmental influences, and ecological concepts.

Note
Two hours recitation a week and one lab credit consisting of field trips to representative range areas.

Repeat for Credit
N

Requisites
Recommended prerequisite: AGRON 251 and BIOL 529.

Typically Offered
Spring-Even Years

Natural and Physical Sciences

AGRON 682 - Grassland Fire Ecology

Credits: 3

The course is designed to describe the ecological effects of fire on grassland ecosystems. It also provides insight into the history of fires, the people who use them and why, the parts of a a fire, how fires behave in relation to fuel and weather, and the conducting and safety of prescribed burns.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

AGRON 695 - Climate Change and Agriculture

Credits: 3

Impact of climate and climate change on agricultural systems and soil and water resources at global and regional scales. Discussion on adaptation and mitigation strategies including economics and policies that affect agriculture.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Spring-Odd Years

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

AGRON 700 - Agricultural Meteorology

Credits: 3

Fundamental concepts of meteorology and climatology and their applications to agriculture. Use of weather data to study meteorological variables and to estimate relevant parameters and processes, such as crop growth, development, yield, evapotranspiration, and soil water budget.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: PHYS 113.

Typically Offered
Fall-Even Years

AGRON 720 - Nutritional Improvement of Food Crops

Credits: 3

Discussion of current genetic and breeding efforts to improve the nutritional value of food crops, focusing on vitamins, minerals, amino acids, fatty acids, and phytonutrients. Impact of nutritionally-improved crops in food security.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring-Odd Years

AGRON 732 - Introduction to Plant Resistance to Pests

Credits: 2

Basic concepts of the biology, ecology, genetics and breeding for pest resistance in plants.

Note
Four hours lecture and discussion a week. To meet the first half of semester.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300 or PLPTH 500 or ENTOM 312, and one course in plant or animal genetics.

Typically Offered
Fall-Even Years

Cross-listed
PLPTH 732 and ENTOM 732

AGRON 746 - Environmental Soil Physics

Credits: 3

A conceptual and quantitative introductory study of vadose zone soil physical properties and processes in relation to the main components of the hydrologic cycle and the soil surface energy balance.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 205 and PHYS 113.

Typically Offered
Spring

AGRON 775 - Advanced Nutrient Cycling and Fertilizer Management

Credits: 3

Detailed information on nutrient cycling and management in soils and agroecosystems, including plant nutrition, nutrient interactions with soil, nutrient availability, and fertilizer management. Numerous soil biological, physical, and chemical properties on nutrient availability to crops will be emphasized. Students will independently assess nutrient availability in soils and develop nutrient management plans for production systems.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Standing and a soils course.

Typically Offered
Spring

AGRON 781 - Ecology of Invasive Species

Credits: 3

Ecological principles and their application to invasive species. Discussion of population, community and ecosystem level characteristics affecting a wide variety of invasive plant and animal species. Discussions will include current global consequences and governmental policies/programs designed to limit the spread of invasives.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

AGRON 790 - Range Management Planning

Credits: 3

Inventory and analysis of rangeland resources and development of detailed management plan. Emphasizes range management principles and practices useful in maximizing production from rangelands.

Note
Two hours recitation a week and one lab credit including field trips to ranch operations.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 251.

Typically Offered
Spring-Odd Years

AGRON 800 - Advanced Problems in Agronomy

Credits: 1-3

Independent study of a specific problem in agronomy under the guidance
of a member of the department's graduate faculty. For non-thesis or
non-dissertation studies. Topic is selected jointly by student and
instructor. Course format and number of credit hours are determined by
the instructor.

Note
Consent of instructor

Repeat for Credit

Y

Typically Offered
Fall, Spring, Summer

AGRON 810 - Agronomy Seminar

Credits: 1

A discussion of agronomic developments.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring

AGRON 816 - Soil Physics

Credits: 3

A study of the transport of water, heat, gases, and solutes in soil. Examples are presented that related to both agricultural and engineering land uses. Emphasis is given to understanding how soil physical properties and soil management practices influence transport processes.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 746 and MATH 220.

Typically Offered
Spring

AGRON 820 - Plant Water Relations

Credits: 3

Properties of water, terminology in plant and soil water relations, environmental aspects of plant-water relations, soils as a water reservoir, water as a plant component, water movement through the plant, special aspects of transpiration, development and significance of internal water deficits, drought resistance mechanisms, water consumption by crop plants.

Repeat for Credit
N

Requisites
Recommended Prerequisite: BIOL 500.

Typically Offered
Spring

AGRON 821 - Principles of Forage Quality

Credits: 3

The course provides an indepth study of the chemical characteristics of forage components and the interactions with ruminant physiology and digestion that influence forage feeding value and the laboratory procedures used to evaluate forages for grazing livestock. Students should have knowledge of the basic principles of chemistry, ruminant nutrition, and plant physiology so that they can develop an understanding of the chemical characteristics of forages and how they affect the value of forages to grazing livestock.

Note
Web-based distance AG*IDEA course.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 251 or AGRON 550, and ASI 320, and STAT 225, or equivalents.

Typically Offered
Summer-Even Years

AGRON 822 - Herbicide Interactions

Credits: 3

Herbicide fate in plants and soils. Physiological and biochemical processes in plants and soils as affected by herbicides. Molecular biochemistry of herbicide resistance that have developed in the field. Biotechnologically derived herbicide-resistant crops.

Note
Three hours lecture per week.

Repeat for Credit

N

Requisites
Recommended Foundation Course: AGRON 650 or BIOL 500.

Typically Offered
Spring-Odd Years

AGRON 824 - Advanced Weed Ecology

Credits: 3

A study of advanced weed ecology topics including weed/crop interference, weed growth and development, herbicide resistance, biological control, spatial and temporal population dynamics, and ecological approaches to weed management.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 650.

Typically Offered
Fall-Odd Years

AGRON 825 - Soil and Plant Analysis

Credits: 3

Theories and procedures for the chemical analysis of soils and plant materials. Applications of analysis in soil fertility evaluations and in research work are discussed.

Note
One hour recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: CHM 271.

Typically Offered
Fall-Odd Years

AGRON 832 - Grassland Plant Identification

Credits: 2

Study of plants that have ecological and/or agricultural importance in the Great Plains. Emphasis on plant identification, grassland ecosystems, and plant forage value, palatability, and utilization by both domestic livestock and wildlife. Cultural and historical uses of grassland.

Note
Web-based distance AG*IDEA course.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 251 and BIOL 198 or equivalents.

Typically Offered
Spring

AGRON 835 - Nutrient Sources, Uptake and Cycling

Credits: 3

An examination of the behavior of plant nutrients in soils emphasizing nutrient sources, the interaction of nutrient with soils, and the role of plant root as nutrient sinks. Includes processes used in the formulation of chemical fertilizers and the assessment of available nutrients in non-commercial plant nutrient sources.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 375.

Typically Offered
Fall-Odd Years

AGRON 840 - Crop Physiology

Credits: 3

Principles of nitrogen metabolism, mineral nutrition, photosynthesis, growth substances, and hardiness applied to crop production.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 500.

Typically Offered
Spring-Odd Years

AGRON 843 - Advanced Forage Management

Credits: 3

Examines the integrated management of forages, livestock, soil, water, pests, and the environment.

Repeat for Credit
N

Typically Offered
Spring-Even Years

AGRON 845 - Reproducible Research and Scientific Computing

Credits: 3

Develop skills to handle large datasets, generate reproducible science, and develop creative data analysis and interpretation skills. Focus will be on understanding programming logic by developing and writing computing codes for common tasks and concepts related to environmental science.

Note
Three hours lecture per week.

Repeat for Credit
N

Typically Offered
Spring

AGRON 850 - Agricultural Climatology

Credits: 3

Climate and climate change interact with agricultural production systems and climate data can be used to improve our understanding of these changes. Climate fundamentals, climate information, and climate data analysis will be reviewed to understand and solve a variety of social, environmental, and agricultural problems.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

AGRON 860 - Applied Plant Breeding

Credits: 3

This course considers in detail the mechanics of an applied plant breeding program for agronomic crops.

Repeat for Credit
N

Requisites
Prerequisite: AGRON 630 or HORT 740, AGRON 680, and STAT 703.

Typically Offered
Spring

AGRON 880 - Plant Molecular Biology

Credits: 3

A study of plant genes and genome organization, plant gene expression and regulation, and functional analysis of plant genes.

Note
Three hrs. lec. a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521, PLPTH 610, or BIOL 541.

Typically Offered
Fall-Even Years

Cross-listed
PLPTH 880

AGRON 881 - Grazing Ecology and Management

Credits: 3

This course discusses the ecological principles of domesticated livestock grazing and their application to manage grazing lands. Theoretical and applied models of plant/animal interactions will be presented. Grazing systems and their management of ecosystem services will be presented as balance between production and conservation outcomes.

Repeat for Credit
N

Typically Offered
Fall-Even Years

AGRON 893 - Agricultural Simulation Modeling

Credits: 4

Techniques for developing and testing computer simulation models for research, management, and design applications in agriculture.

Note
Three lectures and one three-hour work session per week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705. Recommended Foundation Course: MATH 211.

Typically Offered
Fall-Even Years

AGRON 898 - Master's Report

Credits: 2

Preparation of a written report either of research or of problem work on a topic in the major field.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 899 - Master's Research

Credits: 1-18

Research on a problem which may extend throughout the year and furnish data for a master's thesis.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGRON 900 - Micrometeorology

Credits: 3

A comprehensive analysis of interactions between living organisms and their physical environment. Emphasis is placed on characterizing the transport of heat, water, and carbon within the soil-plant-atmosphere continuum. Includes discussions on aerodynamic transfer, surface energy balances, evapotranspiration, trace gas fluxes, and basic micrometeorology. The potential impact of climatic change on biosphere productivity will be considered.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 115 and AGRON 746 or BIOL 500.

Typically Offered
Spring-Odd Years

AGRON 902 - International Agronomy Experience for Graduate Students

Credits: 0-6

Students will apply knowledge gained in their graduate curriculum focused on international crops, soils, and agronomic systems. Topics vary by offering depending on the agronomic systems studied and locations visited.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 360 and AGRON 375.

Typically Offered
Fall, Spring

AGRON 905 - Advanced Soil Chemistry

Credits: 3

Application of physical chemistry to soils; cation and anion equilibria, ion activities, sorption, redox reactions, and other physiochemical phenomena in soils.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 605 and CHM 500.

Typically Offered
Fall-Even Years

AGRON 915 - Advanced Plant Genetics

Credits: 3

In-depth treatment of advanced concepts in molecular, quantitative, and cytogenetics of plants.

Note
Three hrs. lec. a week.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 680/AGRON 680.

Typically Offered
Fall-Odd Years

Cross-listed
PLPTH 915

AGRON 916 - Advanced Soil Physics

Credits: 3

An advanced study of the transport of water, heat and solutes in soil. The theory of unsaturated water flow, coupled heat and water flow, and the convection and dispersion of reactive solutes will be studied in detail. Spatial variability of soil physical properties will be discussed, solute transport will be presented.

Note
Three hours lecture per week.

Repeat for Credit
Y

Requisites
Prerequisite: AGRON 816, MATH 240 and PHYS 113.

Typically Offered
Fall-Odd Years

AGRON 920 - Advanced Topics in Agronomy

Credits: 1-3

Discussion and lectures on important papers and contributions in the field of Agronomy.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of Instructor

Typically Offered
Fall, Spring, Summer

AGRON 925 - Advanced Soil Genesis and Classification

Credits: 3

An advanced study of processes of soil formation and systems of soil classification including soil taxonomy.

Note
Two hours recitation a week.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: AGRON 515.

Typically Offered
Spring-Odd Years

AGRON 945 - Soil Mineralogy

Credits: 4

Theory and application of methods for analyzing minerals in soil environments, including X-ray, electron optical, thin section, and wet chemical techniques.

Note
Two hours recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: AGRON 605.

Typically Offered
Fall-Odd Years

AGRON 950 - Advanced Crop Ecology

Credits: 3

Principles of growth and development of crops in relation to the environment.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOL 500, BIOL 529, STAT 704, and STAT 705.

Typically Offered
Spring-Even Years

AGRON 955 - Soil Microbial Ecology

Credits: 3

Theories and concepts of the ecology and function of microorganisms in the soil environment. Discussions will include factors regulating microbial activity, the flow of energy (carbon), and nitrogen transformations as they relate to plant productivity and environmental quality.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Recommended Foundation Courses: AGRON 645 and BIOCH 521.

Typically Offered
Spring-Even Years

AGRON 970 - Advanced Plant Breeding I

Credits: 3

Application of quantitative genetics in plant breeding, heritability, mating designs, selection techniques and theory, marker assisted selection, population improvement, breeding autopolyploid crops.

Repeat for Credit
N

Requisites
Recommended Prerequisite: AGRON 860.

Typically Offered
Fall-Odd Years

AGRON 980 - Genomic Analysis for Crop Improvement

Credits: 3

Concepts and applications of genomic analysis in crop improvement, including crop evolution, and origin, germplasm conservation and utilization, population structure and genetic distances, genomic-wide association and linkage studies.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 860 or ASI 500, PLPTH 612.

Typically Offered
Spring-Even Years

AGRON 999 - PhD Research

Credits: 1-18

Research on a problem which may extend throughout the year and furnish data for a doctoral dissertation.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGTEC 111 - Ag Pathway: Agricultural Technology and Mechanical Systems

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Agricultural Technology and Mechanical Systems

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AGTEC 199 - Independent Study in Agricultural Technical Education

Credits: 0-6

Student-specific projects or independent guided studies in agricultural technical education or applied studies.

Note
Department Consent Required

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AGTEC 200 - Topics in Agricultural Technical Education

Credits: 0.5-6

Topics of special interest. Will be offered upon sufficient demand in selected areas of agriculture that are technical or applied in nature.

Repeat for Credit
Y

Typically Offered
On sufficient demand

AIT 301 - Advanced Technical Mathematics

Credits: 3

This course provides an in-depth study of essential mathematical concepts required to address multiple scenarios within engineering technology, with a focus on Plane Trigonometry, introductory Calculus, and Physics principles.

Repeat for Credit
N

Requisites
Prerequisite: Prerequisite: College Algebra (100) or equivalent or higher

Typically Offered
Fall, Spring, Summer

AIT 325 - Applied Mechanics I

Credits: 4

Static force equilibrium, free-body force analysis, friction, structural force analysis, centroids and center of gravity, area moment of inertia, concepts of stress and strain. Strength of materials. Axial, torsional, bending and combined stress and strain analysis. Considerations of stress concentration, fatigue, and impact conditions. Applied fluid mechanics, mass conservation and energy conservation equations.

Note
This course will cover statics, strength of materials and applied fluid mechanics. 3 hours of lecture, 2 hours of lab.

Repeat for Credit
N

Typically Offered
Fall or Spring

AIT 330 - Electric Circuits and Power Technology

Credits: 4

DC and AC circuits, series and parallel connections. Electrical properties of Conductors. Ohm's law. Resistive

loads and non-linear loads. Power sources. AC power generation and distribution, single phase and 3-phase, active, reactive and apparent powers, motors.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AIT 331 - Semiconductor Electronics and Digital Logic

Credits: 4

Studies of basic semiconductor theory. Principles, characteristics and applications of semiconductor devices such as various types of diodes, transistors, and thyristors. Small scale integrated circuits. Logic gates. Number system and Boolean algebra.

Repeat for Credit
N

Requisites
Prerequisite: AIT 330 Electric Circuits and Power Technology or instructor permission.

Typically Offered
Fall or Spring

AIT 370 - Technology Project Management

Credits: 3

This course covers the following subjects: 1) principles of engineering decision making process, financial aspects of technology projects, including principal and compound interest calculations, 2) uniform annual cost, rate of return, depreciation, equipment replacement, and competing projects, 3) technology project planning, including aggregate planning and master production schedule, inventory control, material and capacity planning, and shop floor control as well as 4) technical document preparation and reporting.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

AMETH 160 - Introduction to American Ethnic Studies

Credits: 3

This course introduces students to the major concepts related to ethnicity and to some of the major American ethnic groups.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AMETH 185 - Race, Film, and American Stories

Credits: 3

Introduces students to how race functions in movies, books, and more. It will further examine how movies and books activate and reflect change. Students will analyze artistic expression from one or more American Ethnic traditions, including film and literature, and possibly also music, comics, TV, and other texts.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
ENGL 185 and AMETH 185

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

AMETH 300 - Intercultural Competence in Institutions

Credits: 3

Prepares students to understand and appreciate America's race relations and its diverse histories. Emphasis on implementing cultural competency in various social settings.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Historical Perspectives

AMETH 351 - African American Perspectives

Credits: 3

A critical examination of African American experience in the context of U.S. society and institutions. The analysis will consider the interrelationships between and among various African American groups and "mainstream" America, and their corresponding nationalities and regions of origin.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AMETH 352 - American Indian Perspectives

Credits: 3

A critical examination of American Indian experience in the context of U.S. society and institutions. The analysis will consider the interrelationships between and among various American Indians and "mainstream" America, American Indian nations and/or tribes.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AMETH 353 - Latina/o Perspectives

Credits: 3

A critical examination of U.S. Latina/o experience in the context of American society and institutions. The analysis will consider the interrelationships between and among various Latina/o groups, "mainstream" America, and their corresponding nationalities and regions of origins.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AMETH 354 - Asian American Perspectives

Credits: 3

A critical examination of Asian American experience in the context of U.S. society and institutions. The analysis will consider the interrelationships between and among various Asian American groups, "mainstream" America, and their corresponding nationalities and regions of origin.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AMETH 370 - Politics of Women of Color

Credits: 3

Explores the coalitional politics of women of color from its earliest formation as the "Third World Women's Alliance" in the 1960s to its manifestation in present-day movements like "Incite! Women of Color Against Violence."

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMETH 450 - Comparative Ethnic Studies

Credits: 3

Provides a comparative framework for understanding both the specificities within and the differences between the situations of racially marginalized groups in the U.S. and beyond.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

AMETH 460 - Independent Reading and Research in American Ethnic Studies

Credits: 1-3

Guided reading and research on a specific topic of student interest, leading to preparation of a research paper or creative work.

Note
Topic and credit to be arranged. Permission of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: AMETH 160, at least one other American ethnic studies course

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

AMETH 461 - Transformative Thought

Credits: 3

Engages a range of advanced theories and critical concepts in American Ethnic Studies, including the intersections of race, ethnicity, gender, class, indigeneity, (dis)ability, citizenship, and sexuality.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMETH 499 - Senior Research Project in American Ethnic Studies

Credits: 3

Guided research in American ethnic studies. Students prepare a research paper on a relevant subject of their choice. Each student is responsible for arranging to work with a member of the American ethnic studies faculty.

Repeat for Credit
N

Requisites
Prerequisite: AMETH 160.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMETH 501 - Recitation Leadership

Credits: 1-3

Integrative review of concepts in American ethnic studies under faculty supervision. Preparation for leading discussions, workshops and reviews in American ethnic studies. Students attend two lecture sessions per week

concurrent with AMETH 160, one additional seminar session focused on planning and preparation for recitations, and are responsible for leading discussions in one or more recitation sections in AMETH 160 per week.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMETH 556 - Multicultural Psychology

Credits: 3

To introduce and familiarize students with the concept of multicultural.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMETH 560 - Topics in American Ethnic Studies

Credits: 3

Selected topics of special interest in American Ethnic Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

AMETH 660 - Independent Reading and Research in American Ethnic Studies

Credits: 1-3

Advanced guided reading and research on a specific topic of student interest, leading to preparation of a research paper or creative work.

Note
Topic and credit to be arranged. Permission of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Senior or graduate standing

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

AMETH 700 - Advanced Topics in American Ethnic Studies

Credits: 3

Provides students the opportunity to investigate topics in American Ethnic Studies that enable greater depth and complexity of understanding of field's methodological approaches and specializations.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

AMP 101 - Introduction to Aviation Regulations and Aircraft Drawings

Credits: 3

A review of the role and organizational structure of the Federal Aviation Administration (FAA) as it relates to the certification and continued airworthiness of aircraft and its operation in general, business, and commercial aviation environments. Emphasis on the privileges and limitations of certificated personnel who maintain aircraft systems in the context of the FAA regulations. Includes concepts of

weight and balance, logbook entries, and accurate use of graphs and charts. Students demonstrate the ability to read and comprehend information contained in FAA and manufacturers' aircraft maintenance specifications, data sheets, manuals, publications, and related Federal Aviation Regulations, Airworthiness Directives, and Advisory material. Students learn how to read, understand, and interpret aircraft drawings commonly found in the aviation maintenance industry.

Repeat for Credit
N

Typically Offered
Fall or Spring

AMP 102 - Aviation Math and Physics

Credits: 3

This is a study of basic math and physics as required by aircraft technicians and defined by FAR 147. Use and understand the principles of simple machines, sound, fluid, and heat dynamics, basic aerodynamics, aircraft structures, and theory of flight. Apply, calculate, and solve basic math functions, ratios and proportions, and algebraic equations that are relevant to aviation. Students will also learn the concepts involved in weighing and balancing an aircraft.

Repeat for Credit
N

Typically Offered
Fall or Spring

AMP 103 - Concepts of Aircraft Materials and Tooling Standards

Credits: 3

The concepts essential to understanding aircraft material properties and fabrication techniques are taught. Emphasizes knowledge: shop safety, organization and human factors associated with shop practices, basic aircraft structural materials and hardware familiarization, fluid lines and fittings, hand tool selection and use, and aviation-specific dimensional inspection tools and techniques, aircraft hardware identification and applications, cleaning and corrosion control, aircraft metal selection and applications, and aircraft material inspection fundamentals.

Repeat for Credit
N

Typically Offered
Fall or Spring

AMP 104 - Basic Aircraft Electricity and Ground Operations

Credits: 3

A basic concept of DC/AC circuits, with basic laws relating to the following: measuring voltage, current, resistance, continuity and leakage; relationship of voltage, current and resistance in electrical circuits; reading and interpretation of electrical circuit diagrams; electrical devices and inspection and servicing of batteries. Introduction to digital numbering systems and digital logic functions. Also included are the introduction to air transport maintenance procedures, aircraft ground operations, and knowledge of aircraft batteries.

Repeat for Credit
N

Typically Offered
Fall or Spring

AMP 105 - Application of General Aviation Maintenance Concepts

Credits: 2

This laboratory course provides hands-on experience with fundamental aviation maintenance tasks aligned with concepts from AMP 101–104. Students will gain practical skills in weighing aircraft, taking critical measurements, performing non-destructive testing, moving and securing aircraft, and executing basic ground operations. Additional training includes aircraft servicing, fueling, ground running, shop safety procedures and processes, flight line safety, and other general aviation-related tasks.

Repeat for Credit
N

Typically Offered
Fall or Spring

ANTH 200 - Introduction to Cultural Anthropology

Credits: 3

Introduction to ethnology and ethnography; analysis and comparison of technological, social, and religious characteristics of cultural systems.

Note
Not available for credit to students who have credit in ANTH 204.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 204 - A General Education Introduction to Cultural Anthropology

Credits: 3

Introduction to ethnology and ethnography; analysis and comparison of technological, social, and religious characteristics of cultural systems.

Note
Not available for credit to students who have credit in ANTH 200.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 210 - Introduction to Cultural Anthropology, Honors

Credits: 3

Introduction to basic ethnology and ethnography; technological, social, and religious characteristics of cultural systems; discussion and independent study.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 220 - Introduction to Linguistic Anthropology

Credits: 3

Language as a part of human behavior: its origins, uses and abuses, and ways of defining reality. Basic descriptive and ethnosemantic skills used by anthropologists to learn languages in the field.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.
Social Sciences

ANTH 260 - Introduction to Archeology

Credits: 3

Brief introduction to the field of anthropological archeology. General survey of world prehistory revealing major cultural changes from the development of early foraging societies through the rise of agricultural and complex communities.

Repeat for Credit

N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Historical Perspectives
Social Sciences

ANTH 280 - Introduction to Biological Anthropology

Credits: 4

Provides knowledge regarding the scope of Biological Anthropology, and develop an understanding of: 1) evolutionary theory and evolutionary processes, 2) patterns of adaptation to the environment in primates, and 3) human evolution, human adaptation and human variation. Key concepts/perspectives will include: evolution, selection, adaptation genetics, population genetics, as well as variation and variability.

Note
Requires 3 credit hours lecture and 2 hours lab per week.

Repeat for Credit
N

Typically Offered
Other

K-State Core
4 Natural and Physical Sciences

K-State 8
Historical Perspectives
Natural and Physical Sciences

ANTH 301 - Initiation to Anthropology

Credits: 3

Identify and apply the core elements of the anthropological perspective while learning professional and academic writing and presentation skills.

Repeat for Credit
Y

Requisites
Prerequisite: Declared Anthropology Major/Minor or Instructor permission.

Typically Offered
Fall

K-State 8
Social Sciences

ANTH 305 - Cultures of South Asia

Credits: 3

Provides an interdisciplinary exploration of the disparate cultures and communities of the South Asian region. We will examine thematic issues of colonization, religion, nationalism, modernity, sexuality, gender, globalization and social stratification in their various South Asian contexts.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200, ANTH 204 or ANTH 210.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 310 - Environmental Anthropology: Living with Change in the Anthropocene

Credits: 3

Explores anthropological and human science approaches to the complex causes and consequences of environmental change, including climate change, mass species extinction, industrial pollution, and deforestation. Students learn about economic, cultural, and political drivers of environmental degradation and discuss solutions for a more sustainable future from the perspective of social and cultural theory.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences
Global Issues and Perspectives

ANTH 312 - Museums, Cultures, and Collaborations

Credits: 3

Critically examine the cultures and histories of museums and collections in the United States and elsewhere by exploring topics such as: the complexity of representing others; museums, colonization, and power; museum ethics; collaborative museum work with, and by, indigenous communities and curators; the global art and artifact market and growing repatriation movements, etc. Students will get a chance to visit museums, as well as to engage with the ethnography collections housed by the Anthropology program at K-State.

Repeat for Credit
N

Typically Offered
Fall or Spring

ANTH 314 - Introduction to the World's Religions

Credits: 3

Survey of religious beliefs, practices, and experiences from around the world. Emphasis is on religious practices and experiences in different cultural contexts.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 315 - Introduction to Medical Anthropology & Global Health

Credits: 3

Explores disease, illness, and medical systems from a cross-cultural perspective. Includes the impacts of culture, gender, wealth inequality and other structural conditions on health and well-being.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
5 Social and Behavioral Sciences

K-State 8
Social Sciences
Global Issues and Perspectives

ANTH 316 - Engaged Anthropology

Credits: 3

Applies anthropology to real-world problems, politics, and advocacy in various fields including business, technology, engineering, health, agriculture, conservation, human rights, and international development. Explores anthropological engagement with various social, political, and environmental movements and organizations. Emphasis on ethics in research and practice.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences
Ethical Reasoning and Responsibility

ANTH 318 - Topics in Cultural Anthropology

Credits: 3

Exploration of problems in cultural anthropology for both majors and non-majors.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8

Global Issues and Perspectives
Social Sciences

ANTH 319 - Food and Culture

Credits: 3

An examination of heritage cuisines, nutrition, and diet as a part of daily life, special holidays, and ritual events, as well as how subsistence, taste, and culinary practices have transformed over time and across borders. Anthropological examples from various subcultures will help students consider what the global flow of people, food commodities, and recipes means for our communities, our identities, our palates, and our bodies.

Repeat for Credit
N

Typically Offered
Fall or Spring

ANTH 328 - Topics in Linguistic Anthropology

Credits: 3

Exploration of problems in linguistic anthropology for both majors and non-majors.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 350 - Topics for Educators

Credits: 1-4

Examination of selected topics in archaeology, cultural, or linguistic anthropology designed to address education standards in the social sciences.

Note
Does not apply towards requirements for anthropology major or minor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8
Historical Perspectives
Social Sciences

ANTH 351 - Special Studies in Anthropology

Credits: 1-3

Explores topics in anthropology through guided field trips (study abroad or domestic excursion).

Repeat for Credit
Y

Typically Offered
Other

ANTH 352 - Topics in Cultural Heritage and Museum Studies

Credits: 3

Anthropological exploration of issues related to cultural heritage institutions including museum management, collections care, interpretation, and public engagement.

Repeat for Credit
Y

Typically Offered
On sufficient demand

ANTH 353 - Museum Collections Management

Credits: 3

Overview of the management and care of tangible objects that form the foundation of museums and other cultural heritage institutions. Introduces policies and procedures essential to ethical collecting and care, particularly preventive conservation.

Repeat for Credit
N

Typically Offered
Fall or Spring

ANTH 364 - Archaeological Myths and Mysteries

Credits: 3

Introduces evidence-based thinking and the scientific method in archaeology through evaluation of "mysteries" of our human past. Explores social factors affecting interpretation of past cultures. Case studies include who "discovered" the Americas, ancient alien intervention, Atlantis, myth of the mound builders, and more.

Note
Designed for non-Anthropology majors.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Social Sciences

ANTH 365 - Exploring Kansas Archaeology

Credits: 3

Exploration of the archaeological record of past Native people of Kansas and the Central Plains and their diverse lifeways.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

ANTH 368 - Topics in Archaeology

Credits: 3

Exploration of problems in archaeology for both majors and non-majors.

Repeat for Credit

Typically Offered
On sufficient demand

K-State 8
Historical Perspectives
Social Sciences

ANTH 380 - Introduction to Human Evolution

Credits: 3

Survey of the human fossil record, including an introduction to evolutionary theory and a discussion of the place that humans occupy among the other primates.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

ANTH 383 - Plagues: The Co-Evolutionary History of Humans and Pathogens

Credits: 3

The course will explore the proximate (mechanistic/physiological) and ultimate (evolutionary) causes of disease from a biocultural and historical perspective.

Repeat for Credit
N

Typically Offered
Fall-Even Years

K-State 8
Historical Perspectives
Natural and Physical Sciences

ANTH 384 - Fundamentals of Forensic Anthropology

Credits: 3

Provide students with basic knowledge of human skeletal anatomy, as well as the principles guiding the recovery and analysis of human remains, and the bioanthropological methods applied in their identification, within a legal context. Will rely on case study examples to familiarize students with the steps and analyses involved in the process of forensic recovery and identification of human remains. The use of case studies will facilitate learning by providing an engaging way to introduce students to Forensic Anthropology.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ANTH 280

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

ANTH 388 - Topics in Physical Anthropology

Credits: 3

Exploration of problems in physical anthropology for both majors and non-majors.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

ANTH 399 - Honors Seminar in Anthropology

Credits: 1-3

Readings and discussion of selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
N

Typically Offered
Other

ANTH 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ANTH 501 - Proficiency Development

Credits: 0-3

Integrative review of anthropological concepts and skills under faculty supervision. For single students or groups of students. Not applicable to major field requirements.

Note
For undergraduate credit only. Consent of instructor and superior performance in relevant course.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8
Social Sciences

ANTH 505 - South Asian Civilizations

Credits: 3

Interdisciplinary survey of the development of civilizations in India, Pakistan, Sri Lanka, Bangladesh, Nepal, Bhutan, and Afghanistan, including geography, philosophy, social, economic, political institution, and historical movements.

Repeat for Credit
N

Requisites
Prerequisite: 3 hours of social science or junior standing.

Typically Offered

Fall-Even Years

Cross-listed

Global Issues and Perspectives
Social Sciences

ANTH 508 - Asian Religions

Credits: 3

Explores the beliefs, rituals, and cultural practices of selected major Asian Religions, such as Hinduism, Buddhism, Jainism, Sikhism, Confucianism, Taoism, and Shinto.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 314. Or sophomore standing.

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 509 - Cultures of Africa

Credits: 3

Family life, subsistence patterns, exchange systems, languages, religions, and development of the peoples of Africa.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 510 - New Religions

Credits: 3

Exploration of religions around the world formed in the past 250 years, their beliefs and practices, how and why they formed, and the lived experience of adherents today

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 314 or sophomore standing.

Typically Offered
Fall or Spring

ANTH 513 - Immigrant America

Credits: 3

Discussion of post-1965 immigration to the United States with a focus on Asian and Latino newcomers. Immigrant adaptation, economic strategies and the reinterpretation of cultural identity. Implications for American society.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200, ANTH 204, or ANTH 210.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

ANTH 514 - Narrative Medicine

Credits: 3

Narrative medicine is the use of narrative competency in clinical and other healing contexts to enhance patient, family, or community healing and well-being. Use of well-established research and practice in medical anthropology, the broader medical humanities, and cutting-edge clinical scholarship to help students gain narrative competency. Students will learn why narrative and meaning are critical to healing, how to become aware of patient narratives, and how to practice attention to the stories of others. Students will also learn foundational interpretive skills grounded in close reading and discourse analysis.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or ANTH 315 or sophomore standing.

Typically Offered
On sufficient demand

ANTH 515 - Creativity and Culture: The Anthropology of Art

Credits: 3

Explores creativity, aesthetics, and meaning in various visual art subcultures in the U.S. and around the world. Attention is paid to the intersection of art and contemporary social issues including structural racism.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or ANTH 312 or ANTH 314. Or sophomore standing.

Typically Offered
On sufficient demand

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

ANTH 516 - Ethnomusicology

Credits: 3

Music, dance, and other performance subcultures from the United States and around the world will be explored in depth. Emphasis is placed on understanding music and dance styles in their cultural context, including how they change in the era of globalization. The class also explores how social identity is expressed through music-making and other performance cultures.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or sophomore standing.

Typically Offered
On sufficient demand

K-State 8
Aesthetic Interpretation

ANTH 518 - Topics in Cultural Anthropology

Credits: 1-4

Intensive exploration of themes and topics in cultural anthropology.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 204 or ANTH 220 or sophomore standing.

Typically Offered
On sufficient demand

K-State 8
Social Sciences

ANTH 525 - Language and Culture

Credits: 3

Study of language and dialect as aspects of social and ethnic group identities. Emphasis on analysis of conversational style in diverse cultural settings. Research project to be determined according to student interests.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 220 or consent of instructor.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

ANTH 528 - Topics in Linguistic Anthropology

Credits: 1-4

Intensive exploration of problems in linguistic anthropology for both major and non-majors with adequate background.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 220.

Typically Offered
On sufficient demand

ANTH 552 - Topics in Cultural Heritage and Museum Studies

Credits: 3

Anthropological exploration of issues related to cultural heritage institutions including museum management, collections care, interpretation, and public engagement.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 204 or ANTH 220 or ANTH 260 or ANTH 312 or ANTH 352, or sophomore standing.

Typically Offered
On sufficient demand

ANTH 560 - Archaeological Fact or Fiction: Applied Critical Thinking

Credits: 3

Explores and develops practical critical thinking and research skills using archaeological approaches and case studies. Examines impact of interpretation of the human past on past and present populations.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260 or equivalent.

Typically Offered
Fall-Even Years

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ANTH 561 - Archaeological Field Methods

Credits: 1-9

Provides hands-on training in archaeological field methods (i.e., data collection and documentation through archaeological survey and excavation) as part of a research project.

Note
Instructor consent (application required).

Repeat for Credit
Y

Typically Offered
Summer

K-State 8
Empirical and Quantitative Reasoning

ANTH 562 - Archaeological Laboratory Methods

Credits: 3

Hands-on instruction in and application of professional principles of processing, analyzing, and interpreting artifacts and related archeological materials.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260 or equivalent.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ANTH 563 - Applied Archaeology

Credits: 3

Training in professional and ethical practice in cultural resource management and public archaeology.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260 or its equivalent.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

ANTH 565 - North American Archaeology

Credits: 3

The prehistoric of native cultures of North America explored through the archaeological record from the peopling of the continent, to the spread of agriculture and village life, up to contact period.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260.

Typically Offered
Spring-Odd Years

K-State 8
Historical Perspectives

ANTH 568 - Topics in Archaeology

Credits: 1-4

Intensive exploration of archaeological problems for both major and non-majors with adequate background.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 260.

Typically Offered
On sufficient demand

ANTH 588 - Topics in Physical Anthropology

Credits: 1-4

Intensive exploration of problems in physical anthropology for both major and non-majors with adequate background.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 280 and ANTH 281.

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

ANTH 602 - Anthropological Theory

Credits: 3

Exploration of the major theoretical approaches in the principal branches of anthropology.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or ANTH 260 or sophomore standing.

Typically Offered
On sufficient demand

K-State 8
Historical Perspectives

ANTH 605 - North American Indians

Credits: 3

Description and comparison of native cultures of Canada and the United States; culture contact and change among surviving groups.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200 or ANTH 210 or ANTH 260.

Typically Offered
Spring

K-State 8
Social Sciences

ANTH 606 - South American Indians

Credits: 3

A survey of the nature and variability of the original cultures of Latin America. Analysis of sample cultures, stressing economic, social, political, and religious structures.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200 or ANTH 210 or ANTH 260.

Typically Offered
On sufficient demand

K-State 8
Social Sciences

ANTH 612 - Ethnohistory

Credits: 3

Introduction to ethnohistory as an anthropological research method.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or ANTH 260 or sophomore standing.

Typically Offered
On sufficient demand

ANTH 613 - Gender, Power, and International Development

Credits: 3

Examination of various models of development and their impact on various roles of woman and men in various cultures. Emphasis upon Africa, Asia, and Latin America. Comparisons of public, service, and economics sectors, including agriculture, marketing, and industry. Examination of policy issues.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211 or ANTH 200 or ANTH 210 and 3 additional hours in sociology or cultural anthropology.

Typically Offered
On sufficient demand

Cross-listed
SOCIO 633

K-State 8
Global Issues and Perspectives
Social Sciences

ANTH 615 - Race and Culture

Credits: 3

The biological meaning of race; the interrelationships of biological and cultural traits in human evolution; processes of racial formation of man; methods of classifying human races; cultural inheritance; the distinction of race, culture, personality, and intelligence; a review of modern racism; race as an evolutionary episode.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200, ANTH 210 or ANTH 280.

Typically Offered
On sufficient demand

K-State 8
Human Diversity within the U.S.

ANTH 616 - Anthropology of the Future: Apocalypse, Prophecy, and Hope

Credits: 3

Explores the culturally construction notion of "the future" by exploring discourses of time, divination, utopia, prophecy, world-endings and world-renewals from various societies around the world.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 314 or sophomore standing

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

ANTH 618 - Religion in Culture

Credits: 3

The nature of religion in different cultural systems.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200 or ANTH 210 or SOCIO 211.

Typically Offered
Fall

Cross-listed
SOCIO 618

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

ANTH 651 - Internship in Applied Anthropology

Credits: 3

Supervised field experience of at least three weeks full time or 150 hours part time with an organization or institution in the application of anthropological approaches to problem solving and working in a professional setting. Emphasis is on anthropological skills in relation to the objectives and operations of an institution.

Note
Open to anthropology major only.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 519 and junior and consent of program coordinator.

Typically Offered
Fall, Spring, Summer

ANTH 652 - Internship in Museology

Credits: 3

Practical professional museum experience of at least three weeks full time or 150 hours part time in the processing of collections, conservation, cataloging, archive and library maintenance, and/or planning and preparation of exhibits.

Note
Instructor Permission

Repeat for Credit
Y

Requisites
Corequisite: Any 3 credits of ANTH.

Typically Offered
Fall, Spring, Summer

ANTH 659 - Independent Reading and Research in Anthropology

Credits: 1-3

Guided reading and research on a specific anthropological topic of student interest, leading to preparation of a research paper.

Note
Topic and credit to be arranged.

Repeat for Credit
Y

Requisites
Prerequisite: Three hours of anthropology and consent of instructor.

Typically Offered
Fall, Spring

ANTH 663 - Andean Archaeology

Credits: 3

Examines the economic, social, and political development

of the region, including the Tawantinsuya (Inca Empire). Covers the adoption of agriculture; the origin of the state; power; and the role of religion, cosmology, ideology, and art.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260.

Typically Offered
Spring

K-State 8
Historical Perspectives

ANTH 665 - European Archaeology

Credits: 3

Survey of human prehistory in Europe from the earliest Paleolithic hominins to evolve in Europe, expansion of *Homo sapiens* and associated cultural developments, the spread of agriculture, diversity of Bronze Age adaptations, to the development of Celtic societies. Studies of archaeological and related evidence are investigated to interpret the dynamics of past ways of living.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 260.

Typically Offered
Spring-Even Years

K-State 8
Historical Perspectives

ANTH 680 - Forensic Anthropology

Credits: 4

Anthropological survey of the predominantly biological areas of forensic science, their methods and techniques, as they pertain to the application of that science to the purpose of the law. Particular emphasis will be given to perspectives about the science itself, its application to anthropology, and the unique ways in which that science may be used by law.

Repeat for Credit
N

Requisites
Prerequisite: A life science with laboratory requirement in the College of Arts and Sciences or the consent of the instructor.

Typically Offered
Fall-Even Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ANTH 681 - Primatology

Credits: 3

Survey of the primate order including considerations of evolution, morphology, and behavior. Particular emphasis will be given to developing perspectives about the origin and evolution of hominids in the context of the primate order.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 280 or consent of instructor.

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

ANTH 682 - Human Growth and Development

Credits: 3

Provides an anthropological examination of the process of growth and development in humans that emphasizes both the biological, evolutionary, and cultural aspects that have shaped them through time. Emphasis is given to the evolution of the life cycle, as well as the social and environmental conditions that affect human growth.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 280 or instructor's permission.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

ANTH 683 - Osteology

Credits: 4

Detailed study of human skeleton, with special attention to health and demographic conditions in prehistoric cultures and the evaluation of physical characteristics and genetic relationships of prehistoric populations. Laboratory demonstration and exercise in working with skeletal material for analysis of sex, age, stature, and race. Complete metric and nonmetric analysis with consideration given to paleodemography, paleopathology in situ analysis and excavation, and preservation.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 280 or consent of instructor.

Typically Offered
Spring-Even Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ANTH 686 - Bioarchaeology

Credits: 3

Explores how archaeologists and bioanthropologists approach the study of death, mortuary practices and skeletal remains, to reconstruct past lives and understand the associated behavior.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 280 or instructor's consent.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Social Sciences

ANTH 687 - Seminar in Osteology

Credits: 2

Analysis of human and nonhuman skeletal remains including age, sex, stature, race, anomalities, pathologies, trauma, metric and nonmetric traits, cause of death, and time since death. This course allows greater breadth and depth of osteological analysis than either ANTH 694 or ANTH 695, and allows for more concentration on individual methods and techniques and case studies.

Repeat for Credit
Y

Requisites
Prerequisite: ANTH 694 and ANTH 695.

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

ANTH 688 - Paleoanthropology

Credits: 3

Human origins and evolution as indicated by fossil evidence; interpretation of man-apes, Pithecanthropus, Neanderthal, Cro-Magnon, and other major fossil groups within the context of evolutionary theory, primate comparisons, and cultural evolution.

Note
Lecture and lab.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200 or ANTH 280 or consent of instructor.

Typically Offered
Spring-Odd Years

K-State 8
Natural and Physical Sciences

ANTH 710 - Writing Cultures: Ethnographic Methods

Credits: 3

An introduction to qualitative field methods and research ethics in cultural anthropology. Students will examine issues of truth, representation, and reflexivity in ethnographic writing.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 204 or ANTH 220 or junior standing.

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

ANTH 715 - Research Methods in Digital Ethnography

Credits: 3

A hands-on exploration of the uses of digital technology for ethnographic research and representation.

Note
Consent of instructor

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Social Sciences

ANTH 720 - Field Methods in Linguistics

Credits: 3

Techniques of collecting and analyzing linguistic data in the field. Work with language consultants in class, on languages such as Swahili.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 220

Typically Offered
On sufficient demand

AP 600 - Introduction to Pharmacology for Health Professionals

Credits: 3

Introduction to Pharmacology for Health Professionals is designed to provide an introduction to the principles of pharmacology and how they apply to health professionals.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 198, CHM 110, BIOCH 571, OR ASI 533 OR BIOL 442 OR KIN 360 OR current standing in Veterinary Medicine OR instructor consent.

Typically Offered
Spring

AP 601 - Cardiorespiratory Physiology

Credits: 3

An examination of the structure and function of the respiratory system and the manner in which oxygen passes from the atmosphere to its site of utilization in the mitochondria. Exercise, disease, and environmental stresses will form the basis for examining the capacity, plasticity, and limitations to respiratory function.

Repeat for Credit
N

Requisites
Prerequisite: 6 hrs in Kinesiology 500 and above.

Typically Offered
Fall

Cross-listed
KIN 601

AP 603 - Cardiovascular Physiology

Credits: 3

Study of the structure and function of the cardiovascular system as it pertains to health and disease. Topics include the control of blood pressure, vascular volume, and blood flow during orthostasis, aging and disease.

Repeat for Credit
N

Requisites
Prerequisite: KIN 250 and KIN 335.

Typically Offered
Spring

Cross-listed
KIN 603

AP 641 - Histology for Health Professions

Credits: 3

A brief introduction to the microscopic structure of the cells and tissues of a mammalian body. The class format will be a lecture followed by a laboratory session. The lectures will introduce the day's material, which will then be developed through laboratory sessions that include using light microscopy to read and interpret micrographs, drawing, making glass slides.

Note
Intended for Graduate Credit

Repeat for Credit
N

Typically Offered
Summer

AP 711 - Stem Cells and Comparative Biomedicine

Credits: 2

Characteristics of major categories of stem cells. Applicable or potential clinical uses, including their utilization in tissue engineering or targeted delivery of therapeutics.

Repeat for Credit
N

Typically Offered
Spring, Summer

AP 737 - Introduction to Cell Physiology

Credits: 2

An introduction to cellular physiology. The objective of this course is to introduce students to the principles of cellular physiology and prepare them to apply the knowledge of cellular physiology to other medical disciplines such as Pharmacology.

Note
Intended for Graduate Credit

Repeat for Credit
N

Requisites
Prerequisite: Admission to the One Year Master's program in Anatomy & Physiology or similar background (CHM 350, BIOCH 521)

Typically Offered
Summer

AP 740 - Study Methods and Career Preparation for Health Professional Students

Credits: 1

Introduces and examines research-based study methods that are applicable to advanced study in medical sciences. Challenges students to identify and improve current study habits. Prepares students to prepare an effective application to professional school.

Note
Intended for Graduate Credit

Repeat for Credit
N

Typically Offered
Fall

AP 743 - Systems Physiology

Credits: 4

An introduction to human physiology. The physiology of each body system will be introduced and important

variations in medically relevant species will be compared.

Note
Intended for Graduate Credit

Repeat for Credit
N

Requisites
Prerequisites:
CHM350 or equivalent
BIOL198 or equivalent
BIOCH521 or BIOL541 or equivalent
OR permission of instructor

Typically Offered
Fall

AP 773 - Bioinstrumentation Laboratory

Credits: 1

Practical experience with and evaluation of laboratory and clinical techniques related to electrodes, transducers, computer-based data acquisition and analysis.

Note
Three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: AP 747 or equivalent and concurrent enrollment in ECE 772.

Typically Offered
Fall-Even Years

AP 788 - Basic and Applied Pharmacokinetics

Credits: 3

This course is designed to provide students with fundamental concepts and principles of absorption, distribution, metabolism and elimination of drugs, environmental chemicals, and nanomaterials by the body. The course also covers actual applications of the pharmacokinetic knowledge using case studies of commonly dosed drugs, common environmental contaminants, and nanomaterials.

Repeat for Credit
N

Typically Offered
Fall-even years

AP 790 - Problems in Anatomy and Physiology

Credits: 1-18

Introduction of undergraduate and graduate students to research involving various anatomical and physiological systems.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

AP 796 - Topics in Exercise Physiology

Credits: 1-4

Intensive study of a selected topic in Exercise Physiology involving either great in-depth study, or application of theory presented in a related course.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 335, KIN 336. Only 6 hours may be counted toward degree.

Typically Offered
Fall, Spring, Summer

Cross-listed
KIN 796

AP 803 - Seminar

Credits: 1

Designed primarily for graduate and senior students enrolled for graduate credit in physiology. Each student is required to give a report on some subject related to physiology. The course is intended to stimulate interest in

research and evaluation of data.

Note
One hour a week.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of staff.

Typically Offered
Fall, Spring, Summer

AP 805 - Cell Physiology

Credits: 3

Functions of the animal body are described with a primary focus at the cellular and molecular level with correlations to clinical topics. Course content builds on knowledge of chemistry, biochemistry, physics and biology. Basic physiological and pathophysiological mechanisms are examined in the context of the cell environment, intermediary metabolism and cell signaling.

Repeat for Credit
N

Requisites
Standing as 1st year DVM student or permission of course instructors

Typically Offered
Fall

AP 806 - Gross Anatomy I

Credits: 6

Gross dissection of the dog with comparative aspects of the cat.

Note
Two hours lecture and nine hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: First-year standing in College of Veterinary Medicine or consent of the instructor.

Typically Offered
Fall

AP 807 - Integrated Physiological Systems 1

Credits: 5-6

Microstructure and function of the cardiovascular, endocrine, respiratory, and renal systems of domestic animals with emphasis on physiologic control mechanisms, interrelationships of body systems, and criteria for evaluating animal health.

Microanatomy laboratory is restricted to DVM students. Graduate students should enroll in 5 credits unless they have made arrangements with the course instructor.

Repeat for Credit
N

Requisites
Standing as a 1st year veterinary student, graduate student in Anatomy & Physiology, or equivalent

Typically Offered
Fall

AP 808 - Introduction to Veterinary Medicine and Biomedical Research: Concepts and Values

Credits: 1

This course is intended to provide first-year students an opportunity to experience the depth of veterinary/biomedical research required to advance the practice of veterinary medicine, and advance the field of medicine in general. The students will examine the challenges of conducting 1) foundational and translation research (genetic/genomic and mechanistic research), 2) foundational and applications to clinical research 3) population and observational research (epidemiology, prospective clinical trials, retrospective studies), 4) pharmacologic research (the impact of pharmacology on the biomedical sciences). The students will examine relevant connections, consider conceptual relationships, and critically evaluate integrative issues germane to both the practice of and the innovative progress of veterinary medicine. Faculty members in the Departments of A&P, DM/P, and CS, will present topical overviews, based on their professional experiences. This will be designed to connect and integrate fundamental principles and

relationships between research and clinical application. These presentations provide examples of the fundamental requirements for clinical therapies and also provide examples of how innovative science leads to new therapies for long standing clinical disease. Additionally, students will learn the tools required to search relevant topic to their career paths within the medical literature. Finally, drawing on the multidisciplinary literature presented by faculty, students will explore the challenges in conducting genetic/genomic research, using genomic information, implementing research results to clinical practice, as well as addressing the social, legal, and professional policies that are emerging from new research. Students will be expected to do reading and to complete online worksheets and present their findings/opinions in class. Class time will be devoted to presentations and to discussion of readings and related current events.

Repeat for Credit
N

Typically Offered
Fall

AP 816 - Gross Anatomy II

Credits: 5

Gross dissection of the horse and ruminant with comparative aspects of the pig, laboratory animals, and the chicken.

Note
Three hours lecture and nine hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AP 806.

Typically Offered
Spring

AP 817 - Integrated Physiological Systems 2

Credits: 3-4

Microstructure and function of the reproductive and digestive systems of domestic animals with emphasis on physiologic control mechanisms, interrelationships of body systems, and criteria for evaluating animal health. Microanatomy laboratory is restricted to DVM students. Graduate students should enroll in 3 credits unless they have made arrangements with the course instructor.

Repeat for Credit
N

Requisites
Graduate student status in Anatomy & Physiology or equivalent

Typically Offered
Spring

AP 822 - Advanced Muscle Physiology

Credits: 3

Course will examine current topics in muscle physiology. Format to include discussion of scientific papers, oral presentations, and debate of controversial topics.

Repeat for Credit
N

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Spring

AP 824 - Physiology of Oxygen Transport

Credits: 3

This course is designed to promote critical reading of the literature, particularly with respect to the understanding of exercise physiology and cardiorespiratory, vascular and muscle energetics responses. Activities will include presenting papers, debate and discussion regarding all aspects of science and scientific philosophy.

Repeat for Credit
N

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Spring

AP 825 - Special Anatomy

Credits: 1-18

The gross and/or microscopic study of any system (or systems) of any domestic animal.

Repeat for Credit
Y

Requisites
Prerequisite: AP 700 or AP 710 or equivalent and consent of staff.

Typically Offered
Fall, Spring, Summer

AP 826 - Advanced Cardiovascular Physiology

Credits: 3

Discussion and critical examination of cardiovascular control mechanisms, with specific emphasis on regulation of blood pressure during severe challenges such as exercise, heat stress, and upright posture.

Repeat for Credit
N

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Fall

AP 828 - Electricity in Biological Systems

Credits: 2

This course provides students in the life and/or physical sciences with foundational understanding of electrical concepts that contribute to life processes spanning the molecular, cellular, systems, and ultimately organismal levels. Historical and cultural discussions of bioelectric phenomena introduce essential concepts for further consideration through critical reading of primary literature.

Repeat for Credit
N

Requisites
Prerequisite: AP805, AP807, AP817 or equivalent physiology courses and permission of the instructor

Typically Offered
Spring

AP 830 - Toxins in the Biological System

Credits: 2

An advanced toxicology course concerned with the cellular land subcellular effects of various groups of toxins on the intact animal organism.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521, CHM 531 or CHM 550, AP 844 or consent of instructor.

Typically Offered
Fall-Odd Years

AP 831 - Current Topics in Toxicology

Credits: 2

An advanced toxicology course providing in-depth examination of toxicological area of current relevance to and/or controversy on mammalian health.

Note
Specific topics will change from semester to semester. Student in Ph.D. programs may repeat the course.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521 and AP 818.

Typically Offered
Other

AP 832 - Problems in Toxicology

Credits: 1-18

Individual investigations into the interactions of chemical compounds with living systems.

Repeat for Credit
Y

Requisites
Prerequisite: AP 871.

Typically Offered
Fall, Spring, Summer

AP 835 - Animal Care and Welfare

Credits: 1

This course will describe the veterinarian's role in protecting the health and welfare of animals. Students will be introduced to the major philosophical positions of animal use. The evolution of animal welfare science will be discussed and students will learn how to assess the welfare of companion, laboratory, zoo and food animals. Common causes of reduced animal welfare and ethical dilemmas will be covered.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
VAP 835 Animal Care and Welfare

AP 838 - Anatomy 1

Credits: 3

Part 1 of the comparative anatomy sequence (AP 838, AP 842). An introduction to comparative anatomy with a focus on human clinical anatomy.

Repeat for Credit
N

Requisites
Enrollment in the One Year Master's (non-thesis M.S. in Veterinary Biomedical Science) program or permission of instructor.

Typically Offered
Summer

AP 839 - Biomedical Methods Laboratory

Credits: 3

An introduction to the theory and practice of advanced biomedical laboratory techniques.

Repeat for Credit
N

Requisites
Acceptance into the Veterinary Biomedical Science M.S. non-thesis track ("One Year Master's Program") or permission of instructor.

Typically Offered
Spring

AP 842 - Anatomy 2

Credits: 3

An introduction to comparative human and domestic animal anatomy with a focus on clinical relevance.

Repeat for Credit
N

Typically Offered
Fall

AP 844 - Pharmacology I

Credits: 4

The basic principles of pharmacology, the interactions of drugs and living systems including fundamental principles of pharmacokinetics, pharmacodynamics, receptor-coupling, and mechanisms of action. A systems-based approach to drug classes will be emphasized.

Note
Four hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: AP 804 and AP 818 or equivalent.

Typically Offered
Fall

AP 846 - Pharmacology II

Credits: 2

The basic principles of pharmacology, the relationship of

drug actions and interactions on physiological principles and pathophysiological conditions. Pharmacokinetics, pharmacodynamics, and a systems-based approach to drug classes will be emphasized.

Repeat for Credit
N

Requisites
Prerequisite: Student must have a "C" or higher in AP 844 and DMP 712.

Typically Offered
Spring

AP 850 - Stem Cell Techniques

Credits: 2

Cellular and molecular techniques and techniques on tissue culture. Lecture and laboratory hours to be determined.

Repeat for Credit
Y

Typically Offered
Fall, Summer

AP 855 - Observing and Analyzing Animal Behavior

Credits: 1

This course will guide students on how to design, conduct, and analyze animal behavior experiments. The course will emphasize the development of an ethogram and the proper way to score animal behavior, including counts, duration, latencies, and bouts. Students will develop their own ethogram to score and analyze the behaviors of a focal animal and present the data as a written project.

Repeat for Credit
N

Typically Offered
Spring

AP 861 - Ultrastructural Interpretation of the Nervous System

Credits: 3

Study of the fine structure of neurons, axons, synapses, neuroglia and choroid plexus, the interconnections among neurons, the location of specific tracers and antibodies which define synaptic terminals, and a survey of methodologies used with transmission electron microscopy.

Repeat for Credit
Y

Requisites
Prerequisite: Biol. 541 or AP 710.

Typically Offered
Spring

AP 870 - Advanced Cardiovascular Physiology

Credits: 2

Comprehensive overview of cardiovascular physiology in domestic animals with special emphasis on the dog and horse, including current research.

Repeat for Credit
N

Requisites
Prerequisite: AP 747 or equivalent.

Typically Offered
Fall-Odd Years

AP 871 - Toxicology

Credits: 3

Effects of harmful substances on the animal body. Emphasis placed on toxicologic principles and management of the poisoned patient.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine or Graduate Student in the College of Veterinary Medicine, BIOCH 521, and AP 818.

Typically Offered
Spring

AP 873 - Physiologically Based Pharmacokinetic Modeling

Credits: 4

This modeling course is designed for life science graduate students with an interest in computational toxicology and pharmacology. Development of physiologically based pharmacokinetic (PBPK) models for environmental chemicals, drugs, and nanomaterials in laboratory animals, food-producing animals, companion animals, and/or humans will be introduced. Applications of PBPK models in food safety, toxicology, risk assessment, and pharmaceutical industry will be discussed. This course will cover theory, application software, experimental design, model development, optimization, validation, evaluation, and extrapolation. The expected outcome is that the student will have PBPK modeling knowledge and skills to develop a PBPK model with some mentoring from an experienced PBPK modeler. Format will include both weekly lectures and hands-on computer lab exercises.

Note
Course objectives
(1) To provide the student with working knowledge of physiologically based pharmacokinetic models and their applications in toxicology
(2) To provide students with the technical ability to develop PBPK models for use in their graduate research and careers

Course evaluation:
(1) Grades will be determined from two written tests (20% each), computer lab simulation exercises/assignments (20%), a project presentation which demonstrates the development of a PBPK model and the application of the PBPK model in toxicology (40%).
(2) All grading will be administered through K-State online.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor and 1 semester of calculus, physiology, pharmacology, pharmacokinetics, toxicology or biochemistry.

Typically Offered
Spring

AP 874 - Clinical Pharmacokinetics

Credits: 3

An overview of pharmacokinetics with emphasis on practical implications for the clinician, including bioavailability, bioequivalence, residues in food of animal origin, dosage forms and regimens, therapeutic drug monitoring, drug interactions, interspecies difference, and the effect of disease on the pharmacokinetics of drugs. Background in physiology and statistics strongly recommended.

Repeat for Credit
N

Typically Offered
Fall

AP 880 - Mechanisms of Drug Action

Credits: 3

Discussion of pharmacologic mechanisms at the molecular and cellular level, including receptors, second messengers, and pharmacokinetics. Specialized areas of pharmacology such as neuropharmacology and drug design will be discussed. Areas of current research interest will be emphasized.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall-Even Years

AP 890 - Problems in Pharmacology

Credits: 1-18

Individual investigations of the interactions of pharmaceutical compounds with living systems.

Repeat for Credit
Y

Requisites
Prerequisite: AP 770.

Typically Offered
Fall, Spring, Summer

AP 893 - Introduction to Nanomedicine

Credits: 1

This course is a brief introduction to nanomaterials and nanomedicine with a focus on clinical applications of nanotechnology. The course presents basic principles of nanotechnology; current clinical applications of nanomedicine; future horizons in nanomedicine.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
VAP 893

AP 894 - Comparative Embryology

Credits: 1

An overview of development anatomy as it relates to clinically important developmental defects and/or normal structure and function of common domestic animals.

Repeat for Credit
N

Requisites
Enrollment in the One Year Master's (non-thesis M.S. in Veterinary Biomedical Science) program or permission of instructor.

Typically Offered
Fall

AP 895 - Equine Exercise Physiology

Credits: 2

Comprehensive overview of the physiology of exercise in the horse with comparison to other species. Emphasis will be on cardiovascular, respiratory, and musculoskeletal systems, including current research.

Repeat for Credit
N

Requisites
Prerequisite: AP 747 or equivalent.

Typically Offered
Fall-Even Years

AP 896 - Introduction to Responsible Conduct of Biomedical Research

Credits: 2

This course will focus on providing graduate/professional students an introduction to the regulations, practices, ethical considerations, and professional interactions that define responsible conduct of biomedical research. Investigator responsibilities associated with initiating and establishing a research program, conducting experimental studies, analyzing and reporting data, publishing in peer-reviewed journals, considerations for submitting grant applications, and understanding compliance issues and regulations will be emphasized. Students will learn through reading journal articles and discussion of pertinent topics to identify and consider issues that are germane to the biomedical research environment.

Repeat for Credit
N

Typically Offered
Fall

AP 897 - Problems in Animal Welfare

Credits: 1

This course will expand on the role of veterinarians in the field of animal welfare. Students will be introduced to the major philosophical positions of animal use. The evolution of animal welfare science will be discussed and students will learn how to assess the welfare of companion, laboratory, zoo and food animals. Contemporary issues in animal welfare will also be explored.

Repeat for Credit
N

Requisites
Recommended Prerequisite: VAP835 or AP835

Typically Offered
Spring

AP 898 - Master's Report

Credits: 2

Master's Report

Repeat for Credit
Y

Requisites
Prerequisite: Consent of staff.

Typically Offered
Fall, Spring, Summer

AP 899 - Research

Credits: 1-6

For graduate students in the field of anatomy or physiology working toward the M.S. Degree.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of staff.

Typically Offered
Fall, Spring, Summer

AP 925 - Advanced Physiology

Credits: 3-5

The principles and techniques in the investigation of bioelectrical phenomena in relation to: (a) the physiology of the digestive organs, (b) myophysiology, (c) endocrinology, and (d) neurophysiology. Advanced physiological experiments will be conducted to provide an understanding of the applications of electronic equipment.

Note
recitation and two three-hour labs a week.

Repeat for Credit
Y

Requisites
Prerequisite: AP 747 and consent of staff.

Typically Offered
Fall, Spring, Summer

AP 995 - Problems in Physiology

Credits: 1-18

Special problem-involving techniques utilized in studying the function of various organ systems of the body.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

AP 999 - Research in Physiology

Credits: 1-6

For graduate students working toward the Ph.D. Degree.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of staff. Animal science and industry courses. The M.or Ph.D. program of study shall include supportive course work from several departments including statistics, biochemistry, anatomy and physiology, biology, grain science and others. Graduate level courses offered in the Department of Animal Sciences and Industry are listed below.

Typically Offered
Fall, Spring, Summer

ARAB 101 - Arabic I

Credits: 4

Introduction to the structure of modern Arabic. Essentials of grammar, speaking, reading, and writing.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8

Aesthetic Interpretation
Global Issues and Perspectives

ARAB 102 - Arabic II

Credits: 4

Continuation of Arabic I.

Repeat for Credit
N

Requisites
Prerequisite: ARAB 101 or equivalent.

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ARAB 201 - Arabic III

Credits: 5

Further development of four skills of listening, speaking, reading, and writing; with emphasis on building and applying basic language knowledge in communicative tasks; exercises in oral interactions and interactions involving text.

Repeat for Credit
N

Requisites
Prerequisite: ARAB 102 or equivalent.

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ARAB 301 - Arabic IV

Credits: 5

Continuation of Arabic III.

Repeat for Credit
N

Requisites
Prerequisite: ARAB 201 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ARAB 501 - Arabic V

Credits: 4

Further development of language and culture skills.

Repeat for Credit
N

Requisites
Prerequisite: ARAB 282 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ARAB 502 - Arabic VI

Credits: 4

A continuation of Arabic V, with further development of language and culture skills.

Repeat for Credit
N

Requisites
Prerequisite: ARAB 501 or equivalent.

Typically Offered
Other

K-State 8

Aesthetic Interpretation
Global Issues and Perspectives

ARAB 540 - Special Studies in Arabic

Credits: 1-18

Special Studies in Arabic

Note
Consent of the department head and instructor involved.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation

ARCH 240 - Science, Technology, and Architecture

Credits: 3

An exploration of the interrelationships between architecture and various sciences including the technological applications of selected scientific theories.

Note
Non-majors may take this course for UGE credit, but it will not fulfill UGE requirements for majors. However, it may be taken as a professional support elective (PSE) by architecture students.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ARCH 248 - Fundamentals of Architectural Technology

Credits: 3

Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Admission to a professional program in the college.

Typically Offered
Fall, Spring

Cross-listed
IARC 248: Fundamentals of Architectural Technology

ARCH 252 - History of Contemporary Architecture

Credits: 3

A critical exploration of key ideas, practices, and works that have shaped the global history of architecture in the 20th and 21st centuries.

Repeat for Credit
N

Requisites
Prerequisite: ENVD 251 or permission of instructor.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ARCH 265 - Basic Problems in Architectural Design

Credits: 1-18

Study of specific architectural design problems under the direction of a member of the architecture faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARCH 274 - Digital Architecture I

Credits: 1

This course will introduce students to digital management concepts, basic architectural digital representation, 3-dimensional computer modeling, raster, and vector graphics with an emphasis on conceptual development.

Repeat for Credit
N

Requisites
Prerequisites: Second year standing or higher, or permission of the instructor.

Typically Offered
Fall, Spring, Summer

ARCH 290 - Architecture Through the Ages

Credits: 3

An introductory survey of the history of architecture worldwide from its prehistoric beginnings up to the present day.

Note
May not be taken for credit by students enrolled in the College of Architecture, Planning and Design.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ARCH 299 - Appreciation of Architecture

Credits: 3

An analysis of the evolution of architectural styles to determine the relation of architectural expression to the needs of society.

Note
Three hours recitation a week. May not be taken for credit by students enrolled in the architecture, landscape architecture, or interior architecture curricula.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ARCH 302 - Architectural Design Studio I

Credits: 5

Instruction in architectural design focusing on the application of elements and principles of form and space in design. Instruction in the use of techniques for visually representing design ideas.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the architecture program and ENVD 202.

Typically Offered
Fall

ARCH 304 - Architectural Design Studio II

Credits: 5

Instruction in architectural design focusing on the synthesis of basic social, functional, technical, and aesthetic factors in design. Continued instruction in techniques for visually representing design ideas.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 302 and no grade lower than a C in an architectural design studio course.

Typically Offered
Spring

ARCH 325 - Introduction to Architectural Theory

Credits: 3

An introduction to the ideas and literature that have driven architectural discourse and informed practice through various eras.

Repeat for Credit
N

Requisites
Prerequisite: Second-year standing or permission of instructor.

Typically Offered
Fall, Spring

ARCH 347 - Structural Systems in Architecture I

Credits: 4

Introduction to structure as a building system. Overview of contemporary structural systems and their components, including wood, timber, steel, concrete, masonry, and hybrid structures. Discussion of building code requirements for structure, general guidelines for building structures, including appropriate application, and methods for schematic estimation of structural member sizing. Basic understanding of how gravity and lateral forces are propagated through a structural frame from load to building foundation.

Note
Three hours lecture, two hours laboratory per week.

This course replaces ARCH 348 and ARCH 449.

Repeat for Credit
N

Requisites
Prerequisites: PHYS 113 or PHYS 115, MATH 100 or higher, ARCH 248, and admission to a professional program in the college.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 348 - Structural Systems in Architecture I

Credits: 3

Introduction to statics; force analysis and the study of forces in equilibrium; principles of statics as applied to the study of simple elemental structures; the origin, the nature, and the action of loads on structural systems. Instruction in the use of statics in the preliminary stages of building design. For ARCH and IAPD students.

Note
Three hours lecture, two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113 or PHYS 115, MATH 100 or higher.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 373 - Digital Architecture II

Credits: 1

This course will introduce students to methods for digital 3-dimensional visualization, including rendering, animation, compositing and analysis.

Repeat for Credit
N

Requisites
Prerequisite: Second year standing or higher, or permission of the instructor.

Typically Offered
Fall, Spring, Summer

ARCH 374 - Digital Architecture III

Credits: 1

This course will introduce students to parametric and associative modeling methods for conceptual development, the design and representation of building assemblies and systems, and architectural documentation.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 274, ARCH 373, or permission of the instructor.

Typically Offered
Fall, Spring, Summer

ARCH 401 - Accelerated Architectural Design Studio I

Credits: 5

An introduction to the principles, processes and vocabularies of architectural design; basic architectural concerns (space/light/form and human factors); and techniques for visually representing design ideas (sketching/diagramming/instrument-aided drawings and model making).

Repeat for Credit
N

Requisites
Prerequisite: Admission to the post-baccalaureate track of the Master of Architecture Program.

Typically Offered
Fall

ARCH 402 - Accelerated Architectural Design Studio II

Credits: 5

Further development of the ideas skills and methodologies introduced in ARCH 401, and introduction to wider array of architectural concerns including social, functional, technical, contextual, and professional issues. The course will prepare students to enter the third-year architectural design studios.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 401, and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall

ARCH 403 - Architectural Design Studio III

Credits: 5

Relation of structures to their environment; client and community restraint; development of building programs; synthesis of functional, technical, and aesthetic considerations in the design of structures for human use.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 304 or ARCH 402, and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall

ARCH 404 - Architectural Design Studio IV

Credits: 5

Relation of structures to their environment; client and community restraint; development of building programs; synthesis of functional, technical, and aesthetic considerations in the design of structures for human use.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 403 and no grade lower than a C in an architectural design studio course.

Typically Offered
Spring

ARCH 413 - Environmental Systems in Architecture I

Credits: 4

Instruction in environmental and building control systems of architecture, including bioclimatic and ecological design principles. Emphasis on integrated system design approach, with a focus on passive and natural strategies. Contemporary and developing approaches are explored.

Note
Three hours lecture and one hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 248 or IARC 248 and enrollment in a professional program in the college.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ARCH 433 - Building Construction Systems in Architecture I

Credits: 3

A lecture course that develops an understanding of how materials and systems assembly reinforce and extend the intentions of the designer as well as an understanding of the strategies and techniques for integration and coordination of the building components. For ARCH and IAPD students.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 248 and admission to a professional program in the college.

Typically Offered
Fall, Spring

ARCH 434 - Building Construction Systems in Architecture II

Credits: 3

This course develops a more sophisticated level of understanding of how materials and systems assembly reinforce and extend the intentions of the designer. Students will develop their ability to both analyze and employ building construction techniques and assemblies as a design generator in preparation for Architectural Design Studio V.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 433.

Typically Offered
Spring

ARCH 448 - Structural Systems in Architecture II

Credits: 4

Instruction in the quantitative analysis of structural systems and the forces they resist, proceeding from the design loads associated with building through the reactions of particular structural elements. Overview of material strengths, and other properties of specific structural systems. Instruction in structural system sizing, by hand calculation and computer analysis.

Note
Three hours of lecture, two hours laboratory per week. This course replaces ARCH 452 and ARCH 453.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 347 and admission to a professional program in the college.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 449 - Structural Systems in Architecture II

Credits: 3

Instruction in strength of materials focusing on the behavior of building materials under loading; their ability to resist deformation and failure. Instruction in sizing simple structural elements. For ARCH and IAPD students.

Note
Three hours lecture, two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 348.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 452 - Structural Systems in Architecture III

Credits: 3

Instruction in the design of building structures as whole systems. Instruction in the principles of structural subsystem design; emphasis on the overall structural behavior and subsystems integrity required to achieve a variety of building forms. Instruction in strategies for the use of approximation in the manipulation of key quantitative properties of whole systems and major subsystems in building design.

Note
Three hours lecture, two hours workshop/test each week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 449.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 453 - Structural Systems in Architecture IV

Credits: 3

Instruction in the design of building structures as whole systems; overall-to-specific systems behavior and manipulative design of major subsystems. Emphasis on the design of subsystems and subsystem components as they are affected by structural material. Instruction in specialized issues associated with the analysis and design of high rise and long-span building structure, including foundation, constructive, and economic factors which affect building design.

Note
Three hours lecture, two hours workshop/test each week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 452.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 475 - Problems in Architectural Presentation

Credits: 1-18

Study of various methods of graphically representing architectural problems to develop professional office techniques.

Repeat for Credit
Y

Requisites
Prerequisite: Second-year standing and approval of instructor.

Typically Offered
Fall, Spring, Summer

ARCH 503 - Academic Internship Preparation

Credits: 1

Preparation for an academic internship in the field of architecture.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200 and ARCH 404.

Typically Offered
Fall, Spring, Summer

ARCH 505 - Academic Internship

Credits: 6

Off-campus work study program with an approved professional sponsor.

Note
Must be enrolled concurrently with ARCH 506, and each course must be successfully completed before credit is awarded in either.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 503, approval of the internship coordinator, and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall, Spring, Summer

ARCH 506 - Academic Internship Seminar

Credits: 3

Seminar on practice-based topics in architecture.

Note
Must be enrolled concurrently with ARCH 505, and each course must be successfully completed before credit is awarded in either.

This course is letter-graded only.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 503 and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall, Spring, Summer

ARCH 507 - Architectural Internship, Part C

Credits: 2

A continuation of the approved off-campus internship of ARCH 505 and ARCH 506. Preparation of internship journals, employer profiles, and a final internship analysis paper based on the entire 30-week internship experience.

Note
This course must be completed in order for internship to count as an equivalent of ARCH 606.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 505 and ARCH 506.

Typically Offered
Summer

K-State 8
Ethical Reasoning and Responsibility

ARCH 514 - Environmental Systems in Architecture II

Credits: 3

Instruction in criteria for selection and application of natural and mechanical environmental control systems in architecture. Focus on the integration of thermal, illumination, sanitary, movement, and acoustical systems within the building and the natural environment. Contemporary and developing approaches are explored.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites

Prerequisite: ARCH 248 or IARC 248 and enrollment in a professional program in the college.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 515 - Environmental Systems in Architecture III

Credits: 3

Criteria for selection and application of natural and mechanical environmental control systems in architecture. Focus on the integration of thermal, illumination, sanitary, movement, and acoustical systems with the building fabric and the natural environment. Contemporary and developing approaches are explored.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 413.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ARCH 565 - Problems in Architectural Design

Credits: 1-18

Study of specific design problems under the direct supervision of a member of the architecture faculty.

Repeat for Credit
Y

Requisites
Prerequisite: Approval of instructor.

Typically Offered
Summer

ARCH 605 - Architectural Design Studio V

Credits: 5

Design and development of an architectural project beyond schematic design.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 404, ARCH 434, ARCH 448, ARCH 514, LAR 500 and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall, Spring, Summer

ARCH 606 - Architectural Design Studio VI

Credits: 5

Design and development of architectural projects on topics proposed by faculty. On or off-campus studio. Department and College approval required for off-campus studios, whether in a domestic or international studies program or university.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 404, ARCH 434, ARCH 448, ARCH 514, LAR 500, and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall, Spring, Summer

ARCH 650 - Architectural Programming

Credits: 3

An introductory course surveying the basic philosophies and methodologies for architectural programming; emphasis on the comparative evaluation of different strategies and their integration within the process of design.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing or permission of the instructor.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

ARCH 654 - Study Abroad Orientation

Credits: 0-18

Preparation for participation in study abroad with a focus on specific information pertaining to the design professions and the analysis of the built and natural environment.

Repeat for Credit
N

Typically Offered
Fall, Spring

ARCH 700 - Topics in History of the Designed Environment

Credits: 3

Seminar on topics involving specific periods or subjects in the history of the built environment.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 350 or MS ARCH standing.

Typically Offered
Fall, Spring

ARCH 703 - Environmental Aesthetics

Credits: 3

Problems involving aesthetics in areas related to student's major field.

Note
Three hours a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing or permission of instructor.

Typically Offered
Fall, Spring

ARCH 704 - Topics in Environment and Behavior

Credits: 3

Seminar on topics in human behavior as it relates to physical environments.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 304 or IAPD 320 or LAR 320 or M. ARCH standing or junior standing if outside CAPD.

Typically Offered
Fall, Spring

ARCH 705 - Project Programming

Credits: 2

The development of a program for ARCH 707, Architectural Design VIII, under direction of a faculty member.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 606, or ARCH 505/ARCH 506, and approval of the faculty committee.

Typically Offered
Fall, Spring

ARCH 706 - Architectural Design Studio VII

Credits: 5

Integration of the physiological, psychological, and

sociological parameters in the design of environments. Analysis, programming, and planning problems, increased complexity of function and space definition systems. Relating environmental technology to total design.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: Either ARCH 507 or ARCH 606; ARCH 434, ARCH 448, ARCH 515, and no grade lower than a C in any architectural design studio course.

Typically Offered
Fall, Spring

ARCH 707 - Architectural Design Studio VIII

Credits: 5

Development of the student's project programmed in ARCH 705, under the direction of a faculty committee. Project must demonstrate a high level of achievement in systematic and comprehensive thinking, application of resources, and communication of total process.

Note
Twelve hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 705, ARCH 706, and no grade lower than a C in an architectural design studio course.

Typically Offered
Fall, Spring

ARCH 711 - Topics in Architectural Design Methods

Credits: 3

Intensive review of selected design methodologies, including systematic and computer-based approaches to problem definition and project design; emphasis upon the comparative evaluation of problem-solving strategies within the architectural design process.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 403 or IAPD 435 or LAR 320 or MS ARCH standing.

Typically Offered
Fall, Spring

ARCH 715 - Topics in Architecture Seminar

Credits: 3

Seminars that investigate a wide range of topics central to the discipline of architecture.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 403 or permission of instructor.

Typically Offered
Fall, Spring

ARCH 716 - Topics in Environmental Systems in Architecture

Credits: 3

A concentrated study of a particular subject related to the environmental systems of the built environment.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 413 or MS ARCH standing.

Typically Offered
Fall, Spring

ARCH 720 - Environment and Behavior

Credits: 3

Investigates the relationship between human behavior and design of the physical environment. Includes identification of psychological, social, cultural concepts which influence and are influenced by the built environment. Emphasizes applying this knowledge in design.

Note
Three hour seminar per week.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 325 or equivalent or permission of instructor.

Typically Offered
Fall, Spring

ARCH 725 - Architecture Research Methods

Credits: 3

An introductory course surveying the basic philosophies and methodologies of science and research as they apply to the field of architecture.

Note
Special emphasis will be placed on those methods appropriate for investigating human response to the built environment.

Repeat for Credit
N

Typically Offered
Fall, Spring

ARCH 735 - Topics in Building Construction Systems in Architecture

Credits: 1-4

Advanced study of the relationship of conceptual and/or technological factors of building construction to architecture.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 434 or MS ARCH standing.

Typically Offered
Fall, Spring

ARCH 750 - Writing Intensive Architecture Seminar

Credits: 3

A writing intensive seminar shall be an Architecture Seminar where over half of the course grade is based on written assignments (including papers, assignments, quizzes and exams).

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 200 and ARCH 403.

Typically Offered
Fall, Spring

ARCH 752 - Topics in Structural Systems in Architecture

Credits: 3

Study of the relationship of conceptual and/or technological factors of structure to architectural design.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 448 or MS ARCH standing.

Typically Offered
Fall, Spring

ARCH 753 - Foundations of Practice

Credits: 3

This course examines the foundational principles of architectural practice in the United States. It equips students with the essential knowledge and understanding of the instruments of service for delivering a building project from concept to realization and positions them to think critically about each step in the process.

Repeat for Credit
N

Typically Offered
Fall

ARCH 765 - Advanced Problems in Architecture

Credits: 1-18

Study of specific architectural problems under the direct supervision of a member of the architecture faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARCH 790 - Practicum

Credits: 1-18

Practical application of studies related to a student's area focus.

Note
For Master of Architecture and Master of Science in Architecture students. May be taken with departmental permission only.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARCH 801 - Topics in History of the Designed Environment

Credits: 3

Seminar on topics involving specific periods or subjects in the history of the built environment.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 350.

Typically Offered
Fall, Spring

ARCH 803 - Environmental Aesthetics

Credits: 3

Problems involving aesthetics in areas related to student's major field.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARCH 804 - Topics in Environment and Behavior

Credits: 3

Seminar on topics in human perceptions, reactions, and behavior as they relate to physical environments.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARCH 805 - Comprehensive Design Preparation

Credits: 3

Scholarly and design-based research, intended to deeply inform architectural decision-making, culminating in a program for an architectural project to be undertaken in ARCH 808.

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 200, ARCH 605, and ARCH 606.

Typically Offered
Fall

ARCH 809 - Architectural Design Communication

Credits: 3

Instruction in design communication with emphasis on concepts, principles, strategies and skills for effectively combining writing with images and other products of design; focuses on ideas, processes and proposals developed during the final year of architectural design studio.

Repeat for Credit

N

Requisites
Corequisite: ARCH 818.

Typically Offered
Spring

ARCH 811 - Topics in Architectural Design Methods

Credits: 3

Intensive review of selected design methodologies, including systematic and computer-based approaches to problem definition and project design; emphasis upon the comparative evaluation of problem-solving strategies within the architectural design process. May be repeated for credit with different topics.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 304.

Typically Offered
Fall, Spring

ARCH 815 - Topics in Architecture

Credits: 3

Seminar on topics in architecture with readings, class discussion, student presentations, research papers or projects.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 304.

Typically Offered
Fall, Spring

ARCH 816 - Topics in Environmental Systems in Architecture

Credits: 3

A concentrated study of a particular subject related to the environmental systems of the built environment.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 413.

Typically Offered
Fall, Spring

ARCH 817 - Architectural Design Studio VII

Credits: 5

Advanced design and development of architectural projects on topics proposed by faculty.

Note
Twelve hours studio a week.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 605, ARCH 606, and no grade lower than a C in an architectural design course.

Typically Offered
Fall

ARCH 818 - Architectural Design Studio VIII

Credits: 5

Advanced design and development of an architectural project using the program developed in ARCH 805. Students must demonstrate the ability to achieve a comprehensive, integrated design from site- to detail-scale.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 805, ARCH 817, and no grade lower than a C in an architectural design studio course.

Typically Offered
Spring

ARCH 820 - Environment and Behavior

Credits: 3

Investigates the relationship between human behavior and design of the physical environment. Includes identification of psychological, social, cultural factors which influence and are influenced by the built environment. Emphasizes applying this knowledge in design.

Note
Three hour seminar per week.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARCH 830 - Advanced Architectural Studies

Credits: 1-18

Studies related to the area of focus of a M.S. Arch. student in the non-thesis option. Preparation of a non-thesis proposal and a non-thesis project which may include a design project, synthesis paper, portfolio of written work, series of case studies, or other project. May be taken by M. Arch. student with departmental permission only.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARCH 835 - Topics in Building Construction Systems in Architecture

Credits: 1-4

Advanced study of the relationship of conceptual and/or technological factors of building construction to architecture.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 433.

Typically Offered
Fall, Spring

ARCH 852 - Topics in Structural Systems in Architecture II

Credits: 3

Study of the relationship of conceptual and/or technological factors of structure to architectural design.

Repeat for Credit
Y

Requisites
Prerequisite: ARCH 453.

Typically Offered
Fall, Spring

ARCH 853 - Professional Practice: Professional Responsibility

Credits: 1

Interdisciplinary course addresses the connections between allied design professions and the larger community. It helps students to understand and appreciate their professional legal and ethical responsibilities.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARCH 854 - Professional Practice: Office Practices

Credits: 1

Interdisciplinary course addresses practice-based issues concerning professional relationships in the design and delivery process, management of projects, communication practices, and fiscal concerns.

Repeat for Credit
N

Typically Offered
Fall, Spring

ARCH 855 - Professional Practice: Discipline-Specific Topics

Credits: 1

Covers discipline-specific concerns, focusing on issues specific to architecture, interior architecture and product design, landscape architecture or regional and community planning.

Repeat for Credit
N

Typically Offered
Fall, Spring

ARCH 865 - Advanced Problems in Architectural Design

Credits: 0-18

Study of specific architectural design problems under the direct supervision of a member of the architecture faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARCH 899 - Thesis

Credits: 1-18

Study in architecture and related fields leading to thesis.

Repeat for Credit
Y

Typically Offered
Other

ARE 010 - ARE New Student 1st Year Workshop 1

Credits: 0

Familiarize entering Architectural Engineering students with the nature of the architectural, engineering, and construction industry with an emphasis on terminology and professionalism. Information related to architectural engineering, department policies, student organizations, department faculty, and career opportunities will be introduced.

Repeat for Credit
N

Typically Offered
Fall

ARE 012 - ARE New Student 1st Year Workshop 2

Credits: 0

Continued familiarization with the architectural, engineering, and construction industry with a stronger emphasis on terminology and professionalism. Additional Information related to architectural engineering, department policies, student organizations, department faculty, and career opportunities will be presented.

Note
One hour recitation per month

Repeat for Credit
N

Typically Offered
Spring

ARE 020 - Architectural Engineering Seminar

Credits: 0

Presentation of professional problems and practices by students, faculty, and professionals associated with the career of architectural engineering.

Note
One hour lecture a month.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARE 100 - Architectural Engineering Orientation

Credits: 2

Introduction to architectural engineering. Promotion of interaction and connection with the department as well as a network of academic and professional networks through the

use of learning communities. Familiarize entering students with the nature of the architectural, engineering, and construction industry with an emphasis on terminology and professionalism.

Note
Two hours lecture a week.

Required for all new students during their first year in the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

ARE 295 - Introduction to Building Systems

Credits: 3

An introduction to building systems including: structural, electrical, mechanical, and plumbing. An emphasis will be made on the importance of these systems to the success of building function and operation. The course will not only expose the students to each system but the criticalness of integration between the systems as well as the architecture and construction of the facility.

Note
3 hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore Standing.

Typically Offered
Fall, Spring

ARE 310 - Introduction to AutoCAD

Credits: 1

An introduction to the basics of AutoCAD.

Note
One hour lecture and three hours lab a week or equivalent.

Repeat for Credit
N

Requisites
Prerequisite: CNS 200, and CNS 321.

Typically Offered
Fall, Spring

ARE 312 - Introduction to Building Information Modeling

Credits: 1

Introduction to building information modeling as a technology tool related to the engineering and construction industry.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: ARE 310.

Typically Offered
Fall, Spring

ARE 421 - Plan Reading & Systems Communications

Credits: 3

The integration of architectural, structural, mechanical, electrical and plumbing building systems, the impact of codes/standards on design, plan reading, and drawing creation.

Note
6 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321

Typically Offered
Fall, Spring

ARE 460 - ARE Professional Practice

Credits: 3

General business, management and contractual procedures in professional practice. Personal development of skills needed to enter and be accepted in industry today.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 295, COMM 106, and ENGL 200. Architectural Engineering majors only.

Typically Offered
On sufficient demand

ARE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARE 499 - Honors Research in Architectural Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. Open to students in the college of engineering honors program. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARE 521 - Computer Aided Architectural Engineering

Credits: 2

An introduction to the use of computer software for the design and integration of building systems. The course is intended to complement and enhance the content of the concurrent system courses (Mechanical II, Electrical II, and Structures II). The computer software used will represent the standard practices of the building construction industry.

Note
4 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: (ARE 551 and ARE 552) or ARE 553.

Typically Offered
Fall, Spring

ARE 537 - Acoustic Systems

Credits: 2

Hearing and the ear, sound generation, acoustical correction, noise reduction, and sound transmission all as integral parts of architectural design.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113 or PHYS 213.

Typically Offered
Fall, Spring

ARE 551 - Electrical Systems I

Credits: 3

An introduction and study of the basic concepts and components of building electrical distribution systems, including circuit design.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214 and ARE 295. Architectural Engineering Majors only.

Typically Offered
Fall, Spring

ARE 552 - Mechanical Systems I

Credits: 3

An introduction to building HVAC and plumbing system terminology, principles, and practices of design and layout specifically for applications of human comfort and safety.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 295, Prerequisite or Concurrent: ME 513. Architectural Engineering Majors only.

Typically Offered
Fall, Spring

ARE 553 - Structural Systems I

Credits: 3

Introduction to design of steel structures. Theoretical and practical bases for proportioning members, their connections, and layout specifically for applications of buildings.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: CE 533 and prerequisite or concurrent CE 537. Architectural Engineering Majors only.

Typically Offered
Fall, Spring

ARE 561 - Electrical Systems II

Credits: 3

The study and application of luminaires, lighting systems design and control, circuit and utilization component design, and design of building electrical systems distribution and service equipment.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 551

Typically Offered
Fall, Spring

ARE 562 - Mechanical Systems II

Credits: 3

The study of building HVAC system selection and application including load calculations, space coordination, system design and layout, and scheduling of equipment and materials.

Note
3 hours recitation per week

Repeat for Credit
N

Requisites
Prerequisite: ARE 552

Typically Offered
Fall, Spring

ARE 563 - Structural Systems II

Credits: 3

Introduction to design of reinforced concrete structures. Theoretical and practical bases for proportioning members, layout specifically for applications of buildings and characteristic as a construction material.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 553, CHM 210, and CE 537.

Typically Offered
Fall, Spring

ARE 571 - Systems Integration and Design

Credits: 3

An analysis of structural, mechanical, electrical and plumbing systems design processes, budgeting and constructability that supports the Conceptual Design and Schematic Design phases of building projects.

Note
2 hours recitation & 4 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisites: ARE 421, ARE 521, ARE 561, ARE 562, and ARE 563.

Typically Offered
Fall, Spring

ARE 620 - Problems in Architectural Engineering

Credits: 1-18

A study of specific design problems under the direct supervision of a member of the architectural engineering faculty.

Note
Approval of the department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARE 630 - Introduction to LEED

Credits: 0-18

Introduction to green building design and construction principles and practices based on the Leadership in Energy and Environmental Design (LEED) Green Building Rating System of the United States Green Building Council (USGBC).

Note
One or two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Professional program standing.

Typically Offered
On sufficient demand

ARE 671 - ARE Capstone

Credits: 4

In a studio fashion, student working individually or as part of a small team will prepare and present a design project of appropriate scope and complexity with emphasis on structural or mechanical/electrical/plumbing building systems.

Note
2 hours recitation & 6 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 571

Typically Offered
Fall, Spring

ARE 711 - Building Energy Codes and Standards

Credits: 2

Study of the background, importance, impact, and application of the energy codes to the mechanical and electrical systems design process.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 562.

Typically Offered
Spring

ARE 712 - Energy Modeling Lab

Credits: 1

Study of current building energy sources and trends, basic engineering economics applied to building energy use, energy calculations for building systems, and software-based whole building energy simulation using eQUEST.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 562.

Typically Offered
Spring

ARE 715 - Problems in Architectural Engineering

Credits: 0-18

Participation in student design competition teams under the direct supervision of a member of the architectural engineering faculty.

Note
Approval of the department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ARE 720 - Topics in Architectural Engineering

Credits: 1-18

A study of specific design problems in architectural engineering.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ARE 722 - Building Loads and Computer Aided Structural Analysis and Design

Credits: 3

Fundamentals of building structural systems and design with the emphasis on building loads and load paths. Review of International Building Code's structural loading requirements, applications, and determination of design loads by ASCE 7 - Minimum Design Loads and Associated Criteria for Buildings and Other Structures. Introduction of building design and analysis software basics. Students will learn how to generate building structural models, and conduct analysis, design, and simulation using software applications.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: ARE 563.

Typically Offered
Fall

ARE 723 - Timber Structures

Credits: 3

Analysis and design of timber structures including dimension lumber, glu-lam members, and engineered wood products.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 537.

Typically Offered
Spring

ARE 724 - Advanced Steel Design

Credits: 3

Structural design computations for beams, girders, columns and beam-columns. Design of connections (bolted & welded). Structural working drawings (plan, elevation and connection details). Overview of failure mechanisms and design procedures for plate girders. AISC requirements for prevention of various failure mechanisms.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 553 or CE 542.

Typically Offered
Fall

ARE 725 - Cold-Formed Steel Design

Credits: 3

Principles of behavior, design, fabrication, and construction of cold-formed steel structures.

Note
Two or three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 553 or CE 542.

Typically Offered
On sufficient demand

ARE 726 - Masonry Structural Design

Credits: 3

Introduction to masonry materials, specifications, testing and construction methods. The design of unreinforced and reinforced masonry structures according to applicable building codes.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 563 or CE 544.

Typically Offered
Fall

ARE 729 - Building Seismic Design

Credits: 3

Continuation of ARE 553 and ARE 563 with special emphasis on seismic design as applied to a complete structure.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ARE 553 or CE 542 and prerequisite or concurrent ARE 563 and ARE 722.

Typically Offered
On sufficient demand

ARE 731 - Advanced Lighting Design

Credits: 3

Design and application of lighting systems for commercial buildings, using current industry practices and computer-assisted analysis.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 561.

Typically Offered
Spring

ARE 733 - Advanced Mechanical Hydronic Systems Design

Credits: 3

Design and application of mechanical systems for buildings, focusing on hydronic and steam systems, expanding on the material and topics presented in prior HVAC courses.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 562.

Typically Offered
Spring

ARE 734 - Advanced Mechanical Air Systems Design

Credits: 3

Design and application of mechanical systems for buildings, focusing on air systems, expanding on the material and topics presented in prior HVAC courses.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 562.

Typically Offered
Fall, Spring

ARE 735 - Advanced Electrical Systems Design

Credits: 3

Design and application of various electrical distribution system for commercial buildings. The course uses the National Electrical Code in conjunction with current industry practices.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 561.

Typically Offered
Fall, Spring

ARE 736 - Advanced Plumbing Design

Credits: 3

Design and application of domestic water and waste systems, storm water systems, fuel gas systems, medical gas systems and fire protections systems.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 552.

Typically Offered
Fall

ARE 741 - Building Communication Systems

Credits: 3

Detailed design and analysis of special electrical systems for buildings including, fire alarm, and communication systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ARE 561.

Typically Offered
Fall

ARE 890 - Problems in Architectural Engineering

Credits: 0-18

A study of a specific problem under the direct supervision of a member of the architectural engineering faculty.

Note
Approval of Major Professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARE 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ARE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 102 - Ceramics for Non-majors

Credits: 3

A foundational survey in ceramic processes covering sculptural and vessel-based making as well as nontraditional practices in ceramic art. Students learn the basic origins of clay, its physical properties, and working characteristics. Surface expression is emphasized through the use of colored slips and glazes and atypical applications.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 103 - Jewelry Design and Processes for Non-majors

Credits: 3

Students without a background in art will be introduced to basic forming and construction techniques and design principles for jewelry and small-scale metal objects.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 104 - Digital Photography for Non-majors

Credits: 3

Introduction to digital photography including the use of DSLR camera, Adobe Lightroom, and Adobe Photoshop. This course is designed for non-Majors

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core

6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 105 - AandD: Career and Creative Industry Seminar

Credits: 1

Introduction to art concentrations and professions.

Note
Required of all art majors and must be completed prior to the concentrations admission review procedure.

Repeat for Credit
N

Typically Offered
Fall, Spring

ART 106 - Art Appreciation

Credits: 3

Introduction for non-art majors to basic elements (line, color, form, etc.) and principles (balance, repetition, proportion, etc.) of composition and explore some of the purposes (political, spiritual, philosophical, etc.) of art. Explore the relationship of art to historical contexts and examine the concept of style.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 108 - Introduction to Modern and Contemporary Art for Non-Majors

Credits: 3

A beginner's guide to understanding and appreciating movements in modern art from Realism, Impressionism, Post-Impressionism, Fauvism, Cubism, De Stijl, Constructivism, Dada, and Surrealism to Abstract Expressionism, Pop Art, Minimalism, and Conceptual Art, as well as art from the postmodern period – Neo-Expressionism, Neo-Abstraction, Neo-Conceptualism, Grafitti Art, etc. – to the present.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 111 - Photography, Civil Rights, Art and the Environment

Credits: 3

Surveys the role(s) photography plays in society focusing on the US civil rights movement and built/natural environment. Examines examples of journalistic and artistic practices in the medium of photography that both look back, question and critique the present with regard to these topics.

Note
Intended for all K-State students in all colleges. Humanities core. No prerequisites..

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ART 112 - Professional Practices in the Arts

Credits: 3

Focus on business best practices of the creative professions, photography, design, professional practices in museums, auction houses, artist and design studios. Best practices surveyed include conservation, artists contracts, licensing, taxes, art insurance, copyright law, arts management, public art law, artist estates and independent contractor or freelancer health care, as well as grants and grant writing. Career paths and further study in the arts are also explored. This course serves those who want to work in the arts as well as creative professionals or law students who wish to

enter arts law.

Note
Intended for all students at K-state or ArtSci, as gen ed. Possibly part of Museum Studies certificate.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ART 174 - A and D: Mixed Media Process and Exploration Lab

Credits: 3

A studio-based experience designed for students interested in exploring visual arts and design through practical, experimental methods. Focusing on various techniques, materials, and inter-university collaborations, offering students an opportunity to discover their artistic interests while connecting with the academic and creative community

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

ART 180 - AandD: Color, Light, and Perception Lab

Credits: 3

Explore color theory, light phenomena, and visual perception in 'AandD: Color, Light, and Perception Lab.' Develop your creative skills, manipulate light and materials, and analyze visual information. Ideal for all majors seeking enhanced visual literacy and artistic insight.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 190 - Drawing I

Credits: 3

Fundamental principles of drawing skills based on observation through the introduction of basic materials and techniques.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 194 - A and D: Community and the Environment Experience

Credits: 3

A foundational art experience that delves into the crossroads of art, design, and social and environmental matters. Students will harness diverse media to express their views on topics like community identity, cultural diversity, environmental justice, and urban planning. Through collaborative projects, including research and fieldwork, students engage with community partners, making this course relevant for all majors interested in applying visual literacy and artistic sensibility to real-world issues.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

ART 195 - Survey of Western Art History I

Credits: 3

Historical development of art from pre-history through the Middle Ages.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 196 - Survey of Western Art History II

Credits: 3

Historical development of art from the Renaissance to the nineteenth century.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 197 - Survey of Non-Western Art History

Credits: 3

An introductory survey of the art of Africa, Asia, Oceania, and the Americas from prehistory to the present.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 200 - AandD: Visual Representation and Fabrication

Credits: 3

Explore the foundations of 2D and 3D design in 'AandD: Visual Representation and Fabrication,' developing skills in creating, analyzing, and manipulating visual forms across different media, including drawing, design, and 3D modeling. Fosters visual literacy, creativity, and an understanding of scale, composition, and cultural contexts, making it suitable for students of all majors seeking to enhance their creative sensibility.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ART 202 - Art and Insects

Credits: 3

Provides a framework for examining arts and insects in which students consider evolution, genetics, behavior, and biodiversity, while also learning aesthetic interpretation, analysis of color and shape, perception, and the role of insect representations in the arts and humanities.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed

ENTOM 202 - Art and Insects

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Natural and Physical Sciences

ART 205 - Portfolio Review

Credits: 1

The preparation and display of a student's own creative work, upon completion of the Department of Art core. The concentration admission procedure occurs after student selection of an area of concentration within the BFA art major format.

Repeat for Credit
Y

Requisites
Prerequisite or Corequisite: ART 105, ART 194, ART 180, ART 174, ART 200

Typically Offered
Fall, Spring

ART 285 - Visual Communication Design Fundamentals

Credits: 3

An introduction to Visual Communication Design, focusing on design principles, concept development, and basic tools used in the profession.

Note
Successful completion of Visual Communication Area Portfolio Review - ART 205.required

Repeat for Credit
N

Requisites
Pre-Req: ART 205.

Typically Offered
Fall

ART 290 - Visual Communication Design I: Typography and Design Principles

Credits: 3

Studio design experience introducing the formal and semiotic aspects of typographic systems as applied in design. Students implement the elements and principles of visual language to communicate through typography. Topics include characteristics, classifications, tools, and methods for communicating with typography as content, form, and image. Concepts, skills, process activities, and methods introduced are applicable across all areas of design.

Note
Successful completion of Visual Communication Area Portfolio Review - ART 205.required

Repeat for Credit
N

Requisites
Prerequisite: ART 205

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

ART 291 - Introduction to Drawing

Credits: 3

Fundamental principles of drawing skills based on observation through the introduction of basic materials and techniques.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

ART 300 - Special Studies in Art

Credits: 1-3

Specialized workshops or seminars conducted in studio, art therapy, art education, or art history.

Repeat for Credit

Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 301 - Human Form and Composition

Credits: 3

Building stylization and expressive image making of the human form with experimental methods: use of color, mono-print, mixed media. A connected and sustained studio time available during intersession only, providing students a working rhythm without interruption from other course work.

Note
Six hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: 180, ART 190.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 303 - Visual Communication Design Techniques I

Credits: 3

A hands-on experience intended to introduce non-majors to the visual and critical thinking skills that Visual Communication Designers use when creating print-based communication using text and image.

Repeat for Credit
N

Requisites
Prerequisite: ART 174 OR ART 180 OR ID 225 OR ENVD 201 OR permission of instructor

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 304 - Digital Illustration

Credits: 3

Introductory survey of digital drawing and illustration techniques whereby students are introduced to digital illustration software, illustration generes, methods, and materials.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Aesthetic Interpretation

ART 305 - Introduction to Museum Studies

Credits: 3

Fundamentals of museum work including specific museum functions, role of professional personnel, and proper care and handling of art works.

Repeat for Credit
N

Typically Offered
Intersession

ART 310 - Visual Communication Design II: Methods and Processes

Credits: 3

Studio design course focused on processes and methodologies applicable to understanding and solving visual communication design problems.

Repeat for Credit
N

Requisites
Prerequisite: ART 290.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 311 - Drawing: Expanded Media

Credits: 3

Extension of Introduction of Drawing, observational drawing enhanced by composition, expanded materials and techniques.

Note
Six hours lab.

Repeat for Credit
N

Requisites
Prerequisite: ART 190 or ART 291 or IDSN 225 or ENVD 201

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 313 - Fundamentals of Fiberart and Material Studies.

Credits: 3

Introduction to fiberart processes and innovative material as an art form in methods such as small scale tapestry weaving; fabric dye techniques; dye discharge techniques; fabric pigment applications of painting, stamping, printing; and non-loom basketry coiling or felting.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 315 - Basic 3D Modeling & Printing

Credits: 3

Explores the potential and limitation of 3D Printing through a build-intensive design project. Projects use industry standard 3D hardware and software.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 320 - Water Media

Credits: 3

Introduction to painting with water-based media through a variety of techniques. Emphasis is placed on learning transparent watercolor.

Note
Six hours studio.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 325 - Figure Drawing

Credits: 3

Sustained drawings of the human figure using a variety of media; introduction to human anatomy used by artists.

Note
Six hours lab.

Repeat for Credit
N

Requisites
Prerequisite: ART 190 or ART 291 or IDSN 225 or ENVD 201

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 330 - Digital Techniques in Visual Art

Credits: 3

Survey of the most frequently used programs in the studio arts and equipment necessary for successful navigation on the digital arena.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 331 - Introduction to Digital and Expanded Media

Credits: 3

Explores digital and expanded media and technology for artistic production including use of computers for graphics, sound, electronics, time-based art practice, installation, and spacial practices, interactive/performance, and programming. Students will apply these skills by relating them to contemporary issues and ideas within the expanded field of artistic production.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 335 - Introduction to Printmaking Techniques

Credits: 3

A foundational survey of printmaking techniques for image development and creative expression. Individual and collaborative print based studio work in intaglio (etching), lithography, relief (woodcut), stencil (screen print), digital, or monoprint printmaking processes. Emphasis on exploration and experimentation through the handmade print and the graphic aesthetic.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 340 - Introduction to Sculpture

Credits: 3

An introduction to sculptural practices and expanded media, such as fundamental techniques and concepts in modeling and construction of three-dimensional forms, woodworking, casting, and installation.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 345 - Introduction to Oil Painting

Credits: 3

Technical aspects of oil painting materials, including preparation of grounds and use of limited color palettes.

Note
Six hours studio.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 350 - Drawing III

Credits: 3

Continuation of Drawing II, emphasizing exploration in mixed media.

Note
Six hours lab. May be taken for two semesters.

Repeat for Credit
N

Requisites
Prerequisite: ART 325.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 355 - Introduction to 3D Modeling for Jewelry, Ceramics and Design

Credits: 3

Techniques in the design of 3D objects with an emphasis on jewelry and ceramics employing various media.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 360 - Introduction to Wheel Thrown Ceramics

Credits: 3

Introduction to wheel thrown ceramics through use of the pottery wheel. **This course is designed for students majoring in other departments as well as art majors.**

Note
6 hour studio

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 365 - Introduction to the Ceramics Spectrum

Credits: 3

Introduces the spectrum of ceramics processes and techniques including hand building, slip casting, traditional glaze applications, and image transfer techniques.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 370 - Introduction to Metals and Jewelry

Credits: 3

Students will be introduced to basic forming and construction techniques and design processes for jewelry and small-scale metal objects.

Note
Six hours lab.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 380 - Introduction to Sound Art

Credits: 3

Includes digital, electronic, environmental, and acoustic sound in the visual arts context. Sound as component of a studio practice; fundamentals of recording, digital sound editing, electronics, time-based structures, and innovative presentation methods.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State 8
Aesthetic Interpretation

ART 390 - Design for Digital Media I

Credits: 3

Examines the methods and processes of designing interactive digital interfaces and products. Explores basic html and css, iOS design guidelines, digital typography, usability research, testing, and presentation of findings.

Repeat for Credit
N

Requisites
Prerequisite: ART 290 or permission.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 395 - Introduction to Digital Photography

Credits: 3

Understanding of Photography as an art form. DSLR operation, composition and Photoshop, historical perspectives and contemporary photography as art practice. Cameras can be rented.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 399 - Honors Seminar in Art

Credits: 3

Selected topics in art.

Repeat for Credit
N

Requisites
Prerequisite: For students in the honors program only.

Typically Offered
Other

ART 400 - Visual Communication Design III: Storytelling in Design

Credits: 3

Organize complex systems of text and image material. May address photographic, sequential, or time-based media.

Repeat for Credit
N

Requisites
Prerequisite: ART 290

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 404 - Minor in Art - Capstone

Credits: 0

Students enroll in tis during their final semseter as an art minor

Note
Taken in conjunction with the last three credit hours in the 18 hour minor in Art.

Repeat for Credit
Y

Requisites
Prerequisite: 15 credit hours of Art that fulfills the Art minor.

Corequisite: Final 3 credit hours of Art for the Art minor.

Typically Offered
Fall, Spring

ART 405 - A and D: Undergraduate Research Studio

Credits: 3

Delves into contemporary art, exploring it as a form of research and cultivating critical thinking skills. Students will analyze individual artists and art movements in the context of contemporary art theory, all while gaining insights into professional practice and development strategies. Combines readings, lectures, discussions, and hands-on studio sessions, complemented by online resources for staying updated on the latest developments in the field

Repeat for Credit
Y

Requisites
Corequisite: ART 205

Typically Offered
Fall, Spring

ART 407 - Visual Communication Design Topics

Credits: 1-3

Specialized Visual Communication Design course on varying topics.

Repeat for Credit
Y

Requisites
Prerequisites: ART 303 or ART 290 or instructor permission

Typically Offered
Fall, Spring, Summer

ART 410 - BFA Exhibition or Portfolio Presentation

Credits: 2

Course builds an awareness of professional practices and emphasizes the production and exhibition of a final portfolio of the student's art work. Development of evaluative skills involved in the resolution and presentation of a body of individual work.

Note
Students must take their final 3 credits in their concentration during the same semester as ART 410.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ART 415 - Undergraduate Art Studio Assistant in Faculty Research

Credits: 1-3

Students will assist faculty with creative research. Students will gain invaluable firsthand skills and insight of professional art practices. Research activities include but are not limited to production of artwork, preparation of art making materials, exhibition and curatorial research, and professional practice.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 420 - Visual Communication Design IV: Design and Context

Credits: 3

Explores issues related to the creation of visual design systems in the media and contexts within which they may be deployed.

Repeat for Credit
N

Requisites
Prerequisite: ART 310 and ART 400.

Typically Offered
Spring

ART 430 - Independent Study-Ceramics

Credits: 1-3

Hands-on experience in studio workflow and project management.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 435 - Independent Study-Crafts

Credits: 1-5

Work in crafts after competency has been achieved. Personal development is emphasized.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ART 440 - Independent Study-Drawing

Credits: 1-5

Work in drawing after competency has been achieved. Personal development is emphasized.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 445 - Independent Study-Graphic Design

Credits: 1-5

Work in graphic design after competency has been achieved. Personal development is emphasized.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 450 - Independent Study-Metalsmithing

Credits: 1-5

Work in metalsmithing and jewelry after competency has been achieved. Personal development is emphasized.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 455 - Independent Study-Painting

Credits: 1-5

Work in painting after competency has been achieved. Personal development is emphasized.

Note
Permission of instructor and painting area head required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 460 - Independent Study-Printmaking

Credits: 1-5

Work in printmaking after competency has been achieved. Personal development is emphasized.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 470 - Independent Study-Water Color

Credits: 1-5

Work in water color after competency has been achieved. Personal development is emphasized.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 475 - Independent Study in Photography

Credits: 1-3

Advanced course in photography with an emphasis on developing personal expression using photographic media, under the mentorship of the instructor.

Note
Six hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: ART 180 or instructor consent.

Typically Offered
Fall, Spring

ART 480 - Independent Study/Research Computer Art and Design

Credits: 1-5

This course is intended to provide students an opportunity to focus on a specific visual project/problem that will be solved using computers to focus on as the primary tool/medium.

Repeat for Credit
Y

Requisites
Prerequisite: ART 400. Corequisite: ART 575.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 503 - Visual Communication Design Techniques II

Credits: 3

Develops an intermediate level practical understanding of the issues that Visual Communication designers face when they seek to combine words, ideas, and images into a more meaningful whole. Students will be exploring how the manipulation of the arrangement of text and image can effect visual organization, interest, and meaning. Focuses on visual conception and composition rather than software application, and is not Intended for students majoring in Visual Communication Design.

Note
Not Intended for students majoring in Visual Communication Design.

Repeat for Credit
N

Requisites
Prerequisite: ART 303 or permission of instructor

Typically Offered
Spring, Summer

ART 505 - A and D: Senior Research Studio

Credits: 3

An intensive experience preparing Art Majors for diverse career opportunities post-graduation. Focuses on aligning personal career goals and artistic strengths with contemporary society through seminars, studio work, and on-line resources.

Repeat for Credit
N

Requisites
Prerequisite: ART405

Typically Offered
Fall or Spring

ART 510 - Advanced Techniques in Jewelry and Metal Design

Credits: 3

Introduction and exploration of advanced techniques in jewelry and metal design, such as chasing, stone setting, enameling, various metal forming, and direct casting of 3d printed resin models.

Repeat for Credit
N

Requisites
Prerequisite: ART 370 or ART 103.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 523 - Digital and Expanded Media Special Topics

Credits: 3

Specialized studio art experience exploring technology and experimental media in the context of contemporary fine art production. Topics may include community art practice, systems art, ecology-based art, interactive media, code-based art and locative media.

Repeat for Credit
Y

Requisites
Prerequisite: ART 331 or permission of instructor.

Typically Offered
Fall, Spring

ART 529 - Color Printmaking Workshop: Creative Process and Investigation

Credits: 3

Individual and collaborative studio work in intaglio (etching), lithography, relief printing (woodcut), screen printing, or monoprint printmaking processes. Color theory, experimental and practical techniques provide experience in multicolor and intermedia graphic production. Emphasis on multi-color intermedia print development through creative process and material investigation.

Repeat for Credit
Y

Requisites
Prerequisite: ART 335.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 530 - Color Printmaking Workshop: Experimental Techniques and Vision

Credits: 3

Individual and collaborative studio work in intaglio (etching), lithography, relief printing (woodcut), screen printing, or monoprint printmaking processes. Emphasis on multi-color intermedia print development through experimental techniques and artistic vision.

Note
May be taken for 12 credit hours maximum.

Repeat for Credit
Y

Requisites
Prerequisite: ART 335.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 531 - Ceramic Sculpture Studio

Credits: 3

Sculptural ideas and methods in ceramics are explored through a variety of hand-building techniques. This course is designed for students majoring in other departments as well as art majors.

Note
Six-hour studio

Repeat for Credit
Y

Requisites
Prerequisite: ART 365

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

ART 545 - Twentieth Century Art History I: Post-Impressionism to Cubism

Credits: 3

Origins and development of twentieth century western art from 1880 to 1914.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 550 - Twentieth Century Art History II: Dada to Surrealism

Credits: 3

Origins and development of twentieth century western art from 1914 to 1950.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 560 - Advanced Independent Study

Credits: 1-3

Designed for advanced-level art students seeking to explore and develop their artistic skills in a self-guided manner. With instructor permission students will have the flexibility to choose their preferred medium, materials, making it a highly personalized learning experience reserved for students who have demonstrated consistent and substantial motivation in independent, student-lead research.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 561 - Painting Theme and Variation

Credits: 3

Painting, with emphasis on subject and concept as the catalyst for development. Painting's dialogue will be explored through variations on theme, content, and subject in both historical and contemporary contexts.

Note
Six hour studio

Repeat for Credit
Y

Requisites
Junior or Senior standing preferred

Typically Offered
Fall

ART 563 - Topics in Digital Photography

Credits: 3

An intermediate level exploration of digital photography, students continue to develop their understanding of DSLR camera and software-based techniques to produce artwork. Students work on practical projects using digital imaging technologies such as DSLR capture, scanning, and professional inkjet printing, and research the use of such technologies by contemporary artists.

Note
Required Hardware: Laptop computer (not tablet) capable of running the current desktop version of Adobe CC Creative Cloud Software; Required Software: Adobe Creative Cloud subscription. Cameras can be rented from the Art Department.

Repeat for Credit
Y

Requisites
Prerequisite: ART 395 or permission of instructor

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ART 565 - Wheel Thrown Ceramics Studio

Credits: 3

Elements of intermediate functional ceramics and object design are explored with the pottery wheel, and intended for students majoring in other departments as well as art majors.

Repeat for Credit
Y

Requisites
Prerequisite: ART 365 or ART 102

Typically Offered
Fall

ART 568 - Topics in Analog Photography

Credits: 3

An intermediate level exploration of photography, students continue to develop their analog photographic processes such as film developing, darkroom printing, and several historic photographic processes. Students work on practical projects using medium and large format film cameras, professional studio lighting equipment, and research the use of such technologies and processes by contemporary artists.

Note
Required Hardware: Laptop computer (not tablet) capable of running the current desktop version of Adobe CC Creative Cloud Software; Required Software: Adobe Creative Cloud subscription. Cameras can be rented from the Art Department.

Repeat for Credit
Y

Requisites
Prerequisite: ART 395 or permission of instructor

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 570 - Painting Materials Application

Credits: 3

Painting's dialogue will be explored through conventional and experimental materials and process in both historical and contemporary contexts. Emphasis on materials and process as synergists for subject, representation and content.

Note
Six hours studio.

Repeat for Credit
Y

Requisites
Prerequisite: Junior or Senior standing preferred

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

ART 572 - Drawing Methods-Contemporary Approaches

Credits: 3

Contemporary approaches to drawing.

Repeat for Credit
N

Requisites
Requisites ART 311 or ART 325

Typically Offered
Fall

ART 575 - Web Art

Credits: 3

Introduction to interactive web and network-based artistic practice. Topics covered: network art, interactive art, locative media, html, and code-based art. Explores the history of web and network-based art practice.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ART 576 - Visual Communication Design Capstone I: Research

Credits: 3

Development of a research trajectory to culminate in the planning and execution of the capstone project in the Spring semester.

Repeat for Credit
N

Requisites
Prerequisite: ART 310, ART 400, ART 420.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

ART 577 - Matrix Studio and Business Practices

Credits: 3

Students are selected by portfolio review, design projects are completed to client specifications. Professional design management, ethics, setting up a business, client/designer relationships, and contractual options, billing practices, and operating procedures will be covered.

Note
Six hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: ART 400 and must be a major.

Typically Offered
Fall, Spring

ART 580 - Visual Communication Design Capstone II: Project

Credits: 3

Conduct research, planning, and execution of a capstone project in visual communication design.

Repeat for Credit
Y

Requisites
Prerequisite: ART 420, ART 576.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 582 - Internships in Visual Art & Design

Credits: 0-3

Emphasis on problem solving and related skills in visual art, art history, and graphic design in a professional setting.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 585 - Visual Communication Design BFA Portfolio and Professional Practices

Credits: 2

Develops awareness of professional practices and helps prepare the students for professional life after graduation. Requires a final design portfolio and public presentation and/or exhibit.

Note
Must be taken simultaneously with ART 580. Students must take their final 3 credits in their concentration during the same semester as ART 585.

Repeat for Credit
N

Requisites
Prerequisite: ART 576; Corequisite: ART 580

Typically Offered
Spring

ART 590 - Design for Digital Media II

Credits: 3

Continues the exploration of designing for dynamic media

including developing competencies in the areas of visual narrative, rhythm, space, animation, sound and video.

Repeat for Credit
N

Requisites
Prerequisite: ART 390

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 599 - Drawing Methods – Thematic Approaches

Credits: 3

Developing a thematic body of drawings.

Repeat for Credit
Y

Requisites
Requisites ART 311 or ART 325

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

ART 600 - Drawing Workshop

Credits: 3

Research with emphasis on proposing a self-directed drawing project.

Repeat for Credit
Y

Requisites
Prerequisite: ART 311 or ART 325

Typically Offered
Spring

ART 601 - Graphic Design History/Theory/Criticism

Credits: 3

Study of significant works from late nineteenth century to the present to provide understanding of the development and character of graphic design, artists, and designers.

Note
Three hours lecture.

Repeat for Credit
N

Typically Offered
Fall, Spring

ART 602 - Twentieth Century Art History III: Abstract Expressionism to Pop Art

Credits: 3

Art movements beginning with abstract expressions and continuing through pop, op, minimal, and conceptual art movements up to 1980.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art

Credits: 3

The art movements of the 1980s beginning with photo-realism and continuing through pattern and decoration, new image art, neo-expressionisms, and neo-abstraction.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 604 - Greek Art History

Credits: 3

The art of classical Greece, from its Aegean origins through the Hellenistic period.

Repeat for Credit
N

Requisites
Prerequisite: ART 195 or ART 196.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 606 - Visual Art Administration & Leadership

Credits: 3

Surveys facets of management in the visual arts as preparation for work in non-profit museums, galleries or commercial galleries, and working within communities generating projects of impermanence such as performance, social practice and generosity works, pop-up exhibitions, and on-line art projects.

Repeat for Credit
N

Requisites
Prerequisite: Junior or Senior standing preferred.

Typically Offered
Spring, Summer

K-State 8
Aesthetic Interpretation

ART 608 - Special Studies in Art

Credits: 3

Specialized workshops or seminars conducted in studio, art therapy, art education, or art history.

Repeat for Credit
Y

Requisites
Prerequisite: Three credit hours in the relevant area.

Typically Offered
Fall, Spring, Summer

ART 610 - Figure Drawing II

Credits: 3

Continuation of Figure Drawing I, with emphasis on individual expression.

Note
Six hours lab. May be taken for four semesters.

Repeat for Credit
Y

Requisites
Prerequisite: ART 325.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 612 - History of Italian Renaissance Art

Credits: 3

Renaissance art of Italy from the thirteenth through the sixteenth centuries.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 613 - History of Northern Renaissance Art

Credits: 3

Renaissance Art of Northern Europe from the fourteenth through the sixteenth century.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 614 - Italian Renaissance Architecture: Patronage and Construction

Credits: 3

Renaissance architecture of central Italy. A case-study approach with a focus on aesthetics, construction, function, and patronage.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 616 - Motion Design

Credits: 3

Specialized training in motion design.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Summer

K-State 8
Aesthetic Interpretation

ART 621 - Advanced Concepts in Digital Video

Credits: 3

Introduction to digital video and experimental practices related to moving images and storytelling.

Repeat for Credit
Y

Requisites
Prerequisite: ART 395

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

ART 622 - Baroque Art History

Credits: 3

The development of the baroque period in northern and southern Europe, from its beginnings in the early seventeenth century to the rococo style of the eighteenth century.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 623 - Advanced Concepts in Digital and Expanded Media

Credits: 3

Studio exploration of advanced concepts in Digital and Expanded Media artistic practice.

Repeat for Credit
Y

Requisites
Prerequisite: ART 331

Typically Offered
Fall, Spring

ART 626 - Advanced Studies in Photography

Credits: 3

Advanced work in photography with an emphasis on personal development. Focuses on developing well-researched concrete body of work based on prior experience, and relevant new research in the history, and contemporary practices in art photography.

Note
Students concentrating in Photography should ideally repeat this course two or more number of times.

Repeat for Credit
Y

Requisites
Prerequisite: ART 395, ART 563.

Typically Offered
Fall, Spring

ART 627 - Advanced Study in Photography II

Credits: 3

Advanced work in photography with an emphasis on personal development. Focuses on developing well-researched concrete body of work based on prior experience, and relevant new research in the history, and contemporary practices in art photography.

Note
This is one of the two capstone courses that students will take in their senior year.

Repeat for Credit
Y

Requisites
Prerequisite: ART 395, ART 563.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 628 - Foreign Studies in Art History

Credits: 3-6

Participation in art history study abroad.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ART 629 - Foreign Studies in Visual Communication Design

Credits: 3-6

Participation in Visual Communication study abroad.

Repeat for Credit
Y

Requisites
Art department major students after completion of second year in their
degree program

Typically Offered
Summer

ART 630 - Foreign Studies in Studio Art

Credits: 3-6

Participation in studio art study abroad.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ART 631 - Contemporary Media Seminar

Credits: 3

A review of trends in contemporary media and visual communication.

Note
Studio/lecture.

Repeat for Credit
Y

Requisites
Prerequisite: ART 575.

Typically Offered
Fall, Spring

ART 632 - The Development of American Art

Credits: 3

American art from the Colonial period to the beginnings of abstract expressionism in the early 1940s, with major emphasis on the late nineteenth and early twentieth century developments.

Repeat for Credit
N

Requisites
Prerequisite: ART 195 or ART 196.

Typically Offered
Fall, Spring

ART 634 - History of Modern Sculpture

Credits: 3

Directions in sculpture since the time of Rodin.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 635 - Advanced Printmaking Workshop: Illustration and Experimentation

Credits: 3

Advanced level individual and collaborative print based studio work in intaglio (etching), lithography, relief printing (woodcut), screen printing, digital, or monoprint printmaking processes. Emphasis on illustration of ideas and technical experimentation.

Repeat for Credit
Y

Requisites
Prerequisite: ART 335.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 636 - Advanced Printmaking Workshop: Imagination and Innovation

Credits: 3

Advanced level individual and collaborative print based studio work in intaglio (etching), lithography, relief printing (woodcut), screen printing, digital or monoprint printmaking processes. Emphasis on imagination and technical innovations.

Repeat for Credit
Y

Requisites
Prerequisite: ART 335.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 642 - Nineteenth Century Art History

Credits: 3

Painting, sculpture, and architecture of the late eighteenth and nineteenth centuries, with emphasis on the art of France.

Repeat for Credit
N

Requisites
Prerequisite: ART 195 or ART 196.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

ART 645 - Sculpture II

Credits: 3

Emphasis on artistic development through exploratory experiences in the various media. Advanced wood working processes, mold making, foundry techniques and welding processes.

Note
Six hour lab.

May be taken for four semesters.

Repeat for Credit
Y

Requisites
Prerequisite: ART 340.

Typically Offered
Fall, Spring

ART 650 - Painting Topics

Credits: 3

Individualized studio work in varied painting media directed toward identifying and developing a personal vision and mode of expression. Working primarily from the basis of subject, concept, and degree of representation as catalyst for form and material choice, a range of approaches will be explored within both contemporary and historical contexts. Emphasis for graduating seniors will be on producing a cohesive body of work in preparation for the BFA exhibition.

Note
Six hours studio

Repeat for Credit
Y

Requisites
Prerequisite: ART 345

Typically Offered
Fall or Spring

ART 652 - Advanced Painting Topics II

Credits: 3

Continuation of ART 650. Individualized studio work in varied painting media for personal expression. Approaches explored within both contemporary and historical contexts. Seniors will contribute to their cohesive body of work in preparation of BFA exhibition.

Note
Six hours studio.

Repeat for Credit
Y

Requisites
Prerequisite: ART 320, ART 345.

Typically Offered
Spring

ART 653 - Painting Methods

Credits: 3

Individualized studio work in varied painting media directed toward identifying and developing a personal vision and mode of expression. Working from the primary basis of methods, strategies, materials and process, painting's potential for interpretation of subject, representation, and content will be explored within both contemporary and historical contexts. Emphasis for graduating seniors will be on producing a cohesive body of work in preparation for the BFA exhibition.

Note
Six hours studio

Repeat for Credit
Y

Requisites

Prerequisite: ART 345

Typically Offered
Fall or Spring

ART 654 - Women in Art

Credits: 3

The work of women artists from early Middle Ages to the twentieth century, with emphasis on the contemporary period.

Repeat for Credit
N

Requisites
Prerequisite: ART 195 or ART 196.

Typically Offered
Fall, Spring

ART 655 - Advanced Studio in Metals and Jewelry

Credits: 3

Explore concepts and processes in contemporary metal art and jewelry field. Develop individual research projects through assignments, individual meetings, presentations, and group critiques. Students in capstone section will focus on creating a unique body of work for BFA show and portfolio.

Note
This course is for senior students. Nine hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: Art 370 or Art 103 or permission of instructor

Typically Offered
Fall, Spring

ART 656 - Art Museum/Gallery Internship

Credits: 3

Practical professional art museum or gallery experience in appropriate institutions of at least 120 hours full-time or 150 hours part-time. May include processing of collections, conservation, cataloging, archive and library maintenance, education and outreach, and/or planning and preparation of exhibits.

Note
Consent of Art Department internship advisor required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 660 - Sculpture

Credits: 3

Conduct independent, individually-driven creative work for research, planning, and execution of a capstone project in sculptural practice for BFA Studio Art exhibition.

Note
Instructor permission required for non-majors.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ART 661 - Advanced Painting Methods II

Credits: 3

Individualized studio work in varied painting media directed toward identifying and developing a personal vision and mode of expression. Working from the primary basis of methods, strategies, materials and process, painting's potential for interpretation of subject, representation, an content will be explored within both contemporary and historical contexts. Emphasis for seniors will be on producing a cohesive body of work in preparation of BFA exhibition.

Note
Six hours studio.

Repeat for Credit
Y

Requisites
Prerequisite:ART 320, ART 325, and one semester of ART 653 or ART 650.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

ART 662 - Southwestern Indian Arts and Culture

Credits: 3

The development of southwestern Indian silversmithing, weaving, pottery, basketry, and painting from the prehistoric period through the twentieth century.

Repeat for Credit
N

Requisites
Prerequisite: ART 195 or ART 196.

Typically Offered
Fall, Spring

ART 665 - Contemporary Ceramics Workshop

Credits: 3

Contemporary ceramic practices are explored through concept-based projects using mixed media and ceramic techniques.

Note
Six hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: ART 365 or ART 102

Typically Offered
Spring

ART 667 - Ceramic Design Workshop

Credits: 3

Explores both handmade and digital approaches to prototypes and production for functional ceramics.

Note
Six hours lab.

Repeat for Credit
Y

Requisites
Prerequisite: ART 365 or ART 102

Typically Offered
Fall

ART 675 - History of Ceramics

Credits: 3

History and development of ceramics; study of the use of pottery and other forms of ceramics from earliest known examples to present day.

Repeat for Credit
N

Typically Offered
Fall, Spring

ART 679 - Color Experiments, Theory and Application

Credits: 3

Explores the interaction of color through a variety of exercises, both practical and experimental. Emphasis on visual perception and the relative use of color. Color's potential in illusionist structures and visual communication, color systems.

Repeat for Credit
N

Requisites
Prerequisite: ART 180.

Typically Offered
Intersession

ART 680 - Topics in Contemporary Metals and Jewelry

Credits: 3

Explores concepts and processes in contemporary metal art and jewelry.

Repeat for Credit
Y

Requisites
Prerequisite: ART 370 or ART 103 or permission of instructor

Typically Offered
Fall, Spring

ART 682 - Metals and Jewelry Workshop

Credits: 3

Application of concepts and processes in contemporary metal art and jewelry through individual creative research and making.

Repeat for Credit
Y

Requisites
Prerequisite: Art 370 or Art 103 or permission of instructor

Typically Offered
Spring

ART 685 - Advanced Independent Study Design

Credits: 1-18

Advanced work in design-related subjects.

Repeat for Credit
Y

Requisites
Prerequisite: Full sequence of courses related to problem subject matter.

Typically Offered
Fall, Spring, Summer

ART 686 - Advanced Studies in Ceramics Studio

Credits: 3

Explores ceramic material processes and characteristics through individual creative research projects. The capstone section is taken in conjunction with the BFA exhibition.

Repeat for Credit
Y

Requisites
Prerequisite: ART 565.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 687 - Ceramics Capstone

Credits: 3

Creation of a cohesive body of work in ceramics around a selected theme. The capstone section is taken in conjunction with the BFA exhibition.

Repeat for Credit
Y

Requisites
Prerequisite: ART 565.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 690 - Techniques in Teaching Art

Credits: 1-18

Lectures and class discussion of methods, consideration of suitable laboratory equipment, use of illustrative material, and preparation of courses of study.

Repeat for Credit
N

Requisites
Prerequisite: Twelve hours in art or consent of instructor.

Typically Offered
Fall

ART 692 - Drawing Workshop II

Credits: 3

The senior capstone course, dedicated to refining individually determined drawing portfolio.

Repeat for Credit
Y

Requisites
Prerequisite: ART 572 or ART 599.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

ART 695 - Topics in Art History

Credits: 3

Exploration of selected topics in art history.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 820 - Graduate Graphic Design/Visual Communications

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 822 - Graduate Digital Media

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ART 825 - Professional Practices

Credits: 3

Selected topics dealing with career preparation skills such as developing a professional and teaching portfolio, computer techniques for promoting one's art, establishing relationships with galleries/museums, and agencies, basic techniques of exhibition design and installation, techniques of critiquing works of art, etc.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring

ART 826 - Graduate Seminar

Credits: 3

Emphasis upon the exchange of ideas and exploration of critical theory. Direct involvement in critiques, readings, discussions, and field trips. Each semester a different theme will guide a pertinent topic from within the field.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ART 830 - Graduate Sculpture Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 835 - Graduate Drawing Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 845 - Graduate Painting Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 855 - Graduate Printmaking Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 865 - Graduate Ceramics Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 875 - Graduate Metalsmithing and Jewelry Studies

Credits: 1-18

Advanced creative work with emphasis on technical and visual research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 885 - Graduate Independent Studies

Credits: 1-5

Advanced individual work offered in studio areas of ceramics, graphic design, digital media, drawing, painting, printmaking, sculpture, and metalsmithing and jewelry.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ART 887 - Contemporary Art Theory and Criticism

Credits: 3

Discussion of the principal theories influencing production and criticism of contemporary art.

Repeat for Credit
Y

Typically Offered
Fall

ART 888 - Graduate Studies in Photography

Credits: 1-10

Focus on the conceptual nature of the photographic medium. Students will be encouraged to produce work useful for their graduate thesis. Course readings will be on photo theory and image relationships.

Note

This course may be taken after or concurrently with Graduate Independent Study.

Repeat for Credit
N

Typically Offered
Fall, Spring

ART 899 - Research in Art

Credits: 1-18

Research which may form the basis for the master's of fine art thesis or report.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 100 - Special Topics in Animal Science

Credits: 0-6

Seminars of special interest. Will be offered upon sufficient demand in selected areas relating to animal science.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 101 - Foundations in Animal Sciences & Industry

Credits: 1

Introduction to the animal sciences & industry programs, activities, resources, faculty and career opportunities.

Note
Required of all freshmen in animal sciences & industry.

One hour seminar a week.

Repeat for Credit
N

Requisites
Prerequisite: Freshman in ASI or PRVAG.

Typically Offered
Fall

ASI 102 - Principles of Animal Science

Credits: 3

Basic principles which apply to animal agriculture; survey of the industry; types, purposes, and products of livestock; principles of breeding, selection, nutrition, lactation, reproduction, management, and marketing.

Note
Three hours recitation a week. ASI 105, 106, and 107 are companion courses.

Repeat for Credit
N

Typically Offered
Fall, Spring

ASI 105 - Livestock Lab

Credits: 1

An introductory laboratory to expose students to breeding and market types of the primary production livestock species (beef cattle, swine, sheep, and meat goats), including a comparison of the live animal and animal products (meat and wool).

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: ASI 102 or concurrent enrollment.

Typically Offered
Fall, Spring

ASI 106 - Dairy Lab

Credits: 0.5

Introduction to the dairy industry.

Note
Two hours of lab a week for eight weeks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ASI 107 - Companion Animal Lab

Credits: 0.5

Introduction to the companion animal industry.

Note
Two hours lab a week for eight weeks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ASI 108 - Poultry Lab

Credits: 0.5

Introduction to the poultry industry.

Note
Two hours lab a week for eight weeks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ASI 109 - Horse Lab

Credits: 0.5

Introduction to the horse industry.

Note
Two hours lab a week for eight weeks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ASI 150 - Anatomy and Physiology of Domestic Animals

Credits: 3

An overview of anatomy and physiology in domestic animals. Emphasis will be placed on comparative anatomy across species.

Note
Two hours lecture and two hours laboratory per week.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ASI 202 - Domestic Animal Nutrition

Credits: 3

An overview of major nutrients required by domestic animals and their inclusion in common ingredients. Basic feedstuff identification and introductory diet formulation is included.

Note
2 hours lecture and 1 hour recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100 or higher or STAT 225 or higher

Typically Offered
Fall, Spring

ASI 210 - Intro to Animal Biotechnology

Credits: 3

This course is designed to provide undergraduates in the College of Agriculture hands-on experience in molecular biology and associated problem-solving for applications in agriculture. Students will learn the basics of laboratory book maintenance, pipetting, dilution and concentration calculations, DNA and RNA extraction and amplification, and protein isolation and quantification.

Repeat for Credit
N

Requisites
Prerequisite: Freshman or Sophomore Standing

Typically Offered
Fall

ASI 218 - Fundamentals of Nutrition

Credits: 3

Elementary principles of comparative nutrition of farm animals.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 or CHM 210. Recommended prerequisite: BIOL 198.

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

ASI 220 - Principles of Feeding

Credits: 3

Application of basic nutrition principles to the feeding of beef cattle, sheep, and swine; feedstuff evaluation; nutrient requirements; ration formulation and practical feeding problems.

Note
Two hours lecture and 2 hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100 and ASI 218.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ASI 261 - Animal Sciences and Industry Problems

Credits: 0-6

Independent guided studies in any of the many fields associated with animals and animal products.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 262 - Special Topics in Animal Science

Credits: 0-6

Topics of special interest. Will be offered upon sufficient demand in selected areas relating to animal science.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 290 - Computer Applications for Animal Sciences and Industry

Credits: 3

Applications of computer techniques and software to the solutions of problems in animal science and related food industries. Includes use of existing software packages for breakeven analysis, animal identification and health records, farm/ranch accounting, and electronic communication.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

ASI 300 - Animal Sciences and Industry Career Preparation

Credits: 1

Career exploration and life skill development. Assist students with internship development, interviewing skills, and professional communication formats.

Note
One hour seminar a week.

Repeat for Credit
N

Requisites
Prerequisite ASI major and Sophomore standing.

Typically Offered
Fall, Spring

ASI 301 - Transfer Foundations in ASI

Credits: 0

An overview of the Animal Sciences and Industry undergraduate program, including its undergraduate degree requirements, activities, and resources.

Note
One hour lecture per week for four weeks

Repeat for Credit
N

Requisites
prerequisite: ASI major

Typically Offered
Fall, Spring

ASI 302 - Advanced Animal Nutrition

Credits: 3

A study of advanced nutrition concepts for domesticated animals. Emphasis will include determination of nutrient requirements, application of biological and chemical processes to nutrient utilization, and considerations for diet formulation.

Note
3 hours lecture per week

Repeat for Credit
N

Requisites
Prerequisite: ASI 202, CHM 110 or higher, BIOL 101 or higher

Typically Offered
Fall, Spring

ASI 308 - Dairy Foods Processing and Technology

Credits: 3

The fundamental technologies used to process high quality dairy foods using freezing, heat membrane and pressure technologies. Changes in milk chemistry, microbiology and structure will be emphasized during the processing of butter, soft and hard cheeses, concentrated milks, ice cream and yogurt.

Note
Two hours of lecture and one two-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ASI 310 - Poultry and Poultry Product Evaluation

Credits: 2

Applied knowledge of physical and anatomical characteristics for evaluating poultry for egg and meat production. Evaluation of ready-to-cook poultry products as well as eggs on their exterior, interior, and broken-out appearance according to the latest USDA standards.

Note
Two two-hour labs a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 108.

Typically Offered
Fall

ASI 315 - Livestock and Meat Evaluation

Credits: 3

Evaluation of slaughter livestock and their carcasses as related to economically efficient production of red meat. Evaluation of breeding livestock on visual appraisal and performance records. A study of growth and the effects of nutrition, environment, and hormones on growth patterns. Breeds of livestock and performance programs will be studied.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 105. Recommended Foundation Course: ASI 102 or instructor consent.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

ASI 325 - Beginning Horse Evaluation

Credits: 2

Evaluation of conformation and athletic performance of horses. The use of records in selection and the influence of heredity, environment, and training on conformation and performance is addressed.

Note
Students will learn to give an oral justification of their evaluations. Four hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

ASI 326 - Advanced Horse Evaluation

Credits: 2

In-depth study of horse conformation and performance horse evaluation. Theories from various equine disciplines are covered with emphasis placed on interpreting horse industry standards, and abilities to communicate those ideals effectively.

Note
One hour lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 325.

Typically Offered
Fall

ASI 333 - Equine Enterprise Management

Credits: 1

Emphasis will be placed on management issues affecting the successful development and operation of an equine facility. Topics covered include health care, diet formulation, equipment needs, facility design and management, and equine business considerations.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Equine Science Certificate Program (CEQSC) and sophomore standing.

Recommended Prerequisite: ASI 109.

Typically Offered
Fall-Odd Years

ASI 345 - Beginning Horse Training and Management

Credits: 2

Inherited and learned behavior of the horse. Development of methods to communicate with the horse. Emphasis on handling and safety techniques. Opportunities to observe and practice advanced training techniques used in saddling and riding.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Equine Science Certificate Program (CEQSC).

Typically Offered
Fall

ASI 350 - Meat Science

Credits: 3

An introduction to the red meat industry relating the fundamental properties of muscle structure, chemistry, and physiology to meat quality, composition, processing, nutritional value, and marketing. The laboratory will demonstrate the conversion of animals to meat and by-products, and meat processing technology.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 198, or a course in chemistry.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

ASI 361 - Meat Animal Processing

Credits: 3

A student participation course in processing live animals into meat and by-products. Interrelates all phases of modern slaughter and processing techniques, inspection and processing, and related operations.

Note
2 hours lecture and 3 hours lab per week

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

ASI 370 - Principles of Meat Evaluation

Credits: 2

The use of subjective and objective standards to evaluate beef, lamb, and pork carcasses and wholesale cuts for both quality and yield of edible portion as they relate to value and consumer acceptance.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ASI 385 - Wool Grading and Evaluation

Credits: 1

A study of factors determining the commercial grades of wool and the desired fleece qualities of sheep, practice in judging and grading wool.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 102.

Typically Offered
Fall

ASI 390 - Principles of Livestock Selection

Credits: 2

Origin, development, characteristics, and adaptation of different breeds of livestock, with special emphasis on the selection of market and breeding animals.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 315.

Typically Offered
Fall

ASI 395 - Intermediate Horse Training & Management

Credits: 2

Application of training techniques used to start young horses under saddle. Emphasis is placed on developing groundwork skills needed to prepare horses for riding, including longeing, introduction to the saddle and bridle, and driving.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Equine Science Certificate Program (CEQSC).

Typically Offered
Spring

ASI 396 - Dairy Cattle Judging

Credits: 2

An introduction to the principles of evaluating dairy cattle on the basis of their physical characteristics. Interpretation of the official dairy cow unified score card. Training includes preparation and presentation of oral defense on one's placing of four cow classes.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 102 and ASI 106.

Typically Offered
Spring

ASI 400 - Farm Animal Reproduction

Credits: 3

Basic reproductive anatomy and physiology of cattle, horses, pigs, poultry, and sheep during the first half of the semester provides a solid basis for reproduction management topics which occupy the second half of the course.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 102, BIOL 198 and Sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

ASI 401 - Farm Animal Reproduction Laboratory

Credits: 1

Laboratory exercises with reproductive specimens of farm species. Will include adult male and female reproductive tracts, anatomical changes associated with estrous cycles and anestrus, pregnancy, fetal and placental development, semen characteristics, and ultrasonography.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 400 or concurrent enrollment.

Typically Offered
Spring

ASI 402 - Calving

Credits: 1

Emphasis will be placed on various aspects of managing parturition in cattle. Focus on stages of parturition, dystocia, and calf care.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 102 and junior standing.

Typically Offered
Spring

ASI 403 - Foaling

Credits: 1

Events associated with late gestation, parturition, and the early postpartum period in the horse. Emphasis will be placed on the important aspects of caring for and monitoring a pregnant/lactating mare and her newborn foal.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Equine Science Certificate Program (CEQSC) and sophomore standing.

Recommended Prerequisite: ASI 102 and ASI 109

Typically Offered
Spring

ASI 404 - Lambing

Credits: 1

Theoretical and practical experience in lambing. Management of the ewe and lambs at parturition, physiology of parturition, and common problems encountered by ewes and lambs during parturition.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 102 and junior standing.

Typically Offered
Spring

ASI 405 - Fundamentals of Milk Processing

Credits: 3

A study of fundamentals of processing, quality assurance, inspection, and marketing of fluid milk and related products in a modern market milk enterprise.

Note
Two hours lecture and one three-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

ASI 420 - Advanced Dairy Cattle Judging

Credits: 1

Advanced Dairy Cattle Judging

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 396.

Typically Offered
Fall

ASI 422 - Livestock Sales Management

Credits: 0-1

Hands-on experience in the planning, promotion, and production of a purebred livestock sale.

Repeat for Credit
Y

Requisites
Recommended prerequisite: Junior standing.

Typically Offered
Fall, Spring

ASI 435 - Advanced Dairy Products Evaluation

Credits: 0-1

Advanced training in the sensory analysis of dairy products, focusing on techniques for detecting and evaluating flavor, body and texture, and appearance. The course covers the scoring system used for dairy product judging and includes participation in collegiate dairy products evaluation contests.

Repeat for Credit
Y

Requisites
Prerequisites: FDSCI 335

Typically Offered
Spring

ASI 444 - Equine Health

Credits: 3

Fundamentals of equine health care and practical experience with the procedures routinely performed by horse owners in the overall management of their horse's well-being. Topics covered include basic anatomy and physiology, recognizing and managing disease conditions and emergency situations, and preventative management strategies and treatment options for a variety of health-related issues.

Note
Two hours lecture and two hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Equine Science Certificate Program (CEQSC) and sophomore standing.

Recommended Prerequisite: ASI 109.

Typically Offered
Fall

ASI 445 - Advanced Horse Training and Management

Credits: 2

Students will further develop skills acquired in ASI 345. Students will learn how to utilize advanced training practices and applications to enhance the training and performance of horses.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 345.

Typically Offered
Spring

ASI 470 - Form and Function in Livestock

Credits: 2

A detailed study of animal form and type; influence of type related to function; special training in presenting orally the relative merits of beef cattle, sheep, swine, and horses.

Repeat for Credit
N

Requisites
Prerequisite: ASI 390.

Typically Offered
Fall

ASI 495 - Advanced Meat Evaluation

Credits: 2

Advanced study in the evaluation of carcasses, wholesale

cuts, and retail cuts of beef, lamb, and pork. Application of grade standards and specifications to beef, lamb, and pork carcasses and subprimal cuts.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 370.

Typically Offered
Fall

ASI 500 - Genetics

Credits: 3

This course builds a foundation in essential genetic principles, starting with Mendelian inheritance and extending to molecular and population genetics.

Note
Three hours lecture a week. Students cannot earn credit for both ASI 500 and ASI 511. The on-campus students enroll in the spring. Online program students enroll in the fall.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198, MATH 100 and Junior Standing.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

ASI 501 - Principles of Animal Breeding

Credits: 1

Introduction to the basic principles of quantitative genetics and their applications to selection and mating in animal populations.

Note
One hour recitation per week. Students cannot earn credit for both ASI 501 and ASI 511. The on-campus students enroll in the fall and online program students enroll in the spring.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500

Typically Offered
Fall, Spring

ASI 504 - Equine Reproduction Management

Credits: 3

Overview of the physiological mechanisms involved in equine reproduction and the scientific reasoning behind breeding management decisions. Recent advances in equine reproductive technology will be highlighted and relevant research will be incorporated into the presentations.

Note
Three hours lecture a week

Repeat for Credit
N

Requisites
Prerequisite: Junior standing. Recommended prerequisite: ASI 400.

Typically Offered
Spring

ASI 505 - Equine Reproduction Management Lab

Credits: 1

This course is the laboratory complement to ASI 504. It includes demonstrations and hands-on exercises focused on learning equine breeding techniques. Topics will include mare and stallion handling, estrus detection, semen collection and processing, and artificial insemination.

Note
Four hours lab a week for eight weeks

Repeat for Credit
N

Requisites
Corequisite ASI 504

Typically Offered
Spring

ASI 510 - Animal Breeding Principles

Credits: 3

The genetic principles of evaluation, selection and mating systems used in beef, dairy, sheep, swine, poultry, horse and companion animal breeding. Intended for ASI majors and minors.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 102 and ASI 500.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ASI 511 - Applied Animal Breeding and Genetics

Credits: 4

A combined animal breeding and genetics course featuring quantitative genetics and how the principles of genetic evaluation, natural and artificial selection, genomics, and mating systems are utilized for genetic improvement in livestock, horse, and companion animal species. This course also includes an introduction to Mendelian, molecular, and population genetics and their applications in livestock breeding.

Note
Three hours lecture and one hour recitation per week. Students may not earn credit for both ASI 500 + 501 and ASI 511. The on-campus students enroll in the fall. Online program students enroll in the spring.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 198, MATH 100, junior standing

Typically Offered
Fall, Spring

ASI 512 - Bovine Reproductive Technologies

Credits: 2

Reproductive technologies used in management of cattle including the physiology of the estrous cycle, embryo viability, and fetal development. Practical training in reproductive management technique.

Note
One hour lecture and five hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 400, senior standing and consent of instructor.

Typically Offered
Fall

ASI 515 - Beef Science

Credits: 3

A comprehensive course covering all phases of the beef cattle industry. Practical application of nutrition, breeding, physiology of reproduction, merchandising, risk management and related areas. Special emphasis on management systems of raising, growing and finishing beef cattle.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Fall, Spring

ASI 520 - Companion Animal Management

Credits: 3

General biology and management of pets in zoos, kennels and at home. Working safely with companion animals. Management of animals in kennels, shelters, research facilities and zoos. Regulatory issues of small animals used as companion pets and in laboratory research. Interactive discussion and written skills will be emphasized.

Note
Three hours of lecture/recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing. Recommended prerequisite: ASI 107.

Typically Offered
Spring

ASI 521 - Horse Science

Credits: 3

A study of the horse industry in the United States, breed profiles, anatomy and evaluation, nutrition, reproduction, growth and development, health, exercise physiology, facilities and equipment, business considerations.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

ASI 524 - Sheep and Meat Goat Science

Credits: 3

Application of scientific management principles to the sheep and meat goat industries. Breeding, reproduction, nutrition, health, management and economic aspects as related to sheep and meat goat production.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

ASI 533 - Physiology of Domestic Animals

Credits: 3

Advanced application of physiology within domesticated animals.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 150, BIOL 198, junior standing

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

ASI 535 - Swine Science

Credits: 3

Application of basic scientific principles to the economical production of pork. Recommendations are made in breeding, reproduction, nutrition, health, housing, marketing, and management of swine production units of varying sizes.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Fall, Spring

ASI 540 - Principles of Animal Disease Control

Credits: 3

A study of the factors that influence animal health and disease control for students majoring in agriculture and other fields.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing.

Typically Offered
Spring

ASI 560 - Course-Based Undergraduate Research in Animal Sciences & Industry

Credits: 2

Formal undergraduate research in the area of Animal Sciences & Industry conducted as part of a conventional course. Class consists of 1-hour lecture and two hours of laboratory per week

Repeat for Credit
N

Requisites
Recommend Foundation Course: ASI 102.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

ASI 561 - Undergraduate Research in Animal Sciences & Industry

Credits: 0-3

Mentored undergraduate research experience in animal or food sciences.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ASI 595 - Current Issues in Animal Science

Credits: 3

This course reviews current issues in the animal science industry, with emphasis on understanding current scientific knowledge and challenges. It is intended to serve as a capstone course for students majoring in animal sciences and industry and should be taken in their last year.

Note
3 hours recitation per week

Repeat for Credit
N

Requisites
Prerequisite: COMM 106 or COMM 130, ENGL 200, ASI 202, ASI 300, and ASI 400

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

ASI 599 - Animal Science Internship

Credits: 1-6

Supervised professional experience in animal science related field. One credit hour per month full-time supervised and evaluated work hours. Internship proposal, evaluation by supervisor, self-assessment and presentation of internship required.

Note
Permission of supervising faculty member.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 600 - Applied Animal Biotechnology

Credits: 3

The objective of this course is to provide insight into the use of large animals in areas of biotechnology. The course will emphasize the use of livestock in food production as well as human medicine applications. A two-hour lecture per week will include topics such as marker assisted selection of livestock, in-vitro fertilization, transgenics, cloning and stem cell technology. A two-hour lab per week will complement material from lectures including PCR, DNA isolation and oocyte collection.

Note
Two-hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing and ASI 500 or ASI 511 or BIOL 398.

Recommended prerequisite: BIOCH 521.

Typically Offered
Spring

ASI 601 - Endocrinology and Lactation

Credits: 3

Provides an overview of the endocrine systems that regulate mammalian lactation and other related physiological processes. Topics include structure and function of important endocrine glands and their hormones, receptors, target tissues and physiological mechanisms of action. Emphasis will be placed on whole animal hormonal interactions that regulate nutrient availability for production of milk in dairy cattle and other dairy species. Upon completion of the course students should be able to identify important endocrine organs and hormones and apply their understanding to problems in dairy production.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and junior standing.
Recommended prerequisite: ASI 400, ASI 533 or BIOL 340.

Typically Offered
Fall

ASI 602 - Equine Breeding and Genetics

Credits: 2

Application of genetic and animal breeding principles to the horse. Emphasis on inheritance of color and diseases, as well as selection and mating programs.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Recommended prerequisite: ASI 500 and ASI 510.

Typically Offered
Fall-Even Years

ASI 610 - Processed Meat Operations

Credits: 2

A course in processed meats, relating to the science, technology, and quality control of curing, smoking, and sausage manufacturing.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 350

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ASI 620 - Beef Systems Management

Credits: 2

Development of beef enterprise business plans and

interacting with beef producers on topics related to cow-calf production, feedlot operations, seedstock operations, animal health, environmental management, and business management.

Note
One hour of lecture twice a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 515

Typically Offered
Spring

ASI 621 - Dairy Cattle Management

Credits: 3

Integration of biologic and economic aspects of dairy production with dairy farm organization, planning, operation and analysis. Field trips, dairy farm analysis and case studies will be used to supplement lecture material.

Note
Two hours recitation, two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Fall

ASI 635 - Gamebird Production and Management

Credits: 3

Principles and practices of upland game bird production including incubation and hatching, flight pen construction, nutritional management, predation control, disease management and meat processing.

Note
Two hours lecture and 2 hours lab per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 108.

Typically Offered
Spring

ASI 640 - Poultry Products Technology

Credits: 3

Emphasis on the technical problems that exist between production and consumption during the processing and marketing of poultry meat and egg products. A study of the microbiology of shell eggs, meat and manufactured products and the basic principles of quality assurance. Food manufacturing and product development are discussed.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ASI 108.

Typically Offered
Fall-Even Years

ASI 645 - Poultry Management

Credits: 3

A detailed study of the production and management practices involved in commercial poultry and game bird enterprises.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Fall-Odd Years

ASI 650 - Identification and Data Management of Food Animals

Credits: 2

Procedures and the conventions required to accomplish individual identification for farm animals. Principles of sound data collection and management. Principles of automatic information and data capture technologies for transforming data into information. Guest lectures from allied industry and livestock producers will illustrate various products, services and applications.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

ASI 655 - Behavior of Domestic Animals

Credits: 3

Students gain knowledge about the behavioral sciences' fields, historical perspectives, and scientific methodologies. Behavior is evaluated from a biological perspective (i.e. physiology, development, adaptation, and genetics). Students refine observational skills and identify methods for quantifying behavior and interpreting results to improve animal health, management, housing, training, and welfare.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

ASI 658 - Animal Growth and Development

Credits: 3

The molecular and endocrine mechanisms of prenatal and postnatal growth and development of muscle, bone, and adipose tissue will be discussed. Historical and current scientific literature will be reviewed and utilized to reinforce the topics covered.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 150 and Junior standing.
Recommended Prerequisite: a course in biochemistry

Typically Offered
Spring

ASI 660 - International Study Experience in Animal Science

Credits: 0-6

Seminar and travel course designed to prepare students before the experience and for students to analyze, critique, and report their experiences of an international experience associated with study tours or short courses. Course will focus on appropriate oral and written documentation of the student learning objectives for course experience. The academic topics will vary with each international activity.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

ASI 661 - Animal Sciences and Industry Problems

Credits: 0-18

Independent guided studies in any of the many fields associated with animals and animal products.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 662 - Special Topics in Animal Science

Credits: 0-6

Seminars of special interest. Will be offered upon sufficient demand in selected areas relating to animal science.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ASI 671 - Meat Selection and Utilization

Credits: 2

Emphasis on meat cut identification, muscle and bone anatomy, grades, fabricated meat, institutional cuts, specification writing, processing, meat preparation and shrinkage costs.

Note
One hour lecture-recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

ASI 675 - Monogastric Nutrition

Credits: 1

This advanced class provides a comparative summary of nutrition for domesticated monogastric animals, including digestive anatomy and the digestion, absoprtion, and metabolism of dietary energy (starch, fiber, lipids), proteins, vitamins, and minerals.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 220 or ASI 302

Typically Offered
Fall

ASI 676 - Avian Nutrition

Credits: 1

Nutritional requirements of game birds, caged birds, exotics, and commercial poultry. Interactive discussion will be emphasized.

Note
Three hours lecture a week for 5 weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 675 or concurrent enrollment.

Typically Offered
Fall-Even Years

ASI 677 - Companion Animal Nutrition

Credits: 1

This course is intended to be taken in sequence following Monogastric Nutrition ASI 675. The course will cover the unique nature of nutrition for companion animals with an emphasis on the nutrition of dogs and cats. Details regarding dentition, digestion, metabolism and nutritional requirements will be covered. In addition, an overview of the nutrition of other minor companion species will be provided. Besides standard assessments methods students will be expected to review current research publications on the topic and provide written and oral presentations germane to the topic.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 675 or concurrent enrollment.

Typically Offered
Fall-Odd Years

ASI 678 - Equine Nutrition

Credits: 1

Equine digestive anatomy and physiology. Nutrient requirements of the equine as they relate to growth, work, reproduction and lactation, as well as the relationship of nutrition to disease and environment. Practical management considerations and current equine nutrition research will be reviewed.

Note
Three hours lecture a week for 5 weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 675 or concurrent enrollment.

Typically Offered
Fall

ASI 679 - Swine Nutrition

Credits: 1

A study of the nutrient requirements of swine for various stages of production. Discussion of the interrelationships among nutrition and other factors (environment, management, and health) that affect performance.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 675 or concurrent enrollment.

Typically Offered
Fall

ASI 680 - Ruminant Nutrition

Credits: 1

Advanced study of nutritional management of different species of ruminant livestock. Topics covered include ruminal function, post-ruminal digestion and absorption, utilization of key nutrients, and discussion of select metabolic disorders.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 220 or 302.

Typically Offered
Spring

ASI 681 - Dairy Cattle Nutrition

Credits: 1

Nutritional management of dairy calves, replacement heifers, dry and lactating dairy cows. Diet formulation, feeding systems and current concepts in dairy cattle nutrition.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 680 or concurrent enrollment.

Typically Offered
Spring

ASI 682 - Formulation of Livestock and Poultry Diets

Credits: 1

Diet formulation for the major species of livestock and poultry. Major topics include hand formulation of diets: ingredient/nutrient cost comparisons; dry matter manipulation; computerized diet formulation; developing specifications for diets, supplements, basemixes and premixes; projecting animal performance; and feed labeling.

Note
Three hours lecture per week for five weeks.

Repeat for Credit
N

Requisites
Recommended prerequisite: ASI 675 or ASI 680 or concurrent enrollment.

Typically Offered
Fall

ASI 683 - Grazing Livestock Nutrition

Credits: 1

Nutritional management of grazing beef cattle. Nutrition of beef cows and stocker cattle maintained under grazing conditions. Major topics to be covered include nutrient requirements, forage intake, forage quality, and supplementation.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 680 or concurrent enrollment.

Typically Offered
Spring

ASI 684 - Nutrition of Feedlot Cattle

Credits: 1

Nutritional management of growing and finishing beef cattle maintained under confined feeding conditions. Utilization of cereal grains and byproducts in the production of beef. Major topics include nutrient requirements, feed processing, growing-finishing systems, feed additives, metabolic disturbances, and nutrient management.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 680 or concurrent enrollment.

Typically Offered
Spring

ASI 685 - Stored Forage Systems for Ruminant Animals

Credits: 1

A study of nutrient conservation in various stored forage systems including storage facilities and equipment, nutrient loss, aerobic deterioration, chemical and physical analysis. Discussions will also include the impact of stored forage systems on forage quality and the subsequent effects on digestion and utilization in ruminant animals.

Note
Three hours lecture a week for five weeks.

Repeat for Credit
N

Requisites
Prerequisite: ASI 680 or concurrent enrollment.

Typically Offered
Spring

ASI 695 - Principles of Equine Exercise Physiology

Credits: 3

Physiological systems reactions and adaption to exercise and training in the equine athlete. Additional topics addressed will include biomechanics, injury prevention and rehabilitation.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Required Prerequisite: Junior standing.
Recommended Prerequisite: ASI 350, ASI 533, and a course in biochemistry

Typically Offered
Fall

ASI 710 - Physiology of Reproduction in Farm Animals

Credits: 3

The physiological aspects of reproduction in farm animals including endocrine inter-relationships controlling reproductive cycles and gamete production. Periodic demonstrations deal with specialized reproductive anatomy of farm animals, experimental techniques used in animal reproduction, and contemporary animal production practices.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 400.

Typically Offered
Spring-Even Years

ASI 735 - Advanced Dairy Products Evaluation

Credits: 2

Advanced training in the sensory analysis of dairy products, focusing on techniques for detecting and evaluating flavor, body and texture, and appearance. The course covers the scoring system used for dairy product judging and may include participation in collegiate dairy products evaluation contests.

Repeat for Credit
N

Requisites
Prerequisite: graduate student standing

Typically Offered
Spring

ASI 741 - Quantitative Genetics Applications of Matrix Algebra

Credits: 1

The goal of this course is development of skills in matrix algebra to describe and solve problems in the agricultural and life sciences, with particular focus on quantitative genetics. The course is designed for students with no prior knowledge of matrix algebra, and whose formal training in mathematics may be somewhat limited. It will consider the vocabulary, concepts, application and, to a lesser extent, theory of matrix algebra that is relevant to graduate students in the agricultural and life sciences. Application exercises will consider ecological systems, genotypic transition matrices, selection indices, and the numerator relationship matrix. Application of methods such as least squares, and canonical transformation to solve problems in the biological sciences using matrix algebra will also be introduced.

Repeat for Credit
N

Typically Offered
Fall

ASI 742 - Cybersheep: A Genetic Simulation Game

Credits: 1

The goal of this course is for students to be able to make informed and effective decisions in a livestock breeding program. In order to accomplish this goal, the course will provide hands-on experience with selection and mating decisions, and their consequences through a genetic simulation. Genetic gains require time to achieve and there is very little opportunity for students to witness the consequences of breeding decisions in a course. The simulation is designed to offer an opportunity to see in real-time, the outcome of decision-making, and to experience the stochastic (chance) elements of a breeding program.

Repeat for Credit
N

Typically Offered
Fall

ASI 749 - Advanced Animal Breeding

Credits: 3

Application of genetic principles to livestock improvement, selection methods, mating systems, heritability estimates

and methods of analyzing genetic data.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended prerequisite: ASI 500 and three hours in statistics.

Typically Offered
Spring

ASI 776 - Meat Industry Technology

Credits: 3

Apply concepts and information about meat composition, product safety and spoilage, quality; formulation, processing and evaluation of cured, pre-cooked, and sausage packaging, troubleshooting, and plant organization.

Note
This is a web-based lecture class intended for distance education students.

Repeat for Credit
N

Requisites
Prerequisite: ASI 350.

Typically Offered
Fall, Spring, Summer

ASI 777 - Meat Science and Muscle Biology

Credits: 3

An in depth-overview of the conversion of muscle to meat as well as the impact of inherent characteristics of muscle on fresh meat quality. The fundamental concepts in the course will be discussed with an application to industry standards.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 350; senior or graduate standing.

Typically Offered
Fall

ASI 799 - Graduate Internship in Animal Sciences and Industry

Credits: 1-4

In-depth work-study experiences on beef cattle, sheep, dairy cattle, swine, horse or poultry production operations or in animal food products plants.

Repeat for Credit
Y

Requisites
Prerequisite: Permission of supervising faculty member.

Typically Offered
Fall, Summer

ASI 802 - Gametes, Embryos, and Stem Cells in Farm Animals

Credits: 2

A study of gametes, embryos, pregnancy, and stem cells in farm species including supporting information from laboratory species and humans. Emphasis will be on the regulation of stem cells, gametes, and embryos and on the conceptus-maternal interactions to establish and maintain pregnancy and program conceptus and postnatal development.

Note
Two hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall-Odd Years

ASI 810 - History and Perspectives in Animal Breeding and Genetics

Credits: 1

The goal of this course is to provide students with a historical perspective of the discipline of Animal Breeding and Genetics and an appreciation for the contributions of several scientists that have significantly impacted the discipline. Weekly lectures will consist of pre-recorded interviews with scientists that have had an international impact in the field of animal breeding and genetics.

Repeat for Credit
Y

Typically Offered
Fall

ASI 811 - Primer to Quantitative Genetics

Credits: 1

The goal of this course is to provide students with an introduction to the language and basic principles of quantitative genetics. Its purpose is to develop foundational knowledge for students entering a graduate program in animal breeding and genetics. Topics included will be the basic model for quantitative genetics (additive and non-additive genetic effects, including Mendelian sampling, and environmental effects), sources of variation, heritability, family resemblance and repeatability, selection response, and family selection. Expected values and concepts in applied statistics (e.g., linear regression) will also be considered.

Repeat for Credit
N

Typically Offered
Spring

ASI 812 - Selection Index Theory and Application

Credits: 1

The overall goal of this course is to increase your skills and knowledge related to the design of animal breeding programs. The focus will be on the application of index theory to the definition of breeding objectives in animal agriculture. The course will also introduce approaches for deriving economic weights, which are useful when predicting economic response to selection.

Repeat for Credit
N

Typically Offered
Spring

ASI 813 - Economic Breeding Programs

Credits: 1

The primary goal of this course is to provide a survey of methodology for developing an economic basis for multiple trait selection to improve the profitability of production. Much of the material is abstracted from the scientific literature, from which a sampling of relevant references will be provided. Therefore, an overarching goal of this course is to instill the capacity to critically analyze relevant literature as an aid to solving future problems. Specific topics included are: a review of concepts relevant to selection index, an introduction to the concept of systems analysis, linear programming, and simulation with emphasis on economic values useful for selection index.

Repeat for Credit
N

Typically Offered
Spring

ASI 814 - Heterosis and Crossbreeding Systems

Credits: 1

The goal of this course is to provide students with an introduction to the principles of heterosis and mating systems utilizing crossbreeding. Students completing this course should be able to evaluate and compare various crossbreeding mating schemes through predicted performance of the potential progeny and overall system performance.

Repeat for Credit
N

Typically Offered
Spring

ASI 815 - Application of Quantitative Genetics in R Software

Credits: 1

Introduction and application of R software for basic and intermediate tasks in quantitative genetic analyses. The use of R as a high-level programming language and a gateway for more formal low-level languages. No prior exposure to the language is necessary.

Repeat for Credit
N

Typically Offered
Spring

ASI 820 - Rumen Metabolism

Credits: 3

Metabolism, absorption, digestion, and passage of nutrients in the rumen; factors affecting the environment of the rumen; certain aspects of rumen function and dysfunction; techniques used in rumen research.

Note
Three one-hour lecture A week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 318 and BIOCH 521 or BIOCH 755.

Typically Offered
Spring-Even Years

ASI 825 - Stress Physiology of Livestock

Credits: 3

Integrative physiology of livestock during environmental, management, and pathological stresses.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 533 and BIOCH 521.

Typically Offered
Fall-Even Years

ASI 826 - Nutritional Physiology

Credits: 3

The course focuses on the structures and function of the gastrointestinal tract, with an emphasis on digestive physiology in the small intestine. Details of gastrointestinal tract secretion, regulation, digestion, and absorption of the major nutrient groups are emphasized with species comparisons.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Spring-Odd Years

ASI 830 - Neuroendocrine Physiology

Credits: 1

Neuroendocrine regulation of reproduction, growth, and metabolism, with an emphasis on neuroendocrinology of domestic livestock.

Note
Three hours recitation per week for 5 weeks.

Repeat for Credit
Y

Requisites
Recommended Prerequisite: BIOCH 521 and ASI 710.

Typically Offered
Spring-Odd Years

ASI 831 - Molecular Reproductive Endocrinology

Credits: 1

A study of molecular mechanisms that control gene expression in mammals, with an emphasis on genes and their products that control reproduction.

Note

Three hours recitation per week for 5 weeks.

Repeat for Credit
Y

Requisites
Recommended Prerequisite: BIOCH 521, ASI 710 and ASI 830.

Typically Offered
Spring-Odd Years

ASI 832 - Ovarian Physiology

Credits: 1

Endocrine and physiologic control of ovarian functions in domestic livestock.

Note
Three hours recitation a week for 5 weeks.

Repeat for Credit
Y

Requisites
Recommended Prerequisite: BIOCH 521, ASI 710 and ASI 830.

Typically Offered
Spring-Odd Years

ASI 835 - Advanced Swine Nutrition

Credits: 1

Advanced study of the feeding systems and practices and nutrient requirements for swine for various stages of production. An in-depth analysis of applied swine nutrition.

Note
One hour lecture per week

Repeat for Credit
N

Requisites
Prerequisite: ASI 679 or concurrent enrollment

Typically Offered
Fall

ASI 840 - Techniques in Domestic Animal Behavior

Credits: 2

A combined seminar and laboratory type course. Current and classical studies reported and discussed, relationships between behavior and other disciplines explored and methods of data collection examined. Small-scale demonstration experiments planned, executed and reported orally and/or in scientific written style.

Note
One hour recitation and two hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 655 and STAT 225.

Typically Offered
Spring-Even Years

ASI 860 - Analytical Techniques--Sample Preparation and Beginning Analyses

Credits: 1

Sample collection, processing and handling methodologies will be addressed as they pertain to research methods in the animal sciences. Basic laboratory techniques, sample collection, and analyses of moisture and nitrogen will be covered.

Note
Two hours lecture, eight hours lab and one hour recitation a week for three weeks.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 350.

Typically Offered
Fall

ASI 861 - Analytical Techniques--Mineral Analyses

Credits: 1

This course focuses on the analysis of minerals in common feedstuffs. This course will cover sample preparation and atomic absorption, emission, utraviolet/visible and fluorimetric spectrophotometric methods of analysis of feedstuffs and biological fluids.

Note
Two hours lecture, eight hours lab and one hour recitation a week for three weeks.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 350.

Typically Offered
Fall

ASI 862 - Analytical Techniques--Carbohydrate and Lipid Analyses

Credits: 1

This course covers the analysis of carbohydrate and lipid components of feedstuffs and biological materials using conventional as well as HPLC and gas chromatographic methods.

Note
Two hours lecture, eight hours lab and one hour recitation a week for three weeks.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 350.

Typically Offered
Fall

ASI 863 - Analytical Techniques--Radioisotope Use

Credits: 1

Study of radioisotope use in physiological applications of research in domestic animals including radioactive decay, detection methodology, and isotope dilution.

Note
Two hours lecture, eight hours lab and one hour recitation a week for three weeks.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall-Even Years

ASI 864 - Analytical Techniques-Immunoassays

Credits: 1

Study of measurement of biological substances and hormones utilizing enzyme-linked immunoassays (ELISA) and radioimmunoassays (RIA).

Note
Two hours lecture, eight hours lab and one hour recitation a week for three weeks.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall-Even Years

ASI 865 - Analytical Techniques: Protein Analysis

Credits: 1

The course will provide an overview of techniques commonly used for protein analysis in research using animal tissues. Topics will include protein extraction from tissues, determining protein concentration, types of gel electrophoresis for different protein sizes, Western blotting and proteomics.

Note
Course will be offered the first 3 weeks of the Fall Semester. Components include three 90-minute lectures + one 8-hour laboratory per week.

Repeat for Credit
N

Typically Offered
Fall

ASI 870 - Linear Models in Animal Breeding

Credits: 1

Students completing this course will learn about linear models used in Animal Breeding. These models will be discussed in the context of the random variable that is to be predicted. Specifically, the course will cover animal models, sire/maternal grandsire models, and sire models. Models including a single record, repeated records, and models with both direct and maternal effects will be discussed.

Repeat for Credit
N

Typically Offered
Fall

ASI 871 - Genetic Prediction

Credits: 1

The goal of this course is to increase student understanding of best linear unbiased prediction and to develop skills in genetic prediction. A wide array of material will be covered with emphasis on real-world datasets designed to develop applied analytical skills relative in animal breeding. Topics will include data integrity diagnosis, contemporary grouping strategies, adjusting for known non-genetic effects, and use of software to perform genetic evaluations. Students will develop procedures for the utilization of various sources of information for the calculations of predictions of genetic merit in the form of estimated breeding values.

Repeat for Credit
N

Typically Offered
Fall

ASI 872 - Applied Variance Component Estimation in Livestock Genetics

Credits: 1

The goal of this course is to extend upon content covered in linear models and genetic prediction, with specific emphasis on estimation of (co)variance components and genetic parameters required to solve mixed models typical in livestock genetics. Upon successful completion of this module, students should have an applied knowledge of approaches used to estimate the G and R sub-matrices of the mixed model equations. Several tools will be used to demonstrate the models and approaches most commonly used in parameter estimation. Where appropriate, scientific literature that explains their implementation, and some attributes of the solutions obtained will be used.

Repeat for Credit
N

Typically Offered
Fall

ASI 873 - Prediction and Control of Inbreeding in Breeding Programs

Credits: 1

The goal of this course is for students to be introduced to, and to gain an understanding of, the concepts of inbreeding and genetic diversity, the impact of inbreeding on animal breeding and production populations, and of strategies to control and manage rates of inbreeding in animal breeding and production populations. The use of genomic data to assess and control inbreeding also will be discussed.

Repeat for Credit
N

Typically Offered
Fall

ASI 874 - Marker Assisted and Gene-Assisted Selection

Credits: 1

The goal of this module is to increase student understanding of potential methods for incorporating marker genetic information into selection decisions. Topics will include but are not limited to recombination, single-gene tests, molecular breeding values, suggested producer guidelines for use of the technologies, and incorporation of genomic information into genetic prediction procedures.

Repeat for Credit
N

Typically Offered
Spring

ASI 875 - Introduction to Marker Association Analysis and QTL Detection

Credits: 1

The goal of this course is to introduce the basic concepts of using genetic markers to identify QTL and of estimating marker-trait associations, and to expose students to applications of these methodologies. Materials will cover the basics of linkage and linkage disequilibrium, alternate designs or population structures for QTL mapping, and statistical methods for QTL detection, including QTL interval mapping and genome-wide association analyses. Properties, advantages, disadvantages, and requirements of alternate designs and analysis strategies will be discussed.

Repeat for Credit
N

Typically Offered
Spring

ASI 876 - From Markers to Gene Function: Functional Change

Credits: 1

This course takes the results from association analyses and learns how these markers translate into functional changes in the animal genome and in animal performance. Topics covered in the course include an introduction to the tools used to generate genomic data followed by introduction and application of key bioinformatics websites, databases to identify causative genetic variation, and develop gene pathways and networks.

Repeat for Credit
N

Typically Offered
Spring

ASI 877 - MCMC Methods in Animal Breeding: A Primer

Credits: 1

The goal of this course is to introduce computational techniques based on simulation that have become a staple in the field of animal breeding (and beyond) over the last 20 years. An overview of the most popular Monte Carlo methods will be provided to the students with an emphasis on hands on reproducible examples developed through the R software. Minimal exposure to the R programming language will be required while no previous exposure to Monte Carlo methods is required. While a few examples in the class will be set in a Bayesian framework, no previous exposure to Bayesian statistics is required

Repeat for Credit
N

Typically Offered
Spring

ASI 879 - Applications in Swine Nutrition

Credits: 2

Application of key principles of swine nutrition relating to nutrients, requirements and feeding programs for pigs of various stages of production.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Recommended ASI 835

Typically Offered
Spring-Even Years

ASI 890 - Graduate Seminar in Animal Sciences and Industry

Credits: 1

Discussion of research and technical problems in the discipline. Attendance required of all departmental graduate students. Maximum of two hours may be applied toward an advanced degree.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ASI 898 - Master's Report

Credits: 2

A written report of either research or problem work on a topic in the major field.

Note
Consult major professor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 899 - Master's Research in Animal Sciences and Industry

Credits: 1-18

Research leading to the completion of a master's thesis.

Note
Consult major professor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 902 - Topics in Animal Science

Credits: 1-6

Discussion and lectures on important areas and contributions in the field of animal science not covered in present courses.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 920 - Energy Utilization in Domestic Livestock

Credits: 2

Comprehensive discussion of the development and application of energy systems used to guide livestock feeding, procedures used in energy experimentation, dietary/digestive/environmental factors that influence efficiency of energy utilization, and the efficiencies with which different energy substrates are used to support various maintenance and production functions. Emphasis will be placed upon ruminants.

Note
Two hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall-Odd Years

ASI 921 - Protein and Amino Acid Utilization in Domestic Livestock

Credits: 2

Comprehensive discussion of protein and amino acids and their role in digestion, absorption, metabolism, protein synthesis, and degradation in livestock. Emphasis on techniques and interpretation of results from experiments designed to evaluate protein utilization and factors which influence amino acid metabolism in monogastrics and ruminants.

Note
Two hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 820 or ASI 826.

Typically Offered
Fall-Even Years

ASI 923 - Vitamin and Mineral Nutrition of Domestic Livestock

Credits: 2

A detailed examination of the vitamin and mineral nutrition of domestic livestock. Emphasis will be placed on current literature on the determination of vitamin and mineral requirements, practical considerations for vitamin and

mineral supplementation in livestock feeding, and the potential for vitamin and mineral deficiency and toxicity in domestic livestock.

Note
One hour lecture and two hour lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 820 or ASI 826.

Typically Offered
Spring-Even Years

ASI 925 - Rumen Microbiology

Credits: 3

Three hours lecture a week dealing with the microorganisms of the rumen, their habitat, diversity, structure, interactions, and biochemical activities. Techniques for enumeration, isolation and identification of ruminal microorganisms.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 255.

Typically Offered
Spring-Odd Years

ASI 930 - Advanced Meat Science

Credits: 3

Basic biochemical, physiological, and histological properties of muscle and related tissues; muscle contraction, rigor mortis, and muscle hydration; maturation; processing by thermal, dehydration, and cold sterilization techniques; meat flavor chemistry; meat research techniques.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 777 or equiv.; and a course in biochemistry.

Typically Offered
Spring-Even Years

ASI 961 - Graduate Problem in Animal Sciences and Industry

Credits: 1-18

In-depth study of a topic supervised by a member of the graduate faculty.

Note
Permission of supervising faculty member.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASI 990 - Seminar in Animal Sciences Research

Credits: 1

Weekly evaluation of the scientific literature and the reasoning underlying the selection of research problems, the formulation and testing of hypotheses, and the evaluation and presentation of results.

Note
Approval of major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ASI 999 - Doctoral Research in Animal Sciences and Industry

Credits: 1-18

Research leading to the completion of a Ph.D. Degree.

Note
Consult major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASMS 120 - Intro to Food and Feed Manufacturing Employee Safety

Credits: 1

This course introduces students to the fundamental principles of employee safety in food and feed manufacturing environments. Students will learn about workplace hazards, safety protocols, and regulatory requirements designed to protect workers from injury and illness. The course covers essential topics such as personal protective equipment (PPE), machine safety, chemical handling, and emergency procedures. By the end of the course, students will understand how to create and maintain a safe working environment in compliance with industry safety standards.

Repeat for Credit
N

Typically Offered
Fall

ASMS 213 - Emerging Technologies in Power, Structural, and Technical Systems

Credits: 1

The continual evolution of the agricultural mechanics industry, necessitates the introduction of emerging practices and equipment to new teachers. The course includes demonstrations, hands-on activities, and field trips to be used in high school programs.

Note
One hour of lecture and two hours of laboratory each week for 8 weeks.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education Majors only

Typically Offered
Spring

ASMS 214 - Agricultural Engine Systems

Credits: 1

Theory, knowledge and skills necessary for the repair and maintenance of small gas engines. Special focus on the teaching of engine systems and management of laboratory instruction.

Note
One hour of lecture and two hours of laboratory each week for 8 weeks.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education majors only.

Typically Offered
Fall

ASMS 215 - Agricultural Electrical Systems

Credits: 1

Theory and practice of electrical wiring systems used in agricultural settings. Special focus on the teaching of electrical systems.

Note
One hour of lecture and two hours of laboratory each week for 8 weeks.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education Majors only.

Typically Offered
Spring

ASMS 216 - Agricultural Structures Education

Credits: 1

Theory, knowledge and skills for construction/fabrication in agricultural structure projects. Emphasis on: laboratory safety, measurements, material selection, basic techniques, plumbing, and basic surveying.

Note
One hour of lecture and two hours of laboratory each week for 8 weeks.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education majors only.

Typically Offered
Fall

ASMS 220 - Employee Safety in Grain Handling Facilities

Credits: 1

This course focuses on employee safety in grain handling facilities, addressing the unique hazards associated with grain storage, transport, and processing. Students will learn about the risks of grain dust explosions, confined space entry, machine safety, and proper use of personal protective equipment (PPE). The course covers safety protocols, emergency procedures, and regulatory standards specific to grain handling operations. By the end of the course, students will be equipped to identify hazards and implement safety measures to ensure a safe working environment in grain facilities.

Repeat for Credit
N

Requisites
Corequisite: ASMS 120

Typically Offered
Fall

ASMS 221 - Safety Applications Practicum

Credits: 1

This course offers a hands-on, applied learning experience focused on employee safety in grain handling and food and feed manufacturing facilities. Students will actively engage in safety assessments, hazard identification, and the implementation of safety protocols, including proper use of personal protective equipment (PPE), confined space entry procedures, and machine safeguarding. The course provides practical, real-world training in safety compliance, risk mitigation, and emergency response. By the end of the course, students will have gained valuable experience in applying safety practices to maintain safe working environments in high-risk industrial settings.

Repeat for Credit
N

Requisites
Corequisite: ASMS 220

Typically Offered
Fall

ASMS 260 - Agricultural Metal Processes Education

Credits: 3

Provide students with the theory, knowledge and skills necessary for the construction/fabrication of metal projects. Emphasis will be placed on: laboratory safety, general laboratory measurements, metal identification/ characteristics, oxyacetylene welding and cutting, shielded metal arc welding (SMAW), gas metal arc welding (GMAW), gas tungsten arc welding (GTAW), plasma cutting, and project construction.

Note
Two hours of lecture and three hours of laboratory each week.

Repeat for Credit
N

Requisites
Prerequisite: Agricultural Education majors only.

Typically Offered
Fall, Spring

ASMS 421 - Agricultural and Occupational Safety Program Management

Credits: 3

Addresses the development and administration of comprehensive safety, health, and environmental management programs in agriculture and industry.

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Fall

ASMS 422 - Environmental Regulatory Compliance

Credits: 3

Surveys requirements of air, land, and water regulations as they relate to agribusiness and industry. Focuses on practical applications in the work environment such as identification of pollution sources, evaluation strategies, engineering controls, permitting processes, and reporting.

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Spring

ASMS 423 - Agricultural and Occupational Safety I

Credits: 3

Examines traumatic injuries and their control in agricultural and industrial settings, with a focus on structural safety, walking and working surfaces, falls, electrical safety, and safety for livestock handlers.

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Fall

ASMS 424 - Agricultural and Occupational Health I

Credits: 3

Investigates chemical health hazards and their control in the context of agriculture and industry. Topics include hazardous gases, vapors, and aerosols; dermal hazards; pesticides; exposures to veterinary pharmaceuticals; methods of hazard assessment; and methods of control.

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Fall

ASMS 453 - Agricultural and Occupational Safety II

Credits: 3

Explores agricultural and industrial traumatic injuries involving machine hazards; materials handling and storage; confined spaces; fire protection and prevention; and pressurized vessels, fluids, and environments.

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Spring

ASMS 454 - Agricultural and Occupational Health II

Credits: 3

Analyzes occupational health hazards and controls in agricultural and industrial settings, with a focus on biological hazards, ergonomic stressors, and physical hazards (including noise, vibration, extreme temperatures, and radiation).

Repeat for Credit
N

Requisites
Junior or Senior standing

Typically Offered
Spring

ASMS 486 - Topics in Agricultural and Occupational Safety and Health

Credits: 0-6

Examination of current topics in agricultural and occupational safety and health.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ASMS 496 - Problems in Agricultural and Occupational Safety and Health

Credits: 1-3

Independent guided studies in any of the many fields associated with agricultural and occupational safety and health.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

ASMS 511 - Occupational and Agricultural Health

Credits: 3

Addresses the identification, evaluation, and control of health hazards in occupational and agricultural settings. Topics include occupational toxicology, air contaminants, noise, radiation, thermal stress, ergonomics, biological hazards, emerging health risks, and health risks of special populations.

Note
This is an online course.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or above

Typically Offered
On sufficient demand

ASMS 512 - Occupational and Agricultural Injury Prevention

Credits: 3

Explores traumatic injuries and their prevention in occupational and agricultural settings. Topics include falls, workplace violence, animal handling, mobile equipment, fixed machines, work tools, electrical hazards, fires, and explosions.

Note
This is an online course.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or above

Typically Offered
On sufficient demand

ASMS 521 - Occupational and Agricultural Safety and Health Interventions

Credits: 3

Examines the design and evaluation of behavioral interventions to prevent occupational and agricultural injuries and illnesses. Topics include theories of safety and health behavior; effective communication and persuasion strategies; planning, conducting and evaluating interventions; interventions for diverse populations; and intervention strategies in evolving occupational and societal contexts.

Note
This is an online course.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or above

Typically Offered
On sufficient demand

ASMS 721 - Agricultural and Occupational Safety Program Management

Credits: 3

Addresses the development and administration of comprehensive safety, health, and environmental management programs in agriculture and industry.

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Fall

ASMS 722 - Environmental Regulatory Compliance

Credits: 3

Surveys requirements of air, land, and water regulations as they relate to agribusiness and industry. Focuses on practical applications in the work environment such as identification of pollution sources, evaluation strategies, engineering controls, permitting processes, and reporting.

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Spring

ASMS 723 - Agricultural and Occupational Safety I

Credits: 3

Examines traumatic injuries and their control in agricultural and industrial settings, with a focus on structural safety, walking and working surfaces, falls, electrical safety, and safety for livestock handlers.

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Fall

ASMS 724 - Agricultural and Occupational Health I

Credits: 3

Investigates chemical health hazards and their control in the context of agriculture and industry. Topics include hazardous gases, vapors, and aerosols; dermal hazards; pesticides; exposures to veterinary pharmaceuticals; methods of hazard assessment; and methods of control.

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Fall

ASMS 753 - Agricultural and Occupational Safety II

Credits: 3

Explores agricultural and industrial traumatic injuries involving machine hazards; materials handling and storage; confined spaces; fire protection and prevention; and pressurized vessels, fluids, and environments.

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Spring

ASMS 754 - Agricultural and Occupational Health II

Credits: 3

Analyzes occupational health hazards and controls in agricultural and industrial settings, with a focus on biological hazards, ergonomic stressors, and physical hazards (including noise, vibration, extreme temperatures, and radiation).

Repeat for Credit
N

Requisites
Prerequisite: Graduate or junior or senior level students

Typically Offered
Spring

ATHM 101 - Varsity Baseball

Credits: 1

Varsity Baseball

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ATHM 102 - Varsity Basketball

Credits: 1

Varsity Basketball

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHM 103 - Varsity Track Instructor

Credits: 1

Varsity Track Instructor

Note
Consent of instructor

Repeat for Credit
N

Typically Offered
Spring

ATHM 104 - Varsity Football

Credits: 1

Varsity Football

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHM 105 - Varsity Golf

Credits: 1

Varsity Golf

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHM 108 - Varsity Track

Credits: 1

Varsity Track

Repeat for Credit
Y

Typically Offered
Spring

ATHW 150 - Intercollegiate Basketball

Credits: 1

Intercollegiate Basketball

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHW 152 - Intercollegiate Track

Credits: 1

Intercollegiate Track

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHW 154 - Intercollegiate Tennis

Credits: 1

Intercollegiate Tennis

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHW 155 - Intercollegiate Volleyball

Credits: 1

Intercollegiate Volleyball

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Spring

ATHW 156 - Intercollegiate Rowing

Credits: 1

Intercollegiate Rowing

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall

ATHW 157 - Intercollegiate Golf

Credits: 1

Intercollegiate Golf

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ATHW 158 - Intercollegiate Soccer

Credits: 1

Intercollegiate Soccer

Repeat for Credit
Y

Typically Offered
Other

ATM 101 - Introduction to Biological and Agricultural Engineering and Technology

Credits: 1

Introduction to discipline, department, university, and profession. Exploration of career options. Gain skills through application-oriented problem solving.

Note
One hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Open to ATM majors only.

Typically Offered
Fall

Cross-listed
BAE 101

ATM 160 - Engineered Systems and Technology in Agriculture

Credits: 3

An introductory course designed for non-engineering majors. This course introduces engineering principles and problem solving associated with energy resources and power systems for agriculture, machinery systems, natural resources and environmental management, and food and fiber processing and storage.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Not open to seniors.

Typically Offered
Fall

ATM 240 - Principles of Injury Prevention

Credits: 3

This is an overview course that will cover a variety of safety and health topics focusing on injury prevention in the home, motor vehicle, public, and work environments. The enduring understanding that forms the basis for every discussion and activity in this course is all of us make decisions every day that impact our safety as well as the safety of those around us.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall

ATM 245 - Introduction to Biomanufacturing Technology

Credits: 3

History of biomanufacturing technology and its impact; overview of related industries including biopharmaceuticals, cellular agriculture, precision fermentation, and brewing; careers; fundamentals of biomanufacturing processes including cell types, gene technology, and unit operations.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 or CHM 210 or BIOCH 265.

Typically Offered
Fall, Spring

ATM 250 - Chemical Application Systems

Credits: 2

Systems, components, operation practices, and safety procedures used in the chemical application industry. Liquid and granular application systems and respective components will be studied along with procedures for equipment sizing and maintenance, minimizing drift, systems calibration, and safe handling, transporting, storage, disposal and spill clean-up of agrichemicals.

Note
Two hours lecture a week.

Repeat for Credit
N

Typically Offered
Spring

ATM 251 - Chemical Application Systems Laboratory

Credits: 1

Laboratory and hands-on activities on pumps, valves, nozzles, drift measurement, and application technology used in the home and garden, turf, private and commercial agricultural, aerial, and research industries.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Must be taken concurrent with ATM 250.

Typically Offered
Spring

ATM 331 - Professional Practice for Agricultural Technology Managers

Credits: 1

A preparatory course for ATM Capstone Project course to explore project ideas, build project teams, and chose a project to complete for the capstone project in the following semester. Topics include professionalism, project management, intellectual property, organizational behavior and ethics.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

ATM 340 - Occupational Safety

Credits: 3

This is a survey course that identifies safety and health risks in industrial work environments. The enduring understanding that forms the basis for every discussion and activity in this course is as a manager or supervisor; you are responsible for the safety of all employees under you.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ATM 240.

Typically Offered
Spring

ATM 345 - Cell Culture Technology in Biomanufacturing

Credits: 3

Cell culture and fermentation technology in biomanufacturing including media optimization, cell types and growth, mass balance concepts, selection of bioreactor and operational modes for microbial fermentation and mammalian cell cultures.

Repeat for Credit
N

Requisites
Prerequisites: MATH 150 or MATH 205 or MATH 220, BIOL 198 or CHM 210 or BIOCH 265.

Recommended Foundation Course: ATM 245

Typically Offered
Fall

ATM 370 - Biorenewable Systems

Credits: 3

Converting biorenewable resources into bioenergy and bio-based products. Biorenewable concepts as they relate to drivers of change, feedstock production, processes, products, co-products, economics, transportation/logistics, and marketing.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110, MATH 100, CHEM 210.

Typically Offered
Fall

ATM 445 - Separation Technologies for Biomanufacturing

Credits: 3

Overview of separation technologies used in biomanufacturing facility including purification, principles of operations used for purification and polishing of active product ingredients such as proteins and peptides, common impurities and removal strategies, process integration, and risk management.

Repeat for Credit
N

Requisites
Prerequisite: MATH 150 or MATH 205 or MATH 220, BIOL 198 or CHM 210 or BIOCH 265.
Recommended: ATM 245 and/or ATM 345
Not available for credit for students with BAE 626 or CHE 626

Typically Offered
Spring

ATM 446 - Regulatory Affairs for Biomanufacturing

Credits: 1

Regulations and compliance for the biomanufacturing industry in the United States with a focus on biologics. Topics include regulatory framework, quality assurance procedures in a biomanufacturing facility (GLP and cGMP), preparation for regulatory inspection and facility audit.

Repeat for Credit
N

Requisites
Prerequisite: ATM 245

Typically Offered
Spring

ATM 450 - Sensors and Controls for Agricultural and Biological Systems

Credits: 3

Applications of instrumentation. Sensors used in agricultural machines and processes for measurement of voltage, force, torque, pressure, displacement, velocity, acceleration, flow, temperature, humidity, etc. Analog and digital signal conditioning and processing. Feedback controls concept. Computer interface.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113 or PHYS 115, ATM 160 or MATH 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ATM 455 - Engines and Power Transfer

Credits: 3

Principles, operation, and analysis of engine thermodynamics, fuel and combustion, engine components, engine cycles, engine power transfer and efficiencies, and exhaust gas emissions. Selection of bearings and design of belt, chain, gear, and shaft drives. Operation and performance analysis of hydraulic power components and systems, fluid mechanics, and hydraulic motors.

Note
Three hours recitation a week. Students cannot take ATM 455 in place of BAE 450 to fulfill requirements.

Repeat for Credit
N

Requisites
Prerequisite: BAE 350.

Typically Offered
Spring

ATM 460 - Internship in Agricultural Technology Management

Credits: 1-3

Intern programs in agricultural technology management.

Note
One hour of credit for each four weeks of supervised and

evaluated off-campus work experience with cooperating employers. A maximum of 3 hours may be applied to a BS in agricultural technology management.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

ATM 497 - Agricultural Technology Management

Credits: 0-3

Undergraduate research experience for agricultural technology managment students.

Note
Instructor approval.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ATM 511 - Agricultural Building Systems

Credits: 3

Environmental control systems for agricultural buildings; structural members and systems for agricultural buildings; farmstead planning concepts.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ATM 160 or PHYS 113 or PHYS 115.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ATM 515 - Emerging Topics in Agricultural Technology Management

Credits: 2-3

Topics in the application of technical principles to agricultural technology management offered through collaborative distance education programs such as AG*IDEA.

Note
Approval of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ATM 536 - Agricultural Technology Management Capstone Project I

Credits: 3

A team-oriented laboratory for Agricultural Technology Management students to complete an open-ended project related to the management of technology in agriculture.

Note
Students that take ATM 536 as a requirement for their ATM degree cannot take take BAE 536 later for an elective credit.

Repeat for Credit
N

Requisites
Prerequisites: ATM 331 and senior standing in ATM program.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

ATM 540 - Introduction to Food Engineering

Credits: 3

Material and energy balances with application to food processing. Fluid flow and heat transfer in food processing. Thermodynamic properties and laws. Conc. enrollment in

ATM 541 is urged.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113 or 115, BIOCH 120 or CHM 190, MATH 210 or 205.

Typically Offered
Fall

ATM 541 - Introduction to Food Engineering Laboratory Exercises

Credits: 1

Laboratory experiments supplementing ATM 540.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ATM 540.

Typically Offered
Fall

ATM 545 - Processing and Storage of Grains

Credits: 3

Principles of mass and energy balances, materials handling, along with the drying, storage, and bioprocessing of grains and biomass.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ATM 160 and PHYS 113

Typically Offered
Spring-Even Years

ATM 550 - Precision Agriculture Technologies

Credits: 3

Application of precision technologies for gathering information to assist decision making for production systems. Topics will include global positioning systems, vehicle guidance systems, crop yield monitors, variable rate control systems for applicators, and the communication among these devices.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 150 or equivalent, PHYS 113 or PHYS 115, and STAT 225 or STAT 240 or STAT 250.

Typically Offered
Fall

ATM 558 - Hydrology and Soil Erosion Management

Credits: 3

Covers the water cycle and watershed hydrology, with an emphasis on precipitation, evapotranspiration, runoff, soil water movement, and aquifers; Soil erosion and water quality concerns; Engineered conservation practices to manage runoff, erosion, and water shortage issues; Site assessment techniques including surveying, mapping, watershed delineation, and data collection and analysis.

Note
Three hours recitation a week

Repeat for Credit
N

Requisites
Prerequisite: AGRON 205.

Typically Offered
Spring

ATM 610 - Problems in Agricultural Technology Management

Credits: 1-3

Current and advanced problems in agricultural technology management.

Note
No more than 3 hours of ATM 610 can be applied to the degree. Instructor approval.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ATM 620 - Topics in Agricultural Technology Management

Credits: 1-3

Topics for the understanding, management, or application of emerging technologies in agricultural systems. Topics announced when offered.

Note
Instructor approval.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ATM 636 - Agricultural Technology Management Capstone Project II

Credits: 1-3

A continuation of ATM 536. Completion of a team-oriented capstone project, with emphasis on implementation, evaluation, documentation, and presentation of the project.

Repeat for Credit
N

Requisites
Prerequisite: ATM 536 or instructor permission

Typically Offered
Spring

ATM 653 - Water Management and Irrigation Systems

Credits: 2

Management of water in crop production systems, crop water use, and irrigation scheduling. Fundamentals of water flow in pipe networks, pumping plants, and irrigation systems.

Note
Two hours recitation.

Repeat for Credit
N

Requisites
Prerequisite: ATM 558.

Typically Offered
Fall

ATM 654 - Water Management and Irrigation Systems Lab

Credits: 1

Laboratory and hands-on activities on soil water balance characteristics, crop water use, water flow in pipe networks, pump hydraulics, sprinkler nozzles, drip irrigation systems, water filtration systems, and chemigation systems.

Note
Three hour lab each week.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: Must be taken after or concurrent with ATM 653, and junior standing or higher.

Typically Offered
Fall

ATM 661 - Watershed Assessment and Management

Credits: 3

Overview of water legislation and policies (e.g. Clean Water Act, NPDES, TMDL). Principles of watershed

pollutant sources, fate, and transport. Impacts of watershed protection and restoration strategies on water and environmental quality.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 or CHM 210 and BIOL 198.

Typically Offered
Fall

ATM 702 - Topics in Agricultural Technology

Credits: 1

The selection, operational theory, repair, maintenance, adjustment, and application of equipment and materials for agricultural systems.

Note
Instructional materials, teaching aids and advanced methodology will be developed with respect to the topic.

Repeat for Credit
Y

Requisites
Prerequisite: ATM 659.

Typically Offered
Fall, Spring

AVM 101 - Introduction to Aircraft Materials and Tooling Standards

Credits: 2

Skills and techniques essential to understanding aircraft material properties and fabrication techniques. Emphasizes knowledge and practical experiences involving: shop safety, organization and human factors associated with shop practices, basic aircraft structural materials and hardware familiarization, fluid lines and fittings, hand tool selection and use, and aviation-specific dimensional inspection tools and techniques, aircraft hardware identification and applications, cleaning and corrosion control, aircraft metal selection an applications, and aircraft material inspection fundamentals.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVM 102 - Aviation Regulations, Compliance and Operations

Credits: 2

A review of the role and organizational structure of the Federal Aviation Administration (FAA) as it relates to the certification and continued airworthiness of aircraft and its operation in general, business, and commercial aviation environments. Emphasis on the privileges and limitations of certificated personnel who maintain aircraft systems in the context of the FAA regulations. Includes practical applications of aircraft weight and balance, effective completion of maintenance record entries, accurate use of graphs and charts to determine critical performance values, and the servicing, staring, ground operations, and security of aircraft. Students demonstrate the ability to read, comprehend, and apply information contained in FAA and manufacturers' aircraft maintenance specifications, data sheets, manuals, publications, and related Federal Aviation Regulations, Airworthiness Directives, and Advisory material.

Note
Two hours lecture

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

AVM 103 - Intro to Aircraft Materials and Tooling Standards Laboratory

Credits: 1

A laboratory course to supplement the material of AVM 101.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AVM 101

Typically Offered
Fall, Summer

AVM 111 - Basic Aircraft Electricity

Credits: 4

A basic concept of DC/AC circuits, with basic laws relating to the following: measuring voltage, current, resistance, continuity and leakage; relationship of voltage, current and resistance in electrical circuits; reading and interpretation of electrical circuit diagrams; electrical devices and inspection and servicing of batteries. Introduction to digital numbering systems and digital logic functions.

Note
Three hours lecture and two hour lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 112 - Aircraft Welding

Credits: 2

Theory and skill development in aircraft welding processes. Exercises in gas welding processes as applied to ferrous and nonferrous materials. Oxygen/acetylene, inert gas, and resistance welding processes are to be studied.

Note
One hour recitation and three hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

AVM 121 - Aircraft Drawings

Credits: 2

Students learn how to read, understand, and interpret aircraft drawings commonly found in the aviation maintenance industry. Recognition and identification of drawing lines and symbols, and the meaning of these is covered.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

AVM 131 - Aircraft Standards

Credits: 4

A survey of the organization of the Federal Aviation Administration. Emphasis will be placed on regulations, standards, specifications, procedures and the practice of using charts, graphs and drawings. Also included are the introduction to air transport maintenance procedures, weight and balance procedures, aircraft ground operations and the introduction to flight training to include several flights.

Note
Flight lab fees required.

Two hours lecture and six hours of lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVM 132 - Aircraft Fluid Power

Credits: 3

A study of basic fluid mechanics as it applies to practical applications in aircraft systems. Compressible and incompressible fluid systems will be studied.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 141 - Aircraft Science

Credits: 3

This is a study of basic physics as required by aircraft technicians and defined by FAR 147. Use and understand the principles of simple machines, sound, fluid, and heat dynamics, basic aerodynamics, aircraft structures, and theory of flight.

Note
Three hours recitation and two hours of lab per week.

Repeat for Credit
N

Requisites
Corequisite: Math 100

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 142 - Airframe Systems

Credits: 4

A study of the airframe systems and components to include: pressurization, heating and cooling, and structural device.

Note
Two hours lecture and six hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 151 - Aviation Maintenance Fundamentals

Credits: 3

This course is designed to permit the student to learn and practice those skills and techniques essential to the career development of the aviation maintenance technician. The subjects included are: shop safety, aircraft general familiarization, fluid lines and fittings, hand tools and measuring devices, aircraft hardware, cleaning and corrosion control, aircraft metals, inspection fundamentals, ground operation and servicing, and support equipment.

Note
One hour recitation and six hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVM 152 - Airframe Structures and Repair

Credits: 5

A study of materials commonly used in airframe structures and the associated study of making structural repairs according to recommended procedures. Skills in sheet metal are stressed.

Note
Three hours recitation and six hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 162 - Airframe Electrical Systems

Credits: 4

An advanced study of DC/AC circuits law relating to circuit analysis and a detailed study of measuring instruments. Advanced study of relays, switches, alternators, and other devices encountered in circuit analysis, troubleshooting, and repair. Theory of operation and fault isolation on solid-state devices in aircraft circuitry. Inspection of aircraft electrical systems, including wire inspections and the types of repairs allowed, using appropriate technical manuals.

Note
Two hours lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 111 or ECET 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 201 - Aircraft Metallic Primary Structures

Credits: 3

A study of aircraft metal primary structures and materials commonly used in the design and construction of airframes including fuselages, wings, and control surfaces. Students gain theoretical knowledge and practical experience associated with the structural properties of materials used in the manufacturing process as well as the methods used to fabricate and repair those structures. Students practice structural metal repairs according to FAA approved data and manufacturer's recommended procedures. Skills in aluminum sheet metal fabrication and repairs are stressed.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 101 and AVM 103 or MET 121.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 203 - Aircraft Environmental and Fire Protection Systems

Credits: 2

An in-depth study in small and large air vehicle environmental and fire detection and extinguishing systems. Emphasis on cabin pressurization and temperature climate control, supplemental oxygen, airframe and propulsion fire detection and extinguishing systems, crew visibility enhancement, and air toxicity detection. Students gain extensive practical experiences related to system design, operation, inspection, maintenance methodology, and fault analysis for both airframe and powerplant systems using manufacturer's technical instructions.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 204 - Aircraft Environmental and Fire Protection Systems Laboratory

Credits: 1

A laboratory course to supplement the material of AVM 203.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AVM 203

Typically Offered
Spring

AVM 205 - Aircraft Landing Gear and Fluid Power Systems

Credits: 3

A study of the design and application of compressible and incompressible fluid power systems used in both simple and complex aircraft flight control, auxiliary, emergency, and landing gear systems. Emphasis on landing gear and deceleration systems to include components, structures, operation, and fault analysis of shock struts, position and warning, single and multiple disk brakes, anti-skid, wheel assemblies, retraction and extension systems and methods of emergency landing gear extension. Topics include landing gear door operation and sequencing. Students practice inspection, servicing, repair and troubleshooting of key fluid power and landing gear systems necessary to ensure continued airworthiness of these systems.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 207 - Aircraft Electrical Systems

Credits: 3

A review and advanced study of DC/AC circuits, and laws relating to circuit analysis and a detailed study of measuring instruments applied to aircraft. Study of relays, switches, alternators, and other devices encountered in circuit analysis, troubleshooting, and repair. Theory of operation and fault isolation on solid-state devices in aircraft circuitry. Inspection of aircraft electrical systems, including wire inspections and the types of repairs allowed using appropriate technical manuals. A study of battery, magneto high and low tension ignition systems, including turbine igniters. Also a study of powerplant starting ad charging systems and related components. Emphasis on effective fault diagnostics, repair, and timing of aircraft ignition systems.

Note
Two hours of lecture and 4 hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100 or AVM 111.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 214 - Introduction to Aircraft Propulsion Theory, Design and Systems

Credits: 3

A broad introductory study in the theory of operation of heat engines utilizing principles of the Otto and Brayton cycles found in aircraft reciprocating and gas turbine powerplants. Students gain a solid understanding of the basic principles of the construction, design, lubrication, cooling, and exhaust systems, including maintenance practices of reciprocating and gas turbine powerplants installed in aircraft. Thrust reverser operation of gas turbine engines is also included. The course has a practical component that includes the inspection, fault analysis, servicing and repair of key engines systems covered in the course.

Note
Three hours lecture and three hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 216 - Aircraft Propulsion Drive Systems

Credits: 3

A detailed study of aircraft propulsion drive systems that convert engine power to thrust necessary for sustained flight. Drive systems include propellers, and rotor-blades found on small, medium, and large fixed, and rotary-wing aircraft. Emphasis on fixed and controllable-pitch propellers applications as well as rotor-blades, and rotor-hubs assemblies found on helicopters. Topics include theory of operation, dynamic and static balancing, vibration analysis, design characteristics, materials, and maintenance practices. Students practice inspection, servicing, balance, maintenance and repair of propeller and rotor systems.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AVM 231 - Aircraft Finish and Fabrication

Credits: 3

This course is designed to acquaint the student with the wood and fabric coverings and procedures used on aircraft, and methods used in preparation for and application of paint finishes to aircraft surfaces.

Note
One hour recitation and six hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 241 - Navigational Aids and Communication Systems

Credits: 3

A survey study of the aids to navigation and communications used in light and intermediate class aircraft. Operation and installation of the various types of equipment will be stressed.

Note
Two hour lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 111 or ECET 100.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 261 - Aircraft Inspection and Assembly

Credits: 5

A study of assembly and manufacturing procedures and inspection of aircraft components. This course also covers in detail annual and 100-hour inspections.

Note
Three hours recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 121, 131.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVM 301 - Advanced Reciprocating Powerplant Technology

Credits: 3

A study in the theory, operation, construction, design, and

maintenance of reciprocating powerplants installed in aircraft. Topics include the principles of the Otto cycle, reciprocating powerplant systems, and emerging trends in the design and application of reciprocating engines, including aviation diesel engines. Practical experiences include engine removal, installation, and troubleshooting to an airworthy standard, with an emphasis on disassembly and inspection of modern reciprocating engines found in single and twin-engine aircraft using visual, dimensional, and non-destructive techniques.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
None

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 303 - Introduction to Aircraft Composite Structures

Credits: 3

Introduces composite materials used in the design and production of legacy and modern aircraft. Topics include material characteristics, fabrication, and inspection; repair of non-metallic primary and secondary structures and materials using manufacturers' instructions. Materials include fabric, wood, fiberglass, plastics, honeycomb, and others. Students practice the selection, installation, application of protective coatings, and removal of special fasteners used in these structures. Laboratory exercises emphasize the fabrication and inspection of modern composite structures.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 304 - Aircraft Fuel Management and Metering Systems

Credits: 3

A comprehensive study of airframe and propulsion engine fuel systems associated with fuel storage, management, transfer and metering as applied to both reciprocating and turbine powered aircraft. Lecture topics include systems operation, maintenance methods, procedures and safety precautions associated with aircraft fueling and defueling for over-the-wing and pressure fueling systems. Fuel quantity, pressure and temperature indicating and warning systems, fuel dump, and detail reciprocating and turbine engine fuel metering systems including carburetor overhaul, electronic engine fuel controls (EEC and FADEC) are covered. Students practice the inspection, check, service, troubleshooting and repair of the various fuel systems found on board the aircraft to a level that assures continued airworthiness and safety.

Note
Two hours lecture and four hours of lab a week.

Repeat for Credit
N

Requisites
None

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 305 - Aircraft Avionics and Instrument Systems

Credits: 3

A study of flight instrument systems and navigation/communication electronic aids installed on aircraft. The course includes both lecture and practical applications of these systems to include operation, inspection, fault analysis and repair. The student will be exposed to mechanical and electronic airframe and powerplant indication equipment including flight instrument systems for heading, speed, altitude,

temperature, pressure, RPM, and position indicating. The course includes flight management systems, and GPWS, TAWS, laser gyro and advanced Comm/Nav applications. Emphasis will be placed on NAV/COMM systems found in modern aircraft and associated antenna applications and installation methods. Pitot/Static instruments and systems are also discussed. Students practice inspection, service, fault analysis, installation and repair of these systems

Note
Three hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100 or AVM 111.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 306 - Rotary and Fixed Wing Aircraft Design and Assembly

Credits: 3

A detailed study of the purpose of fixed-wing and rotary-wing aircraft designs and aerodynamic characteristics, their construction methods and assembly procedures. The course provides an insight critical maintenance tasks performed that impact the safe operation of the aircraft as well as exposure to the manufacture and assembly of aircraft. Students practice the rigging, assembly, jacking, weighing, and balancing of aircraft and flight control surfaces according to manufacturer's technical manuals; and making accurate record entries for tasks performed in accordance with FARs.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 101, AVM 121 or MET 111.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVM 312 - Aircraft Propellers

Credits: 2

A study of the use, maintenance, and inspection of propellers and their related control systems.

Note
One hour recitation and three hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AVM 321 - Powerplant Fundamentals

Credits: 4

A study of the principles of operation, design features, and operating characteristics of reciprocating aircraft engines. Includes overhaul inspection procedures on current horizontal opposed and radial engines.

Note
Three hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 131.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

AVM 322 - Powerplant Operation and Troubleshooting

Credits: 3

Experience in installation, operation, and removal of aircraft engines. Engine analysis and diagnosis of malfunctions, including methods of remedy, are performed on airworthy engines.

Note
Two hours recitation and four hours lab a week.

Repeat for Credit
N

Requisites
Corequisites: AVM 402 and AVM 301,

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 332 - Gas Turbine Powerplant

Credits: 5

Advanced study of the fundamentals of gas turbine powerplants including operation, studies of supporting systems and inspection methods are fundamental to this course.

Note
Two hours recitation and nine hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 321.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 342 - Powerplant Induction and Fuel Systems

Credits: 4

A study of aircraft induction and fuel metering systems including fuels, carburetors, fuel injection systems, superchargers, and other induction system components used to ensure a dependable and accurate fuel supply at any flight configuration and attitude.

Note
Two hours recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AVM 321.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 351 - Powerplant Ignition and Electrical Systems

Credits: 3

A study of battery, magneto high and low tension ignition systems, including turbine igniters for today's aircraft. Also a study of powerplant starting and charging systems and related components. Emphasis will be placed on troubleshooting, repair, and timing of aircraft ignition systems.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 111.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 352 - Powerplant Overhaul

Credits: 3

Practical experience in overhauling reciprocating engines. Engines are assembled and operationally checked in lab.

Note
One hour lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 321.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 370 - Advanced Aircraft Avionics and Instrument Systems

Credits: 3

Advanced study of flight instrument systems and navigation/communication electronic aids installed on large Corporate and Transport Category aircraft. The course includes both lecture and practical applications of these systems to include operation, inspection, fault analysis and repair. The course includes flight management systems, and GPWS, TAWS, laser gyro and advanced Comm/Nav applications.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 305.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVM 390 - Problems in Aviation

Credits: 1-18

Provides the student the opportunity for advanced study in a specific topic area or to apply aviation education to the improvement of skills previously learned.

Note
Topics are selected jointly by the student and the instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

AVM 401 - Aircraft Airworthiness, Conformity, and Quality Assurance

Credits: 3

A capstone course requiring students to tie all previous coursework associated with airframe and powerplant systems maintenance and operations together to perform an effective and safe inspection of the entire aircraft in compliance with manufacturer's recommendations and FAR requirements. This course emphasizes practical experiences necessary to inspect the aircraft for continued airworthiness. Aircraft is weighed and conformity inspections are performed. All work and inspection status is recorded and documented using approved maintenance entries. Part 145 operational requirements are included in the course experience and work team scheduling and coordination is emphasized.

Note
Three hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and instructor consent.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVM 402 - Gas Turbine Powerplant Technology

Credits: 3

A study in the theory, operation, construction, design, and maintenance of gas turbine powerplants installed in aircraft. Topics include jet propulsion history and development, the Brayton cycle, turbine engine systems, thrust reverser operations, and emerging trends in the design and application of gas turbine engines. Practical experiences include engine removal, installation, engine test cell operations, and troubleshooting to an airworthy standard with an emphasis on disassembly and inspection of small turboprop/turboshaft engines commonly found on turbine twin-engine aircraft and helicopters.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
None

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVM 403 - Advanced Aircraft Avionics and Instrument Systems

Credits: 2

Advanced study of flight instrument systems and navigation/communication electronic aids installed on large Corporate and Transport Category aircraft. The course includes both lecture and practical applications of these systems to include operation, inspection, fault analysis and repair. The course includes flight management systems, and GPWS, TAWS, laser gyro and advanced Comm/Nav applications.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 305.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

AVM 497 - Aviation Maintenance Capstone

Credits: 3

A capstone course designed to help prepare the students for industry-required credentials. It will be comprehensive in nature to the rest of the curriculum. Subjects will be incorporated from the rest of the applicable curriculum and the ACS standards. Students shall research and present a topic as determined by the instructor.

Note
Two hours lecture, three hours lab a week

Repeat for Credit
N

Requisites
Corequisite: AVM 301 and AVM 402

Typically Offered
Fall, Spring, Summer

AVMR 220 - Aviation Maintenance Review/General

Credits: 4

The general review course is designed for those individuals who have met the Federal Aviation Administration's eligibility requirements under FAR 65.77. The review conforms to the three levels of training set forth by the FAA. Three hours rec. and three hours lab a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

AVMR 230 - Aviation Maintenance Review/Airframe

Credits: 4

The airframe review course is designed for those individuals who have met the Federal Aviation Administration's eligibility requirements under FAR 65.77. The review conforms to the three levels of training set forth by the FAA.

Repeat for Credit
N

Typically Offered
Fall, Spring

AVMR 250 - Aviation Maintenance Review/Powerplant

Credits: 4

The powerplant review course is designed for those individuals who have met the Federal Aviation Administration's eligibility requirements under FAR 65.77. The review conforms to the three levels of training set forth by the FAA

Repeat for Credit
N

Typically Offered
Fall, Spring

AVT 100 - Introduction to Aviation

Credits: 3

This course examines the history of aviation and a look at the future. Students discuss the attributes of an aviation professional, careers, career planning, and pilot certification. Students consider historical events and their relationship to current aviation aspects. The interdependency and synergy in the development of military aircraft, the space program, as well as the growth of commercial and general aviation is discussed. Students use the Internet for various research projects concerning the past, present, and future of aviation.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AVT 120 - Aeronautical Programs Flight Familiarization

Credits: 1

An introduction to the fundamentals of flight in various types and categories of aircraft. A familiarization of piloting skills and knowledge, a demonstration of aircraft capabilities, and the National Airspace System.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PPIL 111.

Typically Offered
Fall, Spring, Summer

AVT 240 - Introduction to Air Traffic Control

Credits: 3

An introductory air traffic control (ATC) course that focuses on Terminal, Enroute, and FSS ATC procedures. The course examines the role of an air traffic controller at the various operational positions throughout the ATC system. The course gives an overview of the current U.S. National Airspace System as it relates to ATC procedures. In addition, the course looks at the use of future technologies and how they enhance the ATC system. Off-campus trips contribute to experiential learning.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 111.

Typically Offered
Spring

K-State 8

Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVT 242 - Aviation Meteorology

Credits: 3

Basic aviation-related meteorology concepts through the study of atmospheric elements and how they generally affect the weather: introduction to the subject, water in the atmosphere, variables which cause local weather changes, specific aviation-associated hazards, understanding meteorological reports and forecasts, meteorological techniques used in predicting weather patterns.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

AVT 243 - Aircraft Electrical, Navigational, and Communication Systems

Credits: 3

Provides students the basic knowledge of aircraft electrical systems, including navigation, communications, instruments, and power systems.

Repeat for Credit
N

Requisites
Prerequisite: AVM 111.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning

AVT 250 - Safety and Security of Airport Ground Operations

Credits: 3

This course discusses general aviation airport ground operations, particularly from the mechanic, pilot, and ramp worker perspective. Focus will be on increasing awareness of airport operations. Attention will be given to improving airport safety by creating an enhanced awareness of rules, policies, procedures, and potential hazards that affect all individuals working in and around the airport ground operations environment. Some topics included are: aircraft marshalling procedures, airfield security issues, ground vehicle operations, and security and accident/incident response reporting.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

AVT 315 - Advanced Avionics

Credits: 3

This course covers the latest developments and trends in navigation and communication systems. Topics include Future Aviation Navigation Systems (FANS), fiber optics, enhanced vision, ADS-B, the FAA's NextGen, as well as other advancements in avionics.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Corequisite: AVM 241 or AVM 242.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVT 316 - AET and FCC Training

Credits: 1

This course is a self-paced lab that allows students to study for their Aviation Electronics Technician certificate and their Federal Communication Commission license in Elements 1, 3 and 8.

Note
Two hours lab a week.

This is a credit/no-credit course and will not affect the student's GPA.

Repeat for Credit
N

Typically Offered
Fall, Spring

AVT 317 - Composites I

Credits: 3

Introduction to composite materials used in a broad range of industries with an emphasis on aero structure. Topics include defining a composite, understanding the materials, safety aspects, and shop layouts that are used to produce composite parts. An overview of the construction methods, understanding how to inspect components for damage, and procedures to perform the actual repair used in industry today. Students develop an understanding of how to design/source industrial composite fasteners and install into the composite structure and the science of coatings for the protection of both the composite materials as well as metallic components adjacent to composites. The labs support the lectures with projects designed to give the student hands on application.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVT 318 - Composites I Laboratory

Credits: 2

An optional laboratory course introducing the use of equipment and materials utilized in the advanced composites industry.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AVT 317.

Typically Offered
Fall

AVT 327 - Avionics Repair

Credits: 3

An in depth overview of aircraft wiring. Procedures in terminating, repairing, testing and troubleshooting of aircraft wiring, as well as aging wiring inspections.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVT 330 - Avionics Troubleshooting

Credits: 4

An in-depth troubleshooting project, requiring critical thinking to analyze the problem and provide the correct repairs.

Note
One hour lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVT 327.

Typically Offered
Spring-Even Years

AVT 340 - Human Factors in Aviation

Credits: 3

Explores the physical environment and physiology limitations imposed on the aviation professional. Health, fatigue, human behavior and errors, communication, team building, leadership, situation awareness, crew resource management, judgment, and aeronautical decision making are studied to achieve safe and efficient operation.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 111 or AVT 100, or junior standing.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences
Social Sciences

AVT 360 - Airport Law

Credits: 3

A study of how the U.S. regulatory and legal systems work in relation to airport management. This course emphasizes contract law related to the Federal Aviation Administration Airport covenants and restrictions, Federal Aviation Regulation compliance and airport operator liability.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AVT 361 - Airport Environmental Studies

Credits: 3

Introduction to responsibilities, liabilities and public relations when dealing with environmental issues in day-to-day airport operations. Includes strategies for addressing airport and aircraft noise, wildlife hazard mitigation, compatible land use, wetlands, historical properties and impacts of construction. Federal regulations and enforcement are studied with emphasis on the Clean Water Act, Clean Air Act, Resource Conservation and Recovery Act, Pollution Prevention ACT, and National Historic Preservation Act as they apply to airports.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100 and ENGL 200

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AVT 380 - Airport Operations

Credits: 3

A study of the daily operations of an airfield in compliance with regulatory agencies, understanding the role of liaison to airport staff regarding operations, development of department budgets, knowledge of effective supervisory practices and principles, ability to plan and carry out airport operations and development programs under airport management matrix.

Note
Three hours lecture and three hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200

Typically Offered
Spring

AVT 386 - Aerodynamics

Credits: 3

This course covers incompressible flow theory and wing theory as well as calculations of stall speed, drag, and basic performance criteria. This course also examines configuration changes, high and low speed conditions, and special flight operations. Stability and control, weight and balance, and operational data are also examined. Aerodynamic performance of aircraft powered by

reciprocating, turboprop, and jet turbine engines are considered. The student will be introduced to aircraft design and high-speed aerodynamics.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100; and PPIL 111 or AVM 141.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

AVT 389 - Problems in Aviation

Credits: 1-18

Provides the student an opportunity to apply their aviation education to the improvement of skills previously learned as designated by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

AVT 400 - Composites II

Credits: 3

Continued study of the mechanical properties of several composite materials along with strengths and limitations. Topics include gelcoats for tooling and part production, layup of semi complex composite parts using wet layup and vacuum bagging techniques, simple mold development, construction, and repair. Additionally, students are introduced to compression composite molding compounds and tooling required for production, and composite facility layout and outfitting. The lab will support the lectures with projects designed to give the student the hands on application.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 303 or AVT 317.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AVT 405 - Introduction to Non-destructive Testing

Credits: 2

Introduction to non-destructive testing (NDT) and inspection methods commonly used to detect material anomalies in diverse industries. NDT methods used in aviation/mechanical structures and components is emphasized. Students gain practice using Visual, x-ray (radiographic, magnetic particle, ultra-sound, eddy current and dye penetrant), NDT methods and techniques on test samples. Serviceability of the components is determined using approved manufacturers service limits.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 121, or MET 231 and MET 245.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AVT 410 - Aviation Maintenance Management

Credits: 3

Provides students with an understanding of general aviation and commercial aviation maintenance programs. Includes regulations, maintenance levels, technical publications, quality assurance, inspections, human factors, and unions. It also provides an understanding of the difficulties in managing a line operation. Case studies of maintenance scenarios are used.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

AVT 417 - Composites III

Credits: 3

Continued study of the highly complex composite parts and associated molding technologies used to produce these parts. Topics include the construction of resin infusion parts and mold construction, resusable vacuum bagging materials, application of preimpregnated materials and tooling designed to withstand oven cure cycles, discussion of advanced materials and techniques new to the industry. The lab will support the lectures with projects designed to give the student the hands on application in a relative environment.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: AVT 400.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

AVT 420 - Aviation Accident Investigation

Credits: 3

This course is designed to provide a general understanding of the methods and procedures used in aviation accident investigation. Students in this course will learn methods used to gather and analyze facts of accidents as well as determine probable cause and contributing factors. Procedures and techniques used to determine accident causes will also be analyzed. Historical accident reports from National Transportation Safety Board (NTSB) and other organizations will be examined.

Repeat for Credit
N

Requisites
Corequisite: AVT 340 and junior standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

AVT 429 - Avionics Maintenance

Credits: 3

Provides the basic knowledge to repair and install pitot-static systems. Practical experience in troubleshooting and using maintenance test equipment.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 305.

Typically Offered
Fall-Odd Years

K-State 8
Empirical and Quantitative Reasoning

AVT 430 - Advanced Avionics Installation

Credits: 3

Provides practical knowledge of avionics suite installation, to include Garmin. Students will gain additional experience in operational checks, troubleshooting and software loading on the Garmin G1000/900X. This course is an individual semester long project.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVT 327.

Typically Offered
Spring-Odd Years

K-State 8
Empirical and Quantitative Reasoning

AVT 435 - Air Transportation

Credits: 3

This interactive course examines the development of the United States air transportation system, current issues, and the competitive strategies of past and present airline executives; examines the many attributes of starting and operating a successful airline in a competitive market; and explores the role of airport operations and the commercial and corporate aircraft that challenge the air transportation system.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Summer

AVT 440 - Air Carrier Operations

Credits: 3

A study of Federal Aviation Regulations that influence air carrier and commercial operators. Students will gain an appreciation of the variety of regulatory issues involved in air carrier operations such as certification, training, and operational safety and security requirements. Students will also gather the background information necessary to correlate and apply relevant regulations to daily aviation operations. The course focuses on FAR Part 61, 91, 119, 121, and 135.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 111 or AVT 100, and junior standing.

Typically Offered
Spring

AVT 442 - Advanced Air Traffic Control

Credits: 3

An in-depth study of tower, TRACON, and enroute procedures. Also examines the FAA's future air navigation system concept.

Repeat for Credit
N

Requisites
Prerequisite: AVT 240, PPIL 112.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

AVT 445 - Aviation Law

Credits: 3

A study of how the U.S. regulatory and legal systems work in relation to aviation activities. It is designed to help those in the aviation industry understand their rights, liabilities, and responsibilities and avoid common legal pitfalls. Emphasis will also be placed on aircraft ownership, registration, and insurance.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AVT 446 - Corporate and Business Aviation Management

Credits: 3

A study of the history of corporate and business aviation, the regulation of the industry, and the operation and management of corporate and business flight departments. Students will receive an overview of the social, economic, and political effects of business aviation. Aircraft selection and utilization, maintenance responsibilities, fiscal considerations, fractional ownership, and passenger and

crew safety and security measures will also be studied.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

AVT 448 - Aviation Legislation

Credits: 3

Students are required to take part in the University Aviation Association's Annual Seminar on Establishing Aviation Policy during the first full week of January in Washington, D.C. Students prepare for the seminar with required reading assignments.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

AVT 450 - Aviation Safety Management

Credits: 3

A course designed to assist the student to develop an attitude and philosophy for accident prevention. The course includes ideal and practical, personal and organizational safety procedures and goals; safety philosophies; aircraft accident reports; human factors; principles of accident investigation; accident prevention program and accident statistics; current events; NTSB special studies. The safety program is analyzed from the theoretical and philosophic points of view. A safety program is developed with an examination of safety concepts, the human elements of accidents, managing a safety office in an organization, and current events.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

AVT 451 - System Safety

Credits: 3

This course is designed to provide an understanding of the system safety discipline. Students will learn how the system safety process is used in accident prevention and examine its role in management. Students will also examine various aircraft systems for overall safety of operation.

Repeat for Credit
N

Requisites
Prerequisite: AVT 450.

Typically Offered
Spring-Odd Years

K-State 8
Empirical and Quantitative Reasoning

AVT 455 - Current Trends and Issues in Aviation

Credits: 3

This course explores current trends and issues in the aviation industry. Emphasis is placed on discussing current issues that are impacting the world aviation marketplace. Students will address these issues and trends from the standpoint of application to their career, relevance to the economic viability of the industry, and the impact such trends place on aircraft operators and manufacturers.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

AVT 461 - Airport Management

Credits: 3

An in depth study of both landside and airside airport business management, utilizing the American Association of Airport Executives' Body of Knowledge modules. Includes a study of the role of the airport in community development.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing

Typically Offered
Fall

AVT 462 - Airport Planning

Credits: 4

A study of airport planning and practices to understand FAR Regulation part 139 airport design standard as well as a study of both landside and airside planning issues utilizing the American Association of Airport Executive's Body of Knowledge modules.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: AVT 461.

Typically Offered
Fall

AVT 464 - Airport Certified Manager

Credits: 1

The study and preparation for various forms of certification within the AAAE realm including the opportunity to study and take the Airport Certified Employee (ACE) exams and the Certified Member (CM) exam.

Note
One hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AVT 250, AVT 360, AVT 462.

Typically Offered
Spring

AVT 480 - Airport Global Networks

Credits: 3

An introduction to the economic, political, and civic challenges that impact the profitability of airports worldwide and the steps being taken by the airport industry and international governing bodies to address them.

Repeat for Credit
N

Requisites
Prerequisite: AVT 380, Junior Standing, and ENGL 302

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

AVT 482 - Aviation Ethics and Leadership

Credits: 3

Students acquire an understanding of core leadership values demanded by the aviation industry, understand leadership challenges facing the aviation industry, and identify personal leadership styles and their most effective implementation within industry.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

AVT 485 - Helicopter Maintenance

Credits: 3

An advanced study of the major components of rotary-winged aircraft to include airframe, rotor, transmission and engine components of turbine and reciprocating engine helicopters. Also includes a detailed study and validation of all Federal Aviation Administration required documentation related to maintenance, historical records, and inspection of components.

Note
Two hours lecture and 4 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: AVM 111, 121, 131, 141, 151 or consent of instructor.

Typically Offered
Summer

K-State 8
Ethical Reasoning and Responsibility

AVT 497 - Senior Capstone

Credits: 3

This culminating experience is a sustained occasion when students will put into independent practice the intellectual, creative, and expressive skills/knowledge they have cultivated in their undergraduate curriculum. In this course students integrate discipline-specific knowledge in addition to communication and inquiry methods to solve problems and communicate mastery of their respective area of interest.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and instructor consent.

Typically Offered
Fall, Spring

AVT 498 - Research Project

Credits: 1-9

Research, scholarly and creative activities in the aviation field. Working with faculty on a current research project.

Note
The specific course content varies in accordance with current projects.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Fall, Spring, Summer

AVT 560 - Airport Design

Credits: 4

Student teams with faculty and industry advisors prepare to enter their work in the Airport Cooperative Research Program's (ACRP) national design competition for universities addressing issues relating to airports and the National Airspace System. The competition focuses on design solutions in the following broad areas: Airport Operation and Maintenance, Runway Safety/Runway Incursions/ Runway Excursions, Airport Environmental Interactions, and Airport Management and Planning.

Repeat for Credit
N

Requisites
Prerequisite: AVT 360, AVT 361, and AVT 462.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

AVT 611 - Aircraft Regulation and Certification

Credits: 3

Provides an overview of the FAA certification process relating how the certification process contributes to a safe

National Airspace System. Application of relevant Federal Aviation Regulations. Covers both aircraft type and production certification to include airframe, engine, and component certification. Covers the history of aviation regulation and corresponding relationship to aerospace safety.

Repeat for Credit
N

Typically Offered
Fall

AVT 703 - Project Management for Aerospace Professionals

Credits: 3

This course focuses on applied project management, methodology, tools, and techniques. Topics include career aspects of project management; business factors affecting the project; project organization, planning, execution, and communications; the project life cycle; risk analysis; and best practices in project management. Course will include specific applications in the aviation/aerospace sector.

Repeat for Credit
N

Typically Offered
Fall

AVT 707 - Research Methods

Credits: 3

Provides students with the skills necessary to perform graduate-level research in the field of technology. Course focuses primarily on quantitative research; however, qualitative and mixed-method research methods are also covered. Statistical Research Software applications are also included.

Repeat for Credit
N

Typically Offered
On sufficient demand

AVT 722 - Aircraft Type Certification

Credits: 3

A detailed examination of the type certification process leading to the issuance of a type certificate, and changes to a type certificate through an amended type certificate, supplemental type certificate, or amended supplemental type certificate. Covers FAA and international certification standards and regulating bodies as well as relevant performance standards to include role of FAA Advisory Circulars, DO 160, 178, and 254, SAE, ASTM, and other industry standards in the certification process. Presents the continuing airworthiness process, including the issuance of airworthiness directives, and the relationship of manufacturer service bulletins, and service letters. Brief discussion on type validation process. Discuss the importance of developing processes to manage all of the data associated with the certification process.

Repeat for Credit
N

Requisites
Prerequisite: AVT 611

Typically Offered
Fall, Spring, Summer

AVT 734 - Advanced Aircraft Certification

Credits: 3

A detailed examination of the process to determine applicable regulations for changed aeronautical products, certification project planning elements not covered by AVT 722, application of selected means and methods of compliance, delegation systems, and certification validation processes for export of aeronautical products.

Note
Name was changed to Advanced Aircraft Certification. https://kstate.curriculog.com/proposal:7708/form

Repeat for Credit
N

Requisites
Prerequisite: AVT 722

Typically Offered
Fall, Spring, Summer

AVT 744 - Aviation Human Factors Analysis and Design

Credits: 3

An in-depth exploration of the history of air safety as related to human error and how system safety has been greatly enhanced by the incorporation of the fundamentals of human factors in design. Students will understand and articulate the major advances in Human Factors research over the past 40 years and identify knowledge gaps yet to be filled.

Repeat for Credit
N

Requisites
Prerequisite: AVT 611.

Typically Offered
On sufficient demand

AVT 751 - Aerospace Policy

Credits: 3

Students will understand State and Federal legislative processes and appreciate how ideas become law. This course will specifically include a study of the concepts of advocacy, building coalitions, caucuses, theories of statutory interpretation, and drafting legislation. Where possible the course will include meeting with legislators. Students will also understand how to attain, track, and influence Federal legislation affecting the aviation/aerospace industry.

Repeat for Credit
N

Typically Offered
On sufficient demand

AVT 771 - Leadership in the Aerospace Sector

Credits: 3

An exploration of the theories of leadership and critical issues facing aerospace sector leadership in the coming decades. Concepts of resilience, contingencies, communication, collaboration, ethics, strategic planning, failure/recovery, and cultural transformation will be explored. At the end of this course students will understand and appreciate the differences between effective and ineffective leaders.

Repeat for Credit
N

Typically Offered
On sufficient demand

AVT 790 - Aerospace Topics

Credits: 3

Variable content as determined by the instructor to address emerging issues and challenges in the aviation/aerospace sector and/or to meet non-standard student needs and opportunities.

Repeat for Credit
Y

Typically Offered
On sufficient demand

AVT 799 - Advanced Topics in Aeronautics

Credits: 3

Advanced topics in Master of Science in Aeronautics.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor consent.

Typically Offered
On sufficient demand

AVT 836 - Master of Science in Aeronautics Capstone Project

Credits: 3

An applied project focused on either aircraft certification or aerospace leadership/policy. This course is designed to improve the demonstration of professional knowledge in the student's technical discipline.

Repeat for Credit
N

Requisites
Prerequisite: AVT 611, AVT 707, COT 701, and advisor permission

Typically Offered
Spring

AVT 838 - MSA Thesis

Credits: 1-6

Required research for M.S.A. thesis option students**.**

Repeat for Credit
Y

Requisites
Prerequisites: AVT 611, AVT 707

Typically Offered
On sufficient demand

AVT 841 - Aerospace Safety Management Systems (SMS)

Credits: 3

An in-depth analysis of aviation safety across all elements of the industry from manufacturing to training, to airports. The student will understand the impacts and challenges of balancing operational efficiencies with the maximization of organizational safety. Safety Management Systems (SMS) concepts will be explored, and students will have the opportunity to design a sample SMS program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

BAE 020 - Engineering Assembly

Credits: 0

Presentation of professional problems and practices by students, faculty, and professionals associated with the career of biological and agricultural engineering.

Note
One hour lecture a month.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BAE 101 - Introduction to Biological and Agricultural Engineering and Technology

Credits: 1

Introduction to discipline, department, university, and profession. Exploration of career option. Gain skills through application-oriented problem solving.

Note
One hour recitation a week.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
ATM 101

BAE 131 - Biological Systems Engineering Project I

Credits: 1

Team-oriented design project, with an emphasis on applying computer tools to problem solving in biological systems engineering.

Note
Three hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: MATH 220.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

BAE 231 - Biological Systems Engineering Project II

Credits: 1

Team-design project presented by biological and agricultural engineers from industry and student engineering design teams with an emphasis on problem

definition, information search, idea generation, concept development, and written oral communication.

Note
Three hour lab a week

Repeat for Credit
N

Requisites
Prerequisite: BAE 131.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives

BAE 250 - Solid Modeling

Credits: 1

Basics of solid modeling with the PTC software Pro Engineer/Creo. Modeling parts, creating assemblies, and creating drawing based on modeled parts and assemblies.

Note
Three hour lab/week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ME 212.

Typically Offered
Spring

BAE 331 - Professional Practice for Biological Systems Engineering Design

Credits: 1

A preparatory course for BSE Senior Design class. Topics will include professionalism, project management, intellectual property, organizational behavior and ethics. Students will explore potential design project ideas, build design teams, and chose a project to complete for senior design in the following semester.

Note
One hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 231.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

BAE 345 - Properties of Biological Materials

Credits: 2

Characterization and application of material properties (physical, chemical, hygroscopic, rheological, and thermal) that affect the engineering design and analysis of biological processes and systems.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 210 or CHM 220.

Typically Offered
Spring

BAE 346 - Properties of Biological Materials Laboratory

Credits: 1

Laboratory evaluation of biological material properties (physical, chemical, rheological, and thermal) that affect biological processes and systems, data analysis and interpretation

Note
Required for all biological systems engineering majors.

Repeat for Credit
N

Requisites
Prerequisite: Must be concurrently enrolled in BAE 345.

Typically Offered
Spring

BAE 350 - Off Road Machinery Systems

Credits: 2

Basic power and energy concepts. Machinery systems for tillage, planting, and harvesting crops. Impact of these systems on the environment and natural resources.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 210.

Typically Offered
Fall

BAE 351 - Machinery Systems Lab

Credits: 1

Basic power and energy concepts. Machinery systems for tillage, planting, and harvesting crops. Impact of these systems on the environment and natural resources.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Must be taken concurrent with BAE 350.

Typically Offered
Fall

BAE 445 - Biological Engineering Fundamentals

Credits: 3

Integration of biochemistry, microbiology, and biology principles into engineering with topics such as chemistry of biomolecules, data analysis and presentation, material and energy balances for reactive and non-reactive processes, biochemical reactions, and application of biological engineering principles in industrial processes.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and BAE 345 or CE 533 or CHE 354 and CHE 355.

Typically Offered
Fall

BAE 447 - Cell Culture Technology Laboratory

Credits: 2

Cell culture laboratory fundamentals including media preparation and aseptic techniques; bioreactor assembly, sterilization, and operation; expansion of cell cultures, cell counting and viability; expression and measurement of target proteins; cell harvesting techniques; analytical techniques; and cGMP documentation.

Note
1 h recitation and 2 h lab per week

Repeat for Credit
N

Requisites
Prerequisite or corequisite: BAE 445 or ATM 345

Typically Offered
Fall

BAE 448 - Separation Technologies Laboratory

Credits: 2

Hands on experience of separations technologies such as cell lysis and extraction, precipitation, centrifugation, filtration, and chromatography; analytical methods used to assess separations; cGMP documentation

Note
1 hr recitation and 2 hr laboratory per week

Repeat for Credit

N

Requisites
Pre-requisite/corequisite: ATM 445 or BAE 626 or CHE 626

Typically Offered
Spring

BAE 450 - Off Road Machine Power Components

Credits: 3

Engine thermodynamics, fuel and combustion, engine components, engine cycles, engine power transfer and efficiencies, exhaust gas emissions. Mechanical power transfer mechanisms: bearings, belt drives, chain drives, gear drives, shaft drives. Hydraulic power transfer components and systems, fluid mechanics, hydraulic motors.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 213. Not available for credit students with ATM 455.

Typically Offered
Spring

BAE 460 - Computational & Statistical Tools for Engineers

Credits: 3

Application of statistical tools for analyzing engineering data. Practice of introductory to intermediate programming to develop problem-solving techniques for a wide variety of engineering applications.

Note
2 hour lecture and 2 hour studio each week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and sophomore standing.

Typically Offered
Fall

BAE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

BAE 499 - Honors Research in Biological Systems Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. Open to students in the college of engineering honors program. A report is presented orally and in writing during the last semester.

Note
Instructor approval.

Repeat for Credit
Y

Typically Offered
Fall

BAE 535 - Structures and Environment Engineering

Credits: 3

Environmental control for agricultural buildings and structures; analysis and design of structural systems and members for agricultural structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ME 513 and CE 333 or CE 530.

Typically Offered
Fall

BAE 536 - Biological Systems Engineering Senior Design I

Credits: 3

Applies and integrates engineering design principles, verbal and written communications, ethics, project management, social aspects, and economics to design a system, component or process which interfaces with agricultural and other biological systems. Emulates professional environment and provides experience in team dynamics and collaboration through the team-based design project.

Note
Two 3-hour labs a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 331 and one of the following courses as prerequisite or concurrent: ME 533, BAE 545, BAE 560.

Typically Offered
Fall

Cross-listed
ATM 536 - Agricultural Technology Management Capstone Project

K-State 8
Ethical Reasoning and Responsibility

BAE 545 - Biological Process Engineering

Credits: 3

Bioprocess engineering principles with an emphasis on momentum transfer and applications such as fluid flow and pump systems, steady- and unsteady-state heat transfer, psychrometrics and application to drying processes, and biomaterial and bioenergy processes.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 571 or CHE 530

Typically Offered
Fall

BAE 550 - Hydraulics and Mechatronics

Credits: 3

Basic hydraulic, mechatronic, and hybrid drive system concepts and design. Application of these technologies to agriculture, construction, and other off road equipment applications.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 213.

Typically Offered
Fall-Even Years

BAE 560 - Hydrology for Biological Systems

Credits: 3

Components of water cycle including precipitation, infiltration, evapotranspiration. Principles and measures for controlling storm water runoff and soil erosion including hydrology and surface water flow; design of water handling structures for land drainage, flood protection, and irrigation.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ME 571 and either STAT 510 or BAE 460.

Not available for credit for students with CE 550.

Typically Offered
Spring

BAE 582 - Natural Resources/Environmental Sciences Project (NRES)

Credits: 3

A comprehensive project in NRES. Requires integration of

information and understanding acquired in NRES secondary major courses. Students must prepare and present written and oral reports.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 415, COMM 105.
Prerequisite or concurrent enrollment: 15 hours of approved courses in NRES secondary major.

Typically Offered
Fall, Spring

Cross-listed
DAS 582 and GENAG 582

K-State 8
Natural and Physical Sciences
Social Sciences

BAE 610 - Problems in Biological Systems Engineering

Credits: 1-3

Current and advanced problems in biological systems engineering.

Note
No more than 6 hours can be applied to the degree. Instructor approval.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

BAE 611 - Particle Technology

Credits: 3

Science and behavior of airborne particles or aerosols. Technology and methods for measuring, controlling, and utilizing aerosols in the agricultural and food industries. Specific topics include basic particle mechanics; principles of particle measurement; particle statistics; electrostatic precipitation; condensation; evaporation; dust generation; and filtration.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 460 or STAT 510, and PHYS 213.

Typically Offered
Spring

BAE 620 - Topics in Biological Systems Engineering

Credits: 1-18

Engineering topics for the design, understanding, and/or application of biological systems. Topics announced when offered.

Repeat for Credit
Y

Requisites
Prerequisite: Approval of instructor.

Typically Offered
Fall, Spring, Summer

BAE 626 - Bioseparations

Credits: 3

Engineering principles of unit operations such as cell lysis and extraction, precipitation, centrifugation, membrane filtration, and chromatography and analytical methods used in bioprocess development.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 445 or CHE 531 or instructor permission.

Typically Offered
Spring-Odd Years

Cross-listed
CHE 626

BAE 636 - Biological Systems Engineering Senior Design II

Credits: 1-3

A continuation of BAE 536. Completion of a team-oriented design project, with emphasis on construction, evaluation, documentation, and presentation of the design.

Repeat for Credit
N

Requisites
Prerequisite: BAE 536 or other approved capstone design course.

Typically Offered
Fall, Spring

BAE 640 - Instrumentation and Control for Biological Systems

Credits: 3

Fundamentals of instrumentation and control engineering applied in biological and agricultural systems and processes. Time-domain analysis and frequency response methods. Sensors and actuators in feedback control systems. Control system design. Case studies.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 410 or ECE 519, and MATH 340.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BAE 642 - Fundamentals of Conversion of Biorenewable Resources

Credits: 3

An introduction to the conversion of biorenewable resources into biobased products and biofuels.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220 and CHM 230.

Typically Offered
On sufficient demand

Cross-listed
CHE 642

BAE 643 - Life Cycle Assessment

Credits: 3

Introduction to the life cycle assessment methodology for quantifying environmental impacts of products, processes, and systems. Topics include life cycle methodology, data inventory process and databases, life cycle impact modeling approaches and software, uncertainty quantification, and practical applications to demonstrate life cycle assessment as a tool for making decisions to improve sustainability of materials, products, and systems.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220 and either CHM 230 or CHM 250

Typically Offered
Spring

Cross-listed
CHE 643

BAE 645 - Bioenvironmental Reaction Engineering

Credits: 3

Bioreaction engineering principles with an emphasis on biological and environmental engineering with topics such as mass transfer, homogenous and heterogenous reactions, enzyme and cell growth kinetics, bioreactor configurations and operation, and sustainable bioprocessing.

Note
3 hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisites: BAE 345 or CHE 354 and CHE 355 and BAE 445.

Typically Offered
Spring

BAE 650 - Energy and Biofuel Engineering

Credits: 3

Principles of thermal energy, energy conversion, and bioenergy and biofuel production including biomass feedstocks, processing, and conversion. Energy and material balances of bioenergy production and processing systems.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ME 513.

Typically Offered
Spring-Odd Years

BAE 651 - Air Pollution Engineering

Credits: 3

Air pollution legislation, standards, measurement, and terminology. Design and economics of particulate pollution control systems including cyclones, fabric filters, wet scrubbers, and electrostatic precipitators. Abatement of gas and vapor pollution using VOC incineration, gas adsorption and gas absorption. Meteorology and atmospheric dispersion modeling.

Note
Three hours recitation.

Repeat for Credit
N

Requisites
Prerequisite: ME 513, 571.

Typically Offered
Spring

BAE 660 - Hydraulic Transport in Biological Systems

Credits: 3

Applications of fluid mechanics for design and analysis of hydraulic systems in biological systems and environmental engineering including: mass, momentum and energy balances; pressurized Newtonian and non-Newtonian flow systems; irrigation principles; pumps; and hydraulic modeling.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 571 or CHE 530

Typically Offered
Fall

BAE 663 - Environmental and Ecological Risk Assessment

Credits: 3

Examination of processes and methodologies associated with three phases of human environmental and ecological risk assessments. Topics of contaminant release and exposure assessment, environmental transport theory and applications, and risk characterization. Experience in defining and quantifying uncertainty associated with human and ecosystem perturbation, risk management, and restoration of environmental and ecological resources.

Note

Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and CHM 230 or CHM 250.

Typically Offered
Spring-Odd Years

Cross-listed
CHE 663

BAE 664 - Green Stormwater Infrastructure Design and Assessment

Credits: 3

Topics covered including engineering design of green infrastructure systems, including bioretention, stormwater wetlands, permeable pavement, and green roofs; methods for assessing the hydrologic and water quality performance at the site- and watershed scales.

Repeat for Credit
N

Requisites
Prerequisite: BAE 560 or CE 550.

Typically Offered
Fall-Even Years

BAE 665 - Ecological Engineering Design

Credits: 3

Definition, classification, and practice of ecological engineering. Course describes ecological systems, ecosystem restoration, and the utilization of natural processes to provide societal services and benefits to nature.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and one of the following courses: BAE 560, CE 563, BIOL 529, BIOL 612, ATM 661.

Typically Offered
Fall-Odd Years

BAE 669 - Watershed Modeling

Credits: 3

Study and evaluation of process equations used in watershed-scale, water-quality models. Use and application of watershed models.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 508 and one of the following courses: BAE 560, CE 550, ATM 661.

Typically Offered
Spring-Even Years

BAE 740 - Biomaterials Processing

Credits: 3

Technologies of bio-based material processing including starch extraction (wet milling), plant oil extraction and refining, plant protein extraction and processing, cellulose processing, biofuel production, chemicals bioconversion, and drying technologies or biomaterials.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 345 or BAE 545 or GRSC 602.

Typically Offered
Fall-Even Years

Cross-listed
GRSC 740

BAE 750 - Analysis and Design of Off-Highway Vehicles

Credits: 3

Analytical study of design, testing, construction, and operating characteristics of off-highway vehicles and machinery. Includes human factors, mobility, and precision agriculture.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 536 or ME 574.

Typically Offered
On sufficient demand

BAE 760 - Environmental Engineering Seminar

Credits: 0

Discussion of current advances in research and practice of environmental engineering.

Note
One hour seminar biweekly.

Repeat for Credit
Y

Typically Offered
Fall, Spring

Cross-listed
CE 760

BAE 768 - Geoenvironmental Engineering Design

Credits: 3

A capstone design project in geoenvironmental engineering focused on resolving issues related to containment of pollutants and remediation of soil and groundwater.

Repeat for Credit
N

Requisites
Prerequisite one of the following: AGRON 605, AGRON 746, BAE 690, CE 625, CE 654, CHE 531, or GEOL 611.

Typically Offered
Spring

Cross-listed
CE 768 and CHE 768

BAE 810 - Research in Biological & Agricultural Engineering

Credits: 0-18

Research within the field of biological and agricultural engineering

Note
Approval of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BAE 811 - Advances in Particle Technology

Credits: 3

Science and behavior of airborne particles or aerosols. Technology and methods for measuring, controlling, and utilizing aerosols in the agricultural and food industries. Specific topics include basic particle mechanics; principles of particle measurement; particle statistics; electrostatic precipitation; condensation; evaporation; dust generation; and filtration.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 703 or BAE 460 or STAT 510 or instructor permission.

Typically Offered
Spring

BAE 815 - Graduate Seminar 1: Literature Review

Credits: 1

Presentation and discussion of research philosophies, procedures, and results for engineers with emphasis on literature review.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall-Odd Years

BAE 816 - Graduate Seminar 2: Academic Writing and Publishing

Credits: 1

Presentation and discussion of research philosophies, procedures, and results for engineers with emphasis on academic writing and publishing.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing

Typically Offered
Spring-Even Years

BAE 817 - Graduate Seminar 3: Data Interpretation and Presentation

Credits: 1

Presentation and discussion of research philosophies, procedures, and results for engineers with emphasis on data analysis, interpretation, and presentation

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing

Typically Offered
Fall-Even Years

BAE 818 - Graduate Seminar 4: Research Presentation and Teaching

Credits: 1

Presentation and discussion of research philosophies, procedures, and results for engineers with emphasis on research presentation and teaching

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing

Typically Offered
Spring-Odd Years

BAE 820 - Topics in Biological & Agricultural Engineering

Credits: 1-18

A course reserved for study of current topics in agricultural engineering. Topics announced when offered.

Note
Instructor approval.

Repeat for Credit
Y

Typically Offered
On sufficient demand

BAE 840 - Measurement Systems

Credits: 3

Theory and application of measurement systems for biological and agricultural systems with emphasis on sensors and data-acquisition systems for measurement of variables related to soils, plants, animals, machines, and processes.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: BAE 640.

Typically Offered
Fall

BAE 842 - Advanced Biomass Thermochemical Conversion

Credits: 3

Thermochemical methods to convert biomass to fuels and chemicals: liquefaction, pyrolysis, gasification, and heterogeneous catalysis. Analysis of the reaction kinetics and mass, heat, and momentum transfer in chemical reactors associated with these methods.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 520 or ME 513 and CHE 550 or BAE 545.

Typically Offered
Fall-Odd Years

Cross-listed
Colisted with CHE 842.

BAE 843 - Advanced Life Cycle Assessment

Credits: 3

Theoretical underpinnings of the life cycle assessment methodology for quantifying environmental impacts of products, processes, and systems. Topics include life cycle methodology, data inventory process and databases, attributional and consequential modeling approaches, impact model theory and software tools, uncertainty quantification, and culminating project in system of choice.

Note
credit not granted for both BAE 643 and BAE 843

Repeat for Credit
N

Requisites
Prereq: prior coursework in calculus and chemistry OR instructor permission

Typically Offered
Spring

BAE 864 - Advanced Green Infrastructure Design and Assessment

Credits: 3

Advanced consideration of engineering design of green infrastructure and low impact development practices including bioretention, stormwater wetlands, permeable pavement, and vegetated roofs, as well as modeling tools for assessing hydrologic, water quality and broader environmental benefits of these systems at the site- and watershed scales.

Note
credit not granted for both BAE 664 and BAE 864

Repeat for Credit
N

Requisites
Prereq: BAE 560, CE 550, or other coursework in hydrology

Typically Offered
Fall-Even Years

BAE 865 - Advanced Ecological Engineering Design

Credits: 3

Advanced study of ecological engineering, systems and processes.

Note
Three hours recitation a week. Recommended background: Hydrology and Ecology. Not available for students with credit for BAE 665.

Repeat for Credit
Y

Typically Offered
Fall-Odd Years

BAE 869 - Advanced Watershed Modeling

Credits: 3

Advanced study and evaluation of process equations used in watershed-scale, water-quality models. Advanced application of watershed models.

Note
Three hours recitation a week. Recommended background: Hydrology and GIS. Not available for students with credit for BAE 669.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

BAE 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BAE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BAE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOCH 100 - Biochemistry Orientation

Credits: 1

Discussion of biochemistry as a discipline in the life sciences.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

BIOCH 110 - Biochemistry and Society

Credits: 3

Topics in biochemistry related to aspects of daily living. Development of knowledge and skills for understanding bioscience information in news media and the Internet. Selected biochemical concepts with applications to humans, such as: chemical principles and biomolecules, nutrition/diets, growth and aging, disease, fermentation, drug action, medical diagnostics and forensics, and bioethics.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 111 - Biochemistry and Society Laboratory

Credits: 1

Experiments to promote understanding of chemicals and reactions in living systems.

Note
Three hours of laboratory a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 110 or concurrent enrollment.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 265 - Introductory Organic and Biochemistry

Credits: 5

For students in health and human sciences, nursing, and other areas desiring an integrated organic and biochemistry course to provide an understanding of carbohydrates, proteins, lipids, and digestive and metabolic systems.

Note
Three hours lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 266 - Elementary Organic and Biochemistry with Home and Virtual laboratory

Credits: 5

Provides an understanding of carbohydrates, proteins, lipids, and digestive metabolic systems.

Note
Three hours lecture and four hours of lab a week. The weekly lab exercises have two components: 1 in-home, hands-on experiment, and 1 virtual laboratory experiment, per week. In total the class will encompass 11 in-home and 11 virtual experiments.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite - CHM 110

Typically Offered
Fall, Spring, Summer

BIOCH 290 - Biochemistry Seminar

Credits: 2

Lectures and discussions on basic topics in biochemistry.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 399 - Honors Seminar in Biochemistry

Credits: 3

Lecture, guided reading, and discussion of topics of general interest in biochemistry. Topics will vary depending on the interests and backgrounds of students enrolled.

Repeat for Credit
N

Requisites
Prerequisite: Freshman Honors Seminar.

Typically Offered
Spring

K-State 8

Ethical Reasoning and Responsibility
Natural and Physical Sciences

BIOCH 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Note
May be used by honors students to satisfy BS requirement for BIOCH 799.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 521 - General Biochemistry

Credits: 3

A basic study of the chemistry and metabolism of carbohydrates, lipids, proteins, and nucleic acids.

Repeat for Credit
N

Requisites
Prerequisite: CHM 350 or CHM 531.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 522 - General Biochemistry Laboratory

Credits: 3

A one-semester laboratory course encompassing a connected series of experiments that span biochemical chromatographic techniques, PCR- cloning into plasmids by restriction fragment exchange, protein expression and purification by His-tag affinity chromatography, spectroscopic analysis of ligand binding, enzyme kinetics and inhibition.

Note
Two hours of lecture and six hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 351 or CHM 532 and BIOCH 521 or concurrent enrollment.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 523 - Introduction to Biochemical Methods

Credits: 2

A one-semester virtual laboratory course encompassing a connected series of experiments that span biochemical chromatographic techniques, PCR- cloning into plasmids by restriction fragment exchange, protein expression and purification by His-tag affinity chromatography, spectroscopic analysis of ligand binding, enzyme kinetics and inhibition.

Note
Two hours of lecture and four hours of virtual laboratory experiments per week.

Repeat for Credit
N

Requisites
Prerequisites: CHM 350, CHM 351; BIOCH 521 or concurrent enrollment.

Typically Offered
Fall, Spring, Summer

BIOCH 571 - Medical Biochemistry

Credits: 3

Covers medically related concepts, structures, pathways

and mechanisms in biochemistry. Addresses the fundamental biochemistry behind veterinary, medical or dental topics and issues. Instructs in the fundamental principles of protein structure and function, enzymology, carbohydrate and lipid metabolism, hormones, biochemical energetics, membranes, nucleic acid and protein metabolism, information transfer and the genetic code, genomic and proteomic analyses, the interdependence of biochemical pathways, pathogenesis and additional new topics.

Note
Serves as preparatory for the MCAT/DAT/GRE examinations.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Fall

BIOCH 599 - Research Training in Biochemistry

Credits: 1-3

Provides laboratory experience for majors and nonmajors in research techniques contributing to ongoing biochemical research.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 755 - Biochemistry I

Credits: 3

An introduction to physical methods, kinetics, and thermodynamics of biochemical reactions and bioenergetics, chemistry of proteins and amino acids, carbohydrate chemistry, and metabolism. BIOCH 755 and 765 are for students interested in a two-semester comprehensive coverage of biochemistry. For a one-semester course, enroll in BIOCH 521.

Note
Non-majors lacking these prerequisites should obtain consent of instructor before enrollment.

Repeat for Credit
N

Requisites
Prerequisite: Chemical analysis, one year of organic chemistry, differential and integral calculus.

Typically Offered
Fall

BIOCH 756 - Biochemistry I Laboratory

Credits: 2

An intensive laboratory course to accompany BIOCH 755. BIOCH 756 and 766 are sequential courses for students interested in a two-semester comprehensive coverage of experiments in biochemistry. For a one-semester laboratory course, enroll in BIOCH 522.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: *BIOCH 755 or concurrent enrollment.

*Non-majors lacking these prerequisites should obtain consent of instructor before enrollment.

Typically Offered
Fall

BIOCH 757 - NMR Laboratory

Credits: 1

Basic methods and strategies of nuclear magnetic resonance used in the study of biological molecules. Principles and applications of simple one-dimensional and two-dimensional NMR experiments.

Note
Two three-hour laboratories per week. Meets second half of semester.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 755.

Typically Offered
Spring

BIOCH 758 - Protein Structure Laboratory

Credits: 1

Principles and uses of computational and experimental approaches for studying peptide and protein structure and dynamics: computer modeling and simulation techniques, fluorescence and circular dichroism spectroscopies, microcalorimetry, and analytical ultracentrifugation.

Note
Two three-hour laboratories per week. Meets first half of semester.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 755.

Typically Offered
Spring

BIOCH 765 - Biochemistry II

Credits: 3

Continuation of BIOCH 755; lipid chemistry and metabolism, amino acid metabolism, nutrition, nucleic acid chemistry and metabolism, integration of biochemical pathways and metabolic control mechanisms.

Note
Non-majors lacking these prerequisites should obtain consent of instructor before enrollment.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 755.

Typically Offered
Spring

BIOCH 766 - Recombinant DNA Laboratory I

Credits: 1

Biochemical manipulation of nucleic acids. Isolation of plasmid and chromosomal DNA, restriction enzyme digestions, gel electrophoresis. In vitro and in vivo plasmid assembly techniques, polymerase chain reaction, and DNA sequencing analysis. CRISPR/Cas gene editing in live cells.

Note
Two three-hour labs per week. Meets first half of semester.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 522. Recommended.

Typically Offered
Spring

BIOCH 767 - Recombinant DNA Laboratory II

Credits: 1

Approaches to study genetic interactions and protein-protein interactions using DNA techniques. Genomic integration of exogenous DNA, CRISPR/Cas editing, and yeast two-hybrid methods. Site directed mutagenesis, protein domain analysis, and protein interaction detection methodologies.

Note
Two three-hour labs per week. Meets second half of semester.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 522.

Typically Offered
Spring

BIOCH 775 - Molecular Biophysics

Credits: 3

Survey of the biophysical methods most frequently encountered in biochemistry and related disciplines. A summary of concepts and techniques of physical science used in studying the structure and function of biomacromolecules such as proteins and DNA. Applications include classical equilibrium thermodynamics and analytical methods like mass spectrometry and circular dichroism (CD), fluorescence, EPR and nuclear magnetic resonance (NMR) spectroscopy. An emphasis on the underlying principles and techniques used in determining the molecular weight and shape of biopolymers, biochemical mechanisms of action, and observation of conformational changes in macromolecules.

Repeat for Credit
N

Requisites
Prerequisite: CHM 350/CHM 351 or CHM 531/CHM 532, MATH 221, PHYS 114, BIOCH 755, BIOCH 756, BIOCH 765.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOCH 799 - Advanced Research Training in Biochemistry

Credits: 0-18

Supervised research experience in biochemistry and molecular biophysics.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOCH 806 - Biochemistry Seminar

Credits: 0-1

Seminar for graduate students in biochemistry.

Repeat for Credit
Y

Typically Offered
Fall, Spring

BIOCH 815 - Nuclear Magnetic Resonance (NMR) Spectroscopy of Macromolecules

Credits: 2

A lecture and laboratory course on 'state-of-the-art' multi-dimensional nuclear magnetic resonance methods and strategies in solving three dimensional structure of peptides, proteins, nucleic acids and other macromolecules.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Intersession

BIOCH 890 - Advanced Topics in Biochemistry

Credits: 1-3

Course to present timely topics in Biochemistry.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOCH 899 - Research in Biochemistry I

Credits: 1-18

Research in biochemistry which may be used for preparation of the M.S. Thesis.

Note
Sufficient training for research undertaken.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOCH 905 - Advanced Topics in Plant Biochemistry

Credits: 3

An advanced treatment of topics of current interest in plant biochemistry, including photosynthesis and carbon metabolism, nitrogen fixation and nitrogen metabolism, structure and function of the higher plant genome, and production of material of economic interest.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 765.

Typically Offered
Fall-Even Years

BIOCH 907 - Advanced Topics in Insect Biochemistry

Credits: 3

Lectures, readings, and discussion of topics of current interest in insect biochemitry. Topics will include biochemical molecules and processes specific to insects, such as biochemistry of the exoskelton and regulation of metamorphosis, as well as comparison of insect and mammalian biochemistry.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521.

Typically Offered
Spring-Even Years

BIOCH 910 - Lipids

Credits: 3

Chemistry of plant and animal lipids, their occurrence, metabolism, and industrial uses.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 765.

Typically Offered
On sufficient demand

BIOCH 915 - Biomolecular Modeling

Credits: 3

Lectures on the basic principles and skills involved in computer modeling of biomolecules. Students will carry out projects that focus on practical aspects of utilizing publically available simulations and analysis tools to address questions in biochemical and biophysical research.

Repeat for Credit
N

Typically Offered
On sufficient demand

BIOCH 920 - Nucleic Acids

Credits: 3

Structure and function of nucleic acids: structures and properties of DNA, RNA, and chromatin; recombinant DNA techniques; mutagenesis and carcinogenesis; protein-nucleic acid interactions; structural influences on replication, transcription, translation, and regulation.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 765.

Typically Offered
On sufficient demand

BIOCH 925 - Molecular Mechanisms of Aging

Credits: 3

An exploration of the molecular, biochemical, and genetic pathways that are conserved among species and are involved in aging and age-related diseases.

Repeat for Credit
Y

Typically Offered
On sufficient demand

BIOCH 930 - Proteins

Credits: 3

Lectures and readings on the chemical nature of proteins; fractionation; purification, structure, chemical and physical properties of proteins and amino acids.

Repeat for Credit
Y

Requisites
Prerequisite: *BIOCH 755 and BIOCH 765.

Typically Offered
On sufficient demand

BIOCH 935 - Biochemistry of Cell Regulation

Credits: 3

Integration of biochemical pathways and molecular mechanisms regulating cell growth, movement, differentiation, and death. Emphasis on molecular interactions and signaling cascades controlling gene expression, protein synthesis and folding, proteolysis, cytoskeleton, cell cycle, cell survival, and apoptosis.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 765.

Typically Offered
Spring-Odd Years

BIOCH 950 - Advanced Topics in Protein Science

Credits: 3

Advances in protein biochemistry, including protein structure determination, dynamics, folding, stability, enzyme mechanism and regulation.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 765

Typically Offered
Spring-Even Years

BIOCH 997 - Postdoctoral Research in Biochemistry

Credits: 1-12

Advanced level research in collaboration with a faculty member, involving projects in any area of biochemistry. Post-graduate training in first three years beyond doctorate.

Repeat for Credit
Y

Requisites
Prerequisite: Ph.D. or equivalent.

Typically Offered
Fall, Spring, Summer

BIOCH 999 - Research in Biochemistry II

Credits: 1-18

Research in biochemistry which may be used for preparation of the Ph.D.Thesis.

Note
Sufficient training for research undertaken.*Nonmajors lacking these prerequisites should obtain consent of instructor before enrollment.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 100 - Biology First-Year Orientation

Credits: 1

Each meeting of Biology Freshman Seminar covers a topic related to student success, including student help sources such as tutoring and academic coaching, the Career Center, student involvement opportunities within the Division of

Biology (such as research), the university, and community. In addition, students develop a graduation plan after going over degree requirements and gain competency in navigating KSU online resources.

Repeat for Credit
N

Typically Offered
Fall

BIOL 101 - Concepts of Biology

Credits: 4

Fundamental concepts in evolutionary biology, ecology, cell biology, genetics, biodiversity, and the scientific method. The role of biology in society and the development of skills aimed at differentiation of biological fact from fiction are emphasized and explored.

Note
Concepts of Biology is an introductory biology course with a lab, and is intended for non-science majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

BIOL 198 - Principles of Biology

Credits: 4

An introductory biology course with emphasis on understanding processes and linkages within and between different levels in the hierarchy of life. Specific areas covered include the scientific method, evolution, ecology, biological molecules, structure/function of cells, genetics, energy flow, biodiversity, and plant/animal biology. BIOL 198 is required in many science degree programs.

Note
Two two-hour studio sessions incorporating lecture and lab elements. At least one year of high school biology or chemistry is recommended.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOL 221 - Organismic Biology

Credits: 5

A study of the structure and function of organisms with special attention paid to the phylogenetic origins of taxonomic groups and the integration of their structural systems.

Note
Three hours lecture and four hours lab.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 or equivalent.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

BIOL 245 - Principles of Histology

Credits: 2

Introduction to the field of histology including methods of sample preparation, embryonic and fetal development of tissues, structure of primary tissues in fully formed vertebrate body, and examination of those primary tissue types in a variety of organs.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 or equivalent recommended.

Typically Offered
Summer

BIOL 255 - General Microbiology

Credits: 4

Microorganisms; their handling, morphology, growth, and importance.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and one course in chemistry.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOL 263 - Ecology of Environmental Problems

Credits: 3

Principles of ecology and their application to such problems as pollution, human population growth, and land-use planning.

Note
Two hours lecture and one hour discussion a week.

Repeat for Credit
N

Requisites
Prerequisite: One course in natural science.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

BIOL 330 - Public Health Biology

Credits: 3

Fundamental concepts of human infectious and organic diseases with emphasis on disease etiology and mechanisms, collection of epidemiological data, and the influences upon, and consequences of, governmental public health policy.

Note
Two hours lecture and one hour recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: One course in a natural science.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

BIOL 333 - Introduction to Fisheries, Wildlife, Conservation and Environmental Biology

Credits: 3

An introduction to the ecological and management principles associated with the fields of fisheries, wildlife, conservation, and environmental biology. Topics include population ecology and assessment, resource management, and environmental legislation. Prepares FWCEB majors for more advanced coursework and promotes the understanding of natural resource management for non-majors.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Spring

BIOL 365 - Practicum in Biology

Credits: 1-4

Supervised experience as a teaching assistant in biology courses. Approximately 3 hours of commitment per week is expected for each credit hour earned. One hour recitation a week plus three to nine hours lab a week.

Note
Permission of instructor and credit with superior performance in the course in which the student will be involved.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 397 - Topics in Biology

Credits: 1-6

Special course offering in an area of faculty expertise and/or supervised independent study project.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 398 - Principles of Genetics

Credits: 4

An introduction to classical, molecular, quantitative, and population genetics. Human examples and comparisons between prokaryotic and eukaryotic genetics are emphasized. Topics include Mendelian inheritance, DNA and chromosome structure, cell division and DNA replication, gene expression, mutation, recombinant DNA, genomics, quantitative inheritance, and population/evolutionary genetic principles.

Note
Three hours lecture and one hour recitation.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 198 and CHM 210 OR CHM 220 or concurrent enrollment. Concurrent enrollment in or completion of a college-level math or statistics course is recommended.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOL 399 - Honors Seminar in Biology

Credits: 1-3

Selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
Y

Typically Offered
Spring

BIOL 410 - Biology of the Cancer Cell

Credits: 3

Current concepts of cancer biology including roles of mutation, cell division, apoptosis, stem cells, microbes, and the immune system in promoting and/or inhibiting cancer.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in biology (BIOL 398 recommended).

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

BIOL 432 - Wild Bird Research

Credits: 3

Hands-on training in both field methods involving the

capture, handling, measurement, and sampling of wild birds as well as training in data manipulation, analysis in R, visualization, collaboration, and presentation of original research. Requires weekend participation once monthly. Assessment based on completion of assignments and project components as well as effort and progress in learning field methods.

Note
Note – 2-hour, Friday morning class sessions weekly; 3 consecutive mornings (Fri-Sat-Sun) in the field each month. Consent of instructor

Repeat for Credit
N

Typically Offered
Spring

BIOL 435 - Environmental Biology

Credits: 3

An exploration of biological aspects, particularly ecological and evolutionary, as related to environmental issues. Topics include toxicology, global environmental issues, eutrophication, genetically modified organisms, emerging diseases, conservation, and relationship of human nature to causes of and solutions for environmental issues.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198, CHM 110 or 210.

Typically Offered
Spring

BIOL 441 - Human Body I

Credits: 4

Human anatomy with an introduction to human physiology. Examination of cadavers, dissection of specimens, use and interpretation of EKGs, myelograms, and radiographs.

Note
Three hours of lecture and two hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 198, CHM 110/CHM 111 OR CHM 210, BIOL 398 Principles of Genetics OR PHYS 214 Engineering Physics II OR KIN 220 Biobehavioral Basis of Physical Activity OR any biology course with a lab component and BIOL 198 as a prerequisite, AND Sophomore standing. Recommended: Strongly recommended that students receive Bs or better in all prerequisite courses. It is also strongly recommended that transfer students complete at least one K-State Biology class before enrolling in BIOL 441.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

BIOL 442 - Human Body II

Credits: 4

Human physiology with a review of anatomy from Human Body I.

Note
Three hours of lecture and two hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 441.

Typically Offered
Fall, Spring

BIOL 443 - Applied Anatomy of Cadavers

Credits: 3

Course with lab components and teaching support in Human Body I (HB I; BIOL 441) lab. Consists of brief lectures, dissections, reviewing material, exams, a final (autopsy report), and teaching support for anatomical demonstrations to HB I students. Objectives are: to develop cadaver dissection competence, to aid in a deeper understanding of anatomy and physiology, and to enhance critical thinking and teaching efficacy skills.

Repeat for Credit
N

Requisites
Prerequisite: Have earned a B or better in Human Body I (BIOL 441).

Typically Offered
Fall, Spring

BIOL 461 - Phage Hunters I

Credits: 3

Isolate bacteriophages from soil samples collected. Conduct electron microscopy, isolate bacteriophage DNA, and submit bacteriophage genomes for sequencing.

Note
One hour lecture and three hours lab per week.

Repeat for Credit
N

Typically Offered
Fall

BIOL 462 - Phage Hunters 2

Credits: 2

Analyze the genomes through bioinformatics and submit the collected data to Howard Hughes Medical Institute (HHMI) and GenBank.

Note
One hour lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 461

Typically Offered
Spring

BIOL 495 - Topics in Biology

Credits: 1-6

Supervised independent study project and/or special course offering in an area of faculty expertise.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

BIOL 496 - Honors Tutorial in Biology

Credits: 1-3

Individual directed research and study of a topic in biology, normally as a prerequisite to writing a senior honor thesis.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing, membership in the honors program of the College of Arts and Sciences, and permission of instructor.

Typically Offered
Spring

BIOL 497 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 500 - Plant Physiology

Credits: 3

Detailed consideration of physiological processes of higher plants.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and BIOCH 265 or another course in organic chemistry.

Typically Offered
Fall

BIOL 501 - Plant Physiology Lab

Credits: 1

Lab related to physiological processes of higher plants.

Note
Three hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent or previous enrollment in BIOL 500.

Typically Offered
Fall

BIOL 504 - Plant Ecology

Credits: 3

Study of the diversity and distribution of vegetation, relationships of plants to their physical environment, plant-animal-microbe interactions, population structure and dynamics, and plant community structure diversity, and succession. Field exercises focusing on methods of grassland and forest vegetation sampling and analysis.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and BIOL 221 or equivalent.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

BIOL 510 - Developmental Biology

Credits: 3

Introduction to the stages and mechanisms of embryonic animal development. Integrated approach that includes classic experimental embryology and the genetic and molecular regulation of invertebrate and vertebrate animal development.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398.

Typically Offered
Spring

BIOL 511 - Developmental Biology Laboratory

Credits: 1

Developmental Biology Laboratory

Note
One three-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 510 or concurrent enrollment.

Typically Offered
On sufficient demand

BIOL 513 - Physiological Adaptations of Animals

Credits: 4

Integration of physiological mechanisms as the basis for adaptive responses of animals to different environments.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221; and a course in organic chemistry

or biochemistry.

Typically Offered
Fall

BIOL 515 - Behavioral Ecology

Credits: 3

Study of the social, environmental, genetic, and evolutionary processes that affect animal behavior. Topics include: evolution of social organization, spacing and group behavior, mating systems and parental care, sexual selection, communication, aggression, habitat selection, and foraging. Research project required.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Spring

BIOL 520 - Evolution

Credits: 3

A study of the theory of evolution including its historical and social implications.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 or a course in genetics.

Typically Offered
Spring

BIOL 521 - Evolution of Infectious Diseases

Credits: 3

The interplay of ecological interactions, evolutionary dynamics, and the mechanisms of host-microbe and microbe-microbe interactions shape the emergence and impact of infectious diseases. An interactive approach examines relationships among these factors. Key topics of discussion will include zoonotic infections, emerging infectious diseases, the spread of antimicrobial resistance, and the impact of public health measures.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 or BIOL 255 or ASI 500.

Typically Offered
Spring

BIOL 529 - Ecology

Credits: 3

Interdisciplinary examination of organisms and their interaction with the environment, ecosystem structure and function, population ecology and demography, community structure and dynamics, and basic ecological principles and their relevance to contemporary environmental issues.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and CHM 210.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

BIOL 530 - Pathogenic Microbiology

Credits: 3

Etiology and descriptions of major infectious diseases of humans within the perspective of host defenses.

Note
Two hours lecture and one hour laboratory-demonstration a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255.

Typically Offered
Fall

BIOL 541 - Cell Biology

Credits: 3

Structure and function of cells and subcellular components. A molecular understanding of membranes and cellular physiology will be emphasized.

Note
Three hours lecture.

Repeat for Credit
N

Requisites
Prerequisite: (BIOL 398 or ASI 500) and (CHM 350 or CHM 531).

Typically Offered
Fall, Spring

BIOL 542 - Ichthyology

Credits: 3

Systematics, morphology, physiology, distribution, and natural history of fishes.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221.

Typically Offered
Spring-Even Years

BIOL 543 - Ornithology

Credits: 3

Classification, morphology, physiology, distribution, and natural history of birds.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221

Typically Offered
Spring

BIOL 544 - Mammalogy

Credits: 3

Characteristics, evolution, life histories, and ecology of mammals, especially North American game species.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221.

Typically Offered
Fall

BIOL 545 - Human Parasitology

Credits: 3

Protozoan and helminth parasites of humans with lesser emphasis on ectoparasitic arthropods. Emphasis on life cycles, control, and laboratory diagnosis.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Spring

BIOL 546 - Human Parasitology Laboratory

Credits: 1

Examination of prepared materials and identification of internal parasites of man.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent enrollment in BIOL 545.

Typically Offered
Spring

BIOL 551 - Taxonomy of Flowering Plants

Credits: 4

Morphology, taxonomy, and biogeography of the vascular plants.

Note
Two hours lecture and two three-hour labs a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221.

Typically Offered
Fall

BIOL 580 - Molecular Biology of Genes and Genomes

Credits: 3

The molecular biology of eukaryotic gene expression and genome function, with an emphasis on gene expression as a regulated process. Selected topics in recombinant DNA and biotechnology, focusing on topics central to a modern understanding of gene regulation.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 398 and CHM 350.

Typically Offered
Fall

BIOL 604 - Biology of the Fungi

Credits: 3

An introduction to fungal structure, function, physiology, ecology, and genetics. Importance of fungi as disease organisms, as saprotrophs, and in industry. Techniques of isolation, cultivation, and as experimental organisms.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Fall

BIOL 607 - Human Genetics

Credits: 3

An exploration of human genetics from a molecular perspective, grounded in clinical applications. Provides theoretical knowledge and practical skills in human genome analysis, emphasizing the analysis of case studies and molecular diagnostics techniques. Through a combination of lectures, hands-on laboratory exercises, and discussions, students will examine the implications of genetics and genomics for medicine, clinical diagnostics, genetic counseling, and related fields.

Note
One hour of lecture and two two-hour lecture/labs per week.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 398 Principles of Genetics OR ASI 500 Genetics, and Junior standing.

Typically Offered
Spring

BIOL 609 - Cellular and Molecular Biology of Human Diseases

Credits: 3

Fundamental basis of the major common non-infectious diseases and disorders affecting our society, with emphasis on the biochemical and molecular biological mechanisms by which the structures and functions of specific human tissues, organs and systems are altered.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOCH 521.

Typically Offered
Fall

BIOL 612 - Freshwater Ecology

Credits: 4

Basic ecological principles of aquatic environments and environmental applications. Plants and animals of local streams, rivers, ponds, and reservoirs are used to demonstrate the interaction of biological processes with the chemical and physical features of natural aquatic environments.

Note
Three hours lecture, three hours lab a week; two optional weekend field trips.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and CHM 110 or CHM 210.

Typically Offered
Fall-Even Years

BIOL 632 - Ecology Laboratory

Credits: 1

Laboratory and field experiences with ecological problems.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 529 and STAT 240 or equivalent.

Typically Offered
Spring

BIOL 636 - Cancer Therapy

Credits: 3

Current methods of cancer management with emphasis on the kinetic principles of chemotherapy and radiation therapy; diagnosis; surgical oncology; oncologic emergencies; adverse effects of cancer therapy; and the new therapies.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOCH 521.

Typically Offered
Spring

BIOL 640 - Population Biology

Credits: 3

An introduction to the theories of quantitative population biology including dynamics, demography and genetics. Emphasis on spatio-temporal variation within and among populations and species.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOL 529 and STAT 240.

Typically Offered
Fall

BIOL 642 - Principles of Conservation Biology

Credits: 3

Biological diversity and the factors contributing to loss of biodiversity. Scientific principles of biological conservation emphasizing the application of ecological theory and population genetics to the conservation of threatened populations, species and ecosystems.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOL 529.

Typically Offered
Spring

BIOL 670 - Immunology

Credits: 3

Covers history and overview of the mammalian immune system, innate immunity, immunoglobulins, cytokines, immunological methods, complement system, T cell and B cell development and their differentiation, barrier immunity, vaccines, hypersensitivity reactions, autoimmunity, immunodeficiencies, and anticancer immunity.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521 and BIOL 398 or ASI 500 with a C or better. BIOL 255 and BIOL 541 and senior standing are highly recommended.

Typically Offered
Spring

BIOL 671 - Immunology Lab

Credits: 2

Laboratory exercises in immunology.

Note
Three-hour lab a week plus one hour recitation.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 670 or concurrent enrollment.

Typically Offered
Spring

BIOL 675 - Genetics of Microorganisms

Credits: 3

The genetics of bacteria, viruses, and other microorganisms. Both the use of genetics in microbiological studies and the use of microbial systems to investigate basic genetic problems will be covered.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOL 255.

Typically Offered
Fall

BIOL 676 - Molecular Genetics Laboratory

Credits: 3

An advanced course in the techniques of molecular genetics and recombinant DNA technology, including molecular cloning, library screening, polymerase chain reaction, and RFLP and DNA sequence analysis. A number of projects will be completed during the semester.

Note
One-hour lecture and two three-hour labs.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 675 or concurrent enrollment.

Typically Offered
Fall

BIOL 682 - Fish Ecology

Credits: 3

The interaction between fish and their environment. Exploring fundamental ecological processes in aquatic systems at individual, population, community and ecosystem scales.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 529.

Typically Offered
Spring-Even Years

BIOL 684 - Wildlife Management and Techniques

Credits: 4

Concepts and techniques of wildlife ecology and management with emphasis on North American game species. Applied population dynamics as they relate to historical and recent developments in wildlife management, habitat improvement, and related material.

Note
Three hours lecture, one hour recitation, and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 333.

Typically Offered
Spring

BIOL 687 - Microbial Ecology

Credits: 3

The ecology of aquatic, terrestrial, animal and plant host-associated microorganisms in their natural environments.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255 or BIOL 529.

Typically Offered
Spring

BIOL 695 - Internship in Biology

Credits: 1-3

Undergraduate internship in Biology pursued outside Kansas State University, allowing the student to gain experience in career-relevant work. A minimum of 45 hours spent in internship is expected for each credit hour in which a student is enrolled.

Note
This offering is coordinated through Biology's Office of Undergraduate Studies, and arrangements for enrolling and obtaining credit should be made prior to undertaking an internship. Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 696 - Fisheries Management and Techniques

Credits: 4

Historical and contemporary issues in the management and conservation of exploited fishes. Methods for managing fisheries resources in streams, lakes, and ponds including estimating abundances, quantifying age and growth, manipulating populations, modeling population dynamics, culturing fishes, and improving aquatic habitat.

Note
Three hours lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 221 and BIOL 333.

Typically Offered
Fall-Even Years

BIOL 697 - Topics in Biology

Credits: 1-6

Special course offering in an area of faculty expertise and/or supervised independent study project.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 698 - Research in Biology

Credits: 0-8

Undergraduate research project pursued under the direction of a faculty mentor. A minimum of 45 hours of research effort is expected over the semester for each credit hour the student is enrolled.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 699 - Undergraduate Seminar in Biology

Credits: 1

Attendance at seminars or journal clubs with topics of a biological nature. A summary and personal reflection on each meeting is submitted for course credit.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

BIOL 705 - Eukaryotic Genetics

Credits: 3

An integrated exploration of transmission genetics and molecular genetics of eukaryotic organisms. The focus will be on genetic model organisms and their contributions to our understanding of mechanisms of genetic transmission and exchange, mutagenesis, gene expression, and regulation of cell division and development. Modern approaches to genomic analysis will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 and BIOCH 521.

Typically Offered
Fall

BIOL 707 - Advanced Cell Biology

Credits: 3

Selected current topics in cell biology which reflect recent advances in the field. Major topics include membranes and transport, protein sorting, signal transduction, cell adhesion and motility, cell cycle, apoptosis, and specialized cell functions.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 541.

Typically Offered
Fall

BIOL 730 - General Virology

Credits: 3

Theoretical and experimental basis of virology, with emphasis on how viruses manipulate cells to insure their own survival, mechanisms of virus replication, principles of virus host interactions including how viruses cause disease, and selected medically relevant viruses.

Repeat for Credit
N

Requisites
Prerequisite: Twelve hours of biological sciences, including

BIOL 398 and BIOL 255; and BIOCH 521 or equivalent; consent of instructor.

Typically Offered
Spring

BIOL 734 - Introduction to Genomics and Bioinformatics

Credits: 4

A problem solving approach to understanding genomics and bioinformatics. Practical use of databases and web-based tools used to study biological problems. Introduction to the algorithms behind these tools.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 or CIS 575.

Typically Offered
Other

Cross-listed
CIS 734

BIOL 743 - Advanced Ornithology

Credits: 3

Organized conceptually around the rapid decline of the continent’s avifauna. Following an introductory module introducing the declines, the material is put in context, covering historic and geographic contexts, morphology and physiology, our local avifauna, tools & approaches in ornithology, birds in a changing world, behavioral diversity, and solutions to the problems faced by birds, globally.

Repeat for Credit
N

Requisites
Prerequisite: Open to all students enrolled in MS or PhD program in Biology or related fields.

Typically Offered
Spring

BIOL 805 - Advanced Mycology

Credits: 3

Study of fungi, with emphasis on structure, identification, classification, phylogeny, and economic importance.

Note
One hour lecture and six hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 604.

Typically Offered
Spring-Odd Years

BIOL 807 - Human Genetics

Credits: 3

An exploration of human genetics from a molecular perspective, grounded in clinical applications. Provides theoretical knowledge and practical skills in human genome analysis, emphasizing the analysis of case studies and molecular diagnostics techniques. Through a combination of lectures, hands-on laboratory exercises, and discussions, students will examine the implications of genetics and genomics for medicine, clinical diagnostics, genetic counseling, and related fields.

Note
One hour of lecture and two two-hour lecture/labs per week.

Repeat for Credit
N

Requisites
Prerequisite: A genetics course and graduate standing.

Typically Offered
Spring

BIOL 808 - Mechanisms of Gene Regulation

Credits: 3

Examines important concepts in the mechanisms of gene regulation at the molecular and atomic levels. Focuses on gene regulation at the level of transcription, splicing and

translation and on diverse roles of RNA in catalysis, signaling and innate immunity.

Note
Composed of a lecture (2 hr) covering important concepts and a student recitation (1 hr) of scientific articles.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 541, or BIOL 705, or BIOL 707.

Typically Offered
Spring

BIOL 810 - Analysis of Ecological Gradients

Credits: 3

An introduction to analytical methods and conceptual approaches to evaluate patterns of communities across environmental gradients. Multivariate statistical techniques will be used to analyze data and quantify species abundance patterns in a variety of environments.

Repeat for Credit
Y

Typically Offered
Spring

BIOL 818 - Advanced Aquatic Ecology

Credits: 3

A study of advanced issues adn methodology in limnological sciences, including a workship on algal taxonomy, and an applied group project.

Note
Two lecture hours, two laboratory hours per week.

Repeat for Credit
Y

Typically Offered
Fall-Odd Years

BIOL 822 - Landscape Ecology

Credits: 4

Effect of spatial pattern on ecological processes. Course will emphasize how spatial complexity emerges and is maintained in ecological systems, the analysis of spatial pattern, scaling issues, the ecological consequences of spatial pattern and applications for conservation and ecosystem management in both aquatic and terrestrial systems.

Note
Two lecture hours, one discussion hour and three laboratory hours per week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 529.

Typically Offered
Fall-Odd Years

BIOL 823 - Demographic Methods

Credits: 3

Theory and methods of quantitative approaches for the study of population dynamics. Advances in matrix methods and mark-recapture statistics will be emphasized.

Note
Two hours lecture and one hour studio per week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 684 or BIOL 696.

Typically Offered
Fall-Even Years

BIOL 826 - Nutrient Dynamics

Credits: 3

The cycling of elements in ecosystems with emphasis on macronutrients such as nitrogen, phosphorous, and major cations, and the influence of variables such as acid rain on nutrient dynamics.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 529 and CHM 210.

Typically Offered
Spring-Odd Years

BIOL 830 - Advanced Virology

Credits: 3

In-depth readings and discussions of current topics in virology and the impact of viruses in medicine and biotechnology, with emphasis on recent research literature.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 730 or consent of instructor.

Typically Offered
Spring-Odd Years

BIOL 831 - Host-Pathogen Interactions

Credits: 3

Explores fundamental aspects of the mechanisms, ecology, and evolution of host-pathogen interactions. Students will have the opportunity to gain in-depth knowledge of these topics through reading, discussion, presentation, and writing exercises.

Repeat for Credit
N

Requisites
Prerequisite: Advanced undergraduate-level understanding of molecular biology/cell biology/ecology/evolution.

Typically Offered
Fall-Even Years

BIOL 835 - Cellular and Molecular Parasitology

Credits: 3

Biochemistry, immunology, and molecular biology of medically important eukaryotic parasites.

Note
Three hours lecture

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521 or equivalent.

Typically Offered
On sufficient demand

BIOL 840 - Molecular and Cellular Immunology

Credits: 3

Discussions and readings covering the molecular and cellular interactions during innate and adaptive immune responses.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 670.

Typically Offered
Fall-Odd Years

BIOL 850 - Advanced Topics in Immunology

Credits: 1-2

Current research in immunology.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 670 and consent of instructor.

Typically Offered
On sufficient demand

BIOL 855 - Molecular Biology of Cellular Membranes

Credits: 3

Intensive discussions of molecular interactions between

proteins and lipids within cellular membranes, and the impact of these interactions on diverse cellular functions. Format is primarily group discussion of primary literature, with the goal of instilling the ability to think critically and evaluate published studies.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 541 and BIOCH 521.

Typically Offered
Fall

BIOL 860 - Modern Molecular Approaches

Credits: 3

An introduction to approaches and techniques used in the molecular analysis of biological systems, with a focus on modern molecular and cellular biological approaches. Format is primarily group discussion of primary literature, with the goal of instilling the ability to think critically and evaluate published studies.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 705 and BIOL 707.

Typically Offered
Spring

BIOL 863 - Professional Skills and Ethics

Credits: 3

An introduction for graduate students in the mechanics of becoming a scientist and professional biologist. Students actively participate in learning professional skills such as proposal writing and reviewing, professional oral and poster presentations,communicating science to the general public, abstract and manuscript preparation, and other topics. Ethical conduct in research and professional settings is discussed throughout the course.

Note
Offered every spring, meets twice a week for 1.5 hours. Required course for biology graduate students.

Repeat for Credit
Y

Typically Offered
Spring

BIOL 865 - Advanced Plant Ecology

Credits: 4

Advanced study of theory in population and community ecology as applied to higher plants.

Note
Emphasis on current research in plant population ecology, species interactions, community structure, and four hours lecture/recitation per week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 529 or a plant ecology course.

Typically Offered
Fall-Even Years

BIOL 868 - Advanced Cellular and Developmental Biology

Credits: 3

Chemistry, structure, and function of cellular systems in growth, development, and reproduction.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 755 or equivalent.

Typically Offered
Fall-Odd Years

BIOL 870 - Advanced Plant Systematics

Credits: 4

Taxonomy, phylogenetic inference and major themes in the evolution of vascular plants.

Note
Two hours lecture, one hour discussion, and three hours lab per week. Lab format will include individual or small group

research projects.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 551 and consent of instructor.

Typically Offered
Spring-Even Years

BIOL 875 - Evolutionary Ecology

Credits: 3

A study of the evolution of population, community, and ecosystem structure.

Note
Two hours lecture and one hour recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 529.

Typically Offered
Spring-Odd Years

BIOL 886 - Confocal, Fluorescence and Light Microscopy

Credits: 3

An introduction to theories, functions and applications of confocal, fluorescence and light microscopy, and fluorescent molecules. Lab emphasis on students working on independent research projects requiring microscopy.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
Y

Typically Offered
Fall-Odd Years

BIOL 888 - Electron Microscopy Techniques

Credits: 3

Theory and techniques involved in using the transmission electron microscope for the study of biological materials. Includes individualized instruction on the operation of the Philips 201 electron microscope and techniques for processing biological samples.

Repeat for Credit
Y

Requisites
Prerequisite: Current participation in research requiring electron microscope.

Typically Offered
Fall-Even Years

BIOL 890 - Advanced Topics in Biology

Credits: 1-6

Advanced biology.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 891 - Advanced Problems in Biology

Credits: 1-8

Advanced Problems in Biology

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 895 - Graduate Seminar in Biology

Credits: 0-1

Attendance/participation in departmental research-related seminars.

Repeat for Credit
Y

Typically Offered
Fall, Spring

BIOL 898 - Master's Research in Biology

Credits: 1-9

Master's Research in Biology

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 997 - Postdoctoral Research in Biology

Credits: 1-12

Advanced-level research in collaboration with a faculty member, involving projects in any area of biology.

Repeat for Credit
Y

Requisites
Prerequisite: Ph.D. degree or equivalent.

Typically Offered
Fall, Spring, Summer

BIOL 998 - PhD Research in Biology

Credits: 1-18

PhD Research in Biology

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BIOL 999 - PhD Research in Microbiology

Credits: 1-18

PhD Research in Microbiology

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

BME 200 - Introduction to Biomedical Engineering

Credits: 3

Biomedical engineering addresses the application of engineering principles to challenges faced by the health care and life science communities. This course introduces students to the areas of study that comprise this broad field and provides students with guidance toward biomedical career opportunities. Topics of interest include the history of biomedical technology, medical devices, medical imaging, biomedical optics, biomechanics, biomaterials, tissue engineering, rehabilitation engineering, neural interfacing, prosthetics, assistive technology, telemedicine, home care, wearable devices, health care information technology, considerations for diverse populations, and medical ethics.

Note
Lecture.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

BME 390 - BME Skill Development Experience

Credits: 2

This course will focus on habits of mind and practical skill development within laboratory environments that incorporate wet-laboratory equipment, electronic devices/instruments, and resources for handling biological tissue. The instructor will emphasize the proper use of personal protective equipment, safe work practices, and principles of chemical, biological, electrical, fire, and radiation safety. Students will learn fundamentals of sterile techniques and address the appropriate operation, cleaning, and maintenance of laboratory equipment, electronic

instrumentation, and electromechanical devices. Strategies for career development will be addressed in these contexts.

Note
1 hour lecture; 3 hours laboratory

Repeat for Credit
N

Requisites
Prerequisite: CHM 210 and BME 200

Typically Offered
Fall

BME 430 - Biomaterials

Credits: 3

This course provides an overview of interactions between materials and biological systems, techniques to assess biomaterial characteristics, and the role of biomaterial selection during the design of medical devices for select applications.

Note
2 hours lecture; 3 hours laboratory

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and CHM 230

Typically Offered
Fall

BME 432 - Introduction to Tissue Engineering

Credits: 3

Tissue engineering is an emerging biomedical engineering field that addresses the creation, repair, or improvement of human and animal tissue via the growth and adhesion of biomolecules, cells, and other biomaterials. This course introduces the field of tissue engineering with an eye toward improved human and animal health. Interdisciplinary topics include cells/tissue, biomaterials, organ scaffolds, transplantation, and clinical applications of tissue engineering. Students will explore application areas such as skin regeneration, cartilage repair, and organ transplantation.

Note
This 3 credit course consists of 2 credits of lecture plus 1 credit of laboratory (3-hour session).

Repeat for Credit
N

Requisites
Prerequisites: BIOL 198 and (BME 390 or BAE 346 or BIOL 255 or CHM 531)

Typically Offered
Fall

BME 451 - Biomechanical Engineering

Credits: 3

This course provides an introduction to the mechanics of biological tissues and systems at the macroscopic scale. It covers the structure and mechanics of biological tissue based on the principles of statics and dynamics, with an emphasis on bone, muscle, and connective tissue.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198, MATH 222, PHYS 213.

Typically Offered
Spring

BME 470 - Biomedical Device Components

Credits: 3

This course addresses medical device hardware components: electronic and electromechanical circuits and sub-systems that in aggregate perform medical device functionality. Passive/active electronic components include LED emitters, diode circuits, transistor assemblies, operational amplifier configurations, filters, and power supplies. Medical devices such as ventilators, insulin pumps, pacemakers, defibrillators, and IV pumps will provide context for homework assignments and hands-on laboratory exercises.

Note

2 hours lecture; 3 hours laboratory

Repeat for Credit
N

Requisites
Prerequisite: ECE 519

Typically Offered
Spring

BME 490 - Undergraduate BME Design Experience I

Credits: 1

The undergraduate design courses are intended to be taken during the fall and spring semesters of each BME student's junior year. The first semester is designed for project selection and planning, and it includes a lecture component to cover important considerations such as human subject protections and electrical safety. The follow-on course, BME 491, will focus on the implementation of the design selected in BME 490.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214, BME 200 and Corequisite: BIOL 441 or KIN 360.

Typically Offered
Fall

BME 491 - Undergraduate BME Design Experience II

Credits: 2

The undergraduate design courses are intended to be taken during the fall and spring semesters of each BME student's junior year. Students will participate in the guided design of a BME project selected in the previous semester. The course includes a lecture/meeting once per week, as well as a scheduled three-hour lab time for students to work on their design.

Note
Lab and Lecture.

Repeat for Credit
N

Requisites
Prerequisite: BME 490 and (BIOL 441 or KIN 360).

Typically Offered
Spring

BME 575 - Clinical Systems Engineering

Credits: 3

This course addresses the creation and use of biomedical "systems of systems" as applied in various health care delivery scenarios, including hospitals, home care settings, and environments that employ personalized wearable systems. The material focuses on technical areas typically associated with the field of "clinical engineering," emphasizing the use of design standards that promote system interoperability and reconfiguration. Hardware/software interfacing and information management will be addressed from the sensor level to the level of the clinical enterprise. The course will also address human elements related to such systems (e.g., human factors, safety, medical ethics, training, etc.) as well as global technical, political, and sociological issues that may promote or hinder their use in different countries and cultures.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: ECE 540 or equivalent.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

BME 590 - Senior Design Experience I

Credits: 3

The two-semester BME senior design experience is a culminating design sequence intended for the last two

semesters of each BME student's degree program. BME 590-the first course in that sequence-integrates practice in verbal/written communication skills with the initiation of a collaborative design project to emulate a professional technical environment. The course addresses engineering ethics, design theory, project management, team dynamics, and socio-economic considerations related to design.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: BME 491, ECE 540, and ENGL 415

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

BME 591 - Senior Design Experience II

Credits: 2

The two-semester BME senior design experience is a culminating design sequence intended for the last two semesters of each BME student's degree program. BME 591-the second course in that sequence-addresses the implementation and demonstration of the project design initiated in BME 590. The course includes oral presentations for design reviews and technical documentation, where the latter addresses project plans; design operations, analyses, architecture, and requirements; design descriptions; and a user manual.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BME 590.

Typically Offered
Fall, Spring

BME 674 - Medical Imaging

Credits: 3

This course addresses various modalities of medical imaging as an extension of biomedical instrumentation. Methods for image data acquisition, processing, and display form the core for this course, which also addresses industry standards for image storage and transmission. Diagnostic applications for medical images are emphasized along with safety and ethics issues that relate to the acquisition and management of biomedical image data.

Note
Lecture.

Repeat for Credit
N

Requisites
Prerequisite: ECE 512.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

BUS 001 - Kansas Wesleyan Exchange Program

Credits: 1-6

Kansas Wesleyan Exchange Program

Repeat for Credit
Y

Typically Offered
Other

BUS 110 - Introduction to Business

Credits: 3

This course surveys the objectives, decisions, and activities within a business organization. Topics include a study of management responsibilities and controls, organizational structures, and marketing activities.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

BUS 251 - Financial Accounting

Credits: 3

Study of business topics such as alternative forms of business organizations; typical business practices; legal instruments such as notes, bonds, and stocks; and financial statements and analysis. The main objective is to develop the ability to provide information to stockholders, creditors, and others who are outside an organization.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

BUS 252 - Managerial Accounting

Credits: 3

This course outlines the use of internal accounting data by managers in directing the affairs of business and non-business organizations.

Repeat for Credit
N

Requisites
Prerequisite: BUS 251.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

BUS 315 - Supervisory Management

Credits: 3

An analysis of the responsibilities and work environment of a supervisor, with an examination of skills, practices, and concepts helpful in developing effective relations with people in today's changing environment.

Note
The course includes an international emphasis using South Asia as a case study.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 100

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

BUS 320 - Total Quality Management for Technology

Credits: 3

This course addresses the commitment of management and the organization as a whole to the cultural changes necessary to implement quality improvements throughout the organization. Topics include quality organization and philosophy, quality audit and ISO 9000 series, integration of functional areas, team building, management principles, quality costs, and other associated interactive facets of Total Quality Management. The main concern is to provide the student with a working knowledge of conventional TQM tools.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning

BUS 366 - Management with Information Technology

Credits: 3

A comprehensive view of the role of information technology in satisfying organizations' information

requirements. Problems and techniques concerning the management of responsive information systems with special attention to managers' use of systems outputs. Cases and hands-on exercises emphasizing the use of information systems in decision making, information gathering and organizing, use of modeling techniques, and presentation of information.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

BUS 390 - Foundations of Business Law

Credits: 3

A study of law as it relates to business, including court procedures and systems, contracts, torts, agency and employment law, and business crimes.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

BUS 400 - Marketing Techniques and Applications

Credits: 3

A general study of marketing principles which lead to the development of marketing strategy. A review of environmental influences and key analytical tools used in formulating marketing plans. Product or service design, distribution, pricing, and promotional programs.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

BUS 410 - Managerial and Project Economics

Credits: 3

Economic analysis of problems as applied to managerial decision making. Students consider the economic viability of solutions in engineering and a variety of other kinds of projects common in technology-oriented businesses.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100.

Typically Offered
Fall

Cross-listed
MET 410

K-State 8
Social Sciences

BUS 420 - Management Perspectives

Credits: 3

Provides an introduction to the four basic managerial functions of planning, organizing, leading and controlling and their application to today's complex work environment. An emphasis is placed on the roles and responsibilities of managers that help them to successfully meet organizational objectives by effectively leading employees and optimizing processes.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

BUS 421 - Applied Operations Management

Credits: 3

Description and analysis of problems related to the output of goods and services, operations planning and control, and systems management.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

BUS 450 - Integrated Finance

Credits: 3

Study of the basic principles of finance, including discounted cash flow analysis, risk-return tradeoff, asset pricing models, and financial and real asset valuation. Applications of these concepts to the firm's investment and financing decisions and performance analysis will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: BUS 251.
Corequisite: STAT 225 and ECON 110 or ECON 120.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

BUS 520 - Integrated Technology Management Capstone

Credits: 3

A capstone course which integrates the functional areas of business, including management, marketing, finance, accounting, operations and production. The course uses business strategy simulation and case studies to apply acquired knowledge across various areas of concentration for successful business management.

Repeat for Credit
N

Requisites
Prerequisite: Senior Standing.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

BUS 530 - Practices of Industrial and Labor Relations

Credits: 3

Basic course in industrial and labor relations. Broad coverage of the institution of collective bargaining and its environment, the goals and operation of labor unions, the impact of unions on management, and labor relations law.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Historical Perspectives
Social Sciences

BUS 531 - Strategic Human Resource Management

Credits: 3

This course provides an overview of the human resource systems and processes needed to achieve organizational effectiveness and strategic success. All key functional areas including human resource planning, staffing, performance management, employee development, and compensation are addressed.

Repeat for Credit
N

Requisites
Prerequisite: BUS 315 or BUS 420.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

BUS 542 - Personal Selling and Sales Management

Credits: 3

Focuses on interpersonal communications between buyers and sellers, both oral and written. The mechanics and intricacies of personal sales presentations, which will be developed through practice.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent enrollment: BUS 400.

Typically Offered
Spring

K-State 8
Social Sciences

CC 110 - Introduction to Computing

Credits: 2

An overview of the history of computers and programming. Famous historical figures and their impact in modern computing. Introduction to major topics in computer science such as artificial intelligence, high performance computing, cryptography, big data, cybersecurity, robotics, and more.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CC 111 - Elements of Computer Programming

Credits: 1

Brief experience with computer programming concepts such as variables, data types, functions, conditionals, iteration, and collections.

Repeat for Credit
N

Requisites
Corequisite: CC 110. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

CC 120 - Web Page Development

Credits: 3

The Internet, web browsers, and web-page-development technology: web-page design and implementation with Hypertext Markup Language (HTML), and CSS. Integration of program script into web pages. Introduction to graphics design, animation, and server utilization.

Repeat for Credit
N

Requisites
Prerequisite: CC 111 or CIS 116. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CC 210 - Fundamental Computer Programming Concepts

Credits: 4

Basic concepts in developing computer programs: program structure and syntax, primitive data types, variables, control flow, iteration, simple algorithms, debugging, and good software development practices. Introduction to object-oriented programming.

Repeat for Credit
N

Requisites

Prerequisite CC 111. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

CC 310 - Data Structures and Algorithms I

Credits: 3

Exploration of data structures & related algorithms in computer programming. Basic concepts of complexity analysis. Object-oriented design concepts.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100 and CC 210. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

CC 315 - Data Structures and Algorithms II

Credits: 3

Advanced data structures and related algorithms. Formal software development methods and software engineering fundamentals. Introduction to requirements analysis processes that provide the specification of algorithmic requirements.

Repeat for Credit
N

Requisites
Prerequisite: CC 310. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

CC 410 - Advanced Programming

Credits: 4

Advanced programming techniques and projects. Concepts from simulation and modeling, media applications, secure design, information management, parallelism, and networking. Software development methodologies, processes, and design patterns. Practical experience with professional communication and collaboration.

Repeat for Credit
N

Requisites
Prerequisite: CC 310. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

CC 510 - Computer Systems Administration

Credits: 3

Administration of the Windows and Linux operating systems, including installation, configuration, distributed file systems, firewalls and security, shell scripting, and user account management. Introduction to managing cloud computing resources.

Note
Not available for credit to students with credit in CIS 527.

Repeat for Credit
N

Requisites
Prerequisite: CC 310. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CC 515 - Full Stack Web Development

Credits: 3

Fundamental principles and best practices of web development, user interface design, web API design, advanced web interfaces, web development frameworks, single-page web applications, web standards and accessibility issues.

Note
Permission to take this course concurrently with CC 410 may be granted to well-prepared students. Not available for credit to students with credit in CIS 526.

Repeat for Credit
N

Requisites
Prerequisite: CC 410 and either CC 120 or CMST 135. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CC 520 - Database Essentials

Credits: 3

Introduction to concepts and techniques in database management. Overview of relational databases, NoSQL databases, and related topics. Database programming and use of databases in applications. Theory and architecture of database management systems (DBMS).

Repeat for Credit
N

Requisites
Prerequisite: CC 410. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CC 535 - Applied Data Science

Credits: 3

An introduction to data science and discovery from data: Data wrangling, feature engineering, feature selection, statistical inference, correlations, principal component analysis, classification, regression, novelty detection, clustering, cross-validation, bootstrapping, class profiling, multidimensional scaling, association rules, visualization, data science and society.

Repeat for Credit
N

Requisites
Prerequisite: CC 210, and experience with the Python programming language. Students may enroll in CC courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CC 590 - Special Topics in Applied Computer Science

Credits: 1-4

Selected topics in applied computer science.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CC 710 - Introduction to Computing for Educators

Credits: 2

This course is a first step in preparing educators to teach computer science topics at the PreK-12 level. It provides content area knowledge including the historical context in which computing developed, an overview of the modern field of computing and its impacts on society. It also explores theories of computational thinking and learning, computer science education research, and the Kansas PreK-12 computer science standards.

Note
For education majors only.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CC 711 - Computer Education Programming Fundamentals

Credits: 1

This course introduces PreK-12 educators to the "Big ideas" of programming - concept knowledge that is critical

for developing and teaching programming skills. Students will learn to read simple program code, write short programs, and explore basic programming constructs such as conditional statements and iteration. Students will also explore basic programming concepts related to a particular discipline.

Note
For education majors only.

Repeat for Credit
N

Requisites
Corequisite: CC 710

Typically Offered
Fall, Spring, Summer

CC 730 - Computer Programming for Educators

Credits: 4

The course introduces PreK-12 educators to computer programming using one of several programming languages. Interactive lessons and engaging projects reinforce new skills and concepts while exploring pedagogical strategies for teaching programming. This course covers the basic concepts of programming, from variables and control flow to functions, objects, and simple algorithms.

Note
For education majors only.

Repeat for Credit
N

Requisites
Prerequisite: B or better in CC 710 - Introduction to Computing for Educators and B or better in CC 711 - Introduction to Computing for Educators Lab

Typically Offered
Fall, Spring, Summer

CC 750 - Data Structures and Algorithms for Educators I

Credits: 3

This course provides PreK-12 educators the content knowledge necessary for teaching simple data structures such as sets, lists, stacks, queues, and maps. Students learn how to create data structures and the algorithms to work with them. Students are introduced to algorithm analysis to determine the efficiency of algorithms. It also addresses strategies for teaching these concepts to a diverse audience.

Note
For education majors only.

Repeat for Credit
N

Requisites
Prerequisite: B or better in MATH 100 - College Algebra and B or better in CC 730 - Computer Programming for Educators

Typically Offered
Fall, Spring, Summer

CC 755 - Data Structures and Algorithms for Educators II

Credits: 3

This course provides PreK-12 educators the content knowledge necessary for teaching advanced data structures, such as trees, graphs, and heaps, along with pedagogical approaches for teaching the associated concepts and skills. Several new algorithms using these data structures are covered. Students also learn software development methods and software engineering fundamentals and use those skills to develop projects of increasing size and scope effectively.

Note
For education majors only.

Repeat for Credit
N

Requisites
Prerequisite: B or better in CC 750 - Data Structures and Algorithms for Educators I or Instructor Permission

Typically Offered
Fall, Spring, Summer

CC 760 - Advanced Computing for Educators

Credits: 4

This course helps PreK-12 educators gain experience writing programs using a variety of advanced programming

techniques including object-oriented programming, inheritance, and events. It also introduces software development methodologies, processes, and design patterns, along with pedagogical strategies to teach them. It also emphasizes collaboration skills and tools used by professional programmers.

Note
For education majors only.

Repeat for Credit
N

Requisites
Prerequisite: B or better in CC 755 - Data Structures and Algorithms II for Educators or Instructor Permission

Typically Offered
Fall, Spring, Summer

CC 798 - Topics in Computing for Educators

Credits: 1-18

Topics in Computing Education for PreK-12 educators. Topics will be determined by faculty.

Note
For education majors only. Instructor permission.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CDPLN 612 - Indian Country Agriculture and Natural Resources

Credits: 3

An introduction to the historical and contemporary issues related to natural resource management on Native American lands. Study will include a variety of ecological settings across Native American lands, along with an analysis of tribal sovereignty as it relates to land tenure and water rights. Arguments concerning natural resource conservation, preservation and extraction will be explored.

Repeat for Credit
N

Requisites
Prerequisite: CDPLN 714.

Typically Offered
Summer

CDPLN 613 - Youth Development in Native Communities

Credits: 1

Focus on contemporary issues impacting native youth including: Demographics (Criminal justice, early parenting, poverty, education, suicide and morbidity), identity formation (risky behavior and achievement opportunities), health care (diabetes, obesity, fetal alcohol), prevention activities (4H, BGC, horse clubs, running strong), and influx of youth leadership (youth-elder connections).

Repeat for Credit
N

Requisites
Prerequisite: CDPLN 714.

Typically Offered
Fall, Spring, Summer

CDPLN 614 - Wellness in Native Communities: Challenges and Opportunities

Credits: 1

Healthcare issues challenging Native communities, and strategies and practices to address those challenges. Focus on the impact of the Indian Health System, other bureaucratic systems, and current consumer practices that impact healthcare for Native peoples and the ways tribes are working to create healthier communities and improve the lifestyle of Indian people.

Repeat for Credit
N

Requisites
Prerequisite: CDPLN 714.

Typically Offered
Fall

CDPLN 615 - Role of Tribal Colleges in Economic Development

Credits: 1

Focus: the role of tribally-chartered colleges/universities in economic development within Native communities. Topics include the use of bonding/bridging social capital, the historical and contemporary case for tribally-chartered higher education, the economic impact of tribal colleges on their local economies, and opportunities/challenges of broad and diverse collaborative networks.

Repeat for Credit
N

Typically Offered
Summer

CDPLN 620 - Ecological Economics

Credits: 3

Synthesis across the notion of "utility" as represented in environmental/natural resource economics, as well as the notion of "ecology" in ecological economics. Focus will be on the influence the community and ecosystem have on one another, and the potential for complementarity between the two.

Repeat for Credit
N

Typically Offered
Fall

CDPLN 622 - Impact Analysis

Credits: 1

The basics of economics and fiscal impact analysis are explored, including the scenario construction, basics of input-output analysis, careful use of multipliers, estimations of local revenues and expenditures and discounting.

Repeat for Credit
N

Typically Offered
Spring

CDPLN 623 - Local Economic Analysis

Credits: 1

This course teaches economic base theory, a theory of regional economics, multipliers and how local economics are affected by external events. Basic methods for the analysis of a local economy are covered, including trend analysis, location quotients, shift share analysis and retail trade analysis.

Repeat for Credit
N

Typically Offered
Spring

CDPLN 624 - Community Developer as Community Educator

Credits: 3

A graduate level course on education strategies and tools for use in community development. This course will develop students' identities as community educators and provide knowledge on appropriate methodologies for working with adults in community settings as well as develop their creativity and critical thinking skills. Students will engage in peer-to-peer teaching and critical analysis of community education activities.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 625 - Participatory Action Research Methods (PAR)

Credits: 3

A graduate level course to develop participatory action research knowledge and skills through real-world applications. PAR is a method of collecting information by community members in collaboration with a researcher that respects, places community central to, and reflects the experiences and culture of the people most directly impacted by the issue under consideration.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 631 - Leadership for Change

Credits: 3

Course focus is on the role of leadership in community development and change, including situating leadership in the community development process, reviewing the effectiveness of different leadership styles, and relating leadership to community. Skills and processes that facilitate effective shared leadership, including facilitation, conflict resolution, use of participatory techniques, etc, are explained.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 633 - Grantwriting

Credits: 3

The intricacies of grantsmanship provide the focus of this course. Topics covered will include identification of fund sources, procedures for proposal preparation, composition of grants, and the effects of organizational and personal linkages. Students will prepare a grant application based upon an RFP or to a continuous funding source.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 650 - Community Economic Development for the 21st Century

Credits: 3

Study of the basic theories, concepts, and skills necessary to be a part of a productive community economic development team. Focus is on the importance of organizational values, mission and vision, as well as six approaches to development. The course will cover the five community functions, development strategies, action planning, and organizing for action.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 655 - Land Development Planning

Credits: 3

An examination of the process of land development in the United States, and its impacts from the perspective of developers, financial institutions, community planners, and city administrators. Focus is on the understanding of the land development process in meeting community goals, and shaping land development to meet community expectations for the improvement of the community.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 660 - Policy and Politics of Coastal Areas

Credits: 3

One half of the world's population lives on a coast and two-thirds of the world's largest cities are located on a coast. This course addresses the environmental, land use, and other critical issues affecting these areas worldwide.

Repeat for Credit
N

Typically Offered
Summer

CDPLN 700 - Foundations of Community Development

Credits: 3

This course is an introduction to the Community Development (CD) program, discipline, and profession.

Repeat for Credit
N

Typically Offered
Fall, Spring

CDPLN 701 - Special Studies in Community Development

Credits: 1-3

Independent study on special topics of interest in community development.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CDPLN 702 - Community Engagement

Credits: 3

This course is designed to help students add to their knowledge base and build their confidence in community engagement so that dialogue and deliberations leading to public decision making can be more productive and positive for everyone involved.

Repeat for Credit
N

Typically Offered
Fall-Odd years

CDPLN 703 - Applied Community Development

Credits: 1-3

This course provides students the opportunity to apply knowledge to professional practice. Students will produce a written report on a project of focus, which they have worked on directly, relating their experience to concepts and skills learned through the community development curriculum. Projects must exist at the time of the course and may consist of activities via internships, coursework or capstones outside of the community development curriculum, or personal interests.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the Master of Science in Community Development program or enrollment in Graduate Certificate in Community Development program and instructor permission. All others contact gpideacc@ksu.edu.

Typically Offered
Fall, Spring, Summer

CDPLN 704 - Community Leadership and Capacity Building

Credits: 3

Explorations of the various approaches to leadership and leadership development, evaluation of leadership projects and the relationship of leadership to community capacity building. Topics include defining leadership and applying it to the workplace, and understanding the potential link between leadership and community capacity, as well as identifying strategies for leadership development in communities.

Repeat for Credit
N

Typically Offered
Fall

CDPLN 705 - Organizing for Community Change

Credits: 3

Examination of the role of society in community planning efforts. Focus on change within communities and the roles of government, planners, and citizens in reacting to or shaping change. Dimensions of social capital and the context of change and the implications of economic and demographic shifts on strategies and tactics for change will be explored.

Repeat for Credit
N

Typically Offered
Summer

CDPLN 706 - Economic Development Strategies and Programs

Credits: 3

Course explores theories of local economic development and addresses the development issues faced by communities in the 21st century. Students will understand and apply concepts from economic development planning, economic analysis, business development, human resource

development, community-based development, and high-technology development.

Repeat for Credit
N

Typically Offered
Fall-even years

CDPLN 707 - Evaluations of Organizations and Programs

Credits: 3

This course is an introduction to philosophy, techniques, and methodologies of organizational and program evaluation. Topics covered in the course include overview of program evaluation and theory, techniques to evaluate program processes and performance, evaluation designs, assessing program efficiency, models to diagnose organizations, and methods to assess organizational performance.

Repeat for Credit
N

Typically Offered
Spring-Even Years

CDPLN 708 - Government, Politics and Community Development

Credits: 3

Introduction to classical and contemporary concepts of federalism, public administration, public policy, and politics with an emphasis on their bearing on community development activities and outcomes.

Repeat for Credit
N

Typically Offered
Spring

CDPLN 709 - Housing and Development Programs

Credits: 3

In this course, students review and evaluate historical and current housing issues, production, and financial systems. This includes consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

CDPLN 710 - Community Analysis

Credits: 3

An introduction to research methods relevant to community development. Topics include how to formulate and begin a research effort, methods of data collection and how conceptual frameworks are used to develop the questions and analyze data. Also included are strategies for reporting findings and applying findings in community action.

Repeat for Credit
N

Typically Offered
Spring

CDPLN 711 - Immigrants in Communities

Credits: 3

International migration has historically impacted rural and urban communities around the world. Taking a comparative approach, this course examines community-immigrant interactions and influences on community development and immigrant inclusion. Readings relate theories of immigrant and community change to case studies. Students will gather primary data to assess the capacity of communities to include new international immigrants.

Repeat for Credit
N

Typically Offered
Summer-Odd Years

CDPLN 712 - Sustainable Communities

Credits: 3

The management of natural capital as linked to other community-based actions around resource allocation and the impacts on quality of life. The literature on community-

based natural resource management will be examined and alternative ways of valuing natural capital will be assessed. Contrasting theories of the role of natural capital in communities.

Repeat for Credit
N

Typically Offered
Fall

CDPLN 713 - Nonprofit Management

Credits: 3

Managing nonprofits including the role of nonprofit organizations in addressing various social problems. Topics include individual giving/volunteering, board and executive leadership, government and nonprofit relationship, ethics and accountability, and issues and challenges in nonprofit management.

Repeat for Credit
N

Typically Offered
Summer-Even Years

CDPLN 714 - Introduction to Native Community Development

Credits: 3

This develops a basic understanding within the context of community development of the diversity of tribal structures and cultures and the unique history and jurisdictional considerations of these nations.

Repeat for Credit
N

Typically Offered
Fall-even years

CDPLN 715 - Principles and Strategies of Community Change

Credits: 3

An analysis of the principles and practices of community change and development, using case studies and the students' communities of reference. the course will relate Community Development approaches to conceptual models from diverse disciplines. Conceptual models include conflict, neo-classical economic growth, participatory democracy, and others.

Repeat for Credit
N

Typically Offered
Fall

CDPLN 716 - Building Native Communities and Economic Capacity

Credits: 3

This course will focus on non-western approaches to helping native communities build their capacity. Students will learn to take a participatory, culture-centered, and strength-based approach to development.

Repeat for Credit
N

Typically Offered
Spring-Even Years

CDPLN 720 - Community and Regional Economic Analysis

Credits: 3

The course introduces concepts of communities and regions, theories of economic growth, drivers of economic growth, the economic base of a community, sources of growth or decline in the community, roles of local government and institutions, analytical tools, and strategies for local economic development.

Repeat for Credit
N

Typically Offered
Fall

CDPLN 721 - Community and Regional Economic Analysis II

Credits: 3

This course will develop a substantive grounding in the theories and practice of measuring community economic

dynamics plus build solid foundation skills for applied community economic analysis. Elements include basic descriptive tools of community economic analysis, such as economic base evaluation, industrial mix analysis, trade area assessment, and industrial and occupational composition analysis, input-output industrial accounting for economic impact analysis and the development of fiscal impact assessment techniques, and measures of public policy effectiveness.

Repeat for Credit
N

Typically Offered
Summer

CDPLN 725 - Community and Natural Resource Management

Credits: 3

An introduction to the breadth of consideration involved in community resource management. Included are theoretical frameworks, methodological investigation and applied practices to enhance the ability of community development professionals to work with their communities to plan, develop, and monitor the conversion and development of natural resources with multiple functions.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CDPLN 880 - Topics in Community Development

Credits: 1-3

Independent study of selected concepts and trends in community development. Students electing this course offering will be preparing a specialization paper as their final project.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CDPLN 897 - Proposal Writing

Credits: 1

Development of a master's report or thesis proposal.

Repeat for Credit
N

Requisites
Recommended prerequisite: completion of a minimum of 30 credit hours in the Community Development program.

Typically Offered
Fall, Spring, Summer

CDPLN 899 - Research in Community Development

Credits: 0-18

Original research and advanced study in community development, and related fields for the master's report.

Repeat for Credit
N

Requisites
Prerequisite: CDPLN 880.

Typically Offered
Fall, Spring, Summer

CE 015 - Engineering Assembly

Credits: 0

Engineering Assembly

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 101 - Introduction to Civil Engineering

Credits: 1

Introduction to careers in civil engineering (construction, environmental geotechnical, structures, transportation, and water resources). Overview of CE educational requirements. History of the CE profession. Engineering ethics.

Note
One hour of lecture per week.

Repeat for Credit
N

Typically Offered
Fall

CE 201 - Civil Engineering Problem Solving I

Credits: 1

Analysis of data and numerical calculations including presentation of results of common civil engineering problems using Excel. Exposure to built-in functions, data presentation, solution techniques and macros will facilitate usage in other civil engineering classes.

Note
Two 75-minute lab meetings per week for one-half of an academic semester.

Repeat for Credit
N

Typically Offered
Fall

CE 202 - Civil Engineering Graphics

Credits: 3

This course will include drafting, technical sketching, projective geometry, multiview drawings, reading and interpreting drawings, sectioning, dimensioning, and computer aided design (CAD) including 3D to produce basic civil engineering drawings.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Typically Offered
Fall, Spring

CE 212 - Elementary Surveying Engineering

Credits: 3

Coordinates, directions, distances, and elevation. transverses. boundary surveys. Leveling, national rectangular coordinate systems. property descriptions: public land subdivision and metes and bounds. Topographic surveys. surveying, planning, and estimating.

Note
Two hours of lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 150.

Typically Offered
Fall, Spring

CE 241 - Introduction to Civil Engineering Materials

Credits: 3

Properties and behavior of structural metals, timber, portland cement concrete, and bituminous concrete; standard specification and methods of test; inspection and control. Topics support ACI Field Testing Technician certification.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Typically Offered
Fall

CE 301 - Civil Engineering Problem Solving

Credits: 1

Analysis of data and numerical calculations including presentation of results of common civil engineering problems using Mathcad. Exposure to built-in functions, data presentation, solution techniques, symbolic calculations and structured programming will facilitate usage in other civil engineering classes.

Note
Two 75-minute lab meetings per week over half of an academic semester.

Repeat for Credit

N

Requisites
Prerequisite: "C" or better in DEN 161.

Typically Offered
Spring

CE 331 - Strength of Materials and Analysis

Credits: 3

Study of behavior of materials subjected to tension, compression, shear, and bending; analysis of beams and columns.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 231.

Typically Offered
Fall, Spring

CE 332 - Strength of Materials Laboratory

Credits: 1

Tests to determine the physical properties of various structural materials. Analysis and interpretation of test data.

Note
Three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CE 331.

Typically Offered
Fall, Spring

CE 333 - Statics

Credits: 3

Composition and resolution of forces; equilibrium of force systems; application of general laws of statics to engineering problems, including use of vector algebra, friction and force analyses of simple structures, cables, and machine elements; center of gravity; moments of inertia.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and PHYS 213.

Typically Offered
Fall, Spring, Summer

CE 351 - Incompressible Fluid Mechanics

Credits: 3

Fundamentals of incompressible fluid mechanics and includes the topics of fluid properties; hydrostatics; applications of conservation of mass; energy and momentum equations; dimensional analysis; pipe flow; channel flow; and flow about immersed objects.

Repeat for Credit
N

Requisites
Prerequisites: "C" or better in CE 530 or "C" or better in ME 512

Typically Offered
Fall, Spring

CE 441 - Design of Civil Engineering Materials

Credits: 3

Apply principles first introduced in CE 241 to design of traditional and specialized concretes (such as high-performance concrete, self-compacting concrete, low-CO_2 concrete, internally-cured concrete, and RAP asphalt concrete); properties of concrete prepared using non-traditional cements; standardized testing to quantify long-term durability of concrete; planning experiments to minimize error variance and avoid bias.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 241 and "C" or better in CE 534

Typically Offered
Spring

CE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 499 - Honors Research in Civil Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. A report is presented orally and in writing during the last semester.

Note
Open to students in the College of Engineering honors program.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 501 - Project Economic Evaluation

Credits: 1

Provides fundamental concepts of engineering economics and decision-making process among alternative engineering design and construction solutions through study of unit cost determination, cost estimating, and financing procedures.

Note
Two 50-minute lectures per week for half of an academic semester.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing for engineering majors or Senior standing for non-engineering majors.

Typically Offered
Spring

CE 502 - Project Management

Credits: 1

Fundamental concepts of project management. Construction planning and scheduling methodologies will be introduced.

Note
Two 50-minute lectures per week for half of an academic semester.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing for engineering majors or Senior standing for non-engineering majors.

Typically Offered
Fall

CE 503 - Project Delivery

Credits: 1

Fundamental concepts of project administration such as contracts, safety, and delivery methods. Construction project delivery methods such as Design-Bid-Build (DBB), Design-Build (DB), etc. will be discussed in detail and students will be introduced to construction estimating.

Note
Two 50-minute lectures per week for half of an academic semester.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing

Typically Offered
Spring

CE 522 - Soil Mechanics I

Credits: 3

Identification, classification, and engineering properties of soils; theory and application of consolidation, compressibility, and strength of soils; ground water retention and movement; slope stability and lateral earth pressures; stress distribution in soil.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in either CE 351 or ME 571 and "C" or better in CE 533.

Typically Offered
Fall, Spring

CE 528 - Foundation Engineering

Credits: 3

Prediction of soil variation, soil investigations; stress distribution and bearing capacity; dewatering analysis and procedures; retaining structures and lateral earth pressures; shallow foundations, pile foundations; underpinning and grouting.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 522.

Typically Offered
Fall

CE 530 - Statics and Dynamics

Credits: 3

A shortened combined course in (1) statics, including a study of force systems, free-body diagrams, and problems in equilibrium, friction, centroids, and moments of inertia; and (2) dynamics, including a study of the kinematics and kinetics of particles and rigid bodies using the method of force-mass acceleration.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222 and PHYS 213.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

CE 533 - Mechanics of Materials

Credits: 3

Elementary theories of stress and strain, behavior of materials, and applications of these theories and their generalizations to the study of stress distribution, deformation, and instability in the simple structural forms which occur most frequently in engineering practice.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 333 or "C" or better in CE 530

Typically Offered
Fall, Spring, Summer

CE 534 - Mechanics of Materials Laboratory

Credits: 1

Determination of selected mechanical properties of several engineering materials, including iron-carbon alloys,

aluminum alloys, concrete, wood, and plastics; relationship between structure and mechanical properties of these materials; elementary problems in experimental stress analysis and structural behavior; test procedures, instrumentation, and interpretation of results.

Note
Three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CE 533.

Typically Offered
Fall, Spring

CE 537 - Introduction to Structural Analysis

Credits: 3

Elastic analysis of determinate and indeterminate beams, frames, and trusses; construction of shear and moment diagrams and influence lines; calculation of deflections using conjugate beam and virtual work; solution of indeterminate structures by slope-deflection, moment distribution, and matrix stiffness method; with microcomputer applications.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 533.

Typically Offered
Fall, Spring, Summer

CE 542 - Structural Engineering in Steel

Credits: 3

Introduction to design of steel structures. Theoretical, experimental and practical bases for proportioning members and their connections.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 537.

Typically Offered
Spring

CE 544 - Structural Engineering in Concrete

Credits: 3

A study of the theories of reinforced concrete and of its characteristics as a construction material; design of reinforced concrete structures.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 537.

Typically Offered
Fall

CE 550 - Water Resources Engineering

Credits: 3

Introduction to: surface water hydrology, design of water handling structures, flood protection, pipe flow hydraulics, pump selection, and flow in soils.

Note
Two hours of lecture and three hours of lab per week. Not available for students with credit for BAE 560.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 213 and either STAT 510 or BAE 460

Typically Offered
Fall

CE 552 - Hydraulic Engineering

Credits: 3

Applications of the principles of fluid mechanics to control and use of water; reservoir, dam, and spillway design; enclosed conduit and open-channel design; hydraulic machinery and hydro-power development; principles of fluid measurement; laboratory-flow and velocity metering, hydraulic models, pipe losses, open-channel flow.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisites: "C" or better in either CE 351 or ME 571 and "C" or better in CE 550

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CE 563 - Environmental Engineering Fundamentals

Credits: 3

Basic physical, chemical, and biological concepts and the applications to the protection of the environment with emphasis on techniques used in water and wastewater treatment.

Note
Two hours of lecture and three hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 210 and MATH 221

Typically Offered
Fall, Spring

Cross-listed
ENVE 363

CE 565 - Water and Wastewater Engineering

Credits: 3

Design of municipal water and wastewater treatment systems.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 550, "C" or better in either CE 351 or ME 571, and "C" or better in CE 563

Typically Offered
Spring

CE 571 - Introduction to Transportation Engineering

Credits: 3

Key principles in transportation engineering and their relevance to practice. Consideration of both multi-modal and sustainable solutions to transportation.

Note
Two 75-minute lectures per week.

Repeat for Credit
N

Requisites
Prerequisites: MATH 221, PHYS 213, and "C" or better in CE 212.

Typically Offered
Spring

CE 572 - Highway Engineering

Credits: 3

Apply highway design principles first introduced in CE 571. Develop CAAD skills necessary to enter the engineering workforce. Plan and propose multiple alternatives for a highway alignment. Design new highway alignments and intersections. Consider earthwork and how it influences highway design. Introduce pavement design as it applies to highway alignments and intersections.

Note

Two 50-minute lectures and one two-hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 522 and "C" or better in CE 571.

Typically Offered
Fall

CE 585 - Civil Engineering Project

Credits: 3

A comprehensive civil engineering project, to be taken in the last semester of the B.S. program. Requires integration of skills acquired in civil engineering elective courses. Students must prepare and present written and oral design reports.

Note
One hour of lecture and six hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 415 and "C" or better in two 3-hour CE design electives. Prerequisite or concurrent enrollment in the remaining required CE design electives. Students take CE 585 during their last planned semester of their B.S. program.

Typically Offered
Fall, Spring

CE 625 - Principles of Geoenvironmental Engineering

Credits: 3

Introduction to soil formation, structure, flow and mass transport in soils, mass transfer principles, waste containment and isolation, and physical, chemical, and biological remediation principles.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: CE 522.

Typically Offered
Spring

CE 654 - Design of Groundwater Flow Systems

Credits: 3

Introduction to fundamental, mathematical and physical concepts of groundwater flow; application of simple analytic models; introduction to field methods; application of computer modeling tools to address design with practical significance.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: CE 351 or ME 571

Typically Offered
Fall

CE 663 - Unit Operations and Processes in Environmental Engineering

Credits: 2

A laboratory study of various physical, chemical and biological operations and processes used in the professional practice of environmental engineering. Topics covered will be selected from reactor hydrodynamics, oxidation-reduction, coagulation-flocculation, chemical precipitation, ion exchange, adsorption processes, biological oxidation, anaerobic digestion and the activated-sludge process.

Note
Six hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CE 565 and CE 552.

Typically Offered
Spring-Even Years

CE 680 - Economics of Design and Construction

Credits: 3

Selection of alternative engineering design and construction solutions through study of unit cost determination, cost estimating, and financing procedures. Introduction to construction scheduling.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing in engineering or graduate standing for non-engineering majors.

Typically Offered
Spring

CE 690 - Selected Topics in Civil Engineering

Credits: 0-18

Applications of Precast Concrete in Buildings, Precast Concrete Materials, Preliminary Analysis and Loading Path, Structural Loads, Design of Precast and Prestressed Concrete Components, Handling, Erection and Bracing, Precast Concrete Tolerances.

Note
Approval of instructor.

Repeat for Credit
Y

Typically Offered
Fall

CE 703 - Responsibility in Engineering: Codes & Professionalism

Credits: 3

Course designed to help engineers, scientists, and technical managers to: understand fundamental "canons" of professional societies, establish or revitalize personal ethical standards using these canons, realize when situations are ethical dilemmas, and to develop a process to solving dilemmas. Key activities are: interviewing peers, analyzing current environment for potential challenges, developing ethics workshops, and writing individual code of ethics.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing or senior with instructor approval.

Typically Offered
Spring

CE 704 - Responsibility in Engineering: Leadership & Diversity

Credits: 3

Course designed to help engineers, scientists, and technical managers to: understand leadership approaches that promote high ethical conduct, and to understand the ethical value and challenges associated with a diverse workplace. Key activities are: interviewing peers; analyzing current environment for potential challenges; developing a workshop related to ethics, leadership and diversity; and writing individual code of ethics.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing or instructor approval.

Typically Offered
Fall

CE 718 - Engineering Photo Interpretation

Credits: 3

Photo interpretation techniques, types of aerial photographic film and their uses; application in land use studies, land surveying, site selection, rainfall runoff and stream flow, location of construction materials, and in the determination of soil properties; other applications.

Note
Two hours recitation and three hours lab a week. Consent

of instructor.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing

Typically Offered
Spring

CE 723 - Designing with Geosynthetics

Credits: 3

History of geosynthetics; overview of geosynthetic functions, applications and properties; relationship between testing and applications. Designing with geotextiles, geogrids, geonets, geomembranes, geosynthetic clay liners and geocomposites.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 522.

Typically Offered
Other

CE 725 - Seepage in Permeable Materials

Credits: 3

Analysis of seepage; groundwater movement in slopes, embankments, dams, and earth-supporting structures; construction of flow nets; dewatering systems; filter and drain design.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 522 and CE 552.

Typically Offered
Other

CE 728 - Advanced Geotechnical Design

Credits: 3

Advanced studies of soil investigations; design of retaining structures and reinforced earth walls, sheet piles, anchored bulkheads, underground conduits and tunnels; analysis and repair of failed structures.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 528.

Typically Offered
Spring

CE 732 - Advanced Structural Analysis I

Credits: 3

Plane truss and frame analysis by direct stiffness method; equivalent nodal forces; thermal and settlement effects; stiffness by energy methods; analysis of space frames and trusses; grid structures; advanced topics.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 537.

Typically Offered
Fall

CE 741 - Civil Engineering Materials II

Credits: 3

Advanced study of civil engineering materials including concrete, steel and bituminous concrete.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit

N

Requisites
Prerequisite: CE 541 or CHE 350.

Typically Offered
Spring

CE 742 - Advanced Steel Design

Credits: 3

Plastic design of steel structures; stability problems in plastic design; design of complex steel structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 542.

Typically Offered
Spring

CE 743 - Advanced Reinforced Concrete Design

Credits: 3

Advanced methods of analysis and design of reinforced concrete members and structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 544 or equivalent

Typically Offered
Spring

CE 745 - Structural Dynamics

Credits: 3

Introduction to fundamental concepts in structural dynamics; free and forced vibration of single and multiple degrees of freedom systems with and without damping, numerical methods for linear and non-linear dynamic analysis, and basics of the earthquake response and design of structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340, ME 512, CE 537 or equivalent.

Typically Offered
Fall

CE 751 - Hydraulics of Open Channels

Credits: 3

Properties of open-channel flow; types of open channels; conservation of mass, momentum, and energy; critical, uniform, and gradually varied flow; design of erodible channels; rapidly varied flow.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 552.

Typically Offered
Fall

CE 752 - Advanced Hydrology

Credits: 3

Review of basic principles; point and regional rainfall and flood frequency analyses; hydrologic and hydraulic flood routing; drainage and flood control facilities design; hydrologic modeling and simulation flood plain analysis and planning.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 550.

Typically Offered
Fall

CE 760 - Environmental Engineering Seminar

Credits: 0

Discussion of current advances in research and practice of environmental engineering.

Note
One hour seminar biweekly.

Repeat for Credit
Y

Typically Offered
Fall, Spring

Cross-listed
BAE 760

CE 762 - Water Treatment Processes

Credits: 3

Physical and chemical process principles and their application to water treatment plant design.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CE 565.

Typically Offered
Spring

CE 766 - Wastewater Engineering: Biological Processes

Credits: 3

Biological process principles and their application to the design of wastewater treatment plants.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CE 565.

Typically Offered
Fall

CE 768 - Geoenvironmental Engineering Design

Credits: 3

A team design project in geoenvironmental engineering focused on resolving interdisciplinary issues related to containment of pollutants and remediation of soil and groundwater.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: One of the following: AGRON 605, AGRON 746, BAE 690, CE 625, CE 654, CHE 531 or GEOL 611.

Typically Offered
Spring

Cross-listed
BAE 768, CHE 768

CE 771 - Travel Demand Modeling

Credits: 3

Historical development and current status of techniques used in urban transportation planning and travel demand forecasting; trip generation, trip distribution, mode choice, and traffic assignment.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 572 or consent of instructor.

Typically Offered
Spring

CE 774 - Pavement Design

Credits: 3

Methods of evaluating the load-carrying capacity of soil subgrade, subbase, and base courses; critical analysis of the methods of design for flexible and rigid pavements; methods of increasing the load-carrying capacity of highway and airport pavements.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 522.

Typically Offered
Fall

CE 775 - Traffic Engineering

Credits: 3

Traffic operations of roads, streets, and highways; traffic engineering studies; use of signs, signals, and pavement markings as traffic control devices; highway and intersection capacity, design and operations of traffic signals; current microcomputer models and applications.

Repeat for Credit
N

Requisites
Prerequisite: "C" or better in CE 572.

Typically Offered
Spring

CE 777 - Portland Cement Concrete Pavements

Credits: 3

Portland cement concrete mix design and production. Paving operations. Saw and seal operations. Subgrade preparation. Base selection. Drainage selection, design and construction. Bonded and unbonded concrete overlays. Whitetopping and ultra-thin whitetopping. Concrete pavement restoration; quality assurance and quality control in concrete pavement construction.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 541.

Typically Offered
Spring

CE 778 - Geotechnics and Advanced Pavement Design

Credits: 3

Geotechnical aspects of mechanistic-empirical pavement design (MEPDG). Material characterization in MEPDG. Models relating mechanistic pavement responses to pavement performance. Applications of current mechanistic-empirical design methods.

Repeat for Credit
N

Requisites
Prereq: CE 774 or Instructor Permission

Typically Offered
Fall

CE 786 - Land Development for Civil Engineers and Planners

Credits: 3

Engineering problems involved in site planning and design. The comprehensive planning process, zoning and subdivision regulations; design and location of streets and highways, water supply and sanitary facilities, drainage and public utilities.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 572 or consent of instructor.

Typically Offered
Fall

CE 790 - Problems in Civil Engineering

Credits: 1-18

Problems in Civil Engineering

Note
Approval of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CE 791 - Research in Civil Engineering

Credits: 1-18

Original investigation or advanced study in some field related to the practice of civil engineering.

Note
Approval of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CE 802 - Advanced Mechanics of Materials and Applied Elasticity

Credits: 3

Two- and three-dimensional deformation analysis , equilibrium, and elastic constitutive laws. Stress-strain transformations between coordinate systems. Advanced topics in bending, shearing, torsion and combined loads, with applications to engineering problems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 533.

Typically Offered
Fall-Odd Years

Cross-listed
ME 802

CE 803 - Numerical and Analytic Techniques for Engineers

Credits: 3

Theory and application of linear algebra, differentiation, integration, optimization and complex variables to a broad range of engineering problems; introduction to solving partial differential equations using finite difference, finite element and boundary element methods.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 340.

Typically Offered
Fall

CE 807 - Applied Geostatistics

Credits: 2

Analysis of spatially-correlated data. Univariate, bivariate, and spatial description; global and point estimation; random function models; stationarity; intrinsic hypothesis; semivariogram; correlogram; ordinary and block kriging; cross validation; cross correlation and cokriging; experimental design.

Note
One hour lecture and one hour computer lab a day.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 510 or STAT 703.

Typically Offered
Intersession

Cross-listed
AGRON 807

CE 816 - Selected Topics in Civil Engineering

Credits: 1-18

Study of intermediate level topics of interest in civil engineering. Topics announced when offered.

Note
Instructor approval

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing

Typically Offered
Fall, Spring, Summer

CE 822 - Shear Strength and Slope Stability of Soils

Credits: 3

Advanced theories of soil strength and failure; soil improvement; theories of lateral earth pressure with applications; stability analysis by both classical and numerical methods. Selected soil mechanics laboratory project.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 728.

Typically Offered
Other

CE 823 - Engineering Properties of Cohesive Soils

Credits: 3

Mineralogy and structures of clay minerals; fabric and bonding of the clay particles; compressibility and strength characteristics of clays; moisture effects, retention, and movement through clay.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 522 and CE 725.

Typically Offered
Fall

CE 824 - Strength and Deformation of Geo-materials

Credits: 3

Mathematical and physical modeling in geotechnical engineering. Advanced laboratory testing of soils. Plasticity, dilatancy, failure and critical state. Finite element applications: Laboratory strength tests and/or simple field problems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 522 or equivalent.

Typically Offered
Other

CE 825 - Environmental Geotechnology

Credits: 3

Soil/environment and soil/ pollutant interactions; pollutant effect on soil strength and behavior; design and performance of waste containment structures; clay liners, surface seals, and slurry walls; slope stability problems for landfills.

Note

Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 725.

Typically Offered
Other

CE 827 - Computational Applications in Geo-Systems

Credits: 3

The application of finite element method to multi-physics and pressure dependent materials such as soils, rock, concrete and asphalt. Course covers the formulation of 1D element, overview of elasticity (isotropic and anisotropic), theory of plasticity (modified Cam Clay and Drucker-Prager models), which is followed by applications such as stresses in the soil, shear strength, consolidation, shallow and deep foundations, retaining walls, mechanically stabilized earth and groundwater seepage.

Repeat for Credit
N

Requisites
Prerequisite: CE 522

Typically Offered
Spring

CE 828 - Advanced Seepage and Settlement Analysis in Soils

Credits: 3

Permeability and seepage analysis involving dams and sheet piles; stress distribution in earth masses, one- and three-dimensional consolidation theories; advanced study of compressibility of soil, numerical method applications in consolidation and seepage; analysis of settlement. Selected soil mechanics laboratory project.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 522 and CE 802.

Typically Offered
Other

CE 833 - Advanced Structural Analysis II

Credits: 3

Nonlinear structural analysis using classical solutions; nonlinear geometry analysis by matrix methods for trusses and frames; nonlinear material analysis by matrix methods for trusses and frames; solution of nonlinear equilibrium equations; modeling structural problems by commercial software to predict ultimate capacity and nonlinear response.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 732 or equivalent.

Typically Offered
Spring

CE 834 - Strengthening Design of Reinforced Concrete with Fiber Reinforced Polymers

Credits: 3

The course introduces advanced aspects of the analysis and design of reinforced concrete beams and columns (3 weeks), it then covers the mechanical properties of FRP composites used in CE applications (2 weeks), it then covers the flexural strengthening analysis and design of reinforced concrete beams with FRP including the formulation for various failure modes (5 weeks), it them addresses the shear strengthening analysis and design of reinforced concrete beams with FRP (2 weeks), it then covers the strengthening and FRP wrapping of reinforced concrete columns with FRP (3 weeks) and finally it describes the practical methods of the proper installation and inspection of FRP (1 week).

Repeat for Credit
N

Requisites

Prerequisite: CE 544

Typically Offered
Spring

CE 836 - Energy Methods and Applied Variational Principles

Credits: 3

Theory and applications of virtual work, minimum potential, and variational principles using generalized coordinates, displacements, and forces to derive and solve advanced problems in structural, soil and hydrodynamic problems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 801.

Typically Offered
Other

CE 837 - Structural Stability

Credits: 3

Analysis of flexible members. Linear and nonlinear buckling of beams, frames, plates and complicated structural systems; post buckling behavior of steel structures.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 802.

Typically Offered
Spring

CE 844 - Prestressed Concrete Design

Credits: 3

Study of prestressing methods including strength and load-balancing approaches and their application to the analysis and design of beams, slabs, and axially loaded members. Flexural, shear, torsion, and anchorage-zone analysis. Study of deflection and time-dependent losses.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 544.

Typically Offered
Fall

CE 854 - Analysis of Groundwater Flow

Credits: 3

Principles of flow through porous media; applications of flow theory to well analysis and design; groundwater resource evaluation and regional groundwater systems analysis.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 552.

Typically Offered
Spring

CE 857 - Advanced Civil Engineering Design Using GIS

Credits: 3

Investigating the usage of Geographic Information Systems (GIS) technology to better solve engineering problems. Teams of students will use GIS to design solutions to various civil engineering related situations.

Note
Instructor approval

Repeat for Credit

Y

Requisites
Prerequisite: Graduate standing

Typically Offered
Spring

CE 861 - Environmental Engineering Chemistry

Credits: 3

Chemical kinetics and equilibria, acid-base chemistry, complex formation, precipitation and dissolution processes, and applications to the analysis of environmental engineering problems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 565, CE 762.

Typically Offered
Fall

CE 866 - Advanced Wastewater Treatment

Credits: 3

Recent advances in municipal and industrial wastewater treatment. Wastewater microbiology, wastewater biochemistry, applications of biotechnology in wastewater engineering, recent advances in nutrient removal processes, wastewater treatment technologies, and water reclamation.

Note
Three hours recitation.

Repeat for Credit
Y

Requisites
Prerequisite: CE 766.

Typically Offered
Spring

CE 867 - Advance Environmental Microbiology and Techniques

Credits: 3

Provides a general introduction to the diverse roles of microorganisms in natural and artificial environments, and their engineering applications. Topics including fundamentals of microbiology, microbial growth and metabolism, microbiology of engineered environmental systems, and laboratory techniques relevant to environmental microbiology are covered..

Repeat for Credit
N

Requisites
Prerequisite: (BIOL 198 and CE 563) or Consent of Instructor

Typically Offered
Spring-Even Years

CE 868 - Chemicals in the Environment: Fate and Transport

Credits: 3

Provides an understanding of processes that govern the behavior of both hazardous and naturally-occurring substances in the environment. Mass transport (such as advection, dispersion, and diffusion), surface and groundwater hydrology, physical/chemical/biological degradation processes, and air pollution modeling are covered. Phase equilibrium and partitioning in environmental systems will be discussed as well as interphase mass transfer and modeling.

Repeat for Credit
N

Requisites
CE 563 or Consent of Instructor

Typically Offered
Spring-Odd Years

CE 872 - Transportation Safety

Credits: 3

Importance of transportation safety, crash data collection, common crash databases, traffic safety studies, accident

data analysis, identification of high crash locations, traffic control devices as related to safety, special population group safety, traffic conflict studies, accident reconstruction, statistical methods in crash data analysis and traffic calming.

Note
Three hours recitation per week. Consent of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: CE 572

Typically Offered
Other

CE 873 - Airport Design

Credits: 3

Planning and design of a regional airport, including site selection in conformance with state and federal regulations; layout and design of runway system; size and layout of terminal buildings, landside facilities, parking lots, and circulation system.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 572.

Typically Offered
Spring

CE 874 - Sustainable Transportation Asset Management

Credits: 3

Recent advances in transportation asset management system. Inventory and condition data collection, life cycle analysis, prioritization, optimization, and implementation.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 774 or equivalent.

Typically Offered
Other

CE 875 - Traffic Flow Theory

Credits: 3

Theory of traffic flow, traffic stream characteristics, car following models, shock wave analysis, queuing analysis, application of statistical methods to traffic engineering problems, traffic simulation.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 775. Prerequisite or concurrent enrollment: STAT 510.

Typically Offered
Spring

CE 890 - Graduate Seminar in Civil Engineering

Credits: 0

Discussion of current advances and research in civil engineering.

Note
One hour seminar biweekly.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CE 916 - Advanced Topics in Civil Engineering

Credits: 1-18

A course reserved for study of current topics in civil engineering.

Note
Eighteen hours graduate credit in areas approved by instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CE 930 - Advanced Topics in Geotechnical Engineering

Credits: 1-18

Advanced study of selected topics in geotechnical engineering.

Note
Eighteen hours graduate credit in areas approved by instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 935 - Structural Dynamics II

Credits: 3

Analysis of structures subject to dynamic loadings. Optimization of structural systems to minimize earthquake hazards.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 802.

Typically Offered
Other

CE 938 - Theory of Plates and Shells

Credits: 3

Equations and solutions of bending of thin plates of various edge conditions and shapes. Membrane and bending theory of shells of revolution. Nonlinear theory of plates and shells.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 802.

Typically Offered
Other

CE 950 - Advanced Topics in Structural Engineering

Credits: 1-18

Advanced study of selected topics in structural engineering.

Note

Eighteen hours graduate credit in areas approved by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 967 - Physicochemical Processes

Credits: 3

Advanced study of physical and chemical processes in the movement and removal of particulates and organics in natural and engineered systems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 861.

Typically Offered
Other

CE 970 - Advanced Topics in Environmental and Water Resources Engineering

Credits: 1-18

Advanced study of selected topics in environmental and water resources engineering.

Note
Eighteen hours graduate credit in areas approved by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 980 - Advanced Topics in Transportation and Materials Engineering

Credits: 0-18

Advanced study of selected topics in transportation engineering and civil engineering materials.

Note
Eighteen hours graduate credit in areas approved by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of major professor and department head. Doctor of veterinary medicine degree only.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CFT 824 - Parent-Child Interaction: Theory and Research

Credits: 3

Developmental theories and empirical research concerning the reciprocal interactions between parents and their children focusing on the socialization of the child within the family.

Repeat for Credit
Y

Typically Offered
Summer

CFT 853 - Family Systems in Cultural Context

Credits: 3

Helps students integrate an understanding of individuals, couples, and families within the context of culture. Helps participants to listen and respond in a thoughtful and sensitive manner to the individuals and families they serve professionally, especially those from diverse cultural backgrounds. Students will become more aware of their

own cultural memberships, and develop a framework for appreciating the cultural context of the profession of family therapy.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program and/or instructor's consent.

Typically Offered
Spring

CFT 864 - Clinical Theory and Practice A

Credits: 3

Introduction to the foundation of family therapy. A survey of the first half of major schools of family therapy.

Repeat for Credit
Y

Requisites
Pre-requisite: Admission to the CFT program and/or instructor's consent.

Typically Offered
Fall

CFT 865 - Human Sexuality

Credits: 3

Focus on implications of personal and familial aspects of human sexuality throughout the life cycle.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

CFT 866 - Sex Therapy

Credits: 3

A focus on the framework and skills for delivering therapy to individuals and couples experiencing difficulties with their own sexuality or with sexual functioning in their relationships.

Repeat for Credit
Y

Typically Offered
Fall

CFT 867 - Pre-Practicum in Couple and Family Therapy

Credits: 3

Introduction to master's program in couple and family therapy, including clinic policies and clinical observations. Restricted to students admitted to the couple and family therapy program.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the CFT program and/or instructor's consent.

Typically Offered
Fall

CFT 868 - Pre-Practicum in Couple and Family Therapy II

Credits: 1

Preparation for screening into the clinical practicum in couple and family therapy and participation in clinic research program.

Repeat for Credit
Y

Requisites
Prerequisite: CFT 867 and concurrent enrollment in CFT 870.

Typically Offered
Spring

CFT 869 - Systematic Treatment of Trauma Violence and Substance Abuse

Credits: 3

Framework and skills for helping individuals and families experiencing domestic violence and/or substance abuse

with emphasis on assessment and treatment.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the CFT program and/or instructor consent.

Typically Offered
Fall

CFT 870 - Couples and Sex Therapy

Credits: 3

Examination of couple processes and clinical approaches to couple intervention and treatment, including evidence based approaches. The course will include a specific focus on contextual and systemic dynamics affecting couple relationships as well as the treatment of couples experiencing difficulties with their own sexuality or with sexual functioning in their relationships.

Repeat for Credit
Y

Requisites
Pre-requisite: Admission to the CFT program or instructor approval.

Typically Offered
Spring

CFT 872 - Family Therapy

Credits: 3

Discussion of the primary theories of Couple and Family Therapy which are used in the treatment of whole families who present themselves for therapy.

Repeat for Credit
N

Requisites
Pre-requisite: Admission to the CFT program or instructor approval

Typically Offered
Spring

CFT 877 - Individual and Family Assessment

Credits: 2

Assessment of individual and family functioning within multiple contexts; including an emphasis on client focused progress monitoring.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval

Typically Offered
Fall

CFT 878 - Professional Studies in Family Therapy

Credits: 3

Analysis of professional issues, techniques, and responsibilities associated with working effectively with families in a family therapy setting.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval.

Typically Offered
Spring

CFT 879 - Systemic Assessment and Treatment of Psychopathology

Credits: 3

Examination of the Diagnostic and Statistical Manual of Mental Disorders. Exploration of relational diagnoses and the interaction of individual disorders and relational functioning. Review of empirically supported treatments for individual and relational disorders.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor

approval.

Typically Offered
Spring

CFT 885 - Practicum in Couple and Family Therapy

Credits: 1-3

Supervised experience in couple and family therapy. Designed for master's level students.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval

Typically Offered
Fall, Spring, Summer

CFT 886 - Clinical Intervention with Parents and Children

Credits: 3

The course will examine the history of play therapy including the theories from which play therapy evolved, attachment theory, the fundamentals of play therapy, use of assessment with children and adolescents, sand tray play therapy, use of play therapy in the family context and special topics.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the CFT program or instructor approval.

Typically Offered
Fall

CFT 889 - Clinical Project

Credits: 1-3

Integration of clinical work and course work resulting in a final clinical project.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CFT 894 - Readings in Couple and Family Therapy

Credits: 1-6

Implications of research findings in preparation for professional work in counseling, teaching, and research in couple and family therapy.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CFT 896 - Clinical Theory and Practice B

Credits: 3

A survey of the second half of major schools of family therapy.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval.

Typically Offered
Fall

CFT 899 - MS Research in Couple and Family Therapy

Credits: 1-6

Individual research problems in couple and family therapy which may form the basis for the master's thesis or report.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CFT 910 - Topics in Couple and Family Therapy

Credits: 1-3

Examination of recent research, theory, and clinical practice related to couple and family therapy.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval

Typically Offered
Fall, Spring

CFT 970 - Specialization and Leadership

Credits: 3

Seminar focusing on the development of specialization in research, teaching, and applied work.

Repeat for Credit
Y

Typically Offered
Fall-Even Years

CFT 982 - Practicum in CFT Research

Credits: 1-3

Student will work with a faculty member to complete a research project and submit it to a journal.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the CFT program or instructor approval.

Typically Offered
Fall, Spring, Summer

CFT 983 - Advanced Family Research Methods

Credits: 3

Analysis of a variety of family research methods.

Repeat for Credit
Y

Typically Offered
Other

CFT 984 - Supervision of Couple and Family Therapy

Credits: 3

Preparation of experienced couple and family therapists for supervision roles within educational, medical and agency settings.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval. Corequisite: CFT 986

Typically Offered
Other

CFT 985 - PhD Practicum in Couple and Family Therapy

Credits: 1-3

Supervised experience in family therapy.

Note
Consent of instructor is required.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval

Typically Offered
Fall, Spring, Summer

CFT 986 - Practicum in Supervision in Couple and Family Therapy

Credits: 1-3

Supervised experience in supervision of couple and family therapy.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the CFT program or instructor approval.

Typically Offered
Fall, Spring, Summer

CFT 987 - Advanced Clinical Theory

Credits: 3

Exploration of couple and family therapy clinical theories and the process of integrating these theories into a personalized model for utilization in both therapy and supervision.

Repeat for Credit
Y

Requisites
Prerequisite: CFT 870 and CFT 896.

Typically Offered
Other

CFT 988 - Conjoint and Group Techniques in Family Counseling

Credits: 3

Advanced theory in couple and family counseling with emphasis on group techniques.

Repeat for Credit
Y

Requisites
Prerequisite: CFT 885 and consent of instructor.

Typically Offered
Spring, Summer

CFT 990 - Dissertation Proposal Seminar

Credits: 1

Presentation and discussion of proposals for dissertation research in human development and family science.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of statistics, 3 hours of research design or methods, and consent of major professor.

Typically Offered
Fall, Spring, Summer

CFT 999 - Doctoral Research in Couple and Family Therapy

Credits: 1-18

Doctoral Research in Couple and Family Therapy

Repeat for Credit
Y

Typically Offered
Other

CHE 015 - Engineering Assembly

Credits: 0

Engineering Assembly

Repeat for Credit
Y

Typically Offered
Fall, Spring

CHE 110 - Current Topics in Chemical Engineering

Credits: 1

Recent advances in chemical engineering and the impact of the profession on society.

Note
One hour lecture per week.

Repeat for Credit
N

Typically Offered
On sufficient demand

CHE 320 - Chemical Process Analysis

Credits: 3

An introduction to chemical engineering with emphasis on material and energy balances.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: CHM 230 or CHM 250 and MATH 222.

Typically Offered
Fall, Spring

CHE 354 - Basic Concepts in Materials Science and Engineering

Credits: 1

Structure of materials with crystal structures of metals and their defects emphasized. Two component phase diagrams, multiphase equilibrium, and the microstructures that result.

Note
Three hours lecture a week for 5 weeks.

Repeat for Credit
N

Requisites
Prerequisite: CHM 210, prerequisite or corequisite: PHYS 213.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

CHE 355 - Fundamentals of Mechanical Properties

Credits: 1

Overview of the mechanical properties of materials, especially metals, and the modification of these properties through changes in microstructure. Effect of heat treatment on microstructure and mechanical properties.

Note
Three hours lecture a week for 5 weeks.

Repeat for Credit
N

Requisites
Prerequisite: CHE 354.

Typically Offered
Fall, Spring

CHE 356 - Fundamentals of Electrical Properties

Credits: 1

Overview of the electrical properties of materials including conductors, semiconductors, and dielectrics, and their basis in the band theory of solids. Multiphase equilibrium and modification of properties through changes in microstructure.

Note
Three hours lecture a week for 5 weeks.

Repeat for Credit
N

Requisites
Prerequisite: CHE 354.

Typically Offered
Fall, Spring

CHE 416 - Computational Techniques in Chemical Engineering

Credits: 3

Use of computational techniques in chemical engineering.

Note

Two hours lecture and two hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 320.

Typically Offered
Fall, Spring

CHE 417 - Computational Techniques in Chemical Engineering II

Credits: 3

Application and reinforcement of principles and concepts for problem-solving chemical engineering challenges using mathematical models and numerical methods. Computational tools and software packages covered in the course include Python and/or MatLab and the chemical process simulator Aspen Plus.

Repeat for Credit
N

Requisites
Prerequisite: CHE 416 Co-requisite: CHE 521

Typically Offered
Spring

CHE 430 - Biomaterials

Credits: 3

This course provides an overview of interactions between materials and biological systems, techniques to assess biomaterial characteristics, and the role of biomaterial selection during the design of medical devices for select applications.

Note
2 hours lecture; 3 hours laboratory

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and CHM 230

Typically Offered
Fall

Cross-listed
BME 430

CHE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research project.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CHE 499 - Honors Research in Chemical Engineering

Credits: 1-6

Individual research problem selected with approval of faculty advisor. Open to students in the College of Engineering honors program. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CHE 520 - Chemical Engineering Thermodynamics I

Credits: 2

A study of the first and second laws of thermodynamics, real gases, heat of solution and reaction.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or better in CHE 320. Prerequisite or concurrent enrollment: MATH 340.

Typically Offered
Spring

CHE 521 - Chemical Engineering Thermodynamics II

Credits: 3

A continuation of the study of the second law, thermodynamic analysis of processes, phase equilibrium, and chemical reaction equilibrium.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CHE 416 and CHM 531. Prerequisite: CHE 520.

Typically Offered
Fall

CHE 530 - Transport Phenomena I

Credits: 3

A unified treatment of the basic principles of momentum, energy, and mass transport.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or better in CHE 320 and MATH 340.

Typically Offered
Fall

CHE 531 - Transport Phenomena II

Credits: 3

Continuation of Transport Phenomena I with special emphasis on mass transfer.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CHE 416.
Prerequisite: CHE 530.

Typically Offered
Spring

CHE 535 - Transport Phenomena Laboratory

Credits: 3

Laboratory experiments in momentum, heat, and mass transfer.

Note
Eight hours of laboratory per week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CHE 531.

Typically Offered
Spring

CHE 542 - Unit Operations Laboratory

Credits: 3

Laboratory experiments on classical unit operations, e.g., distillation, absorption, extraction, and on chemical kinetics and process dynamics.

Note
Eight hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 535, CHE 550 and CHE 560.
Prerequisite or concurrent enrollment: CHE 561.

Typically Offered
Spring

CHE 550 - Chemical Reaction Engineering

Credits: 3

Applied chemical kinetics and catalysis including the analysis and design of tubular, packed bed, stirred tank, and fluidized bed chemical reactors.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 521 and CHE 531.

Typically Offered
Fall

CHE 560 - Separational Process Design

Credits: 3

Development of the basic theory and design of separational processes such as distillation, gas absorption, liquid extraction, adsorption, and ion exchange.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 521 and CHE 531.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CHE 561 - Chemical Process Dynamics and Control

Credits: 3

A study of the unsteady state behavior and control of chemical processes.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 550 and 416.

Typically Offered
Spring

CHE 565 - Health and Safety in Chemical Engineering

Credits: 3

Fundamentals of chemical process safety, particularly as they apply to process design. Topics will include toxicology and industrial hygiene, fires and explosions, runaway reactions, relief systems, process hazards identification, risk assessment, and inherently safer design.

Repeat for Credit
N

Requisites
Corequisite: CHE 570.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

CHE 570 - Chemical Engineering Systems Design I

Credits: 3

Basic concepts of process economics and process optimization with application to the synthesis and design of chemical processing systems.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Corequisite: CHE 550 and CHE 560.

Typically Offered
Fall

CHE 571 - Chemical Engineering Systems Design II

Credits: 3

The solution of comprehensive systems design problems.

Note
Two hours recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 550, CHE 560, and 570. Corequisite: CHE 561.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

CHE 580 - Problems in Chemical Engineering or Materials Science

Credits: 1-18

An introduction to chemical engineering research.

Note
Approval of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHE 626 - Bioseparations

Credits: 3

Study of separations important in food and biochemical engineering such as leaching, extraction, expression, absorption, ion exchange, filtration, centrifugation, membrane separation, and chromatographic separations.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 531 or BAE 545.

Typically Offered
Spring-Even Years

CHE 631 - Nanotechnology in Chemical Engineering

Credits: 3

This course has been taught as a topics course, and will now be given a specific course number for its future offerings.

Repeat for Credit
N

Requisites
Senior undergraduate or graduate standing in engineering, or permission of the
instructor. It will be assumed that the student has been exposed to basic materials science.

Typically Offered
On sufficient demand

CHE 632 - Molecular Modeling

Credits: 3

This course focuses on introducing basic concepts in chemical engineering and chemistry related to thermodynamics, Kinetics, Chemistry, Surface Science, Catalysis, Materials Science in the context of molecular-level modeling. Students will also gain hands-on experience in using common simulation tools and high-performance computing.

Repeat for Credit
N

Requisites
Prerequisites: CHM 585 OR CHM 595, CHE 354, CHE 355, CHE 356, and CHE 521, OR instructor permission.

Typically Offered
On sufficient demand

CHE 633 - Microbial Biotechnology

Credits: 3

Continued advancements in microbiology have enabled the ability to use microorganisms for engineering applications. Thus, microbial biotechnology is a rapidly expanding area that has potential to improve agriculture productivity, provide renewable sources of energy, and improve the health of plants, animals, and humans, among other applications. This course will highlight these research areas and will emphasize chemical engineering concepts found within these systems.

Repeat for Credit
N

Requisites
Pre-Req: CHE 320 OR BAE 445 OR instructor permission

Typically Offered
On sufficient demand

CHE 642 - Fundamentals of Conversion of Biorenewable Resources

Credits: 3

An introduction to the conversion of biorenewable resources into biobased products and biofuels.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220 and CHM 230.

Typically Offered
On sufficient demand

Cross-listed
BAE 642

CHE 643 - Life Cycle Assessment

Credits: 3

Introduction to the life cycle assessment methodology for quantifying environmental impacts of products, processes, and systems. Topics include life cycle methodology, data inventory process and databases, life cycle impact modeling approaches and software, uncertainty quantification, and practical applications to demonstrate life cycle assessment as a tool for making decisions to improve sustainability of materials, products, and system

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: Math 220 and either CHM 230 or CHM 250.

Typically Offered
Spring

Cross-listed
BAE 643

CHE 650 - Hazardous Waste Engineering Seminar

Credits: 1

Topics in hazardous materials management and control, waste reduction and minimization, hazardous substance tracking, and hazardous waste engineering.

Note
One hour recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 230.

Typically Offered
Fall, Spring, Summer

CHE 656 - Polymer Science and Engineering

Credits: 3

An introduction to polymeric materials, including chemistry, structure and formation; physical states and transitions; and, basic physical and mechanical properties.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 531.

Typically Offered
Fall-Even Years

CHE 661 - Processing of Materials for Solid State Devices

Credits: 3

Structure, properties and processing of materials for solid state devices. Crystal growth, epitaxy, oxidation, diffusion, lithography, and etching as applied to device fabrication.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 350 or CHE 352.

Typically Offered
Fall, Spring

CHE 663 - Environmental and Ecological Risk Assessment

Credits: 3

Examination of processes and methodologies associated with human environmental and ecological risk assessments. Application of the methods learned to a project to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and BIOL 255.

Typically Offered
On sufficient demand

Cross-listed
BAE 663

CHE 670 - Sustainability Seminar

Credits: 1

Topics in environmental sustainability, green engineering, life cycle analysis, sustainable development, and sustainability science.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 230.

Typically Offered
Fall, Spring, Summer

CHE 681 - Engineering Materials II

Credits: 3

The structure and bonding in crystalline and amorphous materials; crystallography; thermodynamic stability in materials; equilibrium diagrams and the phase rule; rate theory and kinetics of solid-state transformations; mechanical behavior of engineering materials; dislocations; failure mechanisms.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 350 or CHE 352.

Typically Offered
Fall, Spring, Summer

CHE 682 - Surface Phenomena

Credits: 3

Principles and applications of interfacial phenomena, including capillarity, colloids, porosity, adsorption, and catalysis.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 520, CHM 585, ME 513, or PHYS 664.

Typically Offered
Fall-Odd Years

CHE 715 - Biochemical Engineering

Credits: 3

The analysis and design of biochemical processing systems with emphasis on fermentation kinetics, continuous fermentations, aeration, agitation, scale up, sterilization, and control.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CHE 550.

Typically Offered
Fall

CHE 750 - Air Quality Seminar

Credits: 1

Topics in air quality including health effects, toxicology, measurement, characterization, modeling, management, and control.

Note
One hour recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 230.

Typically Offered
Fall

CHE 802 - Selected Topics in Materials Science

Credits: 1-18

Areas of current interest in materials including solidification, transformations, solutions, dislocations, creep, fracture, failure analysis, and failure prevention.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 681.

Typically Offered
Fall, Spring, Summer

CHE 805 - Selected Topics in Biochemical Engineering

Credits: 3

Subjects of current interest in the broadest sense of biochemical engineering. These involve not only chemical engineering problems which contain biochemical biological, or medical elements but also applications of chemical engineering principles and methodologies to biochemical, biological, medical, and ecological problems.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 715.

Typically Offered
Spring, Summer

CHE 810 - Research in Chemical Engineering

Credits: 1-18

Original investigations in transport phenomena, unit operations, thermodynamics, process dynamics, applied chemical kinetics and process development. The results of these investigations may be used for the master's thesis or the doctoral dissertation.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHE 815 - Advanced Chemical Engineering Thermodynamics

Credits: 3

Advanced topics in thermodynamics, with emphasis on a chemical and physical equilibria and the estimation of thermodynamic properties.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing in chemical engineering.

Typically Offered
Fall, Spring, Summer

CHE 822 - Advanced Chemical Reaction Engineering

Credits: 3

Theory of kinetics and catalysis in homogeneous and heterogeneous systems, with applications in chemical reactor design and process development.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 550.

Typically Offered
Fall, Spring, Summer

CHE 831 - Advanced Nanotechnology in Chemical Engineering

Credits: 3

This course will cover concepts of nanoscience and nanotechnology: material
continuum; fundamental properties of nanomaterials; nanomaterials (nanoparticles, nanocarbons,hybrid nanomaterials, nanocomposites, semiconductor quantum wells, nanowires, and quantum dots); fabrication and characterization methods; selected applications of nanomaterials such as energy storage, thermal management, sensing, electronic devices, composites, energy harvesting (photovoltaics), environmental remediation, medicine, and heterogeneous catalysis.

Repeat for Credit
N

Requisites
Senior undergraduate or graduate standing in engineering, or permission of the
instructor. It will be assumed that the student has been exposed to basic materials science.

Typically Offered
On sufficient demand

CHE 832 - Advanced Molecular Modeling

Credits: 3

This course focuses on introducing basic concepts in chemical engineering and chemistry related to thermodynamics, Kinetics, Chemistry, Surface Science, Catalysis, Materials Science in the context of molecular-level modeling. Students will also gain hands-on experience in using common simulation tools and high-performance computing.

Repeat for Credit
N

Requisites
Prerequisites: CHM 585 OR CHM 595, CHE 354, CHE 355, CHE 356, and CHE 521, OR instructor permission.

Typically Offered
On sufficient demand

CHE 833 - Advanced Microbial Biotechnology

Credits: 3

Continued advancements in microbiology have enabled the ability to use microorganisms for engineering applications. Thus, microbial biotechnology is a rapidly expanding area that has potential to improve agriculture productivity, provide renewable sources of energy, and improve the health of plants, animals, and humans, among other applications. This course will highlight these research areas and will emphasize chemical engineering concepts found

within these systems.

Repeat for Credit
N

Requisites
Corequisites: CHE 320 OR BAE 445 OR instructor permission.

Typically Offered
On sufficient demand

CHE 835 - Chemical Engineering Analysis

Credits: 3

The mathematical formulation of problems in chemical engineering using partial differential equations, vector and tensor notation. Solution of these problems by analytical and numerical techniques.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 530.

Typically Offered
Fall, Spring, Summer

CHE 842 - Advanced Biomass Thermochemical Conversion

Credits: 3

Thermochemical methods to convert biomass to fuels and chemicals: liquefaction, pyrolysis, gasification, and heterogeneous catalysis. Analysis of the reaction kinetics and mass, heat, and momentum transfer in chemical reactors associated with these methods.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 520 or ME 513 and CHE 550 or BAE 545.

Typically Offered
Fall-Odd Years

Cross-listed
BAE 842

CHE 862 - Advanced Transport Phenomena I

Credits: 3

Advanced treatment of momentum, energy, and mass transport, with emphasis on momentum transport in chemical engineering applications.

Note
Three hours recitation a week.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHE 867 - Advanced Transport Phenomena II

Credits: 3

Advanced treatment of momentum, energy, and mass transport, with emphasis on energy and mass transport in chemical engineering applications.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 862.

Typically Offered
Fall, Spring, Summer

CHE 875 - Graduate Seminar in Chemical Engineering

Credits: 1

Discussion of current advances and research in chemical engineering and related fields.

Repeat for Credit

Y

Typically Offered
Fall, Spring

CHE 898 - Master's Report

Credits: 1-18

Topics selected with approval of department head and major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of department head and major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHE 901 - Selected Topics in Reaction Engineering

Credits: 3

Advanced study in this field of such topics as complex reactions, catalysis, dispersion effects, fast reactions, reactions in fluidized beds.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 822 and one course in chemical engineering numbered 851 or higher.

Typically Offered
Fall, Spring, Summer

CHE 910 - Selected Topics in Transport Phenomena

Credits: 3

Subjects of current interest such as surface phenomena, turbulent transport, droplet mechanics, multicomponent systems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 867.

Typically Offered
Fall, Spring, Summer

CHE 930 - Selected Topics in Thermodynamics

Credits: 3

Advanced study in this field of such topics as irreversible thermodynamics, solution theory, and surface phenomena.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 815 and one course in chemical engineering numbered 851 or higher.

Typically Offered
Fall, Spring, Summer

CHE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of department head and major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHINE 101 - Chinese I

Credits: 4

Introduction to the fundamental linguistics and cultural characteristics of the Chinese language and its writing systems.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 200 - Chinese II

Credits: 4

Continuation of Chinese I. Development of functional skills for familiar situations.

Repeat for Credit
N

Requisites
Prerequisite: CHINE 101.

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 201 - Chinese III

Credits: 4

Continuation of Chinese II; further development of four skills of listening, speaking, reading, and writing; intensive practice of spoken and written Chinese.

Repeat for Credit
N

Requisites
Prerequisite: CHINE 200

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 301 - Chinese IV

Credits: 4

Continuation of Chinese III. Presentation of more advanced elements of the Chinese language, with intensive practice of spoken and written Chinese.

Repeat for Credit
N

Requisites
Prerequisite: CHINE 201

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 501 - Chinese V

Credits: 3

Development of communication skills through application activities. Enhancement of vocabulary and intensive practice in grammatical structures and their usage.

Repeat for Credit
N

Requisites
Prerequisite: CHINE 301 or equivalent.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 502 - Chinese VI

Credits: 3

Continuation of Chinese V. Development of functional skills for general situations. Further enhancement of vocabulary and intensive practice in grammatical structures and their usage.

Repeat for Credit
N

Requisites
Prerequisite: CHINE 501 or equivalent.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHINE 599 - Special Studies in Chinese

Credits: 0-18

Special Studies in Chinese

Note
Consent of department head and instructor.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CHM 110 - General Chemistry

Credits: 3

Principles, laws, and theories of chemistry; important metallic and nonmetallic substances.

Note
Three hours lecture a week. An optional laboratory course, CHM 111, is available for an additional hour credit.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 111 - General Chemistry Laboratory

Credits: 1

A laboratory course to supplement the material of CHM 110.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: CHM 110.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 199 - Foundations for Success in Chemistry 1

Credits: 3

Skills and concepts needed for success in the first course of the freshman chemistry sequence.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: (One year of high school chemistry AND MATH 100) OR two years of high school algebra).

Typically Offered
Fall, Spring

CHM 200 - Frontiers in Chemistry

Credits: 1

An undergraduate seminar designed to introduce students to research being carried out within the Kansas State University Chemistry Department and to offer perspectives on other issues of interest to chemistry majors and those considering chemistry as a major.

Repeat for Credit
Y

Typically Offered
Fall or Spring

CHM 210 - Chemistry I

Credits: 4

First course of a two-semester study of the principles of chemistry and the properties of the elements and their compounds.

Note
Concurrent enrollment in CHM 210 lab is required.

Three hours lecture and three hours lab a week.

Students entering the university with Advanced Placement chemistry examination credit may earn the following grades: (Score 5) A in Chemistry I and A in Chemistry II; (Score 4) A in Chemistry I and B in Chemistry II; (Score 3) B in Chemistry I.

Repeat for Credit
N

Requisites
Prerequisite: (One year of high school chemistry AND MATH 100) OR two years of high school algebra).

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 211 - Chemistry I Recitation

Credits: 1

An optional recitation class that requires concurrent enrollment in CHM 210 Chemistry I. The objective is the development of skills for solving chemical problems.

Note
Instruction will be via a small class format. Credit independent of grade for Chemistry I.

Repeat for Credit
Y

Requisites
Corequisite: CHM 210

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 220 - Honors Chemistry I

Credits: 5

First course of a two-semester study of chemical principles. Intended for students with a strong background in chemistry.

Note
Four hours lecture and three hours lab a week. Concurrent enrollment in CHM 220 lab is required.

Repeat for Credit
N

Requisites

Prerequisite: (One year of high school chemistry AND MATH 100) OR two years of high school algebra); ACT composite score of 26 or higher.

Typically Offered
Fall

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 230 - Chemistry II

Credits: 4

Second course of a two-semester study of the principles of chemistry and the properties of the elements and their compounds.

Note
Three hours lecture and three hours lab a week. Concurrent enrollment in CHM 230 lab is required.

Students entering the university with Advanced Placement chemistry examination credit may earn the following grades: (Score 5) A in Chemistry I and A in Chemistry II; (Score 4) A in Chemistry I and B in Chemistry II; (Score 3) B in Chemistry I.

Repeat for Credit
N

Requisites
Prerequisite: CHM 210 OR CHM 220.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 231 - Chemistry II Recitation

Credits: 1

An optional recitation class that requires concurrent enrollment in CHM 230 Chemistry II. The objective is the development of skills for solving chemical problems.

Note
Instruction will be via a small class format. Credit independent of grade for Chemistry II.

Repeat for Credit
N

Requisites
Corequisite: CHM 230.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 250 - Honors Chemistry II

Credits: 5

Continuation of CHM 220, covering the principles of chemistry.

Note
Three hours lecture and five hours lab a week.

Intended for students with a strong background in chemistry. Concurrent enrollment in CHM 250 lab is required. Laboratory has emphasis on quantitative chemical analysis.

Repeat for Credit
N

Requisites
Prerequisite: CHM 220.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 315 - Environmental Science: A Chemistry Perspective

Credits: 3

An analysis of important technological developments and their impact on society and on the earth's environment; ethical issues raised by technological advances. History, matter and energy, ecosystems, population issues, air pollution, water pollution, hazardous substances, environmental policies, and decision making are discussed.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230 OR CHM 250.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

CHM 316 - Environmental Science: A Chemistry Perspective Laboratory

Credits: 1

A laboratory course to supplement the material of CHM 315.

Note
Three hours lab per week.

Repeat for Credit
N

Requisites
Corequisite: CHM 315.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 350 - General Organic Chemistry

Credits: 3

A survey of types of organic reactions important to biological science, including pre-veterinary and certain agriculture and health and human sciences programs.

Note
Three hours lecture a week. Concurrent enrollment in CHM 351 is urged.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230 OR CHM 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 351 - General Organic Chemistry Laboratory

Credits: 2

General Organic Chemistry Laboratory

Note
It is strongly recommended students complete CHM 350 prior to taking CHM 351.

Repeat for Credit
N

Requisites
Corequisite: CHM 350.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 357 - Chemical Warfare, 1914-Present

Credits: 3

Interdisciplinary look at chemical warfare. Encourages students to engage with the nature of chemical weapons as a way to help them better understand the implications of their use over the last century. Students are asked to think about the ways in which chemical compounds created for benign purposes can be subverted and used as weapons regardless of their creator's original intent.

Repeat for Credit

N

Typically Offered
Spring-Even Years

Cross-listed
HIST 357

CHM 371 - Chemical Analysis

Credits: 4

Principles of chemical equilibria and quantitative analysis: gravimetric, titrimetric, spectrophotometric, electroanalytical, and separations methods.

Note
Two hours lecture and five hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 372 - Forensic Chemistry and Criminalistics

Credits: 3

Introduction of forensic science and chemistry. Collecting physical evidence at a crime scene and examining it in the laboratory. Soils, glass, hair, fibers, drugs, explosives, poisons, castings, inks, and arson and rape situations are investigated.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 OR CHM 210 OR CHM 220.

Typically Offered
Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 399 - Honors Seminar

Credits: 3

Open to students in the arts and sciences honors program.

Repeat for Credit
N

Typically Offered
Fall

CHM 497 - Research in Undergraduate Chemistry

Credits: 1-3

Undergraduate research in the chemical sciences.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

CHM 498 - Honors Project

Credits: 3

Open only to non-Chemistry Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 499 - Problems in Undergraduate Chemistry

Credits: 1-18

Problems may include classroom and/or lab work.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

CHM 500 - General Physical Chemistry

Credits: 3

Elementary principles of physical chemistry.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: (CHM 230 OR CHM 250) AND (MATH 210 OR MATH 220) AND (PHYS 113 OR PHYS 213).

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 531 - Organic Chemistry I

Credits: 3

Topics to be covered include fundamental concepts in organic chemistry such as hybridization, molecular orbitals, structure and bonding, acids and bases, kinetics and thermodynamics, stereochemistry and chirality, and conformational analysis. The basic knowledge will be used to study the syntheses, reactions, and mechanisms of functional groups such as alkanes, haloalkanes, and alkenes. Structural determination using infrared spectroscopy and nuclear magnetic resonance will also be included.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230 OR CHM 250.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 532 - Organic Chemistry Laboratory

Credits: 2

A laboratory exploring the synthesis and characterization of organic compounds.

Note
It is strongly recommended students complete CHM 531 prior to taking CHM 532.

Repeat for Credit
N

Requisites
Corequisiste: CHM 531.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 545 - Chemical Separations

Credits: 2

Principles of modern separation techniques.

Note
One hour lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: (CHM 250 OR CHM 371) AND CHM 532 AND CHM 550.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 550 - Organic Chemistry II

Credits: 3

A continuation of Organic Chemistry I (CHM 531). CHM 550 represents the second semester of a two-semester survey of organic chemistry. Topics to be discussed include syntheses, reactions, and mechanisms of alkynes, aldehydes and ketones, carboxylic acids and their derivatives, amines, benzene and its derivatives, organometallic chemistry, conjugated unsaturated systems and pericyclic reactions, polymers, carbohydrates, lipids, amino acids, proteins, and nucleic acids. Structural identification will be studied using various spectroscopic methods.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 531.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 551 - Advanced Organic Laboratory

Credits: 2

Advanced Organic Laboratory

Note
One five-hour lab and one hour of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 550 and CHM 532.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CHM 566 - Instrumental Methods of Analysis

Credits: 3

Introduction to theory and practice of electrochemical methods, molecular and atomic spectroscopy, surface science, mass spectrometry, separation methods, and electronics in analytical chemistry.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: (CHM 250 OR CHM 371) AND CHM 550 AND (CHM 500 OR CHM 595).

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 585 - Physical Chemistry I

Credits: 3

Elementary chemical thermodynamics and kinetic theory of gases.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites

Prerequisite: (CHM 350 OR CHM 531) AND MATH 222 AND PHYS 214.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 595 - Physical Chemistry II

Credits: 3

Elementary quantum chemistry, spectroscopy, statistical thermodynamics, and chemical kinetics.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: (CHM 350 OR CHM 531) AND MATH 222 AND PHYS 214.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 596 - Physical Methods Laboratory

Credits: 1-2

Experiments that relate to physical and instrumental methods.

Note
Three to six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 566 AND MATH 221 AND (PHYS 114 OR PHYS 214).

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CHM 599 - Senior Thesis Research

Credits: 1-3

A final written report and oral presentation are required.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

CHM 600 - Scientific Glassblowing

Credits: 1

The basic techniques of bending, sealing, and blowing glass used to fabricate scientific glassware.

Note
Three hours of laboratory including one lecture demonstration a week.

Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: Junior OR Senior OR Graduate standing in the physical sciences, OR consent of instructor.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

CHM 601 - Safe Chemical Laboratory Practices

Credits: 1

A general safety course for persons working or teaching in a chemical laboratory.

Note
One hour of lecture per week.

Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory. Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

CHM 611 - Inorganic Chemistry I

Credits: 3

Atomic and molecular structure, bonding concepts used in the practice of inorganic chemistry. Applications of symmetry and group theory to structure, bonding, and spectra.

Note
May only take either CHM 611 or CHM 811, but not both, for credit.

Repeat for Credit
N

Requisites
Prerequisite: CHM 550.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 612 - Inorganic Chemistry II

Credits: 3

Structure, reactivity, and mechanistic aspects of main group and transition metal complexes. Organometallic reactions, catalysis, and bioinorganic chemistry.

Note
May only take either CHM 612 or CHM 812, but not both, for credit.

Repeat for Credit
N

Requisites
Prerequisite: CHM 550.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

CHM 652 - Organic Chemistry III: Reactions and Mechanisms

Credits: 3

Advanced study of organic compounds and their associated reaction mechanisms.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory. May only take either 652 or 852, but not both, for credit.

Repeat for Credit
N

Requisites
Prerequisite: CHM 532 AND CHM 550.

Typically Offered
Fall

K-State 8

Natural and Physical Sciences
Empirical and Quantitative Reasoning

CHM 657 - Inorganic Techniques

Credits: 2

The preparation, characterization, and study of transition metal, main group, and organometallic compounds using techniques commonly encountered in industrial and academic research.

Note
One hour lecture and three hours lab a week.

Repeat for Credit
N

Requisites
CORequisite: CHM 611 OR CHM 612.

Typically Offered
Fall

CHM 700 - Practicum in Teaching Chemistry

Credits: 1

Principles and methods of instruction in laboratories and recitation classes in chemistry, including one semester of supervised experience as an instructor in a chemical laboratory. This is a required course of all teaching assistants in the Department of Chemistry.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing in chemistry OR consent of instructor.

Typically Offered
Fall

CHM 777 - Practical NMR Spectroscopy

Credits: 1

Fundamental aspects of 1D and 2D nuclear magnetic resonance (NMR) spectroscopy, as applied to the Chemistry Department's Varian 200- and 400-MHz spectrometers.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: Senior OR graduate standing in the physical sciences, OR consent of instructor.

Typically Offered
Spring

CHM 799 - Problems in Chemistry

Credits: 1-18

Problems may include classroom or laboratory work. Not for thesis research.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 596 Physical Methods Laboratory. Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 800 - Chemistry in Outer Space and in the Laboratory

Credits: 2

The generation of reactive atoms and molecules in outer space and in the laboratory is covered, as well as their chemical reactions and spectroscopy. Extreme conditions

of high and low temperatures, synthesis using atoms, nanoscale particles of inorganic materials, and matrix isolation are discussed.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

CHM 801 - Chemical Thermodynamics

Credits: 3

The laws, principles, and methods of thermodynamics and their applications to chemical systems. Statistical-molecular approach emphasized.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Other

CHM 811 - Advanced Inorganic Chemistry I

Credits: 3

Advanced concepts in atomic and molecular structure, bonding concepts used in the practice of inorganic chemistry. Applications of symmetry and group theory to structure, bonding, and spectra.

Note
May only take either 611 or 811, but not both, for credit.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Fall

CHM 820 - Materials Chemistry

Credits: 3

Concepts of materials chemistry developed from an understanding of the chemical composition and structure of materials, and their relationship to the properties of matter. Students will be introduced to the structures and composition of materials and the diverse range of materials, including metals, metal clusters, semiconductors, nanomaterials, supramolecular materials, sol-gel materials, liquid crystals, glasses, polymers and composites.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory. Consent of instructor.

Repeat for Credit
N

Typically Offered
Spring

CHM 852 - Advanced Organic Chemistry

Credits: 3

Advanced study of organic compounds and fundamental types of reactions.

Note
Three hours lecture a week. May only take either 652 or 852, but not both, for credit.

Repeat for Credit
N

Typically Offered
Fall

CHM 854 - Theoretical Chemistry I

Credits: 3

Introduction to quantum mechanics and atomic and molecular spectroscopy.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Fall

CHM 856 - Chemical Kinetics

Credits: 3

Survey of experimental and theoretical aspects of dynamics of chemical reactions.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: CHM 801 OR CHM 854.

Typically Offered
Other

CHM 860 - Synthetic Organic Chemistry

Credits: 4

Conditions, scope, and applications of reactions useful in synthetic organic chemistry.

Note
Four hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring

CHM 862 - Organic Spectroscopy

Credits: 3

The principles of IR, UV-VIS, mass, and NMR spectroscopies applied to the problem of structure determination.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Fall

CHM 899 - Research in Chemistry

Credits: 1-18

Research in analytical chemistry, inorganic chemistry, organic chemistry, and physical chemistry for the M.S. Degree.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 901 - Graduate Seminar in Analytical Chemistry

Credits: 0-1

Graduate Seminar in Analytical Chemistry

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 902 - Graduate Seminar in Inorganic Chemistry

Credits: 0-1

Graduate Seminar in Inorganic Chemistry

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 903 - Graduate Seminar in Organic Chemistry

Credits: 0-1

Graduate Seminar in Organic Chemistry

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 904 - Graduate Seminar in Physical Chemistry

Credits: 0-1

Presentation of topics from literature in physical chemistry.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CHM 920 - Analytical Separations

Credits: 3

The theory, instrumentation, and application of classical and modern separation techniques are covered in this lecture course.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring

CHM 929 - Physical Methods in Inorganic Chemistry

Credits: 3

Theory and application of infrared, Raman, visible, ultraviolet, NMR, ESR, NQR, Mossbauer, and mass spectrometry to inorganic chemistry.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring

CHM 930 - Homogeneous Catalysis

Credits: 2

The study of industrially important and synthetically useful catalysis of organic reactions by soluble metal complexes.

Note
Two hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring-Even Years

CHM 935 - Selected Topics in Inorganic Chemistry

Credits: 1-3

A lecture course in inorganic chemistry in areas of specialization of the faculty, with emphasis on current developments. Specific topics will be changed from semester to semester, so a student may take the course for credit more than once.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory. Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CHM 937 - Applications of Surface Science to Chemistry

Credits: 3

Chemical bonding in the solid state. Surface science and related techniques as applied to chemical problems. Special topics including data analysis and corrosion studies.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

CHM 939 - Topics in Analytical Chemistry

Credits: 1-3

A lecture course in analytical chemistry in areas of specialization of the faculty, with emphasis on current developments.

Repeat for Credit
Y

Typically Offered
On sufficient demand

CHM 940 - Chemical Microscopy

Credits: 3

The theory, instrumentation and applications of modern microscopic methods are covered in this lecture course. Emphasis is given to the study of chemically-important phenomena in material systems.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring-Even Years

CHM 944 - Electroanalytical Chemistry

Credits: 2-3

Theory and applications of electrochemical methods: chronoamperometry, chronopotentiometry, cyclic voltammetry, coulometry, polarography, potentiometry, and instrumentation.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

CHM 947 - Applied Molecular Spectroscopy

Credits: 3

Experimental, and theoretical methods associated with ultraviolet and visible absorption, fluorescence, Raman scattering, and nonlinear optical spectroscopies.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: CHM 854.

Typically Offered
Spring-Odd Years

CHM 950 - Chemical Statistical Mechanics

Credits: 3

Application of classical and quantum statistical mechanics to chemical phenomena.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Requisites
Prerequisite: CHM 801 AND CHM 854.

Typically Offered
Other

CHM 954 - Theoretical Chemistry II

Credits: 3

Quantum theory of atomic and molecular structure.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Requisites

Prerequisite: CHM 854.

Typically Offered
Spring

CHM 955 - Selected Topics in Physical Chemistry

Credits: 1-3

A lecture course in physical chemistry in areas of specialization of the faculty, with emphasis on current developments. Specific topics will be changed from semester to semester, so a student may take the course for credit more than once.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Requisites
Prerequisite: CHM 854.

Typically Offered
On sufficient demand

CHM 965 - Physical Organic Chemistry

Credits: 3

Principles of orbital symmetry, thermochemistry, kinetics, and other topics applied to the understanding of reaction mechanisms.

Note
Three hours lecture a week. Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
N

Typically Offered
Spring

CHM 970 - Selected Topics in Organic Chemistry

Credits: 1-3

A lecture course in organic chemistry in areas of specialization of the faculty, with emphasis on current developments. Specific topics will be changed from semester to semester, so a student may take the course for credit more than once.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
On sufficient demand

CHM 999 - Research in Chemistry

Credits: 1-18

Research in analytical chemistry, inorganic chemistry, organic chemistry, and physical chemistry for the Ph.D. Degree.

Note
Unless otherwise stated, all chemistry courses numbers 600 or above require the following as minimum prerequisites: CHM 550 Organic Chemistry II; CHM 532 Organic Chemistry Laboratory; CHM 595 Physical Chemistry II; and CHM 598 Physical Chemistry II Laboratory.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CIS 015 - Undergraduate Seminar

Credits: 0

Presentation of professional problems and practices by students, faculty, and industry professionals associated with computing and information sciences.

Note
One hour lecture per week. Required of all undergraduate students new to the department.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CIS 090 - CIS Scholars Seminar

Credits: 0

Presentation of professional problems and practices by students, faculty, and professionals associated with computing science.

Repeat for Credit
Y

Requisites
Prerequisite: Admission into the CIS Scholars Program.

Typically Offered
Fall, Spring

CIS 115 - Introduction to Computing Science

Credits: 2

A survey of the discipline of Computing Science and its interaction with other disciplines, incorporating historical development, theories, and tools of Computing Science (algorithm design and programming). Topics include: mechanical and digital computers, computational thinking, security, simulation, data science, web technologies, and more. Students will be able to explore real-world problems within computer science and research current topics.

Note
2 hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite or Concurrent: CIS 116

Typically Offered
Fall, Spring

CIS 116 - Introduction to Programming

Credits: 1

An introduction to programming by exploring core concepts such as variables, conditionals, iteration, basic data structures, functions, and classes. Hands-on activities to learn and apply concepts to real-world problems and ideas. Students will gain a solid foundation in programming, setting the stage for further study and professional use.

Note
2 hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100

Typically Offered
Fall, Spring

CIS 118 - International Professional Development Experience

Credits: 1

Participation in various professional development activities at an international university.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the Computer Science Professional Program.

Typically Offered
Spring

CIS 190 - Undergraduate Seminar in Computing and Information Sciences

Credits: 1-3

Topics of special interest in computing and information sciences.

Repeat for Credit
Y

Typically Offered
Fall

CIS 200 - Programming Fundamentals

Credits: 4

Principles of algorithm design and their application to procedural programming: state, control structures, methods. Patterns of conditional and iterative control structure. Program testing. Introduction to arrays, classes, and objects. Programming projects.

Repeat for Credit
N

Requisites
Prerequisite: CIS 116. Prerequisite or concurrent enrollment: MATH 205 or MATH 220. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CIS 209 - Computer Programming for Engineers

Credits: 3

Application of computers to engineering problems. Abstraction and problem solving; algorithms; control structures; input/output; functions; arrays and array processing.

Note
Two hours lecture, two hours lab each week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring, Summer

CIS 300 - Data and Program Structures

Credits: 3

A study of common data and program structures together with associated algorithms. Topics include interfaces, design patterns, arrays, stacks, queues, lists, trees, hash tables, recursion, binary search, and tree traversals. Experience with both use and implementation of these structures and algorithms using a modern programming language. Discussion of tradeoffs involving performance and software maintainability.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 200 and either MATH 205 or MATH 220.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 301 - Logical Foundations of Programming

Credits: 3

Logical formalisms used to model and reason about computer systems. Propositional and predicate logic, syntax, semantics, and proof theory; soundness and completeness issues. Mathematical induction. Program verification: invariants and program logics.

Repeat for Credit
N

Requisites
Prerequisite: CIS 200. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 308 - C Language Laboratory

Credits: 1

Fundamentals of programming in C.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 351 - Cyber Defense Basics

Credits: 1

Knowledge and skills needed to administer and defend computer networks and systems. Topics include the basics of computer networks, intelligence gathering, network scanning and sniffing, password security and cracking, vulnerability exploitation, distributed denial of service, logging and auditing, and wireless network security and cracking. Practice using an isolated computing network.

Note
One and a half hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

CIS 397 - Honors Seminar in Computer Science

Credits: 1-3

Honors Seminar in Computer Science

Repeat for Credit
N

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning

CIS 400 - Object-Oriented Design, Implementation, and Testing

Credits: 3

A study of concepts and techniques used to produce quality software programs. Object-oriented concepts, models, execution environments, design and testing techniques. Extensive application of these concepts and techniques to the development of non-trivial software programs.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 415 - Ethics and Conduct for Computing Professionals

Credits: 3

A study of the ethical issues raised by computing technologies and the impact on society. Exploration of how one might justify actions in regard to ethical dilemmas within the fields of technology, computer science, information security, and artificial intelligence. Other topics include an examination of terminology used, Profession Codes of Conduct for computer science professionals, ethics of software development, and ethical issues relating to privacy and intellectual property in cyberspace.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

CIS 450 - Computer Architecture and Operations

Credits: 3

Introduction to modern computer architectures: register transfer abstraction, addressing modes, basic operations (data transfer, arithmetic/logic, and control operations). Basic Operating System concepts and operations. Understanding relationships of higher-level language constructs to corresponding assembly instruction sequences generated by compilers. Introduction to interrupts and low-level I/O operations.

Repeat for Credit
N

Requisites
Prerequisite: ECE 241 and CIS 308. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 490 - Special Topics in Computer Science

Credits: 2-4

Current topics in computer science.

Repeat for Credit
Y

Requisites
Prerequisite: Varies with the announced topic.

Typically Offered
Other

CIS 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CIS 499 - Honors Research/Thesis

Credits: 2-4

Individual research problem selected with approval of faculty advisor. A report/thesis is presented orally and in writing during the last semester.

Note
Open to students in the College of Engineering honors program and to seniors in the College of Arts and Sciences honors program.

Repeat for Credit
Y

Typically Offered
Other

CIS 501 - Software Architecture and Design

Credits: 3

Principles and patterns for design and structure of software, development of object-oriented models, examples of software architecture.

Repeat for Credit
N

Requisites
Prerequisite: CIS 400. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 505 - Introduction to Programming Languages

Credits: 3

History, programming language concepts including type, scope and extent, abstraction mechanisms and control; programming paradigms, including one or more of logic, functional, and object-oriented programming, and programming languages supporting the selected paradigms; interpreters, compilers and virtual machines for the selected languages; storage management and garbage collection; type checking and type inference.

Note

Not available for credit to students with credit in CIS 705.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301, CIS 400. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 520 - Operating Systems I

Credits: 3

Operating systems concepts, services, and implementation: interrupt processing, processes, concurrency, deadlocks, resource scheduling and system structure; resource management: real and virtual storage, input/output systems, disk scheduling and file systems; design and construction of concurrent programs.

Repeat for Credit
N

Requisites
Prerequisite: CIS 450 or ECE 431; CIS 308, and CIS 400 or CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 522 - Introduction to Data Structures

Credits: 1

Introduction to basic data structures such as stacks, queues, lists, and priority queues, and algorithmic techniques for sorting, searching and hashing. Emphasis on modularity and reuse. Introduction to the concept of object-oriented design and interface specifications.

Note
Three hours recitation a week. Course meets in one contiguous block of five weeks. C, or C++ programming.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CIS 523 - Introduction to Concurrent Programming

Credits: 1

Introduction to concurrent programming techniques based on message passing primitives (send/receive) and shared memory (semaphore based P/V operations and monitor-based wait/signal operations).

Note
Three hours recitation a week. Course meets in one contiguous block of five weeks.

Repeat for Credit
N

Requisites
Prerequisite: C, or C++ programming and CIS 300 or CIS 522. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CIS 525 - Introduction to Network Programming

Credits: 3

Basic inter-process communication and network programming concepts including client-server and peer-to-peer, communication protocol use and specification, reliable and secure communication, and network applications including web technologies, electronic mail, and file transfer with a focus on application and implementation.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300 and CIS 308. Students may enroll in

CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 526 - Web Application Development

Credits: 3

Fundamental principles and best practices of web development, user interface design, web API design, advanced web interfaces, web development frameworks, single-page web applications, web standards and accessibility issues.

Note
Not available for credit to students with credit in CC 515.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501 and either CC 120, CMST 135, or equivalent experience in HTML, CSS, and JavaScript. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses. Prerequisite or concurrent: CIS 560.

Typically Offered
Spring

CIS 527 - Enterprise Systems Administration

Credits: 3

Administration of the Linux operating system, including installation, configuration, distributed file systems, firewalls and security, shell scripting, and user account management.

Note
Three hours recitation a week. Not available for credit to students with credit in CC 510.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 530 - Introduction to Artificial Intelligence

Credits: 3

Fundamental background in intelligent systems for undergraduate students. Intelligent agents, problem-solving, uninformed and informed (heuristic) search, game tree search, foundations of knowledge representation and reasoning using logic and probability, and a first introduction to planning and machine learning. AI topics include the problem areas of natural language processing (NLP) and perception and methodologies such as artificial neural networks and genetic and evolutionary computation. Applications to practical design and development of intelligent systems will be emphasized, leading to individual projects on current topics and applications in AI.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300, CIS 301 and MATH 312 or MATH 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 531 - Introduction to Programming Techniques for Data Science and Analytics

Credits: 3

Introduction to programming techniques for working with big data. Survey of programming concepts that underlie the MapReduce architecture, their implementation, and specific tools for data integration and data transformation. Basic databases and query processing in the context of real-world problems.

Repeat for Credit
N

Requisites

Prerequisite: Either CIS 200, CIS 209, or CC 210; and either STAT 225 or STAT 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 532 - Introduction to Deep Learning

Credits: 3

Foundations of deep learning, with focus on different types of modern neural network architectures (such as convolutional neural networks, recurrent neural networks, and transformers). Regularization and optimization in the context of deep learning. Frameworks and tools for building and training deep neural networks.

Note
Not available for credit to students with credit in CIS 831.

Repeat for Credit
N

Requisites
Prerequisite: CIS 530 or CIS 533

Typically Offered
Fall

CIS 533 - Introduction to Data Science Foundations

Credits: 3

Introduction to the foundations of data science and data analytics. Computer science concepts used for making discoveries in data. Data wrangling, feature engineering, classification, regression, clustering, outlier detection, societal aspects of data science, and more. Analysis of real-word data.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300 or CC 310.

Typically Offered
Fall

CIS 536 - Introduction to Computer Graphics

Credits: 3

Introduction to computer graphics for undergraduate students. Mathematical foundations (e.g., linear, affine, and projective transformations) and fundamental topics in realistic rendering: view normalization, clipping and culling, scan conversion of lines and polygons, shading and illumination, texture mapping, user interfaces, picking, and collision handling. Intermediate topics include shaders, procedural textures, particle systems, basics of animation, fractals, color theory, and ray tracing.

Note
Three (3) hours lecture a week. Not available for credit to students with credit in CIS 636.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308 and either MATH 205 or MATH 220. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 537 - Computer Vision

Credits: 3

Theory and applications of computer vision. Introduction to computer vision, introduction to image formation, binary image processing, image enhancement and ltering, computational photography, geometric transforms, image features, image recognition, video analysis, deep learning-based computer vision, convolutional neural networks, and other selective topics on computer vision.

Note
Not available for credit to students with credit in CIS 737.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301, CIS 400, and either CC 210 or an equivalent working knowledge of Python programming.

Typically Offered
Spring

CIS 544 - Advanced Software Design and Development

Credits: 3

Advanced concepts and practicum in object-oriented analysis, modeling, design, implementation, testing, and use of CASE tools; relationships among structural, static, and dynamic models; relationship among conceptual, system, and implementation models.

Note
Not available for credit to students with credit in CIS 744.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring, Summer

CIS 551 - Fundamentals of Computer and Information Security

Credits: 3

An introduction to computer and information security, including common attack techniques, application of cryptography in security, authentication and authorization, network security, enterprise network defense, web security, and analysis of design flaws that render a system vulnerable. Course projects provide hands-on experience on both the defense and offense aspects in cyberspace.

Note
Three hours recitation a week.

Not available for credit to students with credit in CIS 751.

Repeat for Credit
N

Requisites
Prerequisite: CIS 450 or CIS 520. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 553 - Fundamentals of Cryptography

Credits: 3

Introduction to the fundamentals of cryptography, including mathematical background, classical ciphers, public key encryption, block and stream ciphers, cryptographic hash functions, digital signatures, common attacks, and basic security protocols.

Note
Two hours lecture and two hours lab a week.

Not available for credit to students with credit in CIS 753.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300, MATH 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 560 - Database System Concepts

Credits: 3

Concepts, approaches, and techniques in database management. Representation of information as data, data storage techniques, foundations of logical data models, data retrieval, database design, transaction management, integrity and security.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300 and CIS 301. Prerequisite or concurrent: MATH 312 or MATH 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 561 - Introduction to Data Science in Practice

Credits: 3

The development and implementation of computer science solutions to practical data science problems in science and industry. Implementing computer programs and applying computational tools to turn real-world data into knowledge and solve real-world data science problems. Includes a substantial capstone component.

Note
Not available for credit to students with credit in CIS 861.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300 or CC 310.

Typically Offered
Spring

CIS 570 - Introduction to Formal Language Theory

Credits: 3

Formal languages, automata, regular expressions, grammars, introduction to computability theory. Reading and writing informal mathematical proofs pertaining to these topics.

Note
Not available for credit to students with credit in CIS 770.

Repeat for Credit
N

Requisites
Prerequisite: MATH 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 575 - Introduction to Algorithm Analysis

Credits: 3

An introduction to mathematical analysis of time- and space-complexity of algorithms, including worst-case, average-case, and amortized complexity. An examination of various algorithmic designs, such as greedy algorithms, divide-and-conquer algorithms, and dynamic programming algorithms. Techniques for proving correctness of algorithms.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300, CIS 301, and MATH 510.

Typically Offered
Spring

CIS 580 - Fundamentals of Game Programming

Credits: 3

Fundamental principles of programming games. Foundational game algorithms and data structures. Two-dimensional graphics and game world simulation. Development for multiple platforms. Utilization of game programming libraries. Design of multiple games incorporating topics covered.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501 and MATH 221.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

CIS 585 - Game Engine Design

Credits: 3

Current practices of game engine development. The game engine as a soft real-time multi-agent simulation. Three-dimensional graphics and animation techniques, scene management, physics simulation, event systems, resource management, and network game architectures. Design and prototyping of a general use game engine.

Repeat for Credit
N

Requisites
Prerequisite: CIS 580 and MATH 551.

Typically Offered
Spring

CIS 590 - Special Topics in Computer Science

Credits: 1-4

Selected topics in computer science.

Note
Permission of instructor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

CIS 596 - Entrepreneurial Computer Science Project

Credits: 3

Directed studies: selection, investigation and report on some topic not covered in prior courses; may include an implementation and/or experimentation component; may be done in collaboration with other students. Completion of a final report with literature review and project evaluation.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 560, ENTRP 340 and senior standing in computer science. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 598 - Computer Science Project

Credits: 3

Directed studies: selection, investigation and report on some topic not covered in prior courses; may include an implementation and/or experimentation component; may be done in collaboration with other students. Completion of a plan, two reviews, and a final report with literature review and project evaluation.

Repeat for Credit
N

Requisites
Prerequisite: CIS 560 and senior standing in computer science. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 599 - Cybersecurity Project

Credits: 3

Directed studies: selection, investigation and report on some topic not covered in prior security courses; may include an implementation and/or experimentation component; may be done in collaboration with other students. Completion of a final report with literature review and project evaluation.

Repeat for Credit
N

Requisites
Prerequisite: CIS 551 and senior standing in computer science. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

CIS 604 - Set Theory and Logic for CS

Credits: 3

Informal and axiomatic set theory, propositional and predicate logic, proof techniques.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning

CIS 621 - Real-Time Programming Fundamentals

Credits: 1

Relationship between C/C++ constructs and corresponding assembly code generated by compilers. Introduction to special techniques used to implement micro-controllers, such as initialization of programmable CPU modules/peripheral devices, techniques to link assembly and C/C++ codes, producing ROM-able code, and EPROM burning/Flash programming.

Note
Three hours recitation a week. Course meets in one contiguous block of five weeks.

Repeat for Credit
N

Requisites
Prerequisite: C or C ++ programming, and CIS 523 and either CIS 300 or CIS 522. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CIS 622 - Real-Time Operating Systems

Credits: 1

Basic real-time operating systems concepts and services; interrupt processing; process and thread models; real-time software architectures and development environments. Detailed study of design and implementation of real-time applications using real-time operating systems.

Note
Three hours recitation per week. Course meets in one contiguous block of five weeks.

Repeat for Credit
N

Requisites
Prerequisite: CIS 621. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CIS 625 - Concurrent Software Systems

Credits: 3

Architecture, design, modeling, implementation, and verification of concurrent, parallel, and distributed software; aspects such as real-time programming, parallel simulation; fault-tolerant programming; grid computing, embedded systems control.

Repeat for Credit
N

Requisites
Prerequisite: Either CIS 450 or ECE 431; and either CIS 400 or CIS 501.
Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 635 - Introduction to Computer-Based Knowledge Systems

Credits: 3

Introduction to the applications of artificial intelligence concepts to solving knowledge-dependent tasks. Review of knowledge-representation ideas. Survey of expert system design. Introduction to existing knowledge-based tools available on personal computers. Development of an intelligent system.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300. Students may enroll in CIS courses only if they have earned a grade of C or better for each

prerequisite to those courses.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CIS 636 - Introduction to Computer Graphics

Credits: 3

Devices and software for graphics display and user interaction, development of software for direct graphic manipulation applications.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CIS 640 - Software Testing Techniques

Credits: 3

Survey of software testing methodologies; evaluation of software testing strategies; experience in a variety of software testing practices.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301 and CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 641 - Software Engineering Design Project

Credits: 3

Current practices of software development, requirements, design, prototyping, measures and evaluations. Specification, design, and prototyping of a software system.

Note
Not available for credit to students with credit in CIS 642.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308 and CIS 501.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 642 - Software Engineering Project I

Credits: 3

The first semester of a two-semester capstone course. Current practices of software development, requirements, design, prototyping, measures and evaluation. Specification, design, and prototyping of a software system.

Note
Not available for credit to students with credit in CIS 641.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308 and CIS 501.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 643 - Software Engineering Project II

Credits: 3

Continuation of CIS 642. Final implementation, integration, and testing of a software system. Introduction to configuration management, project management, and software maintenance.

Repeat for Credit
N

Requisites
Prerequisite: CIS 642 (which must be taken in the preceding semester).

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 645 - Software Development Environments

Credits: 3

Survey of current development environments and/or an in-depth study of one development environment.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning

CIS 655 - Security and Reliability of Computing Systems

Credits: 3

Fundamentals of security and reliability of computing systems from both hardware and software perspectives. Topics include symmetric and asymmetric cryptography, artificial intelligence (AI) safety and security, selected topics from hardware-based security, introduction to reliability and fault tolerance, hardware fault tolerance, and software fault tolerance.

Repeat for Credit
N

Requisites
Prerequisites: CIS 450 (Computer Architecture and Operations) OR ECE 441 (Design of Digital Systems); recommended MATH 221 (Analytic Geometry and Calculus II); recommended prior or concurrent CIS 553/753 (Introduction to Cryptography). Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CIS 690 - Implementation Project

Credits: 3

The department will suggest various design or implementation projects for individuals or groups in areas such as translators, interpreters, microprogramming, minicomputer operating systems, graphics, numerical software, etc.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring, Summer

CIS 705 - Programming Languages

Credits: 3

Programming language concepts, including typing, scoping, abstraction and exceptions; programming paradigms, including one or more of logic, functional, object-oriented and concurrent programming, and programming languages supporting the selected paradigms; introduction to programming language semantics; programming language design; development environments.

Note
Not available for credit to students with credit in CIS 505.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301 and CIS 400. Students may enroll in

CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 706 - Translator Design I

Credits: 3

Compilers and interpreters, including description of languages, finite state scanners. LL(1) parsing, symbol tables, syntax-directed semantics, simple code generation. Constructing a simple compiler.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501, and CIS 505. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 720 - Advanced Operating Systems

Credits: 3

Process synchronization and communication, distributed programming primitives, transactions and concurrency control, distributed scheduling, distributed storage, deadlock, security.

Repeat for Credit
N

Requisites
Prerequisite: CIS 520. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 721 - Real-Time Systems

Credits: 3

The design of hard real-time embedded systems, including language and operating system support, scheduling, schedulability analysis, fault tolerance, and design tools.

Repeat for Credit
N

Requisites
Prerequisite: CIS 520 or both CIS 622 and ECE 633. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 722 - Operating System Practices

Credits: 3

Structure and functions of modern operating systems. Emphasis on reading and modifying the source code of a working operating system. This includes memory management, input/output, process management, file systems, and network interconnection software construction.

Repeat for Credit
N

Requisites
Prerequisite: CIS 520. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 725 - Advanced Computer Networks

Credits: 3

Network algorithms; routing and congestion control; protocol engineering; protocol decomposition, specification and verification, synthesis; protocols for high speed networks; parallel implementations, light-weight protocols.

Repeat for Credit
N

Requisites
Prerequisite: CIS 520, and CIS 525. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 726 - Advanced World Wide Web Technologies

Credits: 3

An advanced course on the technologies that make up the World Wide Web. WWW site designs and analysis, WWW software architecture, server-side technologies, dynamic executable scheduling, digital libraries, WWW security.

Repeat for Credit
N

Requisites
Prerequisite: CIS 520, CIS 525. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 730 - Principles of Artificial Intelligence

Credits: 3

Introduction to the fundamental concepts and techniques of AI: problem solving, search and planning, knowledge representation and qualitative reasoning, expert systems, natural language processing and cognitive modeling, computer vision, and machine learning.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 731 - Programming Techniques for Data Science and Analytics

Credits: 3

Intermediate programming techniques for data science. Survey of programming concepts that underlie MapReduce, Apache Hadoop, and Spark, along with related tools. NoSQL, search tools, graph databases, and visualization presented in the context of real-world problems involving data integration and transformation.

Repeat for Credit
N

Requisites
Prerequisite: Either CIS 200 or CIS 209, and either STAT 225 or STAT 510.

Typically Offered
Fall

CIS 732 - Machine Learning and Pattern Recognition

Credits: 3

Theory and methodology of inductive learning, including decision trees, artificial neural networks, probabilistic and instance-based learning, and inductive logic programming; unsupervised and reinforcement learning, bagging and boosting; genetic algorithms and genetic programming; and applications to data mining.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501

Typically Offered
Fall

CIS 733 - Data Science Foundations

Credits: 3

Methods used for making discoveries in complex data and turning data into knowledge. Handling big data and "small data", feature engineering, convolutions, classification, regression, using clustering for discovery, novelty detection, statistical inference, research design, prescriptive analytics, and more. Using standard software packages and libraries for preparing and analyzing data, implementing supervised machine learning, and visualization.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300 or CC 310. Prerequisite or concurrent: STAT 225, STAT 240, STAT 250, STAT 510, or STAT 703.

Typically Offered
Fall

CIS 734 - Introduction to Genomics and Bioinformatics

Credits: 4

A problem solving approach to understanding genomics and bioinformatics. Practical use of databases and web-based tools used to study biological problems. Introduction to the algorithms behind these tools.

Note
Three hours lecture and one-and-a-half hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Either BIOL 450 or CIS 300, and instructor permission. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring-Even Years

Cross-listed
BIOL 734

CIS 736 - Computer Graphics

Credits: 3

Topics in computer representation and display of images and graphic interaction.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 737 - Advanced Computer Vision

Credits: 3

Theory and applications of computer vision. Introduction to computer vision, introduction to image formation, binary image processing, image enhancement and ltering, computational photography, geometric transforms, image features, image recognition, video analysis, deep learning-based computer vision, convolutional neural networks, and other selective topics on computer vision.

Note
Not available for credit to students with credit in CIS 537.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301, CIS 400, and either CC 210 or an equivalent working knowledge of Python programming

Typically Offered
Spring

CIS 740 - Software Engineering

Credits: 3

Software life cycle, requirements, specifications, design, validation, measures, and maintenance.

Repeat for Credit
N

Requisites
Prerequisite: CIS 641 or CIS 642. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 744 - Advanced Software Analysis and Design

Credits: 3

Advanced concepts and practicum in object-oriented analysis, modeling, design, implementation, testing, and use of CASE tools; relationships among structural, static, and dynamic models; relationship among conceptual, system, and implementation models.

Note
Not available for credit to students with credit in CIS 544.

Repeat for Credit
N

Requisites
Prerequisite: CIS 641 or CIS 642.

Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring, Summer

CIS 746 - Software Measurement

Credits: 3

Measurement theory; development, validation and use of software measures; software measures in the life cycle, including cost estimation, design measures, software complexity and software reliability.

Repeat for Credit
N

Requisites
Prerequisite: CIS 641 or CIS 642. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 748 - Advanced Software Management

Credits: 3

Topics related to the management of software, including organization, project planning, process models, life cycle models, TQM, software quality assurance, cost estimation, configuration management.

Repeat for Credit
N

Requisites
Prerequisite: CIS 740 or CIS 744. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring, Summer

CIS 750 - Advanced Computer Architecture

Credits: 3

Fundamentals of quantitative design of computer architectures, memory hierarchy design, instruction-level parallelism, data-level parallelism, thread-level parallelism, parallel programming, parallel performance analysis, and warehouse-scale computers.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 450. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
On sufficient demand

CIS 751 - Computer and Information Security

Credits: 3

A comprehensive coverage of computer and information security. Basic cryptography, access control, authentication, authorization, network security, software security, and social aspects of security. The lectures discuss when and where things can go wrong and how design flaws in a system can be exploited to compromise security. Common attack techniques are introduced, and students have the opportunity to work on course projects that cover both the defense and offense aspects in cyberspace.

Note
Not available for credit to students with credit in CIS 551.

Repeat for Credit
N

Requisites
Prerequisite: CIS 450 or CIS 520. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 753 - Applied Cryptography

Credits: 3

Fundamentals of cryptography, including mathematical background, classical ciphers, public key encryption, block and stream ciphers, cryptographic hash functions, digital signatures, common attacks, and basic network security.

Note
Not available for credit to students with credit in CIS 553. Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300, MATH 510, or equivalent. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 755 - Systems Security

Credits: 3

In-depth coverage of advanced theoretical and practical security techniques with emphasis on construction of new systems and auditing and repair of existing security-critical systems using rigorous design, risk analysis, and engineering methods and application of state-of-art theoretical tools.

Repeat for Credit
N

Requisites
Prerequisites: CIS 551 or CIS 751. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 761 - Data Base Management Systems

Credits: 3

Data models and languages, hierarchical, network, relational systems; implementation and operational requirements; programming projects using data base management systems.

Repeat for Credit
N

Requisites
Prerequisite: CIS 560, CIS 604. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 762 - Office Automation

Credits: 3

Characteristics of information work; modeling systems for characterizing aspects of office environment; form-based systems; office automation and description languages, ergonomics, local area networks and tools used in the automation of offices.

Repeat for Credit
N

Requisites
Prerequisite: CIS 525, CIS 560. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 764 - Database Design

Credits: 3

Conceptual, logical, physical, and user interface design for database management systems.

Repeat for Credit
N

Requisites
Prerequisite: CIS 501. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
On sufficient demand

CIS 770 - Formal Language Theory

Credits: 3

Regular languages, finite automata, context-free languages, pushdown automata, context-sensitive languages, linear bounded automata, recursively enumerable languages, Turing machines.

Note
Not available for credit to students with credit in CIS 570.

Repeat for Credit
N

Requisites
Prerequisite: MATH 510. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Spring

CIS 771 - Software Specification

Credits: 3

Formal logic or specification of software components; algebraic vs. model-based specifications; common abstract types; verification of properties of specifications; introduction to specification of concurrent systems.

Repeat for Credit
N

Requisites
Prerequisite: CIS 301. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Other

CIS 775 - Analysis of Algorithms

Credits: 3

Study and application of techniques and procedures used in the analysis of algorithms including the worst and average cases of both time and space. Study of the P and NP classes.

Repeat for Credit
N

Requisites
Prerequisite: CIS 575. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

Typically Offered
Fall

CIS 798 - Topics in Computer Science

Credits: 1-18

Topics in Computer Science

Repeat for Credit
Y

Requisites
Prerequisite: Prerequisite varies with the announced topic.

Typically Offered
Other

CIS 801 - Translator Design II

Credits: 3

LR parsing, storage allocation, code generation, data flow optimization, compiler generators.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 706.

Typically Offered
On sufficient demand

CIS 806 - Semantics of Programming Languages

Credits: 3

Introduction of formal semantics description methods for programming languages; comparison of operational, denotational, algebraic, and axiomatic methods; analysis of relationship of formal semantics definitions to computer implementation.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 771.

Typically Offered
Other

CIS 810 - Logic Programming

Credits: 3

Selected topics; constraint logic programming, deductive databases, concurrent logic programming, object-oriented logic programming, mathematical theory of logic programming specification and transformation of logic programs.

Note
Knowledge of Prolog.

Repeat for Credit
Y

Typically Offered
Other

CIS 820 - Topics in Theory of Asynchronous Systems

Credits: 3

Safety and liveness properties, synchronous and asynchronous message passing systems, virtual circuit and datagram communication, process failure, concepts of composition and superimposition, temporal logic, reachability analysis, theory of concurrency control, atomic commitment, replica control.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 720.

Typically Offered
Other

CIS 825 - Topics in Distributed Systems

Credits: 3

Models of distributed computation, events and global states, failure semantics, communication abstractions, synchronization in distributed programs; distributed algorithms: election, termination and deadlock detection, broadcast programming and algorithms.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 720; or CIS 725 and permission of the instructor.

Typically Offered
Other

CIS 826 - Protocol Engineering

Credits: 3

Basic concepts of protocol design, specification languages and formal description techniques, safety and liveness properties, protocol validation, protocol synthesis, protocol translation and conformance testing.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 725.

Typically Offered
Other

CIS 830 - Current Topics in Artificial Intelligence

Credits: 3

Advanced techniques and new ideas in artificial intelligence. Includes applications and case studies of artificial intelligence in action.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 730.

Typically Offered
Other

CIS 831 - Deep Learning

Credits: 3

Foundations of deep learning, with focus on different types of modern neural network architectures (such as convolutional neural networks, recurrent neural networks, and transformers). Regularization and optimization in the context of deep learning. Frameworks and tools for building and training deep neural networks.

Repeat for Credit
N

Requisites
Prerequisite: CIS 732 or IMSE 730

Typically Offered
Fall

CIS 832 - Knowledge Representation for the Semantic Web

Credits: 3

Knowledge representation languages for data sharing and integration, in particular the W3C Semantic Web standards RDF, OWL and SPARQL; state of the art knowledge graph and knowledge graph schema modeling process; ontology design patterns; modular ontology engineering.

Repeat for Credit
N

Requisites
Prerequisite: CIS 300

Typically Offered
Fall, Spring

CIS 833 - Information Retrieval and Text Mining

Credits: 3

Theory and practice of search engines for retrieving textual information; basic and advanced topics, with emphasis on newer technologies that go beyond simple keyword search; the use of MapReduce framework to process large collections of documents.

Note
Instructor permission.

Repeat for Credit
N

Requisites
Prerequisite: CIS 732

Typically Offered
Fall

CIS 834 - Machine Learning for Bioinformatics

Credits: 3

The course will cover some of the most important machine learning algorithms (including semi-supervised and transfer learning algorithms) and their applications to bioinformatics.

Note
Instructor permission.

Repeat for Credit
N

Requisites
Prerequisite: Either CIS 732 or CIS 734

Typically Offered
Spring-Odd Years

CIS 835 - Neuro-Symbolic Artificial Intelligence: Deep Learning and Knowledge Representation

Credits: 3

State of the art in combining deep learning with symbolic artificial intelligence approaches based on the newest research publications on the topic.

Note
Instructor permission

Repeat for Credit
N

Typically Offered
Spring

CIS 836 - Knowledge Graphs

Credits: 3

State of the art in knowledge graph based data management

and applications; based on the newest research publications on the topic.

Note
Instructor permission

Repeat for Credit
N

Typically Offered
Spring

CIS 841 - Verification and Validation

Credits: 3

Practical techniques for verifying and validating software including formal verification, software testing, reliability measurement and modeling.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 771 and either or CIS 740 or CIS 744.

Typically Offered
Other

CIS 842 - Specification and Verification of Reactive Systems

Credits: 3

Review of formal specification languages; architecture of concurrent and reactive systems; specification methods including: Z, Petri nets, temporal logic, state transition models; development and evaluation of system specifications; verification structures including layered systems, serialization, and predicate automata.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 771.

Typically Offered
Other

CIS 844 - Agent-Oriented Software Engineering

Credits: 3

Analysis, design, and implementation of large, complex, distributed, and adaptive software systems using agent-oriented paradigm. Will survey various modeling languages and agent-oriented methodologies.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 730, CIS 740.

Typically Offered
Spring

CIS 855 - High Assurance Systems

Credits: 3

Techniques for developing high assurance (safety critical, security critical, or mission-critical in nature) systems. Topics include writing requirements for safety-critical systems, formal architecture definition, risk management techniques including various forms of hazard analysis, safety systems, and verification and validation.

Repeat for Credit
N

Requisites
Prerequisites: (CIS 771) Software Specification AND Java programming skills.

Typically Offered
Spring

CIS 860 - Advanced Database Systems

Credits: 3

Advanced topics in database and intelligent information systems. Possible topics include active, temporal, object-oriented, and multimedia databases, warehousing and data mining.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 761 or CIS 764.

Typically Offered
Other

CIS 861 - Data Science in Practice

Credits: 3

Application of data science paradigms, tools, and protocols to solve real-world problems within science and industry.

Note
Instructor consent.

Repeat for Credit
N

Typically Offered
Spring

CIS 864 - Data Engineering

Credits: 3

Advanced topics in database design and maintenance including performance monitoring, query optimization and tuning in centralized and distributed data systems.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 761 or CIS 764.

Typically Offered
Other

CIS 870 - Theory of Computability

Credits: 3

Formal models for computability; universal programs; Church's thesis; unsolvable problems and reducibilities; partial recursive functions; recursive and recursively enumerable sets; s-m-n theorem and the recursion theorem.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 770.

Typically Offered
Other

CIS 890 - Special Topics in Computer Science

Credits: 2-4

Topics of the current state-of-the-art of computer science.

Note
Prerequisite varies with the announced topic.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CIS 895 - MSE Project

Credits: 0-6

This course takes the student through the process of developing a project. This process typically takes more than one semester to complete. Includes reviews and walkthroughs of the requirements, design, and implementation.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 740 or CIS 744, CIS 748, CIS 771, and three additional credits toward the MSE degree.

Typically Offered
Other

CIS 897 - Seminar in Computer Science

Credits: 1

Introduction to computing as a discipline; the relationship of computing to other disciplines; the interaction of computing and ethics; the development of a written and oral research proposal.

Repeat for Credit
Y

Requisites
Prerequisite: full graduate standing in CIS (CR/NCR only).

Typically Offered
Fall, Spring, Summer

CIS 898 - Master's Report in CIS

Credits: 1-3

Master's Report in CIS

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CIS 899 - Research in Computer Science

Credits: 1-6

Research in Computer Science

Repeat for Credit
Y

Requisites
Prerequisite: CIS 897.

Typically Offered
Other

CIS 905 - Theory of Programming Languages

Credits: 3

Formal definition languages; operational and formal semantic models; equivalence of semantic models; formal properties of programming languages.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 806.

Typically Offered
Other

CIS 920 - Research Topics in Distributed Systems

Credits: 3

Topics on current state-of-the-art research in distributed systems.

Note
Permission of the instructor.

Repeat for Credit
Y

Typically Offered
Other

CIS 940 - Research Topics in Software Engineering

Credits: 3

Research on one of the topics in CIS 840.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 840.

Typically Offered
Other

CIS 960 - Theory of Data Base Systems

Credits: 3

Advanced topics in data base systems including distributed data bases, integrity, security, normalization, data base machines, performance models, query languages.

Repeat for Credit
Y

Requisites
Prerequisite: CIS 840.

Typically Offered
Other

CIS 990 - Research Topics

Credits: 2-3

Study of current topics in computer science.

Note
Permission of the instructor.

Repeat for Credit
Y

Typically Offered
Other

CIS 999 - Research in Computer Science

Credits: 1-18

Research in Computer Science

Repeat for Credit
Y

Typically Offered
Other

CLSCS 105 - Medical Terminology: Latin and Greek for Scientists

Credits: 2

This course provides students with the framework and experience required to understand and use scientific and medical terminology.

Note
No prior knowledge of either Latin or Greek is required. Course may not be applied toward the fulfillment of either language or humanities requirements for any degree.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

CLSCS 309 - Introduction to Classical Literature in Translation

Credits: 3

Introduction to the canonical works of Greek and Roman literature in translation. Discussion of classical texts in English translation with ample attention paid to material culture, visual media and classical culture.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

CLSCS 310 - Introduction to Classical Mythology in Translation

Credits: 3

Introduction to the mythology of Greece and Rome through examinations of their literature (in English) and material culture.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

CLSCS 501 - Topics in Classical Literature in Translation

Credits: 3

A detailed survey of Greek and/or Roman literature in translation.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

CLSCS 502 - Topics in Classical Studies

Credits: 3

Focuses on different aspects of ancient Greek and Roman

culture. Greek society and culture, Roman society and culture, Greco-Roman religion, and ancient ethnography are among the potential topics of this course.

Note
Lecture and discussions. All readings will be in English.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Historical Perspectives

CLSCS 549 - Special Studies in Classics

Credits: 1-5

Independent study in Classics, Latin, or Greek.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

CMST 104 - Database Management

Credits: 2

An introduction to using a database management system on a personal computer. Students begin with elementary database commands and progress to more sophisticated database applications. Students are required to complete assignments on the computer, some of which are completed outside of class.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 108 - PC Desktop Software

Credits: 3

The use and application of popular software application packages. Topics include word processors, electronic spreadsheets, database management systems, and presentation software. Students are required to complete assignments on the computer, some of which are completed outside of class.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 110 - Introduction to Visual Basic

Credits: 3

Computer programming using Visual Basic for students who are not majoring in computer systems technology or web development technology. Topics include variable and constant declarations, data types, arithmetic expressions, decision structures, repetition structures, sequential files and arrays. Emphasis on problem solving and program structure.

Repeat for Credit
N

Requisites
Corequisite: MATH 100.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 115 - Graphics Software Applications

Credits: 3

Introduction to popular graphics software application packages. Emphasis is on design concepts, color usage,

image and concept development and creative problem solving using graphics software. Students are required to complete assignments on the computer, some of which are completed outside of class.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 135 - Web Fundamentals

Credits: 3

Concepts of communications across the Internet, and the technology required to create web pages. Topics include ethical use of the web and accessibility issues for disabled visitors. In-depth coverage of web page construction and styling.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 146 - Digital Photography

Credits: 3

Introduces basic photographic techniques and computer assisted image manipulation. Topics include: basic camera functions, basic digital image processing, visualization and design skills and digital manipulation techniques needed in today's market place. Students have opportunities to create portfolio pieces.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 183 - Computer Systems Studio I

Credits: 1

Students begin a portfolio of projects that connect the topics covered in CYBR 103, CMST 135, required general education courses, and other relevant subjects.

Note
Two hours studio per week.

Repeat for Credit
N

Requisites
Corequisite: CYBR 103 and CMST 135.

Typically Offered
Fall

CMST 185 - Computer Systems Studio II

Credits: 1

Students add to their portfolios projects that connect the topics covered in CYBR 250, CYBR 247, past required CMST and general education courses, and other relevant subjects.

Note
Two hours studio per week.

Repeat for Credit
N

Requisites
Corequisite: CMST 183 and CYBR 247 and CYBR 250, or CC 210

Typically Offered
Spring

CMST 190 - Information Engineering for Data Science

Credits: 1

This course introduces the fundamentals of data science within an operationalized setting. Topics include: data modeling, data structures, data programming (using SQL), data wrangling, descriptive statistical analysis, and version control (Github).

Repeat for Credit
N

Requisites
Prerequisite: MATH 100, MLAS 100 or CYBR 103

Typically Offered
Fall

CMST 216 - Digital Media I

Credits: 3

Hands-on experience dealing with the elements and principles of digital communications working with industry standard software for photo editing, illustration and page layout. Students have the opportunity to produce portfolio pieces.

Repeat for Credit
N

Requisites
Prerequisite: CMST 115 and CMST 137.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

CMST 252 - System and Software Fundamentals

Credits: 3

An introduction to computer systems with an emphasis on systems software. Systems topics include operating systems, low-level and high-level programming languages, virtualization and an introduction to the theory of computation.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 250.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

CMST 270 - Introduction to Unix

Credits: 3

An introduction to using the Unix operating system for programming and system administration. Topics include using the Unix command line interface, file attributes, editing text files, and programming with shell script and other interpreted languages.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 102 and CYBR 247.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 283 - Computer Systems Studio III

Credits: 1

Students add to their portfolios projects that connect the topics covered in CYBR 180, CYBR 335, past required CMST and general education courses, and other relevant subjects.

Note

Two hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 185.
Corequisite: CYBR 180 and CYBR 335.

Typically Offered
Fall

CMST 285 - Web Certificate Capstone Studio

Credits: 1

Students prepare a portfolio of projects demonstrating their achievement of the student learning outcomes for the web development certificate.

Repeat for Credit
N

Requisites
Corequisite: CYBR 247

Typically Offered
Spring

CMST 290 - Scientific Programming and Machine Learning

Credits: 1

This course introduces students to the field of machine learning. Students learn the algorithms which underpin many popular machine learning techniques, as well as developing an understanding of the theoretical relationships between these algorithms. Topics include: supervised learning (regression [simple, multi, and logistic]), (classification [binary, multi, imbalanced]), and unsupervised learning (dimensionality reduction, principal components, cluster analysis).

Repeat for Credit
N

Requisites
Prerequisite: MATH 100, MLAS 100 or CYBR 103

Typically Offered
Spring

CMST 299 - Topics in Computer Systems Technology

Credits: 1-18

Provides an opportunity for faculty to present computer systems technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

CMST 302 - Applications in C Programming for Engineering Technology

Credits: 3

An introduction to structured program design and implementation using the C programming language. Topics include use of the C language in calculations, input, output, and file handling. Students design, implement, and test programs applicable to engineering technology majors.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 310 - Visual Basic Programming

Credits: 3

An in-depth study of Visual Basic as an object-oriented language for students having had previous college-level computer programming courses. Topics include advanced database manipulation, MDI programming, creation of controls, web forms, and help files. Assignments focus on large programming projects. Students design, implement,

and present a final capstone course project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 180; and CYBR 247 or equivalent.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 315 - Introduction to System Administration

Credits: 3

An in-depth study of network and server administration. Topics include network design, hardware and software selection, server and client installation, management of network services, file and network resource administration, configuration of permissions and policies, and server monitoring and tuning.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corerequisite: CMST 252.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 317 - C# Programming

Credits: 3

An in-depth study of the Microsoft C# language and its applications. C# is a development tool within the .NET framework. Students use the language to develop a wide variety of applications including stand-alone applications and those providing access to databases and Web services.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 323 - Game Programming

Credits: 3

An introduction to computer game programming. Topics include game mathematics and physics, tile-based virtual worlds, artificial intelligence,and game graphics. Students design, develop, and present a functioning computer game as a capstone course project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247 and PHYS 113.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 326 - Page Layout and Type

Credits: 3

An intermediate course dealing with typographic design concepts, color usage, image development, idea development, and creative problem solving. Addresses typographic principles, techniques and development of a personal style to create typographic designs that are technically sound and visually interesting.

Repeat for Credit
N

Requisites
Prerequisite: CMST 216.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 332 - Web Development Project

Credits: 3

Each student implements a major web site. Students apply system analysis concepts to design a working website using graphics, security, and information processing.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 335.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 333 - Computer Systems/Digital Media Portfolio Defense

Credits: 1

This course prepares students to complete, evaluate, and defend their sophomore-level portfolio. Students will have the opportunity to present a collection of project-based materials and reflective information regarding assignments that demonstrate various dimensions of web development, computer systems technology, and digital media technology.

Repeat for Credit
N

Requisites
Prerequisite: CMST 283 or CC 310
Corequisite: CMST 332

Typically Offered
Spring

CMST 336 - Digital Media Project

Credits: 3

Provides sophomores with the capstone experience of developing a professional quality project in digital media. Students learn problem solving through the design process used in digital media development.

Repeat for Credit
N

Requisites
Prerequisite: CMST 216 and sophomore standing.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

CMST 341 - C++ Programming

Credits: 3

An in-depth study of C++ as an object-oriented programming language for students having had previous college level computer programming courses. Students write Windows applications using classes, MFC, and managed and unmanaged code. Programs involve Windows interfacing, exception handling, database access, COM and the creation of DLLs. Each student individually completes a final capstone course project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 344 - Internetworking

Credits: 3

Concepts and principles of internetworking with TCP/IP. Topics include IP addressing, subnetting, transport services, internet architecture, routing strategies, and TCP/IP applications. Students implement and analyze various internet topologies and router configurations through hands-on activities.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 250.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 347 - Java Programming II

Credits: 3

An in-depth study of Java as a web programming language. Topics include exception handling, file I/O, advanced programming techniques and data structures, Java applets, multithreaded programming, client/server communication, and database and web connectivity. Students design, implement, and present a final capstone course project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 350 - Unix Administration

Credits: 3

The essentials of administering the Unix operating system. Topics include Unix installation and loading, an in-depth look at its file system, software installation, user configuration, handling security, modems, networking, and configuration of network services.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 250 and CMST 270.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 355 - Network Programming

Credits: 3

Concepts and techniques of developing computer programs that communicate over a network using the TCP/IP and UDP/IP protocols. The course examines the use of sockets to communicate between a client and a server focusing on application-layer protocols commonly used on the Internet. Application layer topics and protocols studied include DNS, web (HTTP, HTML, and XML), electronic mail (SMTP, MIME, POP, and IMAP) and secure communication (SSL and TLS). Asynchronous and multithreaded programming technologies are studied as client and server applications are developed.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247 and CYBR 250.

Typically Offered
Summer

K-State 8
Empirical and Quantitative Reasoning

CMST 356 - Motion Graphics Technology

Credits: 3

A continuation of previous digital media courses. Includes an exploration of the various tools and processes associated with creating digital video, animation, and motion graphics. Students the the opportunity to produce portfolio pieces.

Repeat for Credit
N

Requisites
Prerequisite: CMST 336.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

CMST 370 - Applied Data Structures

Credits: 3

A systematic study of data structures and algorithms organized around the unifying concept of data abstraction. Topics include abstract data types, stacks, queues, linked lists, trees, hash tables, heaps, sorting, and searching. The implementations of these data types using object-based constructs are studied and compared with respect to algorithms running times.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 383 - Programming and Data Structures Studio

Credits: 3-6

Students complete projects that tie together topics related to large application programming. Content topics include tools and methodologies for large program development, testing strategies, data structures and other relevant subjects.

Note
Nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 333 and MATH 100.

Typically Offered
Fall

CMST 385 - Systems and Database Administration Studio

Credits: 3-6

Students complete projects that tie together topics related to systems and database administration. Content topics include advanced database, network infrastructure, security, multi-platform support, systems integration and other relevant subjects.

Note
Nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 383.

Typically Offered
Spring

CMST 420 - Advanced Database Systems

Credits: 3

An in-depth study of the theoretical foundations of database design, implementation, and management as well as social and ethical issues associated with database design. Topics include the enhanced E-R model, object-oriented model, distributed databases, advanced SQL, security, data warehousing and mining. Students design, implement, and present a capstone course project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 180 and level 2 programming language elective.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 445 - Network Security

Credits: 3

An in-depth study of the information and skills needed to

design, install, configure, secure, and administer the interface between a LAN and the Internet. Emphasis is on designing and implementing secure systems communicating within a TCP/IP environment.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 315 or 350.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CMST 470 - Applied Algorithm Design

Credits: 3

Techniques of algorithm design including greedy, divide and conquer, dynamic programming, backtracking and branch-and-bound. Covers algorithmic solutions to problems from a variety of application areas including games, graphs and encryption. Emphasis is on programming assignments that enable students to develop their problem solving and algorithm design skills.

Repeat for Credit
N

Requisites
Prerequisite: CMST 370 and level 2 programming language elective.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CMST 483 - Emerging Technologies Studio

Credits: 3-6

Students practice life-long learning and research methods by completing projects that combine previously learned material with newly emerging technologies that the students must research and analyze.

Note
Nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Fall

CMST 485 - Computer Systems Senior Capstone Project

Credits: 6

A sequel to CYBR 460 in which students work individually or in teams to develop a significant project in their area of interest. Students are expected to apply the software engineering methodologies from CYBR 460, write project documentation, and make verbal presentations. Whenever feasible, real-world projects are solicited from local businesses.

Note
Nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 460.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

CMST 499 - Advanced Topics in Computer Systems Technology

Credits: 1-18

Provides an opportunity for faculty to present advanced computer systems technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

CNRES 300 - Introduction to Conflict Resolution

Credits: 3

This course is a survey of conflict resolution strategies that will provide students with the knowledge and applicable skills to be better classmates, friends, and co-workers in their future careers. It is applicable for a wide array of majors and disciplines. Emphasis will be given equally to foundational concepts of how to manage conflict more effectively, as well as in-class exercises that allow students to practice these new skills.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences
Ethical Reasoning and Responsibility

CNRES 500 - Topics in Conflict Resolution and Trauma Studies

Credits: 1-3

Independent study on topics in conflict resolution and trauma studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CNRES 528 - Alternative Dispute Resolution Approaches

Credits: 3

Through a practice-based approach, this course presents conflict resolution skills, models and procedures. Alternative dispute resolution approaches include mediation, negotiation, and facilitation. Completion of course will meet the Kansas Office of Dispute Resolution's training requirements for approval in core mediation as outlined in the Dispute Resolution Act, K.S.A. 5-509 and Rule 911.

Note
Intended for Undergraduate students sophomore or above

Repeat for Credit
N

Typically Offered
Fall

CNRES 529 - Trauma and Traumatic Stress

Credits: 3

This course will introduce and review the theoretical and historical beginnings of the concept of trauma, which includes the inclusion of post-traumatic stress disorder (PTSD) as a diagnosis in the DSM III. It will highlight the other forms of recognized traumatic events and stressors that have more recently been brought to light. It will discuss various trauma reactions, effects of stressful events, as well as the treatment of trauma. Resilience and transcendence of trauma will be outlined, with an emphasis on the importance of self-care for clinicians and helping professional working in this area.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

CNRES 530 - Coping with Life Crises

Credits: 3

The purpose of this course is to provide students with resources related to managing stress and coping with crises across the lifespan that can be utilized in both their own lives and in the lives of those families they serve. Students will be introduced to the biopsychosocial nature of stress; methods of coping with stress, anxiety, and conflict; models of effective family functioning in the presence of stress and crises; and the current literature on how families cope with a variety of life transitions and crises.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Social Sciences

CNRES 531 - Interpersonal Conflict Resolution

Credits: 3

This course focuses on a set of interpersonal conflict resolution skills and strategies to help manage and resolve disputes. It is designed to help individuals deal with differences and address conflict on a personal level.

Note
Intended for undergraduates at the sophomore or above level.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CNRES 532 - Conflict Resolution across Cultures & Contexts

Credits: 3

The course explores the cultural components of conflict by examining the dynamics of interpersonal beliefs and socialization, cross cultural conflict theory, and issues related to application in a variety of settings. This course is designed to be an exercise in critical thinking, cultural exploration, and self-reflection.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

CNRES 533 - Prevention & Intervention of Violence

Credits: 3

This course includes an introduction to a range of violence intervention and prevention approaches developed for use as the interpersonal, intergroup, and societal level. Various theories of human aggression and violence and their underlying assumptions about human nature and the causes of violence will be examined.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CNRES 534 - Conflict in Organizations

Credits: 3

This course focuses on the causes and sources of conflict within organizations and groups, dispute systems assessment and design, and how conflict resolution professionals work as interveners and agents of change. Students will also explore and identify their own professional consultation strengths and interests.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

CNRES 535 - Divorce and Child Custody Mediation

Credits: 3

This course focuses on mediation as an approach for

couples wishing to create divorce settlements through a cooperative, confidential, and private process. Divorce and child-custody is considered as a family problem and not a legal problem. It addresses the psychological, financial, and legal dimensions of divorce in conflict resolution settings.

Repeat for Credit
N

Requisites
Prerequisite: CNRES 528

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CNRES 536 - Conflict and Trauma in International Settings

Credits: 3

This course study will examine the historical, political, and religious roots of conflict in an international setting. The focus of study will also include an analysis of the area's cultural traditions and exploration into the ways in which divided societies cope with attendant political, economic, and social problems. Prospects for continued and sustainable peace in this region, as well as how progress is being made will also be examined.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

CNRES 537 - Elder and Family Decision Making

Credits: 3

This course focuses on the specialized skills and techniques for successfully facilitating adult family conversations around issues such as living arrangements, caregiving, driving, medical decisions, family communication, financial planning, inheritance/personal property distribution, trusts and estates.

Repeat for Credit
N

Typically Offered
Intersession

CNRES 538 - Advanced Trauma and Traumatic Stress

Credits: 3

This course will examine a broad range of traumatic experiences and their associated biopsychosocial outcomes. A variety of topics including military trauma, childhood abuse, sexual assault, intimate partner violence, human trafficking, natural disasters, and terrorism, among others, will be addressed. We will also discuss various mental, emotional, and interpersonal reactions to traumatic life events, as well as traditional and alternative treatment approaches for trauma-related diagnoses. Factors that contribute to posttraumatic growth will be highlighted, with an emphasis on examining effective community-based resources for the successful treatment of traumatic stress.

Repeat for Credit
N

Requisites
Prerequisite: CNRES 529.

Typically Offered
Intersession

CNRES 539 - Grief and Loss Across the Lifespan

Credits: 3

This course offers an introduction to theories of grief and loss as well as an overview of how loss affects individuals and families according to their developmental stages. Theoretical bases of study would include both individual and family-based models. Another component covers coping and treatment approaches, with a special emphasis on working with families coping with grief in the professional sphere.

Repeat for Credit
N

Typically Offered
Intersession

CNRES 599 - Conflict Resolution Practicum

Credits: 3

Co-mediation training with Kansas state-approved mediators. Training consists of supervised mentoring and practice in conflict resolution.

Repeat for Credit
Y

Requisites
Prerequisites: CNRES 531 and CNRES 535.

Typically Offered
Fall, Spring, Summer

CNRES 700 - Topics in Conflict Resolution and Trauma Studies

Credits: 0-3

Independent study on topics in conflict resolution and trauma studies.

Repeat for Credit
Y

Requisites
Prerequisite: CNRES 751

Typically Offered
Fall, Spring, Summer

CNRES 750 - Crises Across the Lifespan

Credits: 3

The purpose of this course is to provide students with resources related to managing stress and coping with crises across the lifespan that can be utilized in both their own lives and the lives of those families they serve. Students will be introduced to the biopsychosocial nature of stress; methods of coping with stress, anxiety, and conflict; models of effective family functioning in the presence of stress and crises; and the current literature on how families cope with a variety of life transitions and crises.

Repeat for Credit
N

Typically Offered
Summer

CNRES 751 - Interpersonal Conflict Skills and Strategies

Credits: 3

This course presents communication theories and interpersonal skills relevant to conflict resolution, including the understanding of, analysis of, and management of conflict.

Note
Intended for Graduate Students

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CNRES 752 - Culture and Conflict

Credits: 3

This course is an exercise in critical thinking, cultural exploration, and self-reflection. It explores the cultural dimensions of conflict, including the role of culture in defining conflict for individuals and groups. The dynamics of interpersonal beliefs and socialization, cross cultural conflict theory, and issues related to application are also examined.

Repeat for Credit
N

Typically Offered
Fall

CNRES 753 - Violence Prevention and Intervention

Credits: 3

This course examines various theories of human aggression and violence, exploring their underlying assumptions about human nature, and the causes of violence. Included is an introduction to a range of violence intervention and prevention approaches developed for use at the interpersonal, intergroup, and societal level.

Repeat for Credit
N

Typically Offered
Spring

CNRES 754 - Organizational Conflict

Credits: 3

This course provides an overview of the theories, methods, and practice issues involved in identifying and assessing sources of conflict. Students will learn about organizations, organizational development, causes and sources of conflict within organizations, dispute systems design, and how conflict resolution professionals work as interveners and agents of change.

Repeat for Credit
N

Typically Offered
Spring

CNRES 755 - Family Mediation

Credits: 3

This course addresses the multidimensional aspects of divorce, including the legal divorce, the psychological divorce, and children of divorce. The second half of the semester focuses on how mediation can empower families - teens and parents - resolve their interpersonal conflicts using a neutral third party.

Repeat for Credit
N

Requisites
Prerequisite: CNRES 758

Typically Offered
Spring

CNRES 757 - Elder and Family Decision Making

Credits: 3

This course focuses on the specialized skills and techniques for successfully facilitating adult family conversations and around issues such as living arrangements, caregiving, driving, medical decisions, family communication, financial planning, inheritance/personal property distribution, trusts and estates.

Repeat for Credit
N

Typically Offered
Intersession

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

CNRES 758 - Applied Alternative Dispute Resolution

Credits: 3

This course presents conflict resolution skills, models and procedures in a practice-based approach. Alternative dispute resolution approaches include mediation, negotiation, and facilitation. Completion of course will meet the Kansas Office of Dispute Resolution's training requirements for approval in core mediation as outlined in the Dispute Resolution Act, K.S.A. 5-509 and Rule 911.

Note
Intended for Graduate students

Repeat for Credit
N

Typically Offered
Fall

CNRES 759 - Foundations of Trauma and Traumatic Stress

Credits: 3

This course will introduce and review the theoretical and historical beginnings of the concept of trauma, which includes the inclusion of post traumatic stress disorder (PTSD) as a diagnosis in the DSM III. It will highlight the other forms of recognized traumatic events and stressors that have more recently been brought to light. It will discuss various trauma reactions, effects of stressful events, as well as the treatment of trauma. Resilience and transcendence of trauma will be outlined, with an emphasis on the importance of self-care for clinicians and helping professionals working in this area.

Repeat for Credit
N

Typically Offered
Fall

CNRES 761 - International Conflict & Trauma

Credits: 3

This course study will examine the historical, political, and religious routs of conflict in an international setting. The focus of study will also include an analysis of the area's cultural traditions and exploration into the ways in which divided societies cope with the attendant political, economic and social problems. Prospects for continued and sustainable peace in the region, as well as how progress is being made will also be examined.

Repeat for Credit
N

Typically Offered
Spring

CNRES 799 - Practicum in Conflict Resolution

Credits: 3

Co-mediation training with Kansas state-approved mediators. Training consists of supervised mentoring and practice in conflict resolution.

Repeat for Credit
Y

Requisites
Prerequisite: CNRES 751 and CNRES 755

Typically Offered
Other

CNS 010 - CNS New Student 1st Year Workshop 1

Credits: 0

Familiarize entering Construction Science and Engineering students with the nature of the architectural, engineering, and construction industry with an emphasis on terminology and professionalism. Information related to Construction Science and Management, department policies, student organizations, department faculty, and career opportunities will be introduced.

Note
One hour recitation per month

Repeat for Credit
N

Typically Offered
Fall

CNS 012 - CNS New Student 1st Year Workshop 2

Credits: 0

Continued familiarization with the architectural, engineering, and construction industry with a stronger emphasis on terminology and professionalism. Additional Information related to Construction Science and Management, department policies, student organizations, department faculty, and career opportunities will be presented.

Note
One hour recitation per month

Repeat for Credit
N

Typically Offered
Spring

CNS 016 - Construction Seminar

Credits: 0

Presentation of professional problems and practices by students, faculty, contractors, architects, and various organizations associated with the building industry.

Note
One hour lecture a month.

Repeat for Credit
Y

Typically Offered
Spring

CNS 100 - Construction Science and Management Orientation

Credits: 2

Introduction to construction science and management. Promotion of interaction and connection with the department as well as a network of academic and professional networks through the use of learning communities. Familiarize entering students with the nature of the architectural, engineering, and construction industry with an emphasis on terminology and professionalism.

Note
Two hours lecture a week.

Required for all new students during their first year in the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

CNS 110 - History of Building and Construction

Credits: 3

An introduction to the art and science of building. Historical review from ancient to contemporary including related construction methods, equipment, and systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

CNS 200 - Computer Applications in Engineering and Construction

Credits: 2

Fundamental applications of computer programming and software using engineering and construction problems, primarily advanced use of spreadsheets with macros, data tables, embedded graphics, and presentations.

Note
Four hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite or Concurrent DEN 160: Prerequisite Sophomore standing and MATH 150, or equivalent course in trigonometry. Construction Science and Management majors only.

Typically Offered
Fall, Spring

CNS 210 - Graphic Communication I

Credits: 1

Introduction to graphic communication and methods using orthographic projections, isometrics, and perspective drawings and sketches and their application to the engineering, design, and construction industry.

Note
Two hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CNS 220. Prerequisite or Concurrent: DEN 160. Department Majors Only.

Typically Offered
Fall, Spring

CNS 220 - Construction Materials

Credits: 2

Study and analysis of construction materials, their properties, selection, and use.

Note

One hour Lecture and one hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or Concurrent: MATH 150 or MATH 220. Prerequisite or Concurrent (DEN 160 and ARE 010) or (DEN 160 and CNS 010) or (DEN 160 and ARE 012) or (DEN 160 and CNS 012).

Typically Offered
Fall, Spring

CNS 231 - Statics A

Credits: 3

Composition and resolution of forces; equilibrium of force systems; application of the principles of statics to problems, including force analyses of simple structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 150 or equivalent, PHYS 113.

Typically Offered
Fall, Spring

CNS 241 - Strength of Materials and Analysis

Credits: 3

Study of behavior of materials subjected to tension, compression, shear, and bending; analysis of beams and columns.

Repeat for Credit
N

Requisites
Prerequisite: CNS 231.

Typically Offered
Fall, Spring

CNS 242 - Strength of Materials Lab

Credits: 1

Tests to determine the physical properties of various structural materials. Analysis and interpretation of test data.

Repeat for Credit
N

Requisites
Prerequisite or Concurrent enrollment: CNS 241

Typically Offered
Fall, Spring

CNS 310 - Introduction to Building Information Modeling

Credits: 2

Introduction and application of building information modeling as a technology tool related to the management of the building process for projects in the engineering and construction industry.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisites: CNS 200, CNS 321.

Typically Offered
Fall, Spring

CNS 321 - Graphic Communications II

Credits: 3

Study of construction methods and procedures in the assembly of building materials.

Note
One hour recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 210, 220. Prerequisite or Concurrent: ARE 010 and ARE 012 OR CNS 010 AND CNS 012. Departmental Majors Only.

Typically Offered
Fall, Spring

CNS 325 - Construction Documents

Credits: 3

A study of reading, understanding, and analysis of documents used in construction: building codes, accessibility standards, specifications, drawings, shop drawing submittals and other related documents.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321.

Typically Offered
Fall, Spring

CNS 330 - Site Construction

Credits: 3

Study of site construction problems and procedures, site survey and investigations, review of site plans, construction layouts, earthwork calculation, excavation/shoring methods, computer applications.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 212, CNS 200, CNS 210, CNS 220, ENGL 200, and PHYS 113. Construction Science and Management Majors only.

Typically Offered
Fall, Spring

CNS 440 - Construction Methods and Equipment

Credits: 3

Operations, costs, productivity of construction equipment. Investments/life cycle costing of the equipment. Equipment selection criteria and analysis. Construction methods.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321, CNS 330, COMM 106, ACCTG 231, and prerequisite or concurrent CNS 241.

Typically Offered
Fall, Spring

CNS 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CNS 499 - Honors Research in Construction Science

Credits: 1-18

Individual research problem selected with approval of faculty advisor. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CNS 510 - Technology for Management of the Construction Process

Credits: 2

Fundamentals and application of computer aided

technology in the management of the construction process.

Note
One hour recitation and one hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 310, CNS 641, and CNS 645.

Typically Offered
Fall, Spring

CNS 524 - Steel and Timber Construction

Credits: 3

Principles of design, fabrication, and erection of structural steel and timber structures in conformance with codes.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 241.

Typically Offered
Fall, Spring

CNS 528 - Concrete and Masonry Construction

Credits: 3

Principles of design, fabrication, and erection of concrete and masonry structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 241.

Typically Offered
Fall, Spring

CNS 534 - Heating and Air Conditioning

Credits: 3

Principles of designing, applying, and installing heating and air conditioning systems for buildings.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321.

Typically Offered
Fall, Spring

CNS 535 - Electrical and Lighting

Credits: 3

Basic design and construction of building electrical, lighting, and distribution systems with emphasis on the National Electrical Code and installation.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321.

Typically Offered
Fall, Spring

CNS 536 - Water Supply and Plumbing

Credits: 3

Principles and practices of the design and layout of plumbing and fire protection, and individual waste treatment systems for buildings including code requirements and estimating.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 321.

Typically Offered
Fall, Spring

CNS 542 - Ethics and Professional Standards

Credits: 1

An application of the concepts of ethics as applied to the professional standards of the design and construction industry.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or Concurrent: CNS 440.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

CNS 544 - Problems in Construction Science

Credits: 1-18

A study of specific design problems under the direct supervision of a member of the construction science faculty.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring, Summer

CNS 545 - Heavy Construction Methods

Credits: 3

Principles of asphalt, asphalt and concrete paving operations, concrete batch plant operations, heavy construction equipment and applications.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 325, CNS 440.

Typically Offered
Fall

CNS 550 - Construction Safety

Credits: 2

Introduction to safety and safety programs, workers' compensation, OSHA organization and structure, safety policies and record keeping, safety standards. Emphasis will be on communication and job-site safety management. On-site safety inspections will be required within class presentation and written reports to be submitted.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CNS 535 and CNS 440.

Typically Offered
Spring

CNS 610 - Pre-Engineered Metal Buildings

Credits: 2

Pre-engineered metal building systems: history, components, erection procedures and sequencing, delivery considerations, quality control, safety, and quantity surveying and plan reading.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Professional program standing in construction science and management or graduate student in architectural engineering.

Typically Offered
On sufficient demand

CNS 628 - Precast and Prestressed Concrete Construction Management

Credits: 3

Basics of concrete, principles of precast and prestressed concrete, construction operations of transportation and commercial projects, plant manufacturing, site erection, and safety procedures, and business management of a precast manufacturing plant.

Repeat for Credit
N

Requisites
Prerequisite: CNS 241 Strength of Materials and CNS 440 Construction Methods and Equipment

Typically Offered
Fall

CNS 629 - Tilt-up Concrete Structures in Construction Management

Credits: 2

Basics of concrete, principles of tilt-up concrete, construction operations of tilt-up projects, planning procedures for job site erection, and safety procedures.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 220.

Typically Offered
On sufficient demand

CNS 634 - Building Systems Commissioning

Credits: 2

Principles and methods of proper procedures for installing, commissioning and maintaining efficient performance of building envelope and support systems including mechanical and electrical systems.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Either CNS 534, CNS 535, and CNS 536 or ARE 561 and ARE 562.

Typically Offered
On Sufficient Demand

CNS 641 - Construction Estimating

Credits: 3

Understanding estimating procedures, quantity surveying, specification reviews, pricing of an estimate, market analysis, subcontractor and supplier solicitation, and risk management, following the CSI format.

Note
Nine hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 325 and CNS 440.
Concurrent enrollment: CNS 645.
Prerequisite or concurrent enrollment: CNS 642.

Typically Offered
Fall, Spring

CNS 642 - Construction Management

Credits: 3

An introduction to the business of construction; study of legal considerations, contract documents, bonds and insurance. Evaluation of the characteristics of the construction firm, organization structure, and financial performance.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 440.

Typically Offered
Fall, Spring

CNS 643 - Preconstruction Services/Design Build

Credits: 3

Application of Value Engineering to the construction process, Conceptual Estimating, Onscreen take-off quantity surveying, Design-Build. Other project delivery types and their impact on the preconstruction efforts including general contractor pricing, fees, contingencies, risk, and schedule impacts.

Note
3 hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 641, CNS 642, and CNS 645.

Typically Offered
Fall, Spring

CNS 644 - Topics in Construction Management

Credits: 1-18

Topical material of importance in the management of construction such as marketing, ethics, personnel management, etc.

Repeat for Credit
Y

Requisites
Prerequisite or concurrent enrollment: CNS 642.

Typically Offered
Fall, Spring

CNS 645 - Construction Scheduling and Cost Control

Credits: 3

Construction cost reporting and control. Construction planning, both long-term and short-interval, construction scheduling, monitoring, and controlling. Computer application.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 440 and concurrent enrollment in CNS 641.

Typically Offered
Fall, Spring

CNS 646 - Construction Financial Management

Credits: 2

Principles and applications of financial management for the construction professional. Includes financial statements, cost control, cash flow, and risk management.

Note
Two hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 641, CNS 642, and CNS 645.

Typically Offered
Fall, Spring

CNS 655 - Current Trends in Construction

Credits: 2

Broad overview of relevant topics in the construction industry in the areas of project management, field supervision, estimating, contracting, and various other special topics, taught by industry professionals who specialize in their area of expertise.

Repeat for Credit
N

Requisites
Prerequisite: CNS 641.
Prerequisite or concurrent CNS 550.

Typically Offered
Fall, Spring

CNS 660 - Construction Operations

Credits: 3

Shop drawing and submittal processes, field and office practices, change orders, construction safety standards and practice, pre-construction planning, expediting, short-interval planning.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 542, CNS 641, CNS 642, and CNS 645.
Prerequisite or concurrent enrollment: CNS, 510, CNS 550.

Typically Offered
Fall, Spring

CNS 738 - Mechanical and Electrical Estimating

Credits: 2

Principles and practices of mechanical and electrical building systems estimating. Procedure for evaluating relative costs of different plumbing, HVAC, and electrical/lighting systems.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CNS 534 or ARE 562, CNS 536 or ARE 561, and prerequisite or concurrent enrollment: CNS 535.

Typically Offered
Fall, Spring

COMM 105 - Public Speaking IA

Credits: 2

Alternate to COMM 106. Principles and practice of message preparation, audience analysis, presentational skills, and speech criticism.

Note
Primarily granted for students whose curricula require a 2-credit hour course. Credit not granted for both COMM 105 and 106.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

COMM 106 - Public Speaking I

Credits: 3

Principles and practice of message preparation, audience analysis, presentational skills, and speech criticism permitting greater practice in oral presentation.

Note
Credit not granted for both COMM 105 and 106.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
2 Communication

COMM 109 - Public Speaking 1A, Honors

Credits: 3

Honors speech preparation and delivery; a survey of topics basic to rhetoric, communication, and linguistics.

Note
For arts and sciences honors students.

Repeat for Credit

N

Typically Offered
Fall, Spring

K-State Core
2 Communication

COMM 120 - Introduction to Human Communication

Credits: 3

An introduction to the traditions, foundations and contexts of human communication that are studied and practiced in society.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

COMM 130 - Interpersonal Communication

Credits: 3

Examination of the dynamics of face-to-face interpersonal interaction. Focus is on applying principles of relational communication.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

COMM 210 - Forensics, Debate, or Mock Trial Participation

Credits: 0-1

Semester-long participation in K-State Debate, K-State Speech, or K-State Mock Trial.

Note
Consent of director of the activity

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

COMM 260 - Introduction to Trial Advocacy

Credits: 3

A hands-on introduction to communication in the legal process, with a primary focus on basic techniques attorneys use to develop and present a persuasive case.

Repeat for Credit
N

Requisites
Prerequisite: Instructor permission.

Typically Offered
Spring-Even Years

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

COMM 311 - Business and Professional Speaking

Credits: 3

Principles and practice of speaking in an organizational setting. Areas of emphasis will be oral reports, interviewing, interpersonal communication, and working in groups.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

COMM 320 - Theories of Human Communication

Credits: 3

Survey of basic theories of human communication focusing on sending, receiving, and responding to messages face-to-face.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

COMM 321 - Advanced Public Speaking

Credits: 3

Advanced principles and practices of speech composition, audience adaptation, and delivery.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106 or COMM 109.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

COMM 323 - Nonverbal Communication

Credits: 3

Analysis of nonverbal communication in human interaction; theory and research in kinesics, proxemics, and paralinguistics.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

COMM 325 - Argumentation and Debate

Credits: 3

Basic theories of argumentation with emphasis on the construction and criticism of well reasoned and supported positions.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

COMM 326 - Group Communication

Credits: 3

Builds conceptual knowledge and practical skills in group communication, enabling students to be more effective group members, leaders, and organizers.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105, COMM 106 or COMM 109

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

COMM 328 - Professional Interviewing

Credits: 3

Investigation of interviewing as it occurs in a variety of situations, including journalistic, diagnostic, persuasive, and managerial. Emphasis on developing practical skills in planning, managing interviews, and interpreting data in the professional context.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

COMM 330 - Rhetoric in Civic Life

Credits: 3

Introduction of rhetorical theory and application of rhetorical concepts to personal experiences of and participation in civic life.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

COMM 332 - Communication and Technology

Credits: 3

Focus on social and interpersonal topics, including how emerging media technologies are understood and the history of forms of communication technology via the Internet and mobile devices. Additional topics include diversity, political and civic engagement, intercultural communication, impression formation and management in online contexts, and relational maintenance.

Repeat for Credit
N

Typically Offered
Fall, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

COMM 399 - Honors Seminar Small Group Communication

Credits: 3

Open only to qualified students in the arts and sciences honors program.

Repeat for Credit
Y

Typically Offered
Spring

COMM 419 - Intercollegiate Forensics, Debate, or Mock Trial

Credits: 3

Current practices, theories, and involvement for competitive intercollegiate forensics, debate, or mock trial activity.

Note
May not be taken concurrent with COMM 210.

Repeat for Credit
N

Requisites
Prerequisite: Consent of director of the activity, and 3 credit hours of COMM 210, and junior/senior status.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

COMM 420 - Gender Communication

Credits: 3

A study of gender as a variable in interpersonal, organizational, and public communication processes.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

COMM 425 - Organizational Communication

Credits: 3

A survey of processes, practices, and theories of organizing and organizational communication to build conceptual knowledge and practical skill in communicating effectively in organizational contexts.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Social Sciences

COMM 426 - Coaching and Directing Speech Activities

Credits: 3

Current practices in coaching curricular and extra-curricular speech activities with practical experience in the problems and procedures of directing a forensic program.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of general communication or theatre courses that are 200 level or above, COMM 325, and THTRE 263.

Typically Offered
Fall

COMM 430 - Freedom of Speech

Credits: 3

A study of communication and legal principles pertaining to freedom of expression, and an examination of their implications for competing interests such as public order, national security, morality, civil rights, and fairness.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

COMM 431 - Criticism of Public Discourse

Credits: 3

An examination of public influence based on study of historical and contemporary models of rhetorical criticism. The students' critical experiences will focus on a broad array of public discourse including political, social, and cultural messages.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

COMM 432 - The Rhetoric of the American Presidency

Credits: 3

An examination of the American presidency from a rhetorical perspective, emphasizing the symbolic resources and duties of the office and those who hold it. Special attention paid to the public discourse of recent presidents during moments of national crisis.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

COMM 433 - Communication Research Methods

Credits: 3

This course provides an overview of the concepts, methods, and tools by which communication research is designed and conducted. Methods covered in this course include: focus groups, surveys, experiments, and content analysis. By the end of this term, students should be able to critically consume communication research, understand the process of using social science to solve communication problems, and have experience in conducting your own research project.

Note
In this course you will work both individually and as part of in-class teams.

Repeat for Credit
N

Typically Offered
Spring

COMM 434 - Rhetoric and Social Movements

Credits: 3

A study of the scope and functions of persuasive communication in contemporary social movements.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

COMM 435 - Political Communication

Credits: 3

A study of political discourse. Attention is directed to theory that encompasses political discourse as it affects political behavior.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Historical Perspectives
Social Sciences

COMM 440 - Collaborative Communication and Event Planning

Credits: 3

Study of the role communication plays in collaborative interactions, including program/conference/event planning and civic commemorations. Application of organizational communication theory through planning, analysis, deconstruction, and critique of various collaborative events.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

COMM 442 - Theories of Human Communication Networks

Credits: 3

Examines fundamental social network theories and concepts to understand how human communication networks and relational connections shape, constitute, and influence everyday life in organizational, political, relational, and civic contexts.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

COMM 450 - Special Studies in Human Discourse

Credits: 3

A study of selected subjects in the analysis in human communication.

Repeat for Credit
Y

Typically Offered
Fall, Spring

COMM 460 - Advanced Trial Advocacy

Credits: 3

Advanced study in theory and techniques of courtroom persuasion, emphasizing the complexities of case analysis, courtroom procedures, theme development, and the use of evidence.

Repeat for Credit
N

Requisites
Prerequisite: COMM 260 and/or instructor permission.

Typically Offered
Fall-Even Years

K-State 8
Aesthetic Interpretation

COMM 465 - Communication and Conflict

Credits: 3

Theoretical and applied research in communication and conflictual situations.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Ethical Reasoning and Responsibility

COMM 470 - Building Social and Cultural Connections

Credits: 3

Examines beliefs, worldviews, and communication practices related to identity, diversity, and the building of communities of belonging. Develops skills in communicating beliefs and worldviews; listening; engaging with different perspectives; and using communication processes and platforms to build inclusive and equitable communities.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

COMM 475 - Legal Communication

Credits: 3

An examination of the vital role communication plays in the practice of law, with an emphasis on communication in the courtroom.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106, and instructor permission.

Typically Offered
Fall-Odd Years

K-State 8
Aesthetic Interpretation
Social Sciences

COMM 480 - Intercultural Communication

Credits: 3

A study of the relationship between language and culture and its impact on human communication. Examines how language and culture differ among people and how differences are handled through the process of communication.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

COMM 499 - Honors Project

Credits: 3

Honors Project

Note
Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

COMM 525 - Argumentation Theory

Credits: 3

An advanced study of prominent argumentation theorists, with an in-depth examination of special topics concerning the philosophy, theory, and practice of argumentation.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

COMM 526 - Persuasion

Credits: 3

The study of communication as persuasion; examination of contemporary approaches to persuasion.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences

COMM 535 - Communication and Leadership

Credits: 3

A study of the ways in which leadership in differing contexts is defined and exercised through communication. Constructs examined include: credibility, charisma, vision, power, myth, and public memory.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

COMM 537 - Negotiation and Communication

Credits: 3

Develops conceptual knowledge and skill in negotiation in multiple contexts and examines the constitutive nature of communication in the negotiation process.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

COMM 542 - Relational Communication

Credits: 3

A survey of theories and research on the role of communication in social and personal relationships. Emphasis is on observing and evaluating communication behaviors using real-life media examples.

Repeat for Credit
N

Requisites
Prerequisite: COMM 311, COMM 320, COMM 130, COMM 323, COMM 326, COMM 328, or COMM 480.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Social Sciences

COMM 545 - Communication in Democracy

Credits: 3

Examines the ways in which communication shapes democratic citizenship and participation in the public sphere. Builds communication skills that promote democratic citizenship and participation.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

COMM 550 - Senior Colloquium

Credits: 3

A demonstration of the mastery of vocabulary, theory, and the ability to make practical applications of the study of rhetoric and communication will be required of all senior communication studies majors. Mastery will be demonstrated by completing a senior capstone project and presenting the result of that project to the assembled communication studies faculty and majors in a required colloquium.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring

COMM 551 - Senior Honors Thesis

Credits: 3

Honors Thesis Colloquium.

Note
Open only to seniors in Arts and Sciences Honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring

COMM 552 - Coaching and Mentoring

Credits: 3

Develops language, skills, and perspectives on how to coach and mentor diverse stakeholders in personal and professional contexts. Explores coaching and mentoring as a communication process; applies successful coaching and mentoring communication across different contexts; and identifies the appropriateness of different approaches and requirements for stakeholder needs.

Repeat for Credit
N

Typically Offered
Spring

COMM 575 - Internship in Communication Studies

Credits: 1-3

Students will work for/within an organization during the course of a semester. Interns must complete a minimum of 100 work hours to earn course credit. The internship work experience is intended to help apply formal classroom education to "real World" work experience. Ideally internships are pre-professional and project based experiences allowing students the opportunity to make meaningful contributions to the organization. Each intern will complete a series of deliverables to the internship director as well as work under a site supervisor at the host organization. Prior to registration, the internship director must approve all internships.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

COMM 630 - Special Topics in Rhetoric and Communication

Credits: 3

Intensive study of selected topics in communication and rhetoric.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring

COMM 632 - Innovation Cultures

Credits: 3

Examines histories, trends, and trajectories in technological innovation from a communication perspective. Develops familiarity with science and technology studies as a tool for evaluating and participating in innovation cultures.

Repeat for Credit
N

Requisites
Prerequisite: COMM 332

Typically Offered
Fall, Spring

COMM 710 - Introduction to Communication Research Methods

Credits: 3

Introduction to descriptive and experimental methodologies in communication, including conceptualization and operationalization of communication concepts, strategies of research design, and logic of inquiry.

Repeat for Credit
N

Typically Offered
Fall

COMM 720 - Perspectives on Communication

Credits: 3

Analysis of current perspectives on the communication process. Materials cover assumptions, principles, implications and selected research within each perspective.

Repeat for Credit
N

Requisites
Prerequisite: COMM 320.

Typically Offered
Fall-Even Years

COMM 726 - Seminar in Persuasion

Credits: 3

Survey and analysis of advanced theory and experimental studies in persuasion.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring-Odd Years

COMM 730 - Classical Rhetorical Theory

Credits: 3

Study of rhetorical theory and criticism from early Greek to Roman times.

Repeat for Credit
N

Typically Offered
Fall

COMM 732 - Contemporary Rhetorical Theory

Credits: 3

Study of major European and American contributors to rhetorical theory in the twentieth century.

Repeat for Credit
N

Requisites
Prerequisite: COMM 730.

Typically Offered
Spring

COMM 733 - Rhetorical Criticism

Credits: 3

Study of traditional and contemporary approaches to the analysis of public discourse.

Repeat for Credit
N

Typically Offered
Spring

COMM 790 - Deliberation & Dialogue Theory

Credits: 3

Explores the conceptual and theoretical underpinnings of the Dialogue, Deliberation, and Public Engagement field, including group theory, civic space, and deliberative democracy.

Repeat for Credit
N

Typically Offered
Fall

COMM 799 - Problems In Communication Studies

Credits: 1-18

Open to students in any communication studies area.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of instructor.

Typically Offered
Fall, Spring

COMM 800 - Teaching Public Speaking

Credits: 0-1

Seminar for graduate teaching assistants in strategies, techniques, and materials for the introductory public speaking course. Includes current practices and research in communication education. Enrollment limited to graduate teaching assistants in the Department of Communication Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring

COMM 801 - Instructional Communication

Credits: 3

Study of theory and practice of communication in the classroom including both teacher and student communication. Topics include: integration of modes of communication, language choices, power, humor, communication strategies for instruction, and impact of communication on learning.

Repeat for Credit
N

Typically Offered
Spring

COMM 810 - Research Writing in Communication Studies

Credits: 1

A study of the problems of writing and rewriting the results of scholarly investigations in communication studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

COMM 814 - Graduate Studies in Leadership Communication

Credits: 3

This course examines the intersections of community-engaged scholarship and leadership through practices of relationship, story, strategy, and action. Students are introduced to resources and opportunities for pursuing public engagement, community-engaged scholarship, and successful program completion.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
LEAD 814, AGCOM 814

COMM 815 - Seminar in Leadership Communication

Credits: 1

This seminar provides doctoral students opportunities for collaboration and mentorship with peers, faculty, and visiting scholars, and exploration of career pathways in public engagement.

Repeat for Credit
Y

Typically Offered
Other

Cross-listed
LEAD 815, AGCOM 815

COMM 816 - Small Group Communication

Credits: 3

Review literature and develop research projects pertaining to the communication processes in small task groups. Topics include group communication processes, barriers to group communication, and style-specific theories of effective group communication.

Repeat for Credit
N

Requisites
Prerequisite: COMM 326 or senior standing.

Typically Offered
Other

COMM 817 - Relational Communication

Credits: 3

A survey of theories and research on the role of communication in social and personal relationships. Emphasis is on observing and evaluating communication behaviors using real-life media examples.

Repeat for Credit
N

Requisites
Prerequisite: COMM 311, COMM 320, COMM 130, COMM 323, COMM 326, COMM 328, or COMM 480.

Typically Offered
Fall

COMM 820 - Seminar in Communication Studies

Credits: 3

Selected topics in communication studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

COMM 821 - Experimental Research in Communication Studies

Credits: 3

Descriptive and experimental methodologies pertinent to investigation in communication studies. Topics will include such techniques as content analysis, attitude scaling, and stylistic analysis.

Repeat for Credit
Y

Requisites
Prerequisite: COMM 520 or equivalent.

Typically Offered
Fall

COMM 822 - Field Research in Communication Studies

Credits: 3

Critical and interpretive methodologies pertinent to investigations in communication studies. Topics will include participant observation, unstructured interviewing, ethnography, and discourse analysis.

Repeat for Credit
Y

Typically Offered
Spring

COMM 823 - Competitive Forensic Theory

Credits: 3

Theory and study of current research in competitive debate and individual events.

Repeat for Credit
N

Requisites
Prerequisite: COMM 426.

Typically Offered
Fall, Spring, Summer

COMM 824 - Language and Social Interaction

Credits: 3

Study of the epistemological, social, and behavioral functions of language in communication. Examination of the processes by which language functions to construct one's worldview and guide individual action.

Repeat for Credit
N

Requisites
Prerequisite: COMM 320 or ANTH 220; junior standing.

Typically Offered
Spring

COMM 825 - History of American Public Address

Credits: 3

Study of American speakers, from the time of Jonathan Edwards to the present, including their education, major speeches, and contributions to the rhetorical history of the United States.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and consent of the instructor.

Typically Offered
On sufficient demand

COMM 827 - Political & Corporate Speechwriting

Credits: 3

A study of the principles and practice of professional speechwriting with a special emphasis on the role of speechwriting in a democratic society.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

COMM 831 - Deliberation & Dialogue Process Models

Credits: 3

Survey of and introduction to the variety of process models for Dialogue, Deliberation, and Public Engagement, including the following: National Issues Forums, World Cafe, Sustained Dialogue, Appreciative Inquiry, 21st Century Town Hall.

Repeat for Credit
N

Requisites
Prerequisite: COMM 790.

Typically Offered
Fall

COMM 832 - Dialogue, Deliberation, and Public Engagement: Core Skills and Strategies

Credits: 3

Instruction in the assessment of situations and application of theoretical and conceptual frameworks for DDPE to real-world contexts and scenarios.

Repeat for Credit
N

Requisites
Prerequisite: COMM 790 and COMM 791.

Typically Offered
Spring

COMM 833 - Dialogue, Deliberation, and Public Engagement: Capstone Experience

Credits: 3

Focuses on the individualized goals, objectives, and interests of the student, designed to integrate insights from the courses on theoretical foundations, process models, and conceptual frameworks for evaluation and design. Students will meet face-to-face with national leaders to present their research.

Repeat for Credit
N

Requisites
Prerequisite: COMM 790, COMM 791, and COMM 792.

Typically Offered
Intersession

COMM 834 - The Rhetoric of Social Movements

Credits: 3

Study of the theory and criticism of social movement rhetoric. Topics may include the development of movement studies as a distinct genre of scholarship within the field of communication studies, questions and controversies in the rhetorical study of movements, and the rationale for protest tactics, from nonviolence to terrorism.

Repeat for Credit
N

Requisites
Prerequisite: COMM 330, COMM 431, or graduate standing.

Typically Offered
Fall-Even Years

COMM 835 - Leadership Communication

Credits: 3

A study of the role that public discourse plays in attaining, enacting, and constraining leadership in a democratic society.

Repeat for Credit
N

Typically Offered
Spring

COMM 837 - Practicum in Communication and Conflict

Credits: 3-6

Supervised opportunity to apply theoretical information into a self-selected conflict situation in culturally diverse settings

Repeat for Credit
N

Requisites
Prerequisite: COMM 120 and any other required course at or above 300 level.

Typically Offered
Spring, Summer

COMM 840 - Intercultural Communication

Credits: 3

A study of the relationship between language and culture and its impact on human communication. Examines how language and culture differ among people and how differences are handled through the process of communication.

Repeat for Credit
N

Requisites
Prerequisite: COMM 105 or COMM 106.

Typically Offered
Fall, Spring

COMM 843 - Communication and Technology

Credits: 3

Explains, analyzes, and evaluates technological infrastructures in the background of social, economic, and political life. Using a keywords based approach, students test varying definitions of communication technology, seek to understand the relationship between technology and culture, examine the intended and unintended consequences of technology use on society, and evaluate future possibilities for our technological society.

Repeat for Credit
N

Typically Offered
Fall or Spring

COMM 845 - Approaches to Public/Community Engagement

Credits: 3

An advanced survey of key concepts and theoretical frameworks associated with deliberative democracy and public engagement. Focus on theoretical and practical community-engaged scholarship.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
LEAD 845, AGCOM 845

COMM 850 - Political Communication

Credits: 3

Overview of theory and research in the field of political communication. Introduces students to key concepts, research questions, and approaches in the field. Explores how political elites construct their messages and how citizens come to understand their roles in discourse. Topics covered: presidential communication, election campaign discourse, civic discourse and deliberation, and new media and civic/political engagement.

Repeat for Credit
N

Typically Offered
Fall

COMM 899 - Masters Research in Communication

Credits: 1-6

A study of the relationship between language and culture and its impact on human communication.

Repeat for Credit
Y

Requisites
Prerequisite: Sufficient training to carry on the line of research.

Typically Offered
Fall, Spring, Summer

COMM 916 - Communication Theories and Engagement

Credits: 3

Focus on the intersections of communication theory and engagement. Evolution of communication theories. Philosophy and theory pertaining to community-engaged research.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
AGCOM 916

COMM 945 - Social Science Research for Public Problem Solving

Credits: 3

The study of how social science research and social sector evaluation can be applied to address public problems, including the identification of public problems and the critique of current evaluation methods, and applying concepts by developing an evaluation including quantitative and qualitative analysis in partnership with social sector partners.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
AGCOM 945, LEAD 945

COMM 999 - Research in Leadership Communication

Credits: 1-15

Doctoral research demonstrates the candidate's ability to conduct significant original research related to leadership and communication, to analyze the information obtained from the research, and to present the results in a dissertation format appropriate to the field.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

Cross-listed
AGCOM 999, LEAD 999

COT 020 - University Honors Program

Credits: 0

This course is for record keeping purposes to allow the University Honors Program and the College of Technology and Aviation to monitor and track students who are a part of the Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring

COT 105 - Mastering Academic Conversations

Credits: 3

Actively engage students in the process of becoming successful students, scholars, and citizens. Introduction to a successful university experience through participation in interactive seminar classes and co-curricular events. Events and topics include a broad survey of the humanities, examining the impact on culture, society, and the human condition.

Repeat for Credit
N

Requisites
Prerequisite: Freshman or instructor consent.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

COT 150 - The Humanities Through the Arts

Credits: 3

A general introduction to the humanities, focusing on what they are and their basic importance. Painting, sculpture, architecture, literature, drama, music, dance, film, and photography will be explored. Emphasis will be on participation, involvement, guest speakers, tours, and appreciation.

Repeat for Credit
N

Typically Offered

Fall, Spring, Summer

K-State Core
6 Arts and Humanities

COT 175 - Introduction to Cultural Studies

Credits: 3

Introductory survey of core concepts in cultural studies and dimensions of culture, including development of the field and contemporary issues.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

COT 189 - Introduction to University Honors Program

Credits: 1

An overview of the University Honors Program including directions, goals and student requirements for completion of the program.

Repeat for Credit
N

Requisites
Prerequisite: Acceptance into the Honors Program.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

COT 295 - Introductory Industrial Internship

Credits: 0-6

Introductory experiential learning program in an off-campus setting. Written documentation and oral presentation of project goals, experiences, and accomplishments.

Repeat for Credit
Y

Requisites
Prerequisite: Approval of faculty internship advisor and sponsoring company.

Typically Offered
Fall, Spring

COT 298 - Academic Success Lab

Credits: 0

Introduction to and practice in academic study strategies. Topics may include critical thinking, time management, research and information skills, integrity, academic and career planning and goal setting

Repeat for Credit
Y

Typically Offered
Fall, Spring

COT 299 - Problems in Arts, Sciences, and Business

Credits: 1-18

Opportunity for advanced independent study in specific subject areas in Department of Arts, Sciences, and Business.

Note
Subjects are selected by the student and the instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

COT 301 - Six Sigma Analysis and Problem Solving I

Credits: 1

Introduction to Six Sigma process and quality improvement methods and tools, including the Six Sigma problem-

solving approach, voice of the customer, root cause and risk analysis, and process flow improvement. Emphasis on qualitative analysis and introductory statistical tools.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100

Typically Offered
Intersession

COT 302 - Six Sigma Analysis and Problem Solving II

Credits: 1

Application of common statistical methods for Six Sigma improvement projects, including data acquisition, probability, data distributions, and statistically significant change. Builds on the foundation from COT 301 Six Sigma Analysis and Problem Solving I.

Repeat for Credit
N

Requisites
Prerequisite: COT 301

Typically Offered
Intersession

COT 405 - Methods of Problem Solving for Integrated Professional Studies

Credits: 3

Practice in applying creative problem solving methods to a selection of problems solicited from multiple disciplines. Analysis of student solutions will examine similarities and difference between disciplines with regard to strategic exploration, identifying and validating constraints, testing assumptions, defending choices and approaches, and making decisions. Cases are deliberately chosen such that conventional solutions are not immediately apparent, where procedural algorithms and instructional troubleshooting scripts are inadequate or unavailable, and for which exact solutions might not actually exist.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

COT 450 - Salina International Experience

Credits: 0-6

Seminar and travel course including faculty-led international field experience focused on Salina Campus students' area of interest, with travel followed by a final project. The course is designed to enhance students' global and cultural awareness while adding knowledge and skill in topical issues. In addition, students will be introduced to and immersed in historical components, both disciplinary and cultural.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor consent.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

COT 480 - Professional Conduct, Ethics, and Analysis

Credits: 3

Examines the ethical foundations of professional conduct and decision-making in the workplace. Through reading and discussing ethical works, case studies, and contemporary ethical policies/procedures, students will develop the skills necessary for analysis, discourse, and ethical decision-making in a professional work setting.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered

Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

COT 490 - Survey of Cryptography Development, Principles and Practice

Credits: 3

A practical survey of the principles and practice of cryptography with respect to business / government / private applications and commercial computer security systems. Benefits of cryptography as a strategic and tactical tool for effective computer security in the commercial theater of operations. Addresses current topics such as personal privacy, cryptocurrency and blockchain. Students interact with selected cryptographic machines, codes, hand-techniques and computer products developed since the beginning of writing.

Repeat for Credit
N

Typically Offered
Fall

COT 495 - Advanced Industrial Internship

Credits: 0-6

Advanced experiential learning program in an off-campus setting. Written documentation and oral presentation of project goals, experiences, and accomplishments.

Repeat for Credit
Y

Requisites
Prerequisite: Approval of faculty internship advisor and sponsoring company.

Typically Offered
Fall, Spring, Summer

COT 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Requires consent of instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

COT 499 - Advanced Problems in Arts, Sciences and Business

Credits: 1-18

Opportunity for advanced independent study in specific subject areas in the Department of Arts, Sciences, and Business.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

COT 632 - Radio Frequency Technology for Unmanned Systems

Credits: 3

An introduction to the theory and design of electronic circuits for communications emphasizing the implementation and analysis of common radio-frequency (RF) building blocks. Topics include s-parameters, the Smith chart, component behavior, RF test equipment, computer simulation, filter design, impedance matching, amplifiers, oscillators, mixers, and demodulators.

Note
A report will be required of all graduate students.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Spring

COT 650 - Analytical and Computational Tools for Unmanned Systems

Credits: 3

Ordinary differential equations, vector algebra, vector calculus, partial differential equations and the separation of variables technique for solving wave equations. Students also perform simulation and analysis using software tools including MATLAB and MATHCAD applied to Unmanned Systems.

Repeat for Credit
N

Requisites
Prerequisite: One previous calculus course and consent of instructor.

Typically Offered
Fall

COT 660 - Airport Law

Credits: 3

A detailed study of how the U.S. regulatory and legal systems work in relation to airport management. This course emphasizes contract law related to the Federal Aviation Administration Airport covenants and restrictions, Federal Aviation Regulation compliance, and airport operator liability.

Repeat for Credit
N

Typically Offered
Spring

COT 661 - Airport Planning and Management

Credits: 3

An overview of the Federal Aviation Regulation part 139 airport design standard and airport master planning process. Includes a study of the role of the airport in community development.

Note
Advanced course project required.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall

COT 662 - Aviation Management

Credits: 3

Provides the Professional Master of Technology student with the opportunity to gain a thorough understanding of basic aviation industry management practices in use today combined with historical perspectives. Includes case study analysis.

Repeat for Credit
N

Typically Offered
Fall

COT 663 - UAS Flight Operations Management

Credits: 3

Best practices for managing complex operations of Unmanned Aircraft Systems (UAS) in the National Airspace System (NAS) including topics on: personnel and training, regulatory/policy considerations, airspace access, operating procedures, mission planning, system acquisitions, safety, customer relations, application-specific considerations, and data handling. Emphasis on the handling of unexpected delays and challenges to normal operations.

Repeat for Credit
N

Typically Offered
Fall

COT 664 - UAS Program Management

Credits: 3

Best practices for top-level management of an Unmanned Aircraft Systems (UAS) program, including topics on: strategic planning, business model development, proposals, marketing, customer and government relations, personnel management, data handling and security, export control,

regulatory environment, and operating procedures.

Repeat for Credit
N

Typically Offered
Spring

COT 674 - Processing Techniques for Low-Altitude Remotely Sensed Data

Credits: 3

Students learn techniques for exploring remotely sensed data using geographic information systems and image processing software. Topics include manipulation of vector and raster data, management of spatial databases, image stitching, georeferencing, orthorectification, the use and interpretation of metadata and "best practices" in data management techniques.

Repeat for Credit
N

Requisites
Prerequisite: AVT 460 or AVT 463 or consent of instructor.

Typically Offered
Fall

COT 675 - Acquisition and Advanced Processing of LARS Data

Credits: 3

Topics begun in COT 674 are further developed. Advanced topics include: multi-spectral data acquisition and processing, exploitation of full-motion video, interpretation of geospatial and remotely sensed data, geostatistical methods of data analysis, photogrammetric measurements, and an introduction to big data concepts.

Repeat for Credit
N

Requisites
Prerequisite: COT 674.

Typically Offered
Spring

COT 676 - Low-Altitude Remote-Sensing Product/Project Development

Credits: 3

Building on the skills acquired in COT 674 and 675, students fly a low-altitude remote-sensing mission to obtain geospatial data to process, manipulate, and analyze as the means of developing a finished product in areas of interest to the student. Potential areas of investigation include: precision agriculture, environmental remediation, fire management, wildlife studies, or stewardship of managed ecosystems.

Repeat for Credit
N

Requisites
Prerequisite: COT 675.

Typically Offered
Fall

COT 689 - Conduct and Ethics for Cybersecurity and UAS Professionals

Credits: 3

Explores the constitutional, legal, personal and public policy fundamentals associated with the field of cyber data collection, fusion, integration, and UAV surveillance.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

COT 701 - Advanced Technical Communication

Credits: 3

Intensive writing practice, applying rhetorical principles to a number of genres common to non-academic professions and workplaces, including oral presentations. Introduction to allied topics such as document design and editing, crafting technical presentations. Application of global information literacy and research methods, culminating in the preparation of a master's project proposal.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall

COT 702 - Applied Research Skills and Methods

Credits: 3

Survey of qualitative and quantitative research methods; use of a range of tools to develop applied research skills focusing on literature reviews. Examines applied research concepts, methods, and skills to foster enlightened decision making in professional practice.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Spring

COT 703 - Project Management for Professionals

Credits: 3

This course focuses on applied project management methodology, tools, and techniques. Topics include career aspects of project management; business factors affecting the project; project organization, planning, execution, and communications; the project life cycle; risk analysis; and best practices in project management.

Repeat for Credit
N

Typically Offered
Fall

COT 704 - Managerial Finances, Metrics, and Analytics

Credits: 3

Provides an overview of an organization's financial statements, with an emphasis on the interaction between people in management positions and those statements, as well as an examination of the business investment decision-making process. Explores the use of metrics and analytics to measure and improve managerial performance.

Repeat for Credit
N

Typically Offered
Spring

COT 705 - Transformational Leadership for Technology

Credits: 3

Study and application of leadership styles and common leader traits skills and behaviors needed in technology industries and dynamic environments where innovation is a key success factor. Includes application in virtual team environments, and introduces concepts of transformational leadership. This course enables students to build group vision, values, and commitment and to make connections between diverse organizational cultures, leadership styles, and business strategies that enable success in a rapidly changing technology world. Students develop lifelong learning networks and information sources that enable them to continue to grow as leaders.

Repeat for Credit
N

Typically Offered
Fall

COT 706 - Informatics and Technology Management

Credits: 3

Provides theoretical and practical experience in using information technology to support organizational decision-making processes. Provides tools in areas such as statistics, research methods, data mining, and information technology to develop solutions tailored to business problems.

Repeat for Credit
N

Typically Offered
Spring

COT 713 - Advanced Aviation Safety Management

Credits: 3

This course examines the development of safety and provides the student with an understanding of how safety management has become an important part of any company. Discussions emphasize Safety Management Systems and how this blueprint is becoming an integral part of most organizations. Various governmental and corporate programs will be discussed. Students will be exposed to various management tools and techniques to aid in systematically controlling risk and developing a safety culture mind-set.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Spring

COT 715 - Systems Project Management

Credits: 3

This course will steer students through advanced project management that includes both techniques in application portfolio management (APM) and project portfolio management (PPM). Students will construct a Scope Statement, Statement of Work (SoW), and Work Breakdown Structures (WBS). Students practice Project Evaluation and Review Techniques (PERT) and learn the Critical Path Method (CPM). Lastly, they will examine and evaluate the project progression by applying Earned Value Management (EVM).

Repeat for Credit
N

Typically Offered
Fall, Spring

COT 720 - Application of Lean Six Sigma Methods

Credits: 3

Six sigma and lean tools within an enterprise to improve product and process development, production operations, and service activities.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Spring

COT 721 - Reliability Centered Maintenance of Plant Equipment

Credits: 3

This course emphasizes reliability modeling and assessment, reliability-centered maintenance, condition monitoring technologies, and computer tools.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring

COT 731 - Electromagnetics for Unmanned Systems

Credits: 3

Fundamentals of electromagnetic wave phenomena primarily using transmission line theory to study practical applications such as antennas, cables, and waveguides. Includes a treatment of EMI and related issues.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Spring

COT 741 - Aerospace Manufacturing and Materials

Credits: 3

An introduction to aerospace manufacturing and materials processes that focus on understanding manufacturing applied to the production of aerospace vehicles and associated materials.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring

COT 750 - Professional Master of Technology International Experience

Credits: 0-6

Seminar and travel course including faculty-led international field experience focused on Professional Master of Technology students' area of interest, with travel followed by a final project. The course is designed to enhance students' global and cultural awareness while adding knowledge and skill in topical issues. In addition, students will be introduced to and immersed in historical components, both disciplinary and cultural.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor Consent.

Typically Offered
Fall, Spring

COT 770 - Material Properties of Bulk Solids

Credits: 3

Covers material properties related to bulk solids handling such as particle density, bulk density, particle hardness, surface area, particle size and shape and its distribution, porosity and permeability. Additional material property topics include moisture content, temperatures, RH, explosiveness, cohesion and adhesion, angle of internal friction, wall friction, angle of repose, time consolidation, unconfined yield strength, shear strength and more. Sampling and measurement techniques of materials are also included.

Repeat for Credit
N

Requisites
Prerequisite: Industry experience or consent of instructor.

Typically Offered
Fall

COT 771 - Storage and Flow of Bulk Solids

Credits: 3

Covers topics related to storage and flow of bulk solids which include design of hopper , bin, chute, and feeders. A study of solid flow problems such as cohesive arching, ratholing, bridging, and shear tester operational principles is included.

Repeat for Credit
N

Requisites
Prerequisite: Industry experience or consent of instructor.

Typically Offered
Fall

COT 772 - Pneumatic Conveying of Bulk Solids

Credits: 3

Covers topics such as types and components of pneumatic conveying systems and its design principles. Trouble shooting, pipe wear and attrition, dust control are included.

Repeat for Credit
N

Requisites
Prerequisite: Industry experience or consent of instructor.

Typically Offered
Spring

COT 773 - Instrumentation and Safety of Bulk Solids Handling

Credits: 3

Examines various instrumentation used in bulk solids handling operation such as measurement of airflow, pressure, temperature, level and measuring techniques. Different type valves, PLC control and safety are included.

Repeat for Credit
N

Requisites
Prerequisite: Industry experience or consent of instructor.

Typically Offered
Spring

COT 774 - Mechanical Conveying of Bulk Solids

Credits: 3

Covers topics such as types and components of bucket elevator, screw conveyor, drag and belt conveying systems and their design principles. Different aspects of designing each component of these systems with examples and troubleshooting will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: Industry experience or consent of instructor.

Typically Offered
Summer

COT 780 - UAS and High Altitude Platforms (HAPS) for Wireless Communications

Credits: 3

An introductory course to HAPS technology applied in the civilian UAS sector. Covers technologies, communications, and protection of those computer communications from hostile intent. HAPS technology provides wireless narrowband and broadband telecommunications and broadcasting services to users using either aircraft (unmanned (UAS/UAV) or manned) or lighter-than-airships (LTA). Research indicates UAS to be the best alternative. These platforms are reusable and positioned at stratospheric altitudes, from approximately 12.4 miles to 31 miles (20 to 50 km).

Repeat for Credit
N

Requisites
Prerequisite: Graduate Status.

Typically Offered
Spring

COT 781 - Capstone in Systems Design and Dynamics

Credits: 1-6

Students formulate research and execute a project to gain hands-on experience under expert guidance while integrating knowledge to solve complex problems. Students write a convincing proposal for a capstone experience, gather and analyze data, draw conclusions and present results. Teams of first and second-year students may form to work on real-world projects.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

COT 792 - Problems in Cybernetics and Technology

Credits: 0-6

Opportunity for advanced independent study of a specific topic in one of the following areas: aerospace, artificial intelligence, autonomous systems, data science, cyber systems, engineering, space systems, or other advanced technologies. Topics selected jointly by student and the instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

COT 839 - Integrated Systems Thesis

Credits: 2

This course must be taken in three 2 credit hour courses sequentially connected across three semesters. With graduate faculty guidance, students will select and finalize a thesis chair and committee, submit the thesis proposal, develop a research roadmap, incorporate research proposal revisions, execute on approved research, make all necessary revisions to the thesis, produce and defend thesis. The systems thesis framework will focus on a) applied industry research, b) research abstract, and c) publishable research paper.

Repeat for Credit
Y

Requisites
Prerequisite: Approval of Thesis Committee Chair.

Typically Offered
Fall, Spring, Summer

CRIM 261 - Introduction to Criminology and Criminal Justice

Credits: 3

An examination of crime and criminal justice. Considers the nature of crime and the academic discipline of criminology. Explores the major components in the American criminal justice system and how these reflect and are affected by norms and changes in our society. Special emphasis is placed on issues of gender, race/ethnicity, and class within crime and criminal justice.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.

CRIM 301 - Topics in Criminology

Credits: 1-3

Supervised independent and/or interdisciplinary study projects for Criminology students.

Repeat for Credit
Y

Requisites
Prerequisite: CRIM 361 and consent of instructor.

Typically Offered
Fall, Spring

CRIM 362 - Police and Society

Credits: 3

Examines in detail the policing function in society and the role police play in the criminal justice process.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

CRIM 364 - Criminological Perspectives

Credits: 3

Addresses basic concepts, theories, and research methods used in the study of crime, with an emphasis on critical perspectives on crime as a social phenomenon. The course provides an overview of the nature and extent of major categories of crime as well as the integration of current issues dealing with crime.

Repeat for Credit
N

Requisites
Prerequisite: CRIM 261

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Human Diversity within the U.S.

CRIM 367 - Real World Criminology

Credits: 1

Prepares students for careers in Criminology, including learning more about potential internship placements, occupation options in the field of criminology, graduate school, and job market preparation.

Note
Required for all Criminology majors.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CRIM 454 - Criminal Law and Society

Credits: 3

Examines the impact of the criminal law on US society, paying special attention to the state's use and justification of violence. Concerns the law as a source of violence and inequality in US society; students will demonstrate critical thinking and reasoning, analyzing the construction of laws and interpreting implications for various groups and segments of society.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CRIM 460 - Youth and Crime

Credits: 3

Nature, extent, and causes of delinquency; characteristics of delinquents; means of prevention and treatment.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

CRIM 462 - The War on Drugs

Credits: 3

This course charts the history of the US war on drugs, placing it within the context of the war on terror, mass imprisonment and the problem of police violence. Studies how policies of law and crime impact various groups and social positions within the US. Compares US policies to others within a global context.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

CRIM 463 - Gangs in American Society

Credits: 3

Covers the historical development and current status of gangs in America. Focus on gang types/forms, criminal activities and sociological impact on communities. Also examines gang control mechanisms as well as classic and modern research conducted about gangs.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

CRIM 470 - The Criminal Justice System and Family Violence

Credits: 3

A critical examination of the incidence and prevalence of family violence in society, emphasizing how the criminal justice system responds to this social problem.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

CRIM 477 - True Crime

Credits: 3

Critically evaulates the public fascination with violent crime entertainment.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

CRIM 480 - Prisons and Punishment

Credits: 3

The historical development and current status of the correctional system. Major institutional components include jails, prisons, probation, parolee, and other forms of community corrections. Modern issues such as offender and victim rights and electronic monitoring are also covered.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

CRIM 482 - Criminal Procedure and Investigations

Credits: 3

Examines the academic and applied dimensions of criminal investigations and criminal procedure. The course is designed for students interested in learning about the processes and skills involved in evidence gathering, interviews and interrogations, case processing, and preparing cases for court for a variety of criminal offenses.

Repeat for Credit
N

Requisites
Prerequisite: CRIM 361

Typically Offered
Fall, Spring

K-State 8
Social Sciences

CRIM 500 - Contemporary Issues in Criminology

Credits: 1-3

Analysis of a selected criminological topic of contemporary interest. Topics vary from semester to semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CRIM 550 - Cybercrime, Security, and Society

Credits: 3

Critically examines the social and cultural issues surrounding technology, crime, deviance, and crime control, including hackers, digital activists, online fraudsters, cybersecurity agents, and other actors and subcultures from sociological and criminological perspectives.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CRIM 552 - Sex Crimes & Society

Credits: 3

Provides critical analysis of background, laws, and practices regarding sex crimes in the US. Includes diverse reference points relative to perpetrators and victims/survivors of sex crimes; legal practices and challenges; and responses related to criminal justice and social justice perspectives.

Note
Intended for Criminology majors and related fields including pre-law, pre-med, social science, sociology, social work, anthropology, psychology, leadership, and health and human sciences

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences

CRIM 562 - Study of Serial Murder

Credits: 3

The course critically examines the social construction of serial murder as a phenomenon that has long existed but only recently has been polarized as a concern of the criminal justice system and the public in general. The objective of the course is to synthesize historical and social scientific analysis of serial murder, assess public and media debates centered on both offenders and victims, and evaluate the portrayal of serial murder in contemporary literature and film.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

CRIM 568 - Criminology Internship

Credits: 6-9

Involves an internship with an approved organization related to criminology or criminal justice. Includes practical experience, observational research, and a final report. Students will demonstrate an understanding of how social science methods and principles affect policies and practices in criminal justice and related organizations.

Repeat for Credit
Y

Requisites
Prerequisite: CRIM 367

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

CRIM 569 - Field Experience in Criminology

Credits: 1-3

Integrates field experience and everyday practices with relevant bodies of sociological and criminological theory and research. Students will develop analytical and interpretive skills to understand implications of criminal law and practices through direct field experience.

Repeat for Credit
Y

Requisites
Prerequisite: CRIM 367 Corequisite: Must be taken concurrent with CRIM 568.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CRIM 572 - The Death Penalty

Credits: 3

Studies data, public opinion, execution patterns and methods, and debates regarding capital punishment as public policy in the U.S. from early history to 21st century. Examines selected cases and issues such as general deterrence, methods of execution, and constitutional challenges.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CRIM 582 - Criminal Minds

Credits: 3

Examines interaction between social forces and physical experiences, such as cognitive impairment and/or abuse. Critically reviews history of criminology and biological theories of crime; explores how remnants of these feature in current explanations of crime.

Repeat for Credit
N

Typically Offered
Intersession

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

CRIM 592 - Anatomy of Mass Murder

Credits: 3

Examines a specific kind of murder, killing of four or more people in a single incident. Examines the killers' pathways, the weapons, and especially the social context of mass murder.

Repeat for Credit
N

Requisites
Recommended prerequisite: Any social science course.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

CRIM 599 - Senior Thesis in Criminology

Credits: 3

Independent research in criminology. Students conduct original research and produce a senior thesis in criminology.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 423, CRIM 364 and instructor consent

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

CRIM 665 - Women and Crime

Credits: 3

Nature and extent of criminal offending among women and women offenders' interactions with legal and criminal justice systems; women's victimization, including rape and intimate violence; women workers in the criminal justice system, specifically in law, policing, and prison work.

Repeat for Credit
N

Requisites
Prerequisite: CRIM 261

Typically Offered
Spring

CS 819 - Veterinary Medicine in a Foreign Context

Credits: 1

Lecture and discussion-based course preparing students to enroll in VCS 821. Students will investigate agricultural and veterinary medicine in a specific country.

Repeat for Credit
Y

Requisites
Prerequisite: Commitment to enroll in CS 821 International Veterinary Study Tours and Graduate Student in College of Veterinary Medicine. Additional students admitted with discretion of the faculty member leading CS 821.

Typically Offered
Spring

CS 820 - Topics in Global Veterinary Medicine

Credits: 1

An overview of the role of veterinarians around the world. Topics include international uses and attitudes about animals, problems the world faces pertaining to livestock production, and social tensions. One hour lecture each week.

Note
One hour lecture each week.

Repeat for Credit
N

Requisites
Prerequisite: 1st or 2nd year standing in the College of Veterinary Medicine, or enrolled as a graduate student with instructor permission.

Typically Offered
Spring

CS 821 - International Vet Study Tours

Credits: 1

Faculty-led trip for students to explore veterinary medicine in a foreign country. Prior to travel, students will learn about the country through lectures, research, presentations. During the trip they will interact with nationals in the veterinary profession and experience the culture.

Repeat for Credit
Y

Requisites
Prerequisite: Successful completion of CS 819 in the semester immediately preceding. Enrolled as a 1st-3rd year or grad student in the College of Vet Med. Additional students
admitted with discretion of faculty leading the tour.

Typically Offered
Summer

CS 822 - Introduction to Sustainable Beef Systems

Credits: 1

This course provides the fundamentals of assessing sustainability in beef production systems through evaluation of aspects of sustainability pillars, people, planet and profit, in each sector of the beef value chain. The course focuses on principles of sustainable food systems, beef cattle production practices, systems thinking, and impacts of food choices.

Repeat for Credit
N

Requisites
Prerequisite: Graduate School standing.

Typically Offered
Fall

Cross-listed
VCS 822

CS 823 - Advanced Diagnostic Imaging - Small Animal

Credits: 1

Case presentation/discussion of diagnostic imaging techniques used in small animal veterinary practice, including radiography, ultrasonography, nuclear imaging, magnetic resonance imaging, and computer tomography. Clinical cases will demonstrate imaging methods and technology used in the various body systems, with an emphasis on interpretation and clinical diagnosis. Students may re-enroll for a maximum of three credits.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree.

Typically Offered
Fall

CS 824 - Topics in Small Animal Internal Medicine I

Credits: 1

Various topics in small animal internal medicine will be presented. In-depth discussion of pathophysiology and recent advances in diagnostics and therapeutics. Different topis will be covered in various years at instructor's discretion.

Note
Course may be repeated with approval of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: DVM degree.

Typically Offered
Fall

CS 825 - Topics in Small Animal Internal Medicine II

Credits: 1

Various topics in small animal internal medicine will be presented. One topic will be covered in a one-hour conference weekly. In-depth discussion of pathophysiology and recent advances in diagnostics and therapeutics.

Note
Course may be repeated with approval of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: DVM degree.

Typically Offered
Spring

CS 826 - Small Animal Endoscopy

Credits: 1

Introduction to the fundamentals of small animal (canine and feline) endoscopy, including respiratory and gastrointestinal endoscopy, laparoscopy and anthroscopy. Thirteen lectures with 2 laboratories will be offered.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree and approval from course coordinator.

Typically Offered
Fall

CS 827 - Advanced Topics in Small Animal Surgery

Credits: 0-18

Current and foundational information on techniques, theory, and management in small animal surgery.

Repeat for Credit
Y

Requisites
Prerequisite: DVM degree or approval on instructor.

Typically Offered
Fall, Spring

CS 828 - Wound Management and Reconstruction

Credits: 1

Didactic lectures on the physiology of wound healing, advanced reconstructive techniques, and wound treatment products and technologies.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student in the College of Veterinary Medicine

Typically Offered
Fall or Spring

CS 829 - Applied Production Medicine

Credits: 1

Advanced training in agricultural production medicine. Emphasis on answering production medicine problems through the appropriate design and interpretation of research models. Course is discussion-based and facilitated by a team of faculty members. Students will be expected to participate in weekly topic discussions.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student.

Typically Offered
Fall, Spring

CS 830 - Design and Interpretation of Clinical Trials

Credits: 3

Designing appropriate experimental studies to answer research questions that can be addressed in clinical and field settings, and analyzing, interpreting and communicating the results in a suitable manner.

Repeat for Credit
N

Typically Offered
Spring

CS 831 - Veterinary Ophthalmic Surgery Techniques

Credits: 3

Lectures will cover ophthalmic instruments and proper surgical techniques for commonly performed ophthalmic surgeries. Cadavers will be available to practice adnexal and corneal ophthalmic surgeries.

Repeat for Credit
N

Requisites
Prerequisite: Ophthalmology resident at Kansas State University Veterinary Health Center.

Typically Offered
Spring

CS 832 - Antimicrobial Resistance in Bacteria: A One Health Perspective

Credits: 1

This course addresses the concept of One Health which integrates the knowledge of the biological elements necessary for the evolution of antimicrobial resistance (AMR) in bacteria and other factors (animals, humans, environments, socioeconomic features, and behavioral changes) involved in its emergence and dissemination.

Repeat for Credit
N

Requisites
Graduate Student Standing

Typically Offered
Fall

Cross-listed
VCS 832 Antimicrobial Resistance in Bacteria: A One Health Perspective

CS 833 - Nephrology/Urology

Credits: 1

Advanced studies about small animal nephrology/urology (various topics: Pathophysiology, clinical signs, differential diagnoses, diagnostic approach, and treatment consideration).

Repeat for Credit
N

Requisites
Prerequisite: DVM Degree and Graduate Student.

Typically Offered
Spring

CS 834 - Surgical Pathophysiology I – Hematology, Anesthesia and Infection

Credits: 1

Designed to expose small animal surgery residents to a

standard curriculum set out by the American College of Veterinary Surgeons in preparation for the Phase I Surgery Qualification examination. Assigned textbook reading covers various topics: Hematology, Anesthesia and Infection. Meet for one hour weekly with faculty to guide the resident's self-study, answer questions, and correct deficiencies.

Repeat for Credit
N

Requisites
Prerequisite: Small animal surgery resident at Kansas State University Veterinary Health Center and Graduate Student.

Typically Offered
Fall, Spring, Summer

CS 835 - Surgical Pathophysiology II – Analgesia and Wound Management

Credits: 1

Designed to expose small animal surgery residents to a standard curriculum set out by the American College of Veterinary Surgeons in preparation for the Phase I Surgery Qualification examination. Assigned textbook reading covers various topics: Analgesia and Wound Management. Meet for one hour weekly, with faculty to guide the resident's self-study, answer questions, and correct deficiencies.

Repeat for Credit
N

Requisites
Prerequisite: Small animal surgery resident at Kansas State University Veterinary Health Center and Graduate Student.

Typically Offered
Fall, Spring, Summer

CS 836 - Surgical Pathophysiology III – Soft Tissue Surgery

Credits: 1

Designed to expose small animal surgery residents to a standard curriculum set out by the American College of Veterinary Surgeons in preparation for the Phase I Surgery Qualification examination. Assigned textbook reading covers Soft Tissue Surgery topics. Meet for one hour weekly, with faculty to guide the resident's self-study, answer questions, and correct deficiencies.

Repeat for Credit
N

Requisites
Prerequisite: Small animal surgery resident at Kansas State University Veterinary Health Center and Graduate Student.

Typically Offered
Fall, Spring, Summer

CS 837 - Surgical Pathophysiology IV – Orthopedic and Neurosurgery

Credits: 1

Designed to expose small animal surgery residents to a standard curriculum set out by the American College of Veterinary Surgeons in preparation for the Phase I Surgery Qualification examination. Assigned textbook reading covers various topics: Orthopedic and Neurosurgery. Meet for one hour weekly, with faculty to guide the resident's self-study, answer questions, and correct deficiencies.

Repeat for Credit
N

Requisites
Prerequisite: Small animal surgery resident at Kansas State University Veterinary Health Center and Graduate Student.

Typically Offered
Fall, Spring, Summer

CS 838 - Advanced Small Animal Endocrinology

Credits: 2

Advanced topics in small animal endocrinology. Emphasis on comparative aspects of endocrine gland disease and its clinical manifestations in dogs and cats. Primary literature, review articles, and advanced texts will be the principle sources of information.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree.

Typically Offered
Spring

CS 840 - Communication with the Agricultural Worker

Credits: 2

An elective course focused on improving communications between veterinarians and animal caretakers in production agriculture and equine industries. The course will use face to face discussions and online seminars/modules to teach communications skills with a focus on common terminology and vocabulary necessary for effective communication. Course material will involve audio-visual methods using immersion philosophy.

Repeat for Credit
N

Requisites
Prerequisite: 2nd or 3rd year standing in the College of Veterinary Medicine or enrolled as a graduate student.

Typically Offered
Fall, Spring

CS 841 - Advanced Clinical Gastroenterology

Credits: 1

Advanced study of gastrointestinal structure and function with discussions of material presented applicable to the general ACVIM board examinations. Assigned journal articles will cover literature references from sources on the ACVIM reading list, as well as general physiology taken from human literature.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree and Kansas State University Graduate Student Standing.

Typically Offered
Fall, Spring

CS 842 - Advanced Clinical Hepatology

Credits: 1

Advanced study of hepatology with discussions of material presented applicable to the general ACVIM board examinations Assigned journal articles will cover literature references from sources on the ACVIM reading list, as well as general physiology taken from human literature.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree and Kansas State University Graduate Student Standing

Typically Offered
Fall, Spring

CS 850 - Research in Medicine

Credits: 1-6

An attempted solution of some of the medical and parasitological problems confronting the practitioner of veterinary medicine.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of staff.

Typically Offered
Fall, Spring, Summer

CS 851 - Breeding Diseases

Credits: 1-5

Advanced studies of the breeding diseases of domestic animals.

Repeat for Credit
N

Requisites
Prerequisite: D.V.M. degree or consent of staff.

Typically Offered
Fall, Spring, Summer

CS 852 - Interpretation of Radiology Studies of Body Systems

Credits: 3

Advanced discussions of radiologic interpretation, indications and interpretation of alternate imaging procedures (MRI, CT, nuclear medicine, ultrasound).

Repeat for Credit
N

Requisites
Prerequisite: DVM degree or consent of department head prior to registration.

Typically Offered
Fall-Odd Years

CS 854 - Systemic Medicine I

Credits: 1-3

Study of the medical aspects of diseases of the urinary, nervous, and integumentary systems and special senses.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree or consent of department head.

Typically Offered
Fall, Spring, Summer

CS 855 - Systemic Medicine II

Credits: 1-3

Study of the medical aspects of diseases of the cardiovascular, respiratory, musculoskeletal and endocrine systems.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree or consent of department head.

Typically Offered
Fall

CS 856 - Large Animal Surgery Current Literature

Credits: 1

In the style of a journal club, participants will present current literature related to equine and farm animal surgery. The journal articles focus on literature from the American College of Veterinary Surgeons reading list (EVJ, EVE, JAVMA, VRU, VetSurg) within the last 5 years as well as foundational literature. Clinical case scenarios will also be used to assess student' knowledge. The goal of the course is to enhance students' knowledge of the current large animal orthopedic and soft tissue literature.

Repeat for Credit
N

Requisites
DVM and Large Animal Resident or Intern

Typically Offered
Fall

CS 857 - Clinical Interpretation of Equine Diagnostic Images

Credits: 1

Graduate veterinary students will meet one hour weekly to review clinical equine images and review pertinent literature.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student in the College of Veterinary Medicine.

Typically Offered
Fall, Spring

CS 858 - Orthopedic Surgery

Credits: 4

Fundamentals, theory, and practice concerning genetic, metabolic, infectious, neoplastic, and traumatic diseases of bones and joints.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree or consent of department head.

Typically Offered
Spring-Even Years

CS 859 - Clinical Sciences Seminar

Credits: 1

A seminar for all house officers and all Clinical Sciences graduate students.

Note
One hour seminar presentation each week. May re-enroll for total maximum of two credits.

Repeat for Credit
Y

Typically Offered
Fall, Spring

CS 862 - Theriogenology

Credits: 3

Consideration of prevention, diagnosis, and treatment of disease, and maintenance of health and productivity of the genital tract of domestic animals. Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in College of Veterinary Medicine or graduate student.

Typically Offered
Fall

CS 868 - Artificial Intelligence in Veterinary Medicine

Credits: 1

This elective course explores the impact of artificial intelligence on the field of medicine, with a focus on veterinary applications. Students will learn about the fundamentals of AI, machine learning, and data science, and how these technologies are used to improve diagnostics, treatment planning, patient monitoring, and overall patient care. The course will also address ethical considerations, regulatory frameworks, and the future of AI in healthcare. Through lectures, case studies, and hands-on projects, students will gain a comprehensive understanding of AI's role in advancing medical and veterinary practices.

Repeat for Credit
N

Requisites
Graduate Student in the College of Veterinary Medicine.

Typically Offered
Fall, Spring

CS 870 - Diagnostic Methods in Feedlot Management

Credits: 3

Practical experience in feedlot operation and bovine necropsy diagnosis consisting of 40 hours in bovine necropsy and 320 hours of an on-location practicum in a cattle feedlot.

Repeat for Credit
N

Requisites
Prerequisite: Successful completion of the first-year professional curriculum in the College of Veterinary Medicine with a cumulative GPA of 3.0 or better and no grade below a C.

Typically Offered
Summer

CS 877 - Clinical Nutrition

Credits: 2

A focus on practical aspects of nutrition as it relates to performance, health and animal well-being of food-producing animals and, programs designed for health and well-being of small animals including exotic animals. Nutritional aspects of the mechanisms of health and disease are taught primarily at the individual and population level with some molecular and cellular aspects included. Designed for all students to be able to properly nourish animals in their care during their career.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student.

Typically Offered
Spring

Cross-listed
ASI 886 and AP 886

CS 890 - Clinical Science Problems

Credits: 1-3

Advanced instruction in research topics and technologies, emphasizing various clinical disciplines.

Repeat for Credit
Y

Requisites
Prerequisite: D.V.M. Degree. or dual degree students in the College of Veterinary Medicine

Typically Offered
Fall, Spring, Summer

CS 894 - Antimicrobial Resistance in Bacteria: Impact on Animal and Public Health

Credits: 3

The course addresses issues of antimicrobial resistance (AMR) in bacteria in relation to antimicrobial use through an interdisciplinary approach that integrates animal, human and environmental health.

Repeat for Credit
N

Requisites
Pre-requisite: Graduate Student

Typically Offered
Spring

CS 895 - Research Methods

Credits: 1

Discussion of research design, grantsmanship, practical statistics, manuscript preparation, and ethics.

Repeat for Credit
N

Requisites
Prerequisite: DVM degree or consent of department head.

Typically Offered
Spring-Even Years

CS 896 - Advanced Topics in Clinical Ophthalmology I

Credits: 2

Designed to expose comparative ophthalmology residents to the source material associated with the ABVO certifying examination. Assigned textbook reading covers various topics from the major required textbook reading list. Meet with faculty to guide the resident's self-study, answer questions, and correct deficiencies.

Repeat for Credit
Y

Requisites
Prerequisite : Comparative Ophthalmology Resident at Kansas State University Veterinary Health Center and Graduate Student

Typically Offered
Fall, Spring, Summer

CS 897 - Advanced Topics in Clinical Ophthalmology II

Credits: 2

Designed to familiarize comparative ophthalmology residents with the basic format of the ABVO certifying examination. The course will include written and image recognition examinations that collectively assess the students' comprehensive knowledge of clinical ophthalmology, including medical and surgical case management. Basic vision science concepts associated with embryology, anatomy, physiology, and optics will also be reviewed. Meet to deliver mock examinations, including time to review the content, answer questions, and correct deficiencies.

Repeat for Credit
Y

Requisites
Prerequisite : Comparative Ophthalmology Resident at Kansas State University Veterinary Health Center and Graduate Student

Typically Offered
Fall, Spring, Summer

CS 898 - MS Report in Clinical Sciences

Credits: 1-2

A written report of either laboratory-based research, field-based research, or a review paper on a topic in the major field.

Repeat for Credit
N

Requisites
Prerequisite: Consent of the major professor

Typically Offered
Fall, Spring, Summer

CS 899 - Research in Clinical Sciences

Credits: 1-6

Individual research in any of the fields of Clinical Sciences.

Note
This work may form the basis for either the M.S. Thesis or the M.S. Report.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

CSD 243 - Communication Sciences and Disorders

Credits: 3

A survey of normal communication processes and communication disorders and an introduction to the fields of speech pathology and audiology that are responsible for the clinical management of these disorders.

Repeat for Credit
N

Typically Offered
Fall, Spring

CSD 347 - Introduction to Phonetics

Credits: 3

Basic information about speech sounds and their use in human languages, including physiological and perceptual characteristics of phonetics. Phonetic transcription of Standard American English will be emphasized.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours, 3.0 GPA.
Corequisite: CSD 442.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

CSD 360 - Structure and Function of the Speech Mechanism

Credits: 4

Anatomy of the structures involved in speech production. The course includes histology of the larynx and an overview of speech physiology.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours, 3.0 GPA.

Typically Offered
Spring

CSD 361 - Hearing Science

Credits: 3

An introduction to hearing science concepts. Areas of focus include anatomy and physiology of the hearing mechanism, quantification of sound, sound generation, and sound transmission. Information on the role of the auditory

system in the encoding and processing of simple and complex signals is also presented.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours, 3.0 GPA

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

CSD 442 - Developmental Psycholinguistics

Credits: 3

Review of research and theory of early development of language comprehension and production, involving vocalization, phonology, morphology, syntax, semantics, and pragmatics. Includes discussion of the relationship between cognition and language, as well as other variables influencing language acquisition.

Repeat for Credit
N

Requisites
Prerequisite: CSD major; completion of 57 credit hours, 3.0 GPA.

Typically Offered
Fall

CSD 443 - Language Assessment and Intervention I

Credits: 3

The characteristics and nature of developmental language disorders in preschool-aged children, as well as general principles of language assessment and intervention are presented. Specific language assessment and intervention procedures for individuals between birth and five years old are reviewed.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours and an overall 3.0 GPA, including both K-State and transfer course work.

Typically Offered
Fall

CSD 446 - Speech Sound Disorders

Credits: 4

Theory, research, and principles of normal/abnormal phonetic and phonologic development, transcription of speech sound disorders assessment of speech sound disorders, and intervention for speech sound disorders.

Note
Three hours lecture and two hours lab.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours and an overall 3.0 GPA, including both K-State and transfer course work.

Typically Offered
Spring

K-State 8
Social Sciences

CSD 515 - Laboratory in Acoustic Phonetics

Credits: 1

The study of speech perception and production through acoustic analysis. Laboratory experience in the use of computer-based speech analysis systems.

Repeat for Credit
N

Requisites
Prerequisite: CSD 347 and senior standing.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

CSD 549 - Clinical Procedures in Communication Disorders

Credits: 3

Orientation to clinical practicum. Opportunities for clinical observation of speech, language, and hearing evaluation and treatment. Study of diagnostic tools, treatment materials, equipment, and clincial procedures.

Repeat for Credit
N

Requisites
Prerequisite: Senior, CSD major, CSD 443, CSD 446.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

CSD 560 - Clinical Research in Communication Sciences and Disorders

Credits: 3

Logic and methods of clinical research with emphasis on those most frequently used in speech-language pathology and audiology. Experience reading, planning, and evaluating research.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 or equivalent and CSD 446.
Recommended Corequisite: CSD 443

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

CSD 567 - Hearing Assessment and Intervention

Credits: 3

An introduction to audiology concepts and basic audiology testing procedures. Areas covered include disorders of the auditory system, testing procedures, and audiometric interpretation.

Repeat for Credit
N

Requisites
Prerequisite: CSD major, completion of 57 credit hours, 3.0 GPA.

Typically Offered
Spring

CSD 570 - Hearing and Communication

Credits: 2

The study of habilitation and rehabilitation techniques for individuals diagnosed with a hearing disorder. Specific areas of interest include hearing evaluation techniques, speech and language development for the hearing impaired, hearing aid amplification, cochlear implants, and central auditory processing.

Repeat for Credit
N

Requisites
Prerequisite: CSD 567.

Typically Offered
Spring

CSD 580 - Neurological Basis of Communication and Swallowing Disorders

Credits: 3

Introduction to basic neuroanatomy and physiology as it relates to processes of human communication and swallowing. Learn about the nervous system and how health conditions that affect neurological function contribute to activity limitations and participation restrictions. Provides foundational knowledge for students in communication sciences and disorders and health majors about individuals who have neurologically-based communication and swallowing disorders.

Repeat for Credit
N

Requisites
Prerequisite: CSD 360 or instructor permission for a non-

CSD major to substitute a comparable anatomy course.

Typically Offered
Spring

CSD 591 - Undergraduate Topics in Communication Sciences and Disorders

Credits: 0-3

Review of current topics in speech-language pathology and/or audiology.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

CSD 701 - Research Experience in Communication Sciences and Disorders

Credits: 1

The course furthers understanding and application of research principles in communication sciences and disorders. Students participate in scholarly activities that apply to clinical populations in speech-language pathology.

Repeat for Credit
N

Requisites
Prerequisite: CSD 560

Typically Offered
Fall, Spring

CSD 705 - Practicum in Speech-Language Pathology

Credits: 1-3

Supervised practice in the use of the methods and materials of speech-language pathology.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 549.

Typically Offered
Fall, Spring, Summer

CSD 706 - Practicum in Audiology

Credits: 1-3

Supervised practice in the use of equipment, materials, and methods of audiology.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 567.

Typically Offered
Fall, Spring, Summer

CSD 725 - Augmentative and Alternative Communication

Credits: 2

This course examines the area of augmentative and alternative communication (AAC) for people across the lifespan. The etiologies and communicative needs of current and prospective users of AAC, as well as procedures for evaluation are addressed. The course includes strategies and procedures for implementing AAC systems for people who are permanently or temporarily severely communicatively impaired.

Repeat for Credit
N

Requisites
Prerequisite: CSD 360 and CSD 549.

Typically Offered
Summer

CSD 741 - Stuttering

Credits: 3

Research and theory concerning etiology, characteristics, assessment, and treatment of individuals with stuttering and related conditions.

Repeat for Credit
N

Requisites
Prerequisite: CSD 560.

Typically Offered
Fall

CSD 742 - Language Assessment and Intervention II

Credits: 3

Theory and research concerning language disorders in school-aged children are presented. Specific language assessment and intervention methodologies for this population are reviewed. Dialectal and bilingual considerations for assessment and intervention are addressed.

Repeat for Credit
N

Requisites
Prerequisite: CSD 443.

Typically Offered
Spring

CSD 743 - Communication Impairments in Autism Spectrum Disorders

Credits: 2

This course provides an overview of Autism Spectrum Disorders (ASD), including characteristics, diagnosis, and etiologies. Interventions used by speech-language pathologists for enhancing the communication of individuals with ASD across the lifespan will be presented, with a focus on using evidence-based practice guidelines to determine programs of treatment. Current developments and research findings related to assessment and intervention will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: CSD 443.

Typically Offered
Summer

CSD 745 - Motor Speech Disorders

Credits: 3

Examines motor speech disorders that result from neurologic disease, injury, and developmental conditions. Evidence-based practices concerning evaluation and planning of intervention are addressed for dysarthria and apraxia of speech.

Repeat for Credit
N

Requisites
Prerequisite: CSD 580

Typically Offered
Fall

CSD 748 - Cleft Palate

Credits: 1

An overview of communicative disorders related to cleft palate and other structurally-based conditions affecting velopharyngeal function. Research and practical knowledge related to the characteristics, assessment, and treatment of these communicative problems are addressed.

Repeat for Credit
N

Requisites
Prerequisite: CSD 360 and CSD 446.

Typically Offered
Spring

CSD 750 - Voice Disorders

Credits: 3

The etiologies and characteristics of voice disorders, as well as general principles of assessment, prevention, and treatment of these disorders, are presented. The role of the speech-language pathologist in rehabilitation planning following treatment for laryngeal cancer is also addressed.

Repeat for Credit
N

Requisites
Prerequisite: CSD 360.

Typically Offered
Fall

CSD 780 - Instrumental Measurement for Clinical Application

Credits: 2

This course addresses instrumentation and measurement procedures for clinical application. Emphasis is placed on measurement tools that relate to subsystems of speaking.

Repeat for Credit
N

Requisites
Prerequisite: CSD 750 or CSD 745

Typically Offered
Spring

CSD 841 - Acquired Language and Cognitive Disorders

Credits: 4

Study of acquired language and cognitive-communicative disorders in adults. Content addresses research and applied knowledge concerning etiologies, evaluation, and treatment of aphasia and communication deficits that result from right hemisphere damage, dementia, and traumatic brain injury.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 580

Typically Offered
Spring

CSD 844 - Dysphagia

Credits: 4

Study of normal and abnormal swallowing in children and adults. Procedures for assessment, diagnosis, and intervention are explored.

Repeat for Credit
Y

Requisites
Prerequisite or Corequisite: CSD 745

Typically Offered
Fall

CSD 847 - Externship in Speech-Language Pathology

Credits: 3-12

Clinical practicum in off-campus sites, including supervised experience in evaluation and treatment of children and adults with communication disorders.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 705.

Typically Offered
Fall, Spring, Summer

CSD 849 - Graduate Topics in Communication Sciences and Disorders

Credits: 1-3

Critical review of recent research related to measurement and modification of speech, hearing, or language deficits.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 560, graduate standing, and consent of the instructor.

Typically Offered
Other

CSD 851 - Professional Issues in Speech-Language Pathology

Credits: 3

An overview of current professional issues in speech-language pathology are addressed. Primary topics include professional and ethical practices, scope of practice and service delivery, interprofessional education and

interprofessional practice, diversity and cultural responsiveness, preparation for employment, and credentialing. Because this is a capstone course, the student must be within three semesters/terms of the graduate program.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 705 and consent of instructor.

Typically Offered
Spring

CSD 897 - Graduate Seminar in Communication Sciences and Disorders

Credits: 1-3

Advanced course providing critical analysis of recent theory and research in a designated topic area.

Repeat for Credit
Y

Requisites
Prerequisite: CSD 560 and consent of the instructor.

Typically Offered
Summer

CSD 899 - MS Research in Communication Sciences and Disorders

Credits: 1-8

Individual research problems in communication sciences and disorders which may form the basis for the master's thesis or report.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CYBR 010 - Cyber Systems Seminar

Credits: 0

CSDD Faculty and Senior-standing students will lead discussions and activities covering topics such as creative problem solving; empathy, ideation, prototyping, and testing as means to innovate discovery in diverse fields.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

CYBR 103 - Computing Principles

Credits: 3

Fundamental concepts of computer science and computational thinking. Topics include the use of abstraction, problem analysis, data representation, algorithms and programming. Students learn to use creative processes to develop computational artifacts. Student activities are designed to appeal to a broad audience, including those underrepresented in computing.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CYBR 137 - Principles of Interactive Digital Storytelling

Credits: 3

This course explores the frontier of narrative innovation and uncovers the unique qualities and capabilities of immersive technologies such as virtual, augmented, and mixed reality in crafting captivating stories. Students will explore theoretical and practical dimensions of designing immersive narratives, learning how to leverage sensory engagement and spatial storytelling techniques to create compelling virtual environments. Students will have a well-rounded understanding of the principles underlying interactive and immersive storytelling and will be equipped with the skills to create profound and engaging narratives

within these revolutionary digital landscapes.

Repeat for Credit
N

Typically Offered
Fall or Spring

CYBR 163 - Fundamentals of Design Thinking

Credits: 3

Students learn how to use the design thinking process to solve problems creatively, collaboratively and empathetically. Additionally, the course equips students with the knowledge of the processes and techniques used to solve problems and innovate in the workplace.

Repeat for Credit
N

Typically Offered
Fall, Spring

CYBR 180 - Introduction to Database Systems

Credits: 3

An introduction to properties and design principles of relational databases. Topics include database terms, E-R Modeling, relational table design and normalization, the relational algebra, Structured Query Language, and the database life cycle. Laboratory work includes the design and implementation of a database.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

CYBR 210 - Interactive Media Development

Credits: 3

In this course, students will learn to create visually rich interactive experiences. It is a course in programming graphics and media, but it is also a course on the relationship between ideas and code. Students will explore topics in math and physics by building programs that simulate and visualize processes in the natural world. Assignments will include major programming projects, such as building a virtual world inhabited by digital characters that display observable behaviors.

Repeat for Credit
N

Typically Offered
Fall or Spring

CYBR 247 - Programming I

Credits: 3

Programming foundations and development of simple video games using a game engine. Topics include programming fundamentals, syntax and semantics, expressions, control statements, object-oriented programming, classes, functions, streams, game engine basics, and visual scripting concepts.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 103.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

CYBR 250 - Hardware and Network Fundamentals

Credits: 3

An introduction to computer systems with an emphasis on the internal workings of computer and network hardware. Hardware topics include data representation in binary, digital logic and the Von-Neumann architecture. Network topics include local-area and wide-area networks, topology, protocols and transmission media. Student activities include proper hardware configurations for various

applications.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

CYBR 280 - Applied Mathematics for Cyber Systems

Credits: 3

This course builds on the foundations of algebra and trigonometry with a focus on mathematical topics used in computer graphics programming. Topics include digital data storage, numerical accuracy and stability, mathematical notation, formal logic, discrete math, sets, implementation of computational algorithms, proof theory, probability and statistics, numerical methods, an introduction to linear algebra with an emphasis on geometric transformations and the kinematics of serial-link systems, difference equations and Markov matrices, and an introduction to projective geometry.

Repeat for Credit
N

Requisites
Prerequisites: MATH 100, MATH 150, CYBR 103

Typically Offered
Fall or Spring

CYBR 301 - Immersive COOP Studio I

Credits: 3

Cooperative education is a work experience designed to supplement the educational process. Students will engage in on-campus activities designated as cooperative education, including relevant industrial experience, entrepreneurial activities, as well as faculty-supervised research and innovation opportunities.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 210

Typically Offered
Summer

CYBR 310 - 3D Animation and Asset Production for XR

Credits: 3

This course provides an overview of 3D game asset production. Basic ideas learned within the first asset production course are also revisited within the 3D environments. Topics covered include modeling, texturing, skinning and animation. Emphasis is put on low polygon modeling techniques, best practices in game art production, and effective communication strategies between artists, programmers, and designers.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 332

Typically Offered
Fall or Spring

CYBR 320 - Foundations of Interactive Narratives

Credits: 3

This course focuses on the major elements of narrative for interactive environments. Students in this course explore the basics of narrative in the context of interactive games and media, with examination of digital storytelling in games and interactive environments of several varieties. Branching narratives, hypertext, multi- and non-linear concepts are also explored with an emphasis on balancing immersive and interactive aspects of digital narrative.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 137

Typically Offered
Fall or Spring

CYBR 322 - Multi-platform Interactive Media Design

Credits: 3

Interactive media applications are no longer restricted to personal computers. They can now be found on many distinct hardware platforms including mobile, tablet, wearable, and spatial computing devices. In this course, students will learn to design, prototype and develop media rich interactive experiences that can be deployed to a wide variety of hardware devices. Programming projects are required.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 210. Corequisite: CYBR 247

Typically Offered
Fall or Spring

CYBR 330 - Interactive Game and Audio Design

Credits: 3

This course provides students with exposure to the design, creation and production of audio in interactive applications and computer games. Students will become familiar with the use of sound libraries, recording sounds in the studio and in the field, generating sound with synthesizers, and effects processing. Students will create sound designs for interactive media, integrating music, dialog, ambient sound, sound effects and interface sounds within interactive programs.

Repeat for Credit
N

Requisites
Prerequisites: CYBR 137 and CYBR 210

Typically Offered
Fall or Spring

CYBR 332 - 3D Design and Modeling for XR

Credits: 3

This course focuses on the digital composition of three-dimensional forms and the relationship to space in an XR environment. The course covers methods for 3D modeling and problem-solving. Students will build a toolkit around topics such as 3D design principles, materials, and building processes. Additionally, an awareness of idea development and design research will be explored throughout the course.

Repeat for Credit
N

Typically Offered
Fall or Spring

CYBR 335 - Programming II

Credits: 3

Help students master basic concepts and become competent coders. Topics include object-oriented programming, pointers, inheritance, recursion, sorting and search algorithms, and advanced concepts such as overloading and memory management. Covers leveraging artificial intelligence in a game engine and explores various project types such as simulation, animation, and gaming.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 103 and CYBR 247.
Corequisite: CYBR 180.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CYBR 357 - Computer Vision for Immersive Systems

Credits: 3

Computer vision for immersive systems is a comprehensive course that explores how machines interpret visual data. This multidisciplinary subject combines elements of artificial intelligence, machine learning, image processing, and computational models to replicate human visual perception. Students delve into algorithms for object detection, facial recognition, and scene understanding,

among others. Emphasizing both theoretical understanding and practical application, the course fosters innovation in areas like autonomous systems, robotics, extended and augmented reality.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 247

Typically Offered
Fall or Spring

CYBR 360 - Foundations of Game Engine Design and Development

Credits: 3

This course builds on the geometric transformation and projective geometry concepts of the Applied Mathematics for Cyber Systems course to provide students with theory and practical skills in game engine design. Topics include the graphics pipeline as it influences engine design, hardware principles and the relationship to game engine construction, mathematical principles involved in game engine design, scene graph construction and maintenance, texture and materials management, collision systems, physics systems, particle systems, and control systems. Furthermore, this course will examine software and toolsets that assist game engine designers in their tasks. Students will be expected to design and implement a game engine in teams as well as properly document their design and development strategy.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 280

Typically Offered
Fall or Spring

CYBR 365 - User Experience (UX) Design for Immersive Systems

Credits: 3

This course is an introduction to User Experience (UX) Design in the field of Digital Media and Immersive Systems. The course teaches and prepares students on how to use techniques of discovery and evaluation in the UX design process. Students will learn how to use digital toolkits to gather information about what users need within a UX framework and how to design and model interfaces based on UX Design best practices.

Repeat for Credit
N

Requisites
Corequisite: CYBR 137

Typically Offered
Spring, Summer

CYBR 366 - Cyber Security Operations

Credits: 3

Cyber security operations is an immersive course diving into the complex world of computer networks, digital security, information security (INFOSEC) and cyber threats. Covering topics from system risk assessments, threats, vulnerabilities, impact, effective countermeasures, and end-to-end communications
security (COMSEC); students learn to build robust security solutions, protect PII and information/data to national critical infrastructure, and combat cybercrime. Ideal for future cyber technology professionals, the course merges theory with hands-on labs, ensuring students gain crucial practical experience in this increasingly vital and rapidly evolving field of immersive cyber systems.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 250

Typically Offered
Fall or Spring

CYBR 391 - Data Structures and Algorithms for Cyber Systems

Credits: 3

This course focuses upon the application of data structures and associated algorithms to the development of software applications. Topics include interfaces, design patterns, arrays, stacks, queues, lists, trees, hash tables, graphs, recursion, data structure search and traversals, and dynamic programming. The software design patterns related to graphical applications is emphasized. Programming

assignments are a required part of this course.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 280. Corequisite: CYBR 335

Typically Offered
Fall or Spring

CYBR 401 - Immersive COOP Studio II

Credits: 3

Cooperative education is a work experience designed to supplement the educational process. Students will engage in on-campus activities designated as cooperative education, including relevant industrial experience, entrepreneurial activities, as well as faculty-supervised research and innovation opportunities.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 301

Typically Offered
Summer

CYBR 443 - Interactive Systems Design for Virtual Reality (VR)

Credits: 3

This project-based course is an investigation of VR as an illustrative, imaging, and graphical generation medium. It develops foundational design skills in immersive media creation, editing, compositing, layout and visual design for production. Emphasis will be on the application of visual design organization methods and principles for virtual reality media.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 210 and CYBR 280. Corequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 445 - Interactive Systems Design for Augmented Reality (AR)

Credits: 3

Through project-based studies, this course explores perceptual understanding, including aesthetics, graphic form, structure, concept development, visual organization methods and interaction principles for AR media. Students will design immersive and dynamic AR solutions to communication problems for interactive projects. Students will focus on creating appropriate and usable immersive design systems through the successful application of design theory and best practices.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 210 and CYBR 280. Corequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 455 - Human Computer Interactions for Cyber Systems

Credits: 3

Explores psychology and computing convergence in the design of cyber systems for human use. Focuses users' various sensory, motor, and cognitive abilities to use technology. Discusses predictive modeling, heuristic evaluation, interpretive methods, experimental testing, information presentation, task analysis, prototyping and the iterative design cycle, user interface implementation, and interface evaluation.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 280 and CYBR 335. Corequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 457 - Intelligent Spatial Computing Systems

Credits: 3

Students will engage in the development and application of spatial computing and machine learning technologies. Additionally, students will create interactive digital media systems that intelligently perceive and interconnect with the physical world. The curriculum blends theoretical foundations with real-world project work.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 280 and CYBR 335. Corequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 459 - Real-time Computing Systems

Credits: 3

Introduces design and applications of real-time computing systems. Explores traditional hard real-time concepts, design, and implementation to ensure timing guarantees and safety. Develop a deeper understanding of real-time aspects of system components such as OS, memory, scheduling, communication, timing and fault management.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 280 and CYBR 335. Corequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 460 - Software Engineering for Intelligent Cyber Systems

Credits: 3

Project creation, from concept to final output, and provides insights into workflows, tools, and techniques. Discusses integrations that streamline workflows by providing a single platform for real-time management of projects, assets, tasks, and versions. Track the progress of assets through the pipeline, implementation and testing strategies, software principles, and metrics. Delves into more advanced topics like intelligent systems and case studies from industry professionals.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 335

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

CYBR 495 - Immersive Cyber Systems Capstone I

Credits: 3

Through formal studies and perceptual understanding, including aesthetics, graphic form, structure, concept development, visual organization methods and interaction principles, students will design immersive and dynamic solutions to communication problems for interactive projects. Students will focus on creating appropriate and usable immersive design systems through the successful application of design theory and best practices.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 360

Typically Offered
Fall or Spring

CYBR 497 - Immersive Cyber Systems Capstone II

Credits: 3

This course is designed to engage the ISDD major in a capstone production experience. The instructor will form interdisciplinary student teams that will design, plan, prototype, and implement immersive systems projects. Student groups are required to test their product with users and provide written feedback and analysis. Students will be evaluated on individual contributions and their team's final capstone project.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 495

Typically Offered
Fall or Spring

CYBR 601 - Introduction to Cybernetic Modeling and Simulation

Credits: 3

Students will learn various cybernetic modeling and simulation methods to be applied within the context of complex integrated systems. Multiple simulation techniques and methodologies will be covered. This includes: Model Based Systems Engineering, Agent-Based Modeling, Discrete Event Simulation, and System Dynamics Simulation

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall, Spring, Summer

CYBR 603 - Integrated Systems Architecture

Credits: 3

Students are introduced to the principles and methods of Systems Architecture and includes: the resolution of ambiguity to identify system goals and boundaries; the creative process of mapping form to function; and the analysis of complexity and methods of decomposition and re-integration. Both heuristic and formal methods are covered within the context of this course.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

CYBR 680 - Cyber Systems and Risk Analysis

Credits: 3

An introductory course in Cyber Systems history, elements, regulations, operations, use of geospatial data; automation, safety issues; detect and avoid systems; sensors and payloads, human factors, and future. Special attention to Cyber Security Risks, Threats, Impact, Vulnerabilities, and Countermeasures will be identified. The Ryan-Nichols Risk Assessment equations will be used for qualitative risk analysis of threats so identified.

Repeat for Credit
N

Typically Offered
Fall

CYBR 682 - Open Source Cyber Surveillance

Credits: 3

This course questions the technical gaps, Intelligence Community (IC) assumptions, and important legal issues related to open source cyber surveillance with emphasis on Cyber Systems activities/deployment. Topics addressed include the responsible, legal, and ethical use of data and information gathered from the use of unmanned, semiautonomous systems, web data mining, social networks, and other modern technological systems.

Repeat for Credit
N

Typically Offered
Fall

CYBR 684 - Advanced Topics in Cyber Data Fusion

Credits: 3

This course is scenario-based, applying cyber surveillance techniques and analysis of collected data to realistic, terrain-oriented problems. Topics include the digital soldier and sailor, 360-degree battlefield awareness and the use of semiautonomous and fully autonomous technologies. Risk Assessment and Cyber Security countermeasures are the "glue" to successful implementation of data fusion techniques. The Ryan-Nichols Risk Assessment equations and other methods will be used for qualitative risk analysis of identified Cyber Threats.

Repeat for Credit
N

Typically Offered
Spring

CYBR 686 - Risk Management for Cyber Operations

Credits: 3

Cyber operations is focused on performing defensive and offensive security tasks to help assess organizational security postures of many government agencies. In this course, students will explore risk management strategies in both Defensive Cyber Operations (DCO) and Offensive Cyber Operations (OCO), as well as the tasks performed by each. Students will also be introduced to the Cyber Operations Cycle and its phases as well as the responsibilities of each member and their role within offensive and defensive teams.

Repeat for Credit
N

Typically Offered
Spring

CYBR 688 - Sense and Avoid Technologies in Aerospace Systems

Credits: 3

An advanced course in Sense and Avoid (SAA) technologies for Aerospace Systems. SAA is an extremely important concept and is the main obstacle for wider application of Aerospace Systems in non-segregated airspace related to traffic safety in civilian and military/ defense domains. This course presents the state-of-the-art research results from British, American, Australian and European universities, as well as corporate organizations such as Boeing and MITRE.

Repeat for Credit
N

Typically Offered
Fall

CYBR 707 - Research Methods, Design, and Analysis

Credits: 5

Survey of qualitative, quantitative, and design science research methods; using a range of tools to develop applied research skills focusing on research planning, roadmap development, systematic review, experimental design, testing, journal publication, and patent creation.

Repeat for Credit
N

Typically Offered
Fall, Spring

CYBR 708 - Cybernetic Systems Design and Dynamics

Credits: 3

Students survey and apply cybernetic techniques in analyzing and modeling complex systems. Requirements are derived in various domains and abstracted at conceptual, logical, and physical levels. Process, data, and state modeling are applied through industry projects that follow various systems development lifecycle."

Repeat for Credit
N

Typically Offered
Fall, Spring

CYBR 710 - Advanced Data Analytics for Cybernetic Systems

Credits: 3

This course prepares students to gather, describe, and analyze data, and use advanced statistical tools to make decisions on operations, risk management, finance, marketing, etc. Analysis is done targeting economic and financial decisions in complex systems that involve multiple partners. Topics include probability, statistics (hypothesis testing, regression), clustering, decision trees, and forecasting.

Repeat for Credit
N

Requisites
Prerequisite: Prior experience in programming and statistics.

Typically Offered
Fall, Spring

CYBR 751 - Cyber Defense Methods

Credits: 3

The course explores defense-in-depth techniques of layering people, process and technology controls to secure the enterprise. Topics include information security law, ethics, security concepts and mechanisms; security technologies; authentication mechanisms; mandatory and discretionary controls; basic cryptography and its applications; digital forensics, biometrics database security, intrusion detection and prevention, anonymity and privacy issues for information systems.

Repeat for Credit
N

Typically Offered
Fall, Spring

CYBR 760 - Aerospace Cybersecurity Studio

Credits: 3

The course provides a culminating experience for majors involving a substantive cybersecurity project that demonstrates a synthesis of learning accumulated in the major, including broadly comprehensive knowledge of the discipline and its methodologies. Students are required to synthesize, architect, design, and present applied cyber operations techniques within an industry context.

Repeat for Credit
N

Typically Offered
Fall, Spring

CYBR 780 - Design and Operations for Cyber Human Systems

Credits: 3

This course will introduce students to the intelligent systems approach to designing, building, and operating complex cyber human systems; requirements, functional decomposition, systems architecting, analysis of alternatives, project life cycle modeling, cost analysis, and technical performance measurement.

Repeat for Credit
N

Typically Offered
Fall or Spring

CYBR 782 - Social Computing Dynamics and Cyber Human Systems

Credits: 3

This course will orient students towards the Cyber Physical Social Systems (CPSS) paradigm. Students will be engaged in CPSS thinking, system dynamics, urban policy analysis, and social computing applications to organizational trust and operations. Additionally, students will be introduced to key principles of cyber systems, cybernetic systems theory, technological integrations, cyber marketing patterns, and technology adoption.

Repeat for Credit
N

Typically Offered
Fall

CYBR 783 - Interaction Design for Extended Reality Environments

Credits: 3

Students in this course will work on the interaction design of dialogues for interactive extended reality environments. The course will explore the psychological, physiological, linguistic, and perceptual factors of immersive environments. Students will learn the advantages and disadvantages of various interaction techniques, command language syntaxes, and data presentations.

Repeat for Credit
N

Typically Offered
Spring

CYBR 790 - Spatial Computing for Virtual Environments

Credits: 3

Covers tools and techniques for modeling, simulation, visualization and analysis of physical and virtual systems with an emphasis on multi-domain environments. Examples include airplanes, helicopters, trains, ships, cars, submarines, tanks, construction equipment, weapon

systems, air traffic control, flight simulation, and gaming. Development of models towards immersive augmented and virtual reality simulations will also be explored.

Repeat for Credit
N

Requisites
Prerequisite: CMST 190 and CMST 290 or an equivalent undergraduate course in computing principles

Typically Offered
Fall

CYBR 793 - Computer Geometry for Modeling

Credits: 3

Covers numerical and computer representations of curves and surfaces. This includes but is not limited to: geometric data management, interpolation methods. graph-based models, boolean models, solid geometry modeling, cubic B-splines, Bezier curves and surfaces. Additionally, industry applications towards robotics, computer graphics, and immersive systems development will be explored.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 790

Typically Offered
Fall

CYBR 795 - Machine Learning for Simulations

Credits: 3

Fundamental concepts and techniques of modeling, simulating, visualizing, and analyzing complex real-world quantitative and qualitative systems of systems by using artificial intelligence, knowledge acquisition and representation, reasoning, planning, machine learning, expert systems, intelligent agents and multi-agent systems, and search strategies; emphasizes practical applications for creating intelligent simulations.

Repeat for Credit
N

Requisites
Prerequisite: CYBR 790

Typically Offered
Spring

CYBR 799 - Special Topics in Cyber Systems

Credits: 0-6

Offered on sufficient demand. Advanced topics in the science, technology, or engineering of cyber systems.

Repeat for Credit
Y

Requisites
Prerequisite: Varies with announced topic.

Typically Offered
Fall, Spring, Summer

CYBR 801 - Prototyping for Advanced Immersive Systems

Credits: 3

Students will be given the opportunity to develop immersive experiences for high-end, experimental, and prototype equipment that is only available to students in this course. Students will learn how to work with complex immersive equipment systems and early access software in a collaborative online studio environment.

Repeat for Credit
N

Typically Offered
Spring

CZECH 101 - Czech for Travelers

Credits: 2

Introduction to the Czech language with emphasis on everyday expressions and vocabulary. History, social life, politics and other cultural issues are also introduced.

Note
Recommended for students participating in study abroad programs.

Repeat for Credit

N

Typically Offered
Other

K-State Core
6 Arts and Humanities

DANCE 110 - Breathe, Move, Be

Credits: 3

Through gentle movement, body awareness and breathing exercises, this course introduces students to the holistic well-being, movement efficiency and creative choice-making that are the result of somatic movement education. A wonderful foundation for any movement practice and excellent recuperation from the demands of academic life, this course is accessible to those with no prior movement training and prioritizes self-knowledge, acquired through the living body.

Repeat for Credit
Y

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

DANCE 115 - Yoga for Restoration

Credits: 3

Improve balance, flexibility and body awareness through an exploration of Yoga postures and breathing exercises. Excellent cross-training and recuperation for performers and athletes, this course also serves anyone seeking to strengthen their body to calm their mind. Key alignment principles and standard modifications to increase or decrease difficulty will be introduced, as will be the basics of Yoga philosophy.

Repeat for Credit
Y

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

DANCE 120 - Contemporary Dance I

Credits: 2-3

Introduction to principles of contemporary dance. Emphasis on correct body alignment, movement efficiency, and creative potential of the individual.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

DANCE 165 - Ballet I

Credits: 2-3

Introduction to basics of classical ballet training includes terminology, body positions, movement vocabulary, and principles of body alignment.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

DANCE 171 - Jazz Dance I

Credits: 2-3

A basic course in jazz technique and style, focusing on isolations, rhythmic articulation, and the control and release of energy.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 181 - Tap I

Credits: 2-3

Designed for beginning dancers, this course develops skills, knowledge, vocabulary, and appreciation of tap dance as an art form through the presentation of fundamental tap techniques.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 200 - Anatomy for Dancers

Credits: 1

Analysis of human skeletal structure. Application and implication for performance, teaching, and injury prevention.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation

DANCE 205 - Dance as an Art Form

Credits: 3

Dance in its religious, social, and artistic forms. Film, slides, demonstrations, and lectures will trace the function of dance in society, the influence of society on dance, how dance relates to other art forms, and current trends in the dance world.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

DANCE 215 - Improvisational Structures

Credits: 2-3

Exploration of personal creative sources for spontaneous movement through improvisational structures. Emphasis on solo and group problem-solving in creating a performance work.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

DANCE 220 - Principles of Dance Technology

Credits: 1-3

Examination and application of computer, audio, and video technology to dance. Includes instruction and use in performance, choreography, education and research.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 225 - Rhythmic Notation for Dance

Credits: 1

Introduction to basic elements of meter, tempo, rhythm, and notation. Application and practice to dance pedagogy,

performance, and choreography.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

DANCE 240 - West African Styles of Social Dance and Music

Credits: 2

Explores several styles of dancing and drumming from West Africa. Instruction includes technique in the traditional social dances, drumming/musical skills, and songs for the social dances. History, traditions, and social context of the dances.

Note
No prior experience is necessary. All musical instruments are supplied for class.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Global Issues and Perspectives

DANCE 250 - Performance Styles

Credits: 1

Study and practice of technique and performance of specific period/historical, character, or ethnic/specialty dance styles.

Repeat for Credit
Y

Typically Offered
On sufficient demand

K-State 8
Aesthetic Interpretation

DANCE 265 - Pointe Techniques

Credits: 1

Covers classical ballet pointe technique. Focuses on the development of both technique and artistic expression.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DANCE 280 - Musical Theatre Dance

Credits: 2-3

History, technique and performance of musical theatre dance. Rehearsal and performance of selected examples of Broadway choreography.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 120, DANCE 165, or DANCE 171 or permission of instructor.

Typically Offered
Spring-Odd Years

K-State Core
6 Arts and Humanities

K-State 8

DANCE 371 - Jazz Dance II

Credits: 2

Intermediate course in jazz technique and style focusing on development of isolations, rhythmic articulation, and the control and release of energy.

Repeat for Credit
Y

Requisites
Prerequisite: DANCE 171.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

DANCE 372 - Jazz Dance III

Credits: 2

Advanced course in jazz technique and style focusing on development of isolations, rhythmic articulation, and the control and release of energy.

Repeat for Credit
Y

Requisites
Prerequisite: DANCE 371 or consent of instructor.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

DANCE 381 - Tap II

Credits: 2

Designed as an intermediate dance class that targets the

development of skills, knowledge, and appreciation of tap dance through the presentation of fundamental techniques and other movement experiences. Topics include: concert, rhythm, and fundamental tap dance.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 382 - Tap III

Credits: 2

Designed as an advanced dance class that targets the development of skills, knowledge, and appreciation of tap dance through the presentation of techniques and other movement experiences. Topics include: Broadway and concert dance, rhythm, and Funk Tap dance.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 395 - Dance Composition I

Credits: 3

Introduction to the principles of the choreographic craft. Practical experience in development of movement phrases. Culminating presentation and critique of work.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 215.

Typically Offered
Other

K-State 8
Aesthetic Interpretation

DANCE 399 - Honors Seminar

Credits: 3

Open only to qualified students in the arts and sciences honors program.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Aesthetic Interpretation

DANCE 459 - Dance History I

Credits: 3

Covers dance, particularly ballet and modern dance, from beginnings until the turn of 20th century.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 460 - Dance History II

Credits: 3

History of Dance from the 20th Century until the present.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 459.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

DANCE 495 - Dance Composition II

Credits: 3

Advanced training and directed experiences in dance composition. Development of theme, phrasing, and style with particular emphasis on group forms.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 395.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

DANCE 498 - Honors Tutorial in Dance

Credits: 1-3

Individually directed research/creative endeavor in dance, normally as a preliminary to writing a senior honors thesis.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing, membership in the honors program of the College of Arts and Sciences, and permission of instructor.

Typically Offered
On sufficient demand

DANCE 499 - Honors Project

Credits: 3

Open only to Arts and Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

DANCE 502 - Performance Production

Credits: 0-1

Studies in the techniques of dance production and performance. Emphasis is on practical application.

Note
Course may be taken for 0, .5, or 1 credit.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

DANCE 503 - K-State Tap Dance Ensemble

Credits: 0-1

A performing ensemble that dances for the K-State and Manhattan communities.

Note
Audition required in April.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DANCE 504 - Contemporary Dance Ensemble

Credits: 0-1

A contemporary dance repertory and performing ensemble.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DANCE 505 - Methods and Materials of Teaching Dance

Credits: 2

An in-depth survey of the development of dance education and a practical examination of dance for its educative, artistic, disciplinary, and therapeutic values. Emphasis on

role of dance education, pedagogy, and advocacy.

Note
Instructor permission required to enroll.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation

DANCE 506 - Dance Education Fieldwork

Credits: 1

A semester of supervised fieldwork incorporating dance as an educative tool in the classroom, in a therapeutic setting, or in an advocacy position. Application of dance education theory under faculty supervision and conference.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 505.

Typically Offered
On sufficient demand

DANCE 507 - K-State African Dance and Music Ensemble

Credits: 0-1

A performing group that is open to all students and does not require an audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DANCE 509 - CAPSTONE SEMINAR

Credits: 1

Introduction to the dance capstone project fields: choreographic, pedagogical, or research. The course orients students to research methodologies, IRB, and dance production requirements, while providing structured support during the proposal writing and submission process.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 395, DANCE 505, or DANCE 605
or Corequisite: DANCE 395, DANCE 505, or DANCE 605

Typically Offered
Fall

DANCE 510 - CAPSTONE PROJECT

Credits: 2

Student develops and presents culminating interdisciplinary research, choreographic, or pedagogical project.

Repeat for Credit
N

Requisites
Prerequisite: Student is completing secondary major in Dance and the Human Experience.
Pre-Requisite OR Co-Requisite DANCE 509

Typically Offered
Fall, Spring

DANCE 599 - Independent Studies in Dance

Credits: 1-3

Selected topics in dance.

Note
Maximum of 3 hours applicable toward degree. Consent of department head.

Repeat for Credit
Y

Typically Offered
Other

DANCE 605 - Movement: Fundamentals, Analysis, and Observation

Credits: 3

Study, application, observation, and analysis of somatic movement fundamentals and their use in performance, education, and therapeutic practices.

Repeat for Credit
N

Requisites
Prerequisite: DANCE 215 or permission of instructor

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

DAS 020 - University Honors Program

Credits: 0

All students participating in the University Honors Program and who are enrolled in the College of Arts & Sciences must enroll each semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DAS 030 - Introduction to the English Language Program

Credits: 0

The purpose for DAS 030 is to provide a monitoring mechanism for English Language Program students. It also allows the ELP, International Programs and International Pre-admissions to track new international students.

Note
This course is for zero credits.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 032 - Training in Organization, Wellness, Academics, Responsibilities and Discipline in the ELP

Credits: 1-2

This course is designed to engage English Language Program (ELP) students who are at risk due to repeated non-performance in ELP classes. Explores good study skills, healthy living habits, community involvement, self-discipline, and guided study sessions.

Note
One credit required for students after one semester of non-performance, two credits required for continued enrollment for those with repeated non-performance over consecutive semesters. Department placement.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

DAS 050 - National Student Exchange

Credits: 1-15

Enrollment in this course would be required for students participating in the National Student Exchange program. Enrollment in this course would serve primarily as a placeholder and enable the student to maintain full-time enrollment status at K-State. A grade of I (incomplete) would be posted at the end of each term (semester) of enrollment. Upon receipt of the transfer transcript from the chosen exchange institution, the DAS 050 course and would be removed from the student's record and would be replaced by a text entry detailing participation in the National Student Exchange program. The actual hours earned would be reflected as transfer credit from the institution attended.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 080 - Ambassador Service and Leadership in the College of Arts and Sciences

Credits: 0-1

For students who have been chosen as ambassadors for the College of Arts and Sciences. Students are required to enroll to be ambassadors.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DAS 100 - First Year Seminar in K-State Culture

Credits: 3

An overview of the intellectual and cultural life of the university. Students will attend a variety of events as a community and learn to reflect on and evaluate these events through writing, class discussion, and public speaking.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation

Credits: 1

Orients learners to studies in the College of Arts and Sciences, helps learners to develop skills and strategies indicative of success, map their college plan, and compare interdisciplinary ways of knowing and learning across disciplines.

Repeat for Credit
N

Typically Offered
Fall, Spring

DAS 102 - Practicum in Student Governance

Credits: 0-1

Practicum in Student Governance

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

DAS 115 - Orientation to Health Careers

Credits: 1

Acquaints students whose career goals are in the health professions with the variety of options available and with the corresponding academic requirements. Discussion covers an introduction to the personal responsibilities that health-care workers assume and the impact of social and economic problems on our health-care delivery system. Includes an orientation to general requirements for success as a student at K-State and in professional health related programs.

Repeat for Credit
N

Typically Offered
Fall

DAS 130 - Careers in Science and Engineering

Credits: 0-1

Introduction to career opportunities with emphasis on gaining perspective from practicing professionals from multiple science and engineering disciplines through weekly seminars held throughout the semester.

Note
Two lab hours per week.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
DEN 130

DAS 135 - Special Studies in English

Credits: 1-12

Introduction to basic English syntax, writing, reading,

speaking, and listening for native speakers of other languages.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 136 - Beginning English I

Credits: 1-18

Introduction to basic English syntax, writing, reading, speaking, and listening for native speakers of other languages.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 138 - Beginning English II

Credits: 1-18

Introduction to basic English syntax, writing, reading, speaking, and listening for native speakers of other languages.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 140 - Intermediate English I

Credits: 1-18

Intermediate study of basic English sentence structure, writing, reading, speaking and listening for native speakers of other languages.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 148 - Basic English Language Orientation

Credits: 1

Emphasizes the basic cultural and academic understanding necessary for new international students to be successful in ELP and university classes at K-State. Introduction to cultural differences, campus resources, health and safety, study skills, housing issues, plagiarism, basic immigration rules, classroom expectations.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring

DAS 150 - Intermediate English II

Credits: 1-18

Intermediate study of basic English sentence structure, writing, reading, speaking and listening for native speakers of other languages.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 151 - Advanced English Speaking I for Non-native Speakers of English

Credits: 3

Comprehension and appropriate response to non-academic discourse; development of accurate pronunciation, oral grammar, and vocabulary usage. Development of fluency.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 152 - Advanced English Writing I

Credits: 6

Review of advanced grammatical structures; practice in writing using academic style, organization and rhetorical conventions; transition to an academic vocabulary in writing; introduction to conventions of research writing and citation.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 153 - Advanced English Reading I for Non-native Speakers of English

Credits: 6

Introduction to advanced critical reading skills in at level reading passages; introduction to unsimplified academic readings; development of an academic vocabulary; increase of reading speed to approach that of U.S. undergraduates.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 154 - Advanced English Listening I for Non-native Speakers of English

Credits: 3

Comprehension and note-taking of academic lectures at level; introduction to unsimplified academic lectures; comprehension of non-academic discourse at level; use of notes from lecture for test taking.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 156 - Introduction to American Academic Research Writing for International Students

Credits: 1

Introduction to American conventions of research paper writing with emphasis on American academic standards.

Repeat for Credit
N

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring, Summer

DAS 157 - Introduction to American Academic Presentation for International Students

Credits: 1

Introduction to American rhetorical patterns of academic speaking, focusing specifically on deductive and inductive organization patterns and expectations of American audiences.

Repeat for Credit
N

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring, Summer

DAS 158 - Orientation to the American Higher Education System

Credits: 1

Designed to support English Language Program students as they transition to K-State, the English Language Program (ELP), and the Manhattan community. Introduction to the campus resources available.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

DAS 162 - Advanced English Writing II for Non-native Speakers of English

Credits: 6

Use of advanced grammatical structures and academic vocabulary in writing; practice in editing and revision with an eye to academic to academic style, organization and rhetorical conventions; use of conventions of research writing and citation.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 163 - Advanced English Reading II for Non-native Speakers of English

Credits: 3

Development of advanced critical reading skills with unsimplified academic passages; active usage of an academic vocabulary; increase of reading speed equivalent to that of U.S. undergraduates.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 164 - Advanced English Listening II for Non-native Speakers of English

Credits: 3

Comprehension and note-taking of non-simplified academic lectures; comprehension of non-lecture academic discourse; use of notes from lectures and other sources for test taking.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 165 - Advanced English Speaking II for Non-native Speakers of English

Credits: 3

Comprehension and appropriate response to non-academic and academic discourse; development of accurate pronunciation, oral grammar, and vocabulary usage. Development of fluency.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 166 - Advanced English Writing III for Non-native Speakers of English

Credits: 3

Mastery of independent editing and revision with an eye to academic style, organization, rhetorical conventions and register; mastery of conventions of research writing and citation.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 167 - Basic Grammar in Writing

Credits: 3

Review of basic English grammar; practice of basic grammar in writing; review of grammar usage in academic writing; practice in proofreading and editing of work.

Repeat for Credit
N

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring

DAS 168 - Technical Communication for International Students

Credits: 3

Addresses the needs of non-native English speakers studying in the STEM fields. Introduces technical vocabulary, conventions, forms of documents, and practices of written, oral and online technical communication in the United States. Grammar and pronunciation support provided as needed. Student portfolio will include a resume, project proposal, memos, technical report, poster presentation, and personal website.

Repeat for Credit
N

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 169 - Digital English for International Students

Credits: 2

Instruction in online language and communication for international students in order to develop strategies and skills for working effectively in academic digital interaction and collaboration. Includes study of function and use of different web 2.0 tools. Communication skills for intercultural collaboration, and the English language styles and rhetoric appropriate in specific online settings.

Repeat for Credit
N

Requisites
Corequisite: Advanced English II.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

DAS 175 - Business Communications for Non-Native Speakers

Credits: 3

This course will introduce non-native English speakers to

key U.S. business terminology, norms for written and oral communication, and business culture in the U.S. Students will practice business communication and teamwork skills in a hands-on setting.

Note
Students in this course must be enrolled in a degree program in the College of Business Administration.

They must be non-native English speakers.

Students must have completed or achieved part-time status in the English Language Program.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

DAS 176 - Reading Skills for Non-Native Speakers of English

Credits: 3

An advanced course designed to improve reading skills and increase academic vocabulary of non-native speakers of English engaged in academic classes.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DAS 177 - Written Communication for Non-Native Speakers of English

Credits: 3

Instruction in academic reading and writing skills in order to develop reading skills, increase reading speed, and improve writing of reports, analyses, and summaries. Includes grammar review, the study of style, and development of an academic vocabulary.

Repeat for Credit
Y

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring, Summer

DAS 178 - Listening Skills

Credits: 3

Instruction to improve listening, comprehension, and note-taking skills. Instruction in conversational speaking, with an emphasis on developing oral fluency and the effective use of vocabulary and idioms. Includes pronunciation practice, group work, and short academic presentations.

Repeat for Credit
Y

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring, Summer

DAS 179 - Pronunciation and Speaking Skills for Non-Native Speakers of English

Credits: 2-3

Introduction in speaking for non-native speakers of English to improve comprehension of non-simplified conversational English. Practice in asking for clarification, responding appropriately to requests, and encouraging interaction, as well as the pronunciation of troublesome English sounds and intonation patterns. Also brief introduction to American culture, especially the American educational system.

Repeat for Credit
Y

Requisites
Prerequisite: Placement by the English Language Program.

Typically Offered
Fall, Spring

DAS 181 - Advanced Integrated Skills

Credits: 3

An advanced, combined-skills course to improve the reading, writing, and speaking skills of non-native speakers

of English.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DAS 184 - Practical Training in ESL

Credits: 1-2

Introduction to practical classroom skills for the non-education major planning to teach ESL abroad as part of a study abroad or internship abroad experience.

Repeat for Credit
N

Requisites
Prerequisite: Permission by the English Language Program.

Typically Offered
Fall, Spring

DAS 185 - Teaching and Cultural Orientation for International Teaching Assistants

Credits: 3

Introduction to American undergraduate education, American culture, and university policies. Discussion of effective teaching techniques, nonverbal language, and coping techniques. Practice focusing on pronunciation, vocabulary, grammar, and interactive speaking skills. Individual tutorials based on video-taped teaching presentations.

Repeat for Credit
Y

Requisites
Prerequisite: Permission by English Language Program.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

DAS 195 - CAT Community Connections

Credits: 1-3

Interdisciplinary course that explores the connections among two different fields, courses, or disciplines.

Note
For first-year students enrolled in a specific CAT Community linked to the College of Arts and Sciences.

Repeat for Credit
N

Typically Offered
Fall, Spring

DAS 197 - Introduction to Integrated Health Studies

Credits: 1

Acquaints students with the Integrated Health Studies secondary major program themes: social and humanistic dimensions of health, ethics in health sciences, multicultural awareness in health, and scientific and statistical reasoning. Prepares students for integrated learning in the coursework associated with the program to set the tone for the capstone experience. Thematic learning and exposure to digital literacy are key components.

Repeat for Credit
N

Typically Offered
Fall, Spring

DAS 199 - Independent Reading

Credits: 0-3

Independent Reading Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 214 - Introduction to Arts & Sciences Education Theory and Practice

Credits: 0-2

Introduces learning theory and teaching practices for arts and sciences learning assistants. Presents theoretical issues such as conceptual development, questioning techniques, and cooperative learning. Students will read research literature on teaching and learning in arts and sciences and engage in classroom discussions. Students are expected to reflect on their own teaching practices throughout the semester as well.

Note
Student must be admitted to the LA Program to enroll. Permission of instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring

DAS 225 - Fundamentals of Global Food Systems Leadership

Credits: 3

An interdisciplinary approach to the fundamental roles people, policies, and cultures play in the global food system enterprise as it relates to sustainable food production, processing, distribution, and availability. Students will explore complexities within self, others, and community related to leadership in the context of a rapidly increasing global population.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
GENAG 225, LEAD 225

K-State 8
Global Issues and Perspectives

DAS 240 - Practicum in Pre-Health

Credits: 1

Forty hours spent observing the practice of dentistry, medicine, or optometry. Students are under the supervision and direction of individual dentists, physicians, or optometrists.

Repeat for Credit
Y

Requisites
Prerequisite: Sophomore standing, permission of the health professions advisor.

Typically Offered
Fall, Spring, Summer

DAS 315 - Creating a Competitive Health Professional School Application

Credits: 1

For students who are preparing to apply to health professional schools in the coming year. Assist in drafting a personal statement, obtaining letters of recommendation, preparing for the interview process, learning about the Centralized Application Services, as well as other preparation needed for their respective entrance examination. Addresses current trends and topics in health care such as interprofessional education, health care disparities, and cultural competence.

Repeat for Credit
N

Typically Offered
Spring

DAS 325 - Uncertainty in Global Food Systems Leadership

Credits: 3

Explore technical and adaptive elements of grand challenges across disciplines. This course addresses the impact of cultural identity, life experience, and world views on leadership relationships as it relates to privilege and inclusion in the context of global food systems. Students will consider elements of community-engaged work.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 225, DAS 225, or GENAG 225.

Typically Offered
Spring

Cross-listed

GENAG 325, LEAD 325

K-State 8
Human Diversity within the U.S.

DAS 333 - Origins

Credits: 3

An interdisciplinary general education course examining how scholars in the sciences and humanities approach knowledge about the universe, the planet earth, and life itself. How did the universe begin? How did life begin and how does it evolve? How has the planet changed throughout its history? How were answers to these questions discovered? How do we construct narratives about these events, and how do those texts reveal our assumptions and values?

Repeat for Credit
N

Typically Offered
Other

K-State 8
Natural and Physical Sciences

DAS 350 - Topics in the Humanities (Study Abroad)

Credits: 1-18

This is an umbrella course for numerous individual courses offered to students in the humanities in Italy program and other study abroad experiences.

Note
Prerequisite: Permission of the director of the individual study abroad experience.

Repeat for Credit
Y

Typically Offered
Fall

K-State 8
Global Issues and Perspectives

DAS 355 - Introduction to Nonviolence Studies

Credits: 3

The theory and practice of nonviolence as a method of social change and as a personal way of life. This class will engage students in the consideration of violence and nonviolence, from dynamics that occur within ourselves to those that affect the future of the Earth and its many life forms. Students will share with each other from their own lived experience and will learn from the writings of people who have practiced nonviolence in their lives and work.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

DAS 388 - Honors Internship

Credits: 1-3

A scholarly investigation related to activities in a place of employment or in a volunteer situation.

Note
Written and oral presentations are required. Concurrence of a faculty advisor and approval of the arts and sciences honor program advisory council.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

DAS 400 - Undergraduate Research in Arts and Sciences

Credits: 0-3

Independent mentored research project.

Note
Students may but are not required to apply to the Arts & Sciences Undergraduate Research Program and receive an award before enrolling.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment in an Arts & Sciences degree program.

Typically Offered
Fall, Spring, Summer

DAS 401 - Independent Undergraduate Research in Arts and Sciences

Credits: 0-3

Independent mentored research project.

Note
Students are required to apply to the Arts & Sciences Undergraduate Research Program and receive an award before enrolling.

Repeat for Credit
Y

Requisites
Prerequisite: (1) Enrollment in an Arts & Sciences degree program (2) Students must apply to the Arts & Sciences Undergraduate Research Program and receive an award before enrolling

Typically Offered
Fall, Spring, Summer

DAS 405 - Topics in Medical Laboratory Science

Credits: 3-6

Basic principles and practices of the medical laboratory, techniques and special projects.

Note
This course is part of the Medical Laboratory Science curriculum and is not available to students outside of the MLS major.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

DAS 420 - Primary Texts Seminar

Credits: 3

Emphasizes intellectual history through the lens of social and political development. Students will learn about the impacts of cultural developments such as the awakening of ancient idealism, Rennaissance philosophy and literature, the Scientific Revolution, the Enlightenment, and Postmodern philosophy and art.

Note
This course serves as the capstone class for the Primary Texts Certificate, and students in the program will complete their capstone paper within the context of the class, but the course open to all undergraduate students. This course is cross listed with POLSC 420.
Weekly class discussion is required. All reading materials are supplied by the Primary Texts Certificate program.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
POLSC 420

DAS 425 - Global Food Systems Leadership in Action

Credits: 3

In this capstone course, students will conduct a community-engaged global food systems leadership research/service project. Emphasis will be placed on data collection, analysis and dissemination to appropriate audiences. Additional emphases will be on ethical dimensions of leadership and individual exploration of careers and roles within global food systems.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 225, DAS 225, or GENAG 225 and LEAD 325, DAS 325, or GENAG 325

Typically Offered

Fall

Cross-listed
GENAG 425, LEAD 425

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

DAS 450 - Honors Colloquium

Credits: 3

An interdisciplinary colloquium in which topics vary by semester. Consistently incorporates perspectives from more than one discipline and area among the arts, humanities, social sciences, and sciences.

Repeat for Credit
N

Requisites
Prerequisite: Membership in the honors program; one honors course in addition to introduction to the honors Program in the College of Arts and Sciences.

Typically Offered
Other

DAS 455 - Violence, Nonviolence and Social Change

Credits: 3

This course reviews historical and contemporary responses to violence around the world by studying ideas, strategies, organizational approaches, and societal impacts on nonviolence and social change. Emphasis is placed on historical antecedents to recent violence and nonviolence, and on the analysis of up-to-date resources as they relate to social change.

Repeat for Credit

Requisites
Prerequisite: DAS 355.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

DAS 475 - Nonviolence Studies: Women and Peace Movements

Credits: 3

Analyzes women and girls as leaders of diverse peace movements in the present and recent past.

Repeat for Credit
N

Requisites
Prerequisite: DAS 355.

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

DAS 496 - Integrated Computer Science Capstone

Credits: 1

Capstone project for the Integrated Computer Science Major.

Note
Majors only

Repeat for Credit
N

Requisites
Prerequisite: Instructor permission, senior in Integrated Computer Science

Typically Offered
Fall or Spring

DAS 497 - Integrated Health Studies Capstone

Credits: 0-2

Capstone experience for the Integrated Health Studies Secondary Major. Follows the structure of the major,

fostering integration of learning through the application of knowledge and skills from different areas. Concludes with individual exploration and guided research in an area of specific interest to the student that integrates or synthesizes different aspects of health studies.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in Integrated Health Studies Secondary major.

Typically Offered
Fall, Spring, Summer

DAS 498 - Social Sciences Capstone

Credits: 1

Individual exploration of the social science major to synthesize knowledge and skills acquired in social science courses.

Repeat for Credit
N

Requisites
senior standing in social science major

Typically Offered
Fall, Spring

DAS 499 - Physical Sciences Senior Report

Credits: 1

Individual exploration of an area of physical sciences culminating in a final formal written report. Capstone course required of physical sciences interdisciplinary major.

Note
Permission of physical sciences advisor.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

DAS 501 - Health Science Clinical Training

Credits: 3-12

Clinical training for affiliated partners.

Note
Consent of advisor required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DAS 506 - Undergraduate Cancer Research

Credits: 1

Independent mentored research on a cancer-related research project. Includes three seminars covering an introduction to cancer and cancer research, responsible conduct in research, and keeping laboratory notebooks. Students will present brief oral and/or poster presentations on their research project and its relevance to cancer.

Note
The student must have received a Johnson Cancer Research Center Undergraduate Cancer Research Award (CRA) prior to enrolling for the credit.

Repeat for Credit
Y

Typically Offered
Spring

DAS 507 - Senior Research in Latin American Studies

Credits: 3

Independent research product under supervision by director of Latin American Studies.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

DAS 525 - Senior Research in International Studies

Credits: 3

A research paper or project on an international topic.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

DAS 550 - Advanced Topics in the Humanities (Study Abroad)

Credits: 0-18

This is an umbrella course for numerous individual courses offered to students in the Humanities in Italy program and other study abroad experiences.

Note
Permission of the director of the individual study abroad experience.

Repeat for Credit
Y

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

DAS 555 - Themes in Nonviolence Studies

Credits: 3

Explores nonviolence from a national and global perspective, with particular emphasis on emergent techniques and themes in nonviolence studies with particular emphasis on conflict resolution, peacekeeping and peacebuilding, and intersections of gender, race, class, ethnicity, and religion.

Repeat for Credit
Y

Requisites
Recommended prerequisite: DAS 355.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

DAS 575 - Peacebuilding

Credits: 3

Explores how social problems, violence and war are generated and how people are working to build conditions that produce peace. Students will analyze peacebuilding efforts at home, in communities, in countries, in regions, and in the global social system.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

DAS 582 - Natural Resources Environmental Sciences Project

Credits: 3

A comprehensive project in NRES. Requires integration of information and understanding acquired in NRES secondary major courses. Students must prepare and present written and oral reports.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: All writing and oral communications courses required for major. Prerequisite or concurrent enrollment: Fifteen hours of approved courses in NRES secondary

major.

Typically Offered
Fall, Spring

Cross-listed
GENAG 582 and DEN 582

K-State 8
Natural and Physical Sciences
Social Sciences

DAS 590 - Applied Nonviolence

Credits: 3

The capstone experience for the Undergraduate Certificate in Nonviolence Studies, includes field placement in a campus or community organization in which student will have a skill-and-research-based experience in nonviolence-related social change project. Projects can be local, regional, national, or international in scope. Concurrently, students will engage in academic readings and class sessions that address feminist and nonviolent approaches to social change, program design, and participatory action research. This course will provide students with professional and academic skills that relate to employment and graduate work in diverse fields.

Repeat for Credit
N

Requisites
Prerequisite: DAS 355.

Typically Offered
Spring-Even Years

Cross-listed
WOMST 590 Women's Studies Practice and Theory

K-State 8
Ethical Reasoning and Responsibility

DED 020 - Honors Program

Credits: 0

All students accepted into the College of Education honors program must enroll each semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DED 051 - Study Skills Laboratory

Credits: 1-3

Helps the student to learn effective study methods, analyze difficulties in reading and studying, and prepare for and improve performance in examinations.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DED 100 - Pre-Professional Laboratory Experiences

Credits: 1

Supervised experiences in education designed to facilitate orientation and investigation of teaching through the teacher aide program.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DED 150 - Topics in Education

Credits: 0-12

A study of topics in the field of education.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DED 189 - Introduction to the University Honors Program

Credits: 1-3

Overview of the University Honors Program including directions, goals, and student requirements for completion

of the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

DED 320 - Honors Seminar

Credits: 1

Selected topics in education.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DED 350 - Problems in Education

Credits: 0-12

A study of topics in the field of education.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DED 420 - Honors Project

Credits: 0-3

Individual projects under the supervision of a professor.

Repeat for Credit
Y

Requisites
Prerequisite: Participation in COE Honors Program.

Typically Offered
Fall, Spring, Summer

DED 895 - Preparing for the Professoriate in Education

Credits: 1

This course targets graduate students who plan to enter the professoriate in education. Examines topics such as the job search, integration into the professoriate, expectations for promotion and tenure, and achievement in academia.

Repeat for Credit
N

Typically Offered
Spring

DEN 015 - Engineering Student Success Seminar

Credits: 0

Supports engineering students in identifying potential barriers to student success and gaining access to related campus resources. Students will participate in interactive small groups and discussions. This course will also assist students in developing effective academic skills including, but not limited to: time management, organization, learning styles, effective communication, academic planning and goal setting.

Note
One hour per week.

Repeat for Credit
Y

Requisites
Prerequisite: General Engineering students only.
Prerequisite and/or co-requisite: Math 100 or Math 150.

Typically Offered
Fall, Spring

DEN 060 - Reinstatement Support

Credits: 0

Students who have been reinstated into the College of Engineering must enroll in this course. This course will provide frequent communication and support in the areas of study skills and time management.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DEN 120 - Multicultural Engineering Enrichment Seminar

Credits: 1

Introduction to the academic and intellectual demands of an engineering curriculum from a multicultural perspective. Develop group cohesiveness and an attitude of mutual support by engaging in collaborative learning. Help students acquire effective study methods, analyze/compare learning/teaching styles, prepare for and improve examination performance, promote optimum utilization of campus resources, develop leadership and communication skills and enhance self-esteem.

Note
Credit may not be applied towards an engineering degree.

Repeat for Credit
Y

Typically Offered
Fall

DEN 130 - Careers in Science and Engineering

Credits: 0-1

Introduction to career opportunities with emphasis on gaining perspective from practicing professionals from multiple science and engineering disciplines through weekly seminars held throughout the semester.

Note
Two lab hours per week.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
DAS 130

DEN 160 - College of Engineering Orientation

Credits: 1

Help incoming K-State students' transition to the college of engineering. Students will be introduced to the requirements and expectations of the college of engineering. They will be exposed to tools to promote student success, professional development, and professionalism. Additionally, students will be introduced to all majors offered at K-State in the college of engineering and will be assisted in evaluating their options in order to select the most compatible major.

Repeat for Credit
N

Requisites
College of Engineering majors only; or instructor permission

Typically Offered
Fall, Spring

DEN 161 - Engineering Problem Solving

Credits: 1

Introduction to application-oriented engineering problem solving skills using fundamental engineering problems specific to each discipline, teamwork, and communication skills.

Note
Two hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Freshmen or Sophomore only. B or better in MATH 100; OR C or better in MATH 150; OR Prerequisite or co-requisite: MATH 220.

Typically Offered
Fall, Spring

DEN 189 - Introduction to the University Honors Program

Credits: 1

Overview of the University Honors Program, including directions, goals and student requirements for completion of the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

DEN 220 - Multicultural Engineering Colloquium

Credits: 1

Continuation of DEN 120. Emphasis on career exploration and development, introduction to graduate school options, preparation and responsibility for advising process, tips on breaking the failure cycle, behavior modification strategies, and developing and utilizing leadership skills.

Note
Credit may not be applied towards an engineering degree.

Repeat for Credit
N

Typically Offered
Spring

DEN 301 - Creative Problem Solving in Engineering

Credits: 1

Overview of major topics related to creative thinking, including idea development, overcoming personal and professional obstacles, managing change, effective problem solving, and teamwork productivity.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing or consent of instructor.

Typically Offered
Spring

DEN 325 - Engineering Professionalism and Decision Making

Credits: 1

An introduction to the complexities of making decisions as an engineer. Students will explore the relationship between ethics and engineering by applying classical moral theory and decision making concepts to evaluate engineering issues and decisions encountered in academic and professional careers.

Note
One hour lecture and one hour activity a week.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

DEN 398 - Problems in Engineering and Technology

Credits: 0-4

A study of problems or topics in a specialized area of engineering or technology.

Note
Approval of department head or dean.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DEN 399 - Honors Colloquium in Engineering

Credits: 1

Selected topics of general interest.

Note
Open to students in the engineering honors program for one semester.

Repeat for Credit
N

Typically Offered
Spring

DEN 450 - Impact of Technology on Society

Credits: 3

A study of social, economic, and environmental problems as a function of technology. Study of effect of various significant technological developments on present society and parallels with present developments. Study of current problems, detection of causes, and analysis of solutions. Implications for the future; governmental, industrial, and individual responsibility in detection of potential problems and methods of control or solution.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing or above.

Typically Offered
Fall, Spring

DEN 499 - Honors Research in Engineering

Credits: 1

Individual research problem selected with approval of faculty advisor. Written report is presented at end of second semester.

Note
Open to seniors in the engineering honors program for two semesters.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DEN 590 - Interdisciplinary Engineering Capstone Design Experience I

Credits: 0-4

Provides culminating capstone engineering hands-on experiences for students from different degree programs in the Carl R. Ice College of Engineering, working collectively as interdisciplinary project teams. This class focuses on solving real-world complex engineering problems through the application of engineering design principles, engineering science/analyses, and interdisciplinary collaboration and innovation. Students will work in teams with the facilitation of instructors to design, build, and test engineering devices, prototypes, simulation models, or data/computing-based solutions using a design process with design reviews and presentations.

Note
Credit hours variable depending on department requirements. Instructor permission.

Repeat for Credit
N

Typically Offered
Fall, Spring

DEN 591 - Interdisciplinary Engineering Capstone Design Experience II

Credits: 0-4

Continuation of the capstone engineering hands-on experiences for students from different degree programs in the Carl R. Ice College of Engineering, working collectively as interdisciplinary project teams. This class focuses on solving real-world complex engineering problems through the application of engineering design principles, engineering science/analyses, and interdisciplinary collaboration and innovation. Students will work in teams with the facilitation of instructors to design, build, and test engineering devices, prototypes, simulation models, or data/computing-based solutions using a design process with design reviews and presentations.

Note
Credit hours variable depending on department requirements.

Repeat for Credit
N

Requisites
Prerequisite DEN 590 or instructor permission.

Typically Offered
Fall, Spring

DEN 598 - Topics in Engineering and Technology

Credits: 1-3

A study of problems or topics in a specialized area of engineering or technology.

Note
Approval of department head or dean.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DHE 020 - University Honors Program

Credits: 0

All students participating in the University Honors Program and who are enrolled in the College of Health and Human Sciences must enroll each semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

DHE 102 - Honors Practicum in Research, Teaching, Administration, or Extension

Credits: 0-1

Practicum completed in collaboration with a faculty member that enhances skills in research, teaching, administration, or extension programming.

Repeat for Credit
Y

Requisites
Prerequisite: College of Health and Human Sciences honors program member and consent of honors program coordinator.

Typically Offered
Fall, Spring

DHE 195 - CAT Community Connections

Credits: 1-3

Interdisciplinary course that explores the connections among two different fields, courses, or disciplines. For first-year students enrolled in a specific CAT Community linked to the College of Health and Human Sciences programs.

Repeat for Credit
N

Typically Offered
Fall, Spring

DHE 300 - Conducting Honors Research

Credits: 1

This one credit seminar provides an overview of the process of conducting an honors project, which could be undergraduate research or other scholarly project. The seminar is designed for a sophomore and junior participants in the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring

DHE 399 - Honors Seminar in Human Ecology

Credits: 1

Selected topics in health and human services.

Repeat for Credit
N

Requisites
Prerequisite: For students in honors program only.

Typically Offered
Fall, Spring

DIGME 137 - Fundamentals of Visual Communication

Credits: 3

An examination of the elements of visual design essential to communication with digital technology. Topics include design elements, color theory, graphics creation and optimization, and multimedia. Students receive hands-on

experience with the elements and principles of visual literacy and working with 2-D organization.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

DIGME 256 - Digital Literacy

Credits: 3

Effective digital communications using industry standard technologies to create and edit various media including photographs, videos, sound recordings, websites and other forms of print and online media. Students analyze, evaluate and participate in digital culture. Digital publishing topics include media access, censorship, copyright, fair use, mashups and remixes.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

DIGME 366 - Visual Communication Studio

Credits: 3-6

Students complete portfolio projects that tie together topics related to visual communications design. Content topics include creating graphics, animations, photographs, videos and other relevant visual elements to be viewed in print and digital formats.

Note
Up to nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 333

Typically Offered
Fall

DIGME 376 - Digital Rhetoric

Credits: 3

Provides students with the theoretical and applied understanding of how rhetoric works in online environments. Rhetorical strategies employed in media are explored with a close analysis of genre, digital literacy and the basics of design. Topics include new media, genre, digital literacy and rhetoric.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200

Typically Offered
Spring

DIGME 386 - Digital Media Production Studio

Credits: 3-6

Students complete portfolio projects that tie together topics related digital media production. Content topics include digital manipulation of media with audio editing, video editing, and photo editing tools and techniques.

Note
Up to nine hours studio per week.

Repeat for Credit
N

Requisites
Prerequisite: CMST 333

Typically Offered
Spring

DIGME 406 - Social Media

Credits: 3

An exploration of the social media aspects of producing and consuming digital media content; including blogging, podcasting, and vodcasting. Diversity of the human condition is emphasized. Students will develop and publish an online portfolio of their best digital media work.

Repeat for Credit
N

Requisites
Prerequisite: Experience with PC software.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

DIGME 456 - Digital Media Senior Capstone Project

Credits: 3-6

Provides seniors with the capstone experience of developing a professional quality project in digital media. Students work individually or in teams to develop a significant project in their area of interest. Students are expected to apply the production techniques covered in previous digital media courses, write project documentation, and make verbal presentations. Whenever feasible, real-world projects are solicited from local businesses.

Note
Up to nine hours per studio a week.

Repeat for Credit
N

Requisites
Prerequisite: DIGME 386 and senior standing.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

DMP 313 - Introduction To Epidemiology

Credits: 3

This introductory course explores the concepts, methods, and tools of epidemiology; the science of disease occurrence and distribution. Students will learn how epidemiologists or "disease detectives" gather, analyze, and interpret information on the occurrence of infectious, non-infectious, and chronic diseases. Through examples of current and/or controversial health topics, students will develop skills to read, interpret and evaluate health information from published epidemiologic studies.

Repeat for Credit
N

Typically Offered
Fall

DMP 314 - Environmental and Public Health

Credits: 3

This introductory course explores environmental health, the branch of public health that focuses on relationships between the environment and human health and well-being including the promotion of safe communities at the local, regional, national, and global level. Students will explore physical, chemical, biological, social, and psychosocial factors in the environment that impact human health and the ways in which societies create environmental health hazards. Environmental health issues in globalization, industrialization, and environmental justice, in both developed and developing countries will be discussed. Students will understand the roles of public health professionals, government, and non-governmental agencies in communicating, managing, and protecting environmental and public health.

Repeat for Credit
N

Typically Offered
Fall

DMP 610 - Feedlot Health Systems

Credits: 2

Health of cattle in a commercial feedyard. Includes health risk assessment, cattle handling, processing, vaccination protocols, identification/treatment of sick cattle, necropsy techniques, using computer data to make management decisions for feeder cattle, other management issues. Discussion of disease syndromes and foreign diseases.

Repeat for Credit
N

Typically Offered
Fall

DMP 611 - Cow-Calf Health Systems

Credits: 2

Management of animal well-being and efficient production in a cow-calf system. Includes the areas of health, growth, nutrition, pharmaceutical management, and reproduction.

Repeat for Credit
N

Typically Offered
Fall

DMP 650 - Fundamentals of Public Health and Food Safety

Credits: 3

Organization and function of food inspection services; principles of disease transmission; diseases transmitted to humans through the food chain.

Note
Jointly with HMD 650.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Fall

DMP 680 - Problems in Pathobiology

Credits: 1-5

Problems in Pathobiology

Note
Enrollment is by consent of the instructor. The format and credit hours for the course are determined by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 690 - Essential Practices for BSL-3 Research Settings

Credits: 1

This hands-on laboratory centered course will offer students functional skills training and an in-depth understanding of standard microbiological practices, principles and techniques necessary to safely conduct research in a Biosafety Level-3 setting. Trainees will be exposed to basic concepts such as: research project design, risk assessment, compliance issues, selection of appropriate methods, and introduction to new technologies based on their specific research project. Concurrent enrollment of DMP 691 Introduction to High Containment Research Topics and Techniques is required.

Repeat for Credit
N

Requisites
Corequisite: DMP 691.

Typically Offered
Fall

DMP 691 - Introduction to High Containment Laboratory Topics and Techniques

Credits: 3

This course examines the rationale behind the skills and techniques taught in DMP 690 Essential Practices for High Containment Research Settings. Students will gain familiarity with the regulatory and operational requirements of high containment facilities and discuss best practices in the laboratory. Students review and discuss scientific readings, case studies, topics, and laboratory techniques appropriate for laboratory work conducted in BSL-3, Animal BSL-3 (ABSL-3), and Large Animal BSL-3 (BSL-3Ag) facilities. This course is designed to complement DMP 690 Essential Practices for High Containment Research Settings.

Repeat for Credit
N

Typically Offered
Summer

DMP 710 - Introduction to One Health

Credits: 2

One Health encompasses the complex interrelationships among humans, animals, and the environment. This online course provides a broad introduction to One Health, incorporating original videos of leading experts, case studies, and scientific readings. It addresses zoonotic diseases and environmental issues that impact human, animal, and ecosystem health.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in biology

Typically Offered
Fall

DMP 725 - GIS (Geographic Information System) Applications in Animal and Public Health

Credits: 2

Explores the relevance/benefits of applying GIS (Geographic Information System) and the concept of spatial thinking in animal/public health research and practice. Health relevant GIS concepts and terminologies, nature and sources of geospatial data, their manipulation methods in a GIS environment, and spatial analysis techniques will be presented.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 508, GEOG 605 are recommended.

Typically Offered
Fall, Spring

DMP 726 - GIS (Geographic Information System) Applications in Animal and Public Health Lab

Credits: 1

Through hands-on laboratory exercises different technical methods of applying GIS for health data analysis, spatial analytical methods, model building, cartographic principles and geographic visualization are explored.

Repeat for Credit
N

Requisites
Prerequisite: DMP 725 is required.

Typically Offered
Fall, Spring

DMP 754 - Introduction to Epidemiology

Credits: 3

The purpose of this course is to introduce students to the basic principles and methods of epidemiology in order to recognize and understand how disease affects populations (and the associated implications for individuals). This course will prepare students to use epidemiologic methods to solve current and future challenges to diagnose, treat, prevent, and control disease during their professional training and throughout their career.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
MPH 754

DMP 770 - Emerging Diseases

Credits: 3

An investigation into recently identified emerging diseases, the conditions that enable their emergence, and the human health implications of each disease.

Note
This class is open to all students with some biology background, as well as veterinary students.

Repeat for Credit
N

Requisites
Prerequisite: 3 hours of Biology above a 700 level.

Typically Offered
Summer

DMP 802 - Environmental Health

Credits: 3

This is a three-credit graduate-level course. Students will be exposed to professional practice of environmental sciences, epidemiology, toxicology, occupational health and industrial hygiene, and consumer health and safety. Topics include the methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; ameliorating hazards; and protecting the population through waste management, regulatory programs, environmental inspections, food and product safety, and environmental policy. Participation is required.

Repeat for Credit
N

Typically Offered
Spring, Summer

DMP 810 - Cancer Pathogenesis

Credits: 2

This lecture will meet once a week for 2 hours per period. The first hour of each meeting will consist of brief student presentations of research papers illustrating key concepts presented in the previous lecture. The second hour of each meeting will consist of a lecture on the indicated topic.

Repeat for Credit
N

Typically Offered
Fall-Even Years

DMP 813 - Select Agent Studies

Credits: 3

This course provides an in-depth study of select agent regulations and guidance. Specific topics include a historical overview of select agent regulations, program rationales, tier one regulations, personnel suitability assessments, inventory systems and oversight. Additional content will look outside the select agent program and address other regulations and guidelines which impact high-containment research such as Dual-Use regulations and the NIH Guidelines for Recombinant DNA. The course will also introduce students to specific agents covered under the select agent program, and review characteristics and research considerations when working with these agents.

Repeat for Credit
N

Typically Offered
Summer

DMP 814 - Veterinary Bacteriology & Mycology Lecture

Credits: 3

Veterinary Bacteriology and Mycology, is designed to provide graduate students in pathobiology or related field with basic knowledge of bacteria, fungi and the diseases that they cause primarily in animals. The course is also designed to provide latest information of the pathogenic mechanisms, virulence factors, antigenic nature, zoonosis and disease transmission, treatment and prevention.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255.

Typically Offered
Spring

DMP 815 - Multidisciplinary Thought and Presentation

Credits: 3

Training in critical thinking, writing, and speaking for the food, veterinary, plant, health, and related sciences. With emphasis on writing, students prepare technical reports, news releases, abstracts, and commentaries. Students prepare meeting agendas and present seminars. Committed students will emerge with enhanced critical-thinking and written-presentation skills.

Repeat for Credit
N

Typically Offered
Fall, Spring

DMP 816 - Trade and Agricultural Health

Credits: 2

This course considers the multilateral trading system as it relates to food safety, food security, animal health, plant health, and international cooperation. The course content will be of value to students interested in food safety and security, epidemiology, public health, agriculture, food science, security studies, political science, agricultural economics, veterinary medicine, and international relations.

Repeat for Credit
N

Typically Offered
Spring

DMP 817 - Principles of Veterinary Immunology

Credits: 3

Innate and adaptive defense mechanisms in domestic animals. Topics include vaccinology, immunopathology, autoimmunity, immunodeficiency, and immunomodulation.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521 and BIOL 255.

Typically Offered
Spring

DMP 818 - Veterinary Epidemiology

Credits: 2

Introduction to the principles and methods of veterinary epidemiology: emphasizing how diseases affect populations (and associated implications for individuals), and application to disease diagnosis, treatment, prevention, and control.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
MPH 708

DMP 820 - Rumen Metabolism

Credits: 3

Metabolism, absorption, digestion, and passage of nutrients in the rumen; factors affecting the environment of the rumen; certain aspects of rumen function and dysfunction; techniques used in rumen research.

Note
Three one-hour lectures a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 218 and BIOCH 521 or BIOCH 755.

Typically Offered
Fall-Odd Years

DMP 821 - Advanced Clinical Pathology Laboratory

Credits: 1

Practical training in advanced techniques of clinical chemistry and hematology used in a large clinical pathology laboratory.

Note
Three hours lab per week.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

DMP 830 - Quantitative Analysis in Veterinary Medicine

Credits: 3

Practical experience managing, describing, and interpreting data from animal health and management systems so that the data can be informative for decision-makers evaluating and implementing health programs, diagnostic strategies, and animal management processes.

Repeat for Credit
N

Typically Offered
Fall

DMP 831 - Veterinary Virology

Credits: 3

Morphology, biology, and classification of viruses and their relation to the causes of disease.

Veterinary Virology is a 3 credit lecture course that is designed for veterinary students in the second year of the professional curriculum. The course provides basic and fundamental knowledge on the classification, pathogenesis, and diagnosis of viral pathogens affecting common veterinary species, including ovine, caprine, feline, canine, equine, bovine, avian, and porcine species. In addition, the course is designed to provide adequate knowledge and training for veterinarians in practice on the prevention and management of these viral diseases.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 817.

Typically Offered
Spring

DMP 832 - General Pathology

Credits: 4

Etiology, pathogenesis, lesions, and termination of processes of disease, including inflammation, necrosis, regeneration, oncology, and disturbances of metabolism, circulation, and growth.

Note
Three hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AP 806, AP 816 and AP 810.

Typically Offered
Fall

DMP 834 - Veterinary Parasitology

Credits: 4

Study of the helminth, arthropod, and protozoan parasites of companion and food animals. Emphases are on diagnosis, clinical signs, lesions, treatment, control epidemiology, and public heath aspects of parasitic disease.

Repeat for Credit
N

Requisites
Prerequisite: AP 810, AP 804, AP 818 and DMP 817 & DMP 818. Must be 2nd yr student in the Veterinary Curriculum.

Typically Offered
Fall

DMP 840 - Public Health Practice

Credits: 3-6

Supervised field experience in an international, state, local, or district health agency or other appropriate health agency.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment in MPH Program.

Typically Offered
Fall, Spring, Summer

Cross-listed
KIN 840, FDSCI 840, FNDH 840, MPH 840

DMP 841 - Veterinary Public Health

Credits: 2

The linkages between human health and animal health and production. Topics include zoonotic disease, emerging and exotic animal diseases, disaster preparedness, regulatory and community health issues focusing on the role of the veterinarian in all.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 818.

Typically Offered
Spring

DMP 844 - Global Health Issues

Credits: 3

A review of global health problems and various strategies to manage international health concerns. The class is open to graduate students, including veterinary students, with an interest in public health that have at least 12 hours in biology or related courses.

Repeat for Credit
N

Typically Offered
Fall

DMP 845 - Food Safety Risk Analysis

Credits: 3

Three hours of lectures on interwoven roles of risk assessment, management and communication – defined as risk analysis – will be applied to problems and policy development in food safety. This course will aid students in developing the ability to critically examine food safety risk issues from various stakeholder perspectives, leading to risk management and communication activities to reduce the impact of foodborne disease.

A significant portion of the course will focus on the importance of thorough research and good communication skills, as well as the suitability of communication efforts. The course will be presented through lectures, case study presentations, and Internet-based support material including text, audio and video through the extensive database maintained by Dr. Douglas Powell of Kansas State University and colleagues (foodsafety.ksu.edu; barfblog.com).

Repeat for Credit
N

Typically Offered
Spring

DMP 846 - Foundations of Biosecurity

Credits: 3

The course examines the biosecurity policies and procedures required in high and maximum-containment research facilities. It provides a historical perspective of biosecurity, establishes definitions and explores concepts related to personnel, governmental and contemporary biosecurity topics. Agro-security topics are highlighted providing a perspective on risk and threat assessment to public health and institutional, local, regional, national and global threats.

Repeat for Credit
N

Typically Offered
Summer

DMP 850 - Immunology of Domestic Animals

Credits: 3

This course is designed to introduce graduate students to immune responses of domestic animals to pathogens and parasites.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 541.

Typically Offered
Fall

DMP 852 - Vaccinology

Credits: 3

Multidisciplinary course on vaccine development (including technology) from conceptualization through development, testing, and utilization. Addresses the principles of pathogenesis of infectious diseases, immune protection, and eliciting protective immunity by vaccination; application of traditional and new technologies to vaccine development;

principles of preclinical development, manufacturing, and clinical evaluation; importance of the regulatory process; and utilization of epidemiology to measure vaccine need and effectiveness.

Repeat for Credit
N

Typically Offered
Spring, Summer

Cross-listed
AAI 852

DMP 854 - Intermediate Epidemiology

Credits: 3

Epidemiologic principles of disease with a focus on measures of disease occurrence, association and impact, determinants of disease diagnostic test evaluation, study design and critical literature evaluation.

Repeat for Credit
N

Requisites
Prerequisite: DMP 708 or DMP 754 or equivalent AND STAT 701 or STAT 703 or DMP 830 or equivalent.

Typically Offered
Spring

Cross-listed
MPH 854

DMP 855 - Disease Detection, Surveillance and Risk Assessment

Credits: 3

The course is focused on understanding the principles underlying quantitative risk assessments and disease detection/surveillance systems suited to a variety of animal health and food safety applications. These will then be used to advance the practical application of risk assessment and disease detection in the development of valid and useful herd, regional and national disease surveillance programs.

Repeat for Credit
N

Typically Offered
Fall

DMP 856 - Advanced Veterinary Parasitology

Credits: 3

Structure, life cycle, pathology, immunology, public health significance, diagnosis, and treatment of protozoan and metazoan parasites of veterinary significance.

Note
One hour lecture, one hour recitation, and four hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 718

Typically Offered
Spring-Odd Years

DMP 857 - Systemic Pathology

Credits: 5

Pathology of the organ systems of domestic animals including gross and microscopic study of lesions.

Note
Three hours lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 832.

Typically Offered
Spring

DMP 858 - Introduction to Infectious Disease Modeling for Animal Health

Credits: 3

This is a graduate-level course focused on understanding and implementing infectious disease models using Excel and Monte-Carlo Statistical Methods as well as Spatially Explicit Stochastic models. The course is focused on food animal diseases using a mixture of lecture, scientific

literature evaluation, discussion and hands on computer lab exercises.

Repeat for Credit
N

Requisites
Prerequisite: DMP 854 Intermediate Epidemiology.

Typically Offered
Other

DMP 859 - Surgical Pathology

Credits: 1-2

Practical experience in examining and processing surgical biopsy specimens and writing histopathological reports.

Note
Three or six hours lab per week.

Repeat for Credit
Y

Requisites
Prerequisite: DMP 852.

Typically Offered
Fall, Spring, Summer

DMP 860 - Bacterial Pathogenesis and Host Response

Credits: 3

Virulence factors of infectious microorganisms and the host response to infection. Topics include pathogenesis of human and animal diseases and mechanisms of immunity.

Repeat for Credit
N

Requisites
Prerequisite: DMP 812

Typically Offered
Fall-Even Years

DMP 861 - Advanced Diagnostic Pathology

Credits: 3

Pathologic alterations of disease with emphasis on diagnostic characteristics.

Note
Nine hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 852.

Typically Offered
Fall, Summer

DMP 862 - Applied Domestic Animal Immunology

Credits: 2

Real-life immune problems of veterinary and zoonotic relevance and their application to domestic animal immune systems.

Note
One 1-hour lecture and one 1-hour discussion per week.

Repeat for Credit
N

Requisites
Prerequisite: DMP 850, DMP 705 or an immunology course in a veterinary curriculum.

Corequisite: Interested students who might not meet the enrollment prerequisite can contact the course coordinator to request permission to enroll.

Typically Offered
Other

DMP 863 - Advanced Principles of Pathology

Credits: 3

Disease and its effects with emphasis on etiology and pathogenesis; morphologic change will be correlated with changes in chemical composition and function.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit

N

Requisites
Prerequisite: DMP 720.

Typically Offered
Fall

DMP 867 - Advanced Topics in Comparative Pathology

Credits: 1-3

Selected topics to assist pathology majors in their area of specialization.

Repeat for Credit
Y

Requisites
Prerequisite: DMP 852 and DMP 863.

Typically Offered
Fall, Spring, Summer

DMP 870 - Pathobiology Seminar (MS)

Credits: 1

Oral presentations on topics in epidemiology, food safety, immunology, microbiology, molecular biology, parasitology, pathology, and toxicology. Reports will include critical review of the relevant literature; experimental design and methodology; and presentation and critical evaluation of data. The course is for MS students.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 871 - Molecular Diagnostics of Infectious Diseases

Credits: 3

This graduate course is aimed at reviewing, and evaluating new and improved molecular diagnostic methods for infectious diseases. Theory, development, and applications of molecular diagnostic tests will be discussed in the context of current literature. This course will provide an opportunity for students to learn and apply recent advances in the development of molecular diagnostic test.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521
Students without the prerequisites must have the permission of the course coordinator.

Typically Offered
Fall-Odd Years

DMP 878 - Applications of Flow Cytometry

Credits: 1-3

Theory and practical experience in the use of flow cytometry in diagnosis and research.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

DMP 880 - Problems in Pathobiology (MS)

Credits: 1-6

A special problems course for graduate students working toward the MS degree in Pathobiology. The course is generally problems- or techniques-based in any of the disciplines in the Pathobiology program, conducted under the supervision of a graduate faculty in the Pathobiology Graduate Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 888 - Globalization, Cooperation, & the Food Trade

Credits: 1

This course will focus on issues and topics including, but not limited to, disputes in the international agricultural and food trade, new concepts such as Food and Agriculture Security, and the food-related challenges faced by wealthy as well as economically poor societies. The course will also address such important topics as the roles played by innovation and investment in the agricultural and food system, the importance of cross-border cooperation in regulation and trade, and the accomplishments of public health and trade policy thought leaders across history.

Repeat for Credit
N

Typically Offered
Fall, Spring

DMP 893 - Principles of Biosafety and Biocontainment

Credits: 2

This course will introduce participants to the advanced and administrative principles of biosafety and biocontainment. The course targets future P.I.'s, lab managers, and individuals with previous high-containment research experience. Specific topics include laboratory biosafety levels, special considerations for agriculture and animal labs, facility and building design, regulations, biosafety practices and procedures, and risk assessment processes required in high and maximum containment research facilities.

Repeat for Credit
N

Requisites
Prerequisite: DMP 690 and DMP 691 or instructor permission.

Typically Offered
Summer

DMP 895 - Topics in Pathobiology (MS)

Credits: 0-18

A special course for graduate students working toward the MS degree. Lectures, readings, and discussion of topics of current interest in any of the disciplines of Pathobiology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 898 - MS Report in Pathobiology

Credits: 2

A written report of either laboratory-based research, field-based research, or a review paper on a topic in the major field.

Repeat for Credit
N

Requisites
Prerequisite: Consent of the major professor

Typically Offered
Fall, Spring, Summer

DMP 899 - MS Research in Pathobiology

Credits: 0-18

For graduate students working towards the MS degree. Individual research in the fields of epidemiology, food safety, immunology, microbiology, molecular biology, parasitology, pathology, and toxicology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 910 - Pathogenic Mechanisms of Viruses

Credits: 3

The goals of the course are to learn various pathogenic mechanisms (virus-host interactions) of selected virus (RNA and DNA) and Prion diseases. The course will cover the molecular, cellular and immunological bases of pathogenesis both in vitro and in animal models.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 730 and BIOL 670.

Typically Offered
Spring-Even Years

DMP 925 - Rumen Microbiology

Credits: 3

Lecture dealing with the microorganisms of the rumen, their habitat, diversity, structure, interactions, and biochemical activities. Techniques for enumeration, isolation and identification of ruminal microorganisms.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255.

Typically Offered
Fall-Even Years

DMP 954 - Advanced Epidemiology

Credits: 4

Advanced theory and methods for designing, analyzing and interpreting epidemiologic research. Emphasis on observational study design and analysis issues including design identification and optimization, bias recognition and control, and appropriate analytical approaches for epidemiologic data.

Repeat for Credit
N

Requisites
Prerequisite: DMP 854 and STAT 717, or equivalent training (recommended).

Typically Offered
Fall

DMP 963 - Advanced Molecular Biology of Foodborne Pathogens

Credits: 2

This lecture will meet once a week for 2 hours per period. The first hour of each meeting will consist of brief student presentations of research papers illustrating key concepts presented in the previous lecture. The second hour of each meeting will consist of a lecture on the indicated topic.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

DMP 965 - Cellular and Molecular Pathology

Credits: 4

Biochemistry of the injured cell, relationship of intracellular parasitism to cellular metabolism, metabolic and genetic basis of inherited disease.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 755 or BIOL 860.

Typically Offered
Spring

DMP 970 - Pathobiology Seminar (PhD)

Credits: 1

Oral presentations on topics in epidemiology, food safety, immunology, microbiology, molecular biology, parasitology, pathology, and toxicology. Reports will include critical review of the relevant literature; experimental design and methodology; and presentation and critical evaluation of data. The course is for PhD students.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 971 - Seminal Papers in Molecular Biology

Credits: 1

This discussion course will improve graduate student communication, scientific reasoning, and data analysis skills. Students will gain familiarity with the seminal papers of molecular biology that resolved key issues of the central dogma. Key breakthroughs in molecular evolution, microbial genetics, and biotechnology will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: BIO 670, DMP 712, or DMP 860. Should be registered as an M.S. or Ph.D. student in Veterinary Medicine, biochemistry or biology.

Typically Offered
Summer

DMP 980 - Problems in Pathobiology (PhD)

Credits: 1-6

A special problems course for graduate students working toward a PhD degree in Pathobiology. The course is generally problems- or techniques-based in any of the disciplines in the program, conducted under the supervision of a graduate faculty in the Pathobiology Graduate Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 995 - Topics in Pathobiology (PhD)

Credits: 0-18

A special course for graduate students working toward the PhD degree. Lectures, readings, and discussion of topics of current interest in any of the disciplines of Pathobiology

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

DMP 999 - PhD Research in Pathobiology

Credits: 1-18

For graduate students working towards the PhD degree in pathobiology. Individual research in the fields of epidemiology, food safety, immunology, microbiology, molecular biology, parasitology, pathology, and toxicology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECE 210 - Introduction to Electrical Engineering

Credits: 3

Basic circuit theory including voltage, current, Kirchoff's laws, and Ohm's law. Introduction to circuit elements, application circuits, complex impedance and power, and additional theory fundamental and the EE curriculum. Includes laboratory work (e.g., with multimeters and oscilloscopes) and circuit construction techniques.

Note
Two hours lecture and 2 hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: MATH 220.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

ECE 241 - Introduction to Electrical and Computer Engineering

Credits: 3

An introduction to embedded systems and DC circuitry. Embedded systems focusing on the C programming language, number systems, and data/logical operations. DC circuitry focused on basic circuit theory including voltage, current, ohm's law, and basic circuit components. Includes laboratory work (e.g., with multimeters and oscilloscopes) and circuit prototyping.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ECE 410 - Circuit Theory I

Credits: 4

An introduction to linear circuit theory; analysis of linear circuits containing resistance, inductance, and capacitance. Mutual inductance and transformers.

Note
Three hours lecture and two hour of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221

Typically Offered
Fall, Spring

ECE 431 - Microcontrollers

Credits: 3

Architecture, assembly language programming, serial and parallel input/output, interface circuits, and applications.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 241; and CIS 200 or CIS 209.

Typically Offered
Fall, Spring

ECE 441 - Design of Digital Systems

Credits: 3

Design of combinational and sequential systems including asynchronous circuits; testing of digital systems. Emphasis is placed on hardware description languages, computer-aided design tools, and simulations.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 241

Typically Offered
Fall, Spring

ECE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ECE 499 - Honors Research in Electrical and Computer Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. Open to students in the College of Engineering honors program. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ECE 502 - Electronics Laboratory

Credits: 2

Design, simulation, construction and testing of electronic circuits.

Note
One hour lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 511 and ECE 526.

Typically Offered
Fall, Spring

ECE 511 - Circuit Theory II

Credits: 4

Time-domain transient response of second-order circuits. Circuit analysis using Laplace transforms. Frequency response, filters, transfer functions, two-port networks, and convolution.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and ECE 410.

Typically Offered
Fall, Spring

ECE 512 - Linear Systems

Credits: 3

Time- and frequency-domain analysis of signals and systems. Concepts include signal classification, convolution, Fourier series, Fourier transforms, filters, signal sampling, and discrete transforms.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 410 or ECE 519, MATH340, and ECE 540.

Typically Offered
Fall, Spring

ECE 519 - Electric Circuits for Engineers

Credits: 3

Principles of direct-current circuits, alternating-current circuits, analog and digital electronics.

Note
Three hours lecture a week. Not open to EE/CMPEN students.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214.

Typically Offered
Fall, Spring, Summer

ECE 525 - Electronics I

Credits: 3

Fundamentals of electronic components (e.g., diodes, MOSFETs, BJTs, op amps) and electronic circuits.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 410 or ECE 519.

Typically Offered
Fall, Spring

ECE 526 - Electronics II

Credits: 3

Continuation of Electronics I, with emphasis on performance measures, including frequency response. Additional topics include Miller's theorem, cascoding, and the application of negative feedback.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 511 and ECE 525.

Typically Offered
Fall, Spring

ECE 530 - Control Systems Design

Credits: 3

Modeling, analysis, and design of control systems. Topics include feedback control; time response and stability of dynamic systems; introduction to root locus and frequency response design.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and ECE 512.

Typically Offered
Fall, Spring

ECE 540 - Applied Scientific Computing for Engineers

Credits: 3

Mathematical and programming techniques for solving various classes of numerical problems. General topics, such as the precision of floating point numbers are also discussed. Statistics, linear algebra and optimization are the primary classes of numerical problems addressed.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510 and CIS 209 or CIS 200.

Typically Offered
Fall, Spring

ECE 542 - Computer Networking

Credits: 3

Introduction to application, transport, network and link layer protocols, with emphasis to Internet TCP/IP protocols.

Note
Three hours lecture/week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 241, STAT 510

Typically Offered
Fall

ECE 557 - Electromagnetic Theory I

Credits: 4

Vector analysis, electrostatics, magnetostatics, Faraday's Law, Maxwell's Equations, transmission line analysis, plane waves, Poynting's theorem, and applications.

Note
Four hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214, ECE 410, and MATH 222.

Typically Offered
Fall, Spring

ECE 571 - Introduction to Biomedical Engineering

Credits: 3

Overview of engineering applied to clinical medicine and the life sciences. Topics include sensors and instrumentation to acquire physiologic data, imaging techniques, biomechanics, health care information technology, assistive technology, telemedicine, home care, emergency services, battlefield medicine, and biomedical career opportunities.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222 and PHYS 214.

Typically Offered
Spring

ECE 581 - Energy Conversion I

Credits: 3

Three-phase systems, magnetic circuits, transformers, and DC and AC machines.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 410 or ECE 519.

Typically Offered
Fall, Spring

ECE 590 - Senior Design Experience I

Credits: 3

Integrates communications, both verbal and written, with ethics and a collaborative design project to emulate a technical professional environment. Introduces design theory, project management, team dynamics, and socio-economic context to design.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 525 and ECE 540

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

ECE 591 - Senior Design Experience II

Credits: 2

Second semester of the senior design experience that implements and demonstrates the project design begun in ECE 590. It includes oral presentations for design reviews and technical documentation such as Project Plan, Concept of Operations, Analyses, Architecture and Requirements, Design Descriptions, and User Manual.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 590.

Typically Offered
Fall, Spring

ECE 624 - Power Electronics

Credits: 3

Design and analysis of semiconductor-based circuits such as AC-DC converters (rectifiers), DC-DC converters and DC-AC converters (inverters), and their applications in adjustable speed motor-drives, power supplies, and renewable energy conversion systems.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 511, ECE 525.

Typically Offered
Fall

ECE 628 - Electronic Instrumentation

Credits: 3

Applications of electronics in the design of analog and digital systems for the measurement of physical variables and in the transduction of these variables into a useful form for both recording and control.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit

N

Requisites
Prerequisite: ECE 502 and ECE 526.

Typically Offered
Fall, Spring

ECE 631 - Microcomputer Systems Design

Credits: 3

Design and engineering application of 32-bit microcomputers to instrumentation and control. Investigate the relationship of the C language and assembly language. Timing and other interfacing problems will be covered.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308 or CIS 209 or ME 400; ECE 431; ECE 525 or ECE 519.

Typically Offered
Spring

ECE 632 - Hardware Security Attack Techniques and Countermeasures

Credits: 3

Exploration and approaches to address security vulnerabilities, execute attacks, and implement countermeasures against specific hardware attacks. Topics includes reverse-engineering, counterfeiting/cloning, side-channel attacks, fault injection, and physical tampering (e.g., hardware Trojans, mod-chip).

Repeat for Credit
N

Requisites
Prerequisite: ECE431 and ECE441

Typically Offered
Spring

ECE 633 - Real-Time Embedded Systems

Credits: 1

Interconnection of peripherals, such as CAN networks, DA/AD converters, and Timers. Implementation of device drivers on top of micro-kernels. Build a simple real time distributed embedded system.

Note
Two hours lecture and three hours lab a week. Course meets in one contiguous block of five weeks.

Repeat for Credit
N

Requisites
Prerequisite: CIS 621 and CIS 622.

Typically Offered
Fall

ECE 641 - Advanced Digital Design using Logic Synthesis

Credits: 3

Applications of hardware description languages (HDLs) for the design of complex digital systems. Topics include designing and simulating using HDLs, logic synthesis into FPGAs and ASICs, optimization techniques, timing issues, hardware verification, and design for testability.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 441.

Typically Offered
Spring

ECE 643 - Computer Engineering Design Lab

Credits: 3

The Design and construction of simple I/O devices and a microcomputer system using simple to complex programmable devices.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 308 or CIS 209; and ECE 441.
Prerequisite or concurrent enrollment: ECE 649.

Typically Offered
Fall

ECE 645 - Digital Electronics

Credits: 3

Design of high-performance digital electronics and systems. Topics include design metrics, device modeling, transmission-line models for wiring, signaling conventions, transmitter and receiver circuits, noise analysis and management, power distribution, timing and synchronization techniques.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 525, and ECE 441.

Typically Offered
Spring

ECE 647 - Digital Signal Processing

Credits: 3

Difference equation characterization of digital signal processing systems, transient and steady-state analysis of digital filters using the Z-transform, spectral analysis of digital signals, and design and implementation of digital filters.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 512

Typically Offered
Fall, Spring

ECE 648 - Multimedia Compression

Credits: 3

Introduction to multimedia creation and representation. Design of multimedia systems, which incorporate audio, image and video. Topics will include the analysis and design of multimedia compression, streaming, delivery, security and authoring. Emphasis will be placed on current multimedia standards and applications.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 512 or MATH 551; CIS 308 or CIS 209.

Typically Offered
Spring

ECE 649 - Computer Design I

Credits: 3

Concepts of computer design. Information representation, instruction sets and addressing modes. Arithmetic and logic unit design for fixed and floating point operations. Hardwired and microprogrammed control design. Concepts of pipelining, CISC and RISC architecture. Memory system design including virtual memory, caches and interleaved memories. I/O design methods, interrupt mechanisms, DMA and system integration.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 441.

Typically Offered
Fall, Spring

ECE 660 - Communication Systems I

Credits: 3

Introduction to the analysis and design of analog and digital communication systems. Topics include analog and digital modulation schemes, digital encoding of messages, mathematical modeling of communications systems, noise in communication links and calculation of performance measures for practical links.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ECE 512.

Typically Offered
Spring

ECE 661 - Communication Systems II

Credits: 3

Error-correction code design and analysis with emphasis on block and convolutional coding and decoding; Trellis-coded modulation. Modeling of bandlimited systems and pulse-shape design, optimal receiver design for bandlimited systems, linear and nonlinear equalization. Multiple-access techniques, orthogonal frequency-division multiplexing and receiver design for CDMA schemes. Simulation of practical digital transmission systems.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 660.

Typically Offered
Spring

ECE 662 - Design of Communication Circuits

Credits: 3

The design of communication circuits and systems operating from baseband to UHF frequencies. Topics include tuned-RF amplifiers, oscillators, mixers, LC and ceramic bandpass filters, and demodulators. Projects involve the design and performance testing of a complete radio receiver.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 502 and ECE 526.

Typically Offered
Fall

ECE 670 - Engineering Applications of Machine Intelligence

Credits: 3

Study of machine intelligence and fuzzy logic concepts and applications in engineering problem domains. As a term project, develop a fuzzy expert system for a specific problem domain that runs on a personal computer and develop the supporting documentation.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 200 or CIS 209, and PHYS 214.

Typically Offered
Spring

ECE 681 - Wind and Solar Engineering

Credits: 3

Wind and solar energy resource assessment, operation of renewable-energy systems, photovoltaic and wind-turbine physics, and design of complete systems.

Note
Three hours recitation a week.

Repeat for Credit

N

Requisites
Prerequisite: ECE 525 or ECE 519.

Typically Offered
Fall

ECE 684 - Power Laboratory

Credits: 3

Introduction to energy and power converters. Course includes lecture and laboratory experience in aspects of modeling and analysis of electric machines (synchronous and induction machines as well as transformers), power quality (harmonic measurement), control of DC-DC and DC-AC converters, and motor-drive systems.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 624 and ECE 581.

Typically Offered
Spring

ECE 685 - Power Systems Design

Credits: 3

A comprehensive study of modeling of the electric power system components and computer simulation of interconnected power systems in steady state. Vector-matrix descriptions are emphasized.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 581.

Typically Offered
Fall

ECE 686 - Power Systems Protection

Credits: 3

Analysis of symmetrical and unsymmetrical faults on power systems using symmetrical components technique. Study of protective relaying for protection of power systems against faults. Vector-matrix descriptions and computer solutions are emphasized.

Note
Three hours of recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 581.

Typically Offered
Spring

ECE 690 - Problems in Electrical and Computer Engineering

Credits: 1-18

Problems in Electrical and Computer Engineering

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECE 694 - Optoelectronics

Credits: 3

Applied geometric and physical optics, optical radiation, and the interaction of light and matter. The theory and application of photodetectors, lasers, and other photoemitters. Introduction to fiber optical waveguides, sensors, and systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 525, ECE 557, and CHE 356.

Typically Offered
Fall

ECE 696 - Integrated Circuit Design

Credits: 3

Study of silicon integrated circuits with emphasis on CMOS analog and digital applications. The course covers basic device structure and modeling, circuit analysis, system design, IC design methodology and economics plus IC fabrication processes. Computer-aided tools are used to simulate and layout circuits designed by student groups.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 241 and ECE 525.

Typically Offered
Fall

ECE 715 - Electroacoustics

Credits: 3

Basic principles of sound; modeling of, and analogous circuits for, mechanical and acoustical systems; microphones and loudspeakers; Thiele-Small parameters; the analysis and design of, and measurements on, common loudspeaker systems and crossover networks. Projects involve the design, simulation, construction and performance-testing of a complete loudspeaker-and-enclosure system.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 511.

Typically Offered
Fall

ECE 722 - Audio Engineering

Credits: 3

Solid-state and hollow-state analog electronics applicable to high-fidelity audio. Emphasis is on the analysis, design and construction of audio amplifiers. Projects include design, implementation, and performance-evaluation of a reference-quality audio power amplifier.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 525. Recommended prerequisite: ECE 526.

Typically Offered
Spring

ECE 724 - Analog Electronics

Credits: 3

Analysis, design, and evaluation of BJT and CMOS operational amplifiers. Core topics include frequency compensation and closed-loop stability, slew-rate optimization, wide-bandwidth design, low-noise design, and macromodeling for simulation.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 502, ECE 526.

Typically Offered
Spring

ECE 725 - Integrated Circuit Devices and Processes

Credits: 3

Integrated circuit fabrication processes including oxidation, diffusion, ion implantation, lithography, etching, crystal growth, process monitoring, and device characterization. Design of discrete and IC devices through laboratory experiments and computer simulations.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 525 and CHE 356.

Typically Offered
Spring

ECE 728 - Mixed Signal Measurements

Credits: 3

Signal classification, noise and uncertainty, TRMS conversion, quantization and ADCs, repetitive sampling and signal recovery techniques, vector voltmeters, basic network analyzers.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 512 or graduate standing.

Typically Offered
On sufficient demand

ECE 730 - Control Systems Analysis and Design

Credits: 3

Use of classical analysis techniques for control system compensation. State space control theory fundamentals are presented in addition to an introductory treatment of several major systems areas.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 530 or ME 640; ME 730.

Typically Offered
Spring

ECE 731 - Advanced Microcomputer System Design

Credits: 3

Design and engineering applications of 16 and 32 bit microprocessors. Utilization of peripheral and co-processor chips.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 631.

Typically Offered
Spring

ECE 733 - Real-Time Embedded Systems Design

Credits: 3

Design and implementation of a comprehensive team project of a complete embedded real-time system.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: CIS 721.

Typically Offered
Spring

ECE 736 - Discrete-Time and Computer-Control Systems

Credits: 3

Analysis and design of discrete-time, sampled-data, and computer-control systems using discrete-state equations and Z-transforms.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 530 or ME 640.

Typically Offered
Spring

ECE 746 - Fault Diagnosis in Digital Systems

Credits: 3

Hazards, fault detection in combinational circuits, and sequential machines using path sensitizing and fault-matrix methods, state table analysis, etc.; system reliability through logical redundance.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: ECE 541 or ECE 631.

Typically Offered
Spring-Even Years

ECE 749 - Computer Design II

Credits: 3

Study of alternate computer hardware structures. Investigation of engineering tradeoffs in implementation of alternative instruction sets and computing structures. Emphasis will be placed on a quantitative approach to cost/performance evaluations including simulation of hardware structures.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 649.

Typically Offered
Fall

ECE 758 - Electromagnetic Theory II

Credits: 3

Continuation of ECE 557.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 557.

Typically Offered
On sufficient demand

ECE 760 - Wireless Communications

Credits: 3

This course exposes seniors and first year graduate students to important physical layer concepts in wireless communications. Topics include: cellular architecture, large scale and small scale fading channel models, diversity receivers, DS-CDMA transmitter and receiver design, multi-user detection, multi-carrier CDMA and OFDM performance analysis.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 660.

Typically Offered
Spring

ECE 764 - Antennas and Microwave Circuits

Credits: 3

The design of communication circuits and systems operating at microwave frequencies. Topics include

antennas, transmission lines, microstrip matching networks, S-parameters, frequency synthesizers, and downconverter components such as LNAs, mixers, and microstrip bandpass filters. Projects involve design, simulation with electronic design automation tools, and laboratory measurements.

Note
Two hour lecture and three hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 502, ECE 512, ECE 526 and ECE 557.

Typically Offered
Spring

ECE 771 - Control Theory Applied to Bioengineering

Credits: 3

Development of mathematical models used in the study and analysis of physiological control systems providing techniques for varying pertinent biological parameters.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: ECE 530 or ME 640, and a basic physiology course.

Typically Offered
Spring

ECE 772 - Theory and Techniques of Bioinstrumentation

Credits: 2

Theoretical aspects of biological signals, electrodes, transducers, digital imaging and computer-based data acquisition directed toward ECE and other science department majors.

Note
Two hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent enrollment in ECE 773 (ECE majors only) and AP 773.

Typically Offered
Fall

ECE 773 - Bioinstrumentation Design Laboratory

Credits: 1

Design and testing of hardware and software for acquiring and analyzing biological signals.

Note
Three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: ECE 502 and concurrent enrollment in ECE 772.

Typically Offered
Fall

ECE 780 - Power Seminar

Credits: 1

Speakers from industry, academia, and government present topics related to power systems engineering.

Note
One hour lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

ECE 824 - Advanced Power Electronics

Credits: 3

High-frequency switching dc/dc converters, resonant converters, analysis and control of power electronic systems, and thermal management.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 624.

Typically Offered
Other

ECE 828 - Topics in Instrumentation

Credits: 3

Selected topics related to the general field of electronic instrumentation.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 628.

Typically Offered
On sufficient demand

ECE 830 - Advanced Systems Theory

Credits: 3

State space description and analysis of continuous and discrete time dynamic systems including optimal control solutions. Both linear and nonlinear systems are considered.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 530 or ME 640.

Typically Offered
Fall

ECE 832 - Advanced Hardware Security Attack Techniques and Countermeasures

Credits: 3

Advanced exploration and approaches to address security vulnerabilities, execute attacks, and implement countermeasures against specific hardware attacks. Topics includes reverse-engineering, counterfeiting/cloning, side-channel attacks, fault injection, and physical tampering (e.g., hardware Trojans, mod-chip).

Repeat for Credit
N

Requisites
Prerequisite: ECE431 and ECE441

Typically Offered
Spring

ECE 840 - Computer Engineering Methods for Analysis, Simulation, and Design

Credits: 3

Computer-aided and numerical techniques applicable to problems in electrical and computer engineering. Emphasis is on implementation of these techniques on the computer.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 512.

Typically Offered
Spring

ECE 841 - Network Theory

Credits: 3

Introduction to the theoretical tools, methods and algorithms to analyze networks, investigate their structure, and their behavior and properties, as well as several

practical applications in computer networks, social networks and power grids.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 410 or STAT 510, high-level programming language.

Typically Offered
Fall

ECE 842 - Parallel Processing

Credits: 3

Parallel processing application in signal and image processing. Array processors, pipeline processors, systolic and wavefront arrays, interconnection networks, performance analysis.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 512, ECE 649.

Typically Offered
Fall-Odd Years

ECE 845 - Sequential Machines

Credits: 3

Theory and mathematical framework of digital hardware will be developed. Limitations and fault detection of these machines will be explored using the theoretical basis of sequential machines.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 510 and ECE 649.

Typically Offered
Spring

ECE 846 - Computer Engineering Methods for Analysis, Simulation, and Design II

Credits: 3

Continuation of ECE 840.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 840.

Typically Offered
Fall

ECE 849 - Topics in Computer Engineering

Credits: 3

Selected topics relating to current developments in computer engineering. Topics may include computer architectures, computer networking, multiprocessing, and computer interfaces.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 649.

Typically Offered
On sufficient demand

ECE 855 - Advanced Topics in Electromagnetic Theory

Credits: 3

Mathematical development of electromagnetic wave theory.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 758.

Typically Offered
On sufficient demand

ECE 861 - Applied Probability Theory & Random Processes

Credits: 3

Applications of probability theory, random variables and stochastic processes; tools relevant to both modeling uncertainty and inferencing in the presence of uncertainty; probabilistic methods applicable to problems in electrical and computer engineering arena including power systems, communication systems and networks, biomedical systems, etc.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 512.

Typically Offered
Fall

ECE 866 - Transform Processing of Digital Signals

Credits: 3

Orthogonal transforms in digital signal processing with emphasis on one- and two-dimensional signals, generalized Wiener filtering, feature selection in pattern recognition, and elements of adaptive filtering techniques.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 861.

Typically Offered
Spring

ECE 867 - Digital Image Processing

Credits: 3

Basic concepts and techniques of image formation, representation, analysis, restorations, enhancement, coding, segmentation, and description. Object recognition using shape descriptors and syntactic techniques. Image processing applications in remote sensing, computer vision, and medical diagnosis.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 512.

Typically Offered
Fall

ECE 870 - Neural Networks in Engineering

Credits: 3

Engineering applications of artificial neural networks and machine intelligence. Particular emphasis will be placed on determining appropriate applications of alternate computing approaches and establishing efficient hardware support to implement these computational approaches.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 670.

Typically Offered
Fall-Even Years

ECE 872 - Therapeutic Medical Devices and Systems

Credits: 3

This course will cover: (1) the fundamental principles of electromagnetic energy interactions with biological tissue, and (2) the design and analysis of electromagnetic energy-

based therapeutic medical devices and systems. Topics covered include: tissue-energy interactions; neuromuscular electrical stimulation; rationale and applications of thermal therapy; devices for radiofrequency and microwave hyperthermia; thermal ablation; integration with medical imaging systems.

Repeat for Credit
N

Requisites
Prerequisite: an undergraduate course in electromagnetics (e.g. ECE 557); an undergraduate course in numerical methods/scientific computing (e.g. ECE 540)

Typically Offered
Spring

ECE 881 - Advanced Topics in Electric Energy Systems

Credits: 3

Subjects of current interest such as computer methods, distribution and transmission systems, systems planning and economics, extra high voltage transmission, exotic power sources.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 686.

Typically Offered
On sufficient demand

ECE 882 - Power Quality

Credits: 3

Description, analysis, modeling, and solution of difficulties relating to distortion of the waveshape in alternating-current power systems. Problems of voltage regulation. Focus on harmonics, noise, filtering, and communications interference in power systems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 624 and ECE 685.

Typically Offered
Fall, Spring

ECE 885 - Power Systems Operation and Control

Credits: 3

Specific topics include economic dispatch, unit commitment, control of generation, power system security, and state estimation. Several analytical and computational techniques are used to solve different problems related to above mentioned topics.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 685.

Typically Offered
Spring

ECE 887 - Distribution System Engineering

Credits: 3

Analysis, design and planning of electric distribution systems. Standard terminologies related to distribution systems are covered.

Note
Three hours recitation per week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 685.

Typically Offered
Spring

ECE 888 - Power System Stability and Control

Credits: 3

Introduction to power system stability and control. System device modeling and control issues are introduced for the purpose of studying various aspects of power system stability. Transient, small signal, and voltage stability topics are covered. Several stability analysis projects for multimachine systems are included.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 581 and ECE 685.

Typically Offered
Other

ECE 890 - Advanced Electrical Theory

Credits: 1-18

For advanced study in specialized areas by M.S. students.

Repeat for Credit
Y

Requisites
Prerequisite: M.S. student.

Typically Offered
Fall, Spring

ECE 895 - Solid-State Electronic Devices

Credits: 3

Introduction to quantum mechanics, crystal structures, and the semiconductor material properties. Diodes, bipolar transistors, and field-effect transistor structures. Analysis of second-order effects in transistors.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CHE 350, ECE 557, and ECE 696.

Typically Offered
Fall

ECE 896 - Graduate Seminar in Electrical and Computer Engineering

Credits: 0

Presentation and discussion of current advances and research inelectrical and computer engineering. Required of all graduate students in electrical and computer engineering.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ECE 897 - Research in Electrical Engineering

Credits: 1-18

Special research problems in electrical engineering.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECE 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECE 931 - Advanced Topics in Control Theory

Credits: 3

Study of advanced topics in optimal, time-varying, and stochastic control theory, or other recent developments in the control systems area.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 830.

Typically Offered
On sufficient demand

ECE 949 - Advanced Topics in Computer Engineering

Credits: 3

Selected topics related to advanced computer hardware design, performance measurements, sequential machines, and/ or advanced computer architectures.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 845.

Typically Offered
On sufficient demand

ECE 962 - Advanced Topics in Communications

Credits: 3

Selected topics related to the design and performance analysis of communication systems. Topics may include advanced modulation techniques, optimum receiver design, nonlinear channels, multipath analysis, diversity systems, and others.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 861.

Typically Offered
On sufficient demand

ECE 963 - Detection & Estimation Theory

Credits: 3

Theoretical foundations of detection and estimation theories. Bayesian decision theory with applications to signal detection in discrete time; concept of sufficient statistic and minimum variance unbiased estimation; Bayesian estimation; best linear unbiased estimation; Kalman filtering and its variants; filtering, smoothing and prediction applications across various engineering fields.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 861.

Typically Offered
Spring

ECE 965 - Information Theory

Credits: 3

Information as a measure of uncertainty, zero-memory and Markov sources, coding of information sources, channels and mutual information, reliable transmission via unreliable channels, error correcting codes.

Note
Three hours recitation a week.

Repeat for Credit

Y

Requisites
Prerequisite: ECE 861.

Typically Offered
Fall

ECE 967 - Advanced Topics in Digital Signal Processing

Credits: 3

Selected topics related to adaptive digital filtering techniques; special purpose hardware for digital filtering; two-dimensional signal processing and classification.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 866 or ECE 968.

Typically Offered
On sufficient demand

ECE 968 - Advanced Digital Filtering

Credits: 3

Advanced treatment of the theory of digital filtering and digital signal processing. Emphasis is on analysis of random signals.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 647 and ECE 861.

Typically Offered
Spring

ECE 971 - Advanced Topics in Bioengineering

Credits: 3

Study of complex physiological system simulation and analysis techniques, modern experimental and clinical electronic bioinstrumentation systems. Topics selected according to graduate student's interests.

Repeat for Credit
Y

Requisites
Prerequisite: ECE 771 or ECE 772.

Typically Offered
On sufficient demand

ECE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECED 210 - Introduction to Early Childhood Education

Credits: 3

Examination of the diversity in contemporary early childhood roles and settings, awareness of professional competencies and standards of practice, and recognition of philosophical and historical foundations of the profession.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

ECED 300 - Problems in Early Childhood Education

Credits: 1-9

Independent or small group study of early childhood development and education.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
On sufficient demand

ECED 310 - Early Childhood

Credits: 3

Principles of growth and development of children from conception across the early childhood years, including familial, societal, and other ecological factors affecting young children's development.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 or PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Social Sciences

ECED 311 - Infant Toddler Development and Programs

Credits: 3

Study of infants and toddlers from birth through 36 months including physical, cognitive, language, social, and emotional growth and development. Examination of best practices, responsive caregiving techniques, environments, infant/toddler learning approaches, health, safety, and licensing requirements.

Repeat for Credit
N

Requisites
Prerequisites: ECED 310 Corequisites: ECED 312

Typically Offered
Fall

ECED 312 - Infant Observation Lab

Credits: 1

Observation of the behavior and development of children from infancy through toddlerhood.

Note
Negative TB test, Clearance by KBI and DCF

Repeat for Credit
N

Requisites
Corequisite: ECED 310

Typically Offered
Fall, Spring

ECED 313 - Pre-Professional Experiences in Early Childhood Unified

Credits: 1

Observation and participation in diverse early childhood settings serving children with and without disabilities, aged birth through kindergarten.

Note
Negative TB test, Clearance by KBI and DCF. Lab requirement

Repeat for Credit
N

Requisites
Corequisite: ECED 310. Restricted to Early Childhood Education and FCSED majors only.

Typically Offered
Fall, Spring

ECED 420 - Interaction Techniques with Young Children

Credits: 3

A developmental approach to the acquisition of interaction

techniques conducive to healthy emotional and self-concept growth in the child from birth through kindergarten.

Note
Two hours lecture and one hour lab.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310 and ECED 313. Early Childhood Education majors only or instructor permission.

Typically Offered
Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

ECED 428 - Exceptional Development in Early Childhood

Credits: 3

Exceptional development in early childhood (birth through kindergarten), including developmental delays, physical and sensory impairments, communication disorders, mental retardation, learning and behavioral disorders, and health related concerns: emphasis on IEPs and IFSPs and the family's role in the assessment/referral/intervention process.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

ECED 450 - Environments in Early Childhood

Credits: 3

Planning, promoting, and maintaining physically and psychologically safe and healthy learning environments for young children. Fostering active, healthy lifestyles and enhanced quality of life for young children through understanding major concepts for nutrition and health education, human movement and physical activity.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 451 - Administering Early Childhood Programs

Credits: 3

Acquaints students with the multi-faceted dimensions of the director's work and enables them to acquire the knowledge and develop the skills needed to be successful as an administrator of an early childhood program.

Repeat for Credit
N

Requisites
Prerequisites: ECED 310, ECED 313

Typically Offered
Spring

ECED 466 - Language Development

Credits: 3

Survey of the development of speech and language skills in children.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

ECED 524 - Professional Seminar in Early Childhood Education

Credits: 3

Examination of programs for young children, including philosophical and theoretical foundations. Implementation and evaluation of program models and related issues and research.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310 or PSYCH 280.

Typically Offered
Spring

ECED 528 - Research and Inquiry in Early Childhood Education

Credits: 3

Study and application of fundamental concepts, principles, and methods of educational research in early childhood education with focus on preparing students to become reflective practitioners of action research and critical consumers of research.

Repeat for Credit
N

Requisites
Corequisites: ECED 553 or ECED 554.

Typically Offered
Spring

ECED 530 - Teaching & Learning in Early Childhood Education

Credits: 3

Application of developmental and educational theories to teaching and learning in early childhood education programs serving children aged birth through kindergarten, including children with special needs.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310 and ECED 313. Corequisite: ECED 531.

Typically Offered
Fall, Spring

ECED 531 - Developmental Curriculum in Early Childhood Education

Credits: 3

The planning and application of developmental curriculum across the content areas to enhance the development and learning of young children.

Repeat for Credit
N

Requisites
Prerequisites: ECED 310 and ECED 313. Corequisite: ECED 530.

Typically Offered
Fall, Spring

ECED 542 - Foundations of Coaching Adults

Credits: 3

Introduces coaching in early childhood settings. Special attention is given to adult development and learning theory, mentoring and coaching models, reflective supervision practices, interpersonal skills and the unique needs of early childhood environments.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310

Typically Offered
Spring

ECED 543 - Reflective Practice: Infants and Toddlers

Credits: 3

Application of developmental principles and evidenced-based practice to the diverse learning environments for infants and toddlers with and without special needs across

content areas including the integration of the family and community and public policies that affect programs for young children.

Note
Admission to teacher education required.

Repeat for Credit
N

Requisites
Prerequisite: ECED 540 and ECED 541

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 544 - Reflective Practice: Preschoolers and Kindergartners

Credits: 3

Application of developmental principles and evidenced-based practice to the diverse learning environments for preschoolers and kindergarteners with and without special needs across content areas including the integration of the family and community and public policies that affect programs for young children.

Repeat for Credit
N

Requisites
Corequisite: ECED 554 and ECED 555 required. Admission to teacher education required.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 546 - Preschool Lab

Credits: 2

Advanced application of principles and techniques that support the planning, Implementation, and evaluation of early childhood programs for young children.

Note
Negative TB test, Clearance by KBI and DCF

Repeat for Credit
N

Requisites
Prerequisite: ECED 311 and ECED 312 Corequisite: ECED 740

Typically Offered
Spring

ECED 553 - Early Childhood Practicum I: Infants and Toddlers

Credits: 1

Development and implementation of developmentally and functionally appropriate learning experiences, in a variety of formats, addressing content in the areas of early language and literacy, mathematics, science, social studies, the arts, and technology for infants and toddlers.

Note
Admission to teacher education required.

Repeat for Credit
N

Requisites
Corequisite: ECED 543.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

ECED 554 - Early Childhood Practicum II: Preschoolers

Credits: 1

Development and implementation of developmentally and functionally appropriate learning experiences, in a variety of formats, addressing content in the areas of early language and literacy, mathematics, science, social studies, the arts, and technology for the preschool child.

Note
Admission to teacher education required.

Repeat for Credit

N

Requisites
Corequisite: ECED 544.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 555 - Early Childhood Practicum III: Kindergartners

Credits: 1

Development and implementation of developmentally and functionally appropriate learning experiences, in a variety of formats, addressing content in the areas of early language and literacy, mathematics, science, social studies, the arts, and technology for the kindergarten child.

Note
Admission to teacher education required.

Repeat for Credit
N

Requisites
Corequisite: ECED 544.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 556 - Early Childhood Practicum 4: Home Visiting

Credits: 1

Development and implementation of developmentally and functionally appropriate experiences, within the context of an individualized family plan, addressing development and content in the areas of early language and literacy, mathematics, science, social studies, the arts, and technology for infants and toddlers in home based settings. Admission to teacher education required.

Repeat for Credit
N

Requisites
Prerequisite: ECED 543. Admission to Teacher Education required.

Typically Offered
Spring

ECED 566 - Emergent Literacy

Credits: 3

Exploration of literacy development from birth through kindergarten, including concepts relevant to pre-emergent, emergent, and developing literacy; procedures for designing developmentally and culturally appropriate experiences; factors impacting literacy acquisition and assessment; and intervention procedures for children at-risk for reading and writing problems.

Note
Restricted to Early Childhood Education majors only.

Repeat for Credit
N

Requisites
Prerequisite: ECED 466.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

ECED 588 - Applied Learning in Early Childhood Programs

Credits: 7

Practical experience working in an early childhood setting with emphasis on program planning and relations with staff and families.

Note
First aid/CPR certification, Negative TB test, Clearance by KBI and DCF

Repeat for Credit
N

Requisites
Prerequisites: ECED 546, Senior standing, and approval of

instructor.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 597 - Home, School, and Community Partnerships

Credits: 3

Strategies to enhance home-school communication with specific focus on families as the primary decision-makers for young children, with or without special needs. Emphasis on the development of family focused and culturally sensitive collaborations involving parents, schools, and the community to support child development, learning, and well-being.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 250 and ECED 428 or permission of instructor.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

ECED 598 - Student Teaching in Early Childhood Unified

Credits: 9

Design, implementation, assessment of developmentally and individually appropriate evidence-based curriculum for children with and without disabilities birth through kindergarten.

Note
Prearrangement and consent of instructor required.

Repeat for Credit
N

Requisites
Prerequisite: ECED 543, ECED 544, ECED 553, ECED 554, ECED 555 and admission to teacher education.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

ECED 700 - Problems in Early Childhood Education

Credits: 1-6

Independent study of relevant aspects of early childhood development and education.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
On sufficient demand

ECED 704 - Seminar in Early Childhood Education

Credits: 1-6

Interpretation and evaluation of information on varied topics relating to early childhood education and development.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
On sufficient demand

ECED 708 - Topics in Early Childhood Education

Credits: 1-3

Review of recent research and theory related to early childhood education and development.

Note

Consent of School

Repeat for Credit
Y

Typically Offered
On sufficient demand

ECED 710 - Child Care: Components and Issues

Credits: 3

Professional development and leadership; skills, services, and resources supporting quality early childhood care and education.

Repeat for Credit
N

Typically Offered
Summer

ECED 720 - Challenging Behaviors in Early Childhood

Credits: 3

The application of developmental principles and evidence-based practices to design and implement a positive learning environment for young children, including children with disabilities. Creating an environment that supports young children's social emotional competence, teaches social skills, and promotes self-regulation is emphasized.

Repeat for Credit
N

Requisites
Prerequisite: ECED 428.

Typically Offered
Fall

ECED 728 - Assessment of Young Children

Credits: 3

Theory and practice of individual assessment of handicapped and normal children, infancy to age eight, including cognitive, language, fine and gross motor, social, and self-help skills. Focus on selection, administration, interpretation, and evaluation of screening and comprehensive evaluation instruments for assessment and individual program planning.

Repeat for Credit
N

Requisites
Prerequisite: ECED 310, ECED 428, and ECED 531.

Typically Offered
Fall

ECED 730 - Early Childhood Program Administration

Credits: 3

Professional practice and organizational management of early childhood care and education programs; financial and personnel management, program development, and community relations.

Repeat for Credit
N

Requisites
Prerequisite: ECED 450 or consent of instructor.

Typically Offered
Summer

ECED 740 - Play Facilitation

Credits: 3

The emphasis of this course is the empirical study and practice of play as an educational, evaluative, and therapeutic intervention with young children.

Repeat for Credit
N

Requisites
Prerequisite: ECED 531 or consent of instructor.

Typically Offered
Spring

ECED 797 - Home Visiting Programs for Young Children and Families

Credits: 3

Examination of the empirical literature that supports the provision of early intervention and education services to families with young children through a home visitation model; focus on programs that use home visitation; an understanding of the key principles in early intervention; and the development of skills necessary to implement a coaching model of service delivery to enhance family and child outcomes.

Repeat for Credit
N

Requisites
Prerequisites: ECED 543.

Typically Offered
Spring

ECED 810 - Child Development

Credits: 3

Behavioral characteristics and developmental processes in childhood and adolescence. Analysis of developmental trends and issues in terms of research evidence and theoretical expectations.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

ECED 815 - Infant Behavior and Development

Credits: 3

Study of the infant as a developing individual within the family; examination of the theories and research relevant to development from conception through the second year.

Repeat for Credit
N

Typically Offered
Spring-Even Years

ECED 820 - Theories of Human Development

Credits: 3

Theories of development relating to physical, social, and psychological patterns of individuals' growth and interaction with the family and the community.

Repeat for Credit
N

Typically Offered
Fall-Even Years

ECED 830 - Advanced Program Development

Credits: 3

Analysis of the process and application of child development theory to early childhood program planning.

Repeat for Credit
N

Typically Offered
Fall-Even Years

ECED 883 - Practicum in Early Childhood Education

Credits: 1-18

Supervised experience in providing help and/or instruction in the several areas of human development and family studies presented in terms of the special interests of the students. Consent of practicum supervisor is required for each.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECED 884 - Practicum in Parent Education

Credits: 1-18

Supervised experience in providing help and/or instruction in the several areas of human development and family studies presented in terms of the special interests of the students. Consent of practicum supervisor is required for each.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECED 894 - Readings in Early Childhood Education

Credits: 1-6

Implications of research findings in preparation for professional work and research in early childhood education.

Repeat for Credit
Y

Requisites
Prerequisite: Twelve hours in social-behavioral science; and consent of instructor.

Typically Offered
Fall, Spring, Summer

ECED 899 - MS Research in Early Childhood Education

Credits: 1-6

Individual research problems which may form the basis for the master's thesis or report.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ECET 100 - Basic Electronics

Credits: 3

A survey course designed to provide an overview of basic direct and alternating current circuits and an introduction to linear and digital electronics. Laboratory exercises reinforce circuit theory and provide skills in the use of common electronic instruments.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: MATH 100 or consent of instructor.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 101 - Circuits I

Credits: 4

An introductory course in basic circuit theory emphasizing the analysis of passive circuit networks containing resistance, capacitance, and inductance operating in direct current conditions. Topics include equivalent circuits, network theorems, capacitance, RC-circuit response, inductance, RL-circuit response, and computer simulation.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ETB 102 or ECET 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 210 - Linear Circuit Applications

Credits: 4

Analysis and design of analog circuits including differential amplifiers, oscillators, linear and switching power amplifiers, applications of operational amplifiers, advanced semiconductor devices, and heat sinks.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit

N

Requisites
Prerequisite: ECET 110. Corequisite: ECET 201.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 220 - Semiconductor Electronics

Credits: 4

An introductory course in electronic devices. Topics include PN-junction theory, diodes, transistors, transistor biasing, transistor modeling, operational amplifiers, voltage regulators, and field-effect transistors (FET). Additional topics include Miller's Theorem and Network Analysis

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100

Corequisite: ECET 101, and MATH 150 or AIT 301

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 250 - Digital Logic

Credits: 3

Study of basic logic elements including gates, flip-flops, counters, and registers. Includes Boolean algebra, logic reduction methods, and digital logic applications. Emphasis on computer simulation and PLD implementation of logic circuits.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: ECET 100 or ETB 102.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ECET 299 - Topics in Electronic and Computer Engineering Technology

Credits: 1-18

Provides an opportunity for faculty to present electronic and computer engineering technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

ECET 301 - Circuits II

Credits: 4

Analysis of passive networks containing resistance, capacitance, and inductance operating in alternating current conditions. Includes sinusoidal waveforms, polar and rectangular complex algebra, inductive and capacitive reactance, impedance networks, power factor correction, resonance, magnetic circuits, and an introduction to three-phase power distribution. Calculus relationships between linear bilateral electrical components are also discussed.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 101 and MATH 150 or AIT 301

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 304 - Electric Power and Devices

Credits: 3

Industrial applications of direct and alternating power, devices, and systems. Topics include electrical and electronic power devices, controllers, servomechanisms, and actuators; DC and AC motors and generators, motor speed control and drive systems; electrical power distribution, and industrial electronics applications.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100 or ETB 102 or ECET 101 and MATH 150.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 320 - Electronic Communication Systems

Credits: 3

A survey of analog and digital communication techniques and systems including modulation, transmission line concepts, radio-wave propagation, antenna theory, and the effects of noise.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 110, ECET 201, and MATH 220 or AIT 301.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 330 - Industrial Controls

Credits: 4

A study of electronic circuits and systems encountered in industrial environments. Topics include power control devices and applications, power system design, sensors, transducers, PLCs, computer-based data acquisition, and automatic control concepts.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: ECET 350.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 335 - Industrial Control Topics

Credits: 1

Study of the applications of electronic circuits and systems in industrial environments. Topics include control systems and devices, control system modeling and simulation.

Note
Two hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: ECET 100 or AIT 335

Typically Offered
Spring

ECET 340 - Electronic Manufacturing

Credits: 3

A practical course in the details of electronic system design and fabrication. Topics include printed-circuit board design, layout, and fabrication; electronic-system design principles; 3D modeling, fabrication, packaging, and assembly techniques for electronic systems; and through-hole and surface-mount technologies.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100 or AIT 335

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 350 - Microprocessor Fundamentals

Credits: 3

Concepts of microprocessor architecture, programming, and interfacing. Topics include assembly and C language programming, data conversion methods, and microprocessor-based system development tools.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100 or AIT 335

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

ECET 352 - Digital Circuits and Systems

Credits: 3

Study of digital circuits and systems, i.e., systems controlled by microprocessors and microcontrollers. Students design and build digital circuits for the solution of engineering problems. Digital circuit design, and interfacing techniques are emphasized.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 350 and CMST 302 or instructor consent.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ECET 354 - Microcontroller Applications

Credits: 3

Examines the hardware and software of microcontroller controlled systems designed for a specific purpose (i.e. embedded systems). Students will learn how to interface microcontrollers to various sensors, actuators and communication devices as well as learn the programming associated with these devices.

Note
Two hours lecture and two hours lab.

Repeat for Credit
N

Requisites
Prerequisite: ECET 350 and CMST 302.

Typically Offered
Fall

ECET 414 - Electromagnetic Applications

Credits: 4

Emphasizes the physical understanding and visualization of Maxwell's Equations leading to the design of linear bilateral circuit components, waveguides and passive sensors for use in the radio-frequency (RF) regime.

Note
Three hours lecture and two hours lab.

Repeat for Credit
N

Requisites
Prerequisite: ECET 320 and MATH 220.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 420 - Communication Circuits Design

Credits: 3

An introduction to the theory and design of electronic circuits for communications emphasizing the implementation and analysis of common radio-frequency (RF) building blocks. Topics include s-parameters, the Smith chart, component behavior, RF test equipment, computer simulation, filter design, impedance matching, amplifiers, oscillators, mixers, and demodulators.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 320.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 421 - Telecommunication Systems

Credits: 4

An introduction to data communications and a survey of modern communication systems. Topics include Fourier analysis, data encoding, data link control, fiber-optic systems, cellular systems, satellite systems, and the modern telephone system.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 320, CYBR 250, and MATH 221.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ECET 430 - Signals and Systems

Credits: 3

A study of various network topics including Laplace transforms, signal flow graph models, transfer functions, network response, and differential equations and linear approximations of physical systems. The theory of control systems and their applications are discussed.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 201.
Corequisite: MATH 220 or AIT 301.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ECET 450 - Digital Systems and Computer Architecture

Credits: 4

Development of advanced digital design techniques. Topics include VHDL-based design, simulation, and synthesis; testing and validation; system-level interfacing; and computer architecture.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 350.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ECET 480 - Electronic Design I

Credits: 1

Application of electronic principles and the design methodology to solving a significant design problem in a team context. Includes determining customer requirements, exploring and choosing design alternatives, scheduling, and project management. Significant milestones are the project's conceptual, preliminary, and critical design reviews, which require written and oral presentations.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 320 and ECET 352 and ENGL 302.
Corequisite: ECET 430.

Typically Offered
Fall

ECET 481 - Electronic Design II

Credits: 2

A continuation of ECET 480. Includes the implementation, testing, and delivery of the project initiated in ECET 480 Electronic Design I. Significant milestones are the project prototype, design report, and final presentation.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 480.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

ECET 499 - Advanced Topics in Electronic and Computer Engineering Technology

Credits: 1-18

Provides an opportunity for faculty to present advanced electronic and computer engineering technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

ECON 101 - Contemporary Economic Issues

Credits: 3

An introduction to economic analysis and thinking on current issues that our society as well as other nations face. Using essential tools of economics such as opportunity cost, marginal analysis, and demand and supply, we examine some contemporary issues in an issue-oriented manner, rather than technically oriented. For students who want to familiarize themselves with current national and international economic issues and concerns. Not intended to be taken by economics majors or minors.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

ECON 110 - Principles of Macroeconomics

Credits: 3

Basic facts, principles, and problems of economics; determination of the level of output, employment, and the price level; the monetary and banking system; problems and policies of economic instability, inflation, and growth; principles of economic development; other economics systems.

Repeat for Credit
N

Requisites
Prerequisite: Probability of a grade of C or higher (PROB ≥ C) of at least 40 percent according to the economics component if the ACT Student Profile, a score of 18 or higher on the Math placement exam, or a Grade of B or higher in MATH 010.

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 111 - Principles of Macroeconomics - Honors

Credits: 3

Basic facts, principles, and problems of economics; determination of the level of output, employment, and the price level; the monetary and banking system; problems and policies of economic instability, inflation, and growth; principles of economic development; other economics systems.

Repeat for Credit
N

Requisites
Prerequisite: Participation in honors program and consent of instructor.

Typically Offered
Other

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 120 - Principles of Microeconomics

Credits: 3

Basic facts, principles, and problems of economics including study of the determination of prices; the determination of wages, rent, interest, and profit; theory of the firm; monopoly and government regulation; international economic relations.

Repeat for Credit
N

Requisites
Prerequisite: Probability of a grade of C or higher (PROB ≥ C) of at least 40 percent according to the economics component of the ACT Student Profile, a score of 18 or higher on the Math Placement Exam, or a grade of B or higher in MATH 010.

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Social Sciences

ECON 399 - Honors Seminar in Economics

Credits: 3

For sophomores in honors program-scheduled irregularly. Readings and discussions.

Note
Open to students in the honors program not majoring in economics.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 401 - Sophomore/Junior Seminar in Economics

Credits: 1

An introduction to economics as a science and a profession. The course introduces students to the skills and tools that make economics an attractive and enjoyable field as well as an overview of economic data and current debates.

Note
Open only to economics majors and those contemplating an economics major.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 and ECON 120.

Typically Offered
Other

K-State 8
Social Sciences

ECON 499 - Honors Project

Credits: 3

Open only to Arts and Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

ECON 505 - South Asian Civilizations

Credits: 3

Interdisciplinary survey of the development of civilization in India, Pakistan, Sri Lanka, Bangladesh, and Afghanistan, including geography, history, religion, culture, language, literature, current economy, and significant social movements.

Note
May not be counted toward economics major or minor.

Repeat for Credit
N

Requisites
Prerequisite: Three hours of social science or junior standing.

Typically Offered
Spring

Cross-listed
ANTH 505, GEOG 505, HIST 505, POLSC 505, SOCIO 505

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 507 - The Japanese Economy

Credits: 3

Analyzes Japan's growth, productivity change, income distribution, government policies, agriculture, industrial structure, labor relations education and technology, and international trade and finance. Emphases will be on U.S.-Japanese competition and comparisons.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 510 - Intermediate Macroeconomics

Credits: 3

An examination of the behavior of the economy as a whole, including an analysis of the national income account, consumption, investment, money, interest, the price, level, the level of employment, monetary and fiscal policy, and economic growth.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110, and one of the following, ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 520 - Intermediate Microeconomics

Credits: 3

An examination of the theories of consumer behavior and demand, and the theories of production, cost, and supply. The determination of product prices and output in various market structures, and an analysis of factor pricing. Introduction to welfare economics.

Note
Students cannot receive credit for both ECON 520 and ECON 521.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 521 - Intermediate Microeconomic Theory

Credits: 3

A mathematical approach to intermediate microeconomics. Emphasis is placed on the use of optimization techniques to examine consumer demand, production and cost, behavior of the firm, market structure and welfare.

Note
Students cannot receive credit for both ECON 520 and ECON 521.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121; and MATH 205 or MATH 220.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 523 - Human Resource Economics

Credits: 3

An introduction to the economic forces influencing wage and employment determination, income differentials, unemployment, and the production and acquisition of human capital. Emphasis on public policy, labor unions, and other relevant institutions.

Note
May not be counted toward economics major.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Spring

K-State 8
Social Sciences

ECON 524 - Sports Economics

Credits: 3

An economic analysis of professional and amateur sports. Pay determination of professional athletes, monopsony power of owners, discrimination, the importance of leagues, competitive balance, antitrust issues, collective bargaining, the financing of sports stadiums, and current economic issues in sports.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

ECON 527 - Environmental Economics

Credits: 3

Economics of environmental market failure and the efficient use of exhaustible and renewable resources. Topics include the application of markets and government policies to greenhouse warming, air and water pollution, and recycling.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Other

K-State 8
Social Sciences

ECON 530 - Money and Banking

Credits: 3

Nature, principles, and functions of money; development and operation of financial institutions in the American monetary system, with emphasis on processes, problems, and policies of commercial banks in the United States.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 532 - Fiscal Operation of State and Local Government

Credits: 3

Designed for students who plan careers related to state or local government. Selected topics in state and local taxation and expenditure.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 and permission of instructor.

Typically Offered
Other

K-State 8
Social Sciences

ECON 536 - Comparative Economics

Credits: 3

The transition by Russia, Ukraine, Eastern and Central Europe, and Central Asia to market economics; economic reform in China, India, and other countries; and Marxian critiques of capitalism.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 or ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall

K-State 8

Global Issues and Perspectives
Social Sciences

ECON 540 - Managerial Economics

Credits: 3

Microeconomic topics applicable to understanding and analyzing firm behavior: optimization, demand, estimation, production, and cost theory. Applications to business problems.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121; and an introductory-level statistics course (STAT 225, STAT 240, or STAT 250); and MATH 205 or MATH 220.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

ECON 555 - Urban and Regional Economics

Credits: 3

An examination of the determinants of the economic performance of urban and regional economies, including theory, problems, and policy.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall

K-State 8
Social Sciences

ECON 580 - Senior Seminar in Economics

Credits: 3

Topics for class discussion include history of economic thought, research methods in economics, and current economic issues. Students will prepare and present papers written with faculty guidance.

Note
Required of all economics majors.

Repeat for Credit
N

Requisites
Prerequisite: ECON 510; and ECON 520 or ECON 521; and STAT 351, or STAT 511 or STAT 705 or concurrent enrollment in one of the three. ECON majors only.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

ECON 590 - Monetary, Credit, and Fiscal Policies

Credits: 3

Advanced study of monetary, credit, and fiscal policies including the goals of aggregative economic policy, conflicts among goals, and measures to resolve conflicts; money markets; targets of central bank control; the relative strength of monetary and fiscal policies; rational expectations; hypothesis and policy ineffectiveness debate; terms structure of interest rates.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 595 - Problems in Economics

Credits: 1-18

Individual study is offered in international trade, labor relations, money and banking, public finance, transportation, general economics.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

ECON 599 - Topics in Economics

Credits: 1-3

Courses on special topics to be taught on demand.

Repeat for Credit
Y

Requisites
Prerequisite: To be set for each topic.

Typically Offered
On sufficient demand

ECON 605 - Economic Applications of Game Theory and Strategic Behavior

Credits: 3

Basic principles of game theory including Nash equilibria, repeated games, and strategy with incomplete information.

Note
Lecture course.

Repeat for Credit
N

Requisites
Prerequisite: ECON 520 or 521; and MATH 205 or MATH 220.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 608 - Python Coding for Economics

Credits: 3

Introduction to quantitative methods in economics. Works with Python programming language and covers topics such as using and coding functions, working with loops, object-oriented programming, understanding and building classes, data visualization, data management, and optimization.

Repeat for Credit
N

Requisites
Prerequisite: ECON 510 or ECON 520, and STAT 225 or STAT 240 or STAT 250
Recommended Prerequisite: ECON 510 AND ECON 520 or concurrent enrollment

Typically Offered
Spring

ECON 620 - Labor Economics

Credits: 3

Economics of the labor market--theory and empirical evidence. Labor force composition and trends, labor supply, labor demand, human capital, wage differentials, migration, trade unions, and current issues.

Repeat for Credit
N

Requisites
Prerequisite: ECON 520 or ECON 521.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 627 - Contemporary Labor Problems

Credits: 3

Emphasis on current research and public policies dealing with such matters as full employment, poverty, discrimination, social security, unemployment insurance, health care, minimum wages, training, and education.

Repeat for Credit
N

Requisites
Prerequisite: ECON 620 or consent of instructor.

Typically Offered
Other

K-State 8
Social Sciences

ECON 630 - Introduction to Econometrics

Credits: 3

An introduction to the analytical and quantitative methods used in economics. Applications to specific problems with an emphasis on computer analyses.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121; and MATH 205 or MATH 220; and STAT 351 or AGEC 501 or STAT 511 or STAT 705.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 631 - Principles of Transportation

Credits: 3

Examines the transportation market from the shippers' point of view by examining the impact of transportation on business firm decisions such as location, markets, and prices. Also covers the costs, prices, and service characteristics of railroads, motor carriers, water carriers, oil pipelines and airlines. The role and impact of government in the transportation market is examined from both a promotion and regulation perspective.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

ECON 633 - Public Finance

Credits: 3

Course seeks answers to questions such as: Which goods should be provided by the private sector and which by the public sector (government)? With what criteria are public expenditures evaluated? What is an equitable and efficient tax system? Who bears the tax burden? What aspects of existing taxes need reform?

Repeat for Credit
N

Requisites
Prerequisite: ECON 110, and ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 640 - Industrial Organization and Public Policy

Credits: 3

An examination of measures and determinants of industrial concentration, and an analysis of market structure, conduct, and performance, and policies related to performance.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 681 - International Trade

Credits: 3

Principles of international trade, determinants of the value of trade between any pair of countries, sources of gains from trade, main factors determining the pattern of trade, commercial policy, the political economy of trade and strategic trade policy.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 and one of the following: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 682 - Development Economics

Credits: 3

Factors affecting the economic modernization of the less-developed countries. Emphasis on capital formation, human capital, investment allocation, technical progress, income distribution, population growth, and the international economics of development.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 684 - International Finance and Open Economy Macroeconomics

Credits: 3

Introduction to international finance and open-economy macroeconomics, including the foreign exchange market, the balance of payments, international financial markets, and recent and ongoing financial crises. Covers core theoretical material, the course will examine current policy issues.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110; and ECON 120 or AGEC 120 or AGEC 121; and ECON 510.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

ECON 686 - Economics Forecasting

Credits: 3

Focus on forecasting macroeconomic variables such as sales activity, tax revenues and other important variables. Techniques of forecasting using econometrics.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110; and ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 688 - Health Economics

Credits: 3

This course applies the tools of microeconomics to the health-care sector. It analyzes the behavior of consumers and providers of medical care, the functioning of insurance markets, and the roles of government and the private sector. International comparisons are made.

Repeat for Credit
N

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
Fall-Odd Years

K-State 8
Social Sciences

ECON 695 - Undergraduate Research Methods in Economics

Credits: 3

Development of a research proposal and completion of a research project under the guidance of a faculty member. Instruction in research design, methods and data. The independent-work phase of the course will be structured with weekly targets for completing economic theory, data/case study description, methods description and analysis and interpretation.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110; and ECON 120 or AGEC 120 or AGEC 121; and ECON 630. Some prerequisites may be waived with instructor consent.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

ECON 699 - Seminar in Economics

Credits: 1-3

Seminars of special interest will be offered on demand.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 120 or AGEC 120 or AGEC 121.

Typically Offered
On sufficient demand

ECON 710 - History of Economic Thought

Credits: 3

Development of economic ideas and doctrines and the relation of these to conditions existing when they were formulated.

Repeat for Credit
N

Requisites
Prerequisite: ECON 510.

Typically Offered
Other

ECON 720 - Microeconomic Theory

Credits: 3

Demand, cost, and production theories; price and output determination in different market structures; the theory of factor market pricing; an introduction to general equilibrium and welfare analysis.

Repeat for Credit
N

Requisites
Prerequisite: ECON 520 or ECON 521; and MATH 205 or MATH 220.

Typically Offered
Fall

ECON 730 - Applied Econometrics

Credits: 3

Emphasis on applied econometrics methods. Topics include simple and multiple linear regression as well as other econometric models used in economics. Diagnosis and remedies of potential problems with linear models and data, leading to quantitative answers to empirical questions.

Repeat for Credit
N

Requisites
Prerequisite: ECON 630.

Typically Offered
Spring

ECON 735 - Mathematical Economics

Credits: 3

Application of mathematical tools of concrete problems in micro- and macro-economics; mathematical treatment of models of consumption, production, market equilibrium, and aggregate growth.

Repeat for Credit
N

Requisites
Prerequisite: ECON 520; and MATH 205 or MATH 220.

Typically Offered
Fall

ECON 801 - Topics in Monetary Theory

Credits: 3

Emphasis on recent literature of monetary economics; Federal Reserve control of the money stock; the demand for money; money and economic activity; monetary targets and indicators.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 510 and ECON 530.

Typically Offered
Other

ECON 805 - Macroeconomic Theory I

Credits: 3

An overview of macroeconomic theory including Classical, Keynesian, and Monetarist theory. An Introduction to modern analysis in macroeconomics with an emphasis on dynamic methods and general equilibrium analysis.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 120 and ECON 510.

Typically Offered
Spring

ECON 815 - Economic Analysis for Business

Credits: 3

Microeconomic and macroeconomic theory with selected business applications. Theory of consumer and producer behavior and price determination in individual markets. Theory of aggregate economic behavior and the effects of fiscal and monetary policies.

Note
Not available for graduate credit in economics.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 110, ECON 120, and one semester of calculus (MATH 205 or MATH 220).

Typically Offered
Spring

ECON 823 - Advanced International Economics

Credits: 3

Theoretical and policy issues related to the international monetary system, capital movements, exchange rate systems, the U.S. balance of payments, and trade of underdeveloped countries.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 681 or consent of instructor.

Typically Offered
Other

ECON 830 - Econometrics I

Credits: 3

Fundamentals of econometric analysis. The classical linear model, multi-collinearity, specification error, distributed lags, non-normal disturbances, dummy variables, generalized least squares, autocorrelation, heteroscedasticity. Applications to specific problems.

Repeat for Credit

Y

Requisites
Prerequisite: ECON 520; and MATH 205 or MATH 220; and STAT 706.

Typically Offered
Spring

ECON 832 - Public Sector Analysis

Credits: 3

Conditions for economic efficiency in the public sector; public good production functions; nonmarket decision making; rationale for public sector growth; systems analysis, cost-benefit and related techniques of allocating public goods.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 633.

Typically Offered
Other

ECON 840 - Managerial Economics

Credits: 3

Economic analysis of production, cost, and demand functions. Application of economic models to managerial decision making.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 520; and MATH 205; and one course in statistics with a prerequisite in the same department.

Typically Offered
Fall

ECON 881 - Topics in International Trade and Development Economics

Credits: 3

Covers key topics of current interest international trade and development economics, including new theories of firm-level comparative advantage and offshoring, outsourcing, and multinational activities.

Repeat for Credit
N

Requisites
Prerequisite: ECON720, ECON940, or consent of instructor

Typically Offered
Spring-Odd Years

ECON 890 - Seminar in Economics

Credits: 1-3

Course will provide seminars on specific topics in economics.

Note
Prerequisites vary with announced subject matter.

Repeat for Credit
Y

Typically Offered
Other

ECON 895 - Problems in Economics

Credits: 1-18

Advanced individual study is offered in selected subject matter.

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for problems being studied. ECON 898. Master's Report in Economics. ECON 899. Master's Research in Economics.

Typically Offered
Fall, Spring, Summer

ECON 898 - Master's Report in Economics

Credits: 1-18

Master's Report in Economics

Repeat for Credit
Y

Typically Offered
Other

ECON 899 - Master's Research in Economics

Credits: 1-18

Master's Research in Economics

Repeat for Credit
Y

Typically Offered
Other

ECON 905 - Macroeconomic Theory II

Credits: 3

A study of advanced topics in macroeconomic theory including general equilibrium analysis, economic growth, business cycle theory, and other developments in macroeconomic theory.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 805 and ECON 735.

Typically Offered
Fall

ECON 910 - Topics in Macroeconomics

Credits: 3

Exploration of seminal and current research in macroeconomic topics such as growth, business cycles, or public policy. Topics will be related to the research interests of the professor and students.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 805 and ECON 905.

Typically Offered
Fall, Spring

ECON 915 - Macroeconomic Modelling

Credits: 1-3

Examines current topics in macroeconomics with an emphasis on empirical modelling. The course will be structured to allow the student an in-depth look at influential articles in the literature through presentations and required summary papers, and apply similar skills in an assigned original research paper.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 735 and ECON 805.

Typically Offered
Other

ECON 920 - Labor Economics Seminar

Credits: 3

A critical analysis of wage theories, collective bargaining, and unemployment problems.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 620 or consent or instructor.

Typically Offered
Other

ECON 925 - Location of Economic Activities

Credits: 3

An examination of the theory of location including central place theory, location of the individual producer, industrial location patterns, and urban land-use models. Also includes application of theoretical models to current urban problems.

Repeat for Credit
Y

Typically Offered
Other

ECON 927 - Advanced Labor Economics

Credits: 3

An examination of studies in labor supply, labor demand, immigration, and current topics in labor economics.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 730 or concurrent enrollment in ECON 720.

Typically Offered
Other

ECON 930 - Econometrics II

Credits: 3

Continuation of Econometrics I. Stochastic regressors, asymptotic results, instrumental variable estimation, systems of equations, maximum likelihood estimation, nonlinear least squares, and other miscellaneous topics in econometrics.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 830.

Typically Offered
Fall

ECON 935 - Time Series Econometrics

Credits: 3

Discussion of recent advances in tome series econometrics. Economic forecasting, vector autoregressive modeling, unit root testing, cointegration, and other topics.

Repeat for Credit
N

Requisites
Prerequisite: ECON 930 or consent of instructor.

Typically Offered
Fall

ECON 938 - Microeconometrics

Credits: 3

A survey of recent advances in microeconometrics, including panel data, treatment effects, and other topics, to provide students with the analytical tools used in economic research.

Repeat for Credit
N

Requisites
Prerequisite: ECON 830.

Typically Offered
Fall

ECON 940 - Advanced Microeconomic Theory I

Credits: 3

An examination of demand, production, and cost theories; a discussion of duality theory and the application of the Le Chatelier principle; an analysis of price and output determination in different market structures.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 520 and ECON 735.

Typically Offered
Spring

ECON 945 - Advanced Microeconomic Theory II

Credits: 3

A study of advanced topics in economic theory, including general equilibrium theory, welfare economics, and risk and uncertainty.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 940.

Typically Offered
Fall

ECON 947 - Industrial Organization

Credits: 3

Theory of industrial organization and its analytical techniques. Game theory; monopoly pricing; product and quality selection; vertical control; static and dynamic theories of oligopoly; product differentiation, price dispersion, and advertising; asymmetric information and strategic behavior.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 735.

Typically Offered
Other

ECON 948 - Empirical Industrial Organization

Credits: 3

Analysis of market outcomes resulting from behavior and strategy of economic agents in imperfectly competitive markets, using econometric methods. Topics may include: models of consumer demand and methods of estimation; identifying and measuring market power and market effects of mergers; static models of entry and industry structure; single-agent dynamic structural models; dynamic oligopoly games; production, technology and industry structure; and other recent advances in empirical industrial organization.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 940 and ECON 830, or consent of instructor.

Typically Offered
Other

ECON 955 - Theory and Methods of Regional Economic Analysis

Credits: 3

A consideration of differences in regional and urban growth; comparison of alternative growth theories; methods of analyzing regional economics such as input-output analysis, linear programming, industrial complex, and spatial interaction models.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 925 or consent of instructor.

Typically Offered
Other

ECON 981 - International Trade Theory and Policy

Credits: 3

Discussion of recent literature in trade theory and policy under imperfect competition. International trade in imperfectly competitive international markets, strategic trade policies, political economy of trade protectionism, welfare effects of trade liberalization and economic integration, and other issues.

Repeat for Credit
Y

Requisites
Prerequisite: ECON 735.

Typically Offered
Other

ECON 999 - PhD Research in Economics

Credits: 1-18

PhD Research in Economics

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDACE 502 - Independent Study in Adult Learning and Leadership

Credits: 1-3

Selected topics in professional education.

Note
Maximum of 3 hours applicable toward degree requirements. Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDACE 714 - International Education

Credits: 3

Contemporary overview of the field of international education and an introduction to three of its parts. Comparative education, intercultural education, and development education.

Repeat for Credit
N

Typically Offered
Other

EDACE 733 - Practicum in Adult Learning and Leadership

Credits: 1-6

Related occupational or professional experiences in approved industry, school, Cooperative Extension Service, or similar agency setting under faculty supervision.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 750 - Women, Education, Leadership, and Work

Credits: 3

Emphasizes the collective and individual educational needs of women in and out of the work force and the part that occupational/educational preparation contributes to their participation in the work force.

Repeat for Credit
N

Typically Offered
Other

EDACE 765 - Adult Learners and Integrating Technology into Curriculum

Credits: 3

This course includes an in-depth study of methods for integrating innovative technologies into the curriculum for adult learners. With an indepth understanding of adult learners, students will analyze learning theories and appropriate technologies for revlevance, effectiveness, and alignment with course curriculum.

Repeat for Credit
N

Requisites
Recommended Foundation Course: EDACE 790.

Typically Offered
Fall, Spring, Summer

EDACE 775 - Readings in Adult Learning and Leadership

Credits: 1-3

Readings in research and application in specialized areas in education.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

EDACE 780 - Introduction to Adult Learning and Leadership

Credits: 3

A survey of adult learning and leadership field. Consideration given to articulation with other levels of education. Identification of changing needs within the field are reviewed.

Repeat for Credit
N

Typically Offered
Other

EDACE 782 - Educational Gerontology

Credits: 3

For both the practitioner and those interested in educational gerontology as a field of inquiry. It will examine education for and about aging, with particular reference to the role, needs, and ability of persons in the later years as learners.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDACE 785 - Designing Classroom Instruction and Curriculum for Adult Learners

Credits: 3

This course focuses on the systematic approach to instructional design for adult learners. A comprehensive discussion of all major components of curriculum design from instructional objectives, course sequencing, instructional strategies, formative assessments and summative evaluations will be included. A major focus will also be on transfer of learning.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 786 - Topics in Adult Learning and Leadership

Credits: 1-3

Examination of current topic in area of specialization of faculty.

Repeat for Credit
Y

Typically Offered
Other

EDACE 790 - Characteristics of the Adult Learner

Credits: 3

For teachers and administrators in adult and occupational programs who need a familiarity with the major characteristics of adulthood which affect the adult as a learner.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 792 - Hospital and Industry Adult Learning and Leadership

Credits: 3

An introduction to principles, roles, organization, procedures, and problems of adult learning and leadership in hospitals, industry, and related agencies.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDACE 795 - Problems in Adult Learning and Leadership

Credits: 1-18

Independent study of specific problems in the areas of adult learning and leadership.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

EDACE 815 - Introduction to Community Educational Development

Credits: 3

A comprehensive review of factors related to community change and the role of educational programs in dealing with them. Emphasis is on educational and economic problem-solving approaches and change-implementing programs.

Repeat for Credit
Y

Typically Offered
Other

EDACE 816 - Foundations of Social Justice Education: Research, Theory, and Practice

Credits: 3

This course focuses on the principles of social justice education that promote equitable, sustainable, and transformative change in various formal and non-formal educational settings across the lifespan. The course integrates theoretical and practical aspects of social justice in local, national and international settings such as K-12 formal education, higher education, adult education, community development, and family education, and agricultural education.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDACE 817 - Reflective Practice in Social Justice Education

Credits: 3

This course focuses on the application of principles of social justice education in informal and formal educational settings. Student-conceptualized and -implemented theory-to-practice social justice education projects serve as the capstone or culmination of the graduate certificate, with projects presenting powerful opportunities for students to foster social change and positively impact the communities in which they work.

Repeat for Credit
N

Requisites
Prerequisite: EDACE 816.

Typically Offered
Fall, Spring, Summer

EDACE 818 - Critical and Social Issues in Adult Learning

Credits: 3

Designed for adult learning and students and college or university personnel in sociology and related fields dealing with adults, this course focuses on the economic historical and sociocultural context in which learning takes place. Included is an in-depth examination of the relationship between adult learning and culture.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 820 - Principles of Teaching Adults

Credits: 3

This course will explore the theory and practice of teaching adults. Collaborative and active learning techniques will be emphasized in face-to-face and online environments. Students will examine the strengths, weaknesses, and appropriate application of a variety of methods to different adult education environments.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 822 - International Adult Education and Literacy

Credits: 3

This course provides an introduction to the foundations of global, political, social-economic and educational issues facing international adult education and literacy students for English as a Second Language learners.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDACE 824 - Teaching Online in Adult Learning

Credits: 3

This course examines online adult learning theories, online pedagogies, current research, and trends in e-education for the workplace and higher education.

Repeat for Credit
N

Typically Offered
Spring

EDACE 825 - Theory and Practice of Continuing Education

Credits: 3

Specific instruction on facilitating continuing education programs; emphasis on serving the institution, part-time students, community, and other interests.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 830 - Program Planning in Adult Learning and Leadership

Credits: 3

An examination of the basic situations in which adult education occurs and fundamental steps by which learning is made more effective in those situations.

Repeat for Credit
N

Typically Offered
Other

EDACE 831 - Teaching and Leading Multigenerations of Adults

Credits: 3

Examines the traits of generations as defined as age cohort that shares unique formative years. The context of teaching and leading multigenerations will be addressed. Students will learn how to apply concepts to foster communication and collaboration of all generations present.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

EDACE 832 - Interpersonal and Intrapersonal Dynamics in Adult Learning and Leadership

Credits: 3

This course explores various psychological and sociological factors that impact leadership. Through examining topics like verbal and nonverbal communication, active listening, learning and presentation styles, emotional intelligence, conflict, and motivation, students gain a deeper understanding of how these factors affect their personal leadership styles and impact adults they are leading.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDACE 833 - Digital Leadership Development in Adult Education

Credits: 3

Provides an essential introduction into digital leadership development (DLD) in adult education. Helps students acquire the skills and competencies required of adult educational leaders and administrators to make well-

grounded decisions in providing leadership on planning and designing digital learning environments and experiences. Also discusses social, ethical, and human issues related to digital leadership development and adult learners.

Repeat for Credit
N

Typically Offered
Summer

EDACE 834 - Leading Adults in a Globalized and Diverse World

Credits: 3

This course provides an introduction to the foundations of adult education leadership in the context of managing a culturally diverse workforce. Concepts of globalization as well as cross- cultural and international environments as they relate to adult education leadership are emphasized through theory to practice projects and research.

Repeat for Credit
Y

Typically Offered
Fall

EDACE 835 - Developing Teams and Adult Leaders

Credits: 3

This course will examine how teams and leaders can be developed using adult learning and leadership theories and principles.

Repeat for Credit
N

Typically Offered
Spring

EDACE 836 - Group Dynamics in Adult Learning and Leadership

Credits: 3

This course focuses on group and team behavior and processes in the adult education environment. Various factors that impact group behavior, processes, and effectiveness will be examined and participants will learn skills needed to more effectively manage and facilitate groups and teams of adults to achieve organizational objectives, accomplish tasks, and fulfill individual members' needs.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDACE 837 - Quality Programs and Staff Management in Adult Learning and Leadership

Credits: 3

Utilizes the use of adult education theories of program administration to enhance student understanding of staff and team dynamics. Focuses on developing interpersonal skills so that students can be more effective leaders, problem solvers, motivators, coaches, and change managers.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDACE 838 - Volunteer Leadership Education

Credits: 3

Introduce students to managing and leading volunteers using an adult model. Volunteers are very similar to employees—both have to be managed, coached and trained.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 839 - Experiential Learning and Leadership Dynamics

Credits: 3

Framed in the theory of experiential learning, students will apply theories and principles learned throughout the leadership dynamics program to a professional problem/setting. Students will present their experiences to a panel of academic and professional practitioners.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 845 - Social Media and Adults in the 21st Century

Credits: 3

This course addresses the most popular social media and helps students understand the promise and challenge that social media has brought to 21st century working adults. Example topics include but are not limited to Social Media and adult learning, Social Media in the workforce, and new technology literacy in 21st century.

Repeat for Credit
Y

Typically Offered
Spring

EDACE 847 - Adult Learning and Motivation

Credits: 3

Core course of adult learning perspectives and motivation for learning.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 850 - Self-Directed Learning

Credits: 3

Self-directed or independent learning is an important aspect of adult education because it represents a significant portion of all learning by adults. The concept was instrumental in distinguishing the fields of adult education. During this course, students will explore self-directed learning from both an academic and a personal perspective. Topics include its history and development, its research base, areas of current interest and implications for adult education practice.

Repeat for Credit
N

Typically Offered
Summer

EDACE 851 - The Historical and Contemporary Community College

Credits: 1

Focus on developing an understanding of historical and contemporary issues that have shaped and continue to impact community colleges. Students will develop and improve skills that are outlined in the leadership competencies published by the American Association of Community Colleges.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 852 - Field Study: The Historical and Contemporary Community College

Credits: 1

Field studies exposes students to a systematic approach to identify and analyze historical issues and issues facing contemporary community college leaders. The implications of issues for community colleges are to be considered from a leadership perspective.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 851.

Typically Offered
On sufficient demand

EDACE 853 - Access, Equity, and Success

Credits: 2

Students will explore the assets, experiences, and institutional challenges of community college students based upon personal characteristics such as race/ethnicity, socioeconomic status, age, gender, sexuality, disability, military status, and religion; and the national "best-practice" strategies currently being used to increase enrollment, persistence, and program completion for these diverse student groups.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 854 - Field Study: Access, Equity, and Success

Credits: 1

Provide an opportunity for students to reflect about challenges in changing community college cultures and structures from a traditional student-deficit model to a student-asset model accounting for the increasing diversity among community college students.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 853

Typically Offered
On sufficient demand

EDACE 855 - Aligning Vision, Planning, and Resources

Credits: 2

Study ways to understand, work with, and improve upon the financial model of community colleges and will help develop skills needed to do so.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 856 - Field Study: Vision, Planning and Resources

Credits: 1

Students will identify and analyze financial issues being faced by community colleges throughout the United States. Students will explore methods to analyze and develop viable financial solutions to address the identified issues. The legacy mission of community colleges has grown in tandem with expectations. Yet public funding of most community colleges has decreased, is less predictable, and has not kept pace with enrollment growth. These pressures compel fresh thinking about mission, priorities, resource generation, and cost containment.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 855

Typically Offered
On sufficient demand

EDACE 857 - Effective Leadership and Theory

Credits: 4

Students will be introduced to leadership issues in higher education through individual, interpersonal, team, and leadership theory and practical applications. Acentral premise of this course is to examine effective leadership practices and theories as lenses for examining leadership issues and comparing and contrasting practical applications in community colleges and competencies by their leaders while considering the terrain in which they function.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 858 - Field Study Effective Leadership

Credits: 1

Students will analyze community college cases studies and leadership issues and make recommendations as to how best meet the challenges described. Students will differentiate among leader competencies and lenses and assess their potential relevance to addressing community college issues and priorities. Students will also examine issues impacting colleges and implications for effective leadership development.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 857

Typically Offered
On sufficient demand

EDACE 859 - Effective Leadership Institute

Credits: 1

Students will travel to urban and rural community colleges and districts to meet with their respective chancellors, presidents, and leadership teams. Students will interact with board of trustee members, state educational association leaders, and other national community and technical college leaders.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 860 - Innovative Higher Education Programs for Adults

Credits: 3

Designed to provide a conceptual understanding of innovative systems and structures currently serving higher education needs of adult learners. The course will provide a historical basis for the development of these programs as well as future trends. Included will be discussions of corporate colleges, external degree programs and distance/online learning.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 861 - Fostering Desired Culture: Fundamentals & Strategies for Org Development

Credits: 2

Focus on helping students to create organizational structures designed to thrive by fostering entrepreneurialism and innovation throughout the organization. This course will also focus on consideration of inclusion and equity in organizational design and development.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 862 - Field Study: Organizational Development

Credits: 1

Students will engage with community college leaders throughout the country concerning contemporary organizational challenges. Using research, students analyze a community college situation and make recommendations to the leader as to how best address the contemporary

organizational challenges.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 861

Typically Offered
On sufficient demand

EDACE 863 - Creating a Culture of Evidence and Inquiry

Credits: 2

Students will explore how to develop and foster of cultures of evidence and inquiry from enrollment to outcomes. Other important topics include development and use of actionable information to make decisions and measure effectiveness, and robust common measures to benchmark and improve institutional performance

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 864 - Field Study Enrollment to Outcomes

Credits: 1

Designed to enable participants to apply the principles of evaluation to developing a program evaluation for a student success initiative.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 865 - Principles of Workplace Learning

Credits: 3

This course provides an overview of various aspects of workplace learning initiatives as found in the related professional literature and from various practice-related venues. Major topics include evolution of the process of workplace learning and the profession of training; assessing and analyzing workplace learning needs; designing and delivering workplace learning programs; and measuring and evaluating the impact of workplace learning initiatives.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 866 - Adult Learning,Training, and Development in Organizations

Credits: 3

Examines through adult education principles and techniques, training and development in relation to adult learning and as one of the central functions of human resource development (HRD). The focus of the course will be on expanding the students' knowledge related to organizational learning and learning organizations from educational principles; training and development concepts, frameworks, methods, and processes; and planning data-informed learning, training, and development programs, with a particular focus on adult education context.

Repeat for Credit
N

Typically Offered
Spring

EDACE 867 - Managing Change in Adult Learning and Leadership

Credits: 3

Introduces students to the process, models, and theories of change with the goal of increasing students' effectiveness in dealing with multiple aspects of personal and organizational change, inclusive of understanding conditions that may require change, increasing awareness of multiple ways that organizations change, understanding

the role of change agents, as well as understanding and managing resistance to change.

Repeat for Credit
N

Typically Offered
Spring

EDACE 875 - Program Evaluation in Adult Learning and Leadership

Credits: 3

This course will provide an overview of various methods and strategies for evaluating educational programs for adults. Students will have the opportunity to examine the literature that is related to the program evaluation process in adult education settings. Opportunities to study the manner in which the process of program evalution is conducted in modern programs for adults in governmental, educational, and private and public sector organizations will also be provided.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 879 - The Community College Curriculum and Instructional Services

Credits: 3

Evaluation of community college curricula; reasons for revision, aims and objectives. Designed to familiarize student with the entire curricular offerings of the comprehensive community college.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 880 - Significant Literature of Adult Learning

Credits: 3

A seminar studying the significant literature of adult learning from a current and historic perspective.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 882 - Introduction to Educational Research

Credits: 2

Introduce students to educational research methods, paying particular attention to the ways in which research can be used to understand and improve daily education practice, particularly in higher education. Key differences between qualitative, quantitative, mixed methods, and action research designs are highlighted.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 883 - Field Study: Educational Research

Credits: 1

The purpose of this Field Study in introductory educational research methods is to enable participants to apply concepts learned in EDACE 882 Introduction to Educational Research to critiquing various journal articles reporting primary research and further developing their understanding of research questions and various research methodologies, as well as, to provide opportunities to be consumers of research.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 882.

Typically Offered
On sufficient demand

EDACE 886 - Seminars in Adult Learning and Leadership

Credits: 1-18

These seminars will consider research and professional development on the special interests of the students in the several fields of education represented.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 898 - Master's Report

Credits: 1-18

Master's Report

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

EDACE 899 - Master's Research

Credits: 1-18

Master's Research

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

EDACE 916 - Foundations of Adult Learning and Leadership

Credits: 3

A study of adult learning and leadership historical perspectives, contemporary institutions and programs, teaching-learning process, administrative practices, and conceptual roles.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDACE 920 - Educational Value Choices

Credits: 2

Students explore the prevalence of value choices confronting educational leaders in a community college setting, the influence personal values have on educational value choices, and the how educational leaders can maintain integrity in navigating the choices.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 921 - Field Study Ed Value Choices: Access, Equity, and Success

Credits: 1

Focuses on the practical application of leadership integrity in approaching educational value choices within a community college setting.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 920.

Typically Offered
On sufficient demand

EDACE 922 - Policy Formation and Public Process

Credits: 2

Designed to provide students with a thorough background to the principal public policy issues that are impacting American community college education. The background and analysis will be viewed through a specific theory of public policy and decision making as a means of structure.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 923 - Field Study Policy and Public Process

Credits: 1

The opportunity to: (1) examine the theory of public policy and political decision making; and (2) work in-depth on a chosen issue of public policy related to community college education

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 922

Typically Offered
On sufficient demand

EDACE 924 - Effective Governance and Leadership

Credits: 2

Investigate the contributory roles of all employees and employee structures within the framework of college governance.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 925 - Field Study Governance and Leadership

Credits: 1

Analyze identified problems in college governance; identify the role and responsibilities of key players in the development and implementation of policies and strategies; develop both detailed and wide-ranging response strategies to identified problems; and, implement a shared collective vision of problem solution.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 924

Typically Offered
On sufficient demand

EDACE 926 - Leadership for Transformation

Credits: 2

Explore change and transformation theory and practice in contemporary community colleges. A widely-used change process will be used as an anchor from which to examine in depth real-world transformation efforts underway in the community college.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 927 - Field Study Leadership for Transformation

Credits: 1

This field experience exposes students to change process,

transformation theory and practice in contemporary community colleges. Students will meet with current community college leaders who will address the change process, transformation, vision and strategy, champions, innovation, communication and celebration of successes in a community college setting.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 926.

Typically Offered
On sufficient demand

EDACE 928 - Designing a Comprehensive Plan for Success

Credits: 2

Designed to review and incorporate the tenets of a leadership framework for designing a desired transformation in a community college or district. Upon completion of this course, students will be able to identify, describe, and design the key components for planning, implementing, and evaluating an institutional transformation initiative to address a complex issue relevant to the college/district and the communities, state, or region it serves.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 929 - Field Study Plan for Success

Credits: 1

Provide an opportunity for students to reflect about challenges in introducing and institutionalizing desired culture change and effective best practices to develop the envisioned future. Students will identify and articulate leadership and organizational skills necessary for transformational work.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 928

Typically Offered
On sufficient demand

EDACE 930 - Implementing Leadership Competencies

Credits: 2

Students will identify the major competencies necessary to become a more effective and efficient leader and how these competencies align with those identified by the American Association of Community College Leaders (AACC). The course includes practical application of leadership, completing a self-assessment of core leadership competencies, and developing a personal leadership growth plan. Also, students will work in teams to develop a leadership institute that can be used in a community college setting.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 931 - Field Study (Institute) Leadership Competencies

Credits: 1

Provides students with the opportunity to participate daily in discussions, develop a leadership institute, engage in reflection activities, and participate in a process for effective interviewing.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 930

Typically Offered
On sufficient demand

EDACE 937 - Organization and Administration of Adult Learning and Leadership

Credits: 3

A critical study of organizational procedures and administrative practices as related to the implementation and maintenance of effective program for adults.

Repeat for Credit
Y

Typically Offered
Other

EDACE 940 - Adult Development and Learning

Credits: 3

Study all pertinent adult development theories.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 960 - Introduction to Doctoral Studies

Credits: 3

Provides an overview of the course sequence and dissertation process. The objective is to start students preparing for their dissertation early so they can finish in a timely manner. This course also addresses work-life balance between being a leader, a student, and having a family and personal life outside of work.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 970 - Dissertation Development

Credits: 4

Introduction to the essential organizational and writing skills required for completing a dissertation. Upon completion of this course, students will be able to identify and describe the key steps in developing and writing the dissertation proposal and dissertation.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership.

Typically Offered
On sufficient demand

EDACE 971 - Field Study Dissertation Development I

Credits: 1

Review the main components of the dissertation. Students will select the research topic under investigation and develop an argument that demonstrates the need for the study.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 970.

Typically Offered
On sufficient demand

EDACE 972 - Field Study: Dissertation Development II

Credits: 1

Designed to provide an overview of the writing and organization skills necessary for the completion of a literature review and research methodology germane to writing a dissertation. Upon completion of this the course, students will be able to design and conduct a literature review and research methodology that addresses the research topic under investigation.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in the Ed.D. in Community College Leadership. Corequisite: EDACE 971

Typically Offered
On sufficient demand

EDACE 975 - Scholarly Writing

Credits: 3

Enables students to develop the writing skills they need to become successful writers in their academic and post-academic careers. Course topics focus on students' disciplines and include annotated bibliographies, critiques, and literature reviews.

Repeat for Credit
N

Requisites
Prerequisite: EDACE 960

Typically Offered
Fall, Spring, Summer

EDACE 980 - The Dissertation Process

Credits: 3

Dissertation proposal development is one of the major challenges encountered toward earning a doctoral degree. This course outlines the basic components of a dissertation study with a focus on the proposal—the dissertation's first three chapters. It then focuses on developing and writing chapter one. It is important that each student has a general idea for his or her dissertation research topic prior to the class start date. In addition to working with the course instructor, each student is expected to work closely with their major advisor.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDACE 986 - Advanced Seminars in Adult Learning and Leadership

Credits: 1-18

These seminars will critically consider recent research in the designated fields. The emphasis will be upon individual studies and small group interaction. Enrollment is restricted to those students who have been admitted to the doctoral program in education and who have completed substantial amounts of graduate study in the designated fields.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 991 - Internship in Adult Learning and Leadership

Credits: 1-6

Field experiences in the development of programs in cooperating schools and educational or related agencies under the supervision of College of Education graduate faculty member.

Note
A maximum of six credit hours. Consent of instructor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDACE 999 - Doctoral Research

Credits: 1-18

Doctoral Research

Repeat for Credit
Y

Typically Offered
Other

EDCEP 103 - Healthful and Safe College Life

Credits: 3

Addresses pertinent health education topics that impact college students and explores the effect of lifestyle choices on academic achievement. Topics include sexual health, mental health, nutrition and fitness, alcohol/drugs/tobacco, injury and illness prevention education.

Note
Not intended to replace the HN 352 Personal Wellness course when required in a curriculum.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

EDCEP 109 - Supplemental Instruction

Credits: 1

Peer-facilitated supplemental instruction that supports learning in affiliated course. Practice and development of study skills, learning strategies, and specific learning goals.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 110 - Study Skills and Strategies

Credits: 1-3

Assists first-year students in developing effective study skills, collaboration skills, and multicultural competencies. Prepares students for the independent learning and decision-making skills needed for their sophomore year and beyond.

Note
Recitation.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDCEP 111 - Foundations of College Student Success

Credits: 1-3

Introduction to academic strategies that promote college student success. Topics include academic skills, including communication and critical thinking, time management, academic and career planning and goal setting, and community building.

Repeat for Credit
Y

Requisites
Prerequisite: New students or instructor consent.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

EDCEP 120 - Academic and Career Decisions

Credits: 1

Addresses general principles of academic and career choice through lectures, class discussions, and individual research. Topics include decision-making models and principles; exploration of interests, abilities, and values through career assessments; and academic and career investigation using interactive software, library materials, online resources, and experiential learning opportunities.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

EDCEP 160 - Development and Integrity

Credits: 1

Provides a general overview of ethics and ethical decision making in academia and professional life. It is designed to help students better understand issues about academic misconduct, as well as several approaches to thinking about and resolving ethical dilemmas.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCEP 202 - Career and Life Planning

Credits: 2

Applies theory research concerning assessment interest and career choice-making to individual's planning and decision-making. Focuses on increasing understanding of the complexities of the world of work and on skills of integrating such understanding with each person's planning experience, characteristics, motives, and values in the career exploration process. Reviews resume writing, interviewing skills, and job search techniques.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

EDCEP 211 - Leadership Training Seminar

Credits: 2

General principles of leadership as applied to small groups. Study of the role of the leader, group processes and interaction, defining group goals, and techniques of observation. Workshop and supervision in small group leadership.

Note
Offered only at the Manhattan campus.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing and consent of instructor.

Typically Offered
Fall, Spring

EDCEP 311 - Interaction and Guidance for the Paraprofessional

Credits: 3

Application of a systematic approach to interaction skills in a paraprofessional helping relationship. Includes background knowledge of listening skills and practice in emitting skills which influence interaction quality.

Note
Consent of instructor.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing or sophomore standing

Typically Offered
Fall, Spring

EDCEP 360 - Peer Health Education and Leadership

Credits: 3

This course is intended as an academic exploration of social health and wellness concerns pertinent to the college student population. Using the principles of public health, peer educators will explore the importance of health-promoting behaviors in the prevention of disease. Students will examine social factors that may influence behaviors between their peers and obtain background knowledge in listening and communication skills.

Repeat for Credit
N

Requisites
Prerequisite: WellCAT Ambassadors Application and Informational Interview is required to enroll.

Typically Offered
Fall, Spring

K-State 8
Social Sciences
Ethical Reasoning and Responsibility

EDCEP 502 - Independent Study in Counseling and Educational Psychology

Credits: 1-3

Selected topics in professional education.

Note
Maximum of three hours applicable toward degree requirements. Consent of department chair.

Repeat for Credit

Y

Typically Offered
Fall, Spring, Summer

EDCEP 715 - Principles of Assessment

Credits: 3

Principles of development, administration, evaluation, and constructive instructional use of paper-pencil, product, and performance assessments. Focus on norm-and criterion-referenced uses of teacher-made and published measures as an integral part of effective decision making in education.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315.

Typically Offered
Fall, Spring, Summer

EDCEP 775 - Readings in Counseling and Educational Psychology

Credits: 1-3

Readings in research and application in specialized areas in education.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 786 - Topics in Counseling and Educational Psychology

Credits: 1-3

Examination of current topic in specialization of faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 795 - Problems in Counseling and Educational Psychology

Credits: 1-18

Selected students are permitted to secure specialized training appropriate to the needs of the individual. The student's project may involve intensive library investigation in a special field or the collection and analysis of data pertinent to a given problem. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of a project & nbsp.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 802 - Stress Management for Teachers, Counselors, and Administrators

Credits: 3

Systematic training in stress-management strategies and techniques for the professional educator and for use in classroom and counseling settings. Includes knowledge of self-directed and instrumental techniques, psychophysiology of stress, issues in stress management, and role of teacher and counselor in delivering stress-management training.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCEP 810 - Mental Health in Schools

Credits: 3

Examines mental health and risk factors in the context of schools and student learning. Topics include: characteristics and behaviors of at-risk students; and prevention, intervention, and referral strategies to facilitate and promote mental health and a positive learning environment.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 812 - History and Philosophy of Higher Education

Credits: 3

History and development of higher education with a study of the philosophy, objectives, and functions of various types of institutions.

Repeat for Credit
Y

Typically Offered
Fall

EDCEP 815 - Using Tests in Counseling

Credits: 3

Focus on the use of tests as an integral part of counseling. Emphasizes interpretation of scores, issues of psychological and educational measurement, and selection and evaluation of instruments.

Repeat for Credit
Y

Typically Offered
Spring

EDCEP 816 - Research Methods in Education

Credits: 3

This course is designed to provide students with an overview of quantitative and qualitative research methods in education and to equip them with the knowledge to be competent consumers and producers of educational research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 817 - Statistical Methods in Education

Credits: 3

An introductory yet comprehensive survey of common statistical analyses encountered in educational research. Computer oriented.

Repeat for Credit
Y

Requisites
Prerequisite: A first course in college mathematics and STAT 702 or EDCEP 816.

Typically Offered
Fall, Summer

EDCEP 818 - Principles of Student Affairs Administration

Credits: 3

Principles of practice, current professional issues, and future trends in college and university student affairs administration

Repeat for Credit
Y

Typically Offered
Spring

EDCEP 819 - Survey Research

Credits: 3

Evaluation, interpretation, use, and production of survey research in education.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 816

Typically Offered
Spring

EDCEP 821 - Fundamentals of Program Evaluation

Credits: 3

Theory, approaches, and fundamental skills for planning and implementing program evaluation; focus on research (and evaluation) designs and methods; includes evaluation professional standards and ethics.

Repeat for Credit
N

Requisites
Prerequisite: EDCEP 816 or equivalent.

Typically Offered
Fall

EDCEP 822 - Counseling Adolescents

Credits: 3

This is a foundation course for secondary school counselors and addresses issues relevant to secondary school counseling programs.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 823 - Counseling Theory

Credits: 3

Theories, methods, and problems in counseling, relating the counseling process to dynamics of human behavior.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDCEP 824 - Development Across the Lifespan for School Counselors

Credits: 3

Advanced studies in physical, intellectual, emotional, social, and personality development across the lifespan with the focus on the importance of these factors to the educational process.

Repeat for Credit
Y

Typically Offered
Summer

EDCEP 826 - Student Success and Learning in Higher Education

Credits: 3

The purpose of this course is to provide an in-depth knowledge of the factors and circumstances that lead to college student success and learning in higher education. The most recent research in the field will be reviewed, meaning that the topics receiving the most attention via research will form the basis of the content for the course.

Repeat for Credit
N

Typically Offered
Fall

EDCEP 829 - Learning Principles

Credits: 3

Exploration of learning theories and an overview of research on factors that enhance academic performance, including psychosocial variables, learning styles, and learning strategies. The course covers strategies for enhancing student academic peformance, ranging from assessment to implementation.

Repeat for Credit
Y

Typically Offered
Spring

EDCEP 830 - Diversity in Higher Education.

Credits: 3

Addresses diversity in higher education administration and practice. Examples of topics examined in the context of diversity include recruitment and retention, program development, campus climate, and multicultural student organizations.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 831 - Current Issues in Higher Education

Credits: 3

Current issues in higher education are examined. Students learn to identify current issues and how professional administrators effectively address these issues. Individual topics or issues that are part of the larger campus climate are studied.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 832 - Counseling Techniques

Credits: 3

Practice basic helping skills common to the counseling profession using live supervision and videotape/transcription. Additional skills developed include problem conceptualization, goal setting, and selecting theoretically appropriate counseling interventions.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 835 - Foundations of Academic Advising

Credits: 3

Examines the foundations of academic advising as essential componenents of student success and retention in higher education. Topics include developmental advising; research on academic advising; models and delivery systems; advising skills, including diverse populations; and evaluation, assessment, and reward systems for advisors and advising programs.

Repeat for Credit
Y

Typically Offered
Fall

EDCEP 836 - Interpersonal Relations for Academic Advising

Credits: 3

This course focuses on developmental communications/interpersonal relations skills for academic advisors. Topics to be addressed include influences on the helping process, such as personal characteristics, verbal and nonverbal responses and behaviors, and ethical considerations.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDCEP 837 - Individualized Learning Experience in Higher Education

Credits: 3

The focus of this course is for students to gain a valuable experience in the summer to enhance the application of classroom learning to practical experience. Students can choose from three options to meet course requirements: complete a summer internship (e.g., NASPA, ACUHO-I, NODA, other institution), participate in a rotational program with Kansas State's Division of Student Life, or develop a special project with a faculty member (e.g., curriculum development, research activity) that results in a final product. The format of this course will allow the sharing of information with each other so that all may learn from others' experiences regardless of location.

Note
Consent of Instructor required to enroll.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 838 - Student Development Theory

Credits: 3

Study of the American college student and how he/she is influenced by institutional policies, practices, and other environmental variables. Special attention will be given to contemporary student development theory and research.

Repeat for Credit
Y

Typically Offered
Fall

EDCEP 839 - Assessment of Academic Advising

Credits: 3

The role of quality academic advising is key to student success, graduation, and completion as identified in the research and literature on the undergraduate student experience. However, the quality and the effectiveness of the academic advising experiences must be assessed. This course will focus on a review of the foundations of academic advising, the key terms and processes of assessment, and the strategies and processes used to assess academic advising.

Repeat for Credit
N

Requisites
Prerequisite: EDCEP 816

Typically Offered
On sufficient demand

EDCEP 851 - Multicultural Aspects of Academic Advising

Credits: 3

This course introduces students to the various cultural, ethnic, racial, and linguistic issues associated with advising practice.

Repeat for Credit
Y

Typically Offered
Other

EDCEP 852 - Career Development for School Counselors

Credits: 3

Addresses the knowledge and competencies necessary for school counselors to use education, career, and labor market information resources, and career guidance and counseling techniques, methods, and technology in developing programs, services, and activities to meet the career development needs of students.

Repeat for Credit
Y

Typically Offered
Fall

EDCEP 854 - College Student Athletes

Credits: 3

Study of college student athletes. Topics include the role of intercollegiate athletics, pressures and challenges on student athletes, student development theory, life skills programming, National Collegiate Athletic Association policy, diversity, and gender issues.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 855 - Professional Counseling Orientation and Ethical Practice

Credits: 3

Designed to provide an overview of ethics and legal issues in professional counseling. To understand different levels of analysis in evaluating ethical dilemmas and how to serve the client's needs while applying and implementing appropriate legal and ethical guidelines. Effective documentation, consultation, self-care, counselor transparency, and client participation to safeguard against the threat of litigation.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 856 - Counseling Children

Credits: 3

The nature and philosophy of counseling in the elementary school; the function of specialized child appraisal and counseling techniques in the unique interrelationships of the professional school counselor and the teacher in the team approach to elementary school counseling.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 857 - Counseling Program Management

Credits: 3

This course addresses the issues, knowledge, and competencies relevant to planning, implementing, and evaluating comprehensive school counseling programs to meet the needs of all students.

Repeat for Credit
Y

Typically Offered
Spring

EDCEP 858 - Group Processes

Credits: 3

Designed to acquaint students with group procedures as basic tools in counseling, guidance, and other education services.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDCEP 859 - Introduction to Research Synthesis and Meta-Analysis in the Social Sciences

Credits: 3

The course is an introduction to conducting systematic reviews of the literature and statistically analyzing the results. This course will focus on: (a) methods for conducting replicable, systematic reviews of the literature, and (b) statistical methods for analyzing the study effects (meta-analysis). Focus will be on examining studies with continuous, binary and correlations coefficient outcomes. Statistical methods will include fixed-effects, random-effects models, prediction intervals, meta regression, and publication bias. The course will emphasize basic theory and underlying
statistical methods, computational approaches, and the interpretation of results from published studies.

Repeat for Credit
N

Requisites
Prerequisite: EDCEP 817, EDCEP 917

Typically Offered
On Sufficient Demand

EDCEP 860 - Trauma and Crisis Counseling

Credits: 3

Study of children and adults and the educational, psychological, social, and career development issues they face as a result of trauma and post-traumatic stress. Particular emphasis will be given to counseling theories and best practices for working with students and clients experiencing these issues.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDCEP 863 - Trends in Career Development

Credits: 3

This course addresses the role of work in people's lives across the life span, with an emphasis on the application of career development theories, research, practice, and resources to higher education. Topics are presented to help professionals in higher education facilitate students' academic and career development, planning, and decision-making within the context of the changing world of work.

Repeat for Credit

Y

Typically Offered
Spring

EDCEP 864 - Current Issues in Intercollegiate Athletics

Credits: 3

Examines policies and procedures of the NCAA, roles and responsibilities within a department of intercollegiate athletics the historical relationship between intercollegiate athletics and higher education institutions, the creation of the NCAA and its policies, roles and responsibilities within a department of intercollegiate athletics, and relevant research. Topics include student-athlete health and well-being, marketing, fundraising, external relations, sports information, coaching, and academic support.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 867 - Counseling Mental Health Disorders

Credits: 3

An introduction to mental health disorders for counselors. Topics include assessment of mental health symptomology, using a diagnostic system to understand mental health issues, counseling strategies for working with individuals with diagnosed mental health issues, the impact of common medications used for mental health disorders, techniques for differentiating disordered and non-disordered behaviors, and promotion of mental wellness.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 871 - Leadership, Advocacy, and Consultation for Counselors

Credits: 3

This course acquaints students with the major models of consultation that may be used by counselors for intervention with individuals and organizations. Techniques, issues and ethical considerations are also addressed.

Repeat for Credit
Y

Typically Offered
Spring

EDCEP 875 - Administration of College Student Personnel Services

Credits: 3

Planning, budgeting, personnel supervision and evaluation, office management, administrative use of computers, program evaluation and related applications in the primary college student personnel services.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 818 and EDCEP 838.

Typically Offered
Fall

EDCEP 877 - Practicum in Counseling

Credits: 3

This is a developmental counseling skills course addressing influences on the helping process such as personal characteristics, theoretical orientation, verbal and nonverbal behaviors, and ethical considerations. Includes research applications, case conceptualization, evaluation, simulation, and supervised individual and group practice in the field.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDCEP 885 - Practicum in Higher Education

Credits: 3

Supervised practical experience in a higher education setting.

Repeat for Credit
Y

Requisites
Prerequisite: Completion of 18 credit hours in the M.S. in College Student Development program and consent of instructor

Typically Offered
Fall, Spring

EDCEP 886 - Seminar in Counseling and Educational Psychology

Credits: 1-18

Intensive discussion of a problem of current professional interest based on study of pertinent original literature.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCEP 887 - Counseling Internship

Credits: 1-3

This supervised internship includes activities that a regularly employed school counselor would be expected to perform. The student will engage in individual counseling, group work, developmental classroom guidance, use within an ethical framework and a sensitivity to individual characteristics.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 877 and consent of instructor

Typically Offered
Fall, Spring

EDCEP 898 - Master's Report

Credits: 1-18

Master's Report

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDCEP 899 - Master's Research

Credits: 1-18

Master's Research

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCEP 917 - Experimental Design in Educational Research

Credits: 3

Philosophy, planning, and evaluation of research in education. Experimental designs appropriate for educational research with special emphasis on multivariate procedures. Computer oriented.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 817.

Typically Offered
Spring, Summer

EDCEP 923 - Higher Education Law

Credits: 3

This course will provide students with an overview of legal issues in higher education, with an emphasis on legal developments and trends in student affairs administration in particular.

Repeat for Credit
N

Typically Offered
Spring-Even Years

EDCEP 924 - Theories of Vocational Counseling

Credits: 3

A historical and contemporary analysis of systems and theories of vocational psychology and their implications for use in the counseling setting.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 852 or EDCEP 863.

Typically Offered
On sufficient demand

EDCEP 925 - Higher Education Finance

Credits: 3

The purpose of this course is to provide an overview of finance in higher education. Current challenges related to public funding of higher education, from both the federal and state government, will be addressed in this course. Additional focus will be devoted to the structure and function of financial aid systems as well as to options for the reform of those systems.

Repeat for Credit
N

Typically Offered
Spring-Even Years

EDCEP 926 - Enrollment Management in Higher Education

Credits: 3

Examines enrollment management theories, concepts, and research and the application of these to higher education administration. Students demonstrate enrollment management strategies through the development of a comprehensive enrollment management plan for use in a college or university setting.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

EDCEP 927 - Higher Education Administration

Credits: 3

Administration theory applied to the organization and administration of colleges and universities; special reference to structure, governing boards, administrative roles, decision-making, and analysis of selected problems.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

EDCEP 930 - Approaches to Academic Advising: Linking Theory, Research, and Practice

Credits: 3

This is an advanced study of foundational and emerging academic advising approaches. It aims to deepen student knowledge of the interdisciplinary scholarship and theory that underpin these approaches. Approaches will be from critical perspectives including applicability with different student groups and at different institutions; an evaluation of outcome research; and an exploration of assessment strategies.

Repeat for Credit
N

Requisites
Prerequisite: Admission to doctoral program Leadership in Academic Advising.

Typically Offered
Other

EDCEP 932 - Ethical Issues and Practice in Academic Advising

Credits: 3

This course explores ethical theories and principles, moral development frameworks, and value issues confronting academic advising leadership. It is based on the premise that all advising professionals are ethicists that make decisions every day. The course incorporates a comprehensive, interdisciplinary approach to ethical theories and practice in academic advising leadership.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the doctoral program Leadership in Academic Advising.

Typically Offered
Other

EDCEP 934 - Research in Academic Advising

Credits: 3

This course examines specific applications of theoretical, quantitative, qualitative, and mixed research methods in academic advising. The course provides a framework for the development of a research proposal directly related to critical questions in the field.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the Leadership in Academic Advising doctoral program.

Typically Offered
Other

EDCEP 937 - Administration of Academic Advising

Credits: 3

Examines and applies relevant theories, concepts, and models of academic advising, as well as issues and other factors related to the administration of academic advising in higher education.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDCEP 948 - Advanced Student Development Theory in College Student Affairs

Credits: 3

In-depth examination of the major young adult and adult development models and their implications within the context of student affairs in higher education.

Repeat for Credit
Y

Typically Offered
Fall-Even Years

EDCEP 951 - Multicultural Counseling

Credits: 3

Adaptations of generic counseling skills to meet the needs of diverse populations.

Repeat for Credit
Y

Typically Offered
Summer

EDCEP 953 - Multicultural and Social Justice Issues in Counselor Education

Credits: 3

An examination of multicultural and social justice issues related to the practice of counselor education and supervision. Emphasis on evidence-based counseling practices for a diverse and pluralistic population.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 955 - Legal and Ethical Issues in Counseling

Credits: 3

Examination of ethical standards developed by professional organizations of counselors. Current interpretations of standards and applications are developed through case studies, essays, reading, and literature review.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

EDCEP 957 - Teaching and Learning in Counselor Education

Credits: 3

This course focuses on teaching and pedagogy of counselor education to improve delivery, teaching, and assessment of learning across modalities. This course focuses on understanding how learning works to effectively engage and teach counselors.

Repeat for Credit
N

Typically Offered
Summer

EDCEP 958 - Advanced Group Counseling

Credits: 3

The examination of selected group counseling theories and their relevance for the practice of group counseling in a variety of settings.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 858.

Typically Offered
Spring

EDCEP 959 - Practicum in Group Counseling

Credits: 3

Supervised group counseling experience in a variety of settings.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 858 and EDCEP 958.

Typically Offered
On sufficient demand

EDCEP 962 - Leadership and Advocacy in Counselor Education and Supervision

Credits: 3

An examination of leadership and advocacy issues related to the practices of counseling, counselor education, and counselor supervision. Emphasis on the development of ethical and culturally relevant leadership and advocacy practices.

Repeat for Credit
N

Typically Offered
Spring

EDCEP 967 - Appraisal and Psychopathology

Credits: 3

Advanced application of appraisal models and methods for use with clientele. Specific personality tests and classification systems will be addressed.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 815 or admission into the Counselor Education and Supervision PhD program

Typically Offered
Spring-Even Years

EDCEP 977 - Advanced Counseling Practicum

Credits: 3

Intense supervised practice in counseling. Particular emphasis will be given to the development of skills for intervention into human problems and time-limited case management.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 823, EDCEP 877, and EDCEP 887.

Typically Offered
Fall, Spring

EDCEP 985 - Advanced Counseling Theory

Credits: 3

Reading and analysis of primary sources in major counseling theories. Written reaction papers, presentations, discussion, and development of a major paper on a personal theory.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 823 and EDCEP 887.

Typically Offered
Fall

EDCEP 986 - Advanced Seminar in Counseling and Educational Psychology

Credits: 3

These seminars will critically consider recent research in the designated fields. The emphasis will be upon individual studies and small group interaction.. Enrollment is restricted to those students who have been admitted to the doctoral program in education and who have completed substantial amounts of graduate study in the designated fields.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCEP 987 - Counseling Supervision Practicum

Credits: 3

An advanced course in the theory, techniques, and problems of supervising persons being trained as counselors. Course emphasis is on actual supervisory experiences with beginning counselors. Open to advanced doctoral students only with consent of instructor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCEP 991 - Internship in Counseling and Educational Psychology

Credits: 1-18

Studies of and field experiences in the development of programs in cooperating schools and educational or related agencies under the supervision of Counseling and Educational Psychology graduate faculty members. A maximum of 6 credit hours may be chosen from the areas listed.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCEP 999 - Doctoral Research

Credits: 1-18

Individual investigation in the field of a student's specialization.

Note

Sufficient training to carry on the line of research undertaken.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 110 - Foundations of Education

Credits: 3

Examines the historical, political, philosophical, and sociological foundations of education in the United States including the evolution of career and technical education and changing demographics; ethical and legal issues; governance and financial support; and contemporary curriculum issues. Includes critical thinking and reflective decision making about educational issues.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

EDCI 111 - Foundations of Rural Education

Credits: 4

Examines the historical, political, philosophical, and sociological foundations of education in the United States including the evolution of career and technical education and changing demographics; ethical and legal issues; governance and financial support; and contemporary curriculum issues. Includes critical thinking and reflective decision making about rural educational issues.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 112 - Foundations of Urban Education

Credits: 4

Examines the historical, political, philosophical, and sociological foundations of education in the United States including the evolution of career and technical education and changing demographics; ethical and legal issues; governance and financial support; and contemporary curriculum issues. Includes critical thinking and reflective decision making about urban educational issues.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 200 - Teaching as a Career

Credits: 1

Examines the roles, responsibilities, and dispositions of effective teachers; characteristics of the teaching/learning environment; the design of K-State's teacher education program; ways teachers change during their careers; and self-assessment about the commitment to teaching and preferences to grade levels or subject areas. An overview of the teacher education program is provided, the unit's conceptual framework is discussed, and the portfolio requirements are initiated. The skills of reflection and the dimensions of caring and ethical practice are introduced.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent enrollment required in EDCI 230 and sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

EDCI 201 - Teaching as a Career in Rural Contexts

Credits: 2

Examines the roles, responsibilities, and dispositions of effective rural teachers; characteristics of the rural teaching/learning environment; the design of K-State's teacher education program; ways teachers change during their careers; and self-assessment about the commitment to teaching and preferences to grade levels or subject areas.

An overview of the teacher education program is provided, the unit's conceptual framework is discussed, and the portfolio requirements are initiated. The skills of reflection and the dimensions of caring and ethical practice are introduced.

Repeat for Credit
N

Requisites
Concurrent enrollment required in EDCI 230 and sophomore standing.

Typically Offered
Fall, Spring

EDCI 202 - Teaching as a Career in Urban Contexts

Credits: 2

Examines the roles, responsibilities, and dispositions of effective urban teachers; characteristics of the urban teaching/learning environment; the design of K-State's teacher education program; ways teachers change during their careers; and self-assessment about the commitment to teaching and preferences to grade levels or subject areas. An overview of the teacher education program is provided, the unit's conceptual framework is discussed, and the portfolio requirements are initiated. The skills of reflection and the dimensions of caring and ethical practice are introduced.

Repeat for Credit
N

Requisites
Concurrent enrollment required in EDCI 230 and sophomore standing.

Typically Offered
Fall, Spring

EDCI 230 - Early Field Experience

Credits: 1

Includes 40 hours of supervised field experiences examining selected aspects of teaching and the learning environment, including students and learning, content and pedagogy, planning, instruction, and professionalism. Requires written reports, analyses, and reflections for each weekly school visit.

Repeat for Credit
Y

Requisites
Corequisite: EDCI 200

Typically Offered
Fall, Spring

EDCI 300 - Principles of Coaching

Credits: 3

Physiological, psychological, and kinesiological principles of coaching. Topics include training and conditioning, motivation, psychological factors affecting sport skill in performance, and mechanical principles underlying sport performance.

Note
Not for kinesiology majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 301 - Coaching and Officiating Methodology

Credits: 3

Study of rules, theory, and practices; methods of coaching and officiating.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 311 - Current Issues in Education: Global Perspective

Credits: 3

Examines current issues in K-12 education from a global perspective. Introduction to the concept of global education and explore values, beliefs, behaviors, policies and customs from around the World.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 110

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

EDCI 315 - Educational Psychology

Credits: 3

The application of psychological principles to the teaching-learning process with special emphasis on principles of learning, motivation, information processing, individual differences, and assessment.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education. Corequisite: EDCI 320

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

EDCI 317 - Educational Technology for Urban Teaching and Learning

Credits: 2

This course introduces pre-service teachers to the use of contemporary instructional technologies to enhance instruction and to facilitate professional productivity. Attention is given to issues of access and diversity, with emphasis on the urban educational setting.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 318 - Educational Technology for Teaching and Learning

Credits: 1

Introduces pre-service teachers to the use of contemporary instructional technologies to enhance instruction and to facilitate professional productivity. Attention is given to issues of access and diversity.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 319 - Educational Technology for Rural Teaching and Learning

Credits: 2

Introduces pre-service teachers to the use of contemporary instructional technologies to enhance instruction and to facilitate professional productivity. Attention is given to issues of access and diversity in rural contexts.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 320 - Core Teaching Skills and Lab

Credits: 3

Examines instructional planning, differentiating instruction, direct and indirect instructional strategies, strategies to promote student understanding, managing lesson delivery, classroom management, assessing student performance, and working with colleagues and parents.

Note
Includes a lab session each week for detailed analysis of the issues and skill building.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education. Corequisite: EDCI 315

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

EDCI 321 - Core Teaching Skills and Lab for Rural Education

Credits: 4

Examines instructional planning, differentiating instruction, direct and indirect instructional strategies, strategies to promote student understanding, managing lesson delivery, classroom management, assessing student performance, and working with colleagues and parents in rural education settings.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education. Corequisite: EDCI 315

Typically Offered
Fall, Spring, Summer

EDCI 322 - Core Teaching Skills and Lab for Urban Education

Credits: 4

Examines instructional planning, differentiating instruction, direct and indirect instructional strategies, strategies to promote student understanding, managing lesson delivery, classroom management, assessing student performance, and working with colleagues and parents in urban education settings.

Note
Includes a lab session each week for detailed analysis of the issues and skill building.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education. Corequisite: EDCI 315

Typically Offered
Fall, Spring, Summer

EDCI 361 - PK-12 PE Motor Skills and Game Development

Credits: 3

Equips future physical education teachers with the knowledge and skills to effectively teach motor skills and facilitate games in K-12 settings. Emphasizing developmentally appropriate practices, students will explore strategies for fostering motor skill acquisition, designing engaging lessons, and creating inclusive game-based learning experiences.

Repeat for Credit
N

Typically Offered
Fall

EDCI 365 - Problem-Based Learning and Computational Thinking in K-12 Schools

Credits: 3

This course will focus on the application of problem-solving practices, computational thinking skills, and the development of critical thinking processes as a way of engaging K-12 students in learning through interdisciplinary projects.

Repeat for Credit
N

Typically Offered
Fall

EDCI 368 - Teaching Computer Science in Elementary Schools

Credits: 3

Using block-coding students will participate in activities designed according to the research-based principles developed by the Raspberry Pi Foundation and the National Centre for Computing Education. Focus is placed upon developing concepts around variable, expressions, loops, and abstraction (VELA). Students will utilize a variety of unplugged to teach computing concepts. Students will also convert these activities into powerful lessons and units focused on real world examples of computing in our society.

Repeat for Credit

N

Typically Offered
Spring

EDCI 369 - Teaching Computer Science in Secondary Schools

Credits: 3

The course will provide participants with the knowledge and ability to develop coding-based units for grades 7-12 which focus on coding in both block and text-based languages. Using Scratch (block coding) and either java or python (text coding) students will develop lessons and units which are designed according to the research-based principles developed by the Raspberry Pi Foundation and the National Centre for Computing Education.

Repeat for Credit
N

Typically Offered
Spring

EDCI 381 - PK-12 PE Assessment and Measurements

Credits: 2

Provides an in-depth exploration of assessment principles and practices in PK-12 physical education. Emphasizing both theoretical foundations and practical applications, students will learn to design, implement, and analyze assessments that measure physical fitness, motor skills, cognitive understanding, and social-emotional learning in diverse student populations.

Repeat for Credit
N

Typically Offered
Spring

EDCI 400 - New Literacies in Contemporary Classrooms

Credits: 3

This course introduces general concepts of new literacies (i.e., the skills, strategies and dispositions needed to adapt to constantly changing information and communication technologies) along with innovative approaches to literacy instruction. In particular, the course will focus on the use of digital tools and multimodal texts to support reading comprehension, written and oral communication, visual literacy, global competence, and creative thinking/ problem solving in K-6 classrooms.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 405 - Middle-Level Education

Credits: 2

This course provides an overview of the characteristics of middle schools; the social, psychological, and physical characteristics of early adolescent development; middle-level curriculum; ways to organize for instruction; and the teacher's role in the guidance of students at the middle level.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

EDCI 420 - Instructional Methodologies and Assessments for ELLs

Credits: 3

Focuses on bilingual and second language acquisition theories and classroom specific instructional methodologies, and culturally responsive assessments for EL students within PreK-12 settings. Special emphasis is placed on the frameworks of teaching, learning, and assessment within diverse settings, lesson planning, cooperative learning structures, and scaffolding techniques for ELLs. Various tenets of historical as well as contemporary philosophies, approaches, methods, and strategies within the field of Bilingual Education and Second Language Acquisition are presented. Practical tips

and ideas are provided for classroom specific modifications and rigorous and meaningful transfer from instruction to culturally-embedded assessment practices within PreK-12 settings.

Repeat for Credit
N

Typically Offered
Fall or Spring

EDCI 427 - Overview of Educational Studies

Credits: 3

An exploration of transition to the field of education and educational studies,identifying elements of effective transition, instruction, and support. This course identifies how our social and professional backgrounds and previous experiences affect us during thet ransitional process.

Note
Miss spelled "that transitional"

Repeat for Credit
N

Typically Offered
Spring

EDCI 431 - Applied Linguistics for Diverse Settings

Credits: 3

This course explores the theoretical underpinnings of language acquisition and linguistics. The main emphasis of the course is on linguistic issues within bilingualism, multilingualism, translanguaging, discourse analysis, literacy development, different levels of language and their implications for instructional modifications at the classroom level.

Repeat for Credit
N

Typically Offered
Spring

EDCI 440 - Cultural and Linguistics Accommodations for Diverse Settings

Credits: 3

Focuses on the fundamentals of culturally and linguistically relevant practices for today's diverse classrooms. Special emphasis is placed on ways to navigate and create culturally responsive ecologies of learning and provide meaningful core instruction and the needed accommodations for diverse learners within PreK-12 settings. Through a critical cultural lens, students will examine the historical and contemporary efforts and approaches for advocacy, inter-cultural interactions, acculturation vs. social differentiation, various diversity perspectives and initiatives, and the importance of transformative practices and critical consciousness within our schools and society.

Repeat for Credit
N

Typically Offered
Spring

EDCI 442 - Principles and Practices in Social Justice Education

Credits: 3

This course focuses on the core societal pillars of education, employment, housing, and entrepreneurship as means to advance and guarantee a socially just framework that is equitable, reachable, and sustainable for 21st-century modern society. Students will engage in positionality self-audits, build critical cultural consciousness by analyzing societal changes and transformations, develop culturally sensitive practices to question and dismantle policies surrounding bias and privilege, and challenge systemic inequities.

Repeat for Credit
N

Typically Offered
Fall or Spring

Cross-listed
No

EDCI 445 - English as a Second Language Practicum PK-12

Credits: 3

As a capstone course, ESL practicum is a portfolio-based

learning experience providing students a chance to showcase and highlight their theoretical perspectives regarding ESL, Bilingual Education, Second Language Acquisition, and Cultural and Linguistic accommodations within diverse settings. This course will also ask students to make theory to practice connections as they plan modifications and adaptations for their diverse learners within PreK-12 settings.

Repeat for Credit
N

Requisites
Prerequisites: EDCI 420; EDCI 431; EDCI 440

Typically Offered
Spring

EDCI 505 - Introduction to Education Technology

Credits: 3

Examines the roles that technology, teachers, and learners may take in any educational context; ways of integrating technology into teaching and learning; and issues involved in using technology in K-12 settings.

Repeat for Credit
N

Typically Offered
Summer

EDCI 506 - Instructional Systems Design

Credits: 3

Examines ways to design instructional modules based on key principles of instructional systems design.

Repeat for Credit
N

Typically Offered
Summer

EDCI 507 - Evaluating Educational Media Products

Credits: 3

Employs project-based and collaborative learning strategies to help participants internalize vital considerations and criteria with respect to evaluating educational media products for potential integration into teaching and learning. After being introduced to key concepts, principles, and theories related to learners and their characteristics, learning and cognition, and instructional contexts, standards, objectives, and strategies, participants work towards building their ideal instruments/tools to evaluate the potential of various educational media products to support effective teaching and meaningful learning.

Repeat for Credit
N

Typically Offered
Summer

EDCI 508 - Social/Cultural Issues in Educational Technology

Credits: 3

Addresses social and cultural issues pertaining to the integration of educational and communications technologies (ECT) into teaching and learning; examines concerns relating to equitable access to ECT; explores the impact of ECT adoption and use upon diverse social/cultural groups; and addresses designing and developing culturally cognizant, appropriate, and relevant ECT.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 507

Typically Offered
Summer

EDCI 510 - Effective Communication in Educational Settings

Credits: 3

This course introduces students to the theories, dynamics, and interventions for effective communication and conflict resolution within educational and/or K-12 settings and among educational stakeholders

Repeat for Credit

N

Typically Offered
Spring

EDCI 514 - Leveraging Data in Ed. Settings

Credits: 3

This course offers the foundational understandings of data in education. The course introduces contemporary concepts of data, big data, and the emerging concept as well as field of study--educational data.The course covers uses of data to inform decisions and actions with an emphasis on educational data and the practice of ethically leveraging data to benefit the broad set of stakeholders, promoting equity, diversity, and inclusion in educational settings.

Repeat for Credit
N

Typically Offered
Spring

EDCI 515 - Educational Policy

Credits: 3

This course offers an analytical foundation for students interested in PK-12 education and educational public policy implementation within those settings. Drawing on social science research, the course examines the strengths and limitations of various education reform initiatives at the federal, state, and local levels. We will also apply analytical concepts to school reform issues. This course is designed to introduce students to a variety of educational policy strategies aimed at improving the quality of teaching and learning in PK-12 settings. It aims to help students build a rich framework for analyzing policies of various types, both theoretically and methodologically.

Repeat for Credit
N

Typically Offered
Summer

EDCI 550 - Schooling and Popular Culture

Credits: 3

An examination of the symbiotic relationship of American public schools and American popular culture. The course will consider how schools are reflected in the popular culture and how the representation of schooling in popular culture affects public opinion, public policy, and schools themselves.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 580 - Internship in Educational Studies

Credits: 6-9

The internship is the culminating experience for the Bachelor of Science degree in Educational Studies (B.S.E.S.). Depending upon student academic and career interests, and in consultation with the program advisor and the faculty advisory committee, the student will receive a placement in an appropriate public or private site to serve a professional internship.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 581 - Ethnographic Capstone Project in Rural Education

Credits: 2

This project-based course will be completed during the Professional Semester. Students will explore the demographic composition of a school community in a rural setting. They will develop an individual project to demonstrate application of knowledge and skills gained throughout the Rural Education program.

Note
Admission to Professional Semester

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 582 - Ethnographic Capstone Project in Urban Education

Credits: 2

This project-based course will be completed during the Professional Semester. Students will explore the demographic composition of a school community in an urban setting. They will develop an individual project to demonstrate application of knowledge and skills gained throughout the Urban Education program.

Note
Admission to Professional Semester.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 588 - Supervised Practicum for Athletic Coaches

Credits: 3

Observation and coaching participation under the direction of selected coaches in public school, club, city recreation, or other nonpublic school sport settings.

Repeat for Credit
Y

Requisites
Prerequisites: EDCI 300. Co-Requisite: EDCI 301, FNDH 220

Typically Offered
Fall, Spring, Summer

EDCI 700 - Introduction to Bilingual/Dual Language Education

Credits: 3

This course focuses on the history and foundations of bilingual/DL education, as well as an in-depth examination of contemporary programming models and trends in bilingual education. The dynamics of bilingualism at the individual, system, and societal levels will also be an emphasis of study.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDCI 701 - Administration and Supervision of Vocational Education

Credits: 2-3

Emphasis on the duties and responsibilities of administrative and supervisory personnel responsible for the promotion, development, and coordination of comprehensive vocational-technical education programs at the local level.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDCI 702 - Curriculum, Instruction, and Assessment

Credits: 3

Develops core concepts and skills necessary for effective teaching in elementary and secondary schools. The course examines curriculum, pedagogy, and assessment techniques.

Repeat for Credit
N

Typically Offered
Summer

EDCI 703 - MAT Secondary Math Methods

Credits: 3

Principles of teaching applied to mathematics instruction in the secondary and middle school including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 704 - Science Methods and Practicum for Teaching and Learning

Credits: 3

This course addresses principles of teaching applied to science instruction in the secondary school. These principles include: motivation, organization of subject matter, lesson planning for direct, inquiry, and social/personal instructional emphases; assessment, meeting the needs of individual students; organization and management of the classroom; and methodology and materials of the secondary school science curriculum.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 705 - MAT Social Studies Methods

Credits: 3

Principles of teaching applied to social studies instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 706 - MAT Secondary English/Language Arts

Credits: 3

Principles of teaching applied to language arts instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 707 - FACS Methods and Practicum for Teaching and Learning

Credits: 3

This course focuses on the principles of teaching applied to Family and Consumer Sciences instruction; organization of subject matter, unit and lesson planning, evaluation and assessment, classroom management, motivation, learning styles, methodology and materials related to teaching Family and Consumer Sciences in the middle school and secondary classroom.

Repeat for Credit
N

Typically Offered
Fall

EDCI 708 - Business Methods and Practicum for Teaching and Learning

Credits: 3

Principles of teaching applied to business education instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 709 - Agricultural Education Methods and Practicum for Teaching and Learning

Credits: 3

Principles of teaching applied to agriculture education instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle

schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 710 - Social Foundations of K-12 Education

Credits: 3

Examines the historical, political, philosophical, economic, legal, and sociological intersections of public education in the United States of America; emphasizes freedom, democracy, truth, power, and choice as core concepts of social change and social justice.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 711 - Art Methods and Practicum for Teaching and Learning

Credits: 3

Principles of teaching applied to art instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools. Field-based experience to help the pre-professional teacher practice the incorporation of art with reading methods and demonstrate application of technology into teaching and assessment in the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 712 - MAT Foreign Language Methods

Credits: 3

Principles of teaching applied to modern language instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Typically Offered
Fall

EDCI 714 - Reading in the Bilingual/DL Classroom

Credits: 3

The course will focus on evidence based instructional literacy and reading skill development among learners in bilingual/DL programs.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDCI 715 - Literacy and Diverse Learners in the Content Areas

Credits: 3

An examination of contemporary literacy and diverse learners in the secondary school content areas in light of learning theory and adolescents' stages of development.

Note
Course is designed for classroom middle level and secondary teachers.

Repeat for Credit
N

Typically Offered
Summer

EDCI 716 - Teaching Diverse Learners

Credits: 3

Examines teaching in a culturally diverse society.

Emphasizes historically underrepresented students, culturally and linguistically diverse learners, abilities, exceptionalities, gender, religion, socioeconomic status, sexual orientation and preference. Additionally, this course explores environments that are healthy, respectful, supportive, and challenging for all students.

Repeat for Credit
N

Typically Offered
Summer

EDCI 718 - Introduction to Educational Technology

Credits: 3

This course examines the roles that technology, teachers, and learners may take in any educational context: ways of integrating technology into teaching and learning; and issues involved in using technology in K-12 settings.

Note
Course is offered on the Web.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 720 - ESL/Dual Language Methods

Credits: 3

An exploration of contemporary approaches, methods, and strategies for the appropriate instruction of second language learners. Also provided is a foundational perspective on ESL/Dual Language approaches, including the communicative, cognitive, and grammatical.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Summer

EDCI 721 - Learning Strategies and Study Skills

Credits: 3

An exploration of research-based strategies for empowering learners and connecting contemporary youth with the skills needed to develop mental stamina and engage in cross-disciplinary academic tasks.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing or greater.

Typically Offered
On sufficient demand

EDCI 723 - Computer Applications in Subject Areas

Credits: 1-3

Theory and practice of using computer software to enhance teaching and learning in specific subject areas. Subjects covered will vary.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
On sufficient demand

EDCI 724 - Fundamentals of Teaching Music

Credits: 1

Techniques, materials, and experiences for a variety of music classes will be examined through discovery. Furthermore, lesson plan development, writing, and implementation will be examined in detail.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 725 - Music Methods for Elementary Schools

Credits: 1

The study of the musical characteristics of children and development of appropriate curriculum, instructional materials and techniques, and related technology for teaching musical understanding, literacy, multicultural connections, and creative improvisation in grades K-6 instrumental, vocal, and general music.

Repeat for Credit
N

Typically Offered
Spring

EDCI 726 - Music Program in Middle and Secondary Schools

Credits: 1

Organization and administration of the comprehensive music program in middle and secondary high schools; including the study of vocal and instrumental ensemble development, as well as techniques, materials and appropriate instructional technologies.

Repeat for Credit
N

Typically Offered
Fall

EDCI 727 - Advanced Methods in Music Education

Credits: 1

Advanced instructional methods and technologies related to the teaching of music in grades preK-12 implemented through field experiences.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDCI 729 - Middle-Level Mathematics for Teachers

Credits: 3

This course reviews math concepts, problems and applications to help prepare teachers to pass the Middle School Mathematics Praxis Exam. The course helps teachers gain pedagogical content knowledge in relation to teaching mathematics.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDCI 730 - Education of the Disadvantaged

Credits: 3

Consideration of the life-space of the disadvantaged learner and its relationship to curriculum, organization, and interpersonal relationships in schools. The development of realistic, relevant goals for the teacher of the disadvantaged.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
On sufficient demand

EDCI 731 - ESL/Dual Language Linguistics

Credits: 3

Explores the theoretical underpinnings of language acquisition and linguistics that educators need to understand, in order to better plan appropriately adapted curriculum and instruction for second language learners. The course encompasses problematic aspects of English language learning, the ways in which languages may differ, and certain universal aspects of languages.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Summer

EDCI 735 - Gender Implications for Education

Credits: 3

Implications of the research based on sex-role stereotyping in educational institutions. Examination of resource materials, teaching strategies, and policies intended to facilitate non-sexist educational environments.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDCI 737 - Practicum in Business and Office Occupations

Credits: 1-6

Related occupational or professional experiences in approved industry, school, Cooperative Extension Service, or similar agency setting under faculty supervision.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 740 - Culture and Language in Classroom Practice

Credits: 3

Examines ways teachers can address diversity in their classrooms with attention to issues such as critical reflection on practice; effective collaboration with families; diversification of the learning environment; use and adaptation of the grade-level curriculum; the differentiation of classroom instruction for cultural and linguistic diversity; and advocacy skill development.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

EDCI 742 - ESL/Dual Language Assessment

Credits: 3

An in-depth examination of key issues/challenges in the appropriate language assessment of culturally and linguistically diverse students. Among focal topics in theory, research and practice discussed will be: pre-and post-instructional assessment, authentic and alternative assessment, language testing and placement for programming in ESL/Dual language classrooms.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring, Summer

EDCI 745 - ESL/Dual Language Elementary Practicum

Credits: 3

The practicum is a portfolio-based experience providing the student with application experiences in ESL/Dual Language methods, assessment, and multicultural competence as well as the opportunity to demonstrate understanding of second language acquisition. Students will be required to spend 60 hours in a school setting where they can practice and implement ESL/BE lessons/methodology.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 720, EDCI 731, EDCI 742, and EDCI 733 or EDCI 740.

Typically Offered
Fall, Spring

EDCI 746 - ESL/Dual Language Secondary Practicum

Credits: 3

The practicum is a portfolio-based experience providing the student with application experiences in ESL/Dual Language methods, assessment, and multicultural

competence as well as the opportunity to demonstrate understanding of second language acquisition. Students will be required to spend 60 hours in a school setting where they can practice and implement ESL/BE lessons/methodology.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 720, EDCI 731, EDCI 742, and EDCI 733 or EDCI 740.

Typically Offered
Fall, Spring

EDCI 755 - Multicultural Issues in Teaching

Credits: 3

Examines the socio-cultural forces that influence the American educational system. Considers curriculum and instruction implications of human differences, and analyzes ways to promote equitable, quality education.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Fall

EDCI 756 - Tradebooks Across the Curriculum

Credits: 3

This course examines the use of children's literature in the K-8 literacy classroom. It focuses on recently published books in several literary genres across curricular areas.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDCI 758 - Reading/Writing Connections

Credits: 3

This course examines teaching language arts in an integrated manner, exploring the relationships between reading and writing from a developmental perspective. Teaching methods for a holistic environment are highlighted.

Repeat for Credit
N

Typically Offered
Summer

EDCI 760 - Action Research in Education

Credits: 3

This course introduces the theoretical and practical dimensions of school-based action research about curriculum and instruction topics, and students conduct an action research project. Access to the research site is required.

Repeat for Credit
N

Typically Offered
Fall

EDCI 764 - Engineering Design Practices in Secondary Science Teaching

Credits: 3

This course prepares secondary science teachers to integrate engineering design practices at the same level as scientific inquiry in alignment with the Next Generation Science Standards (NGSS). Integration of practices in the curriculum is required for licensure in science disciplines. Evidence of proficiency includes instructional design, assessment, evaluation, and practicum experiences. Emphasis is placed on specifying criteria and constraints for acceptable solutions; generating and evaluating multiple solutions; building and testing prototypes; and optimizing solutions through an iterative process.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 765 - Contemporary Pedagogies for Teaching Computer Science

Credits: 3

This course provides a knowledge base of computer science teaching practices addressing, diversity, equity, and inclusion, problem-based instruction, engineering design, assessment, and feedback. Focused activities address the twelve research-based principals of teaching and learning computing as identified by the National Centre for Computing Education. The course will introduce PBL strategies such as concept mapping, learning graphs, code tracing, parson's problems, and modeling.

Repeat for Credit
N

Typically Offered
Summer

EDCI 768 - Teaching Computer Science in Elementary Schools

Credits: 3

Using block-coding students will participate in activities designed according to the research-based principles developed by the Raspberry Pi Foundation and the National Centre for Computing Education. Focus is placed upon developing concepts around variable, expressions, loops, and abstraction (VELA). Students will utilize a variety of unplugged activities to teach computing concepts. Students will also convert these activities into powerful lessons and units focused on real world examples of computing in our society.

Repeat for Credit
N

Typically Offered
Fall

EDCI 769 - Teaching Computer Science in Secondary Schools

Credits: 3

The course will provide participants with the knowledge and ability to develop coding-based units for grades 7-12 which focus on coding in both block and text-based languages. Using Scratch (block coding) and either java or python (text coding) students will develop lessons and units which are designed according to the research-based principles developed by the Raspberry Pi Foundation and the National Centre for Computing Education.

Repeat for Credit
N

Typically Offered
Fall

EDCI 770 - Advanced Approaches in World Lang Ed

Credits: 3

The study of contemporary approaches, methods, and research-based best practices for world language instruction. Provides a venue to analyze and discuss programmatic and curricular decisions and how that impacts teaching and learning.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 540 and EDSEC 541.

Typically Offered
On sufficient demand

EDCI 771 - Assessment in World Language Education

Credits: 3

The course will study how to create, implement, and analyze world language assessments to enhance instruction and support learning

Repeat for Credit
N

Requisites
Prerequisite: EDCI 770

Typically Offered
Fall, Spring, Summer

EDCI 772 - Current Trends and Research in World Language Education

Credits: 3

Analyze current trends in world language education. Recent research will be stressed. Explore how this applies to

curricular and instructional decisions.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 773 - Contemporary Technology in World Language Education

Credits: 3

The course will study pedagogical implications of instructional technologies to enhance and support world language education. There will be a focus on the constant evolution of technology and how it can enhance the teaching and learning of world language education.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 775 - Readings in Curriculum and Instruction

Credits: 1-3

Readings in research and application in specialized areas in education.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring, Summer

EDCI 776 - Teaching in Middle Schools

Credits: 3

Several instructional approaches consistent with the characteristics of the emerging adolescent student (grades 5-9) will be examined in relation to current research. Direct development of alternative curricular programs. Appropriate use of interdisciplinary activities and nontraditional materials will be emphasized.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315.

Typically Offered
On sufficient demand

EDCI 779 - Primary School Education

Credits: 3

A course for those interested in the kindergarten and primary school child. Emphasis will be placed on curriculum development, pertinent research, and innovative practices in early education.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Summer

EDCI 781 - Teaching the Theoretical Foundations of Constitutional Government

Credits: 1

Examines the theories (e.g., natural rights, classical republicanism, and constitutionalism) and theorists (e.g., Aristotle, Locke, Hobbes, and Montesquieu) that most influenced constitutional thinking in the United States. Explores how to teach effectively about these theories and theorists.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 782 - Teaching the Historical Origins of Constitutional Government

Credits: 1

Examines seminal ideas, documents, and events in the

creation of the United States Constitution such as problems with the Articles of Confederation, the characteristics of good government, the debates at the Philadelphia Convention, the Federalist Papers, and the Antifederalist Papers. Explores how to teach effectively these ideas, document, and events.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 783 - Teaching the Development of Constitutional Principals

Credits: 1

Examines the development of political ideas and constitutional thinking since the Founding. Focuses on how the Bill of Rights, the amendment process, judicial review, and the Fourteenth Amendment are used to empower and limit government. Explores how to teach effectively about developments in constitutional thought.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 784 - Teaching the Institutions of Government

Credits: 1

Examines the powers, limits, and development of political institutions such as Congress, the President, the Supreme Court, and political parties. Explores how to teach effectively about these institutions.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 785 - Teaching the Bill of Rights

Credits: 1

Examines the rights protected by the United States Constitution and the ways that rights protected by the United States Constitution and the ways that rights empower citizens, limit government, and contribute to constitutional government. Explores how to teach effectively about rights.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 786 - Topics in Curriculum and Instruction

Credits: 1-3

Examination of current topic in area of specialization of faculty.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring, Summer

EDCI 787 - Teaching Citizenship

Credits: 1

Examines development of the rights, responsibilities, and challenges of citizenship in the United States. Explores how to teach effectively about citizenship.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 788 - Teaching the Constitutional Principles of America's Founders

Credits: 3

Develops constitutional principles; explores perspectives of constitutional interpretation, change, and preservation; raises questions about the immediate and enduring significance of America's founding principles and

documents; and introduces sound pedagogical practices to teach about them.

Repeat for Credit
N

Typically Offered
Fall

EDCI 789 - Methods and Materials in Civic Education

Credits: 3

Focuses on the pedagogical aspects of civic education and engagement such as research-based approaches to concept attainment, skill development, discussion, and deliberation as well as analysis of curriculum materials and programs that apply these pedagogies.

Repeat for Credit
N

Typically Offered
Spring

EDCI 790 - Engaged Citizens: Public Policy Issues and Processes

Credits: 3

Examines the teaching of the workings of constitutional government through the lens of the public policy making processes and the roles of individual voters, organized public, the media, and state and local governments in that process.

Repeat for Credit
N

Typically Offered
Summer

EDCI 791 - Teaching Science and Mathematics in the Elementary School

Credits: 4

Develops knowledge, skills, and dispositions to effectively teach elementary science and mathematics. Introduces content, methods, and materials. Explores curriculum integration.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 702

Typically Offered
Fall, Spring, Summer

EDCI 792 - Teaching Social Studies, Reading, and Literacy in the Elementary School

Credits: 4

Develops knowledge, skills, and dispositions to effectively teach elementary social studies, reading, and language arts. Introduces content, methods, and materials. Explores curriculum integration.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 702

Typically Offered
Fall

EDCI 793 - Teaching Health, Movement, and Fine Arts in Elementary Schools

Credits: 4

Develops knowledge, skills, and dispositions to effectively teach health, movement, and fine arts. Introduces content, methods, and materials. Explores curriculum integration.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 702

Typically Offered
Spring

EDCI 794 - Advanced Methods of Teaching

Credits: 3

Examines popular theories, important principles, research-

based strategies, and best practices associated with effective teaching. Provides a venue to apply theory to practice; connect ideas and action; and link content and pedagogy.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 795 - Problems in Curriculum and Instruction

Credits: 1-18

Independent study of a specific problem in curriculum or instruction.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 796 - Brain-Based Literacy Instruction

Credits: 3

This course provides advanced study of theory and research regarding literacy acquisition related to brain development and function. The intended audience includes K-12 regular classroom teachers, reading teachers, resource room teachers, teacher aides, and other professionals concerned with meeting the literacy needs of children and young adults. The following topics are covered in the course: Cognitive functions, memory systems, sensitive/critical periods for brain development related to literacy, implications for classroom environment and stress upon student performance, executive functions and research-based instructional strategies found to increase student performance.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDCI 797 - Secondary Content Field Colloquium I

Credits: 2

This course is designed to explore key concepts within the secondary content field. Focus will be on advancing the development of disciplinary content knowledge and pedagogical content knowledge.

Repeat for Credit
N

Typically Offered
Summer

EDCI 798 - Secondary Content Field Colloquium II

Credits: 2

This course is designed to explore additional key concepts within the secondary content field. Focus will be on advancing the development of disciplinary content knowledge and pedagogical content knowledge.

Repeat for Credit
N

Typically Offered
Fall

EDCI 799 - Secondary Content Field Colloquium III

Credits: 2

Class explores the content knowledge of the candidate in regards to the middle and secondary content curriculum, identifies areas of strength and weakness in content knowledge, and provides enrichment and remediation to prepare the candidate for the internship experience.

Repeat for Credit
N

Typically Offered
Intersession

EDCI 800 - Teaching Practicum

Credits: 1-6

Participate in supervised field experience in K-12 schools. Apply principles of curriculum, instruction, and assessment

to plan, teach, and reflect.

Repeat for Credit
N

Typically Offered
Fall

EDCI 801 - Internship in K-12 Schools

Credits: 1-4

Supervised experience teaching in discipline-specific K-12 school classrooms.

Note
Instructor permission.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDCI 803 - Curriculum Development

Credits: 3

An overall view of the entire school curriculum, patterns of organization, outlining of instructional fields, and specific helps in curriculum development for administrators and classroom teachers.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 812 - History of Education

Credits: 3

The history of education is explored critically through multiple perspectives. Complex forces governing changes in education are exposed--forces that are felt but unseen. By studying historical contexts, much about schooling today is seen as problematic and open to question--not as inevitable. This study pushes past a passive acceptance of the status quo via a vigorous, fresh analysis.

Repeat for Credit
N

Typically Offered
Spring

EDCI 813 - Comparative Philosophies of Education

Credits: 3

Philosophical thought in education is examined critically through multiple perspectives. The learning environment, the role of the learner, and the role of the teacher are issues central to analysis in the course as they manifest themselves in learning and teaching for social change and social justice. The questions of what are freedom, democracy, truth, power, and choice are central to the examination.

Repeat for Credit
N

Typically Offered
Fall

EDCI 814 - Understanding and Teaching Reading

Credits: 3

Foundational issues in K-12 reading instruction. Focus on the reading process, the nature of the learner, the text, and the instructional setting.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 816 - Approaches to Literacy Instruction

Credits: 3

A foundational study of research-based approaches, materials, and methods for effective K-12 literacy instruction.

Repeat for Credit
Y

Typically Offered
Summer-Odd Years

EDCI 818 - Theoretical Models of Literacy

Credits: 3

Advanced study of reading with an emphasis on foundational theories and seminal research studies reflecting the complexity of the literacy process.

Repeat for Credit
Y

Typically Offered
Summer-Odd Years

EDCI 820 - Contemporary Issues in Language Arts

Credits: 3

An analysis of current methods, issues, and trends in teaching, speaking, listening, and writing through the study of significant literature and research findings.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 821 - Advanced Methods in the Teaching of K-12 Mathematics

Credits: 3

Advanced study of selected topics in K-12 mathematics emphasizing new programs, trends, controversial topics, and new recommendations for persistent problems; findings of recent research stressed.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 823 - History of Mathematics Education

Credits: 3

This course will examine the issues and forces behind the evolution of mathematics education reform from 1820-present. Historical readings, mathematics curricula, analysis of political and social change, and research in both psychology and mathematics education will be analyzed to establish a foundation for understanding current reform efforts.

Repeat for Credit
N

Typically Offered
Fall

EDCI 825 - Research in Mathematics Teaching and Learning

Credits: 3

This course will focus on seminal and contemporary research in mathematics teaching and learning. Emphasis will be placed on current trends in K-12 classrooms, the relationship between curriculum and instruction to current mathematics education research, critical analysis of research practices, solving and analyzing problems, and designing goals and outcomes for instructional strategies.

Repeat for Credit
N

Typically Offered
Summer

EDCI 826 - Contemporary Technologies in Mathematics Education

Credits: 3

The purpose of this class is to explore the theoretical implications of using technology as a tool for teaching mathematics in K-12 classrooms. The course content will focus on the continual evolution of technology and how this evolution can assist in the teaching and learning of mathematics.

Repeat for Credit
N

Typically Offered
Fall

EDCI 827 - Theoretical Models of Mathematics Teaching and Learning

Credits: 3

This course will focus on the theories of learning, which provide a foundation for the standards for mathematical practice. The course will specifically address historical and contemporary theories related to mathematics teaching and learning.

Repeat for Credit
N

Typically Offered
Spring-Even Years

EDCI 828 - Assessment in Mathematics Education

Credits: 3

This course will provide participants with assessment tools necessary to enhance learning for diverse student populations. The course will explore ways to document student performance and progress for instructional and accountability purposes. Participants will become familiar with quantitative and qualitative concepts and practices used to evaluate student learning in the classroom.

Repeat for Credit
N

Typically Offered
Summer-Even Years

EDCI 830 - Contemporary Issues in Family and Consumer Sciences Education

Credits: 3

Advanced study of evolving trends and materials for Family and Consumer Sciences programs; application to teaching and curriculum.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: EDSEC 621 and teaching experience.

Typically Offered
Summer

EDCI 831 - Contemporary Issues in Teaching and Learning

Credits: 3

Advanced study of selected topics and contemporary issues in curriculum and instruction emphasizing new programs, trends, instructional strategies, and curricular issues. Findings of recent research are stressed.

Repeat for Credit
Y

Typically Offered
Spring, Summer

EDCI 834 - Improving Science Teaching

Credits: 3

Evaluation and implementation of psychological and philosophical foundations will be stressed in improving K-12 science teaching.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 835 - Supervision of Student Teaching

Credits: 3

Organization and functions of student teaching programs; orienting, supervising, and evaluating student teachers in elementary and secondary schools.

Repeat for Credit
N

Typically Offered
Spring

EDCI 840 - Literacy Assessment

Credits: 3

An overview of the collection, analysis, and interpretation of data from formal and informal assessment methods and instruments to enhance literacy instruction by documenting growth and literacy development.

Repeat for Credit
Y

Typically Offered
Fall

EDCI 841 - Striving Literacy Learners

Credits: 3

Explores the identities of "striving literacy learners" across grade levels to address the importance of interest, motivation, gender, culture, and language on learning to read with an emphasis on differentiated instruction to support literacy development and lifelong reading.

Repeat for Credit
Y

Typically Offered
Spring

EDCI 845 - ELD/Dual Language Methods

Credits: 3

This course is an exploration of contemporary approaches, methods, and strategies for the appropriate instruction of second language learners. The course examines the theories of Second Language Acquisition and the need to consider the biographies of students within the scope of classroom teaching and learning. Also explores foundational perspectives on EFL/dual language approaches, including the communicative, cognitive, and grammatical.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 846 - ELD/Dual Language Culture and Language in Classroom Practice

Credits: 3

This course examines the many ways in which school educators may build the capacities for cultural and linguistic diversity in the classroom. Special emphasis is placed upon readiness for mutually accommodative professional practices with *culturally and linguistically diverse* [CLD] students and families in the following areas: foundations of culture and language; critical reflection on practice; maximizing the assets that CLD students and families bring to learning; school and classroom ecology; curriculum conscientiousness; the differentiation of instruction for cultural and linguistic diversity; and a framework for advocacy in practice.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 847 - ELD/Dual Language Assessment

Credits: 3

This course provides an overview of current issues regarding the assessment of CLD students within classroom practice. Examines pre-instructional student assessment; the acculturation process and asset discovery; issues of language proficiency beyond the measurements; focus on pre-assessment, formative, and summative assessment; using interactive grouping configurations and learning strategies as an integral part of the assessment process; assessments for students in special education settings.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDCI 858 - Online Course Design Project/e-Portfolio

Credits: 2

The portfolio as a professional development tool is developed using Association for Educational Communications and Technology standards. An online instructional design course project with assessment is developed and placed on an e-portfolio website.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to Digital Teaching and Learning Specialty.

Typically Offered
Fall, Spring, Summer

EDCI 862 - Instructional Systems Design

Credits: 3

This course examines ways to design instructional modules based on key principles of instructional systems design.

Note
Graduate Level Course

Repeat for Credit
N

Requisites
Prerequisite: EDCI 718 or equivalent course

Typically Offered
Fall

EDCI 863 - Online Teaching and Learning

Credits: 3

This course examines ways to design and develop online instructional modules based on key principles of instructional systems design.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 718 or equivalent course and EDCI 862 or equivalent course

Typically Offered
Spring

EDCI 864 - Social/Cultural Issues in Educational Technology

Credits: 3

This course addresses social and cultural issues pertaining to the integration of educational and communications technologies (ECT) into teaching and learning; examines concerns relating to equitable access to ECT; explores the impact of ECT adoption and use upon diverse social/cultural groups; and addresses designing and developing culturally cognizant, appropriate, and relevant ECT.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 718 or equivalent course.

Typically Offered
Summer

EDCI 866 - Educational Technology Change Management

Credits: 3

This course introduces participants to the knowledge and skills needed to become agents of positive technological change within their workplaces. Topics covered include diffusion of innovations, needs assessment, change management, systemic change, human performance technology, socio-cultural cognizance, and inclusion/equity.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 718 or admission into the Ed.D. program

Typically Offered
Summer

EDCI 871 - World Language Education Practicum

Credits: 3

Participate in a supervised field experience in a PK-12 world language classroom. Apply the principles of best practice in world language curriculum and instruction planning, instruction, assessment, and reflection.

Repeat for Credit
N

Requisites
Corerequisites: EDCI 770, EDCI 771, EDCI 772, EDCI 773

Typically Offered
Fall, Spring, Summer

EDCI 876 - The Social Studies Curriculum in the Secondary School

Credits: 3

New trends, materials, and ideas in teaching K-12 social sciences, based on recent research and experimental programs.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 878 - The Language Arts Curriculum

Credits: 3

The changing scene in the teaching of English: trends, materials, and ideas in literature, composition, and grammar that have emerged from recent research and discovery.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 882 - Teaching and Learning Models

Credits: 3

Advanced study of ways to organize the curriculum, instructional strategies, and the teaching environment to promote learning. Various models of teaching are analyzed and critiqued.

Repeat for Credit
Y

Typically Offered
Fall

EDCI 886 - Seminar in Curriculum and Instruction

Credits: 1-18

Intensive discussion of research or problems of current professional interest based on study of pertinent original literature.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 887 - Educational Technology Proseminar I

Credits: 3

Examines contemporary issues related to the role of technology in teaching and learning. Topics covered reflect current theory, research and practice within the discipline of educational technology. This is the first of a two-course sequence examining a wide range of issues; the second course is EDCI 888.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 718 or equivalent course

Typically Offered
Fall

EDCI 888 - Educational Technology Proseminar II

Credits: 3

Examines contemporary issues related to the role of technology in teaching and learning. Topics covered reflect current theory, research and practice within the discipline of educational technology. This is the second of a two-course sequence examining a wide range of issues; the first course is EDCI 887.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 718 or equivalent course

Typically Offered
Spring

EDCI 890 - Master's Project

Credits: 1-6

Students select and prepare a project designed to improve their professional practice. It may be the construction of a

professional portfolio or project to represent the student's learning throughout the master's degree program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 898 - Master's Report

Credits: 1-18

A master's report is generally shorter than a thesis and presents the results of a more limited original investigation or a problem or topic within the student's classroom or educational field approved by the candidate's supervisory committee.

Note
Permission by department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 899 - Master's Thesis

Credits: 1-18

A master's thesis presents the results of an original investigation or a problem or topic within the student's classroom or educational field approved by the candidate's supervisory committee.

Note
Permission by department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDCI 900 - Introduction to Ed.D. Doctoral Studies

Credits: 3

This course guides Ed.D. students in becoming acclimated to doctoral studies and research. Students are engaged in discussion and dialogue about the purpose of doctoral studies in education, as well as the responsibilities associated with doctoral studies and research: academic integrity, research ethics, and inclusive learning environment. Specifically, students explore doctoral studies as a way to transform ideas, epistemologies, and theories into praxis for addressing problems of practice and policy in schools.

Repeat for Credit
N

Typically Offered
Summer

EDCI 901 - Literature Reviews for Doctoral Research

Credits: 3

This course explores the purpose and development of literature reviews in educational research. Students learn methods of engaging, organizing, and synthesizing literature. Students examine different theoretical frameworks and think about how certain theories can be used to address their problems of practice and policy in schools. Students will begin reviewing literature for doctoral research.

Repeat for Credit
N

Typically Offered
Summer

EDCI 907 - Curriculum Theory

Credits: 3

Theoretical concepts underlying significant curriculum developments. A systematic critique of current curricular theory. Consideration of model generation.

Repeat for Credit
Y

Typically Offered
Fall

EDCI 910 - Multicultural Curriculum Programming

Credits: 3

Application of multicultural curriculum principles to total school programming with particular emphasis on the cultural pluralism phenomenon. Includes analytic review of instruments on multicultural/multiracial curriculum evaluation as well as planning skills for equitable thrusts. Primarily involves elementary and secondary focus with some attention to postsecondary programming.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDCI 912 - Historical Research Methods in Education

Credits: 3

Historical research is the contextual link of the past to the present. Offering new perspectives and analyses, this course is an introduction to the methodology of historical research in education and an introduction to historical writing about educational issues. A historical research paper/project is the culminating experience.

Repeat for Credit
N

Typically Offered
Fall-Even Years

EDCI 913 - Inquiry I – Statistical Analysis in Curriculum and Instruction

Credits: 3

Introduction of statistics and statistical analyses in educational research. Covers a wide range of descriptive and inferential statistics. Focuses on understanding concepts and processes of statistics and interpreting the results based on educational research data. First in a two-course sequence.

Repeat for Credit
N

Typically Offered
Fall

EDCI 914 - Inquiry II – Qualitative Research in Curriculum and Instruction

Credits: 3

Focus on acquiring methodological skills used to conduct qualitative research; collecting data using field notes, interviews, observations, and documents; analysis and interpretation of data; and communicating results of qualitative data in writing.

Repeat for Credit
N

Typically Offered
Spring

EDCI 915 - Inquiry III - Program Evaluation for Curriculum and Instruction

Credits: 3

Introduction to basic concepts of program evalution and tools commonly used to evaluate educational programs and activities. Explores different evaluation designs, quantitative and qualitative methodologies commonly used in assessment and evaluation, and skills required to be a critical reader of evaluations.

Repeat for Credit
N

Requisites
Prerequisite: EDCEP 816

Typically Offered
Fall

EDCI 917 - Inquiry IV - Advanced Quantitative Methods in Curriculum & Instruction

Credits: 3

Advanced examination of statistics and statistical analyses in educational research. Focus on transtion from learning statistics to using and presenting statistics.

Repeat for Credit
N

Typically Offered
Spring

EDCI 918 - Inquiry IV - Advanced Qualitative Methods in Curriculum & Instruction

Credits: 3

Critical consideration of recent research in designated fields. Emphasis on case study research methods.

Repeat for Credit
N

Typically Offered
Spring

EDCI 920 - Narrative Inquiry in Education

Credits: 3

This course examines theoretical underpinnings of narrative inquiry, narrative analysis, narrative data collection, narrative writing, and contemporary narrative research issues in education.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 838.

Typically Offered
Other

EDCI 930 - Leadership in Literacy

Credits: 3

A seminar to prepare reading professionals to work as literacy leaders, advocates, and coaches to support district and school literacy professional development.

Repeat for Credit
Y

Typically Offered
Summer-Even Years

EDCI 943 - Principles of College Teaching

Credits: 3

Principles of learning, learning theory, educational objectives, methods and techniques, college students, and evaluation in the classroom. Emphasis upon preservice and in-service help in improving instruction at the college level.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDCI 945 - Clinical Practicum in Reading

Credits: 3

Supervised K-12 practicum with candidates working with individuals and small groups of readers using a wide range of evidence-based instructional practices, approaches, and curricular materials.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 816, EDCI 818, EDCI 840, and EDCI 841. Prior or concurrent enrollment in EDCI 930.

Typically Offered
Summer

EDCI 975 - Internship in Reading

Credits: 1-4

Professional field experience for candidates to demonstrate expertise by supporting reading development, analyzing building and district needs, developing action plans, and conducting related professional development.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 945.

Typically Offered
Fall, Spring

EDCI 986 - Advanced Seminar in Curriculum and Instruction

Credits: 1-18

These seminars will critically consider recent research in the designated fields. The emphasis will be upon individual

studies and small group interaction. Enrollment is restricted to those students who have been admitted to the doctoral program in education and who have completed substantial amounts of graduate study in the designated fields.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDCI 991 - Internship in Curriculum and Instruction

Credits: 1-18

Studies of and field experiences in the development of programs in cooperating schools and educational or related agencies under the supervision of College of Education graduate faculty members. A maximum of 6 credit hours may be chosen from the areas listed.

Repeat for Credit
Y

Requisites
Prerequisite: Only TELRN non-licensure track students and Ed.D. students may enroll in EDCI 991 and/or list EDCI 991 on their Program of Study. Permission of department head.

Typically Offered
Fall, Spring, Summer

EDCI 999 - Research in Curriculum and Instruction

Credits: 1-18

Doctoral research demonstrates the candidate's ability to conduct significant original research related to curriculum and instruction, to analyze the information obtained from the research, and to present the results in a dissertation format appropriate to the educational field.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDEL 250 - Health and Movement Education in Elementary Classrooms

Credits: 2

Addresses major concepts of health education, human movement, and physical activities to enable elementary teachers to promote healthy lifestyles for all students in their instruction.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDEL 270 - Arts for Elementary Schools

Credits: 3

Methods, materials, and educational philosophy of the fine arts for elementary school teaching. Students will explore art and design media, techniques, and concepts including drama, movement, music, and visual arts. Emphasis will be placed on designing, implementing, and evaluating arts experiences.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

EDEL 410 - Block B Practicum: K-6

Credits: 2

A field experience designed to give students opportunities in applying teaching methods in literacy and science in elementary grades. Includes using technologies to enhance instruction and facilitate professional productivity.

Note
Field experience 30 credit hours; Lecture/Lab 12 credit hours.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320 Corequisite: EDEL 411.

Typically Offered
Fall, Spring

EDEL 411 - Science of Reading I

Credits: 3

Provides an evidence-based approach to teaching the science of reading in the primary grades focusing on five areas: phonemic awareness, phonics, vocabulary, fluency, and comprehension. Topics include how the brain learns to read, essential components of structured literacy, and the research behind practices that support literacy skills and language development. Addresses literacy assessment, instructional strategies, and resources for teaching decoding, language comprehension, and reading comprehension to meet the needs of all students.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDEL 410.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

EDEL 412 - Teaching Science: PK-6

Credits: 3

An introduction to the principles and methods of teaching science in elementary grades, including the nature of science, student learning, curriculum, instructional methods and activities, equity issues, and student assessment. Includes using technologies to enhance instruction and facilitate professional productivity.

Repeat for Credit
N

Requisites
Corequisite: EDCI 320

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

EDEL 413 - Classroom Assessment: PK-6

Credits: 1

Examines the role of assessment in elementary classrooms in teaching; characteristics of high-quality assessments; diagnostic, formative, and summative assessments; preparation of classroom tests and test items; performance and portfolio assessments; affective traits; assessment of students with special needs and characteristics; grading and reporting; and standardized tests.

Repeat for Credit
N

Requisites
Corequisite: EDCI 200 and Admission to Teacher Ed

Typically Offered
Fall, Spring

EDEL 414 - Teaching Culturally and Linguistically Diverse Learners

Credits: 3

Examines multicultural education and the characteristics of diverse learners in the classroom, including culturally and linguistically diverse learners. Curricular and instructional implications of these differences are examined in an effort to differentiate instruction to meet the needs of all learners.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education. Corequisite: EDCI 320

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

EDEL 415 - Teaching Methods for Mathematics, PK-2

Credits: 3

Focuses on teaching mathematics in the elementary school, grades PK-2. Topics include: reform movements in math

education, effective learning environments, students' and teachers' views and experiences with mathematics, pedagogy of major mathematical concepts, and the nature of mathematical and reasoning processes.

Note
Intended to be required for all undergraduate elementary education majors.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320

Typically Offered
Fall or Spring

EDEL 450 - Art Methods for Elementary Schools

Credits: 3

Principles of teaching applied to art instruction in elementary schools including: motivation, child-development and mark making, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of elementary school art.

Repeat for Credit
N

Requisites
Prerequisite: Admission to Teacher Education, EDART Teaching field.

Co-requisite: EDEL 451.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

EDEL 451 - Art Practicum for Elementary Schools

Credits: 1

Field-based experience to help the pre-professional teacher practice the incorporation of art methods, strategies, and techniques in teaching and assessment in the elementary school.

Repeat for Credit
N

Requisites
Prerequisite: Admission to Teacher Education, EDART Teaching Field.

Co-requisite: EDEL 450.

Typically Offered
Spring

EDEL 460 - Block C Practicum: K-6

Credits: 2

A field experience designed to give students opportunities in applying teaching methods in literacy, social studies, and mathematics in elementary grades. Includes using technologies to enhance instruction and facilitate professional productivity.

Repeat for Credit
N

Requisites
Prerequisite: EDEL 410 and EDEL 411.

Typically Offered
Fall, Spring

EDEL 461 - Science of Reading II

Credits: 3

Extends an evidence-based approach to teaching the science of reading in the intermediate grades building on five areas: phonemic awareness, phonics, vocabulary, fluency, and comprehension. Topics include orthography, morphology, essential components of structured literacy, and the research behind practices that support literacy skills. Addresses literacy assessment, instructional strategies, and resources for teaching writing, language comprehension, and reading comprehension to meet the needs of all students.

Repeat for Credit
N

Requisites
Prerequisite: EDEL 410, EDEL 411. Corequisite: EDEL

460.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

EDEL 462 - Teaching Social Studies: K-6

Credits: 3

Methods and resources for teaching social studies in elementary grades with the goal of helping students develop the ability to make informed and reasoned decisions for the public good as citizens of a culturally diverse, democratic society in an independent world. Includes using technologies to enhance instruction and facilitate professional productivity.

Repeat for Credit
N

Requisites
Corequisite: EDEL 460

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Social Sciences

EDEL 463 - Teaching Mathematics: K-6

Credits: 3

The teaching of mathematics in elementary grades, including the nature of mathematical processes, curriculum, methods of instruction, instructional materials, and the evaluation of outcomes. Includes using technologies to enhance instruction and facilitate professional productivity.

Repeat for Credit
N

Requisites
Corequisite: EDEL 460.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

EDEL 464 - Classroom Management and Discipline: PK-6

Credits: 1

Examines ways to establish and maintain a positive learning environment in elementary classrooms and specific strategies to address misbehavior. Emphasis is placed on creating an effective management system, establishing a positive learning environment, addressing individual and group motivation, and preparing to deal with misbehavior.

Repeat for Credit
N

Requisites
Prerequisite: Admission to Teacher Ed and EDCI 200

Typically Offered
Fall, Spring

EDEL 465 - Teaching Methods for Mathematics, Grades 3-6

Credits: 3

Mathematics pedgogy for the elementary school, grades 3-6. Topics include: effective learning environments, teaching major mathematical concepts, formative and summative assessment, classroom discourse, and connecting mathematics to students' lived experiences.

Note
Intended to be required for all undergraduate elementary education majors.

Repeat for Credit
N

Requisites
Prerequisite: EDEL 415

Typically Offered
Fall or Spring

EDEL 466 - Supporting Elementary Learners in Reading and Math, Grades PK-6

Credits: 3

Designed to equip future elementary educators to support elementary learners in developing strong foundational skills in reading and mathematics, particularly for students who are exceptional, diverse, and at risk. Topics include: Structured Literacy, the Science of Reading, Multi-Tiered Systems of Support (MTSS), and Response to Intervention (RTI) strategies within the context of diverse learners in the regular education classroom.

Note
Intended to be required for all undergraduate elementary education majors.

Repeat for Credit
N

Requisites
Prerequisites: EDEL 415, EDEL 411

Typically Offered
Fall, Spring

EDEL 467 - Teaching Methods for STEAM, PK-6

Credits: 3

Integrating pedagogical and disciplinary knowledge needed to deliver high-quality STEM/STEAM education in the elementary classroom. Real-world experiences related to key concepts in the Next Generation Science Standards (NGSS) and other content-area standards through inquiry-based, problem-based, and/or phenomena-based approaches.

Note
Intended to be required for all undergraduate elementary education majors.

Repeat for Credit
N

Requisites
Prerequisite : EDEL 320, EDEL 412

Typically Offered
Fall or Spring

EDEL 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Requires consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDEL 502 - Independent Study in Elementary Education

Credits: 1-3

Selected topics in professional education. Maximum of 3 hours applicable toward degree requirements.

Note
Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDEL 520 - Physical Education/Health Methods for PK-6 Schools

Credits: 3

This class includes both theoretical and practical guidelines for analysis and implementation of children's physical education/health. The course focuses on applications of the Kansas standards for elementary educators PK-6 grades.

Repeat for Credit
N

Requisites
Prerequisite: Admission to Teacher Education and corequisite: EDCI 320, EDEL 521.

Typically Offered
Spring

EDEL 521 - Physical Education/Health Practicum for PK-6 Schools

Credits: 1

This course will provide an opportunity for students to plan, teach, and evaluate Physical Education/Health lessons within a placement at the PK-6 school level.

Repeat for Credit
N

Requisites
Corequisite: EDEL 520.

Typically Offered
Spring

EDEL 585 - Teaching Internship in Elementary School

Credits: 1-15

Observation and teaching participation under the direction of selected elementary teachers.

Note
Admission to Professional Semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

EDEL 620 - Foreign Language Elementary School Methods

Credits: 3

Methods of teaching and organization for the foreign language program in the elementary school. A score of "2" or "Advanced" on the Oral Proficiency Interview (OPI) is required.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320 Corequisite: EDEL 621

Typically Offered
Spring

EDEL 621 - Foreign Language Elementary School Practicum

Credits: 1

A teaching experience to apply the methods of teaching and organization for the foreign language program in the elementary school.

Repeat for Credit
N

Requisites
Corequisite: EDEL 620

Typically Offered
Spring

EDLEA 502 - Independent Study in Educational Leadership

Credits: 1-3

Selected topics in professional education.

Note
Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 710 - Fundamental Histories and Philosophies in Indigenous Education

Credits: 3

Examines the history of education with Indigenous populations in both Eurocentric and non-Eurocentric contexts. Includes: examining Indigenous knowledges found outside of what is considered mainstream education, critical Indigenous philosophies and frameworks from Indigenous scholars in the academy, the foundations of Native sovereignty in the United States, and pedagogical approaches within Eurocentric and non-Eurocentric spaces.

Repeat for Credit
N

Typically Offered
Summer

EDLEA 720 - Self-Determination, Sovereignty, and Systems of Indigenous Education

Credits: 3

Focuses on the evolution of sovereignty for Native nations as it exists in modern educational systems. Includes exploration of the bureaucratic landscape of Indian education in the United States and leading/advocating for Indigenous students and families across educational systems in ways that allow Native nations to build their sovereign capacities to play a more prominent role in the education of their citizens.

Repeat for Credit
N

Typically Offered
Fall

EDLEA 730 - Leadership, Advocacy, and Action in Indigenous Education

Credits: 3

Prepares educators working in or with Indigenous communities to help create culturally sustaining learning environments. Explores leadership, advocacy and action at the classroom and program management levels with focus on building working technical knowledge.

Repeat for Credit
N

Typically Offered
Spring

EDLEA 740 - Applied Project in Educational Leadership for Indigenous Populations

Credits: 3

Application of theories, principles, and skills learned throughout the Indigenous Education Leadership Certificate program to a professional problem/setting.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 710, EDLEA 720, and EDLEA 730

Typically Offered
Summer

EDLEA 770 - Educational Change and Technology

Credits: 2

This course deals with educational change, teaming, and information literacy. Three thrusts are considered: the emerging technologies and educational change, shaping change with technology, and the use of technology/information literacy to transform teaching and learning.

Repeat for Credit
N

Typically Offered
Spring

EDLEA 775 - Readings in Educational Leadership

Credits: 1-3

Readings in research and application in specialized areas in education.

Note
Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 786 - Topics in Educational Leadership

Credits: 1-18

Examination of current topic in area of specialization of faculty.

Note
Varied topics offered each semester so course may be

repeated.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 795 - Problems in Educational Leadership

Credits: 1-18

Selected students are permitted to secure specialized training appropriate to the needs of the individual. The student's project may involve intensive library investigation in a special field or the collection and analysis of data pertinent to a given problem. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of a project.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 801 - Ethical Dimensions of Educational Leadership

Credits: 3

The course rests on the assumption that leadership is a subset of ethics rather than ethics being a subset of leadership. We will examine the ethics of what leaders are, what they do, and how they do it. Students will assess the public and private ethics of leaders, the ethical obligations of leaders and followers, the ways in which leaders shape the ethical environment of institutions, and the temptations of power. We will examine ethical issues related to leadership through case studies concerning leaders in a variety of contexts and cultures. The course looks at how leaders convey values through actions, language, and as role models. It aims to expand students' ethical point of view by first considering personal ethics, then moving on to look at leadership and the common good, and finishing with an examination of ethics in learning communities.

Repeat for Credit
N

Typically Offered
Fall

EDLEA 810 - Historical and Philosophical Analysis of Leadership in Education

Credits: 3

This course seeks to insure that students understand the historical and philosophical background that forms the foundation for current educational systems, offerings, and practices, with a focus on educational leadership. Students will be expected to gather information and research from both primary and secondary sources, be reflective practitioners, and apply higher level cognitive and affective skills. Abilities in writing and critical analysis will be required as students apply, analyze, synthesize, and evaluate a variety of writings regarding the history and philosophy of education in the United States, as well as international influences.

Repeat for Credit
N

Typically Offered
Summer

EDLEA 811 - Philosophy of Education

Credits: 3

A critical analysis of major educational philosophies with discussion of their impact on the problem of education for democracy.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDLEA 819 - Introduction to Education Finance

Credits: 3

An examination of P-12 public school fiscal policy construction and daily operational issues, including evaluation of local, state, and federal fiscal support, tax structures, distributional formulas, finance reform

strategies, and budget preparation and administration.

Repeat for Credit
Y

Typically Offered
Summer

EDLEA 820 - Data Literacy/Data Informed Decisions in Educational Leadership

Credits: 3

Examines actionable school mission and vision attentive to values and priorities that include data use, technology, values, equity, diversity, digital citizenship, social-emotional well-being, academic needs, and based on school improvement implementation theory and research. Provides overview of the types of research methodologies, their strengths and limitations, and the contexts to which they are most suitable to school improvement.

Repeat for Credit
N

Typically Offered
Fall or Spring

EDLEA 825 - Strategic Leadership in Education

Credits: 3

This course deals with an overview of educators becoming strategic leaders at the program, building, and district levels. Two central thrusts are considered: (1) professional and ethical leadership, and (2) information management and evaluation leadership. Emphasis is placed on knowledge, skills and attributes to identify contexts, developing with others vision and purpose, utilizing information, framing problems exercising leadership processes to achieve common goals, and acting ethically for educational communities.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDLEA 827 - Political and Community Leadership in Education

Credits: 3

A study of the relationship between the school and the community, with special emphasis on the development of a comprehensive community education program. Organizational patterns, financing, program development, and interaction with other community agencies are analyzed.

Repeat for Credit
N

Typically Offered
Other

EDLEA 828 - Scholarly Orientation to Graduate Studies

Credits: 3

This course offers graduate students opportunities to learn how to write in a scholarly way, manage bibliography, understand formatting and citational guidelines of American Psychological Association, conduct index-driven library searches for scholarly sources, and develop an understanding of academic standards of graduate studies in education.

Repeat for Credit
N

Typically Offered
Fall, Summer

EDLEA 830 - Introduction to Educational Facility Planning

Credits: 3

An introduction to the principles and processes involved in providing an appropriate physical infrastructure for P-12 education. Emphasis is placed on planning, financing, constructing, maintaining, and utilizing physical resources.

Repeat for Credit
Y

Typically Offered
Summer

EDLEA 831 - Educational Law

Credits: 3

An examination of the legal status of educational institutions in the United States; the legal rights and responsibilities of educators including due process, tort liability, and contracts; student rights; landmark court decisions; federal and state legislation impacting on education, and resources available to assist in developing solutions to legal problems.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDLEA 834 - Strategies for Educational Change

Credits: 3

This course provides educators with conceptual knowledge concerning the problems and processes of educational change. Case studies of change are analyzed in the attempt to develop models of educational change.

Repeat for Credit
Y

Typically Offered
Summer

EDLEA 835 - The Principalship

Credits: 2

Analysis of the principal's role as he or she interacts with various referent groups. Applicable to both elementary and secondary administration.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDLEA 836 - School-Community Relations

Credits: 3

Interrelationships that exist between the school and the community and the role of the teacher and administrator in such relationships.

Repeat for Credit
Y

Typically Offered
Other

EDLEA 838 - Qualitative Research in Education

Credits: 3

An overview of theoretical and philosophical perspectives informing qualitative research is presented. In addition, methods (design, data collection, data analysis, and reporting) used in qualitative research for educational settings are examined and applied.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDLEA 841 - District, Building, and Program Leadership in Education

Credits: 3

This course deals with an overview of educators becoming leaders of instruction at the district, building, and program level. Four thrusts are being considered (1) instruction, (2) curriculum, (3) staff development, and (4) supervisory leadership. Considerable emphasis is placed on knowledge, skills, and attributes of learning leadership. Themes of planning, conducting, and assessing performance are covered in depth.

Repeat for Credit
Y

Typically Offered
Spring, Summer

EDLEA 845 - Leadership for Diverse Populations

Credits: 3

Designed for educators to increase their knowledge of self and others regarding issues of diversity. An emphasis is placed on understanding the role of educators inpromoting

practices and policies supportive of all stakeholders in the educational organization.

Repeat for Credit
Y

Typically Offered
Summer

EDLEA 848 - Understanding Theoretical Frameworks

Credits: 3

Students will explore a variety of philosophical stances that underpin research methods. Examines the nature of reality (ontology) and knowledge (epistemology). Students are expected to develop a personal philosophy of inquiry that will help inform their theoretical and methodological approaches to research.

Repeat for Credit
N

Requisites
Recommended Prerequisite: EDLEA 838.

Typically Offered
Fall

EDLEA 855 - Administrative Leadership in Curriculum

Credits: 3

This course identifies the major roles and responsibilities of school administrators in curriculum-related activities. Administrative skills necessary for developing and evaluating the curriculum will be examined.

Repeat for Credit
Y

Typically Offered
Other

EDLEA 860 - Inclusive School Culture in Educational Leadership

Credits: 3

Examines the use of data to evaluate, cultivate, and advocate for equitable educational resources, technologies, and opportunities that support the educational success and social emotional well-being of each student. Application of knowledge and skills to promote the current and future success of each student and adult and maintain a supportive, equitable, culturally responsive, and inclusive school culture.

Repeat for Credit
N

Typically Offered
Fall or Spring

EDLEA 865 - Administrative Leadership in Staff Development

Credits: 3

This course focuses on the role of the administrator in developing, implementing, and evaluating staff development programs. Superintendent, building-level administrator, and staff development director leadership skills will be analyzed.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 870 - Educational Professional Learning and Human Resources in Educational Leadership

Credits: 3

Examines human resource administration practices in school leadership with the capacity to develop and engage staff in a collaborative professional culture designed to promote school improvement, teacher retention, and the success and well-being of each student and adult in the school. Engagement in research-based strategies for personnel supervision and evaluation.

Repeat for Credit
N

Typically Offered
Fall or Spring

EDLEA 875 - Administrative Leadership in Staff Supervision

Credits: 3

This course identifies the major roles and responsibilities of superintendents and building-level administrators as supervisors of staff in a K-12 school district.

Repeat for Credit
Y

Typically Offered
Other

EDLEA 885 - Technology Leadership for Administrators

Credits: 3

A course designed to provide an in-depth analysis of administrator technology leadership skills necessary for integrating technology in education. The roles and technologies of technology leadership will be studied in the context of staff development, supervision, and curriculum articulation. Considerable attention will be given to strategies necessary for creating district and building technology plans.

Repeat for Credit
Y

Typically Offered
Fall, Summer

EDLEA 886 - Seminar in Educational Leadership

Credits: 1-18

Intensive discussion of a problem of current professional interest based on study of pertinent original literature.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDLEA 889 - Practicum in Educational Leadership

Credits: 1-3

Supervised on-the-job experience in school leadership.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDLEA 898 - Master's Report

Credits: 1-18

Master's Report

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDLEA 899 - Master's Research

Credits: 1-18

Master's Research

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDLEA 901 - The School District Leader

Credits: 3

An examination of research and practice, looking at the role of the school superintendent through the standards for School Leaders, as developed by the Interstate School Leaders Licensure Consortium (ISLLC) and adapted by the state of Kansas for licensure requirements for the district leadership license. Emphasis is placed on leading school improvement efforts, and forming and sustaining purposeful learning communities.

Repeat for Credit
N

Typically Offered
Fall

EDLEA 902 - District Leader Internship

Credits: 1-3

Satisfies the internship requirement for the district leadership license recommendation. Students are required to document a minimum 150 clock hours guided field experience through a formal internship and other coursework (i.e., additional internship requirements beyond EDLEA 902 are also imbedded in many courses in the licensure sequence to assist in reaching the 150 clock hour requirement).

Repeat for Credit
N

Typically Offered
Fall, Spring

EDLEA 910 - Educational Human Resource Administration

Credits: 3

Human resource administration practices in education are considered along with the implications of collective negotiations and professional accountability for human resource policies.

Repeat for Credit
Y

Typically Offered
Spring, Summer

EDLEA 928 - Organizational Leadership in Education

Credits: 3

This course is an examination of the knowledge, skills, and attributes necessary to understand and improve organizations. It includes leadership theory, implementing plans, managing resources, and applying appropriate processes and procedures in varied educational settings.

Repeat for Credit
Y

Typically Offered
Other

EDLEA 929 - Narrative and Arts-Based Inquiry in Qualitative Research

Credits: 3

Students will be introduced to narrative and arts-based inquiry to inform their qualitative research projects. Students will identify a genre from narrative and arts-based inquiry to prepare representational and methodological reflection pieces to inform their future research. Topics covered include critical autoethnography, creative non-fiction, visual representation, mixed-medium art and more.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 838.

Typically Offered
Other

EDLEA 938 - Advanced Data Analysis in Qualitative Methods

Credits: 3

An overview and application of data analysis methods in qualitative inquiry. In addition representation of findings, documentation of methods, analytic frameworks, processes of analysis, ethical dilemmas, and human subject approval explored.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 838

Typically Offered
Spring

EDLEA 948 - Data Representation and Writing in Qualitative Research

Credits: 3

Topics covered in this course would vary each semester based on students' writing projects. Topics may include, but not limited to, building methodological arguments, connecting theoretical and methodological frameworks, navigating issues in various genres of data representation, triangulation, and aligning findings with research purpose and questions.

Note
Course is repeatable.

Repeat for Credit
Y

Requisites
Prerequisite: EDLEA 838.

Typically Offered
Fall

EDLEA 950 - Advanced School Business Management

Credits: 3

An advanced course in school finance policy and budgeting practices, with particular consideration for hands-on application to school district leadership in Kansas.

Repeat for Credit
N

Typically Offered
Fall

EDLEA 958 - Case Study in Qualitative Research

Credits: 3

This is an advanced research course on qualitative case study design and application in social science research. Topics include types of case studies, defining the case, site, and sample selection, data collection methods, within-case and cross-case analysis, and writing case reports. Students will conduct and critique a case study appropriate to their discipline.

Repeat for Credit
N

Requisites
Recommended Foundation Course: EDLEA 838.

Typically Offered
Spring

EDLEA 968 - Discourse Analysis

Credits: 3

Students will be exposed to the broad and complex field of discourse analysis. Students will learn about different theoretical and methodological approaches to analyzing the various forms and conceptualizations of "discourse". The course will weave together theory and method, as it will cover discourse analysis as both method and methodology.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 838 or equivalent.

Typically Offered
Summer

EDLEA 978 - Qualitative Data Management and Analysis Using Nvivo

Credits: 3

Students will have opportunity to explore the relationships between current technologies and the theory and methods of research. Students will learn to use qualitative analysis software, Nvivo, with specific data sets for preparation of data files, management of text and image, creation of codes, memos, queries models, and formation of reports.

Note
EDLEA 938 is highly recommended prior to taking this course.

Repeat for Credit
N

Requisites
Prerequisite: EDLEA 838 or equivalent.

Typically Offered
Summer

EDLEA 986 - Advanced Seminars in Educational Leadership

Credits: 1-18

These seminars will critically consider recent research in the designated fields. The emphasis will be upon individual studies and small group interaction. Enrollment is restricted to those students who have been admitted to the doctoral program in education and who have completed substantial amounts of graduate study in the designated fields.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDLEA 988 - Differentiated Research

Credits: 3

Students will complete a research project of their choice by breaking the project into smaller components, setting goals, maintaining accountability, and preparing deliverables towards the completion of the project. Projects can include theory, methodological work, book chapters, publishable papers, dissertation proposal or chapter drafts, grant work, and more.

Repeat for Credit
N

Requisites
Recommended Foundation Course: EDLEA 838 or an advanced research course.

Typically Offered
Fall

EDLEA 991 - Doctoral Internship in Educational Leadership

Credits: 1-12

Studies of and field experiences in the development of programs in cooperating schools and educational or related agencies under the supervision of Educational Leadership graduate faculty members.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDLEA 999 - Research in Educational Leadership

Credits: 1-18

Individual investigation in the field of a student's specialization.

Repeat for Credit
Y

Typically Offered
Fall, Spring

EDSEC 210 - Careers in Family and Consumer Sciences Education-1

Credits: 1

With a focus on family and consumer sciences (FCS) education foundations, FCS framework, FCCLA, FCS branding, and professional practice, this course explores the principles in planning and organizing family and consumer sciences curriculum and career pathways. The course introduces professional practices that support curriculum design elements and instructional methods unique to programs that emphasize technical skill proficiency and competency-based applied learning.

Repeat for Credit
N

Requisites
Corequisite: EDCI 110

Typically Offered
Fall

EDSEC 211 - Careers in Family and Consumer Sciences Education-2

Credits: 1

EDSEC 211 With a focus on career pathways, work-based learning, internship development, employability skills, and advisory boards, this course explores the principles in planning and organizing family and consumer sciences curriculum and career pathways. The course introduces professional practices that support curriculum design

elements and instructional methods unique to programs that emphasize technical skill proficiency and competency-based applied learning.

Repeat for Credit
N

Requisites
Prerequisites: EDCI 110 Foundations of Education and EDSEC 210.

Typically Offered
Spring

EDSEC 328 - Social Studies Colloquium I

Credits: 1

Application and integration of theories and practices of social studies education. Emphasis on rudimentary knowledge of content disciplines and how they can be incorporated in education.

Repeat for Credit
N

Typically Offered
Fall

EDSEC 360 - Introduction to Physical Education/Health

Credits: 3

This course includes identification of competency-based, goal-oriented activities appropriate to PK-12 physical education/health. Emphasis on foundations of physical education/health including: exercise science, sport, careers, and challenges for the future.

Repeat for Credit
N

Typically Offered
Fall

EDSEC 380 - Adaptive Physical Education

Credits: 2

Emphasizes the principles and practices involved in providing activities for individuals who have disabilities or temporary limitations and cannot participate in or benefit from the regular activity program. This course is designed to prepare physical education teachers to provide safe, appropriate, and individualized accommodations to children with disabilities who are included in general physical education programs.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 360.

Typically Offered
Spring

EDSEC 428 - Social Studies Colloquium II

Credits: 1

Continuation of application and integration of theories and practices of social studies education. Emphasis on rudimentary pedagogical strategies and how they can be incorporated in social studies education.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 328.

Typically Offered
Fall, Spring

EDSEC 455 - Teaching in a Multicultural Society

Credits: 1

Application of multicultural understandings to teaching in a multicultural society. Strategies for working effectively with students to achieve educational equity.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

EDSEC 477 - Content Area Literacies and Diverse Learners

Credits: 2

Development of content area literacies to include concern for culturally and linguistically diverse learners.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 455

Typically Offered
Fall, Spring

EDSEC 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Requires consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDSEC 502 - Independent Study in Secondary Education

Credits: 1-3

Selected topics in professional education.

Note
Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDSEC 525 - Interpersonal Relations in the Schools

Credits: 1

A didactic and experiential course designed to develop an understanding of human relations skills in the schools. Provides knowledge and skills necessary to work effectively with students, parents, and school personnel. Particular emphasis is on the basis for interpersonal relations in education, communication skills, the facilitative relationship, working with students in groups, and conducting meetings with parents and school personnel.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 477

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

EDSEC 528 - Social Studies Colloquium III

Credits: 3

Application and integration of theories and practices of content disciplines into instruction. Emphasis on design and presentation of lessons through lenses of social studies disciplines.

Repeat for Credit
N

Requisites
Corequiste: EDSEC 544

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Social Sciences

EDSEC 530 - Art Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to art instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning,

assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 531

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

EDSEC 531 - Art Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate art education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall

EDSEC 532 - Business Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to business instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 533

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

EDSEC 533 - Business Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate business education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall

EDSEC 536 - Language Arts Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to language arts instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 537

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

EDSEC 537 - Language Arts Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate language arts education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall, Spring

EDSEC 538 - Mathematics Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to mathematics instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 539

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

EDSEC 539 - Mathematics Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate mathematics education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall, Spring

EDSEC 540 - Modern Language Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to modern languages instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 541

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

EDSEC 541 - Modern Language Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate modern language education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall

EDSEC 542 - Science Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to science instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 543

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

EDSEC 543 - Science Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate science education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall, Spring

EDSEC 544 - Social Studies Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to social studies instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 545

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

EDSEC 545 - Social Studies Methods Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate social studies education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall, Spring

EDSEC 546 - Physical Education/Health Methods for Secondary and Middle Schools

Credits: 3

This course provides students opportunities to study, discuss, organize, and practice instructional methods

designed specifically for secondary and middle school physical education/health programs. Emphasis will be placed on understanding of the objectives, characteristics, and activities available to satisfy student growth and development. The course addresses movement education, rhythm games of low organization, body manipulative, object manipulative, and specific sport skills.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 547

Typically Offered
Fall

EDSEC 547 - Physical Education/Health Practicum for Secondary and Middle Schools

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate physical education/health education lessons within a placement at the middle or secondary level. This practicum also requires students to incorporate reading methods and apply instructional technology in their instruction.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 320, Corequisite: EDSEC 525

Typically Offered
Fall

EDSEC 582 - Teaching Internship in Music

Credits: 6-12

Observation and teaching under the direction of selected music teachers in elementary, middle level, and secondary school music programs.

Note
Admission to Professional Semester.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

EDSEC 586 - Teaching Internship in Secondary Schools

Credits: 1-12

Observation and teaching participation under the direction of selected secondary teachers.

Note
Admission to Professional Semester.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

EDSEC 611 - Coordination Techniques

Credits: 1

Acquaints students with techniques in selecting, implementing, and coordinating occupational programs between the school and the business community.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 620.

Typically Offered
Spring

EDSEC 614 - Laboratory Techniques in Teaching Science

Credits: 3

Rationale for laboratory in secondary school science. The design and implementation of laboratory activities and demonstrations in a high school science program.

Repeat for Credit

N

Requisites
Corequisite: EDSEC 542 and EDSEC 543.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

EDSEC 620 - Principles and Philosophy of Career and Technical Education

Credits: 2-3

Principles of career and technical education in Kansas and other states and countries; principles and philosophy underlying such education, relation of career and technical education to school objectives and community, state, and national needs.

Repeat for Credit
N

Typically Offered
Fall, Summer

K-State 8
Historical Perspectives

EDSEC 621 - Program Planning in Career and Technical Education

Credits: 2-3

The program development and planning process; development of guides for teaching and evaluating reimbursable secondary programs.

Repeat for Credit
N

Requisites
Prerequisite: EDSEC 620.

Typically Offered
Fall, Spring, Summer

EDSP 224 - Exceptional Child in the Regular Classroom

Credits: 3

Designed for general education teachers in meeting the needs of exceptional children. Support strategies for teachers and exceptional children in the mainstream of education will be explored.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

EDSP 323 - Exceptional Students in the Secondary School

Credits: 2

Designed for regular classroom teachers in meeting the needs of exceptional adolescents. Support strategies for teachers and exceptional students in the mainstream of education.

Repeat for Credit
N

Requisites
Prerequisite: Admission to teacher education.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

EDSP 415 - American Sign Language - Beginning

Credits: 3

The manual alphabet and numbers in American Sign Language, and approximately 500-700 signs. Other topics will include the use of various sign language systems used in the United States, the history of sign language, deaf culture, and the discussion of education of deaf and hard of hearing students.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDSP 502 - Independent Study in Special Education

Credits: 1-3

Selected topics in professional education. Maximum of three hours applicable toward degree requirements.

Note
Consent of department chair.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

EDSP 509 - Introduction to Autism Spectrum Disorder

Credits: 3

Designed to prepare teacher candidates with the ability to recognize and build upon the strengths and needs of students with autism spectrum disorders (ASD). Employ various instructional strategies and locate appropriate educational materials for students with ASD.

Repeat for Credit
N

Typically Offered
Fall or Spring

EDSP 615 - American Sign Language - Intermediate

Credits: 3

This course is a continuation of the Beginning Sign Language course. Approximately 400 additional signs will be taught. There will be discussion of grammar and syntax of American Sign Language. There will be emphasis on conversational use of sign language. Other topics include the use of assistive technology and the use of sign language with various special populations.

Repeat for Credit
N

Requisites
Pre-Requisite: EDSP 415 or instructor permission

Typically Offered
On sufficient demand

EDSP 709 - Autism Spectrum Disorder

Credits: 3

Designed to prepare teacher candidates with the ability to recognize and build upon the strengths and needs of students with autism spectrum disorders (ASD). Employ various instructional strategies and locate appropriate educational materials for students with ASD.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDSP 711 - Characteristics of Exceptionalities

Credits: 3

Provide an overview of exceptionality as it pertains to students. The processes of IEP development and characteristics of both high and low incidence populations will be examined. Each area of exceptionality will be reviewed in terms of etiology, diagnosis, prevalence, remediation, and educational strategies.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

EDSP 742 - Intensive Interventions for Students with Emotional Disability

Credits: 3

Educational planning assessment, instructional methods, curricular modifications, media and materials, teacher

competencies, and model programs for students with emotional disability.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDSP 743 - Intensive Interventions for Students with Dyscalculia and Other Math Difficulties

Credits: 1-3

This course is designed to prepare educators to improve math achievement of students with or at-risk for significant math difficulties or disabilities such as dyscalculia.

Repeat for Credit
N

Requisites
EDSP 224 or EDSP 323

Typically Offered
Fall, Spring

EDSP 744 - Intensive Interventions for Students with Dyslexia and Other Reading Difficulties

Credits: 1-3

This course is designed to prepare educators to improve the reading achievement of students with or at-risk for significant reading difficulties or disabilities such as dyslexia.

Repeat for Credit
N

Typically Offered
Spring, Summer

EDSP 745 - The Consulting Process in Special Education

Credits: 3

A course to prepare special education teachers with skills for consulting effectively with classroom teachers, related services personnel, administrators, and parents about curriculum and program alternatives for exceptional children. Emphasis is upon developing collaborative consultation processes through communication, cooperation, and coordination techniques.

Repeat for Credit
N

Requisites
Prerequisite: (EDSP 323 or EDSP 224) and (EDSP 742 or EDSP 743)

Typically Offered
Summer

EDSP 775 - Readings in Special Education

Credits: 1-3

Readings in research and application in specialized areas in education.

Repeat for Credit
Y

Requisites
Prerequisite: HDFS 110.

Typically Offered
Fall, Spring, Summer

EDSP 777 - Social Emotional Learning and Behavior Management Strategies

Credits: 3

Theoretical and practical applications of behavior analysis in schools with emphasis on preventing and remediating behavior problems of students with disabilities.

Repeat for Credit
N

Typically Offered
Fall, Spring

EDSP 778 - Technology for Special Education

Credits: 3

Designed to help special educators develop an awareness of assistive technology (AT) and related legislative guidelines, which can assist in the lives and learning of students receiving special education. This course will explore assistive technology devices and services and software appropriate for students with special needs. Internet resource and AT evaluation systems related to special education will also be covered.

Repeat for Credit
N

Typically Offered
Fall

EDSP 785 - Practicum I

Credits: 1-3

Observation and participation in teaching individuals with exceptional educational needs under the supervision of selected teachers in special education.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 711, EDSP 742, and either EDSP 743 or EDSP 744. Instructor permission required.

Typically Offered
Fall, Spring

EDSP 786 - Topics in Education

Credits: 1-3

Examination of current topic in specialization of faculty. Varied topics offered each semester so course may be repeated.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 315.

Typically Offered
Fall, Spring, Summer

EDSP 787 - Field Experiences in Special Education

Credits: 1-3

Observation and supervised activities in schools, camps, clinics, or institutions related to student's area of special interest or preparation.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDSP 795 - Problems in Special Education

Credits: 1-18

Selected students are permitted to secure specialized training appropriate to the needs of the individual. The student's project may involve intensive library investigation in a special field or the collection and analysis of data pertinent to a given problem. All work is done independently under the direction of a faculty member. As many conferences are held as necessary to assure successful completion of a project necessary for the problem undertaken and consent of instructor.

Note
Background of courses necessary for the problem undertaken and consent of instructor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDSP 800 - Practicum II

Credits: 3

Observation and participation in teaching individuals with exceptional educational needs under the supervision of selected teachers in special education.

Repeat for Credit
N

Requisites
Prerequisite: EDSP 785

Typically Offered
Fall, Spring

EDSP 830 - Assessment in Special Education

Credits: 3

A study of assessment procedures used in the pre-referral, identification, and instructional phases of program planning for students with special needs.

Repeat for Credit
Y

Typically Offered
Fall

EDSP 833 - Administration of Special Education Programs

Credits: 2-3

The study of administrative units for special education, placement procedures, federal and state legislation, and program reimbursement and funding.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDSP 835 - The IEP Process in Special Education

Credits: 1-3

EDSP 835 is a comprehensive course that focuses on the development and implementation of Individual Education programs (IEPs) in the context of special education. Throughout the course, students will gain a deep understanding of the legal framework surrounding Free Appropriate Public Education (FAPE) and the significance of creating educationally meaningful and legally sound IEPs. They will learn the fundamental components of an IEP and practice writing each section to meet the individual needs of students. Additionally, students will develop skills in assessing and analyzing IEPs, including the use of screening tools and assistive technology assessment. The course also covers transition programming in IEPs and provides opportunities for students to engage in comprehensive case studies. By the end of the course, students will have the knowledge and skills to create comprehensive and effective IEPs that support students with special needs.

Repeat for Credit
N

Requisites
EDSP 830

Typically Offered
Spring

EDSP 841 - Interventions: Low Incidence Special Education

Credits: 3

Curriculum content, methods, and organization of educational programs for children and youth with low incidence special education needs.

Repeat for Credit
Y

Typically Offered
Fall

EDSP 844 - Special Education in Secondary Schools

Credits: 2

Educational perspectives in service delivery options, educational planning, general instructional approaches, learning strategies, and adaptations and modifications of instructional materials and settings for the secondary student in special education.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 711, EDCI 315, and EDSP 743

Typically Offered
Summer

EDSP 845 - Special Education Programming: Parental Involvement

Credits: 2

An in-depth consideration of the role of home and parents in the educational programming for exceptional children. Emphasis on practical and positive strategies used in

working with parents.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 711

Typically Offered
Fall

EDSP 846 - Interventions: Early Childhood Special Education

Credits: 3

Strategies, policies, and procedures for the education of young children (0-5 years of age) with disabilities. Areas of emphasis include Individual Service Plans, interagency collaboration, and specific strategies for parents and young children.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 710.

Typically Offered
Spring

EDSP 848 - Transitions in Special Education

Credits: 3

A study of transition models, curricula, assessment, career development, community resources and agencies, and materials.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 711

Typically Offered
Summer

EDSP 849 - Interventions: Autism Spectrum Disorders

Credits: 3

Assessment, curriculum content, educational considerations, interventions, and organization of programs for children and youth with Autism Spectrum Disorders.

Repeat for Credit
Y

Typically Offered
Summer

EDSP 853 - College Students with Disabilities

Credits: 3

This course is designed to familiarize higher education personnel with the increasing number of students with disabilities who now attend our institutions of higher education. The course will examine the legal foundations for students with disabilities in higher education, provide a framework for understanding the unique needs of students with learning disabilities, attention deficit disorders, mental health issues, as well as those on the autism spectrum, and examine the role of higher education personnel in helping these individuals be successful thriving college students.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDSP 860 - Special Education Law

Credits: 3

Analysis of legislation, litigation, and administrative rulings related to special education. The course will emphasize the development of legally sound policies and procedures to ensure that schools provide an educationally meaningful and legally correct education for students with disabilities.

Repeat for Credit
N

Typically Offered
On Sufficient Demand

EDSP 885 - Practicum in Education of Individuals with Low Incidence Special Education Needs

Credits: 1-6

Observation and participation in teaching individuals with low incidence special educational needs under the supervision of selected teachers in Special Education programs.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 841.

Typically Offered
Spring

EDSP 886 - Seminar in Special Education

Credits: 1-18

Intensive discussion of research or problems of current professional interest based on study of pertinent original literature.

Repeat for Credit
Y

Typically Offered
On sufficient demand

EDSP 888 - Externship in Special Education

Credits: 1

The course provides a forum for self-directed development of competencies in Special Education. Students conduct self-assessment and develop strategies for ongoing professional development.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 885.

Typically Offered
Fall, Spring, Summer

EDSP 889 - Advanced Practicum: Autism Spectrum Disorders

Credits: 1-6

Observation and participation in teaching individuals with Autism Spectrum Disorders under the supervision of selected teachers in Special Education programs.

Repeat for Credit
Y

Requisites
Prerequisite: EDSP 849 and EDSP 885 (6 hours).

Typically Offered
On sufficient demand

EDSP 898 - Master's Report

Credits: 1-18

Master's Report

Note
Permission by department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDSP 899 - Master's Research

Credits: 1-18

Master's Research

Note
Permission by department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDSP 986 - Advanced Seminar in Special Education

Credits: 0-18

These seminars will critically consider recent research in the designated fields. The emphasis will be upon individual studies and small group interaction. Enrollment is restricted to those students who have been admitted to the doctoral program in education and who have completed substantial

amounts of graduate study in the designated fields.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
On sufficient demand

EDSP 991 - Internship in Special Education

Credits: 1-18

Studies of and field experiences in the development of programs in cooperating schools and educational or related agencies under the supervision of College of Education graduate faculty members. A maximum of 6 credit hours may be chosen from the areas listed.

Note
Consent of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

EDSP 999 - Research in Special Education

Credits: 1-18

Individual investigation in the field of a student's specialization.

Note
Sufficient training to carry on the line of research undertaken.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 080 - Developmental English

Credits: 3

Basics of standard edited (written) English with emphasis on grammar, usage, and sentence structure. This course does not fulfill requirements for the associate degree.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

Credits: 3

Addresses topics not confined to a single period in a national literature. May emphasize cross-national subjects, literary criticism, the development of a theme or genre over time, new perspectives from social, intellectual, or cultural studies, or non-traditional texts and topics.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ENGL 730 - Studies in a Literary Period

Credits: 3

The specific contents will vary by semester and instructor, but the studies courses will reflect concerns with literary and rhetorical forms and genres; with specific authors, periods, or literary movements; with perspectives from social, intellectual, and cultural studies; with literary themes; or with language or linguistics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

The courses require junior standing.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 740 - Studies in Literary Theory

Credits: 3

The specific contents will vary by semester and instructor, but the studies courses will reflect concerns with literary and rhetorical forms and genres; with specific authors, periods, or literary movements; with perspectives from social, intellectual, and cultural studies; with literary themes; or with language or linguistics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

The courses require junior standing.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 745 - Cultural Studies

Credits: 3

A topic course in Cultural Studies that applies a theoretical approach or approaches.

Repeat for Credit
Y

Typically Offered
Fall

ENGL 753 - Theories of Composition and Rhetoric

Credits: 3

An introduction to major theories of composition and/or rhetoric.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

ENGL 755 - Studies in Composition and Rhetoric

Credits: 3

The specific contents will vary by semester and instructor, but the studies courses will reflect concerns with literary and rhetorical forms and genres; with specific authors, periods, or literary movements; with perspectives from social, intellectual, and cultural studies; with literary themes; or with language or linguistics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

The courses require junior standing.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 756 - Business Communication

Credits: 3

A writing-intensive course intended for advanced undergraduate students, graduate students, and working professionals in business.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200 or ENGL 210 or ENGL 415 or ENGL 417 or ENGL 516 or graduate standing.

Typically Offered
Fall, Spring, Summer

ENGL 757 - Studies in Language and Linguistics

Credits: 3

The specific contents will vary by semester and instructor, but the studies courses will reflect concerns with literary and rhetorical forms and genres; with specific authors, periods, or literary movements; with perspectives from social, intellectual, and cultural studies; with literary themes; or with language or linguistics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

The courses require junior standing.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 758 - Scientific Communication

Credits: 3

A writing-intensive course intended for advanced undergraduate students, graduate students, and working professionals in science.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200 or ENGL 210 or ENGL 415 or ENGL 417 or ENGL 516 or graduate standing.

Typically Offered
Fall, Spring, Summer

ENGL 759 - Studies in Technical Communication

Credits: 3

The specific contents will vary by semester and instructor, but the studies courses will reflect concerns with literary and rhetorical forms and genres; with specific authors, periods, or literary movements; with perspectives from social, intellectual, and cultural studies; with literary themes; or with language or linguistics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

The courses require junior standing.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 761 - Creative Writing Workshop: Short Fiction

Credits: 3

Advanced writing of short prose fiction.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 661 or instructor permission.

Typically Offered
Fall, Spring, Summer

ENGL 762 - Advanced Playwriting

Credits: 3

Further study in the writing of drama; emphasis on problems of writing the full-length play.

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 662.

Typically Offered
Fall, Spring, Summer

ENGL 763 - Creative Writing Workshop: Poetry

Credits: 3

Advanced writing of poetry.

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 663 or instructor permission.

Typically Offered
Fall, Spring, Summer

ENGL 765 - Creative Writing Workshop: Creative Nonfiction

Credits: 3

Advanced writing of creative nonfiction.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 665 or instructor permission.

Typically Offered
Fall, Spring, Summer

ENGL 767 - Literary Editing and Publishing

Credits: 3

Practice in editing, producing, and marketing of literary manuscripts, including manuscript selection, developmental editing, copyediting, marketing, and publicity in a real-world setting.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

ENGL 769 - Creative Writing Workshop/Special Topic

Credits: 3

Special topics vary.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 771 - Creative Writing Workshop: Novel/Novella

Credits: 3

Creative Writing Workshop: Novel/Novella

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 661 or instructor permission.

Typically Offered
Fall, Spring, Summer

ENGL 772 - Creative Writing Workshop: The YA Novel

Credits: 3

Advanced novel writing focused on young adult readers. Students will read young adult (YA) novels and analyze their structure and form. Students will workshop sections of their own young adult novel.

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 661 or instructor permission

Typically Offered
Fall, Spring, Summer

ENGL 790 - History of the English Language

Credits: 3

The development of British and American English from Indo-European origins to the present.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing or instructor permission.

Typically Offered
Fall, Spring, Summer

ENGL 795 - Literary Theory

Credits: 3

A historical survey of literary theory and criticism.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Other

ENGL 797 - Professional Writing Internship

Credits: 0-18

Faculty-supervised professional experience, emphasizing application of writing skills in professional contexts. Student projects must be approved by on-site supervisor and faculty supervisor. Report must be submitted at the end of the semester.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 510 or ENGL 665 or ENGL 759 or ENGL 765.

Typically Offered
Fall, Spring, Summer

ENGL 799 - Problems in English

Credits: 1-18

Independent study in major authors, genres, and periods of English and American literature and language.

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for problem undertaken.

Typically Offered
Fall, Spring, Summer

ENGL 801 - Graduate Studies in English

Credits: 3

A survey of the methods and aims of advanced level research and scholarship in language and literature. Taken

in the first year of study toward the M. A. in English as an orientation to the profession.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENGL 805 - Practicum in Teaching University Expository Writing

Credits: 1

Required of GTAs teaching Expository Writing in the English Department. Instruction in the theory and practice of teaching in a university expository writing program. Cannot count in the student's program of study.

Repeat for Credit
Y

Requisites
Prerequisite: graduate status and a GTAship in the English Department.

Typically Offered
Fall, Spring

ENGL 820 - Seminar in Language

Credits: 3

Intensive research concerned with one or more topics in the structure and history of the English language.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

ENGL 825 - Seminar in Literature

Credits: 3

Intensive research concerned with one or more literary genres, periods, authors, or issues/problems.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

ENGL 830 - Seminar in Cultural Studies

Credits: 3

Intensive research concerned with one or more topics central to the theory and practice of Cultural Studies.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Other

ENGL 840 - Seminar in Composition and Rhetoric

Credits: 3

Intensive research on materials germane to the history, structure, and processes central to the concerns of Composition and Rhetoric.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

ENGL 862 - Workshop in Playwriting

Credits: 3

Advanced writing of drama.

Repeat for Credit
Y

Requisites
Prerequisite: ENGL 762 or THTRE 762 or proof of

equivalency. Proficiency.

Typically Offered
Other

Cross-listed
THTRE 862

ENGL 899 - Research in English

Credits: 1-18

Research in English

Note
Permission, Director of Graduate Studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENSCI 101 - Introduction Environmental Sciences

Credits: 1

Explores environmental science and environmental issues at global and local scales, points out the diverse, interdisciplinary backgrounds and skills needed to solve environmental issues, and reinforces key concepts through field visits.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives

ENSCI 410 - Environmental Sciences Internship

Credits: 3

Students will gain experience in the work force, improve communication and interpersonal relation skills, build professional network, and apply classroom knowledge to solve problems in a professional setting. Students will learn what they may enjoy or dislike about potential careers and employers and share that information with their peers.

Repeat for Credit
N

Typically Offered
Summer

ENTOM 100 - Entomology Foundations

Credits: 1

Introduction to Entomology programs, activities, resources, faculty and career opportunities.

Note
1 hour lecture per week

Repeat for Credit
N

Typically Offered
Fall

ENTOM 101 - Insects and People

Credits: 3

Intended for undergraduate non-majors. The focus will be on the global impact of insects and their relatives on human concerns, from acting as disease vectors, agricultural pests, and pollinators to their roles in art, history, and religion.

Note
Two hours lecture and one one-hour interactive session a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

ENTOM 110 - Exploring Topics in Entomology

Credits: 1-3

Explore various topics in entomology, as an introduction to

the particular topic.

Note
This may be used with CAT communities or Introductory topics classes.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENTOM 125 - Introduction to Entomology

Credits: 3

An introduction to the foundational areas of Entomology, including classification, identification, insect biology, and applied Entomology.

Repeat for Credit
N

Typically Offered
On sufficient demand

ENTOM 130 - Insect Collecting Techniques and Collections

Credits: 3

An introduction to the techniques used to collect insects in different habitats and times of day, as well as the preparation of insect specimens and their maintanence in collections.

Repeat for Credit
N

Typically Offered
On sufficient demand

ENTOM 135 - Introduction to Animal Health Entomology

Credits: 3

An introduction to Animal Health Entomology, including the wide range of insects that vector diseases, the types of organisms that are spread by insects, the diseases those organisms cause, and management techniques for the insects.

Repeat for Credit
N

Typically Offered
On sufficient demand

ENTOM 150 - Introduction to Plant Health Entomology

Credits: 3

Introduction to the insects that influence plant health, including their identification, their influence, the mechanisms they use to benefit or harm plants, and their management or management abilities.

Repeat for Credit
N

Typically Offered
On sufficient demand

ENTOM 200 - Insect Sampling and Surveillance

Credits: 2

Introduction and hands-on experience with insect sampling and surveillance techniques.

Note
This will be taught twice a week for 2 hours per lab

Repeat for Credit
N

Typically Offered
Fall

ENTOM 202 - Art and Insects

Credits: 3

Science and art are not different ends of an academic continuum, but rather simultaneously found in all disciplines within academia. The goal of this course is to provide a framework and appreciation that students can utilize to consider all aspects of novel experiences and problems, as global problems require global thinking. The model system for this course will be insects, where students

will learn about evolution, genetics, behavior, and biodiversity, while also learning art history, interpretation, analysis of color and shape, perception, and the role of insect representations in the humanities. While there are specific lectures that cover Insects and Art separately, the majority of lectures combine both science and art.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
ART 202

K-State Core
6 Arts and Humanities

K-State 8
Natural and Physical Sciences
Aesthetic Interpretation

ENTOM 205 - Introduction to Insect Data Analysis

Credits: 1

Introduction and hands-on experience with basic experimental design and common data analysis techniques used in insect sampling, surveillance, and experiments.

Note
This will be taught once a week for 2 hours per lab

Repeat for Credit
N

Typically Offered
Fall

ENTOM 210 - Introduction to Insecticides

Credits: 1

Introduction to insecticides, including their properties, benefits, environmental impact, and laws that regulate their sale, use, and storage.

Note
This will be one hour of lecture per week

Repeat for Credit
N

Typically Offered
Spring

ENTOM 250 - Economic Entomology

Credits: 3

Classification, biology, ecology, and principles of management of economically important insects.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

ENTOM 305 - Animal Health Entomology

Credits: 2

Introduction to biology of arthropods that affect animal health. The main focus is on strategies to manage arthropods that negatively affect the health and productivity of animals, including beef and dairy cattle, swine, poultry, horses, sheep, goats, pets, and urban wildlife. This course is particularly recommended for students interested in animal science, pre-veterinary medicine, and other agricultural curricula.

Note
Two hours lecture/demo a week.

Repeat for Credit
N

Typically Offered
Fall

ENTOM 306 - Animal Health Entomology Laboratory

Credits: 1

This laboratory course complements ENTOM 305 and offers hands-on experience in identification and management of arthropods of veterinary importance. Includes field trips to food animal operations.

Note
One two-hour lab a week.

Repeat for Credit
N

Typically Offered
Fall

ENTOM 312 - General Entomology

Credits: 3

A basic study of insects and related arthropods, their structure, physiology, behavior, and relations to plants and animals, including man.

Note
Two hours lecture and two hours of lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

ENTOM 320 - Horticultural Entomology

Credits: 3

Biological principles and management considerations for insects and related arthropods affecting horticulture. Practical application of classification and life history information for accurate recognition, monitoring, and pest management decisions. Control tactics and conservation of beneficial species.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

ENTOM 325 - Pollinators

Credits: 3

Examines the diversity of animal pollinators, their ecology, current threats to pollinators, and their conservation.

Repeat for Credit
N

Typically Offered
Spring

ENTOM 330 - Basic Beekeeping

Credits: 3

The basics of Beekeeping, including all components of hive development and maintenance, pre- and post-harvest, and business operations are covered.

Repeat for Credit
N

Typically Offered
Fall or Spring

ENTOM 350 - Crops, Insects, and Agroecosystems

Credits: 3

Insects play an important role in crop production and impact many agroecosystems that produce our food. This course will utilize inquiry-based learning to explore the impact of insects on crops and agroecosystems, focusing model crops such as corn.

Note
This course has 2 hours of lecture per week, plus a 2 hour lab once a week.

Repeat for Credit
N

Typically Offered
Spring

ENTOM 399 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 480 - Seminar in Entomology

Credits: 1

Explore current research, teaching, and extension ideas and projects in Entomology through the Departmental seminar series.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENTOM 481 - Entomological Problems

Credits: 1-3

Study or work in a specific area of entomology that is specialized around student interests or career goals.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 482 - Research Experience in Entomology

Credits: 1-3

A research experience associated with Entomology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 483 - Teaching Experience in Entomology

Credits: 1-3

Teaching experience in an Entomology classroom or online environment.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 484 - Extension Experience in Entomology

Credits: 1-3

Extension experience in an area associated with Entomology

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 485 - Entomological Topics

Credits: 1-3

Study of a select topic within Entomology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 486 - Internship in Entomology

Credits: 1-3

An internship experience in an area associated with entomology at an organization outside of the Department of Entomology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 595 - Capstone Experience

Credits: 3

A research, extension, teaching, or industry-based experience that builds upon an individual student's academic training in preparation for a successful career. A final report is to be submitted at the end of the semester along with a presentation over the capstone experience.

Note
There will be a symposium at the end of the semester for students to present their experience.

Repeat for Credit
N

Requisites
Junior Standing.

Typically Offered
Fall, Spring, Summer

ENTOM 605 - Introduction to Insects of Stored Products

Credits: 3

Biology, ecology, and behavior of stored-product insects and current practices involved in their control.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, or ENTOM 301, or ENTOM 305, or ENTOM 312.

Typically Offered
Spring-Even Years

ENTOM 612 - Insect Pest Diagnosis

Credits: 2

Diagnosis of plant damage by insects and mites, recognition of harmful insects and mites and beneficial insects. Emphasis on field crop pests but pests of other crops will be considered if there is sufficient interest.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: ENTOM 300, ENTOM 312 or ENTOM 710.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

ENTOM 620 - Pesticides, People, and the Environment

Credits: 2

Introduction to insecticides and related pesticides, including their classification, formulation, properties, mode of action, metabolism, resistance, benefits and environmental impact, and federal and state laws that regulate their development, sale, use and storage.

Note
Two hours of lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHM 110.

Typically Offered
Spring-Even Years

ENTOM 621 - Introduction to Biological Control

Credits: 3

The theory and practice of biological control with an emphasis on natural enemies of insect pests. Relationship and importance of insect ecology and integrated pest management to biological control. Experimental approaches, evaluation, recognition and life histories of beneficial species will be covered.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, or ENTOM 301, or ENTOM 305, or ENTOM 312.

Typically Offered
Spring-Odd Years

ENTOM 625 - Integrative Behavioral Ecology

Credits: 3

This course is designed to provide an overview of the genetics, ecology, and evolution of insect behavior, emphasizing research done in insect systems. The topics covered in this course will include: (1) Conceptual and empirical framework for studying behavior, (2) the genetics of behavior, (3) "kinds" of behaviors, and (4) detailed examples of each "kind" of behavior.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 450.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

ENTOM 630 - Introduction to Molecular Entomology

Credits: 2

Introduction to use of molecular techniques to address fundamental and applies entomological problems, including systematics, marker-assisted selection of resistant genotypes of plants, mechanisms of insecticide resistance, insect transgenesis, risk assessment of genetically modified organisms, and other topics.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110.

Typically Offered
Fall-Even Years

ENTOM 635 - Insect Evolution

Credits: 3

This course covers the evolution and biodiversity of insects. Topics covered include insects in the fossil record, insect phylogenies, the traits responsible for insect diversity, and the evolution of traits like wings, color, mimicry, learning, behavior, farming, parasitic lifestyles and social living.

Repeat for Credit
N

Typically Offered
Fall-Even Years

K-State 8
Natural and Physical Sciences

ENTOM 645 - Introduction to Insect Chemical Ecology

Credits: 3

The overall objective of this course is to familiarize the student with the interactions among organisms, including insects and other arthropods, which are mediated by naturally produced chemicals.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, or ENTOM 301, Or ENTOM 305, or ENTOM 312.

Typically Offered
Spring-Odd Years

ENTOM 649 - Introduction to Arthropod Vectors of Human Pathogens

Credits: 3

This course focus will be vectors of medical and veterinary importance. Students will learn several underlying aspects involved in pathogen-vector-vertebrate host interactions,

including those associated with cellular, molecular and innate immune response of insects to pathogens they transmit. Students will be introduced to current research programs and topics of interest in the field of medical entomology.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, or ENTOM 301, or ENTOM 305, or ENTOM 312.

Typically Offered
Fall

ENTOM 652 - Introduction to Insect Molecular Techniques

Credits: 2

A hands-on introduction to basic molecular biology techniques used in understanding insect biology and physiology, including nucleic acid isolation, polymerase chain reaction, RNA interference, and analysis of experimental results.

Note
This will be taught twice a week for 2 hours/lab

Repeat for Credit
N

Typically Offered
Fall

ENTOM 657 - Introduction to Toxicology of Insecticides

Credits: 3

Study of synthetic and naturally occurring insecticides with emphasis on distribution and elimination, metabolism, mechanism of action, resistance mechanisms, and current advances in new insecticide discovery and new approaches to insect control. The lab focuses on providing hands-on experience with techniques frequently used by toxicologists.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHM 350, or BIOCH 521, or ENTOM 620.

Typically Offered
Spring-Odd Years

ENTOM 660 - Introduction to Insect Genetics

Credits: 3

The course will initially describe the variety of genetic systems found in insects. Laboratory and statistical techniques will be discussed for studying genetic variation in insect populations. The final part of the course will focus on means for genetic manipulation of populations. The laboratory session will be used to discuss and/or demonstrate techniques for studying insect genetics.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, or ENTOM 301, or ENTOM 305, or ENTOM 312.

Typically Offered
Spring-Odd Years

ENTOM 675 - Introduction to Insect Physiology

Credits: 3

Functions of insect systems for development, metamorphosis, and reproduction. Physiological and biochemical mechanisms underlying insect activities, behavior, and ecological adaptations.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300, ENTOM 305, or ENTOM 312.

Typically Offered
Spring-Even Years

ENTOM 692 - Insect Ecology

Credits: 3

Abiotic and biotic factors underlying the distribution, abundance, and dynamics of insects. How to measure these

factors, how they affect insect population processes, interactions, and community structure, especially in agricultural systems. Emphasis on basic concepts and their application, experimental methods and field techniques.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 263, BIOL 529, or ENTOM 312.

Typically Offered
Fall-Even Years

ENTOM 695 - Insect Taxonomy

Credits: 3

Laboratory study of insect Order and family-group identification. Proper preparation and maintenance of adult insect collections. Lecture stresses the principles of systematics, legal principles of nomenclature, and the phylogeny of insects and their near relatives. For beginning graduate and advanced undergraduate students.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ENTOM 250 or ENTOM 312.

Typically Offered
Fall-Odd Years

ENTOM 795 - Entomology Seminar

Credits: 1

Entomology Seminar

Note
Consult seminar committee.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 799 - Problems in Entomology

Credits: 1-18

For nonthesis or nondissertation studies. Work in various fields of entomology.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 800 - Professional Development in Entomology and Related Sciences

Credits: 2

This course will teach students to develop and effectively communicate scientific research and results, including skills in: critical reading of primary literature, developing meaningful hypotheses, outlining a thesis/dissertation literature review, constructing and writing a well-designed scientific proposal, presenting data, communicating effectively to professional and lay audiences, acquiring meaningful peer-review experience, and learning the basics for writing publishable journal articles.

Repeat for Credit
N

Typically Offered
Fall

ENTOM 805 - Insects of Stored Products

Credits: 3

Biology, ecology, and behavior of stored-product insects and current practices involved in their control.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 250, or ENTOM 312 and ENTOM 313, or consent of instructor.

Typically Offered
Spring-Even Years

ENTOM 810 - Insect Pest Management

Credits: 3

The theory and practice of Integrated Pest Management (IPM) with an emphasis on pests in agricultural systems. Integrated concepts include but are not limited to economic thresholds, sampling plans, plant resistance to insects, biological control, pesticides and resistance management. Case studies from several row-crop systems are used to explore key concepts.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 250 or ENTOM 312 or consent of the instructor.

Typically Offered
Spring-Even Years

ENTOM 815 - Experience in Extension Entomology

Credits: 1-3

Major emphasis is to give students a realistic view of the history, structure, philosophy, and position responsibilities assumed by entomology state and area specialists within the Cooperative Extension Service through hands-on experience.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: ENTOM 612 or ENTOM 767.

Typically Offered
Spring-Even Years

ENTOM 821 - Biological Control

Credits: 3

The theory and practice of biological control with an emphasis on natural enemies of insect pests. Relationship and importance of insect ecology and integrated pest management to biological control. Experimental approaches, evaluation, recognition and life histories of beneficial species will be covered.

Note
Two hours of lecture and two hours of lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ENTOM 250 or ENTOM 312 or ENTOM 320 or a college-level ecology course.

Typically Offered
Spring-Odd Years

ENTOM 825 - Advanced Integrative Behavioral Ecology

Credits: 3

This course is designed to provide an advanced overview of the genetics, ecology, and evolution of insect behavior, emphasizing research done in insect systems. The topics covered in this course will include: (1) Conceptual and empirical framework for studying behavior, (2) the genetics of behavior, (3) "kinds" of behaviors, and (4) detailed examples of each "kind" of behavior.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 450.

Typically Offered
Spring

ENTOM 830 - Molecular Entomology

Credits: 2

Introduction to use of molecular techniques to address fundamental and applies entomological problems, including systematics, marker-assisted selection of resistant genotypes of plants, mechanisms of insecticide resistance, insect transgenesis, risk assessment of genetically modified

organisms, and other topics.

Note
One 2-hour lecture/discussion per week.

Repeat for Credit
N

Typically Offered
Fall-Even Years

ENTOM 835 - Advanced Insect Evolution

Credits: 3

This course covers the evolution and biodiversity of insects. Topics covered include insects in the fossil record, insect phylogenies, the traits responsible for insect diversity, and the evolution of traits like wings, color, mimicry, learning, behavior, farming, parasitic lifestyles and social living.

Repeat for Credit
N

Typically Offered
Fall-Even Years

ENTOM 840 - Immature Insects

Credits: 2

Identification of immature insects to the family level, with emphasis on terrestrial Holometabola and aquatic insects. Techniques for collecting and preserving immatures, with an emphasis on field collecting and identification in laboratory.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 695.

Typically Offered
Summer-Odd Years

ENTOM 845 - Insect Chemical Ecology

Credits: 3

The overall objective of this course is to familiarize the student with the interactions among organisms, including insects and other arthropods, which are mediated by naturally produced chemicals.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHEM 350 General Organic Chemistry or its equivalent, or the consent of the instructor.

Typically Offered
Other

ENTOM 849 - Arthropod Vectors of Human Pathogens

Credits: 3

Focus will be vectors of medical/veterinary importance and pathogen-vector-vertebrate host interactions, including those associated with cellular, molecular and innate immune response of insects to pathogens they transmit. Students will be introduced to current research programs and topics of interest in the field of medical entomology.

Note
Two hours of lecture a week, plus 2 hours of lab.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 198, ENTOM 312, and BIOL 398.

Typically Offered
Fall

ENTOM 852 - Insect Molecular Techniques

Credits: 2

Hands-on experience with basic molecular biology techniques used in understanding insect biology and physiology, including nucleic acid isolation, polymerase chain reaction, RNA interference, and analysis of experimental results. Students will conduct an individual research project and presentation.

Repeat for Credit
N

Typically Offered
Fall

ENTOM 857 - Toxicology of Insecticides

Credits: 3

Advanced study of synthetic and naturally occurring insecticides with emphasis on distribution and elimination, metabolism, mechanism of action, resistance mechanisms, and current advances in new insecticide discovery and new approaches to insect control. The lab focuses on providing hands-on experience with techniques frequently used by toxicologists.

Note
Two hours of lecture and one 3 hour lab each week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHM 350, or BIOCH 521, or ENTOM 620.

Typically Offered
Spring-Odd Years

ENTOM 860 - Insect Genetics

Credits: 3

The course will initially describe the variety of genetic systems found in insects. Laboratory and statistical techniques will be discussed for studying genetic variation in insect populations. The final part of the course will focus on means for genetic manipulation of populations. The laboratory session will be used to discuss and/or demonstrate techniques for studying insect genetics.

Note
2 hours lecture and one 3-hour lab each week.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

ENTOM 875 - Insect Physiology

Credits: 3

Functions of insect systems for development, metamorphosis, and reproduction. Physiological and biochemical mechanisms underlying insect activities, behavior, and ecological adaptations.

Note
Three 50 minute lectures per week.

Repeat for Credit
N

Typically Offered
Spring-Even Years

ENTOM 892 - Advanced Insect Ecology

Credits: 3

This course addresses population and community ecology, plant-insect interactions, insect biodiversity and biogeography, and applied ecology. The course will weave basic ecological theory and principles with their application to entomological problems such as conservation, biological control, agriculture, and insect-vectored diseases of plants and humans.

Note
Three hours lecture/discussion per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOL 529 or ENTOM 692 or a college-level ecology course.

Typically Offered
Fall-Odd Years

ENTOM 895 - Advanced Insect Taxonomy

Credits: 3

Advanced laboratory study of insect Order and Family-group identification. Proper preparation and maintenance of adult insect collections. Lecture stresses the principles of systematics, legal principles of nomenclature, and the phylogeny of insects and their near relatives.

Repeat for Credit
N

Typically Offered
Fall

ENTOM 898 - Master's Report in Entomology

Credits: 1-18

Work in various fields of entomology.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 899 - Master's Research in Entomology

Credits: 1-18

For student majoring in entomology.

Note
Knowledge in special area and consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTOM 930 - Topics in Entomology

Credits: 1-9

Selected topics for advanced study in entomology.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENTOM 932 - Teaching Experience in Entomology

Credits: 1-3

Teaching experiences for graduate students, including classroom instruction, development of curriculum materials, and other pedagogical methods.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENTOM 995 - Entomology Seminar

Credits: 1

Entomology Seminar

Note
Consult seminar committee. Pass/fail grade only.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENTOM 999 - Research in Entomology

Credits: 1-18

Dissertation credit for students majoring in entomology.

Note
Knowledge in special area and consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENTRP 340 - Business Innovation and the Entrepreneurial Mindset

Credits: 3

An examination of business innovation and provides students with an understanding of how creativity and the entrepreneurial mindset impact the success of

organizations.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ENTRP 350 - Technology and Innovation Management

Credits: 3

This course presents the main issues in the management of innovation and an appreciation of the relevant skills needed to manage innovation at both strategic and operational levels. The course focuses on four themes: (1) the source, discovery, and evaluation of innovation and opportunities; (2) the provisions of innovation (products and services) that satisfy the needs of customers; (3) the development of mechanisms to appropriate the returns from the exploitation of the innovation; and (4) the organization of efforts to innovate.

Repeat for Credit
N

Requisites
Prerequisite: ENTRP 340 or junior standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

ENTRP 411 - Intrapreneurship

Credits: 3

The role of the organizational member is examined as to how ideas and innovations are created, nurtured, assessed, and implemented within existing organizations. Challenges to be studied include how entrepreneurial insight can be channeled toward product creation, how product championing can lead to legitimization within the organization, and how product and organizational strategies can be implemented, assessed and renewed.

Repeat for Credit
N

Typically Offered
Spring

ENTRP 435 - Entrepreneurial Experience

Credits: 3

Explores the creative and innovative careers of successful entrepreneurs. Students will learn what it takes to be a successful entrepreneur from a multitude of business owners; learning from their extensive professional backgrounds and personal experiences. Will promote a deeper understanding of common entrepreneurial pitfalls and explores the skills and tools necessary to start and grow a successful business.

Repeat for Credit
N

Typically Offered
Fall

ENTRP 440 - Entrepreneurship

Credits: 3

The role of the entrepreneur is examined in the conception, start-up, organization, and development of new independent businesses. New venture problems to be studied include identification of possible new products and services, evaluation of practical commercial potential, and development of a business plan, with attention to financing, operating, and marketing.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450, MANGT 220, MKTG 250

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ENTRP 466 - Digital Business

Credits: 3

An in-depth study of how social media, mobile

technologies and digital business tools have enabled new businesses development and existing business transformation. Five major, interrelated components: social computing, social media, content sharing, filtering, and Web applications will be explored within the context of business application and development.

Repeat for Credit
N

Typically Offered
Spring

ENTRP 497 - Topics in Entrepreneurship

Credits: 1-3

Discussion and analysis of current issues in entrepreneurship, including topics related to new theory and the practice of entrepreneurship.

Repeat for Credit
Y

Typically Offered
On sufficient demand

ENTRP 520 - Social Entrepreneurship

Credits: 3

Social entrepreneurship is one of the fastest growing disciplines to emerge in management and is increasingly getting recognition as an important policy strategy at the national level. It is concerned with how to engage the talents and tools of professional entrepreneurship to address critical social needs both within and beyond the market. Social entrepreneurship is situated within a framework of social institutions, organizations, and entrepreneurial change in response to human and citizen rights and needs. The relevant social institutions include government, the market, education, philanthropy, and the family. Organizations may be for profit or non-profit, but all organizations, regardless of their legal structure, are seen to have a social purpose. Several non-market venues for sustainable social change will be examined in addition to the traditional delivery of goods and services through the market. The course provides a number of crucial tools and resources that may better orient and equip the prospective social entrepreneur to identify and act on opportunities.

Repeat for Credit
N

Requisites
Prerequisite: ENTRP 340 or Junior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

ENTRP 540 - Entrepreneurial Consulting

Credits: 3

This course is designed to provide students and faculty in the Entrepreneurship program the opportunity to give business assistance to small firms in the University community.

Repeat for Credit
N

Requisites
Prerequisite: ENTRP 340 or Junior standing.

Typically Offered
Fall

ENTRP 575 - Entrepreneurship and Innovation Capstone

Credits: 3

Builds on previous coursework and other learning experiences to culminate in a final project that adds value to the learning experience.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing, Admitted to Entrepreneurship Major or Entrepreneurship Minor, Permission from the Entrepreneurship Center Director required.

Typically Offered
Fall, Spring, Summer

ENTRP 825 - Strategic Innovation

Credits: 3

Today's top companies succeed by making innovation a fundamental part of their strategy. As the pace of change continues to increase and the threat of disruption becomes the new normal, company leaders need to have a focused and effective approach to innovation. Students will be introduced to some of the core tools and strategies companies use to harness the innovative abilities, talents, and passion of their employees.

Repeat for Credit
N

Typically Offered
Fall

ENVD 189 - Introduction to University Honors Program

Credits: 1

Directions and goals for the honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring

ENVD 195 - CAT Community Connections

Credits: 0

Interdisciplinary course that explores the connections among two different fields, courses, or disciplines.

Repeat for Credit
N

Typically Offered
Fall

ENVD 200 - Student Success Seminar

Credits: 1

Provides students with strategies for creating success in college and life. Topics to be covered include accepting personal responsibility, motivation, academic self-management, self-awareness, and life balance.

Repeat for Credit
N

Typically Offered
Fall, Spring

ENVD 201 - Environmental Design Studio I

Credits: 4

Foundation studies introducing principles, processes, and vocabularies of environmental design. Instruction in two and three dimensional visualization of objects and spaces. Instruction in the use of instrument-aided drawing, freehand drawing, and model building to represent and communicate design ideas at different scales of observation.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the College of Architecture and Design or permission of the dean.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

ENVD 202 - Environmental Design Studio II

Credits: 4

Foundation studies introducing principles, processes, and vocabularies of environmental design. Instruction in two and three dimensional visualization of objects and spaces. Instruction in the use of instrument-aided drawing, freehand drawing, and model building to represent and communicate design ideas at different scales of observation.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the College of Architecture and Design or permission of the dean.

Typically Offered
Spring

K-State 8

Aesthetic Interpretation
Empirical and Quantitative Reasoning

ENVD 203 - Survey of the Design, Planning and Community Development Professions

Credits: 1

Overview of the environmental design professions. Comparative study of the working methods, and societal and occupational roles of the architect, interior architect, industrial designer, landscape architect, planner, and community developer.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

ENVD 204 - Studio Seminar

Credits: 1

Seminar for students enrolled in ENVD 201. Topics related to studio and student success will be covered.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment in ENVD 201.

Typically Offered
Fall

ENVD 210 - Indian Art, Architecture and Culture

Credits: 3

This course is designed to assist students in understanding India and its cultural, artistic, and architectural heritage so that students can develop a deeper understanding and appreciation for Indian culture, people and their way of life.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ENVD 240 - Design Drawing

Credits: 2

This course offers an introduction to and sustained freehand drawing practice in fundamental drawing systems, methods and media for the environmental design professions.

Repeat for Credit
N

Typically Offered
Fall, Spring

ENVD 250 - History of the Designed Environment I

Credits: 3

An introduction to key ideas, practices, and works that have shaped global histories of the built environment through the mid-18th century.

Note
Three hours lecture per week.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ENVD 251 - History of the Designed Environment II

Credits: 3

An introduction to key ideas, practices, and works that have

shaped global histories of the built environment from the mid-18th century to the present.

Repeat for Credit
N

Requisites
Prerequisite: ENVD 250 or permission of instructor.

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

ENVD 299 - Problems in Basic Design

Credits: 1-18

A study of specified problems in elementary environmental design under the guidance of a member of the staff.

Note
Approval of associate dean.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENVD 400 - Undergraduate Research

Credits: 0-3

Mentored undergraduate research in architecture, interior architecture and product design, landscape architecture or planning.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENVD 430 - K-State APDesign: APDPro

Credits: 0

This course indicates and tracks which College of Architecture, Planning & Design students complete the APD*Pro* requirements for each year.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENVD 650 - Italian Art, History and Culture

Credits: 3

The course provides a synthesis of art, history, design and culture in the context of the Italian Peninsula and the Mediterranean region over time. Integration of material covered in lectures with field trips in Italy is expected.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

ENVD 654 - Education Abroad Orientation

Credits: .5-1

Preparation for participation in study abroad with a focus on specific information pertaining to the design professions and the analysis of the built and natural environment.

Repeat for Credit
N

Typically Offered
Fall

ENVD 655 - International Field Study

Credits: 3

Group observation of design precedents (ancient to present day) of a selected region, conducted *in situ*, to study significant aspects of environment, culture, and technology as expressed in vernacular and designed environments.

Repeat for Credit

N

Typically Offered
Fall, Spring, Summer

ENVD 699 - Problems in Environmental Design

Credits: 0-18

A study of specific environmental design problems under the direction of a member(s) of the departmental staff.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing; approval of Associate Dean.

Typically Offered
Fall, Spring, Summer

ENVD 899 - Problems in Environmental Design & Planning

Credits: 1-4

This course is intended to provide students an opportunity to focus on specific problems in environmental design and planning under the guidance of a member of the college's graduate faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ENVD 900 - Conceptual Approaches to Design and Planning

Credits: 3

Overview of contributions and limitations of various theoretical perspectives that inform the field of design and planning inquiry. Knowledge and theory construction. Nature, scope, and merits of scientific approach. Criticism of the scientific approach and examination of alternative approaches utilized in design and planning research and practice. Linking philosophy, research, and action/practice/application.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENVD 901 - Research Methods in Design and Planning

Credits: 3

Survey of research methods in the fields of design and planning, including overall systems of inquiry, criteria for assessing quality, strategies and tactics. Strengths and weaknesses of various research designs. Methods covered include experimental and quasi-experimental research, correlational research, qualitative research strategies, simulation and modeling research, action research and design intervention, case study, and combined strategies.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENVD 999 - Dissertation Research

Credits: 0-18

For students who have completed all credit hour, full-time enrollment, preliminary examination, and residency requirements for the doctoral degree, and are writing and defending their dissertations.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ENVE 101 - Introduction to Environmental Engineering

Credits: 1

Introduction to discipline, department, university, and profession. Exploration of career options. Gain skills through application-oriented problem solving.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
BAE 101

ENVE 331 - Professional Practice for Environmental Engineering Design

Credits: 1

A preparatory course for ENVE Senior Design class. Topics will include professionalism, project management, intellectual property, organizational behavior and ethics. Students will explore potential design project ideas, build design teams, and chose a project to complete for senior design in the following semester.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
BAE 331

ENVE 363 - Environmental Engineering Fundamentals

Credits: 3

Basic physical, chemical, and biological concepts and the applications to the protection of the environment with emphasis on techniques used in water and wastewater treatment.

Note
Two hours rec. and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230 and MATH 222.

Typically Offered
Fall, Spring

Cross-listed
CE 563

ENVE 536 - Environmental Engineering Senior Design

Credits: 3

Team-oriented capstone design laboratory with projects selected to address the design of equipment or systems to solve environmental engineering problems.

Repeat for Credit
N

Requisites
Prerequisite: ENVE 331

Typically Offered
Fall

ETA 020 - Engineering Technology Seminar

Credits: 0

An introduction to university life and the skills necesary for personal and professional success after college. Activities include discussions, hands-on projects and opportunities to meet and learn from professionals. Topics explore the responsibilities of a college student and the benefits of a university education.

Note
Approximately 16 contact hours during the semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ETA 292 - Problems in Engineering Technology

Credits: 1-18

Independent study in specific topics in engineering technology.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

ETB 102 - Electronics Seminar

Credits: 3

An introductory seminar for students needing to further their education in the electronics area designed to provide basic hardware, software, and analytical skills necessary to be successful in their future course work related to electronics. Students will also be exposed to technology trends and standards of the electronic industry.

Note
2 hours lecture and 2 hours lab per week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ETB 292 - Advanced Problems in Engineering Technology

Credits: 0-18

Advanced Problems in Engineering Technology

Repeat for Credit
N

Typically Offered
Other

ETB 310 - Applied Data Analysis and Tools

Credits: 3

An introduction to numerical computing, data analysis, and visualization with emphasis on the use of software tools and programming to model, analyze, and solve a variety of science and engineering problems.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 205 or MATH 220

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ETB 352 - Microcontroller applications in Unmanned Systems

Credits: 3

This course examines the hardware and software necessary to control Unmanned Systems. The students will learn how to interface microcontrollers to various sensors, actuators and communication devices. They will also learn the programming associated with these devices.

Repeat for Credit
N

Requisites
Prerequisite: ECET 101 and ECET 250

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ETB 420 - Unmanned Communication Circuits

Credits: 3

Communication electronics with applications in unmanned systems. Students will be exposed to mixed signal design circuits; RF circuits; and software defined radio (SDR) concepts that are key to the design modern radio systems.

Note
Two hours lecture and two lab hours.

Repeat for Credit
N

Requisites
Prerequisite: ECET 201 and ECET 250.

Typically Offered

Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

ETB 480 - UAS Senior Design I

Credits: 1

Application of UAS principles and design methodology to solving a significant design problem in a team context. Includes determining customer requirements, exploring and choosing design alternatives, scheduling, and project management. Significant milestones are the project's conceptual, preliminary, and critical design reviews, which require written and oral presentations.

Note
Two hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: Instructor consent.

Typically Offered
Fall

ETB 481 - UAS Senior Design II

Credits: 2

A continuation of ETB 480. Includes the implementation, testing, and delivery of the project initiated in ETB 480 UAS Senior Design I. Significant milestones are the project prototype, design report, and final presentation.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ETB 480.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

ETB 482 - Senior Design Project I

Credits: 1

Application of engineering principles and design methodology to solve a significant design problem in a team context. Includes determining customer requirements, exploring and choosing design alternatives, scheduling, and project management. Significant milestones are the project's conceptual, preliminary, and critical design reviews, which require written and oral presentations.

Repeat for Credit
N

Requisites
Prerequisite: ECET 350, MET 382, and senior standing.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

ETB 483 - Senior Design Project II

Credits: 1-3

A continuation of ETB 482. Includes the implementation, testing, and delivery of the project initiated in ETB 482 Senior Design I. Significant milestones are the project prototype, design report, and final presentation.

Note
Typically four hours lab a week when taken as 2 credit hours.

Repeat for Credit
N

Requisites
Prerequisite: ETB 482.

Typically Offered
Spring

ETB 492 - Advanced Problems in Engineering Technology

Credits: 1-18

Advanced independent study in specific topics in engineering technology.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

FASH 200 - Introduction to Product Development

Credits: 3

Fundamental knowledge and skills in fashion product development and garment construction. Focus on foundational techniques, terminology, methods and fashion industry standards.

Repeat for Credit
N

Typically Offered
Fall, Spring

FASH 245 - Fashion Industry

Credits: 3

Survey of the organization and operation of the global fashion industry; examination of the principles and processes required to meet the needs of the apparel/textile consumer; particular emphasis on sustainability challenges and opportunities pertaining to the industry.

Repeat for Credit
N

Typically Offered
Fall

FASH 265 - Textiles

Credits: 3

Fundamentals of textiles as related to the production, sale, and use of soft goods. Understanding of the environmental impacts of fiber, yarn, and fabric production. Identification of fibers, yarns, and fabrics. Care and performance of textile products.

Repeat for Credit
N

Typically Offered
Fall

FASH 300 - Fashion Production I

Credits: 3

Fundamentals of fashion production using industrial equipment; fit and tech packs.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FASH 200

Typically Offered
Fall

FASH 325 - Fashion Retailing

Credits: 3

Introduction to the strategic role of retailing in the value chain; analyzing components, processes, and controls involved in managing a soft goods retailing organization while exploring the impetus for triple bottom line thinking in an industry transitioning toward sustainability.

Repeat for Credit
N

Requisites
Prerequisite: FASH 245 with a C or better.

Typically Offered
Spring

FASH 330 - Dress and Human Behavior

Credits: 3

Cultural, social, psychological, and economic aspects related to dress and human behavior of individuals and groups; focus on market segmentation.

Recommended prerequisite: SOCIO 211 or PSYCH 110.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing; Recommended Prerequisite: SOCIO 211 or PSYCH 110

Typically Offered
Fall

K-State 8
Social Sciences

FASH 340 - Fashion Aesthetics

Credits: 3

Understanding and application of aesthetics as it relates to the roles of the fashion industry professional and the development, selection, and promotion of fashion products.

Note
Lecture only.

Repeat for Credit
N

Requisites
Recommended co-requisite: FASH 245.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

FASH 375 - Digital Fashion Communications

Credits: 3

Studies in computer-based advertising and promotional strategies for the fashion industry. Students will apply skills to graphic presentation and current industry technologies.

Repeat for Credit
N

Requisites
Prerequisite: FASH 340 with a C or better.

Typically Offered
Spring

FASH 400 - Fashion Illustration and Flats

Credits: 3

Fashion rendering by hand; technical flats and digital presentation using Adobe Illustrator.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Instructor permission. Recommended prerequisite: ART 180.

Typically Offered
Spring

FASH 410 - Fashion Production II

Credits: 3

Intermediate level fashion production using industrial equipment; fit and use of challenging fabrics.

Repeat for Credit
N

Requisites
Prerequisite: FASH 300 with a C or better.

Typically Offered
Spring

FASH 430 - History of Fashion

Credits: 3

Interrelationship of fashion and social, cultural, political, and economic environments from the 1800s to present day.

Repeat for Credit
N

Requisites
Recommended Foundation Course: ART 196

Typically Offered
Fall

K-State 8
Historical Perspectives

FASH 445 - Professional Development

Credits: 3

Preparation for internship and professional development in the fashion industry.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and FASH 375 with a C or better or FASH 400 with a C or better.

Typically Offered
Fall

FASH 450 - Showcase of Excellence Event Planning

Credits: 3

Planning, promotion, and production of a fashion runway event and static exhibit.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor permission required.

Typically Offered
Spring

FASH 460 - Soft Goods Evaluation

Credits: 3

Identification and evaluation of soft goods product quality and serviceability from the standpoint of fiber, fabric, and construction performance, material and product standards and specifications, and cost.

Note
Two hours lecture and 2 hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FASH 265 with a C or better and IDFS 350 with a C or better.

Typically Offered
Spring

FASH 465 - Product Development for Circular Fashion

Credits: 3

Sustainable soft goods product development. Focus on development of textile related products and services (clothing, footwear, accessories, home goods, etc.) for the circular economy, from concept to consumer.

Repeat for Credit
N

Requisites
Prerequisite: FASH 265 with a C or better; IDFS 350 with a C or better

Typically Offered
Spring

FASH 476 - Merchandise Math and Buying Concepts

Credits: 3

Introduction to the processes and methods used by fashion and retail buyers to plan and purchase merchandise. Application of fashion theory, principles, and sources of information in conducting market and consumer research. Forecasting economic trends in retailing
and consumer buying behavior. Emphasis placed on merchandising mathematics, creating spreadsheets in Excel, and key industry terminology used by retail buyers.

Repeat for Credit
N

Requisites
Prerequisite: FASH 325 with a C or better; Corequisite: ACCTG 231

Typically Offered
Spring

FASH 498 - Topics in Fashion Studies

Credits: 1-6

New content, technology or theory related to fashion studies.

Note
Consent of School

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

FASH 499 - Problems in Fashion Studies

Credits: 1-8

Independent study.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FASH 550 - Fashion Internship

Credits: 4

Pre-planned and supervised off-campus work experience in the fashion industry.

Repeat for Credit
N

Requisites
Prerequisite: FASH 445 with a C or better; FASH 655 with a C or better or FASH 575 with a C or better; junior standing; and instructor's permission.

Typically Offered
Summer

FASH 575 - Fashion Forecasting

Credits: 3

Introduction of the processes and methods used by the fashion industry to conduct short-term and long-term forecasts. Application of fashion theory and principles, sources of information, knowledge, techniques and skills for planning and implementing fashion projection.

Repeat for Credit
N

Requisites
Prerequisite: FASH 340 with a C or better and FASH 430 with a C or better; and FASH 375 with a C or better or FASH 400 with a C or better.

Typically Offered
Spring

FASH 576 - Retail Finance and Merchandise Control

Credits: 3

Introduction and application of fashion and soft goods merchandise assortment planning, forecasting operational expenses, vendor negotiations in merchandise purchases, retail profit planning, financial strategy, and economic sustainability. Emphasis on creating detailed spreadsheets in Excel.

Repeat for Credit
N

Requisites
Prerequisite: FASH 476 with a C or better; ACCTG 231 with a C or better.

Typically Offered
Fall

FASH 600 - Soft Goods Supply Chain Management

Credits: 3

Analysis of global fiber, textile, and apparel production and distribution; structure of fashion industry and distribution channels; impact of culture, economics, and government regulations on production and distribution.

Recommend Foundation Course: ECON 110 or ECON 120.

Repeat for Credit
N

Requisites
Prerequisite: FASH 245 with a C or better; Recommend Prerequisite: ECON 110 or ECON 120.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

FASH 610 - Computer-aided Design of Fashion

Credits: 3

Development and presentation of fashion and textile design using visual graphic software.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FASH 400 with a C or better.

Typically Offered
Fall

FASH 625 - Sustainable Fashion Business

Credits: 4

Application of marketing principles to the fashion industry. Focus on development of marketing, promotional, and merchandising plans.

Repeat for Credit
N

Requisites
Prerequisite: FASH 576, with a C or better, and senior or graduate standing.

Typically Offered
Spring

FASH 650 - Fashion Studies Study Tour

Credits: 1-3

Supervised off-campus tour of facilities or equivalent experience where softgoods products are designed, manufactured, tested, marketed, exhibited, and/or conserved.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FASH 655 - Flat Pattern

Credits: 3

Fashion design through flat pattern methods.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FASH 400 with a C or better and FASH 410 with a C or better.

Typically Offered
Spring

FASH 670 - Pre-Production Technologies

Credits: 3

Computer applications in 2D for pattern drafting, grading, marker, and tech packs; 3D visualization and evaluation.

Note
Eight hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FASH 655 with a C or better.

Typically Offered
Fall

FASH 680 - Sustainable Fashion and Color

Credits: 3

Sustainable fashion design and coloration strategies, systems, and standards; coloration of textiles with natural dye and sustainable methods.

Repeat for Credit
N

Typically Offered
Fall

FASH 700 - Foundations of Sustainability

Credits: 3

Introduction to principles and practices of sustainability. Examination of the challenges to environmental, social, and economic sustainability on both a global and soft goods industry scale. Exploration of innovative practices and social change strategies for furtherance of sustainability.

Repeat for Credit
N

Typically Offered
Spring

FASH 720 - Professional Advancement in Merchandising

Credits: 3

Analysis of leadership in a merchandising firm and how it affects organizational culture and change. Various leadership styles examined, and a personal leadership philosophy developed.

Repeat for Credit
N

Typically Offered
Summer

FASH 725 - Theory and Practice of Soft Goods Marketing and Distribution

Credits: 3

Theoretical and applied analysis of soft goods marketing and distribution strategies, with an emphasis on the effectiveness of a market-oriented approach for decision-making; assessment of environmental forces affecting strategic decisions by firms in the distribution channel; synthesis of past and present trends in order to forecast probably future patterns.

Repeat for Credit
N

Typically Offered
Spring

FASH 735 - Promotional Strategies in Merchandising

Credits: 3

Examination of promotional strategies and techniques used by merchandising firms, emphasizing cultural and global awareness, social responsibility, and ethical decision making.

Repeat for Credit
N

Typically Offered
Fall

FASH 740 - Merchandising Analytics

Credits: 3

Using quantitative data from the merchandising industry to support managerial decision making. Specifically, how to format and analyze Point of Sale (POS) and Enterprise Resource Planning (ERP) merchandising data with the goal of maximizing profitability. Applying analytical approaches to problem solving using Microsoft Excel. Strengthening decision making and analytical skills while providing new perspectives and approaches to apply quantitative techniques and methods to solve real-world merchandising problems.

Repeat for Credit
N

Typically Offered
Spring

FASH 805 - Practice-Based Research

Credits: 3

Examination and application of approaches for undertaking practice-based research in fashion studies.

Repeat for Credit
N

Typically Offered
On sufficient demand

FASH 810 - International Merchandise Management

Credits: 3

Comprehensive understanding of theory, practices, and trends in international merchandise management. Analysis of the global merchandising system and way goods are distributed to consumers in various countries.

Repeat for Credit
Y

Typically Offered
Fall

FASH 815 - Financial Merchandising Implications

Credits: 3

The advanced study of financial trends in the merchandising industries. Focus will be on the financial implications of recent advances in the field.

Repeat for Credit
Y

Typically Offered
Summer

FASH 825 - Strategic Planning for Sustainability

Credits: 3

Examination of the executive level planning process utilized to develop successful merchandising strategies; emphasis on the importance of a market orientation for building customer value and sustaining a competitive advantage.

Repeat for Credit
N

Requisites
Prerequisite: Instructor's Permission.

Typically Offered
Fall

FASH 830 - Fashion Behavior & Sustainability

Credits: 3

Evaluation of historical, sociological, psychological, economic, and theoretical underpinnings of fashion process, and examination of approaches fostering greater sustainable apparel consumption.

Repeat for Credit
Y

Typically Offered
On sufficient demand

FASH 840 - Product Development

Credits: 3

Advanced study of issues and management strategies necessary to design and produce a competitively priced product. Examination of the role of globalization and rapidly changing technology on the development of a successful product.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor permission.

Typically Offered
Fall

FASH 845 - Consumers in the Soft Goods Market

Credits: 3

Analysis of consumers and their decision-making processes; examination of internal and external factors influencing evaluation and purchasing behavior in order to predict future consumption and purchasing patterns.

Repeat for Credit
Y

Typically Offered
Spring

FASH 850 - Research Methods in Fashion Studies

Credits: 3

Research methods that address practical and theoretical issues involved in designing, conducting, and evaluating research.

Repeat for Credit
Y

Requisites
Prerequisite: A graduate-level course in statistics.

Typically Offered
Spring

FASH 855 - Readings in Fashion Studies

Credits: 1-2

Directed reading and study of selected topics.

Repeat for Credit
Y

Requisites
Prerequisite: FASH 850.

Typically Offered
Fall, Spring, Summer

FASH 860 - Contemporary Topics in Fashion Studies

Credits: 1-3

Selected contemporary topics related to fashion studies.

Repeat for Credit
Y

Requisites
Prerequisite: 8 hours of credit basic to field.

Typically Offered
On sufficient demand

FASH 870 - Problems in Fashion Studies

Credits: 1-6

Independent study related to fashion studies.

Repeat for Credit
Y

Requisites
Prerequisite: Six hours credit basic to the field.

Typically Offered
Fall, Spring, Summer

FASH 875 - Practicum in Fashion Studies

Credits: 1-6

Preplanned and supervised off-campus experience in business, industry, museums, government agencies, or the cooperative extension service.

Repeat for Credit
Y

Requisites
Prerequisite: Twelve hours in the field.

Typically Offered
Fall, Spring, Summer

FASH 896 - Project Report

Credits: 1-3

Research and written documentation for the M.S. Project Report option.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of major professor.

Typically Offered
Fall, Spring, Summer

FASH 897 - Project Exhibit

Credits: 1-6

Project development for creative-oriented M.S. Project Report option resulting in a body of original works to be exhibited on campus during the final semester of the student's program.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of major professor.

Typically Offered
Fall, Spring, Summer

FASH 899 - Master's Thesis Research

Credits: 1-6

Research and written documentation for the M.S. Thesis option.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of major professor.

Typically Offered
Fall, Spring, Summer

FASH 990 - Dissertation Proposal Seminar

Credits: 1

Presentation and discussion of proposals for dissertation research.

Repeat for Credit
Y

Requisites
Prerequisite: Six hours of statistics, three hours of research design or methods, and consent of major professor.

Typically Offered
Fall, Spring

FASH 995 - Grantsmanship and Publication

Credits: 3

Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.

Repeat for Credit
Y

Requisites
Prerequisite: FASH 850 or other research methods course.

Typically Offered
On sufficient demand

FASH 999 - Dissertation Research in Fashion Studies

Credits: 1-12

Research in fashion studies for the doctoral dissertation.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of major professor.

Typically Offered
Fall, Spring, Summer

FDSCI 100 - Special Topics in FDSCI

Credits: 0-6

Seminars of special interest. Will be offered upon sufficient demand in selected areas relating to food science.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 101 - Foundations in Food Science & Industry

Credits: 1

Introduction to the food science & industry programs, activities, resources, faculty and career opportunities.

Note
Required of all freshmen in food science & industry. One hour seminar a week.

Repeat for Credit
N

Requisites
Prerequisite: Freshman in FDSCI.

Typically Offered
Fall

FDSCI 202 - Introduction to Food Science

Credits: 3

This course is the beginning course in food science designed to acquaint the student with the breadth and scope of the food industry and the role of science in the preservation, processing, and utilization of foods.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

FDSCI 230 - Food Science Problems

Credits: 0-6

Independent guided studies in any of the many fields associated with food science.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 301 - Transfer Foundations in FDSCI

Credits: 0

An overview of the Food Science and Industry undergraduate program, including its undergraduate degree requirements, activities, and resources.

Repeat for Credit
N

Requisites
prerequisite: FDSCI major

Typically Offered
Fall, Spring

FDSCI 305 - Fundamentals of Food Processing

Credits: 3

The study of basic unit operations such as thermal processing, separation, chilling and freezing, dehydration, and fermentation as applied to the processing of food products.

Note
Two hours lecture and two hours lab a week

Repeat for Credit
N

Requisites
Prerequisite: A course in chemistry.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FDSCI 310 - Food Science Professional Preparation

Credits: 1

This course prepares students to pursue and be successful

in food science careers. Students will develop professional resumes, identify internship and career opportunities, hone interviewing skills, examine standards of professionalism with respect to personal integrity and business ethics, and practice professional communication in oral and written formats.

Repeat for Credit
N

Requisites
Prerequisite: Open to Food Science majors with Sophomore Standing.

Typically Offered
Spring

FDSCI 330 - Food Science Problems

Credits: 0-6

Independent guided studies in any of the many fields associated with food science.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 331 - Special Topics in Food Science

Credits: 0-6

Topics of special interest. Will be offered upon sufficient demand in selected areas relating to food science.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 335 - Food Products Evaluation

Credits: 2

Introduction to the sensory evaluation of food products, including basic sensory testing methods, with special emphasis on proper judging techniques for evaluating dairy products.

Note
Four hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

FDSCI 500 - Food Science Seminar

Credits: 1

Review of recent developments in the food science industry and in food science research. Food science literature and intradepartmental research will provide source material.

Note
Required of all food science undergraduates in agriculture.

Repeat for Credit
N

Typically Offered
Fall

FDSCI 501 - Food Chemistry

Credits: 3

An in-depth coverage of the chemical structures of major food components and the chemical reactions occurring during storage and processing.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: BIOCH 265 or CHM 350

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FDSCI 510 - Fruit and Vegetable Processing

Credits: 2

Fundamental fruit and vegetable processes and related unit operations including blanching, cooling, freezing, canning, irradiation, fermentation, pickling, drying, packaging in relation to quality, safety, and nutritional aspects of related products. Importance of raw material characteristics and storage conditions will be discussed in terms of post-harvest physiology of fruits and vegetables and different product types. Functionality of ingredients common in fruit and vegetable processing will also be introduced.

Note
A companion laboratory (FDSCI 511) is also offered, but is not required.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 305 and MATH 205 or MATH 220

Typically Offered
Fall

FDSCI 511 - Fruit and Vegetable Processing Lab

Credits: 1

Lab component of FDSCI 510 Fruit and Vegetable Processing. The labs will demonstrate both industrial and lab scale applications of technologies, unit operations, quality measurements, and related processing calculations commonly used in fruit and vegetable processing.

Repeat for Credit
N

Requisites
Prerequisite OR Corequisite: FDSCI 510

Typically Offered
Fall

FDSCI 530 - Undergraduate Research in Food Science and Industry

Credits: 0-3

Mentored undergraduate research experience in food sciences.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

FDSCI 600 - Food Microbiology

Credits: 2

This course deals with the isolation, identification, enumeration, and characterization of bacteria, yeasts, molds and other microbes associated with foods and food processing. Effects of physical and chemical agents on micro-organisms will be studied. Microbiological problems in food spoilage, food preservation, food fermentation, and food-borne diseases will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FDSCI 601 - Food Microbiology Lab

Credits: 2

Laboratory procedures involving isolation, identification, enumeration, and characterization of bacteria, yeasts, molds and other microbes associated with foods and food processing.

Note
Two two-hour labs a week.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 600 or concurrent enrollment.

Typically Offered
Fall

FDSCI 603 - Food Science Internship

Credits: 0-6

Supervised professional field experience in food science.

Note
Consent of supervising instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 625 - Food Analysis

Credits: 3

Analytical principles related to standards and regulations for food processing. Food analysis methods and techniques addressing proximate analysis, basic quantitative approaches and calculations, and some analytical instrumentation such as gas chromatography and HPLC.

Note
Offered in an online format only

Repeat for Credit
N

Requisites
Recommended Foundation Course: FDSCI 501

Typically Offered
Fall, Spring

FDSCI 627 - Chemical Methods of Food Analysis

Credits: 2

Methods for quantitative chemical analyses of foods products. Analytical techniques covered include proximate analysis, spectroscopy, chromatography, mass spectrometry and immunochemistry. The analyses will be related to standards and regulations for food processing.

Note
Three hours lecture and three hours lab a week. Meets during the first half of the semester.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 501

Typically Offered
Fall

FDSCI 628 - Physical Methods of Food Analysis

Credits: 2

Principles of physical methods of food analysis including techniques related to water activity, water content, color, soft materials, gel networks, interfacial phenomena and colloidal structure, texture, rheology, and vibrational spectroscopy.

Note
Three hours lecture and three hours lab a week. Meets during second half of semester.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 501

Typically Offered
Fall

FDSCI 630 - Food Science Problems

Credits: 0-6

Research or related work with others, or a literature search. Written reports are required. Any field of food science for which the student has adequate background.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 640 - Research and Development of Food Products

Credits: 3

Research and development of new food products, including idea generation; market screening; focus groups; prototype development; ingredient functionality and interactions; statistical designs; processing; packaging; scale-up; regulatory issues; labeling; physical, chemical, microbiological and sensory evaluations; quality control procedures; and food safety plans.

Note
Two hours lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 305 Recommended Foundation Course: FDSCI 501 and FDSCI 600

Typically Offered
Fall

FDSCI 660 - International Study Experience in Food Science

Credits: 0-6

Seminar and travel course designed to prepare students before the experience and for students to analyze, critique, and report their experiences of an international experience associated with study tours or short courses. Course will focus on appropriate oral and written documentation of the student learning objectives for course experience. The academic topics will vary with each international activity.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

FDSCI 690 - Principles of HACCP and Preventive Controls for Human Food

Credits: 3

A comprehensive study of the Hazard Analysis and Critical Control Point (HACCP) System and Preventive Controls for Human Food and their application in the meat and food industries. Students will meet the training requirements under USDA HACCP and the FDA Food Safety Modernization Act (FSMA) for food safety for human foods. The class is offered in person in the fall and online fall/spring.

Note
Three hours lecture and group activities per week. *Great Plains IDEA course

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing. Recommended Prerequisite: BIOL 198 and CHM 110.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

FDSCI 695 - Quality Assurance of Food Products

Credits: 3

A comprehensive course covering all aspects of quality assurance practices in the food industry. Emphasis is placed on interrelations of food chemistry, microbiology, sanitation, processing, and laws and regulations.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: One course in microbiology.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

FDSCI 710 - Kosher and Halal Food Regulations

Credits: 2

This course is an introduction to the origin and application of Jewish and Muslim dietary laws and their application in commercial food production and processing with some coverage of home practices. Hebrew, Yiddish, and Arabic words and phrases will be presented and explained as they relate to kosher and halal food production, processing, and consumption. Religious festivals and customs, and the associated food products, will also be presented. Current food-related topics and issues in both the Jewish and Islam communities will be discussed. Food scientists should be aware of what constitutes a kosher or halal product and the importance of regulations dealing with the production and processing of these products.

Note
This is a web-based lecture course intended for off-campus distance education students. Lecture material is supplemented with web-based demonstrations.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing.

Typically Offered
Other

FDSCI 711 - Flavor Chemistry

Credits: 3

Covers the use and evaluation of flavor reactions and flavor chemicals used in food systems. The impact of fat, carbohydrates, proteins, and texture on foods, as well as other key topics such as ingredient sources for flavorings, regulating agencies, analytical tools and instruments used by flavor chemists are presented.

Repeat for Credit
N

Requisites
Prerequisite: CHM 350 or CHM 530 or a course in Organic Chemistry. Recommended prerequisite: FDSCI 501 or a course in Food Chemistry.

Typically Offered
Fall, Spring

FDSCI 712 - Food Packaging

Credits: 2

Covers the functionality of different food packaging types, as well as the materials and technology used in new package development. Packaging concept types as well as the functionality of different materials are presented.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Summer

FDSCI 713 - Rapid Methods and Automation in Microbiology

Credits: 2

Rapid methods and automation is a dynamic area in applied microbiology dealing with the study of improved methods in the isolation, detection, characterization, and enumeration of microorganisms and their products in clinical, food, industrial, and environmental samples. The knowledge and techniques of this course are useful for students interested in medical, food, industrial, and environmental microbiology for early detection of beneficial as well as harmful microorganisms in their work.

Repeat for Credit
N

Typically Offered
Intersession

FDSCI 720 - Reaction Kinetics in Foods

Credits: 2

A comprehensive course covering the principles of reaction kinetics in food systems to make quantitative predictions about food quality and food safety, and optimize food processing conditions.

Repeat for Credit
N

Requisites
Prerequisite: MATH 205 or MATH 220. Recommended Foundation Courses: FDSCI 600 or FDSCI 501.

Typically Offered
Spring

FDSCI 721 - Reaction Kinetics in Foods Recitation

Credits: 1

Recitation course covering the theories, case-studies, and exercise problems for the lecture course FDSCI 720, which needs to be taken concurrently.

Repeat for Credit
N

Requisites
Corequisite: FDSCI 720.

Typically Offered
Spring

FDSCI 725 - Food Analysis

Credits: 3

Principles, methods, and techniques necessary for quantitative, instrumental, physical, and chemical analyses of food products. Analytical techniques covered include proximate analysis, spectroscopy, chromatography (GC, HPLC), mass spectrometry, water activity, color, texture, rheology and interfacial phenomena.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student Standing Recommended Foundation Course: FDSCI 501

Typically Offered
Fall, Spring

FDSCI 727 - Chemical Methods of Food Analysis

Credits: 2

Methods for quantitative chemical analyses of foods products. Analytical techniques covered include proximate analysis, spectroscopy, chromatography, mass spectrometry and immunochemistry. The analyses will be related to standards and regulations for food processing.

Note
Three hours lecture and three hours lab a week. Meets during the first half of the semester.

Repeat for Credit
N

Requisites
Recommended Foundation Course: FDSCI 501.

Typically Offered
Fall

FDSCI 728 - Physical Methods of Food Analysis

Credits: 2

Principles of physical methods of food analysis including techniques related to water activity, water content, color, soft materials, gel networks, interfacial phenomena and colloidal structure, texture, rheology, and vibrational spectroscopy.

Note
One hour recitation, and three hours lab a week. Meets during second half of semester.

Repeat for Credit
N

Requisites
Recommended Foundation Course: FDSCI 501.

Typically Offered
Fall

FDSCI 730 - A Multidisciplinary Overview of Food Safety and Security

Credits: 2

Multidisciplinary food safety and security perspectives provided by numerous subject matter experts. Topics include food safety policy, ag bioterrorism, border security,

animal ID, food defense and site security, risk analysis, crisis communication, epidemiology, HACCP, and more.

Repeat for Credit
N

Requisites
Prerequisite: A course in biology or chemistry.

Typically Offered
Fall, Spring, Summer

FDSCI 731 - Food Protection and Defense--Essential Concepts

Credits: 2

This course presents foundational concepts relevant to protecting the food supply from intentional contamination, including the nature of the food and agriculture system as a critical infrastructure, threats to food and agricultural systems, as well as concepts and strategies related to response and mitigation of food protection incidents.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

FDSCI 740 - Research and Development of Food Products

Credits: 3

Research and development of new food products, including idea generation; market screening; focus groups; prototype development; ingredient functionality and interactions; statistical designs; processing; packaging; scale-up; regulatory issues; labeling; physical, chemical, microbiological and sensory evaluations; quality control procedures; and food safety plans.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student Standing Recommended Foundation Courses: FDSCI 600, and FDSCI 501 or 815.

Typically Offered
Fall

FDSCI 750 - Food Toxicants

Credits: 2

Quantitation metabolism and mechanisms of action of major foodborne toxicants. Toxicant defense and control systems, risk analysis and assessment and application of food laws.

Note
GPIDEA course

Repeat for Credit
N

Requisites
Prerequisite: A course in biochemistry.

Typically Offered
Fall

FDSCI 751 - Food Laws and the Regulatory Process

Credits: 2

History of the development of the current federal and state food regulations. Guidelines that govern the practice of regulating the wholesomeness of red meats, poultry, and eggs. Presentations by state and federal food regulators.

Note
GPIDEA course

Repeat for Credit
N

Requisites
Prerequisite: Three credits in food science coursework at 200 level or above.

Typically Offered
Fall, Summer

FDSCI 791 - Advanced Application of HACCP Principles

Credits: 3

Evaluation of control parameters and methodology at critical control points, validating and auditing the effectiveness of critical control points, critical limits, monitoring tools, corrective action procedures, recordkeeping and verification procedures in addressing biological, chemical, and physical hazards that may be present in food products.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: FDSCI 690. Recommended prerequisite: BIOL 255.

Typically Offered
Spring-Odd Years

FDSCI 810 - Fermented Foods

Credits: 2

Application of the principles of microbiology to the understanding of the fermentation of various categories of foods. Chemical, biochemical and microbiological changes under controlled and uncontrolled conditions.

Note
*Great Plains IDEA course

Repeat for Credit
Y

Typically Offered
Spring-Even Years

FDSCI 811 - Food Fermentation

Credits: 4

Application of the principles of microbiology to the understanding of the fermentation of various categories of foods. Chemical, biochemical and microbiological changes under controlled and uncontrolled conditions.

Note
Two hours lecture and six hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: BIOL 255.

Typically Offered
Spring

FDSCI 815 - Advanced Food Chemistry

Credits: 3

Relationship of chemical composition to properties and to physical and chemical stability of foods. Chemical reactions will be covered extensively. Special attention will be given to dairy and poultry products, red meats, vegetables, and cereal grains.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521, BIOCH 522.

Typically Offered
Fall

FDSCI 820 - Advanced Food Microbiology & Biotechnology

Credits: 2

Principles of food biotechnology, including introduction of molecular biology and enzyme immobilization. Theory and concepts of current biotechnology trends as it relates to food safety and security issues.

Note
*Great Plains IDEA course

Repeat for Credit
Y

Requisites
Prerequisite: A course in food microbiology or general microbiology, and a course in biochemistry

Typically Offered
Fall-Odd Years

FDSCI 840 - Public Health Practice

Credits: 3-6

Supervised field experience in an international, state, local, or district health agency or other appropriate health agency.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor. DMP 840, FNDH 840, and KIN 840.

Typically Offered
Fall, Spring, Summer

Cross-listed
MPH 840

FDSCI 850 - Food Science Graduate Seminar

Credits: 1

This course is designed to provide students with experience in developing and delivering a scholarly presentation on a specific topic. The course will include instruction on how to properly design technical presentations for effective communication. Students will learn how to use visual aids such as transparencies, slides and multimedia projectors. At least one technical presentation will be required. One credit required for an M.S. degree and 2 credits for a Ph.D. Degree.

Repeat for Credit
Y

Typically Offered
Spring

FDSCI 898 - Master's Report in Food Science

Credits: 1-2

A written report of either research or problem work on a topic in the major field.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 899 - Master's Research in Food Science

Credits: 1-18

Research leading to the completion of a master's thesis.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 907 - Food Dispersions

Credits: 2

Laws and theorems applied to the formation, mechanization and stabilization of food dispersions: properties of food dispersions; food solids, gels, batters, emulsions and foams.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 815.

Typically Offered
Spring-Odd Years

FDSCI 915 - Food Toxicology

Credits: 2

This course deals with the study of occurrence, detection, and control of microbial toxins and chemical toxins in fresh and processed foods. The genetics, physiology, and mechanisms of toxin production by microbial cells and the chemistry, formation, and interactions of chemical toxins with food systems during food processing will be addressed.

Note
Two hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: ASI 607 and ASI 715.

Typically Offered
Spring-Odd Years

FDSCI 961 - Graduate Problem in Food Science

Credits: 1-6

In-depth study of a topic supervised by a member of the graduate faculty.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FDSCI 999 - Doctoral Research in Food Science

Credits: 1-18

Research leading to the completion of a Ph.D. Degree.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FFM 100 - Foundations in Food and Feed Manufacturing

Credits: 1

This online orientation course provides an introduction to the key instructors, facilities, online platform and functionalities needed to be successful in completion of the food and feed manufacturing AAS degree. Students will explore the fundamentals of how to use available systems and to successfully communicate with their professors. In addition, this course is designed to increase the students' academic and personal success in college by providing them with the scholarly, personal, and life management tools needed to function effectively and complete their AAS degree.

Repeat for Credit
N

Typically Offered
Fall

FFM 110 - Introduction to Grain and Food Manufacturing Industries

Credits: 1

This course provides an in-depth introduction to the structure and function of the grain and food manufacturing industries, focusing on their organization, key players, and market dynamics. Students will learn an overview of the operational processes, from raw material procurement to distribution, while also exploring the roles of major industry sectors such as grain elevators, grain milling, baking, and supply chain logistics. Emphasis will be placed on how different departments and functions collaborate to ensure efficient production and delivery. The course also highlights career paths, from entry-level roles to specialized positions, within these industries.

Repeat for Credit
N

Typically Offered
Fall

FFM 111 - Introduction to Feed and Pet Food Manufacturing Industries

Credits: 1

This course provides an in-depth introduction to the structure and function of the feed and pet food manufacturing industries, focusing on their organization, key players, and market dynamics. Students will learn an overview of the operational processes, from raw material procurement to distribution, while also exploring the roles of major industry sectors such as commercial feed mills, integrated feed mills, dry pet food, wet pet food, pet treats, and others. Emphasis will be placed on how different departments and functions collaborate to ensure efficient production and delivery of feed and pet food. The course also highlights career paths, from entry-level roles to specialized positions, within these industries.

Repeat for Credit
N

Typically Offered
Fall

FFM 120 - Ingredient Identification and Quality: Cereal Grains

Credits: 1

This course teaches students the skills necessary to identify various types of cereal grains and assess their quality. Students will learn about key physical and chemical characteristics, as well as the factors that influence grain quality such as growing conditions, handling, and storage. The course includes practical instruction on grading, testing, and evaluating grains for food and feed production. By the end of the course, students will be able to recognize common cereal grains and determine their suitability for different applications based on quality standards.

Repeat for Credit
N

Typically Offered
Fall

FFM 121 - Ingredient Identification and Quality: Oil Seeds and Legumes

Credits: 1

This course provides students with the knowledge and skills to identify various types of oilseeds and legumes and assess their quality. Students will explore the physical, chemical, and nutritional properties of these crops, along with the factors affecting their quality, such as cultivation, harvesting, and storage practices. The course offers practical instruction on grading, testing, and evaluating oilseeds and legumes for use in food and feed production. By the end of the course, students will be equipped to determine the quality and market value of oilseeds and legumes based on industry standards.

Repeat for Credit
N

Typically Offered
Fall

FFM 122 - Ingredient Identification and Quality: Co-products and Additives

Credits: 1

This course introduces students to the identification and quality assessment of ingredient co-products and additives used in food and feed production. Students will learn about common co-products, such as bran and meal, and various additives, including preservatives, emulsifiers, and vitamins. The course covers the factors that impact the quality and functionality of these ingredients, with practical instruction on evaluating their suitability for specific applications. By the end of the course, students will be equipped to assess ingredient quality and understand their roles in enhancing product performance.

Repeat for Credit
N

Typically Offered
Fall

FFM 150 - Preparing Grains

Credits: 1

This course provides an in-depth overview of the preparation of grains for the milling process, covering cleaning, conditioning, and handling techniques. Students will learn about grain characteristics, impurity removal, moisture adjustment, and the equipment used to prepare grains for efficient milling. The course emphasizes the importance of proper grain preparation to ensure optimal milling performance, product quality, and safety. By the end of the course, students will understand the critical steps involved in preparing grains for milling and their impact on final product outcomes.

Repeat for Credit
N

Typically Offered
Spring

FFM 151 - Milling Process

Credits: 1

This course provides an overview of the key processing steps involved in the milling process, including grinding, sifting, purifying, and packaging. Students will learn about the equipment used at each stage, how grain is transformed into flour or other products, and the importance of process control for product quality and efficiency. The course emphasizes the integration of each step to optimize production and maintain consistency in the final product. By the end of the course, students will have a clear understanding of the entire milling workflow and the factors that influence process performance.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 150

Typically Offered
Spring

FFM 152 - Milling Specialty Grains

Credits: 1

This course offers an overview of the unique processing steps involved in milling specialty grains, such as quinoa, spelt, and buckwheat. Students will explore how these grains differ from conventional wheat in terms of cleaning, grinding, sifting, and handling, with an emphasis on the specialized equipment and techniques required. The course highlights the challenges and opportunities in maintaining quality, nutrition, and functionality during the milling of specialty grains. By the end of the course, students will understand the distinct processing methods needed to optimize production and ensure quality in specialty grain milling.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 151

Typically Offered
Spring

FFM 159 - Intro to Milling Practicum

Credits: 1

This hands-on course offers an applied learning experience in grain processing and flour milling, providing students with a practical overview of industry operations. Students will engage in activities such as grain cleaning, grinding, sifting, and flour quality testing, while learning about the equipment and processes involved in milling. The course emphasizes real-world problem-solving and process optimization within grain and flour milling facilities. By the end of the course, students will have gained valuable hands-on experience, preparing them for operational roles in grain processing and milling.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 150

Typically Offered
Fall

FFM 160 - Bakery Ingredients

Credits: 1

This course provides an overview of the role and function of both micro and macro ingredients in the baking process, including flours, sugars, fats, leavening agents, emulsifiers, and flavorings. Students will learn how these ingredients interact to influence dough development, texture, flavor, and shelf life in baked products. The course emphasizes the importance of ingredient selection, measurement accuracy, and the impact of ingredient quality on the final product. By the end of the course, students will understand how to optimize ingredient use to produce high-quality baked goods consistently.

Repeat for Credit
N

Typically Offered
Spring

FFM 161 - Bakery Processes

Credits: 1

This course provides a comprehensive overview of the production steps involved in the baking process, including mixing, proofing, baking, cooling, and packaging. Students will examine each stage of production, from ingredient preparation to final product assembly, with an emphasis on how these steps affect product quality and consistency. The course covers best practices for optimizing each step to enhance efficiency and ensure product excellence. By the end of the course, students will have a thorough understanding of baking unit operations and the skills needed to manage and improve production processes.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 160

Typically Offered
Spring

FFM 162 - Bakery Products

Credits: 1

This course provides an overview of the diverse range of products produced in the baking industry, including bread, pastries, cakes, cookies, and specialized baked goods. Students will explore the characteristics, ingredients, and production techniques specific to each product category. The course emphasizes product differentiation, market trends, and the impact of formulation and processing on product quality. By the end of the course, students will have a broad understanding of the variety of baked goods and the factors influencing their production and success in the market.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 161

Typically Offered
Spring

FFM 169 - Intro to Baking Practicum

Credits: 1

This hands-on course provides an applied learning experience offering a comprehensive overview of the baking industry. Students will engage in practical activities such as mixing, baking, and quality testing, while learning about the equipment and processes used in commercial bakeries. The course emphasizes understanding ingredient functionality, production techniques, and troubleshooting common issues in bakery operations. By the end of the course, students will have gained real-world experience, preparing them for technical and management roles in the baking industry.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 160

Typically Offered
Fall

FFM 170 - Feed Processing

Credits: 1

This course provides a comprehensive overview of the feed manufacturing process, focusing on process flow, equipment identification, and operational techniques. Students will learn about the key stages of feed production, from raw material intake to mixing, pelleting, and packaging, as well as the roles of various equipment used in each stage. The course includes practical insights into equipment operation, maintenance, and troubleshooting to ensure efficient and safe feed production. By the end of the course, students will understand the complete feed manufacturing process and be able to identify and operate essential machinery.

Repeat for Credit
N

Typically Offered
Spring

FFM 171 - Pet Food Processing

Credits: 1

This course provides an in-depth overview of the pet food manufacturing process, covering the production of dry food, wet food, canned food, and pet treats. Students will explore the process flow for each type of product, learning how raw materials are processed, formulated, and packaged, along with the identification and operation of key equipment used in each stage. The course emphasizes the technical aspects of machinery operation, maintenance, and quality control specific to pet food manufacturing. By the end of the course, students will have a comprehensive understanding of how different pet foods are produced and the equipment involved in their creation.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 170

Typically Offered
Spring

FFM 172 - Finished Feed and Pet Food Quality Assurance

Credits: 1

This course offers an overview of quality assurance practices in the feed and pet food manufacturing processes, focusing on maintaining product safety, consistency, and regulatory compliance. Students will learn about key

quality control measures, testing protocols, and industry standards for ingredient sourcing, production, and packaging. The course also covers the tools and technologies used to monitor and ensure product quality throughout the manufacturing process. By the end of the course, students will understand how quality assurance impacts the overall success and safety of feed and pet food products.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 171

Typically Offered
Spring

FFM 179 - Intro to Feed and Pet Food Practicum

Credits: 1

This hands-on course offers an applied learning experience that provides an overview of feed manufacturing and pet food processing. Students will engage in practical activities such as ingredient handling, formulation, mixing, pelleting, extrusion, canning, and quality testing, while learning about the equipment and processes involved in both industries. The course emphasizes real-world problem-solving, production optimization, and maintaining product quality and safety. By the end of the course, students will have gained valuable experience in the operational aspects of feed and pet food manufacturing, preparing them for technical and managerial roles.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 172

Typically Offered
Fall

FFM 199 - Food and Feed Manufacturing Independent Study

Credits: 0-6

Student-specific projects or independent guided studies in any of the many fields associated food and feed manufacturing.

Note
Department Consent Required

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FFM 200 - Topics in Food and Feed Manufacturing

Credits: 0.5-6

Topics of special interest. Will be offered upon sufficient demand in selected areas relating to food and feed manufacturing.

Repeat for Credit
Y

Typically Offered
On sufficient demand

FFM 210 - Food and Feed Manufacturing Equipment Maintenance

Credits: 1

This course introduces students to the fundamentals of equipment maintenance in food and feed manufacturing, focusing on routine upkeep, troubleshooting, and repair techniques. Students will learn about the types of equipment commonly used in the industry, as well as best practices for maintaining operational efficiency and minimizing downtime. The course includes practical insights into preventive maintenance strategies and common issues that arise in equipment operations. By the end of the course, students will be equipped to implement effective maintenance programs and ensure the reliability of manufacturing equipment.

Repeat for Credit
N

Typically Offered
Fall

FFM 215 - Preventative and Predictive Maintenance: Milling Specific

Credits: 1

This course focuses on developing equipment maintenance programs specifically for the grain and flour milling industries. Students will learn to design and implement maintenance schedules tailored to the unique demands of milling equipment, including preventive and predictive maintenance strategies. The course covers techniques for diagnosing common equipment issues and best practices for minimizing downtime and extending equipment life. By the end of the course, students will be prepared to create and manage effective maintenance programs that optimize performance and reliability in grain and flour milling operations.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 210

Typically Offered
Fall

FFM 216 - Maintenance Programs: Bakery Specific

Credits: 1

This course provides an in-depth exploration of developing equipment maintenance programs tailored to the baking industry. Students will learn how to design and implement maintenance schedules for bakery equipment, including ovens, mixers, and packaging machines, with a focus on preventive and corrective measures. The course covers techniques for troubleshooting common issues, ensuring compliance with industry standards, and optimizing equipment performance. By the end of the course, students will be equipped to create and manage maintenance programs that enhance the efficiency and longevity of bakery operations.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 210

Typically Offered
Fall

FFM 217 - Maintenance Programs: Feed and Pet Food Specific

Credits: 1

This course focuses on developing equipment maintenance programs tailored specifically to feed and pet food manufacturing facilities. Students will learn to design and implement maintenance schedules for machinery used in processing, mixing, and packaging feed and pet food, emphasizing preventive and corrective maintenance strategies. The course includes practical training on diagnosing equipment issues, ensuring compliance with industry standards, and enhancing operational efficiency. By the end of the course, students will be adept at creating and managing maintenance programs that optimize the performance and reliability of equipment in feed and pet food manufacturing.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 210

Typically Offered
Fall

FFM 225 - Milling Equipment Maintenance Practicum

Credits: 1

This hands-on course offers students practical experience in equipment maintenance programs specific to grain processing and flour milling facilities. Students will learn to perform routine inspections, preventive maintenance, and basic repairs on critical milling equipment, such as conveyors, sifters, and grinders. The course emphasizes real-world problem-solving and the importance of maintaining equipment to minimize downtime and improve operational efficiency. By the end of the course, students will have gained valuable skills in managing maintenance programs, ensuring the reliability and longevity of equipment in grain and flour milling operations.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 215

Typically Offered
Fall

FFM 226 - Baking Equipment Maintenance Practicum

Credits: 1

This hands-on course provides students with practical experience in developing and implementing equipment maintenance programs specific to baking facilities. Students will work with common bakery machinery, such as ovens and mixers, learning preventive maintenance techniques, troubleshooting methods, and basic repairs. The course focuses on maintaining operational efficiency, minimizing downtime, and ensuring equipment safety in a bakery setting. By the end of the course, students will have the skills needed to manage maintenance programs that enhance the performance and longevity of bakery equipment.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 216

Typically Offered
Fall

FFM 227 - Feed Equipment Maintenance Practicum

Credits: 1

This hands-on course provides practical experience in developing and implementing equipment maintenance programs for feed manufacturing and pet food processing facilities. Students will work with machinery such as mixers, extruders, conveyors, and packaging equipment, learning preventive maintenance, troubleshooting, and basic repair techniques. The course emphasizes maintaining equipment efficiency, minimizing downtime, and ensuring product safety and quality. By the end of the course, students will have gained the skills necessary to manage maintenance programs that optimize equipment performance in feed and pet food production.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 217

Typically Offered
Fall

FFM 250 - Advanced Food and Feed Manufacturing Management

Credits: 1

This course offers a comprehensive overview of managing food and feed manufacturing facilities, with a focus on integrating statistical process controls and Lean Six Sigma methodologies. Students will learn how to apply statistical tools to monitor and improve production processes, as well as implement Lean Six Sigma principles to enhance efficiency and reduce waste. The course covers key management strategies for optimizing facility operations, ensuring product quality, and complying with industry regulations. By the end of the course, students will be equipped to manage manufacturing operations effectively, utilizing data-driven approaches and continuous improvement techniques.

Repeat for Credit
N

Requisites
FFM 152 or FFM 162 or FFM 172

Typically Offered
Spring

FFM 251 - Advanced Milling Management

Credits: 1

This course provides an advanced exploration of management techniques specific to grain and flour milling facilities. Students will delve into sophisticated strategies for optimizing milling processes, improving operational efficiency, and ensuring product quality. The course includes in-depth coverage of advanced technologies, process control systems, and management practices tailored to the unique challenges of the milling industry. By the end of the course, students will have the expertise to lead and manage grain and flour milling operations effectively, leveraging advanced management techniques to enhance productivity and sustainability.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 250

Typically Offered
Spring

FFM 252 - Advanced Milling Manufacturing Management Practicum

Credits: 1

This hands-on course offers students practical experience in managing the day-to-day operations of grain milling and flour milling facilities. Students will engage in activities such as overseeing production processes, managing equipment, coordinating staff, and ensuring product quality and safety. The course emphasizes problem-solving, workflow optimization, and adherence to industry regulations to ensure efficient facility management. By the end of the course, students will be equipped with the skills to lead and manage a milling facility, balancing operational efficiency and product quality.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 251

Typically Offered
Spring

FFM 261 - Advanced Bakery Management

Credits: 1

This course explores advanced management practices specific to bakery facilities, focusing on optimizing production processes, enhancing product quality, and integrating innovative technologies. Students will study advanced techniques for managing bakery operations, including process control, and supply chain management. The course also covers methods and tools to improve production efficiency, performance, capability, profitability, and quality in a bakery operation. By the end of the course, students will be equipped with the skills to lead bakery facilities effectively, driving efficiency and maintaining high standards of product excellence.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 250

Typically Offered
Spring

FFM 262 - Advanced Baking Manufacturing Management Practicum

Credits: 1

This hands-on course provides students with practical experience in managing the operations of a commercial baking facility. Students will engage in overseeing production processes, managing staff, maintaining equipment, and ensuring product quality and food safety. The course emphasizes process optimization, inventory control, and adherence to regulatory standards specific to the baking industry. By the end of the course, students will have the skills and knowledge to efficiently manage a baking facility, balancing operational demands with quality control.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 261

Typically Offered
Spring

FFM 271 - Advanced Feed and Pet Food Management

Credits: 1

This course offers an advanced examination of management practices tailored for feed and pet food facilities, emphasizing strategies for optimizing production, ensuring quality control, and integrating cutting-edge technologies. Students will explore advanced operational techniques, including automation, process optimization, and regulatory compliance specific to feed and pet food manufacturing. The course also covers strategic decision-making, resource management, and staff leadership to address the unique challenges of these industries. By the end of the course, students will possess the expertise to effectively manage feed and pet food facilities, driving operational excellence and innovation.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 250

Typically Offered
Spring

FFM 272 - Advanced Feed and Pet Food Manufacturing Management Practicum

Credits: 1

This hands-on course offers students practical experience in the daily operations of feed manufacturing and pet food processing facilities. Students will engage in activities such as overseeing production processes, managing ingredient handling, operating machinery, and ensuring product quality and safety. The course emphasizes workflow optimization, regulatory compliance, and the integration of food safety standards within the industry. By the end of the course, students will be prepared to manage and optimize operations in feed and pet food production facilities.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 271

Typically Offered
Spring

FFM 280 - Introduction to Food and Feed Safety

Credits: 1

This course introduces students in technical education to foundational concepts in food and feed safety, focusing on the identification and control of various hazards. Students will learn about the different types of hazards—physical, chemical, and biological—and explore key biological and viral pathogens that can impact food and feed production. The course covers essential safety practices, regulatory standards, and methods for preventing contamination. By the end of the course, students will understand the importance of hazard identification and control in maintaining food and feed safety.

Repeat for Credit
N

Typically Offered
Spring

FFM 285 - Food Safety Principles in Milling and Baking

Credits: 1

This course provides a comprehensive overview of Hazard Analysis and Critical Control Points (HACCP), a systematic approach to food safety management for the milling and baking industries. Students will learn to identify potential hazards, establish critical control points, and implement monitoring procedures to ensure the safety of products. The course covers the seven principles of HACCP, risk assessment techniques, and compliance with industry regulations. By the end of the course, students will be equipped to develop, manage, and evaluate HACCP plans in food production environments.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 280

Typically Offered
Spring

FFM 287 - Advanced Feed and Pet Food Safety

Credits: 1

This course prepares students to become Preventive Control Qualified Individuals (PCQI), equipping them with the skills to develop and implement food safety plans in accordance with FDA regulations. Students will learn how to identify hazards, establish preventive controls, monitor processes, and ensure compliance with the Food Safety Modernization Act (FSMA). The course covers risk-based preventive controls, corrective actions, and verification procedures. By the end of the course, students will be qualified to oversee and manage food safety systems in a variety of food production environments.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: FFM 280

Typically Offered
Spring

FINAN 250 - Personal Investing and Risk Management

Credits: 3

Provides a framework for identifying, analyzing, and

managing the lifetime financial risks faced by the average person. An overview of the types and mechanics of investment instruments, development of personal risk profiles and investment plans, asset allocation methods, diversifiable and non-diversifiable risk, and risk avoidance and hedging methods.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing and MATH 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 301 - Sports Finance

Credits: 3

This course explores the unique financial issues in collegiate athletics including scholarships, NIL, and professional contracts, and how financial markets and institutions interact with athletics. Topics include budgeting for scholarships, NIL, and professional contracts; capital markets, banking, risk management in college athletics; and finance in athletic careers.

Repeat for Credit
N

Typically Offered
Fall, Spring

FINAN 450 - Principles of Finance

Credits: 3

Study of the basic principles of finance, including discounted cash flow analysis, risk-return tradeoff, asset pricing models, and financial and real asset valuation. Applications of these concepts to the firm's investment and financing decisions and performance analysis will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231.
Prerequisite or Corequisite: STAT 250, or STAT 225 or STAT 510 and ECON 110 or ECON 120 or AGEC 120.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

FINAN 451 - Introduction to Integrated Investment Management

Credits: 3

This course provides a survey of the investment management industry. The course examines various aspects of the investment management industry including discussions of investment markets, products, companies, and strategies. The course also examines the business of investment management by surveying each of the functional areas of investment management industry: accounting, finance, management, and marketing. The course introduces students to the basics of investment management and the course provides a survey of the legal and ethical environments in the investment management industry.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FINAN 460 - Insurance

Credits: 3

A study of life, property, casualty, and health insurance from the purchaser's point of view with additional emphasis on the operation and contribution of the insurance industry.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FINAN 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FINAN 498 - Problems in Finance

Credits: 1-18

Internship program and selected projects appropriate to the student's program of study.

Note
Consent of department head based on background courses appropriate to the project selected.

Repeat for Credit
Y

Typically Offered
Fall

FINAN 500 - Investment Management Concepts

Credits: 3

An introduction and study of the issues and skills involved in successful investment management. This course will survey the role of capital markets, the basics of fundamental and technical analysis, behavioral finance, the basic of financial statements, client development, and management skills necessary for investment management success.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 510 - Financial Institutions and Markets

Credits: 3

An analysis of financial institutions and markets from a risk management point of view. The role of financial institutions in the marketplace, the determinants of interest rates, and the impact of inflation on asset returns will be examined. Risks in financial institutions will be analyzed and management of these risks will be emphasized.

Note
May be taken concurrent with FINAN 520.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 520 - Investments

Credits: 3

An analysis of investment securities from the investor's point of view. Topics covered include the mechanics of investing in securities and market basics, the risk-return tradeoff, asset pricing models, market efficiency, the valuation of securities, portfolio performance measurement, and an introduction to derivatives.

Note
May be taken concurrent with FINAN 510.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 531 - Commercial Banking

Credits: 3

An application of financial management concepts to the liquidity management, investment portfolio analysis, capital budgeting, and capital structure decision-making process required by a commercial bank to perform effectively its financial intermediation role within the financial system's institutional, regulatory, and competitive environment.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 510 and FINAN 520.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 552 - Real Estate

Credits: 3

Principles and practices including legal, economic, and social implications from the viewpoint of the real estate practitioner, investor, and society.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 555 - Finance Scholars Seminar

Credits: 0

Weekly seminar for the students in the Kansas State University Finance Scholars Program

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

FINAN 560 - Concepts in Financial Technology

Credits: 3

Introduces the most recent technological innovations which affect how capital market participants perform functions such as borrowing, lending, contracting, and transacting. These include blockchain for business, decision support systems, and innovations in marketplace lending

Repeat for Credit
N

Typically Offered
Fall

FINAN 561 - Finance for Entrepreneurs

Credits: 3

A comprehensive set of knowledge and tools to start, run, and exit an entrepreneurial or small business. These tools include financial forecasting and business planning, financing operations and capital investments, evaluation of asset acquisitions, tax planning, short-term capital management, mergers/acquisitions, and evaluation of exit strategies.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FINAN 575 - Intermediate Finance

Credits: 3

An in-depth study of a firm's investment and financing decisions, firm performance measurement and financial planning for a business enterprise. Topics include financial statement analysis and forecasting, capital budgeting, risk considerations in capital budgeting, cost of capital, capital structure theory and practice, distribution policy, leasing and mergers and acquisitions.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 510 and FINAN 520.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 620 - Fixed Income Securities and Markets

Credits: 3

Provides an overview of fixed income markets and conventions; the analytical underpinning of fixed income markets and securities; and fixed income derivatives.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 510 and FINAN 520

Typically Offered
Spring

FINAN 623 - Financial Modeling

Credits: 3

This course is designed to provide an in-depth knowledge of the use of Excel for use in the corporate finance and equity valuation environment. Topics include: • Use of Excel •Developing Models in Excel • Developing functional understanding of how to use Excel.

Repeat for Credit
N

Requisites
Prerequisite: (FINAN 510 and FINAN 520) or FINAN 830.

Typically Offered
Fall, Spring

FINAN 643 - International Financial Management

Credits: 3

The international (cross-currency) aspects of financial management. Topics include currency markets and exchange rate determination, parity conditions, foreign exchange exposure and management, and valuation of international projects.

Repeat for Credit
N

Requisites
Prerequisite: (FINAN 510 and FINAN 520) or FINAN 815.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

FINAN 653 - Security and Portfolio Analysis

Credits: 3

The analysis and valuation of securities and the management of investment portfolios. Students analyze the composition of, make buy/sell recommendations for, and evaluate the performance of an actual portfolio.

Repeat for Credit
N

Requisites
Prerequisite: (FINAN 510 and FINAN 520) or FINAN 815.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 654 - Derivative Securities and Markets

Credits: 3

Structure and operation of markets for futures, swaps, options, synthetic options, and futures on options. Valuation of futures contracts and options. Applications of derivatives to hedging and speculating strategies.

Repeat for Credit
N

Requisites
Prerequisite: (FINAN 510 and FINAN 520) or FINAN 815.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 655 - Advanced Portfolio Management

Credits: 3

Provides students the background knowledge in portfolio management. This will include learning about: investment mix and policy, investment objectives, differing asset allocations for individuals and institutions, and balancing risk and performance.

Repeat for Credit
N

Requisites
Prerequisites: FINAN 510, FINAN 520, and acceptance to the Financial Analyst Track

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FINAN 661 - Professional Financial Planning

Credits: 3

A study of the principles and practices of professional financial planning using an integrated planning model. Topics include the planning environment, concepts, tax management, asset acquisition and management, credit management, risk management, investments, retirement planning, and estate planning. Contemporary applications, professional opportunities, and legal/ethical standards are emphasized.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 510 and FINAN 520.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 663 - Mergers and Acquisition

Credits: 3

Presents the theories and empirical evidence on mergers, acquisitions, and restructuring, and analyzes the effects of various policy options on stock values of acquirer and target companies.

Repeat for Credit
N

Requisites
Prerequisites: FINAN 575, FINAN 623, and acceptance to Financial Analyst Track.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 675 - Cases in Finance

Credits: 3

Capstone course in finance utilizing real world cases to integrate and apply financial concepts and theories, with emphasis on analytical and written and oral communication skills.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 575, and senior level students admitted in a College of Business Administration degree track or graduate standing.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

FINAN 715 - Foundations of Finance

Credits: 3

Advanced financial concepts and tools with emphasis on corporate valuation. Topics include risk and return, valuation techniques, capital budgeting, capital structure, options and futures, real options, and financial risk management.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 810.

Typically Offered
Spring

FINAN 798 - Special Topics in Finance

Credits: 1-9

Selected projects appropriate to the student's program of study.

Repeat for Credit
N

Typically Offered
Fall, Spring

FINAN 820 - Advanced International Financial Management

Credits: 3

A study of the international dimensions of corporate financial management with an applied orientation.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 715.

Typically Offered
Spring

FINAN 830 - Financial Market Theory

Credits: 3

Development and analysis of conceptual framework for understanding (1) the functions performed by financial markets and their associated institutional arrangements, and (2) the contractual claims in transferring savings among business, household, and government participants in the economic system.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 715 or (FINAN 450 and ACCTG 433)

Typically Offered
Fall

FINAN 840 - Entrepreneurial Finance

Credits: 3

This course will provide potential entrepreneurs a sufficient knowledge of applied finance needed to start and run an entrepreneurial business. Concepts covered will include the basic paradigms of finance such as risk and portfolio diversification. Discussions of the accounting environment of a small business and how the financial conditions can be analyzed will also be included. Finally, the course will focus on the financial skills a beginning entrepreneur will need to know to operate a small business, such as valuation, short-term capital management, financing decisions, and the exit strategies available to such enterprises.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 815.

Typically Offered
On sufficient demand

FINAN 890 - Seminar in Finance

Credits: 3

In-depth study of selected contemporary issues in finance.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 815.

Typically Offered
On sufficient demand

FINAN 898 - Advanced Problems in Finance

Credits: 0-18

Independent study of selected advanced topic(s) in finance.

Note
Consent of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 110 - Introduction to Public Health

Credits: 3

This is an introductory survey course designed to provide a history of public health, an overview of the five core disciplines (epidemiology, biostatistics, environmental health, social and behavioral health, and health policy and management), and information about career options in public health. Using these introductory materials as a foundation, students will investigate and analyze contemporary issues in public health such as bioterrorism, threats to the nation's food supply, the importance of health promoting behaviors in the prevention of disease, burden and distribution of infectious diseases on a global population, and the role of public health disaster preparedness and management.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
DMP 110, KIN 230

K-State 8
Global Issues and Perspectives
Social Sciences

FNDH 115 - Introduction to Health and Nutrition Professions

Credits: 3

An interdisciplinary introductory course that covers foundational concepts needed by all health and nutrition professions. Topics include a healthcare system overview, health services financing, interprofessional health care practice, professional licensure/credentialing/scope of practice, a survey of health professions, the intersection between healthcare and public health program/policy, and professional topics (ethics, interpersonal skills, cultural competency, critical thinking, and evidence-based practice).

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

FNDH 120 - Introduction to Athletic Training

Credits: 2

Introduction to athletic training for first year athletic training majors. Emphasis will be on sports medicine team, legal concerns, pre-participation physicals, basic principles of injury prevention, policies and procedures.

Note
Students must be concurrent enrolled in FNDH 121.

Repeat for Credit
N

Requisites
Prerequisite: Athletic training majors only, and concurrent

enrollment in FNDH 121.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

FNDH 121 - Introduction to Athletic Training Lab

Credits: 1

Introduction to athletic training for first year athletic training majors. Students will be required to complete a competencies skill list with a passing grade. Clinical hours in the athletic training room will give the student the opportunity to use the knowledge, skills, and techniques learned in this course.

Note
The student must complete clinical hours that do not count toward their practicum requirements, but are required for application to the professional phase of the athletic training education program. Students must be concurrent enrolled in FNDH 120.

Repeat for Credit
N

Requisites
Prerequisite: Athletic training majors only, and concurrent enrollment in FNDH 120.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

FNDH 130 - Careers in Nutrition and Dietetics

Credits: 1

An introduction to career opportunities in the field of nutrition and dietetics with emphasis on academic preparation, acquisition of professional credentials, and career laddering. Guest speakers from various areas of professional practice will supplement lectures and student assignments.

Repeat for Credit
N

Typically Offered
Fall

FNDH 132 - Basic Nutrition

Credits: 3

Concepts of human nutrition applied to personal food choices and health.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 220 - Care and Prevention of Athletic Injuries

Credits: 3

Principles and practices of treatment, taping, and care of minor athletic injuries.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 252 - Personal Wellness

Credits: 3

Impact of the effect of personal actions on lifelong wellness. Practical methods of assessing, maintaining, and improving behaviors to reduce the risk of illness and disability. Emphasis on developing skills to make informed, responsible health decisions.

Repeat for Credit
N

Typically Offered

Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

FNDH 300 - Dietetics ServSafe Manager Certification

Credits: 0

Supports student completion of ServSafe Manager online certification exam (National Restaurant Association) which is required for enrollment in FNDH 342. Course is credit/no credit. Credit is earned by uploading ServSafe Manager certification card. Students will register and pay for the ServSafe online exam through the National Restaurant Association https://www.servsafe.com/

Note
ServSafe Manager Certification is required for enrollment in FNDH 342.

Repeat for Credit
N

Requisites
Prerequisite: FNDH majors or instructor permission

Typically Offered
Fall, Spring, Summer

FNDH 301 - Food Trends, Legislation, and Regulation

Credits: 3

Current trends in market forms, packaging, and utilization of various foods. Food laws, regulation, labeling, additives, and residues.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 311 - Health Promotion and Behavior

Credits: 3

Designed to provide students with skills for application to health behavior and health promotion within public health settings. Emphasis on understanding health behavior theories and applying theories to health promotion efforts in public health.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230 OR FNDH 115.

Typically Offered
Spring

FNDH 313 - Science of Food

Credits: 4

Chemical, physical, sensory, and nutritional properties of food related to processes used in food preparation.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 321 - Medical Documentation

Credits: 2

This course is to prepare students with the knowledge of medical nomenclature related to human systems, diseases, and scientific concepts for applications of electronic medical documentation (Electronic Medical Records; EMR) and scientific communication.

Repeat for Credit
N

Typically Offered
Fall, Spring

FNDH 340 - Food and Health: Safety, Allergies and Intolerances

Credits: 3

An overview of the food system as it relates to the field of dietetics, focusing on issues that impact the quality, safety, accessibility, and sustainability of food. The course includes the systems approach, food safety principles, food allergy/intolerances principles, food contamination, religious issues, and related government regulations. This course will cover the following topics: food safety, food allergies and intolerances, sustainability, religious and cultural issues that affect food safety and health. Specific applications of these topics will be made for the dietetics profession (institutions, health care settings, grocery stores, etc.)

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

FNDH 355 - Rehabilitation and Exercise Modification Techniques I

Credits: 3

This course will cover the fundamental aspects of tactical strength and conditioning, and injury prevention techniques that occur during physical activity.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor approval required.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

FNDH 400 - Human Nutrition

Credits: 3

Nutrients, their function, metabolism, and relation to health and disease: the digestion, absorption, transport, utilization, and storage of nutrients in humans.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 or CHM 210; BIOL 198.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 442 - Management in Dietetics I

Credits: 4

Application and principles of food production and management that evaluate the system from inputs through transformation to outputs. Includes aspects of planning, control, outcomes, safety, communication and decision making.

Note
Students are required to find a food production facility for lab work and need approval from the instructor prior to the first day of class. Students are required to pass the ServSafe Managers exam by the end of the first week in order to complete labs for the semester. Will spend approximately 2-4 hours per week in lab.

Repeat for Credit
N

Requisites
Corequisite: FNDH 313

Typically Offered
Fall, Spring

FNDH 450 - Nutritional Assessment

Credits: 2

Methods of nutritional assessment in humans to evaluate dietary intake and body composition; use of biologic markers of human nutritional status.

Repeat for Credit

N

Requisites
Prerequisite: FNDH 132 and sophomore standing.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

FNDH 455 - Rehabilitation and Exercise Modification Techniques II

Credits: 3

This course is designed to provide an academic platform to apply and enhance knowledge and skills in rehabilitation techniques for humans. Focus is on applying progressive resistive exercise programs for athletes who are engaged in reconditioning and rehabilitation programs.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 355.

Typically Offered
Summer

FNDH 490 - Practicum in Clinical Dietetics

Credits: 2

Through a series of case studies and projects, this course introduces the student dietitian to the basics of the practice of clinical dietetics including review of the medical record, nutritional assessment and documentation of medical nutrition therapy in the medical record. Students gain practical experience by completing shadowing experiences with a dietitian in clinical practice.

Repeat for Credit
N

Typically Offered
Spring

FNDH 499 - Problems in Human Nutrition

Credits: 1-18

Supervised individual project to study current topics or participation in research.

Repeat for Credit
Y

Requisites
Prerequisite: Six hours in FNDH and consent of instructor.

Typically Offered
Fall, Spring, Summer

FNDH 510 - Life Span Nutrition

Credits: 2

Physiological and environmental influences on nutritional requirements; nutritional problems and eating patterns of age groups throughout the life cycle.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 400 and FNDH 450.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

FNDH 515 - Counseling Strategies in Dietetic Practice

Credits: 3

Application of interviewing, counseling, and educational techniques in dietetics, including individual and group methods.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 450

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

FNDH 516 - Communication Competencies in Dietetics Practice

Credits: 1

Assessment of audiences and development of effective food/nutrition messages in community settings.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 515 or concurrent enrollment.

Typically Offered
Spring, Summer

K-State 8
Social Sciences

FNDH 517 - Communication Competencies in Dietetics Practicum

Credits: 1

Application of principles learned in FNDH 516 Communication Competencies in Dietetics Practice to the development, implementation, and evaluation of a community project under the guidance of a community mentor.

Repeat for Credit
N

Requisites
Prerequisite: Admission into the coordinated program in dietetics; concurrent enrollment in FNDH 516 and FNDH 521.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

FNDH 519 - Introduction to Clinical Dietetics

Credits: 1

Preparation for entrance into the clinical supervised practice experience. Review of medical record content; current practice protocols in clinical dietetics; practice case studies.

Note
Four day workshop.

Repeat for Credit
N

Requisites
Prerequisite: Admission into the coordinated program in dietetics; concurrent enrollment in FNDH 521.

Typically Offered
Spring

FNDH 520 - Applied Clinical Dietetics

Credits: 3

Application of clinical nutrition principles through case studies, independent research, discussion, groups, and oral presentations. Case studies will focus on medical nutrition therapy and education of persons throughout the life cycle and nutrition intervention for individuals with multiple disease states in various healthcare settings.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the coordinated program in dietetics.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

FNDH 521 - Clinical Dietetic Practicum

Credits: 8

Supervised clinical/community experience in the nutritional care of patients/clients. Practicum experiences are arranged with participating healthcare facilities.

Repeat for Credit
N

Requisites
Prerequisite: Must be taken concurrent with FNDH 520.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

FNDH 530 - Nutrition Education in Extension

Credits: 1

The process of and strategies for providing nutrition education outreach to diverse community audiences, including those with limited resources.

Repeat for Credit
N

Requisites
Prerequisite: Any college-level nutrition course and junior or senior standing.

Typically Offered
Spring

FNDH 535 - Energy Balance

Credits: 2

This course will cover metabolic principles as they relate to energy intake (diet) and expenditure (exercise). Specific topics will include: obesity, anorexia/bulimia, bioenergetics, substrate selection/regulation (especially exercise and diabetes), body composition; methodology to assess each; and metabolism related disease.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 400 or KIN 335 or concurrent enrollment in either.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 540 - Nutrition Education and Program Planning

Credits: 2

Education strategies for communicating evidence-based health information and planning strategies for developing community programs.

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing

Typically Offered
Fall, Spring

FNDH 542 - Management in Dietetics II

Credits: 2

Discussion of principles used to manage resources in dietetics practice. Topics include financial management, human resources, technology, benchmarking, and quality assurance.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 442

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FNDH 543 - Management in Dietetics III

Credits: 2

Administration and leadership in dietetic practice. Discussion of current topics and their application to the various practice areas of dietetics.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 542

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

FNDH 551 - Evaluation of Athletic Injuries of the Extremities

Credits: 3

This course is designed to familiarize the athletic training student with the principles of orthopedic assessment and to apply these principles to specific regions of the body. Knowledge gained in this course may be applicable to other individuals interested in health related professions which require systematic examination of the body.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 220 with a C or better. Corequisite: C or better in KIN 360, OR BIOL 441 and 442, OR 5 hours of anatomy and physiology.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 552 - Emergency Procedures and Evaluation of Core Athletic Injuries

Credits: 3

Familiarize the athletic training student with the procedures of emergency management of athletic injuries and to apply these procedures both on the field and off the field. Familiarized with the principles of orthopedic and emergency medical assessment and to apply these principles to the core of the body. Knowledge gained may be applicable to other individuals interested in health related professions which require systematic examination of the body in emergency settings.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 220 with a B or better and a C or better in KIN 360, BIOL 340 and BIOL 442, or 8 hours of Anatomy and Physiology transfer credit.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 553 - Pharmacology in Athletic Training

Credits: 2

Study of medications commonly encountered in the practice of athletic training. Includes categories of drugs, generic and trade names of common drugs, the use, effects and precautions for common drugs and drug-interactions. Focuses on how various drugs affect the patient response to activity, exercise and other therapeutic interventions.

Repeat for Credit
N

Requisites
Prerequisite: C or better in KIN 360, BIOL 441 and BIOL 442 or 8 hours of Anatomy and Physiology transfer credit.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

FNDH 554 - General Medical Conditions in the Athlete

Credits: 2

Recognition, evaluation, management, and prevention of the most common medical conditions that affect athletic participation. Emphasis placed on the appropriate history, physical exam, indications for referral, and treatment for each condition.

Repeat for Credit
N

Requisites
Prerequisite: C or better in KIN 360, BIOL 441 and BIOL 442, or 8 hours of Anatomy and Physiology transfer credit; FNDH 551 and FNDH 552.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

FNDH 555 - Therapeutic Modalities in Athletic Training

Credits: 3

The theory and application of the various energy systems used in the treatment of athletic injuries. Practical experiences will be emphasized.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 551, FNDH 220 with a B or better. Corequisite: FNDH 552.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 556 - Rehabilitation and Conditioning for Athletic Injuries

Credits: 3

A study of applied rehabilitation and conditioning techniques used by athletic trainers.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 551.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 557 - Administration of Athletic Training Programs

Credits: 3

A study of issues affecting athletic trainers in their roles as administrators in the areas of role delineation, budget designs, legal aspects of sport, facility design, and drug testing and drug education.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 556 and senior standing.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

FNDH 558 - Advanced Athletic Training Techniques

Credits: 3

This course will provide a deeper application of athletic training techniques in specific orthopedic related areas. Students will have a hands-on and lab component as it relates to casting, bracing, Kinesiotaping, and manual therapy techniques. Upon completion of this course, students will be eligible to complete the certification examinations to obtain credentialing as an ASOP Orthopedic Physician Extender.

Note
This course will be conducted as a hands-on lab and lecture. The primary focus is skill acquisition and application.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 551. Corequisite: FNDH 552.

Typically Offered
Spring

FNDH 561 - Management in Dietetics Practicum

Credits: 8

Supervised practice experience in the application of management principles in foodservice operations or other dietetics practice settings.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to Coordinated Program; FNDH 560 or concurrent enrollment.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

FNDH 562 - Management in Dietetics Practicum Recitation

Credits: 1

Focused discussion of significant occurrences during the supervised practice experience and the application of management principles in foodservice operations or other dietetic practice settings. Behavior-based assessment and progression is utilized to encourage self-development and entry-level competence in dietetics practice.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the coordinated program in dietetics; concurrent enrollment in FNDH 561.

Typically Offered
Fall

FNDH 570 - Introduction to Research in Dietetics Practice

Credits: 1

Introduction to basic research design in dietetics with application of the research to evidenced-based practice using the Evidence Analysis Library of the Academy of Nutrition and Dietetics.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or instructor permission.

Typically Offered
Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

FNDH 575 - Research in Health Sciences

Credits: 1

Provide initial instruction on how to locate, understand, and evaluate the research literature in the student's area of interest in health science. A range of health research methods will be covered, and studies about treatment effectiveness. Student learning outcomes will include various forms of communication.

Note
Required by all undergraduate FNDH students

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing.

Typically Offered
Fall, Spring

FNDH 583 - Practicum I in Athletic Training

Credits: 1-4

A supervised, clinical experience at approved clinical settings. The athletic training student will apply principles taught in FNDH 220.

Note
Taken second year, first semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FNDH 584 - Practicum II in Athletic Training

Credits: 1-4

A supervised, clinical experience at approved clinical settings. The athletic training student will apply principles taught in the classroom and practiced in the lab throughout the curriculum program.

Note
Taken second year, second semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FNDH 585 - Practicum III in Athletic Training

Credits: 1-4

A supervised clinical experience at approved clinical settings. The athletic training student will apply principles taught in the classroom and practiced in the lab throughout the curriculum program.

Note
Taken third year, first semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FNDH 586 - Practicum IV in Athletic Training

Credits: 1-4

A supervised, clinical experience at approved clinical settings. The athletic training student will apply principles taught in the classroom and practiced in the lab throughout the curriculum program.

Note
Taken third year, second semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

FNDH 587 - Practicum V in Athletic Training

Credits: 1-4

A supervised, clinical experience at approved clinical settings. The athletic training student will apply principles taught in the classroom and practiced in the lab throughout the curriculum program.

Note
Taken fourth year, first semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

FNDH 588 - Practicum VI in Athletic Training

Credits: 1-4

A supervised, clinical experience at approved clinical settings. The athletic training student will apply principles taught in the classroom and practiced in the lab throughout the curriculum program.

Note
Taken fourth year, second semester.

Repeat for Credit
N

Requisites
Prerequisite: Instructor approval.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

FNDH 589 - Professional Preparation for Athletic Training

Credits: 0-1

This course will provide a comprehensive review of athletic training knowledge in specific domain areas. Students will have a seminar component to review and apply knowledge across the 5 domain areas of athletic training. The domain areas include: injury/illness prevention and wellness protection; clinical evaluation and diagnosis; immediate and emergency care; treatment and rehabilitation; organizational and professional health and well-being.

Note
Upon completion of this course, students will be eligible to complete the Board of Certification examination to obtain the license of Certified Athletic Trainer.

Repeat for Credit
Y

Requisites
Prerequisite: Senior Standing

Typically Offered
Fall, Spring

FNDH 597 - Research Experience in Food, Nutrition, Dietetics and Health

Credits: 0-3

Exposure to and assisting with current research projects in Food, Nutrition, Dietetics and Health.

Note
Maximum of 3 credit hours applicable toward a degree. School consent.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 599 - Topics in Human Nutrition

Credits: 1-3

Topics in Human Nutrition

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of instructor.

Typically Offered
On sufficient demand

FNDH 600 - Public Health Nutrition

Credits: 3

Public health nutrition issues for various segments of the population; nutritional components of community assessment; program planning and evaluation; and policy issues pertaining to the nutritional status of the population.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 450 or FNDH 400 and junior standing.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Social Sciences

FNDH 620 - Nutrient Metabolism

Credits: 3

Basic concepts of the mechanisms of actions, interactions, and the processes of cellular assimilation and utilization of nutrients in humans. Emphasis on the coordinated control of nutrient utilization among the major organs.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 400; BIOL 441 and BIOL 442 or KIN 360; and BIOCH 265 or BIOCH 521, or CHM 550 with concurrent enrollment in BIOCH 521.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

FNDH 631 - Clinical Nutrition I

Credits: 3

First course of a two semester study of the application of nutrition principles in disease; includes physiological basis of nutritional care, effects of disease on nutrient metabolism, medical nutrition therapy, in-class team diagnoses presentations, and nutrition counseling.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 450 and FNDH 400.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

FNDH 632 - Clinical Nutrition II

Credits: 3

Continuation of the application of nutrition principles in disease; includes physiological and biochemical basis of nutritional care, effects of disease on nutrient metabolism, medical nutrition therapy for critical care needs, standardized language in advanced professional nutrition diagnoses and care of selected diseases.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 620 and FNDH 631.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

FNDH 635 - Sports Nutrition

Credits: 3

The interrelationships among diet, nutrition, and performance. Topics covered include nutrient metabolism during exercise training and performance, nutrition and training periodization, demands of sport training, supplements and ergogenic aids, and nutrients of concern for athletes. There is a focus on athletes/sport, but topics also include normal exercising individuals who have goals related to weight loss, weight gain, or performance and competition.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 400 OR KIN 335 with a grade of C or higher; and KIN 360 OR BIOL 441 and 442

Typically Offered
Fall

FNDH 643 - Food Writing

Credits: 3

Understanding and appreciating how to communicate effectively in writing about food and food-related topics. Hands-on experience in research and writing for various audiences and types of publications.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 200.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Historical Perspectives

FNDH 645 - Capstone in Dietetics

Credits: 1

Culminating experience for dietetic students with a focus on professional engagement, governance of dietetics profession, and professionalism including self-advocacy, civil debate, and advocacy for nutrition and dietetics policies.

Note
Restricted to dietetics majors accepted into the DPD or instructor permission

Repeat for Credit
N

Requisites
Prerequisite: Accepted into DPD or instructor permission

Typically Offered
Spring

FNDH 650 - Practicum in Food, Nutrition, Dietetics and Health

Credits: 1-6

Supervised professional field experience.

Note
School consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 653 - Pharmacology

Credits: 3

This course is designed to bring together the body of knowledge regarding the study of medications commonly encountered in the profession of athletic training. Includes categories of drugs, generic and trade names of common drugs, the use, effects and precautions for common drugs and drug-interactions. Focuses on how various drugs affect the patient response to activity, exercise and other therapeutic interventions.

Note
100% Lecture

Repeat for Credit
N

Requisites
Admission into the ATh Tr Program or Instructors Approval

Typically Offered
Fall

FNDH 654 - Pathophysiology and Clinical Evaluation

Credits: 3

Designed to bring together the body of knowledge regarding the manifestation, diagnosis, and treatment of human illness, disease, and injury and the resulting physiological responses that occur during the lifespan. Content will build on anatomy, physiology and chemistry content from previous courses.

Repeat for Credit
N

Requisites
Prerequisite: Anatomy & Physiology (5 credit hours completed) or equivalent; CHM 110/CHM 111 or CHM 210; Junior standing or Instructor Approval.

Typically Offered
Fall, Spring, Summer

FNDH 660 - Nutrition and Food Behavior

Credits: 3

Focus on the physiological, environmental, cultural, and economic factors that influence the use of food. Identification of appropriate methodology to study these factors as well as programs to modify food behavior.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 or SOCIO 211 or ANTH 200; and FNDH 400.

Typically Offered
Fall-Even Years

FNDH 700 - Global Health and Nutrition

Credits: 3

This course is designed to examine major global nutrition and health challenges, programs and policies. Students will become acquainted with the epidemiology of nutritional disease in developed and developing countries. Programs and resources available to combat malnutrition will be evaluated. It will help students analyze current and emerging global health priorities, including emerging infectious diseases, newer nutritional problems, health inequity, health systems reforms, and major global initiatives for disease prevention and health promotion. Designed for advanced undergraduate and graduate students in health related field, including biological or social sciences.

Repeat for Credit
N

Requisites
Prerequisite: Graduate level classification, or undergraduate student with instructor permission.

Typically Offered
Spring

FNDH 702 - Nutrition in Developing Countries

Credits: 3

Nutritional problems in developing countries, including an analysis of factors which contribute to malnutrition, effects of undernutrition, methods for assessing nutritional status, and interventions to combat nutrition problems.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 510.

Typically Offered
Fall

FNDH 703 - Food Across Cultures and Countries

Credits: 3

Exploration of food across cultures in the U.S. and the world with emphasis on the affects of geographic, social, economic, religious, and other issues.

Note
Lecture.

Repeat for Credit
N

Requisites
Recommended prerequisite: Junior, Senior, or Graduate Standing.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

FNDH 706 - Nutritional Immunology

Credits: 3

Principles and issues related to nutrition and immunology. Impact of nutrients and nutritional status on immune responses. Impact of disease states on nutritional status.

Repeat for Credit
N

Typically Offered
Fall-Even Years

FNDH 709 - Clinical Applications of Human Anatomy

Credits: 3

To bring together the body of knowledge from human anatomy and biomechanics to the clinical application, palpations, and testing of human anatomy. Provides the opportunity to apply knowledge of anatomy to a structural

level allowing for palpating, locating, and incorporating the findings into their diagnosis.

Repeat for Credit
N

Requisites
Pre-Requisite: Admission to the MS in Athletic Training; 8 hours of Anatomy and Physiology, KIN 360 OR BIOL 441 AND BIOL 442.

Typically Offered
Summer

FNDH 710 - Foundations of Patient Management

Credits: 2

Introduction to the role of the athletic trainer in the healthcare system and contemporary healthcare competencies that support expected standards of care.

Repeat for Credit
N

Typically Offered
Summer

FNDH 718 - Physical Health and Aging

Credits: 3

Focus is on the physiological theories of aging, the relationship between normal aging processes, and the major chronic and acute diseases of the elderly, and community health promotion/maintenance programs for older adults.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and senior standing.

Typically Offered
Spring-Odd Years

FNDH 720 - Administration of Health Care Organizations

Credits: 3

Comprehensive review of current health care institutions and their response to the economic, social/ethical, political/legal, technological, and ecological environments.

Note
Three hours lecture.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
MPH 720

FNDH 726 - Nutrition and Wellness

Credits: 3

Epidemiology and pathophysiology of chronic disease related to nutrition (e.g., obesity, cardiovascular disease, osteoporosis, hypertension, diabetes, cancer). Nutritional risk and protective factors will be examined as they relate to public health and individual nutrition.

Repeat for Credit
N

Requisites
Prerequisite: Course in basic nutrition and statistics at the undergraduate level.

Typically Offered
Spring

FNDH 729 - Nutritional Oncology

Credits: 3

Students will gain understanding of basic cancer biology and methodology used to study nutrition and cancer relationships. Using current research as a basis, the role of nutrition in specific cancers will be explored. Students will learn about sources of information for cancer prevention programs, and how to apply this information to clinical patient management.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the Masters in Dietetics

program through the Great Plains Interactive Distance Education Alliance (GPIDEA).

Typically Offered
Spring-Even Years

FNDH 731 - Advanced Diabetes Management

Credits: 3

The course is designed for students to gain a comprehensive understanding of the classification, presentation, and diagnosis of diabetes and pre-diabetes. The course will explore etiology, pathophysiology, diagnostic tests, clinical management, chronic complications and co-morbidities, and emerging technologies.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 631 or RDN credential or approval of instructor.

Typically Offered
Summer

FNDH 735 - Advanced Energy Balance

Credits: 3

Lifestyle, metabolic, and endocrine factors affecting energy balance and the development of obesity. Research methods to assess and apply energy balance data will also be discussed.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 620 or FNDH 635.

Typically Offered
Spring-Even Years

FNDH 750 - Fundamentals of Public Health and Food Safety

Credits: 3

Organization and function of food inspection services; principles of disease transmission; diseases transmitted to humans through the food chain.

Repeat for Credit
N

Requisites
Recommended Prerequisite: One class in the microbiology field (BIOL 255 OR FDSCI 600) or instructor consent.

Typically Offered
Fall

FNDH 752 - Emergency Management in Athletic Training

Credits: 3

This course is designed to be a fast paced review of introduction to athletic training and care and prevention of athletic training injuries. This course will also bring together the body of knowledge regarding emergency management while applying it to the profession of athletic training.

Note
100% Lecture

Repeat for Credit
N

Requisites
Prerequisite: Admission into the MS Athletic Training Program or Instructors approval

Typically Offered
Summer

FNDH 755 - Clinical Applications of Neurological Function

Credits: 3

Scientific approach to advance knowledge related to the assessment of structured movement of the human body in relationship to neurological function and pathologies. Cognitive (knowledge), psychomotor (hands-on) learning, affective, and clinical/quantitative skills with a heavy emphasis on neuroanatomy to stress clinical application.

Repeat for Credit
N

Requisites

Prerequisite: Admission into the MS Athletic Training Program or Instructors approval

Typically Offered
Summer

FNDH 760 - Applied Dietetics

Credits: 1-6

Application of dietetics/nutrition principles through workshops, case studies, independent research, discussion, and simulation. Behavior-based assessment and progression is utilized to encourage self-development and entry-level competence in dietetics practice. A variety of practice areas will be covered.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment restricted to those in Dietetics Internship program; must be taken concurrently with FNDH 860 Dietetics Practicum

Typically Offered
Fall, Spring, Summer

FNDH 761 - Applied Management in Dietetics

Credits: 3

Application of management principles in foodservice operations or other dietetic practice settings through case studies, independent research, discussion, and projects. Behavior-based assessment and progression is utilized to encourage self-development and entry-level competence in dietetics practice. Includes focused discussion of significant occurrences during the Dietetic Internship experience.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment restricted to those in Dietetics Internship program. Corequisite: FNDH 860 Dietetics Practicum

Typically Offered
Fall

FNDH 762 - Applied Clinical Dietetics

Credits: 2

Application will focus on medical nutrition therapy and education of persons throughout the life cycle and nutrition intervention for individuals with multiple disease states in various healthcare settings. Behavior-based assessment and progression is utilized to encourage self-development and entry-level competence in dietetics practice. Includes focused discussion of significant occurrences during the Dietetic Internship experience.

Repeat for Credit
N

Requisites
Prerequisite: Enrollment restricted to those in Dietetics Internship program. Corequisite: FNDH 860 Dietetics Practicum

Typically Offered
Spring

FNDH 775 - Research in Health Sciences

Credits: 3

Students in this graduate course will review the role and importance of the scientific method in health professions, especially those with clinical application. The rationale and role of evidence-based practice and research will be reviewed, and research language and core concepts will be discussed. Students will demonstrate their ability to ask research questions and translate questions into search strategies for finding evidence. The purpose of this course is to provide students the opportunity to demonstrate their capacity to locate, understand, and evaluate the research literature in the student's area of interest. The expectation is to demonstrate understanding of research methodology the ability to critically evaluate research literature. Students will demonstrate knowledge of quantitative and qualitative research methods, types of data, how data are described and how biostatistics are used to provide meaning to research data. A range of health research methods will be covered, and studies about treatment effectiveness (clinical trials and systematic reviews), as well as qualitative approaches will be discussed.

Repeat for Credit
N

Typically Offered
Spring

FNDH 780 - Problems in Food, Nutrition, Dietetics and Health

Credits: 1-6

Supervised individual project to study current issues.

Note
School consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 782 - Topics in Food, Nutrition, Dietetics and Health

Credits: 1-6

Supervised individual project to study current issues.

Note
School consent

Repeat for Credit
Y

Typically Offered
On sufficient demand

FNDH 799 - Foundations of Therapeutic Interventions

Credits: 3

Provide students with the foundational knowledge of how to integrate the basic sciences, exercise physiology, biomechanical, and injury prevention strategies into a well-planned and evidence based patient care plan. Focused theory and application of therapeutic modalities, applied rehabilitation, and conditioning techniques used in the profession of athletic training.

Repeat for Credit
N

Typically Offered
Summer

FNDH 800 - Nutrition Education and Communication

Credits: 3

Apply principles of communication and learning technologies to nutrition education research and practice.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 510, FNDH 515, and a statistics course with a grade of C or better

Typically Offered
Spring

FNDH 802 - Clinical Therapeutic Interventions I- Functional Therapeutic Interventions

Credits: 3

Application of treatment strategies for return to activity, strength and conditioning techniques and prescription, movement strategy and preventative care and ergonomic assessment. Use of biometrics, and physiological data for intervention prescription. This course is a study of applied rehabilitation and conditioning techniques used in the profession of athletic training.

Note
50% Lec, 50% Lab

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructors Approval

Typically Offered
Fall

FNDH 803 - Clinical Therapeutic Interventions II- Extremity Interventions

Credits: 3

Theory and application of the various treatment strategies used in the treatment of the upper extremity and lower

extremity.

Note
50% Lec, 50% Lab

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructors Approval

Typically Offered
Spring

FNDH 804 - Clinical Therapeutic Interventions III- Pharmacology, Nutrition, and Behavior Modification

Credits: 2

Inform students of the basic principles pertaining to and the reasoning behind the inclusion of pharmacological agents and nutrition as part of a patient's holistic plan of care. Emphasis placed on the athletic trainer's role as educator and part of an interdisciplinary team to ensure behavior modification and compliance.

Repeat for Credit
N

Typically Offered
Spring

FNDH 810 - Advanced Macronutrient Metabolism

Credits: 5

Dietary, metabolic, and endocrine factors regulating food intake and selection, and the absorption, function, metabolism, and interrelationships of macronutrients under varying nutritional conditions, with emphasis on recent advances in macronutrient nutrition.

Repeat for Credit
Y

Requisites
Prerequisite: BIOCH 521 and FNDH 620.

Typically Offered
Fall-Even Years

FNDH 812 - Advanced Micronutrient Metabolism

Credits: 3

Nutritional roles and metabolism of vitamins and minerals. Functions, biological availability, hormonal regulation, requirements, deficiency and toxicity signs, and interrelations with other nutrients.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 810.

Typically Offered
Spring-Odd Years

FNDH 815 - Molecular Basis of Nutrient Function

Credits: 3

The course is designed to explore the role that certain nutrients have at the gene and molecular levels in terms of their mechanism of action. The physiological consequences of nutrient gene-interaction from a tissue, organ and organism level, as well as the subcellular levels, are to be considered.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 620 and BIOL 450.

Typically Offered
Spring

FNDH 820 - Functional Foods for Chronic Disease Prevention

Credits: 3

Integrate and evaluate the regulatory principles, food science, nutrient science and nutritional metabolism for the development of functional foods, nutraceuticals, and dietary supplements for chronic disease prevention.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 400, FNDH 313, BIOCH 521.

Typically Offered
Spring-Even Years

FNDH 821 - Clinical Evaluation I-Core Evaluation

Credits: 3

Application of clinical and functional injury evaluation procedures and techniques for the trunk, torso, abdomen, spine, and kinetic chain.

Note
50% Lec, 50% Lab

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructors Approval

Typically Offered
Fall

FNDH 822 - Clinical Evaluation II-Extremities

Credits: 3

Application of contemporary principles and practices of patient examination for formulation of a diagnosis and plan of care for patients with health conditions of the extremities that are commonly seen in athletic training practice.

Note
50% Lec, 50% Lab

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructors Approval

Typically Offered
Spring

FNDH 823 - Clinical Evaluation III- General Medical Conditions

Credits: 3

Meet outcomes and guidelines related to prevention, evaluation and management of medical conditions/disabilities. Obtain knowledge, skill and clinical decision-making to accurately assess and recognize general medical conditions, make appropriate referrals, and work as part of a health care team to implement plans for safe participation in physical activity and sport.

Repeat for Credit
N

Typically Offered
Summer

FNDH 838 - Advanced Clinical Dietetics

Credits: 3

An in-depth study of the pathophysiology of nutritional disease. Those functional disorders which result in nutritional disease or those nutritional diseases which affect physiological function will be explored. The emphasis will be in the following areas: nutritional assessment, endocrinology, metabolism, gastroenterology, and organ failure.

Note
Only available to distance students seeking a Masters in Dietetics through the Great Plains Program.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 630 or equivalent.

Typically Offered
Spring

FNDH 839 - Clinical Nutrition Support

Credits: 3

Specialized nutrition assessment and support. Review of energy expenditure and substrate utilization in specific disease states. Current methods for the initiation and management of enteral and parenteral nutrition therapy including access, metabolic and mechanical complications. Evaluation of nutrition support methodology in selected disease states.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the Masters in Dietetics program through the Great Plains Interactive Distance Education Alliance (GPIDEA).

Typically Offered
Spring

FNDH 840 - Public Health Practice

Credits: 3-6

Supervised field experience in an international, state, local, or district health agency or other appropriate health agency.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

Cross-listed
MPH 840

FNDH 842 - Advanced Nutrition: Nutrigenomics, Nutrigenetics, and Advanced Lipid Metabolism

Credits: 3

Fundamentals as how the macronutrients; fat, carbohydrates and protein act to regulate gene expression(nutrigenetics) and how an individuals genotype may alter an individuals macronutrient requirements (nutrigenetics) and influence phenotype with respect to chronic disease and human health.

Note
Only available to distance students seeking a Masters in Dietetics through the Great Plains Program.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 620 or consent of instructor.

Typically Offered
Fall, Spring

FNDH 844 - Nutritional Epidemiology

Credits: 3

Methods and issues involved in understanding and conducting studies on the relationship between human diet and disease.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 400 and STAT 702 or STAT 703.

Typically Offered
Spring-Even Years

FNDH 857 - Administration in Athletic Training

Credits: 3

This course is designed to bring together the body of knowledge regarding organization and administration while applying it to the profession of athletic training.

Note
100% Lecture

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructors Approval

Typically Offered
Summer

FNDH 858 - Durable Medical Equipment and Casting

Credits: 2

Application of contemporary principles and practices of how to select, fabricate, and/or customize prophylactic, assistive, and restrictive devices, materials, and techniques for incorporation into the plan of care, including the Durable medical equipment, Orthotic devices, Taping,

splinting, protective padding, and casting.

Note
50% Lec, 50% Lab

Repeat for Credit
N

Requisites
Prerequisite: Admission into the AthTr Program or Instructor Approval

Typically Offered
Fall

FNDH 859 - Nutrition: A Focus on Life Stages

Credits: 3

Nutritional needs throughout the life span including pregnancy, lactation, growth and aging. Approaches to nutrition education for different ages.

Note
Only available to distance students seeking a Masters in Dietetics through the Great Plains Program.

Repeat for Credit
Y

Requisites
Prerequisite: 3 hours undergraduate nutrition and 6 hours undergraduate natural sciences.

Typically Offered
Summer

FNDH 860 - Dietetics Practicum

Credits: 1-6

Application of dietetics/nutrition principles in a supervised practice experience within an approved setting. Practicum experiences are arranged with healthcare facilities, foodservice operations, private practice, community organizations, and other related partners.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment restricted to those in Dietetics Internship program.

Typically Offered
Fall, Spring, Summer

FNDH 862 - Maternal and Child Nutrition

Credits: 3

A critical examination of behavioral, physiological, and public health issues impacting dietary and nutritional factors that support normal growth and development. The course content focuses on the early stages of the life cycle: gestation, lactation, infancy, preschool, school age and adolescence. Topics include the fetal programming hypothesis, growth and nutritional requirements, breast and formula feeding of infants, infant weaning, and eating behaviors that lead to normal growth, growth faltering, and pediatric obesity.

Note
Only available to distance students seeking a Masters in Dietetics through the Great Plains Program.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 510 or equivalent.

Typically Offered
Summer

FNDH 875 - Pediatric Clinical Nutrition

Credits: 3

The physiological, biochemical and nutritional aspects of disease processes relevant to infants and children up to 18 years of age. Medical nutrition therapy for a variety of medical conditions found in this Population will be discussed including inborn errors of metabolism, food hypersensitivity, obesity, and diseases of the major organ systems.

Note
Only available to distance students seeking a Masters in Dietetics through the Great Plains Program.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 631 Clinical Nutrition I and FNDH

632 Clinical Nutrition II or equivalent.

Typically Offered
Fall

FNDH 880 - Professional Communication in FNDH

Credits: 1

Develop and deliver oral presentations, write for the profession, and communicate in a professional manner.

Repeat for Credit
Y

Typically Offered
Fall, Spring

FNDH 883 - Athletic Training Practicum I

Credits: 1

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum.

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructors Approval

Typically Offered
Fall

FNDH 884 - Athletic Training Practicum II

Credits: 1

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Spring

FNDH 885 - Athletic Training Practicum III

Credits: 1

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Summer

FNDH 886 - Athletic Training Practicum IV

Credits: 1

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Summer

FNDH 887 - Athletic Training Practicum V

Credits: 4

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Fall

FNDH 888 - Athletic Training Practicum VI

Credits: 4

Application of classroom principles in a supervised, clinical experience within an approved clinical setting.

Note
100% Practicum

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Spring

FNDH 889 - Research Experience in Athletic Training

Credits: 1

Evidence based research application for Athletic Training. To inform contemporary principles and clinical athletic training practices in a manner that uses evidence to inform clinical decisions.

Repeat for Credit
Y

Typically Offered
Fall

FNDH 891 - Environmental Scanning and Analysis of Current Issues in Dietetics

Credits: 3

Discussion of changes in the economic, social, ethical, political, legal, technological, and ecological environments in which dietitians practice. Implications of these changes for education, practice and research within the field with particular emphasis on the healthcare industry.

Repeat for Credit
Y

Typically Offered
Fall

FNDH 892 - Population Health in Sports Medicine

Credits: 3

An introduction for athletic trainers and other healthcare providers, to the benefits of using a population-based approach to injury and illness prevention as it relates to a physically active/athletic population and to explore opportunities for partnering with public health professionals on these initiatives.

Note
100% Lec

Repeat for Credit
N

Requisites
Prerequisite: Admission into the Athletic Training Program or Instructor Approval

Typically Offered
Fall

FNDH 896 - Financial Management and Cost Control in Dietetics

Credits: 3

This course provides an overview of the fundamental knowledge of financial management, managerial, accounting, and operational cost controls for dietetics professionals who work predominately in not-for-profit organizations. Topics include a review of managerial accounting concepts for not-for-profit organizations, value and risk analyses, budgeting, asset management franchising and management contractgs, cost-volume-profit analyses, and operational applications for financial performance.

Repeat for Credit
N

Requisites
Prerequisite: A basic financial or managerial accounting course

Typically Offered
Summer

FNDH 897 - Applications in Food, Nutrition, Dietetics and Health

Credits: 1-3

Independent study under supervision of graduate faculty member. Contact hours will meet Board of Regents guidelines for credit elected (1-3)

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 898 - Master's Report

Credits: 0-18

Survey in depth of the literature.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 899 - Master's Thesis

Credits: 1-8

Research in area of specialization.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FNDH 911 - Advanced Nutrition Topics: Contemporary Issues

Credits: 1-3

Contemporary concerns in health and disease from an advanced nutrition perspective.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 810 or instructor consent

Typically Offered
On sufficient demand

FNDH 913 - Eating Behavior

Credits: 2

Study of the theoretical and practical aspects of food choice. Impacts of social, economic, and political policies on food choice and impacts to global issues by individual food choices.

Repeat for Credit
N

Requisites
Prerequisite: One graduate course in nutrition, food science or psychology

Typically Offered
Spring

FNDH 980 - Graduate Seminar in Food, Nutrition, Dietetics and Health

Credits: 1

Advance the oral presentation and professional communication skills of Food, Nutrition, Dietetics and Health graduate students.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 880 Recommended Foundation: Successful completion of preliminary exam

Typically Offered
Spring

FNDH 995 - Grantsmanship and Publication

Credits: 3

Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 720 or a graduate level research methods course.

Typically Offered
Fall-Even Years

FNDH 999 - Doctoral Research

Credits: 1-18

Doctoral Research

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FOR 520 - Urban Forest Administration

Credits: 3

This course is a study of urban and community forest administration. It considers the urban forest ecosystem involving an in-depth look at ownerships. composition, distribution, benefits, values, and administrative operation. The policies and politics of successful administration will be emphasized.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: FOR 510.

Typically Offered
Spring

FOR 741 - Forestry Problems

Credits: 1-3

Work is offered in various fields of forestry.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FREN 001 - Orientation for Summer School Program

Credits: 0

Orientation for Summer School Program

Repeat for Credit
N

Typically Offered
Spring

FREN 101 - French I (Elementary French I)

Credits: 4

Develops basic language skills and cultural awareness to function in everyday situations in French-speaking communities, for students with little to no prior French experience. Conducted in French with practice in speaking, listening, reading, and writing.

Note
For students with no French experience, with a year of high school French, or with a semester of college French that was taken more than two years ago.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 102 - French II

Credits: 4

Continuation of French I, completion of basic presentation of the structure of French. Emphasis on spoken language.

Repeat for Credit
N

Requisites
Recommended Prerequisite: FREN 101 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 103 - Accelerated Beginning French

Credits: 5

Course covering material from French I and II in one semester. Listening, speaking, reading, and writing. Includes one hour lab per week in language laboratory or other language opportunities outside of class time.

Note
For students with one or two years of previous French instruction or advanced learners of other languages who desire a faster pace.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 201 - French III

Credits: 3

Continuation of French II, presentation of more advanced elements of the French language. Emphasis on spoken language.

Repeat for Credit
N

Requisites
Recommended Prerequisite: FREN 102 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 301 - French IV

Credits: 3

Continuation of French III, presentation of more advanced elements of the French language. Emphasis on spoken language.

Repeat for Credit
N

Requisites
Recommended Prerequisite: FREN 201 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 398 - Intermediate Studies in French

Credits: 1-6

Offered only to participants in study abroad programs.

Note
Prior consultation for approval is expected.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 501 - Readings in French

Credits: 3

Practice in reading a variety of literary, journalistic, and specialized texts.

Repeat for Credit
N

Requisites
Recommended Prerequisite: FREN 301 or equivalent.

Typically Offered
Fall or Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 503 - French Composition and Grammar

Credits: 3

Review in depth of the structure of the language. Intensive practice in written and conversational French.

Repeat for Credit
N

Requisites
Prerequisite: FREN 213 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 512 - French/Francophone Cinema

Credits: 3

The course consists of readings, written assignments, viewing, and discussion of French or Francophone films.

Note
For French credit, must be taken in French.

Repeat for Credit
Y

Requisites
Prerequisite: FREN 301 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 514 - Contemporary France

Credits: 3

Introduction to French culture with special emphasis on social and historical developments since World War II.

Repeat for Credit
N

Requisites
Prerequisite: FREN 213 or equivalent.

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Historical Perspectives

FREN 515 - History of French Culture

Credits: 3

A survey of French culture from the Middle Ages to the present, including but not limited to, developments in art and architecture, music, and literature.

Repeat for Credit
N

Requisites
Prerequisite: FREN 213 or equivalent.

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Historical Perspectives

FREN 517 - French for the Professions

Credits: 3

Development of French language skills useful in diverse professional situations including specialized terminology, conversation and discussion, and translation. May include agriculture, tourism, fashion, international relations, and business.

Repeat for Credit
N

Requisites
Recommended Prerequisite: FREN 301 or equivalent.

Typically Offered
Fall or Spring

K-State 8
Global Issues and Perspectives
Historical Perspectives

FREN 518 - French Conversation

Credits: 3

Practice in spoken French, with emphasis on idiomatic expression. Course not open to students whose primary language is French and whose competence has been demonstrated in the language at this level.

Repeat for Credit
N

Requisites
Prerequisite: FREN 213 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 519 - Special Studies in French

Credits: 1-18

Special Studies in French

Repeat for Credit
Y

Requisites
Prerequisite: FREN 213 or equivalent and consent of department head and instructor.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

FREN 520 - Introduction to French Literature (19th Century to the Present)

Credits: 3

The reading and discussion of major works of French literature from the early nineteenth century to the present.

Repeat for Credit
N

Requisites
Prerequisite: FREN 516 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

FREN 530 - Topics in French/Francophone Literature and Culture

Credits: 3

Provides the students the opportunity to investigate in detail a particular theme or genre in French literature or culture.

Repeat for Credit
Y

Requisites
Prerequisite: At least one course taught in French at the 500 level.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

FREN 580 - Discovering French Linguistics

Credits: 3

Introduction to the fundamentals of linguistic analysis. Topics may include sound system, word and sentence formation, semantic and pragmatic meaning, application of linguistics to language acquisition theory and to pedagogy.

Repeat for Credit
N

Requisites
Recommended prerequisite: FREN 301 or equivalent.

Typically Offered
Fall or Spring

FREN 709 - Medieval French Literature

Credits: 3

An introduction to literary forms, style, and the thought from the eleventh century to the fifteenth century in France. Readings in modern French in *Chanson de Roland, Chretien de Troyes, Roman de la Rose*, etc.

Repeat for Credit
N

Requisites
Prerequisite: FREN 520 or FREN 521 and one other 500 level course, or consent of instructor.

Typically Offered
Other

FREN 710 - Sixteenth-Century French Literature

Credits: 3

Reading and discussion of selected prose and poetry of the French Renaissance.

Repeat for Credit
N

Requisites
Prerequisite: FREN 520 or FREN 521 and one other 500 level course, or consent of instructor.

Typically Offered
Fall

FREN 711 - Seventeenth-Century French Literature

Credits: 3

Various literary forms of the French Baroque and Classical period. Reading of representative texts by Corneille, Pascal, Moliere, Racine, La Fontaine, and others.

Repeat for Credit
N

Requisites
Prerequisite: Two 500 level courses, including FREN 520 or FREN 521 or with the consent of the instructor.

Typically Offered
Fall

FREN 713 - Eighteenth-Century French Literature

Credits: 3

Critical study of the literature of the Enlightenment.

Repeat for Credit
N

Requisites
Prerequisite: FREN 520 or FREN 521 and one other 500

level course, or consent of instructor.

Typically Offered
Other

FREN 715 - 19th Century French Literature

Credits: 3

Topics in French literature of 1800-1899 including developments in poetry, prose, and theater.

Repeat for Credit
N

Requisites
Recommended Prerequisite: One French course at the 500-level

Typically Offered
Fall or Spring

FREN 716 - Topics in Contemporary French Literature

Credits: 3

The study of major themes and trends in the novel, drama, and poetry since 1900 as reflected by major authors as Proust, Camus, Sarraute, and others. This is a topics course repeatable with a different topic.

Note
This is a topics course repeatable with a different topic.

Repeat for Credit
Y

Requisites
Prerequisite: Two 500-level courses, including FREN 520 or FREN 521 or with consent of the instructor.

Typically Offered
Fall

FREN 719 - Advanced Spoken and Written French

Credits: 3

An advanced, intensive study of French prose style. Introduction to the techniques of translation from English to French. Intensive practice in oral style and diction.

Repeat for Credit
N

Requisites
Prerequisite: FREN 520 or FREN 521 and one other 500 level course, or consent of instructor.

Typically Offered
Fall

FREN 720 - Seminar in French Literature and Culture

Credits: 3

A seminar with various topics centered on literature and culture.

Repeat for Credit
Y

Requisites
Prerequisite: FREN 520 or FREN 521 or with the consent of the instructor.

Typically Offered
Fall, Spring

FREN 721 - Francophone Literature and Culture

Credits: 3

The development of French colonial and postcolonial literature and culture with an emphasis on the twentieth and twenty-first centuries. Regional focus may vary from Quebecois, Caribbean, Sub-Saharan or North African literature and culture.

Repeat for Credit
N

Requisites
Prerequisite: FREN 520 or FREN 521 and one other course at a 500 level.

Typically Offered
Fall, Spring

FREN 731 - Advanced French for Professions

Credits: 3

Advanced language necessary for adequate oral and written expression in international business and diplomatic situations, including specialized terminology, conversation and discussion, and translation.

Repeat for Credit
N

Requisites
Recommended prerequisite: One FREN course at the 500-level

Typically Offered
Fall or Spring

FREN 743 - French Second Language Acquisition Culture and Literature

Credits: 3

Analysis and interpretation of cultural resources and texts from French-speaking countries, with emphasis on the development of interpretive skills and materials, and their application to the French curriculum at all levels.

Repeat for Credit
N

Requisites
Recommended Foundation Course: One French course at the 500-level

Typically Offered
Fall or Spring

FREN 771 - Topics in French Translation

Credits: 3

Analysis and practice in bi-directional translation [French-English-French] of a variety of texts from a number of genres, including literary texts. Discussion of professional opportunities for translators and interpreters. Development of personal portfolio.

Repeat for Credit
Y

Requisites
Recommended prerequisite: One French course at the 500-level

Typically Offered
Fall or Spring

FREN 780 - Topics in French Linguistics

Credits: 3

Advanced topics in French linguistics. These may include introduction to the social history and internal structure of the French language, advanced phonetics, advanced grammar (word and sentence formation, semantic and pragmatic meaning), application of linguistics to language acquisition theory and to pedagogy.

Repeat for Credit
Y

Requisites
Recommended prerequisite: One French course at the 500-level

Typically Offered
Fall or Spring

FREN 799 - Problems in Modern Languages

Credits: 1-18

Problems in Modern Languages

Repeat for Credit
Y

Requisites
Prerequisite: FREN 520 or FREN 521 and one other 500 level course, or consent of instructor.

Typically Offered
Other

FREN 898 - Master's Report

Credits: 1-2

A written report of either research or problem work on a topic in the major field.

Note
Consult of major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

FREN 899 - Research in Modern Languages

Credits: 1-18

Research in Modern Languages

Repeat for Credit
Y

Typically Offered
Other

GEN 200 - Undergraduate Education Abroad

Credits: 0-18

"Education abroad" is **a chance to pursue your college studies in a foreign country**. Students attend lectures or carry out research at a foreign university or through K-State's education-abroad program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GENAG 000 - Agriculture Scholars Program

Credits: 0

For all undergraduate students in the College of Agriculture Scholars Program. Students should enroll every semester while active in the program.

Repeat for Credit
Y

Requisites
Prerequisite: Acceptance into the College of Agriculture Scholars Program.

Typically Offered
Fall, Spring

GENAG 020 - University Honors Program

Credits: 0

All students participating in the University Honors Program and who are enrolled in the College of Agriculture must enroll each semester.

Repeat for Credit
Y

Requisites
Prerequisite: Acceptance into the University Honors Program.

Typically Offered
Fall, Spring

GENAG 101 - Ag Orientation

Credits: 1

Objectives, organization, and procedures of the College of Agriculture and the university are studied. Historical developments and projected trends in agriculture and the application of basic sciences to agriculture are presented.

Note
Required of freshmen in General Agriculture.

Repeat for Credit
N

Typically Offered
Fall

GENAG 112 - Ag Pathway: Animal Science, Health and Related Industries

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Animal Science, Health and Related Industries

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 113 - Ag Pathway: Diversified Agricultural Science

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Diversified Agricultural Science

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 114 - Ag Pathway: Food Products and Processing Systems

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Food Products and Processing Systems

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 115 - Ag Pathway: Natural Resources and Environmental Sustainability

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Natural Resources and Environmental Sustainability

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 116 - Ag Pathway: Plant Science and Industry Operations

Credits: 3

For completers of the Kansas Career Cluster Pathway in Agriculture, Food, and Natural Resources Career Cluster, Plant Science and Industry Operations

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 189 - Introduction to the University Honors Program

Credits: 1

Overview of the University Honors Program including directions, goals, and student requirements for completion of the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENAG 199 - Independent Study in Agriculture

Credits: 0-6

Student-specific projects or independent guided studies in agriculture.

Note
Departmental Consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GENAG 200 - Topics in Agriculture

Credits: 0-3

Selected issues in agriculture.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GENAG 201 - Leadership for Agricultural Advocacy

Credits: 1

This CAT Community "connector class" will help develop your advocacy skills for the agricultural industry by examining assumptions of advocacy and leadership. Explore and engage agricultural issues from the perspective of multiple stakeholders and develop your skills in critical thinking, communication, and productive conflict. This class will be highly interactive and discussion-based. We will focus on current events and engage with industry leaders.

Repeat for Credit
N

Requisites
Prerequisite: Acceptance into the Leadership for Agricultural Advocacy CAT Community Corequisites: ASI 102 and LEAD 212

Typically Offered
Fall

GENAG 202 - Animal Agriculture in 2050

Credits: 1

This CAT Community "connector class" will focus on issues and opportunities related to livestock production in the United States. Potential impacts of new technologies, new international competitors and markets, evolving consumer preferences and expectations, and societal concerns with animal agriculture will be examined. Paradigms that result in successful academic performance and meeting academic and career goals will also be discussed.

Note
Note: Livestock production experience is recommended.

Repeat for Credit
N

Requisites
Prerequisite: Acceptance into the Animal Agriculture in 2050 CAT Community. Corequisites: BIOL 198 and ASI 102

Typically Offered
Fall

GENAG 203 - The Need For Feed: Grain Science

Credits: 1

This CAT Community "connector class" will address the fundamentals of grain science, while at the same time gaining hands-on experience in K-State's modern laboratories, which include industrial scale flour mills, a feed production facility, and a bakery. It will also serve as an introduction to grains and their processing/utilization in food and non-food products, as well as exposure to career opportunities in grain and related industries.

Repeat for Credit
N

Requisites
Prerequisite: Acceptance into the Need for Feed:Grain Science CAT Community
Corequisites: BIOL 198 and GRSC 101

Typically Offered
Fall

GENAG 210 - Human and Cultural Diversity in the Food and Agricultural Sciences

Credits: 3

The purpose of this course is to introduce agriculture students to concepts of diversity by learning about cultural awareness, issues, and contributions made by different ethnic groups to the field of agriculture.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Historical Perspectives

GENAG 225 - Fundamentals of Global Food Systems Leadership

Credits: 3

An interdisciplinary approach to the fundamental roles people, policies, and cultures play in the global food system enterprise as it relates to sustainable food production, processing, distribution, and availability. Students will explore complexities within self, others, and community related to leadership in the context of a rapidly increasing

global population.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
DAS 225, LEAD 225

K-State 8
Global Issues and Perspectives

GENAG 325 - Uncertainty in Global Food Systems Leadership

Credits: 3

Explore technical and adaptive elements of grand challenges across disciplines. This course addresses the impact of cultural identity, life experience, and world views on leadership relationships as it relates to privilege and inclusion in the context of global food systems. Students will consider elements of community-engaged work.

Repeat for Credit
N

Requisites
Prerequisite: GENAG 225 or LEAD 225 or DAS 225.

Typically Offered
Spring

Cross-listed
LEAD 325, DAS 325

K-State 8
Global Issues and Perspectives

GENAG 396 - Research Topic and Proposal Development

Credits: 1

Undergraduate honors and scholars students learn the research process and identify and work with a faculty mentor to prepare an individual undergraduate research project proposal. Class presentations focus on strategies to identify and narrow a research topic, seek a research mentor, and develop a research proposal. Additional content will address common research methods, safety and compliance issues, and tips for persuasively presenting research results.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing or instructor permission.

Typically Offered
Fall, Spring

GENAG 399 - Agricultural Cooperative Education Experience

Credits: 1-5

Integration of academic principles into supervised industry experience in agricultural related field.

Note
Department permission

Repeat for Credit
Y

Typically Offered
Fall, Spring

GENAG 425 - Global Food Systems Leadership in Action

Credits: 3

In this capstone course, students will conduct a community-engaged global food systems leadership research/service project. Emphasis will be placed on data collection, analysis and dissemination to appropriate audiences. Additional emphases will be on ethical dimensions of leadership and individual exploration of careers and roles within global food systems.

Repeat for Credit
N

Requisites
Prerequisite: GENAG 325 or LEAD 325 or DAS 325.

Typically Offered
Fall

Cross-listed
LEAD 425

K-State 8
Global Issues and Perspectives

GENAG 450 - Citizenship and Ethics in Agriculture

Credits: 3

The study of agriculture's relationship with society while encompassing ethics and personal development. Current controversial issues and multidimensional policy topics facing the agricultural industry will be explored with an emphasis on moral and philosophical debates. Issues regarding professional ethics and decision making will also be an emphasis.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
On sufficient demand

GENAG 495 - Honors Seminar

Credits: 1-3

Seminars treat topics relevant to students participating in the University Honors Program.

Repeat for Credit
N

Requisites
Prerequisite: Acceptance into the University Honors Program.

Typically Offered
Fall, Spring

GENAG 505 - Comparative Agriculture

Credits: 1-4

A travel-study program which is intended to acquaint students with agriculture of other countries and other parts of the United States and how it differs from Midwest-Great Plains agriculture relative to climate, crops, soils, livestock practices, marketing, and cultural attitudes toward agriculture.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

GENAG 515 - Honors/Scholars Project

Credits: 0-1

Completion of an independent undergraduate research project or scholarly activity required for the University Honors Program or the College of Agriculture Scholars Program. Oral presentation and written report required. Taken during the semester when the project will be completed.

Note
Approved project proposal.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENAG 582 - Natural Resources/Environmental Science Project (NRES)

Credits: 3

A comprehensive project in NRES. Requires integration of information and understanding acquired in NRES secondary major courses. Students must prepare and present written and oral reports.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: All writing and oral communications courses required for major. Prerequisite or corequisite: 15 hours of approved courses in NRES secondary major.

Typically Offered
Fall, Spring

Cross-listed
DAS 582 and DEN 582

K-State 8
Natural and Physical Sciences
Social Sciences

GENAG 670 - Introduction to Agricultural Resources and Environmental Management

Credits: 2

Interdisciplinary, international study of agricultural and natural resource management sustainability. Discussion of agro-ecologic, economic, and social science perspectives; sustainability criteria; issues of scale and culture; disciplinary methods; and systems-level approaches. Applications to important natural resources and environmental management issues in Kansas, U.S., and in other countries.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

GENAG 690 - Seminar in International Agriculture

Credits: 1

An in-depth study of international agriculture topics.

Note
One hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Junior or senior standing.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

GENAG 780 - Current Topics in Agriculture

Credits: 1-3

Selected topics studied to provide an in-depth understanding of current agricultural issues.

Repeat for Credit
Y

Typically Offered
On sufficient demand

GENAG 812 - Managing Occupational and Agricultural Safety and Health

Credits: 3

Examines program management and leadership issues in occupational and agricultural safety and health. Topics include business aspects of safety and health, management functions, workforce involvement, program development, motivation and leadership, program evaluation, ethics of safety and health, responding to the needs of a diverse workforce, and innovative program management for changing economic and societal contexts.

Note
This is a distance course.

Repeat for Credit
N

Typically Offered
Fall

GENAG 870 - Capstone for Agricultural Resources and Environmental Management

Credits: 1

Interdisciplinary, international application of agro-ecologic, economic, social science, and sustainability concepts and methods to important agricultural, natural resources and environmental management issues in Kansas, U.S., and

other countries.

Repeat for Credit
N

Typically Offered
Fall

GENBA 020 - University Honors Program

Credits: 0

All students participating in the University Honors Program and who are enrolled in the College of Business Administration must enroll each semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

GENBA 105 - Business Orientation

Credits: 0-1

A general orientation to the College of Business Administration and university, academic planning, advising and enrollment processes.

Note
Required for all students in the College of Business in their first semester in the College of Business Program.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 145 - Business and Society

Credits: 3

An overview of the role of business in society. Students will engage in a variety of activities including group discussions, practical learning exercises, and case examples to examine the historical, current, and future role of business in society. Students will explore the role that critical thinking plays in forming business decisions and learn about the impact of differing economic environments on businesses. Students will examine the importance of the entrepreneurial mindset in value creation and how businesses generate value for society.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 189 - Introduction to the University Honors Program

Credits: 1

Overview of the University Honors Program including directions, goals, and student requirements for completion of the program.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 195 - CAT Community Connections

Credits: 1-3

Interdisciplinary course that explores the connections among two different fields, courses, or disciplines. Topics and corequisites vary by section and semester.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 205 - Career Accelerator

Credits: 0-1

Essential course on career preparation for all business students with topics focused on career exploration, personal brand, networking, resumes, interview skills, and workplace expectations. Students completing this course will be well-equipped to engage with employers while leveraging extensive campus and College of Business resources to enhance internship and future employment opportunities.

Repeat for Credit
N

Requisites
Prerequisite: College of Business students only and Sophomore Standing.

Typically Offered
Fall, Spring, Summer

GENBA 299 - Honors Colloquium in Business

Credits: 1

Discussions and lectures on topics of interest to business students.

Note
Open to freshmen and sophomores in the honors program for the College of Business Administration.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 375 - International Business Experience

Credits: 0

An international business experience that requires travel to a foreign country. The length of the tour varies from one week to 16 weeks. This course enables students to complete an international experience that would include study, research, or work in a foreign country. The course provides enriched experience in the financial and business practices in a foreign country and enhances students" global and cultural awareness.

Repeat for Credit
N

Typically Offered
Fall, Spring

GENBA 391 - Administrative Communications

Credits: 3

Preparation of business communications, reports, and correspondence, and analysis of communication systems within an enterprise structure.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 120 and COMM 106.

Typically Offered
Fall, Spring, Summer

GENBA 399 - Honors Seminar

Credits: 1

The Honors Seminar is designed as a follow-up course to the Honors colloquium and it prepares students for the honors capstone project that culminates into the honors project. It also provides a forum for all honors students who are working on their capstone honors project to share and discuss their project ideas.

Note
Although students are encouraged to focus on a business-related topic, the choice of topic is open to all disciplines. The selection of an area of study is subject to the approval of the Honor Director (or Honors Committee).

Repeat for Credit
N

Requisites
Prerequisite: GENBA 299.

Typically Offered
Spring

GENBA 498 - Problems in Business Administration

Credits: 1-18

In-depth analysis of special problems in general business including study of current literature.

Note
Consent of instructor and the department head.

Repeat for Credit
Y

Requisites
Prerequisite: Senior standing

Typically Offered
On sufficient demand

GENBA 499 - Business Honors Project

Credits: 3

A business honors project is an independent study in an intellectual endeavor (research or creative activity) under the supervision of a faculty member. The project must be approved by the College of Business Honors Director in consultation with the faculty supervisor and the University Honors Program Director. Deliverables of an Honors project may include a paper presented at a student or professional conference, a paper presented at a faculty/student seminar, a paper appearing in a poster presentation or a paper submitted for a national competition.

Note
Open to juniors and seniors in the honors program for the College of Business Administration.

Repeat for Credit
N

Requisites
Prerequisite: GENBA 399.

Typically Offered
Fall, Spring

GENBA 675 - International Business Experience

Credits: 0

An international business experience that requires travel to a foreign country. The length of the tour varies from one week to 16 weeks. This course enables students to complete an international experience that would include study, research or work in a foreign country. The course provides enriched experience in the financial and business practices in a foreign country and enhances students' global and cultural awareness.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GENBA 800 - MBA Professional Development

Credits: 1-3

This course will require the student to work with the director of the MBA program to outline a professional development program of 45 hours per hour of credit to enhance their MBA studies and to enhance their professional career.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the MBA program.

Typically Offered
Fall, Spring, Summer

GENBA 861 - International Field Study

Credits: 1-3

Graduate level course designed to provide students with an opportunity to observe international business by participating in a field trip outside the United States. This experiential course may involve a combination of business visits, interactions with business executives, cultural experiences, internship activities, or other learning activities while abroad.

Note
Instructor approval.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing

Typically Offered
Fall, Spring, Summer

GENBA 875 - MBA International Business Experience

Credits: 1-3

This course will consist of a faculty-led international experience designed to expose students to international business practices and culture.

Repeat for Credit

Y

Requisites
Prerequisite: Admission to the MBA program.

Typically Offered
Fall, Spring, Summer

GENBA 890 - Business Capstone

Credits: 3

The analysis of business problems, using knowledge and tools from previous courses. Students, under the supervision of a team of faculty, will analyze actual business case problems.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 860, FINAN 715, GENBA 880 and MKTG 705.

Typically Offered
Spring

GENBA 894 - Data Analytics Capstone

Credits: 3

This course is a hands-on, project based course completed in cross-disciplinary groups. The capstone course will require students to work together on projects that will demonstrate their ability to collaboratively analyze large datasets, provide insight for practical problems and effectively communicate the resulting insights.

Note
Students are expected to take this capstone course at the end of the program.

Repeat for Credit
N

Requisites
Prerequisite: Student admitted in the Graduate Certificate in Data Analytics.

Typically Offered
Summer

GENBA 898 - Topics in Business

Credits: 1-3

Discussion and analysis of current issues in business such as accounting, management, finance, marketing, etc.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 100 - World Geography & Globalization

Credits: 3

Introduction to geography structured on a framework of major world regions and countries. Within the regional approach is an explicit discussion of the essential concepts rooted in historical, cultural, social, political, economic, religious, gender, urban geography, and globalization.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Historical Perspectives

GEOG 121 - Introductory Physical Geography: Earth Systems Science

Credits: 3

A systemic introduction to the processes and spatial patterns of the atmosphere, biosphere, geosphere, and hydrosphere and their interactions at the Earth's surface. Prepares science and engineering majors for more advanced coursework and promotes improved environmental literacy of non-science majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOG 122 - Introduction to Physical Geography: Earth Systems Science Laboratory

Credits: 1

Laboratory investigation of the processes and spatial pasterns of the atmosphere, biosphere, geosphere, and hydrosphere and their interactions at the Earth's surface.

Repeat for Credit
N

Requisites
Corequisite: GEOG 121

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

GEOG 200 - Human Geography

Credits: 3

A geographical assessment of the way human activities shape landscapes throughout the world. The course is especially appropriate for students interested in the social and behavioral sciences.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 201 - Human Geography (Honors)

Credits: 3

Spatial aspects of human organization and behavior are examined through selected concepts in modern geography. The course is especially appropriate for students interested in the social and behavioral sciences.

Repeat for Credit
N

Requisites
Prerequisite: Membership in arts and sciences honors program.

Typically Offered
Fall

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 235 - Atmospheric Science

Credits: 4

A comprehensive scientific study of the physics, chemistry, and dynamics of the earth's atmosphere, from the earth's surface to several hundred kilometers. Fundamental topics covered include atmospheric composition and variability, subdivisions of the atmosphere, energy and mass transfers within the Earth-atmosphere system, atmospheric circulation, and accurate prediction of atmospheric phenomena.

Repeat for Credit
N

Requisites
Recommended Foundation Course: MATH 100

Typically Offered
Fall

K-State Core
4 Natural and Physical Sciences

K-State 8

Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOG 300 - Geography of Tourism

Credits: 3

The geography of tourism is concerned with the structure, form, use, and conservation of the landscape as well as with such spatial conditions as the location of tourist areas and the movements of people from place to place. This course addresses such concepts as the economic, environmental, social, and cultural impacts of tourism as well as examining the tourist geography of each of the world's regions, focusing on the major tourist areas.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 302 - Cartography and Thematic Mapping

Credits: 3

Introduction to cartographic history, theory and principles, thematic map design, symbolization, map perception, color theory, typography, and digital cartographic research. Laboratory work will familiarize students with the latest cartographic software that will be used to produce a series of thematic maps.

Note
The course will consist of two hours of lecture and two hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 or equivalent.

Typically Offered
Fall

GEOG 310 - Geography of Kansas

Credits: 3

A regional and historical analysis of Kansas including discussion of the physical environment, historical development, and current geographic patterns.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

GEOG 331 - Introduction to Japan

Credits: 3

Geographical survey of Japan from prehistoric times to the present day, which may include material on society, politics, and culture.

Repeat for Credit
N

Typically Offered
Other

Cross-listed
HIST 331

K-State 8
Global Issues and Perspectives
Historical Perspectives

GEOG 332 - Introduction to China

Credits: 3

Survey of the geography, history, politics, and culture of China from prehistoric times to the present day.

Repeat for Credit
N

Typically Offered
Other

Cross-listed
HIST 332

K-State 8
Global Issues and Perspectives
Historical Perspectives

GEOG 335 - European Landscapes

Credits: 3

Explores how humans have interacted with their environment and modified the natural and cultural landscape within Europe.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Historical Perspectives

GEOG 340 - Natural Resources

Credits: 3

The significance, environmental consequences, and locational characteristics of natural resources and resource-based economic activities, including agriculture, fishing, forestry, and mining. Sustainability and conservation considerations related to natural resource extraction, management, and use.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

GEOG 350 - Earth System Geography

Credits: 4

A basic physical geography course emphasizing the geosphere, hydrosphere, atmosphere and biosphere, including the processes, patterns, and physical science background required to understand related issues such as natural hazards and human modification of earth systems.

Note
Offered in an on-line format during summer semesters only through the Division of Continuing Education.

Repeat for Credit
N

Typically Offered
Summer

GEOG 360 - Sustainability Concepts & Issues

Credits: 3

Exploration of sustainability concepts, approaches, and decision-making. Relation of sustainability to environmental, economic, and social considerations at global, regional, and local scales.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

GEOG 370 - Environmental Justice

Credits: 3

Introduction to the history of the environmental justice movement with a focus on resource exploitation, degradation of natural resources, (in)justice, race, class, and governance.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

GEOG 380 - World Population Issues

Credits: 3

Discussion of world population distribution, composition,

growth, and migration patterns and processes. Emphasis is on recent demographic changes at global, regional and local scales and their socioeconomic and environmental implications.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State 8
Global Issues and Perspectives
Empirical and Quantitative Reasoning

GEOG 399 - Honors Seminar in Geography

Credits: 2-3

Selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
N

Typically Offered
Fall

GEOG 440 - Spatial Analysis of Surface Water Hydrology

Credits: 3

Introduces components and measurement techniques of surface water hydrology including precipitation, evapotranspiration, overland flow, and stream flow, as well as their spatial distribution on the Earth's surface and relationships between changes in surface water and the environment.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 121 or instructor permission.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

GEOG 445 - Biogeography

Credits: 3

Covers: 1) the spatial and temporal patterns of the distribution of living organisms on Earth (including plants, animals, and microbes), and 2) the biological and physical processes responsible for these patterns. Biogeography has crucial insights to offer regarding conservation of rare species, global changes such as climate change, and human domination of the Earth surface.

Repeat for Credit
N

Requisites
Prerequisite: One course in geography, life science, or physical science.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

GEOG 450 - Geography of Economic Behavior

Credits: 3

The location of manufacturing industries and patterns of commercial activity. Case studies and simulations are used with emphasis on modern concepts of site selection and community development.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

GEOG 460 - Human Dimensions of Global Change

Credits: 3

An examination of the complexity of forces driving global change, with an emphasis on change related to population growth, technological development, and sociocultural and socioeconomic institutions.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 121 and either GEOG 100 or GEOG 200.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

GEOG 490 - Problems in Geography

Credits: 1-18

Problems in Geography

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 495 - Capstone Seminar in Geography

Credits: 2

An integrative capstone seminar requiring geography majors to synthesize knowledge and skills acquired in prior geography courses. Students pursue independent projects in consultation with a faculty member and present their findings in written and oral reports. The course exposes students to and helps prepare them for a variety of professional and scholarly opportunities available after graduation.

Note
Meets for two hours once a week. Required of and restricted to geography undergraduate majors.
Junior standing recommended.

Repeat for Credit
Y

Requisites
Prerequisite: Junior geography majors.

Typically Offered
Spring

K-State 8
Social Sciences

GEOG 497 - Undergraduate Research in Geography

Credits: 1-3

Independent research project conducted with the guidance of a faculty mentor.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 498 - Honors Tutorial in Geography

Credits: 1-3

Individual directed research and study of a topic in geography, normally as a preliminary to writing a senior honors thesis.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing, membership in the honors Program of the College of Arts and Sciences, and permission of the instructor.

Typically Offered
Fall, Spring

GEOG 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GEOG 500 - Geography of the United States

Credits: 3

A regional analysis of the United States with special attention to the historical, political, economic, and social factors which contribute to areal differentiation within the area.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

K-State 8
Human Diversity within the U.S.
Social Sciences

GEOG 505 - South Asian Civilizations

Credits: 3

Interdisciplinary survey on the development of civilization in India, Pakistan, Sri Lanka, Bangladesh, Nepal, Bhutan, and Afghanistan, including geography, philosophy, social, economic, political institutions, and historical movements.

Repeat for Credit
N

Requisites
Prerequisite: Three hours of social science or junior standing.

Typically Offered
Fall-Even Years

Cross-listed
ANTH 505, ECON 505, HIST 505, POLSC 505, SOCIO 505

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 506 - Geography of South Asia

Credits: 3

This course will provide a survey of the physical and human geography of South Asia. More specifically, it will cover the major environmental, economic, demographic, and cultural geography patterns, processes, and issues of the region. Problems related to religious, ethnic, and linguistic diversity, along with environmental problems associated with global climate change and others will be examined in the context of modernization and economic development.

Note
This will be a lecture type course and each relevant topic will be covered in some detail.

Repeat for Credit
N

Requisites
Prerequisite: Three hours of Social Science or junior standing.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 508 - Geographic Information Systems I

Credits: 4

Examination of the major theories, concepts, and operations in geographic information systems (GIS). Topics include: the structure of geographic data models, geographic data acquisition, spatial database management, data processing methods. Vector and raster GIS operations, and general approaches to GIS-based spatial modeling.

Note
The course will consist of two hours of lecture and two hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 302.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

GEOG 510 - Geography of the American West

Credits: 3

A broad survey of the geography of the American West with a focus on the distinctive human and environmental characteristics of the region. Historical, cultural, ethnic, resource, land use, and physical landscape patterns are examined through lectures, readings, videos, and discussions.

Repeat for Credit
N

Requisites
Prerequisite: A previous course in geography and sophomore standing.

Typically Offered
Spring-Even Years

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

GEOG 535 - Global Climatology and Climate Change

Credits: 4

An examination of the physical processes that control the dynamics and spatial distribution of climates at the global scale, and how these processes can result in variation and change in the climate system. Topics include radiation and energy balance, global circulation, and the hydrologic cycle as well as the biosphere and humans as climate regulators and causes of change.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GEOG 121.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

GEOG 550 - Political Geography and Geopolitics

Credits: 3

Critically analyzes relations between space and power in historical and contemporary geopolitical contexts, including topics such as sovereignty, border making, territorial disputes, and the formation (and dissolution) of nation-states.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GEOG 100 or GEOG 200

Typically Offered
Fall

Cross-listed
POLSC 550: Political Geography and Geopolitics

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 600 - Mountain Geography

Credits: 3

A broad survey of the human and physical geography of mountains. The course utilizes lectures, discussion, videos, and photographs to examine the human-environment interactions, cultural symbolism and sacredness, recreation and tourism, and sustainable development of mountain landscapes. The regional focus is primarily on the American West, but other mountains throughout the world will also be studied.

Repeat for Credit
N

Requisites
Prerequisite: A previous course in geography and junior standing.

Typically Offered
Fall-Even Years

K-State 8
Natural and Physical Sciences
Social Sciences

GEOG 602 - Computer Mapping and Geographic Visualization

Credits: 3

Basic cartographic principles, advanced methods for representing spatial data, approaches for exploratory spatial data analysis, and practical applications of thematic maps, animated and Internet-based maps, and geographic visualization techniques. Students will prepare a series of maps and visualization products using modern geographic information system and illustration software.

Note
The course will consist of two hours of lecture and two hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 508.

Typically Offered
Spring

GEOG 605 - Remote Sensing of the Environment

Credits: 3

Remote sensing and its application to earth study, especially environmental problems and land use. Course employs both readings and the use of imagery.

Note
Two hours lecture, two hours lab.

Repeat for Credit
N

Requisites
Prerequisite: One course in physical science and one in biological science.

Typically Offered
Fall, Spring

Cross-listed
AGRON 606

GEOG 608 - Geographic Information Systems II

Credits: 3

Advanced principles of and applications for geographic information systems (GIS). Examines the nature and accuracy of geo-referenced data and methods of data capture, storage, retrieval, modeling, and digital map display. Students will use modern GIS software packages and digital geographic data from physical and/or cultural sources to explore software procedures and techniques of spatial analysis, decision support, and geographic visualization.

Note
The course will consist of two hours of lecture and two hours of lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 302 and GEOG 508 (or consent of instructor).

Typically Offered
Fall

GEOG 610 - Geography Internship

Credits: 1-6

Faculty-supervised field experience, emphasizing the application of geographical topics and/or techniques. Student projects must be approved by both the on-site director and the faculty supervisor, and a report must be submitted at the end of the semester.

Repeat for Credit
N

Requisites

Prerequisite: Permission of the instructor and junior standing in geography is required.

Typically Offered
Fall, Spring, Summer

GEOG 620 - Mexico, Central America, and Caribbean

Credits: 3

A broad survey of the physical and human geographic patterns of Middle America (Mexico, Central America, and the Caribbean), past and present, with emphasis on the changing landscape features in the successive patterns of human occupancy and globalization.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State 8
Global Issues and Perspectives
Historical Perspectives

GEOG 622 - Geography of South America

Credits: 3

A survey of the physical and human patterns of South America, past and present, with emphasis on the changing landscape features in the successive patterns of human occupancy and globalization.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 660 - Geography of East Asia/China

Credits: 3

An introduction to the human and physical geography of East Asia, with emphasis on China. Examines this region's physical, cultural, and socioeconomic patterns and changes, as well as interactions with other parts of the world.

Repeat for Credit
N

Typically Offered
Fall-Even Years

K-State 8
Global Issues and Perspectives
Social Sciences

GEOG 680 - Geography of Landscape and Place

Credits: 1-3

This seminar explores cultural landscapes (built environments) and the character of place from a geographic perspective, offering junior, senior, and graduate students insights into geographical patterns and opportunities to develop research interests. Grounded in human and cultural geography, the course fosters interdisciplinary discussions, benefiting students from diverse backgrounds who are encouraged to contribute to the topics presented.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: Junior status or consent of instructor.

Typically Offered
Fall

GEOG 690 - Historical Geography of the United States

Credits: 3

Interpretation and analysis of the American landscape and its regions from c. 1500 to c. 1950, with particular emphasis on landscape as both place and history. Also introduces and examines such current research topics as identity, contested places, landscape-as-text, and cultural politics.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 100 and one course in American

history.

Typically Offered
Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

GEOG 700 - Quantitative Analysis in Geography

Credits: 3

Quantitative methods employed in modern geographical research. Applications of both statistical and mathematical approaches will be treated. Emphasis will be placed on interpretation and evaluation of techniques employed in spatial analysis.

Repeat for Credit
N

Requisites
Prerequisite: One course in statistics.

Typically Offered
Spring

GEOG 705 - Thematic Remote Sensing

Credits: 3

Introduction to digital image analysis in remote sensing, with an emphasis on extraction of thematic information from imagery. Emphasizes mastery of both practical classification techniques and the theory behind those techniques. Topics covered include preparing imagery for classification; per-pixel and object-based classification techniques; use of parametric, non-parametric, and machine learning\A1-based decision rules; and techniques for validating classification accuracy. Classification techniques for hyperspectral imagery will also be covered.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 605 or equivalent.

Typically Offered
Fall, Spring

GEOG 706 - Biophysical Remote Sensing

Credits: 3

An advanced seminar covering methods and models for retrieving quantitative information about the Earth's surface from remotely sensed data. Topics covered will include inversion techniques for determining surface radiance and reflectance, correction of atmospheric effects, theory of vegetation indices and their use in empirical determination of canopy properties, canopy models and their inversion, and the use of hyperspectral data for retrieval of surface biophysical information.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 605.
Co-requisite: A course in a physical or biological science, MATH 210 or MATH 220, or equivalent.

Typically Offered
Fall, Spring

GEOG 707 - Remote Sensing of Water

Credits: 3

Reviews and expands the fundamentals of remote sensing theory, basic surface hydrology and hydraulics, remote sensing methods and instruments, measurements of various hydrologic parameters, and integrated approaches in water resource studies.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 508 and GEOG 605 or instructor permission.

Typically Offered
Fall

GEOG 709 - Geography Field Research Techniques

Credits: 2-3

Explores methods and techniques employed in modern field research. Stresses research design, field data acquisition techniques, and data analysis.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and at least 6 hours in geography.

Typically Offered
Summer

GEOG 711 - Topics in Remote Sensing

Credits: 3

Examination of a selected remote sensing topic in an area of faculty specialization.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 605.

Typically Offered
Spring

GEOG 712 - Internet GIS and Distributed Geographic Information Services

Credits: 3

Introduces the development and deployment of Internet maps and GIS-related web services. Students will use virtual globes and Internet map servers to learn the techniques of Internet mapping and development/delivery of geodata and geoprocessing services via the Web. Studio-style classes will focus on building the necessary skills for creating, as well as the practical applications of, customized GIS map applications and "mashups", web-based GIS services, and mobile GIS applications.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 608.

Typically Offered
Spring

GEOG 715 - World Population Patterns

Credits: 3

Geographical processes that govern population distributions, growth rates, and migrations. Emphasis on international comparisons and implications for world society of continued differential growth rates.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Fall-Even Years

GEOG 718 - Geography of Public Lands

Credits: 3

Overview of public lands systems, including distribution and uses of public lands, with an emphasis on United States federal lands. Historic and recent controversies regarding the public lands will be addressed. Seminar course with discussion and independent research components.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Spring

GEOG 720 - Geography of Land Use

Credits: 3

Critical factors affecting land use, scarcity, and management examined in a regional, national, and global context; land use classification system and variation of land use patterns.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Fall-Odd Years

GEOG 722 - Geographies of International Conservation

Credits: 3

Examines geographic perspectives of global biodiversity loss and conservation landscapes with an emphasis on the political, economic, and cultural dimensions of conservation around the world.

Repeat for Credit
N

Requisites
Prerequisite: 6 hours of social sciences.

Typically Offered
Fall

GEOG 725 - Geography of Water Resources

Credits: 3

Interpretation and analysis of the physical geography of water and water as a resource. Evaluation of water, emphasizing quality, hazards, institutions, and selected domestic and global issues.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Spring-Even Years

GEOG 728 - Programming for Geographic Analysis

Credits: 3

Introduces programming languages, scripting methods, and/or free and open-source software (FOSS) and their use with geospatial technologies and spatial data. Explanations of programming concepts, demonstrations of techniques, and practical exercises that will enable students to develop their own programs and workflows for geoprocessing, spatial analysis, and map production.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: GEOG 608

Typically Offered
Fall, Spring

GEOG 735 - Topics in Climatology

Credits: 3

Examination of a selected climatology topic in an area of faculty specialization.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 535.

Typically Offered
Fall

GEOG 740 - Fluvial Geomorphology

Credits: 3

Exploration of the forms and processes of streams and rivers with a focus on fluid flow mechanics, sediment transport in moving water, and predicting how rivers can change through time. Utilizes a combination of lectures, data analysis, and field work.

Note
The course meets for three hours of lecture per week with one required weekend field trip.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 440 (or equivalent hydrology course) or graduate standing or instructor permission

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

GEOG 742 - Digital Geomorphology

Credits: 3

An exploration of geomorphic concepts and 'laws' describing how landscapes and rivers can be used to understand historic and contemporary issues through raster-GIS and the ArcGIS toolbox.

Note
Prerequisite: Instructor permission. Introductory-level knowledge of Geomorphology, GIS and/or statistics is recommended.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives
Natural and Physical Sciences

GEOG 745 - Topics in Biogeography

Credits: 3

Examination of selected biogeography topics.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 445 or instructor permission.

Typically Offered
Fall

GEOG 747 - Soil Mapping

Credits: 3

Presents various approaches to soil mapping including the traditional soil-landscape paradigm, digital soil mapping, and a novel computer modeling. Local field sites will serve to reinforce techniques discussed.

Repeat for Credit
N

Requisites
Prerequisite: GEOG 121.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

GEOG 750 - Urban Geography

Credits: 3

A study of geographic principles relating to the distribution, function, and structure of cities: a geographic analysis and classification of urban settlements.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science or planning.

Typically Offered
Fall

GEOG 761 - Human Impact on the Environment

Credits: 3

Assessment of human impacts on the natural environment. Surveys changing human impacts on and attitudes towards the environment, and details alteration of water systems, the atmosphere, landforms, plants, and animals.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Spring

GEOG 765 - Geography of Natural Hazards

Credits: 3

Examines important emergency management issues related to hazard mitigation, preparedness, disaster response, and recovery, including sociocultural and physical components of disaster process. Assesses human vulnerability and risk to environmental calamities, such as droughts, floods, tornadoes, hurricanes, and earthquakes.

Repeat for Credit
N

Requisites
Prerequisite: Nine hours of social science.

Typically Offered
On sufficient demand

GEOG 770 - Perception of the Environment

Credits: 3

An examination of the way people perceive their geographic environment and the role of perception in spatial behavior. Perceptions of neighborhoods, cities, states, nations, frontier regions, and environmental processes are explored.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science with one course above the introductory level, and 6 hours of natural science with one course above the introductory level.

Typically Offered
Spring-Odd Years

GEOG 780 - Cultural Geography

Credits: 3

A study of the forms of human occupancy of landscapes, with consideration of innovations in the use of landscape, the origins and the dispersals of these innovations, and human attitudes toward the natural environment.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Spring-Even Years

GEOG 790 - Seminar in Geography

Credits: 1-3

Seminar in Geography

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

GEOG 795 - Topics in Geographic Information Science

Credits: 1-3

Selected geographic information science topic in science topic in an area of faculty specialization.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 302 or consent of instructor.

Typically Offered
Fall, Spring

GEOG 800 - Graduate Seminar in Geography

Credits: 0

Attendance of presentations and discussion of research procedures, results and philosophies.

Note
Required of all geography graduate students in resident.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring

GEOG 801 - Seminar in Qualitative and Mixed Methods Research

Credits: 3

Qualitative research techniques and integration of qualitative with basic statistical research techniques (mixed methods). Consideration of ethics, data collection, and data

analysis.

Repeat for Credit
N

Typically Offered
Spring

GEOG 808 - Geocomputation

Credits: 3

Explores the application of computationally-intensive approaches to the study of complex spatio-temporal problems. Students will learn to simulate, model, analyze, and visualize geographic phenomena that do not lend themselves to other mathematical and statistical methods.

Note
Enrolling students are strongly encouraged to have a strong background in GIS (e.g. GEOG 508 and GEOG 708) and familiarity with traditional statistical methods.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring

GEOG 815 - Rural Population Geography

Credits: 3

An examination of the population dynamics responsible for regional change in rural areas of the United States. Emphasis is placed on migration systems and changing population composition in Appalachia, Great Plains, rural South, and the Midwest.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or GEOG 700 or equivalent, and GEOG 715 or SOCIO 830.

Typically Offered
Fall-Even Years

GEOG 820 - Geographic Thought

Credits: 3

History of geographic thought from ancient to modern times, emphasizing major themes and significant individual contributions.

Note
Required for all Master's students in geography.

Repeat for Credit
Y

Typically Offered
Fall

GEOG 821 - Research and Professional Development in Geography

Credits: 3

Geographic research approaches, design, implementation and reporting, with applications to research proposals and thesis conceptualization and structuring. Programmatic expectations of graduate students and professional development.

Note
Required for all Master's students in geography.

Repeat for Credit
N

Typically Offered
Fall

GEOG 822 - Advanced Geographies of International Conservation

Credits: 3

Examines geographic perspectives of global biodiversity loss and conservation landscapes with an emphasis on the political, economic, and cultural dimensions of conservation around the world.

Repeat for Credit
N

Requisites
Prerequisite: 6 hours of social science.

Typically Offered
Fall

GEOG 830 - Seminar in Rural Geography

Credits: 3

Exploration of rural geography concepts and research. Examines social, economic, cultural and environmental issues for rural areas and small towns, including natural resources and stresses and concerns related to sustainability of rural livelihoods and communities.

Repeat for Credit
Y

Typically Offered
Other

GEOG 833 - Seminar in Sustainability Science, Thought, and Approaches

Credits: 3

Exploration of scientific, social, and philosophical aspects of sustainability, including concepts, approaches, and decision-making. Environmental, economic, and social considerations will be included.

Repeat for Credit
N

Typically Offered
Fall

GEOG 835 - Rural Economic Development

Credits: 3

Applications of regional and community development models in rural areas of North America. Emphasis is placed on case studies of locational relationships between regional economic profiles, including changes in structure, and indices of betterment.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 700 or 700-level statistics course.

Typically Offered
Fall

GEOG 837 - Political Ecology of Land Cover Change

Credits: 3

An introduction to political ecology, concentrating on land use and land cover change.

Repeat for Credit
N

Requisites
Prerequisite: at least 6 hours in social science.

Typically Offered
Spring

GEOG 840 - Advanced Environmental Geography

Credits: 3

An examination of post-European settlement land use and climate changes and their impact on rural landform stability. Emphasis is on the response of uplands and river systems to land use and climate change and the techniques for documenting historical landform change.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 221; GEOL 520.

Typically Offered
Fall-Odd Years

GEOG 841 - Advanced Fluvial Geomorphology

Credits: 3

Studies the forms and processes in streams and rivers. Topics include mechanics of open channel flow, sediment entrainment and transport, river form in determining bank material, and sediment supply.

Repeat for Credit
N

Typically Offered
Spring

GEOG 842 - Advanced Digital Geomorphology

Credits: 3

A thorough exploration of geomorphic concepts and 'laws', by leveraging the power of raster-GIS and ArcGIS models in combination with modern digital elevation datasets.

Note
Instructor permission. Introductory-level knowledge of Geomorphology, GIS and/or statistics is recommended.

Repeat for Credit
N

Typically Offered
Spring

GEOG 850 - Topics in Environmental Geography

Credits: 1-3

Topics in Environmental Geography

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 855 - Seminar in Cultural Geography

Credits: 3

An examination of the development and distribution of the rural cultural landscapes, focusing particularly on elements of the material landscape. Emphasis placed upon research conducted in the Great Plains.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 500.

Typically Offered
Spring-Even Years

GEOG 860 - Topics in Economic Geography

Credits: 1-3

Topics in Economic Geography

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 861 - Human Impact on the Environment

Credits: 3

Assessment of human impacts on and attitudes towards the environment, and details alteration of water systems, the atmosphere, landforms,plants, and animals.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of social science.

Typically Offered
Spring

GEOG 865 - Seminar in Medical Geography

Credits: 3

Emphasizing the pattern of social and environmental conditions on health and disease, this course examines medical care systems and health issues in rural areas of both developed and developing countries.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or GEOG 700.

Typically Offered
Spring-Odd Years

GEOG 870 - Topics in Human Geography

Credits: 1-3

Topics in Human Geography

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 880 - Spatial Data Analysis and Modeling

Credits: 3

An examination of statistical techniques and models for analyzing spatial data, including global and local measures of spatial association, spatial cluster analysis, spatial autoregressive and geostatistical models, and geographically weighted regression (GWR).

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 508 and GEOG 700 or equivalents.

Typically Offered
Spring

GEOG 890 - Advanced Spatial Analysis Techniques

Credits: 3

Integration of spatial analysis techniques and models with tools such as Geographical Information Systems and Remote Sensing as applied to rural resource systems. Explores strategies for adaptation of various types of spatial models into the GIS framework. Sources of data for analysis will be considered with special emphasis placed on use of remotely sensed data.

Repeat for Credit
Y

Requisites
Prerequisite: GEOG 705 and GEOG 708; GEOG 700 or STAT 702.

Typically Offered
Spring

GEOG 895 - Topics in Spatial Analysis

Credits: 1-3

Independent advanced study of a selected topic. An example is the use of remote sensing and GIS in environmental modeling.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GEOG 898 - Master's Report

Credits: 2

For students enrolled in geography option B.

Repeat for Credit
Y

Requisites
Prerequisite: Registration in Graduate School, with sufficient training to carry on the line of research undertaken. Consent of instructor.

Typically Offered
Fall, Spring, Summer

GEOG 899 - Master's Thesis

Credits: 6

For student enrolled in geography option A.

Repeat for Credit
Y

Requisites
Prerequisite: Registration in the Graduate School, with sufficient training to carry on the line of research undertaken. Consent of instructor.

Typically Offered
Fall, Spring, Summer

GEOG 900 - Methods, Theory, and Models in Geography

Credits: 3

Comparative analysis of contemporary methodology of geographic explanation showing their development, current status and future trends. Examination of problems and techniques of design, data collection, analysis, and interpretation which accompany particular research themes.

Repeat for Credit
Y

Requisites
Prerequisite: M.A. and consent of instructor.

Typically Offered
Fall

GEOG 990 - Research Problems in Rural Geography

Credits: 1-18

Individual study and research for students admitted to doctoral standing in the graduate school.

Repeat for Credit
Y

Requisites
Prerequisite: M.A. and consent of instructor.

Typically Offered
Fall, Spring

GEOG 999 - PhD Dissertation Research

Credits: 1-18

PhD Dissertation Research

Repeat for Credit
Y

Typically Offered
Other

GEOL 100 - Earth in Action

Credits: 3

The earth's physical, structural, and dynamic features; the most common minerals and rocks; processes affecting the earth.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Historical Perspectives
Natural and Physical Sciences

GEOL 101 - Geology Colloquium

Credits: 1-3

Topics in earth science chosen to illustrate current research of scientists and methods chosen to study the physical universe. At each offering of this course a syllabus will be available giving the topics to be studied and the details of administration of the course.

Repeat for Credit
Y

Typically Offered
Fall, Spring

GEOL 103 - Geology Laboratory

Credits: 1

Laboratory investigation of rocks and minerals; use of geologic and topographic maps; understanding of stream and groundwater processes and landforms.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites

Prerequisite or co-requisite: GEOL 100, GEOL 200, GEOL 115 or GEOL 125.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

GEOL 104 - Dynamic Earth Laboratory

Credits: 1

Covers basic principles and tools of the geosciences and their applications.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

GEOL 105 - Oceanography

Credits: 3

The oceans: their boundaries, contents, and processes.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

GEOL 110 - Introductory Geology Honors

Credits: 3

Survey of earth materials, features, and processes. Higher level of sophistication and challenge than GEOL 100.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

GEOL 115 - Environmental Geology

Credits: 3

Discussion of Earth system materials including minerals, soil, sediment, rocks, water, and atmospheric gases and how they are impacted by human-environmental interactions, including contamination of surface water and groundwater; energy resources and the green energy agenda; plate tectonics, volcanism and accumulation of greenhouse gases as a driver of climate change.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

GEOL 120 - Age of Dinosaurs

Credits: 3

Reconstructs the world of the dinosaurs, and places it in the context of Earth's dynamic physical and biological history. The inferred biology and ecology of dinosaur species will be discussed, and the theories concerning their origin, evolution, and extinction will be presented.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
On sufficient demand

GEOL 125 - Natural Disasters

Credits: 3

Discussion of geological phenomena such as earthquakes, volcanic eruptions, landslides, and floods, with particular emphasis on their causes, effects, and significance as hazards.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences
Social Sciences

GEOL 200 - Earth Through Time

Credits: 3

Earth Through Time provides a comprehensive survey of Earth's 4.5 billion year history. It explores the major events that have shaped the physical and biological development of Earth and how processes like plate tectonics and climate change interact with life, forming an integrated system.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Pre-requisite: GEOL 100

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Historical Perspectives
Natural and Physical Sciences

GEOL 305 - Sustainable Earth Resources

Credits: 3

Formation and development of Earth's energy, mineral (metallic and non-metallic), and water resources. Additional emphasis will be placed on public and environmental impacts (e.g., climate change, water quality, food resources, etc.) of responsible resource exploitation and whether resource extraction can truly be sustainable.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOG 121.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

GEOL 310 - Topics in Geology

Credits: 1-3

Seminar discussion of subjects of current interest in geology.

Repeat for Credit
N

Requisites
Prerequisite: A course in natural science at the 100 level or higher.

Typically Offered
Fall, Spring

GEOL 315 - Geology of the National Parks

Credits: 3

Geological survey of the land forms, structure, rocks and hazards of America's National Parks. Each park's geological development through time is explained with special attention placed on how the geologic processes

(igneous activity, mountain building and uplift, glaciation, weathering and erosion, wave action, and groundwater) shaped and created the exceptional landscapes in our national parks and the impact of human activities on these unique places that we as a nation have chosen to preserve.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOL 105 or GEOG 121

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

GEOL 360 - Quantitative Methods in Geoscience

Credits: 3

Design geological data sampling, investigate whether or not two geological datasets are significantly different, develop regression-based equations among various quantities, analyze data in Excel and MATLAB, and handle large geological datasets.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220 or STAT 225

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 399 - Honors Seminar in Geology

Credits: 1-3

Selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring

GEOL 499 - Senior Honors Thesis

Credits: 1-3

Directed research and preparation of an honors thesis.

Note
Open only to seniors in the arts and sciences honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GEOL 501 - Independent Study in Geology

Credits: 1-3

Independent reading; field or laboratory investigations, or both, of geologic problems.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring, Summer

GEOL 502 - Mineralogy

Credits: 3

Physical and chemical properties of minerals; crystallography; mineral formation; applications to economic geology and petrology; emphasis on mineral identification through laboratory analysis.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100, GEOL 103, and either CHM 110

and CHM 111, or CHM 210 or CHM 250

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 503 - Petrology

Credits: 3

Investigation of the physical and chemical processes forming igneous, metamorphic and sedimentary rocks and their links to tectonic processes that form the Earth's crust and mantle. Develop petrogenetic understanding through macroscopic and mircroscopic examination of rock mineralogy and textures.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 502

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 506 - Environmental Studies

Credits: 3

Physical and chemical qualities of natural environments and health from a geologic perspective-detection and prediction of environmental changes, identification of sources of pollutants and their movements in soils, rocks, and waters.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100.

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

GEOL 510 - Geology of Planets

Credits: 3

Explores recent findings concerning the origin and evolution of planetary bodies in our Solar System, and of exoplanets in orbit around stars other than our Sun.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOL 125

Typically Offered
Summer

K-State 8
Natural and Physical Sciences

GEOL 512 - Earth Science

Credits: 3

A critical study of the atmosphere, weather, climate, composition, and processes of the earth; also, the interaction of these in producing the pattern of landforms and human activity.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOG 121

Typically Offered
On sufficient demand

GEOL 520 - Geomorphology

Credits: 3

Classroom, laboratory, and field studies of landforms and surficial deposits, with an emphasis on earth-surface processes. Classroom lectures and discussions; laboratory exercises; and field investigations.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOG 121.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

GEOL 530 - Structural Geology

Credits: 3

Mechanics of the earth's crust; origin and interrelation of structures of the Earth. Students learn to identify the main structures, to interpret and integrate them in a regional geodynamic context. In addition, students learn to collect field data and to do quantitative analyses using stereographic projection.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 502

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 540 - Geologic Record of Climate Change

Credits: 3

Introduction to the major forcing and feedback mechanisms responsible for climate change, and climate proxies from sedimentological, biological and geochemical archives. Investigation of key events on the Earth's climate history.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOG 121.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

GEOL 560 - Field Methods

Credits: 3

Introduction to methods used to collect geologic data in the field. Emphasis is placed on map-reading, rock description, use of aerial photographs, and construction of geologic maps and cross sections. Learn how to write a field mapping report and safety protocols for field work.

Note
One hour recitation and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503 and GEOL 530 (or co-enrollment in GEOL 530)

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 581 - Principles of Paleontology

Credits: 3

An overview of paleontological principles relating to the application of the fossil record to questions of evolution, paleoecology, paleoenvironment, depositional dynamics, facies analysis, and stratigraphy. Identification of main fossil groups.

Note
Two 1.5 hour lectures, and one 3-hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 200

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 599 - Senior Thesis

Credits: 1-3

Directed research and preparation of a senior thesis.

Repeat for Credit
Y

Typically Offered
Fall, Spring

GEOL 601 - Economic Geology

Credits: 3

Geology and origin of mineral deposits, with an emphasis on critical minerals, suistainibility, economic significance, and resources necessary for society.

Repeat for Credit
N

Requisites
GEOL 503

Typically Offered
Spring

GEOL 602 - Mineral Exploration for a Sustainable Future

Credits: 3

Covers basic mineral exploration techniques required for a sustainable future for society. Students will gain experience in different geological, geophysical (induced polarization, magnetic and radiometry surveys), and geochemical techniques employed by the industry, with specific emphasis on critical materials used for the energy transition. Multidisciplinary approaches used to interpret large datasets to generate exploration targets which can be sustainably obtained are taught as well as guest lectures from industry professionals.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503.

Typically Offered
On sufficient demand

GEOL 605 - Introduction to Aqueous Geochemistry

Credits: 3

Application of chemical principles to geological environments. Emphasis is placed on aqueous systems. Topics include acid-base and redox reactions in natural environments, geochemical kinetics, surface water and groundwater sampling, analytical geochemistry, and data analysis.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 OR CHM 210 and CHM 211 Recommended Foundation Course: GEOL 502

Typically Offered
Spring

GEOL 611 - Hydrogeology

Credits: 3

Physical and chemical principles of the water cycle (evaporation, condensation, precipitation, runoff, stream flow, percolation, and groundwater flow), as well as environmentally relevant applications based on case studies. Extensive coverage of groundwater hydrology, surface water hydrology, soil moisture, contemporary global issues related to water resources, including pollution control, and also hydrogeochemistry will be discussed.

Note
Familiarity with web browsers, MS Excel or other spreadsheet software, word processor. Calc I and Calc II and Chm I and Chm II are recommended. Consult the instructor if you have not taken these courses.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 100 or GEOL 115.

Typically Offered
Spring

GEOL 620 - Volcanology

Credits: 3

Examines processes associated with active volcanoes as revealed by volcanic deposits. Emphasis on influence of volcanoes on human civilizations including economic deposits, climate change, or volcano monitoring.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503

Typically Offered
On sufficient demand

GEOL 625 - Introduction to Engineering Geology and Petrophysics

Credits: 3

Students learn basic fundamentals to solve real-world problems in the area of geology and petrophysics. A field trip to an onshore oil rig in Kansas helps consolidating course materials with demands.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220

Typically Offered
Spring

Cross-listed
GEOG 825

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

GEOL 630 - Sedimentology and Stratigraphy

Credits: 3

Identification of sedimentary rocks and interpretation of sedimentary properties and depositional environments; analysis of spatial and temporal relationships to interpret depositional history and basin evolution.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503.

Typically Offered
Spring

GEOL 631 - Petroleum Geology

Credits: 3

Summarizes the fundamentals of Geology that need to be understood and integrated to manage petroleum reservoirs as well as other fluid resources. The course focuses on lessons learned from exploration and exploitation of petroleum reservoirs but techniques taught are transferrable to renewable resources.

Repeat for Credit
N

Requisites
Pre-requisites: GEOL 530 and GEOL 630

Typically Offered
Fall

GEOL 640 - Introduction to Geophysics

Credits: 3

Introduction to geophysics, its uses in studies of the earth's interior, its utility of illuminating subsurface geological features, and its applications in fields such as groundwater studies and the development of energy resources.

Note
Two hours recitation, and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220, PHYS 113, or PHYS 213, or instructor consent.

Typically Offered
Fall

GEOL 642 - Field Geophysics

Credits: 3

Acquisition and computer processing of geophysical data such as those from seismic reflection, seismic refraction, gravity, magnetic and electrical methods.

Note
One hour recitation and four hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 640; co-enrollment, or instructor consent

Typically Offered
Spring

GEOL 650 - Geomicrobiology

Credits: 3

An introduction to microbiology and biogeochemical cycling and examination of interactions between microbes and geological environments. Topics include biomineralization, microbial weathering of minerals, and microbial impacts to greenhouse gas levels and water quality.

Note
Three hours a week. Lecture and Lab

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 OR CHM 210 and CHM 211

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 680 - Field Geology

Credits: 3

Field projects in the Rocky Mountains designed to give students practical experience in apply geologic knowledge and skills.

Note
Three six-day weeks in the field.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503, GEOL 530, and GEOL 560.

Typically Offered
Summer

GEOL 701 - Economic Geology

Credits: 3

Geology and origin of mineral deposits, with an emphasis on critical minerals, suistainibility, economic significance, and resources necessary for society.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503.

Typically Offered
Spring

GEOL 703 - Economic Geology Laboratory

Credits: 1

Laboratory activities related to metallic and nonmetallic mineral deposits, including detailed studies of selected deposits.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 701 or concurrent enrollment.

Typically Offered
Fall

GEOL 704 - Carbonate Paleoenvironments

Credits: 3

Examination of the biological, physical, and chemical factors in reefs and shallow carbonate platform environments through Earth history, including their modern analogs. Attention will be given to the geometry of carbonate facies, their geographic and temporal distribution, and their sedimentary fabric and porosity.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 581 and GEOL 630.

Typically Offered
On sufficient demand

GEOL 705 - Biomineralization

Credits: 3

Discussion and critique of current and classic research in biomineralization.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 581 and GEOL 605.

Typically Offered
On sufficient demand

GEOL 708 - Sedimentary Geochemistry

Credits: 3

Geochemical principles and processes in deposition and diagenesis of sediments; different chemical pathways in the exogenic cycle.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503 and MATH 220.

Typically Offered
On sufficient demand

GEOL 711 - Water Resources Geochemistry

Credits: 3

Geochemistry of ground and surface waters; emphasis on mineralogical, biochemical, and hydrologic controls on inorganic and organic interactions in natural waters.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 OR CHM 210 and CHM 211; Recommended Foundation Course: GEOL 605

or AGRON 605

Typically Offered
Fall

GEOL 712 - Advanced Geochemistry

Credits: 3

Application of chemical principles to high temperature conditions relevant to igneous and metamorphic systems; emphasis is on integrating and utilizing a variety of scientific techniques (e.g., microscopy, geochemical analysis, modelling, theory) to solve problems and communicate ideas effectively.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503 and CHM 230 OR CHM 250 (or instructor permission)

Typically Offered
On sufficient demand

GEOL 714 - Rock Microstructures and Geologic Processes

Credits: 3

Examination of mineral shapes, orientations and assemblages (rock fabric) as a record of geologic processes.

Note
Two hours lecture and two hour lab.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 503 and CHM 230.

Typically Offered
On sufficient demand

GEOL 715 - Dating Earth Materials

Credits: 3

Discusses how ages are measured for rocks, minerals, waters, and sediments by analysis of isotopes produced by radioactive decay or cosmic rays.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230, GEOL 503.

Typically Offered
On sufficient demand

GEOL 720 - Quaternary Geology

Credits: 3

Quaternary stratigraphy as the framework for studying the geomorphic, climactic, archaeological, and biological changes of the last two million years, with emphasis on the North American record.

Note
Three hours recitation a week and one field trip a semester.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 630.

Typically Offered
On sufficient demand

GEOL 731 - Petroleum Geology

Credits: 3

Summarizes the fundamentals of Geology that need to be understood and integrated to manage petroleum reservoirs as well as other fluid resources. The course focuses on lessons learned from exploration and exploitation of petroleum reservoirs but techniques taught are transferrable to renewable resources.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 530 and GEOL 630

Typically Offered
Fall

GEOL 735 - Fossil Fuel Sedimentology

Credits: 3

Introduces geology and geochemistry of fossil fuels. Provides basic background information on carbon chemistry and its relationship to fossil fuels such as oil, natural gas and coal, as well as geochemical and petrologic (microscopic) characteristics of sedimentary organic matter and the distribution of fossil fuels through geologic time. Case studies of particular fossil fuel reserves are included.

Repeat for Credit
N

Requisites
Prerequisite: CHM 230

Typically Offered
On sufficient demand

GEOL 738 - Formation Evaluation

Credits: 3

Investigates projects on well log interpretation, petro-physical calculations, log corrections, and post-drilling decision workflows through lectures, discussions, laboratory exercises, or field trips.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 731.

Typically Offered
Fall

GEOL 740 - Regional Geology

Credits: 3

Interpretations of geomorphological, structural, stratigraphic, petrologic (igneous, metamorphic, and sedimentary), and tectonic history of selected geological regions on Earth. Classroom and field investigation.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 100, GEOL 103, and Instructor consent

Typically Offered
Spring, Summer

GEOL 741 - Seismic Data Processing

Credits: 3

Principles of 3D seismic data processing techniques and the application of industrial software package(s) to process raw field seismic reflection data to render it in a form suitable for the seismic interpretation stage. This form of seismic data is utilized in subsurface reservoir characterization.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 640, co-enrollment or instructor consent

Typically Offered
On sufficient demand

GEOL 742 - Seismic Data Interpretation

Credits: 3

Fundamental interpretation of 3D seismic reflection data as applied to hydrocarbon exploration and development problems. Students will conduct a project interpreting surface 3D seismic reflection data using industrial software package(s) for subsurface reservoir characterization.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 640, co-enrollment in GEOL 640, or Instructor consent

Typically Offered
Fall

GEOL 745 - Exploration Geophysics

Credits: 3

Principles and applications of seismic, gravity, magnetic, and other geophysical methods used in energy, mining, and other industries to locate subsurface targets of interest.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 742

Typically Offered
On sufficient demand

GEOL 747 - Introduction to Matlab

Credits: 3

Practical introduction to Matlab designed for students who may have limited experience with data processing. Includes handling data (import/export from other softwares/format), data structure, data processing, data visualization (2D, 3D graphs), designing functions, selection statements, loops, programming, descriptive statistics, plots for exploratory data analysis, fit probability distributions to data, regression analysis.

Repeat for Credit
N

Typically Offered
Spring

GEOL 750 - Geologic Evolution of Planet Earth

Credits: 3

Integration of the various geologic disciplines into a broad-based understanding of the history and dynamics of the earth.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Co-enrolled in other Geology BA or BS courses or Instructor consent

Typically Offered
On sufficient demand

GEOL 760 - Geochemical and Biogeochemical Modeling

Credits: 3

Use of popular geochemical modeling software to analyze geochemical and biogeochemical reactions in aqueous environments.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 Recommended Foundation Course: GEOL 605.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GEOL 770 - Subsurface Methods

Credits: 3

Principles and applications of subsurface geology.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 530 or concurrent enrollment.

Typically Offered
Spring

GEOL 790 - Problems in Geology

Credits: 0-18

Work is offered in mineralogy, paleobiology, paleoecology, stratigraphy, structural geology, igneous, metamorphic, and

sedimentary petrology, geomorphology, planetary geology, hydrogeology, geochemistry, and isotope geology.

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for problem undertaken.

Typically Offered
Fall, Spring, Summer

GEOL 800 - Graduate Seminar in Geology

Credits: 1-18

Topics in geology, geochemistry, and geophysics.

Repeat for Credit
Y

Typically Offered
Fall, Spring

GEOL 801 - Advanced Paleobiology

Credits: 2

Detailed study of the functional morphology, ecology, biogeography, evolution, and classification of selected groups.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 704 or GEOL 705.

Typically Offered
On sufficient demand

GEOL 802 - Mineral Exploration for a Sustainable Future

Credits: 3

Investigates basic mineral exploration techniques required for a sustainable future for society. Students gain experience in different geological, geophysical (induced polarization, magnetic and radiometry surveys), and geochemical techniques employed by the industry, with specific emphasis on critical materials used for the energy transition. Multidisciplinary approach used to interpret large datasets to generate exploration targets which can be sustainably obtained are taught as well as guest lectures from industry professionals.

Note
This course includes a required 5-day field trip

Repeat for Credit
N

Requisites
Pre-requisite: GEOL 503

Typically Offered
On sufficient demand

GEOL 804 - Igneous and Metamorphic Petrology

Credits: 2 - 4

Selected problems in the petrogenesis of igneous and metamorphic rocks.

Note
Two to three hours lecture and one to three hours lab per week.

Repeat for Credit
Y

Requisites
GEOL 503

Typically Offered
On sufficient demand

GEOL 805 - Advanced Igneous and Metamorphic Petrology

Credits: 3

Explores the geochemical, petrographic, and petrologic characteristics of the common igneous and metamorphic rocks, building on concepts learned in introductory-level petrology courses.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 503 or equivalent.

Typically Offered
Fall

GEOL 806 - Sedimentary Petrology

Credits: 4

Petrography, classification, and origin of terrigenous and chemical sedimentary rocks.

Note
Three hours lecture and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 630

Typically Offered
On sufficient demand

GEOL 807 - Advanced Sedimentary Petrology

Credits: 2

Field and laboratory study of selected problems in the origin of sedimentary rocks.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 806.

Typically Offered
On sufficient demand

GEOL 810 - Isotope Geology

Credits: 3

The principal goal of the course is to understand how variations in radiogenic and stable isotopic abundances can be used to understand Earth processes, including evolution of the solid Earth, the hydrological cycle, the carbon cycle, and climate change.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
GEOL 503 or Instructor Consent

Typically Offered
Fall

GEOL 825 - Advanced Engineering Geology and Petrophysics

Credits: 3

Students learn advanced concepts with broad applications in the oil/gas industry, analyze actual experimental data, and use state-of-the-art software in the areas of unconventional reservoirs.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220

Typically Offered
Spring

Cross-listed
GEOL 625

GEOL 830 - Geotectonics

Credits: 3

Origin and history of major tectonic elements of the earth, especially their interaction through time.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 530.

Typically Offered
On sufficient demand

GEOL 835 - Advanced Petroleum Exploration, Imperial Barrel Award Competition

Credits: 3

Evaluation of exploration prospects in frontier and underdeveloped petroleum provinces using borehole-derived and geophysical data. Team taught course that uses industry provided datasets and current data management and interpretation software to reach drill or no-drill decisions based on science, risk analysis, and economics.

Repeat for Credit
N

Typically Offered
On sufficient demand

GEOL 870 - Groundwater Contaminant Remediation

Credits: 3

Identification and mensuration of groundwater contaminants and consideration of means for their remediation strategies.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 711, GEOL 611, MATH 633 and MATH 634.

Typically Offered
On sufficient demand

GEOL 872 - Biogeochemistry of Soils and Sediments

Credits: 3

Review and discussion of current understanding of the chemical, biological, and mineralogical interactions of groundwater, soils, shallow and deep sediments. This course will deal with biotic controls on chemistry of the environment [and] with the geochemical control of the structure and function of ecosystems.

Repeat for Credit
N

Requisites
Prerequisite: GEOL 711, GEOL 605.

Typically Offered
On sufficient demand

GEOL 880 - Clay Mineralogy

Credits: 3

Geologic occurrences, physical properties, atomic structures, and the identification of clay minerals, including thermal analytical methods and the study of X-ray diffraction patterns.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: GEOL 503 or GEOL 711 or AGRON 205

Typically Offered
On sufficient demand

GEOL 890 - Advanced Seismology

Credits: 3

Mechanics of faulting and earthquakes; seismotectonics; advanced data analysis; seismic wave propagation in three-dimensionally inhomogeneous media; earthquake prediction and hazard analysis.

Note
One hour recitation and four hours lab per week.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 114 and GEOL 640

Typically Offered
On sufficient demand

GEOL 898 - Master's Report Research

Credits: 1-2

Research or practice of geology summarized in a scholarly report.

Repeat for Credit

Y

Requisites
Prerequisite: Enrollment in geology option B and permission of instructor.

Typically Offered
Fall, Spring, Summer

GEOL 899 - Master's Thesis Research

Credits: 1-6

Research in geology culminating in a master's thesis.

Repeat for Credit
Y

Requisites
Prerequisite: Enrollment in geology option A and permission of instructor.

Typically Offered
Fall, Spring, Summer

GEOL 999 - Research in Geology, PhD

Credits: 1-18

Research in Geology, PhD

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GERON 215 - Introduction to Gerontology

Credits: 3

Introductory exploration of diverse biological, psychological, and sociological factors that impact the aging process across the life course.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

GERON 425 - Introduction to Physical Health & Well-Being of Older Adults

Credits: 3

Introductory examination of processes involved in physiological aging that considers the effects of normal aging, chronic and acute disease, and environmental factors on systems of the body. Focus on health promotion and practical application with diverse populations to prepare students for careers in the field of aging.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198

Typically Offered
Spring-Odd Years

K-State 8
Natural and Physical Sciences

GERON 430 - Introduction to Mental Health & Aging

Credits: 3

Introductory exploration of mental health and aging utilizing a variety of theoretical perspectives within an overall systems framework. Major emotional, mental, and psychiatric functions and problems encountered in old age will be examined along with evidence-based approaches to assessment, intervention, and treatment.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

K-State 8
Social Sciences

GERON 501 - Culture Change in Long-Term Care

Credits: 1

This course will cover the basic characteristics of traditional and culture change nursing home models. Student will learn about the various processes of organizational change, the steps toward change, and potential regulatory, environmental and social barriers to major change. The course will include discussions about the necessity to change the way care is provided in such areas as dining, bathing, family/relationships, and environment.

Note
This overview is recommended as the first course for students unfamiliar with culture change and is delivered online.

Repeat for Credit
N

Typically Offered
Fall

GERON 502 - Measuring Change in Long-Term Care

Credits: 1

Topics covered will include process and outcome measures in nursing home change as well as the importance of and the utility of measurement for the advancement of quality of life issues in long-term care. Students will gain an understanding of how regulatory support will be more likely to occur if culture change features can show a cost savings as well as improvements in the quality of life of residents.

Note
This on-line course should be taken after or concurrently with GERON 501.

Repeat for Credit
N

Typically Offered
Fall

GERON 503 - Creating Home in Long-Term Care

Credits: 1

Students will gain a better understanding of the interdependent networks within nursing homes, environmental factors in the development of community and culture in a nursing home, learn how fostering resident, family and staff interactions can improve quality of life for all those groups, understand the role of structural redesign and innovation, and consider how environmental change can improve relationships within the larger community.

Note
This on-line course should be taken after or concurrently with GERON 501.

Repeat for Credit
N

Typically Offered
Spring

GERON 504 - Strengthening Staff in Long-Term Care

Credits: 1

Topics covered will include the development of deeper relational bonds within the nursing home environment, benefits of permanent staffing as a key component of building a relationship centered culture, how these types of changes can benefit and empower staff, and models for bridging cultural divides between long-term care administrators and staff to benefit the residents. A review of the impact of traditional models of managed care that focus on providing food, shelter, and medical attention and factors that hinder purposeful, proactive interactions between residents, families and staff.

Note
This on-line course should be taken after or concurrently with GERON 501.

Repeat for Credit
N

Typically Offered
Fall

GERON 505 - Dining in Long-Term Care

Credits: 1

Students will develop an appreciation of the impact dining has on the quality of social, physical and emotional health and quality of life of nursing home residents, become aware of the meanings/customs that residents may associate with

the dining experience, recognize the importance of the dining experience in the overall culture of the home and develop an understanding of various institutional dining styles.

Note
This online course should be taken after or concurrently with GERON 501.

Repeat for Credit
N

Typically Offered
Spring

GERON 506 - Activities in Long-Term Care

Credits: 1

A review of common activities in long-term care, their importance in resident care, the importance of meaningful activity and relationships, how the long-term care culture impacts resident individuality/choice, and individualized care plans.

Note
This on-line course should be taken after or concurrently with GERON 501.

Repeat for Credit
N

Typically Offered
Spring

GERON 516 - Introduction to Aging Veterans

Credits: 3

An introductory overview to the unique issues involved with aging military veterans and their families. Topics include military structure, major United States conflicts, personnel issues resulting from conflicts since WWII, Veteran benefits, cultural issues, veteran health issues and application to working with aging veterans.

Repeat for Credit
N

Typically Offered
Fall

GERON 525 - Introductory Topics in Gerontology

Credits: 1-3

Introductory study of selected topics in gerontology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GERON 530 - Introduction to Sexuality & Aging

Credits: 3

Introductory exploration of sexual development and expression across the lifespan with an emphasis on older adults. Topics include misconceptions about older adult sexuality, physiological changes, social barriers and challenges, sexual diversity, policy and access considerations, and impacts of disease and cognitive decline.

Repeat for Credit
N

Typically Offered
Summer-Even Years

K-State 8
Human Diversity within the U.S.
Social Sciences

GERON 540 - Introduction to Creativity & Aging

Credits: 3

Introductory overview of the transformation of the aging brain that can lead to changes in creative output over time. Students will grow an appreciation for creativity produced and inspired by older people while simultaneously exploring their own creative potential.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State 8
Aesthetic Interpretation
Social Sciences

GERON 574 - Introduction to Environments & Aging

Credits: 3

Introductory interdisciplinary exploration of preferences and needs of older adults' physical environments. Emphasis placed on successful environmental adaptations, design and management of housing, institutional facilities, neighborhoods, and communities.

Repeat for Credit
N

Typically Offered
Summer-Odd Years

K-State 8
Social Sciences

GERON 575 - Introduction to Diversity in the Aging Experience

Credits: 3

Introductory exploration of aging in the contexts of the social determinants of health and diversity, equity, inclusion, and belonging.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

GERON 576 - Introduction to Program Design, Implementation, & Evaluation in Gerontology

Credits: 3

Introductory study of selecting, adapting, designing, implementing, and evaluating effective prevention and intervention programs for older adults.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences

GERON 577 - Introduction to Policy and Advocacy in Gerontology

Credits: 3

Introductory examination of complex and interrelated policies and programs that impact the well-being of older adults.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

GERON 578 - Introduction to Aging Family Dynamics & Caregiving

Credits: 3

Introductory exploration of inter-generational, interpersonal, and care-giving relationships during the middle and later years of the family life cycle.

Repeat for Credit
N

Typically Offered
Summer-Even Years

K-State 8
Social Sciences

GERON 605 - Practicum in Gerontology

Credits: 1-3

Supervised field experience in an aging-related setting as a

practical application of gerontological knowledge and skills.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GERON 610 - Seminar in Long-Term Care Administration

Credits: 3

Encourages the development of leadership skills within long-term care organizations by covering administrative principles involved in planning, organizing, and directing and includes in-depth exposure to the standards and regulations governing long-term care, social and medical models of care, and the process of change within these organizations.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

GERON 615 - Long-Term Care Administration Internship

Credits: 1-9

Supervised field experience in an approved long-term care setting designed to meet the requirements for the National Association of Long-Term Care Administrator Board exam. Most students who successfully complete this experience will be eligible to sit for the necessary national and/or state administrator exams.

Note
Email: gerontology@ksu.edu for instructor permission.

Repeat for Credit
Y

Requisites
Prerequisite: GERON 610 and Instructor Permission.

Typically Offered
Fall, Spring, Summer

GERON 620 - Independent Study in Gerontology

Credits: 1-3

Independent study on topics in gerontology.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GERON 625 - Advanced Physical Health and Well-Being of Older Adults

Credits: 3

Advanced examination of the processes involved in physiological aging that considers the effects of normal aging, chronic and acute disease, and environmental factors on systems of the body. Focuses on health promotion and practical application with diverse populations to prepare students for careers in the field of aging.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

K-State 8
Natural and Physical Sciences

GERON 630 - Advanced Mental Health and Aging

Credits: 3

Advanced exploration of mental health and aging utilizing a variety of theoretical perspectives within an overall systems framework. Major emotional, mental, and psychiatric functions and problems encountered in old age

are examined along with evidence-based approaches to assessment, intervention, and treatment.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

K-State 8
Social Sciences

GERON 700 - Gerontechnology

Credits: 3

An interdisciplinary approach to the understanding of the biological, environmental, and social spheres where technology and gerontology meet. Topics include the interrelationship between population dynamics and technological change, technological research and devices that may improve elders' lives, particular issues for rural communities, and the social and cultural meanings, challenges, and benefits of gerontechnologies. Particular emphasis will be given to placing both population aging and technological change in a broader social perspective.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

GERON 711 - Advanced Death and Dying

Credits: 3

An in-depth evaluation of the experience of death, dying, loss and bereavement through a multi and cross-cultural lens. Emphasis will be given to strategies for working with older adults and their support systems. These strategies include coping and preparation for end of life-process and advanced care planning. Students will also be encouraged to share their own experiences with death, dying and coping.

Repeat for Credit
N

Typically Offered
Fall

GERON 715 - Aging Veterans

Credits: 3

Introduction to the unique issues involved with aging military veterans. Topics include basic military structure, media portrayal of war, personnel issues resulting from American conflicts since WWII, veteran benefits, cultural issues, veteran health issues and navigating a career within the U.S. federal system.

Repeat for Credit
N

Typically Offered
Fall

GERON 720 - Design for Aging in the Modern World

Credits: 3

This course will explore the dynamic process of aging and the role of the built environment in the, multidimensional as well as multi-spheral spaces of life-course occurring in the family, work, education, leisure as well as other domains and its relationship to the environment from a life-course perspective. The emphasis on aging and the environment will focus on how individuals and groups manage interactions associated with the social and physical settings. The course will develop students' foundational knowledge in the theories of aging, environment and behavior, and the ecology of the aging process. These theories will be used as the basis to discuss and debate contemporary issues that confront an aging society. Three levels of the environment will be explored: the microenvironment including those products that people of all ages interact with on a daily basis; the meso (or middle) environment that includes residential and work settings that shape our relationships with family, friends, and associates, and lastly at the macro environment of our communities where people are connected to the larger social settings, services and supports that make up our cities and rural settings, both from a national and international perspective. Each of the sections covered will acknowledge how behavior is influenced by the environment and spans the life-cycle.

Repeat for Credit
N

Typically Offered
Fall

GERON 725 - Advanced Topics in Gerontology

Credits: 1-3

Advanced study of selected topics in gerontology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GERON 730 - Advanced Sexuality and Aging

Credits: 3

Advanced exploration of sexual development and expression across the lifespan with an emphasis on older adults. Topics include misconceptions about older adult sexuality, physiological changes, social barriers and challenges, sexual diversity, policy and access considerations, and the impacts of disease and cognitive decline.

Repeat for Credit
N

Typically Offered
Summer-Even Years

GERON 740 - Advanced Creativity and Aging

Credits: 3

Advanced overview of transformation of the aging brain that can lead to changes in creative output over time. Students will grow an appreciation for creativity produced and inspired by older people while simultaneously exploring their own creative potential.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State 8
Aesthetic Interpretation
Social Sciences

GERON 772 - Adult Development Aging

Credits: 3

Exploration of the biological, psychological, and sociological aspects of individual and interpersonal development in aging from a life course perspective.

Repeat for Credit
N

Typically Offered
Fall

GERON 773 - Physical Health and Nutrition in Aging

Credits: 3

This course identifies the basic physiologic changes during aging and their impacts in health and disease. The focus will be on successful aging with special emphasis on physical activity and nutrition. Practical application to community settings is addressed.

Repeat for Credit
N

Requisites
Prerequisite: Enrolled in Gerontology (MS) or Gerontology Graduate Certificate.

Typically Offered
Fall

GERON 774 - Advanced Environments and Aging

Credits: 3

Advanced interdisciplinary exploration of preferences and needs of older adults' physical environments.
Emphasis placed on successful environmental adaptations, design and management of housing, institutional facilities, neighborhoods, and communities.

Repeat for Credit
N

Typically Offered
Summer-Odd Years

GERON 775 - Advanced Diversity in the Aging Experience

Credits: 3

An advanced exploration of aging in the contexts of the social determinants of health and diversity, equity, inclusion, and belonging.

Repeat for Credit
N

Typically Offered
Fall, Spring

GERON 776 - Advanced Program Design, Implementation, & Evaluation in Gerontology

Credits: 3

Advanced study of selecting, adapting, designing, implementing, and evaluating effective prevention and intervention programs for older adults.

Repeat for Credit
N

Typically Offered
Spring

GERON 777 - Advanced Policy & Advocacy in Gerontology

Credits: 3

Advanced examination of complex and interrelated policies and programs that directly and indirectly impact the well-being of older adults.

Repeat for Credit
N

Typically Offered
Fall, Spring

GERON 778 - Advanced Aging Family Dynamics & Caregiving

Credits: 3

Advanced exploration of intergenerational, interpersonal, and caregiving relationships during the middle and later years of the family life cycle.

Repeat for Credit
N

Typically Offered
Summer-Even Years

GERON 779 - Professional Seminar in Gerontology

Credits: 3

Students apply and integrate knowledge gained in earlier courses and strengthen skills in ethical decisions-making through applications in gerontology-related areas such as advocacy, professionalism, family and workplace issues. Students from a variety of professions bring their unique perspective to bear on topics of common interest.

Repeat for Credit
N

Typically Offered
Summer

GERON 799 - Professional Application in Gerontology

Credits: 1-3

Individual study that forms the basis of the master's culminating experience.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRAD 700 - Graduate Education Abroad

Credits: 0-18

"Education abroad" is **a chance to pursue your college**

studies in a foreign country. Students attend lectures or carry out research at a foreign university or through K-State's education-abroad program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRAD 740 - Water and Society: Interdisciplinary Foundation

Credits: 3

Interdisciplinary course focused on the natural and human elements of water resource systems; introduction to traditional disciplinary procedures, theory, and models; cross-disciplinary approaches to understand and quantify dynamic system relationships; case study for integrated problem solving, management and policy.

Note
Three hours recitation.

Repeat for Credit
N

Requisites
Prerequisite: Senior or graduate standing.

Typically Offered
Spring

GRAD 820 - Leadership Practicum

Credits: 3

Develops the connections between leadership theory and practice. By conducting a practicum project, students demonstrate the ability to apply concepts and ideas from the study of leadership to a practical leadership problem within an organization.

Repeat for Credit
Y

Requisites
Prerequisite: LEAD 801.

Typically Offered
Fall, Spring

GRAD 850 - Foundations of Homeland Security

Credits: 3

This introductory course provides the foundational framework for the Homeland Security program and surveys the major policies, practices, concepts, and challenges confronting practitioners in Homeland Security. Topics include an overview of threats to homeland security and an introduction to the roles, functions, and policies of organizations and government structures at the federal, tribal, state, and local levels. The National Response Framework (NRF) and National Incident Management System (NIMS) are studied.

Repeat for Credit
N

Typically Offered
Fall

GRAD 851 - Homeland Security Threats

Credits: 3

Students will understand the various types of disasters, methodologies of disaster recovery, and roles and responsibilities of Federal, State, and local government. It will address the impact of disasters, including acts of terrorism, to include economic, physical, emotional, and psychological effects. Students will understand how disasters affect society, risk mitigation strategies, and how the levels of government coordinate to address disaster impacts.

Repeat for Credit
N

Typically Offered
Fall

GRAD 852 - Organizations Amid Crisis

Credits: 3

The fundamental concepts and subject areas necessary for an organization to address in preparing for catastrophic emergency events and other events encountered by organizations as a result of homeland security are examined. It outlines the organization and practical steps required to develop an effective crisis response plan. The relationships between private and public service

organizations, including governmental, nonprofit, and hybrid types are studied.

Repeat for Credit
N

Typically Offered
Fall

GRAD 853 - Homeland Security Process and Management

Credits: 3

Students will understand strategic, political, legal, and organizational challenges associated with the defense of the U.S. homeland, efforts that are under way to meet these challenges, and possible policy options. Intergovernmental responsibilities and relationships of local, state, and federal agencies in an "all-hazards" approach to disasters are emphasized. Major policy and regulatory issues of emergency management, including the role of the military in response to disaster operations, are examined.

Repeat for Credit
N

Typically Offered
Fall

GREEK 101 - Classical Greek I

Credits: 5

An introduction to the grammar, vocabulary, and structure of Attic Greek.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GREEK 102 - Classical Greek II

Credits: 5

Develops reading and comprehension skills in the language of classical Athens, with a focus on further developing knowledge of grammar, vocabulary, and reading. Critical reading of texts in the original Greek.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GREEK 301 - Intermediate Greek-Prose

Credits: 3

The reading of classical Greek prose at an intermediate level.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GREEK 302 - Intermediate Greek-Poetry

Credits: 3

Intermediate readings in classical Greek poetry. Renewed focus on Greek grammar, style, and vocabulary. Introduces a new dialect of Greek. Critical reading of texts.

Repeat for Credit
N

Typically Offered
Spring

K-State 8

Aesthetic Interpretation
Global Issues and Perspectives

GRMN 002 - Orientation for Summer School Program

Credits: 0

Orientation for Summer School Program

Repeat for Credit
N

Typically Offered
Other

GRMN 101 - German I

Credits: 4

Develops basic language skills and cultural awareness to function in everyday situations in German-speaking communities, for students with little to no prior German experience. Conducted in German with practice in speaking, listening, reading, and writing.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 102 - German II

Credits: 4

Continuation to the introduction of modern German. Practice of the spoken language, additional experience in reading and with a variety of additional media.

Repeat for Credit
N

Requisites
Recommended Prerequisite: GRMN 101 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 201 - German III

Credits: 3

Conclusion of the introduction to modern German. Continued practice of the spoken language, reading, and additional experience with a range of audio and visual media.

Repeat for Credit
N

Requisites
Recommended Prerequisite: GRMN 102 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 222 - Elementary German Conversation IIIA

Credits: 2

Practice in beginning conversational German and review of grammar.

Note
Courses not open to fluent speakers of German. Course normally taken concurrently with German III.

Repeat for Credit
N

Requisites
Prerequisite: GRMN 122 or equivalent.

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

GRMN 301 - German IV

Credits: 3

Review of select points of German language structure accompanied by practice in conversation, speaking, reading, and writing, as well as additional experience with audio and visual media.

Repeat for Credit
N

Requisites
Recommended Prerequisite: GRMN 201 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 398 - Intermediate Studies in German

Credits: 1-18

Offered only to participants in study abroad programs.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 500 - K-State in Berlin

Credits: 3

Ten-day, faculty-led study abroad program in Berlin and Potsdam. Focuses on German cultural memory through Berlin's architectural topography. Visits to, and discussions of, historical sites and buildings. Prior to departure, students attend meetings on the K-State campus and complete assignments to prepare for travel.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 503 - German Literature in Translation

Credits: 3

Selected readings in English from such major German authors as Mann, Brecht, Hesse, Grass, and Kafka.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 510 - German Film

Credits: 3

In English. Addresses various topics within a German historical-cultural context. Students will consider what makes cinema a distinct form of artistic expression.

Note
May be taken for major credit if assignments and discussion are completed in German. Normally taken concurrently with German IV.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 515 - Topics in German Cultural Studies

Credits: 3

In English. Specific course content will vary by semester and instructor.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 520 - Readings in German

Credits: 3

Practice in reading a variety of literary, journalistic, and specialized texts.

Repeat for Credit
N

Requisites
Prerequisite: GRMN 223 or equivalent.

Typically Offered
Other

GRMN 521 - Introductory Topics in German Literature and Culture of the 18th and 19th century

Credits: 3

Topics courses constitute a sequence of introductory period studies covering the chronological range of German literature from about 1750 to the present. Within these historical periods, the specific course contents will vary by semester and instructor.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 522 - Introductory Topics in German Literature and Culture of the 20th and 21st century

Credits: 3

Topics courses constitute a sequence of introductory period studies covering the chronological range of German literature from about 1750 to the present. Within these historical periods, the specific course contents will vary by semester and instructor.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 523 - German Composition

Credits: 3

Course emphasizes writing and includes select grammar review.

Note
Course not open to students whose competence has been demonstrated in the language at this level.

Repeat for Credit
N

Requisites
Prerequisite: GRMN 223 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 524 - German for Reading Knowledge I

Credits: 3

The grammar and syntax of German and the reading of basic material selected from modern German texts. (This course is designed for students who need to be able to read German.)

Repeat for Credit
N

Typically Offered
Other

K-State 8
Global Issues and Perspectives

GRMN 525 - German for Reading Knowledge II

Credits: 3

Continued reading of material from modern German texts. (This course is designed for students who need to be able to read German.).

Repeat for Credit
N

Typically Offered
Other

K-State 8
Global Issues and Perspectives

GRMN 526 - Business German

Credits: 3

Advanced grammar necessary for adequate oral and written expression in international business and diplomatic situations, including specialized terminology, conversation and discussion and translation. Cultural aspects of business are also considered.

Repeat for Credit
N

Requisites
Prerequisite: GRMN 223 or equivalent.

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Historical Perspectives

GRMN 527 - Advanced German Conversation

Credits: 3

Course emphasizes proficiency in oral expression and includes select grammar review. Course not open to students whose competency has been demonstrated in the language at this level.

Repeat for Credit
Y

Requisites
Prerequisite: GRMN 223 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

GRMN 528 - Introductory Topics in German Language and Linguistics

Credits: 3

Introduction to topics in German Linguistics, with special emphasis on the connection between language structure and use or language structures and learning.

Repeat for Credit
Y

Requisites
Prerequisite: GRMN 301.
Corequisite: GRMN 523 or GRMN 527 or GRMN 526 should be taken before GRMN 528 or concurrently with GRMN 528.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

GRMN 529 - Special Studies in German

Credits: 1-18

Special Studies in German

Note
Consent of department head and instructor involved.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Historical Perspectives

GRMN 530 - German Cultural Studies and History

Credits: 3

This course addresses cultural and historical topics not confined to a single period. Specific course content will vary by semester and instructor. It may emphasize cross-national subjects, the development of a theme or discourse over time, new perspectives from social, intellectual, or cultural studies, or non-traditional texts and topics.

Note
Each semester's offerings will be described more specifically in university and department publications before each enrollment period.

Repeat for Credit
N

Requisites
Prerequisite: One prior or concurrent 500-level German language class or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

GRMN 701 - Topics in Eighteenth Century German Literature and Culture

Credits: 3

Topics courses are designed for undergraduates and graduate students. These courses constitute a sequence of period studies covering the chronological ranges of German speaking literature and culture. Within these historical periods, the specific course contents will vary by semester and instructor. They may emphasize literary figures and movements, historical and cultural contexts, or different genres and forms within the period.

Note
Each semester's offerings will be specifically described before each enrollment period in university and department publications.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Fall, Spring, Summer

GRMN 702 - Topics in Nineteenth Century German Literature and Culture

Credits: 3

Topics courses are designed for undergraduates and graduate students. These courses constitute a sequence of period studies covering the chronological ranges of German speaking literature and culture. Within these historical periods, the specific course contents will vary by semester and instructor. They may emphasize literary figures and movements, historical and cultural contexts, or different genres and forms within the period.

Note
Each semester's offerings will be specifically described before each enrollment period in university and department publications.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Fall, Spring, Summer

GRMN 703 - Topics in Early Twentieth Century German Literature and Culture

Credits: 3

Topics courses are designed for undergraduates and graduate students. These courses constitute a sequence of period studies covering the chronological ranges of German speaking literature and culture. Within these historical periods, the specific course contents will vary by semester and instructor. They may emphasize literary figures and movements, historical and cultural contexts, or different genres and forms within the period.

Note
Each semester's offerings will be specifically described before each enrollment period in university and department publications.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Fall, Spring, Summer

GRMN 704 - Topics in German Literature and Culture since 1945

Credits: 3

Topics courses are designed for undergraduates and graduate students. These courses constitute a sequence of period studies covering the chronological ranges of German speaking literature and culture. Within these historical periods, the specific course contents will vary by semester and instructor. They may emphasize literary figures and movements, historical and cultural contexts, or different genres and forms within the period.

Note
Each semester's offerings will be specifically described before each enrollment period in university and department publications.

Repeat for Credit
N

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Fall, Spring, Summer

GRMN 705 - Topics in Twentieth and Twenty-First Century German Literature and Culture

Credits: 3

Topics courses are designed for undergraduates and graduate students. These courses constitute a sequence of period studies covering the chronological ranges of German speaking literature and culture. Within these historical periods, the specific course contents will vary by semester and instructor. They may emphasize literary figures and movements, historical and cultural contexts, or different genres and forms within the period.

Note
Each semester's offerings will be specifically described before each enrollment period in university and department publications.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Fall, Spring, Summer

GRMN 720 - Open Topics Seminar in German Language and Linguistics

Credits: 3

Addresses topics in German Linguistics. It may emphasize a specific area of linguistics, a specific research approach, or the connection between language and society.

Repeat for Credit
Y

Requisites
Prerequisite: At least one GRMN 500-level course preferably GRMN 528.

Typically Offered
Fall, Spring

GRMN 728 - History of the German Language

Credits: 3

A study of the development of the sounds, forms and syntax of standard German.

Repeat for Credit
N

Typically Offered
Other

GRMN 729 - Open Topics Seminar in German Literature and Culture

Credits: 3

Open Topics courses are designed for undergraduates and graduate students. Course addresses topics not confined to a single period in a national literature. Specific course content will vary by semester and instructor. It my emphasize cross-national subjects, literary or cultural criticism or theory, works of one or a pair of related authors, the development of a theme or genre over time, new perspectives from social, intellectual, or cultural studies, or non-traditional texts and topics.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German literature course.

Typically Offered
Other

GRMN 731 - Advanced German: Speaking and Writing

Credits: 3

Course combines practice in speaking, writing, and reading, and select advanced grammar review.

Note
Course not open to students whose competence has been demonstrated in the language at this level.

Repeat for Credit
Y

Requisites
Prerequisite: GRMN 523 and GRMN 527 or equivalent.

Typically Offered
Other

GRMN 740 - German Culture and Literature in Second-Language Learning

Credits: 3

Analysis and interpretation of cultural and literary text from German-speaking countries, with emphasis on the development of interpretive skills and materials, and their application to the German curriculum at all levels.

Repeat for Credit
Y

Requisites
Prerequisite: One prior 500-level German course.

Typically Offered
Other

GRMN 799 - Problems in Modern Languages

Credits: 1-18

Problems in Modern Languages

Repeat for Credit
Y

Typically Offered
Other

GRMN 898 - Master's Report

Credits: 1-2

A written report of either research or problem work on a topic in the major field.

Note
Consult of major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRMN 899 - Research in Modern Languages

Credits: 1-18

Research in Modern Languages

Repeat for Credit
Y

Typically Offered
Other

GRSC 100 - Foundations in Grain Science and Industry

Credits: 1

An introduction to grain science and industry; general freshman orientation; policies; student organizations; study skills and time management; departmental degree programs, and careers.

Note
Required of all Freshmen majoring in Bakery Science and Management, Feed Science and Management, and Milling Science and Management.

Repeat for Credit
N

Requisites
Prerequisite: Required of all freshmen in Grain Science and Industry.

Typically Offered
Fall

GRSC 101 - Fundamentals of Grain Processing

Credits: 3

This is an introductory course to grains and their processing/utilization in food and non-food products.

Note
Intended for non-majors only.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives

GRSC 112 - Feed and Pet Food Experience

Credits: 1

Designed to provide a hands-on experience in the feed and pet food processes. The student will learn about the safety programs, quality and standard operating procedures used in the animal feed and pet food industries.

Note
Three hours lab per week.

Repeat for Credit
N

Typically Offered
Spring

GRSC 150 - Principles of Milling

Credits: 2

Introduction to grain and feed milling processes.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: MATH 100

Typically Offered
Fall, Spring

GRSC 151 - Principles of Milling Laboratory

Credits: 1

A laboratory course to accompany Principles of Milling (GRSC 150). Laboratory exercises in grain and feed milling processes.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 150 or concurrent enrollment. BSM, FSM and MSM majors have to take GRSC 150 and GRSC 151 concurrently.

Typically Offered
Fall, Spring

GRSC 200 - Topics in Grain Science

Credits: 0-3

Special topics, studies, and activities in grain science not completely taught in other courses.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRSC 201 - Fundamental Baking Calculations

Credits: 1

The course is designed to provide students with an understanding of the type of mathematical calculations used in the baking industry. It will cover ratio and proportion, true percent, baker's percent, how to convert a straight dough to a sponge and dough, proper water temperature calculations, specific gravity as it applies to cake making, density, specific volume as it applies to bread making, flour blending calculations in order to achieve a specific flour protein content, flour calculations for proper baking performance and purchasing, major ingredient substitutions, pie filling calculations, parts per million calculations, and baking powder neutralization values.

Note
This course will be offered as a 20-module distance education course.

Repeat for Credit
N

Requisites
Prerequisite: This class has no prerequisites, and can be taken by an incoming freshman.

Typically Offered
Fall, Spring, Summer

GRSC 210 - CAD Flow Sheets for Grain Processes

Credits: 3

The course is designed to teach students the basic concepts of professional 2D drawing designs and drafting using AutoCAD. By the end of the semester, the students will be able to use AutoCAD for preparing process flow drawings and interpret a grain processing flow.

Note
Two three-hour lecture/demonstrations/studio per week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 150 or consent of instructor.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GRSC 301 - Baking Fundamentals: The Art and Science of Baking

Credits: 3

This introductory course explores the art and science of baking. Students will discover the basic scientific principles that explain how both yeast and chemically leavened bakery products are made. They will learn the products, tools, techniques and aesthetics of making breads, cakes, sweet goods, doughnuts, and cookies.

Note
Two (2) hour classes a week (one lecture the other discussion of products made in lab that week)
One (1) three-hour lab a week (scheduled in between lecture hours)

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

GRSC 310 - Materials Handling

Credits: 2

The course is designed to introduce students to how materials including grains, ingredients, mixes and finished products are physically moved and handled in the receiving, storage, formulation, production and shipping of grain related products.

Note
Two two-hour studio sessions incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 150 and GRSC 210.

Recommended prerequisites: PHYS 113, MATH 205.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

GRSC 312 - Introduction to Feed and Pet Food Processing

Credits: 3

Introduction to animal feed and pet food manufacturing, including principles of conveying, grinding, mixing, pelleting, and other processing techniques, the formulation of concentrates, premixes, and rations.

Note
Three hours lecture per week.

Repeat for Credit
N

Typically Offered
Spring

GRSC 313 - Intro to Feed and Pet Food Processing Lab

Credits: 1

This course provides students with hands-on experience in the fundamental processes used in feed and pet food manufacturing. Through laboratory exercises, students will explore key operations such as ingredient preparation, grinding, mixing, pelleting, canning, baking, freeze drying, extrusion, and packaging. Emphasis is placed on understanding equipment operation, safety protocols, and troubleshooting in a production setting. This applied learning approach reinforces theoretical knowledge from lecture-based courses and prepares students with the technical skills necessary for careers in the feed and pet food industry.

Repeat for Credit
N

Requisites
Pre-Requisite or Co-Requisite: GRSC 312

Typically Offered
Fall-Odd Years

GRSC 405 - Grain Analysis Techniques

Credits: 2

Principles and instrumentation available for testing cereal and other grains and their food and feed products.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: CHEM 230, BIOCH 265 or CHM 350 and CHM 351, and STAT 225.

Typically Offered
Spring

GRSC 491 - Faculty-Led Study Abroad

Credits: 1-3

Seminar and travel course designed to prepare students before the experience and for students to analyze, critique, and report their experiences of an international experience associated with study tours or short courses.

Note
Consent of instructor for undergraduates, consent of major professor for graduate students

Repeat for Credit

N

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

GRSC 499 - Undergraduate Research in Grain Science

Credits: 0-3

This course is an opportunity to earn college credit while conducting an independent research project. The overall objective of the course is to introduce students to scientific research methods and procedures in grain science and related areas through hands-on experience and individual mentoring. Students will learn how to design, conduct, analyze, and present scientific research.

Note
Variable credit. Students are expected to invest at least 3 hours of effort per week for every hour of credit enrolled. A GSI faculty must agree to serve as research advisor/mentor prior to enrollment. A list of participating faculty and project areas will be available.

Repeat for Credit
Y

Requisites
Prerequisites: Sophomore, junior or senior standing in BSM, FSM, or MSM; minimum GPA of 2.5/4.00.

Typically Offered
Fall, Spring, Summer

GRSC 500 - Milling Science I

Credits: 2

Principles and practices of wheat flour milling with full-scale equipment including grain storage, blending, cleaning, conditioning plant, and a modern pneumatic flour mill, with instrumentation and automation, etc.

Note
Two hours lecture.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 150 and GRSC 210, or consent of instructor.
Recommended prerequisites: CHM 230, PHYS 113, MATH 205, and BIOL 255.

Typically Offered
Spring

GRSC 501 - Milling Science I Laboratory

Credits: 2

A laboratory course to accompany Milling Science I (GRSC 500). Laboratory exercises in wheat flour milling with full-scale equipment including grain storage, blending, cleaning, conditioning plant, and a modern pneumatic flour mill, with instrumentation and automation.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 500 or concurrent enrollment.

MSM majors have to take GRSC 500 and GRSC 501 concurrently.

Typically Offered
Spring

GRSC 502 - Milling Science II

Credits: 2

Advanced study of the entire gradual reduction system of wheat flour milling and the many unit process systems that constitute the milling system. The theory and practice of mill control are studied in detail. Processing of other cereal grains and oil seeds are covered as well as general mill management.

Note
Two one-hour lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 210 and GRSC 500 and GRSC 501, or

consent of instructor.

Recommended prerequisite: STAT 225 and PHYS 113 and MATH 205.

Typically Offered
Fall

GRSC 503 - Milling Science II Laboratory

Credits: 2

The processes for milling other grains such as corn, oats, sorghum, different classes of wheat, and rye are studied in the laboratory and by practice on small scale milling units. Concepts of material handling properties of grain products and material handling equipment in dry milling operations will be presented. Concepts of statistical process control and spread sheet modeling in the decision making process will be introduced.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 502 or concurrent enrollment or consent of instructor.

Typically Offered
Fall

GRSC 530 - Management Applications in the Grain Processing Industries

Credits: 3

This course deals with management principles, leadership concepts and their application to the grain, fed and food industries. This capstone experience uses business scenarios, team projects and knowledge management to expand student's ability to solve problems, impact key business challenges and manage complex issues. Special emphasis is placed on organization dynamics, people management, key business metrics, common operational problems and ethics in business.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisites: Senior standing, GRSC 502 or GRSC 612 or GRSC 637.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

GRSC 540 - Process Calculations in Food Systems

Credits: 3

Application of grain/food industry analytical processing concepts including mass and energy balances, fluid flow, heat transfer, dehydration, evaporation.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 205 or MATH 220. Recommended prerequisite: PHYS 113 or PHYS 115, CHM 210.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GRSC 541 - Process Calculations in Food Systems Laboratory

Credits: 1

Virtual laboratory experiments supplementing GRSC 540-Process Calculations in Food Systems. Simulations will be used to conduct wide range of virtual experiments representing major food processes.

Note
One-three hour lab per week.

Repeat for Credit

N

Requisites
Prerequisite: GRSC 540 or concurrent enrollment.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

GRSC 545 - Grain Drying, Storage, Aeration and Pest Management

Credits: 3

Introduction to the scientific principles and engineering practices required for the successful management of post-harvest quality grains.

Note
This course is not available to on-campus students. This course is offered as a distance education course only, and it is only available to distance education students.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 310.

Typically Offered
Fall, Spring, Summer

GRSC 555 - Cereal Food Plant Design

Credits: 3

This course deals with principles of modern flour mill design, feasibility and equipment selection for plant improvements and new plant construction. It covers the steps of developing adequate process flow diagrams based on the specific production needs, constraints and preferences. Emphasis is placed on the effects of design on plant operating efficiency, finished product quality, and construction costs.

Note
Three-one hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and GRSC 500.

Typically Offered
Spring

GRSC 556 - Pneumatic Conveying of Dry Solids

Credits: 2

The course is designed to introduce students to a comprehensive knowledge of the design, operation and capabilities of pneumatic conveying systems for transportation of dry, powdered and granular materials. The student will study the components of pneumatic conveying systems, the requirements for designing efficient and reliable pneumatic conveying systems, and troubleshooting existing systems.

Note
Two two-hour studio sessions incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing, GRSC 310, GRSC 500 and GRSC 501, PHYS 113 or PHYS 213, MATH 205, or consent of instructor.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

GRSC 560 - Electricity and Industrial Power Distribution

Credits: 3

Major emphasis will be given to application of electricity to machinery for grain processing and electrical code.

Note
Two hours lecture and two hours lab per week.

Repeat for Credit
N

Requisites

Prerequisite: GRSC 500 or GRSC 510 or GRSC 635 or consent of instructor.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GRSC 580 - Milling of Specialty Grains

Credits: 2

This is a problem based learning course which aims to increase students' knowledge of flour milling and specialty grain milling. During the semester students develop critical thinking and problem-solving skills needed to troubleshoot real-life issues related to processing, quality assurance, HSE (Health, Safety, and Environment), and finished product quality. Students are expected to analyze their problems and develop the skills needed to effectively communicate their findings during group presentations.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 502, or consent of instructor.

Typically Offered
Spring

GRSC 590 - Grain Science Problems

Credits: 1-3

Study in an area pertinent to grain processing and utilization.

Note
For undergraduate students. Instructor permission.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRSC 591 - Internship in Grain Science

Credits: 1

A practical application of feed and food manufacturing technology during an eight-week summer internship with an active commercial feed and food manufacturing company. The course will stress applied aspects of commercial feed and food manufacturing, which can include, but not be limited to, plant operations, maintenance, personnel and labor relations, business management, warehousing, ingredient procurement, quality assurance, and fleet management.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 500, GRSC 510 or GRSC 635.

Typically Offered
Fall

GRSC 592 - Extended Internship in Grain Science

Credits: 1

In-depth work-study experiences for up to 6 months on commercial feed and food manufacturing, which can include, but not limited to, plant operations, maintenance, personnel and labor relations, business management, warehousing, ingredient procurement, quality assurance, and fleet management.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 500, 510 or 635.

Typically Offered
Fall, Spring

GRSC 600 - Practicum in Bakery Technology I

Credits: 1

Lectures and hands-on laboratory experience with commercial production scale baking equipment for breads and rolls, cookies and crackers, and cakes and sweet doughs.

Repeat for Credit
N

Requisites
Prerequisite: Upper-class bakery science and management majors or permission of the instructor. Recommended Foundation Courses: GRSC 635 and GRSC 636.

Typically Offered
Other

GRSC 601 - Practicum in Bakery Technology II

Credits: 1

Lectures and hands-on laboratory experience with commercial production scale baking equipment for breads and rolls, cookies and crackers, and cakes and sweet doughs.

Repeat for Credit
Y

Requisites
Prerequisite: Upper-class bakery science and management majors or permission of the instructor. Recommended Foundation Courses: GRSC 635 and GRSC 636.

Typically Offered
Other

GRSC 602 - Cereal Science

Credits: 3

The characteristics of cereals, legumes, their components and their processing to foods.

Note
Three hours lecture a week. Online offering of this course is not open to the undergraduate students majoring in BSM, FSM, and MSM.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 265 or CHM 350 and CHM 351.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

GRSC 612 - Advanced Feed Technology II and Laboratory

Credits: 3

Advanced study of engineering principles applicable to flour and feed plant operations, equipment selection, and processing systems.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 312, PHYS 113 and STAT 225

Typically Offered
Fall

GRSC 615 - Animal Food Safety

Credits: 1

An introduction to the animal food safety regulations in the Food Safety Modernization Act.

Note
One two-hour lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 312.

Typically Offered
Fall

GRSC 620 - Extrusion Processing in the Food and Feed Industries

Credits: 4

The course is designed to provide the student with an understanding of extrusion technology and the ability to apply it to product development and production through a

"hands-on" approach. Major emphasis is on laboratory exercises in which students will operate pilot scale extrusion equipment to produce readily-recognizable commercial products such as cheese curls, breakfast cereals, pasta, pet food, etc. Emphasis will also be placed on process and product development, analysis, and problem solving techniques.

Note
Three hours lecture plus one three-hour lab a week.

Repeat for Credit
N

Requisites
Recommended prerequisite: GRSC 602.

Typically Offered
Fall

GRSC 625 - Flour and Dough Testing

Credits: 3

The focus of Flour and Dough testing is the analytical tests used to determine attributes of different flours. This course will provide a broad understanding of standard analytical methods and procedures commonly used in flour quality testing. This course will discuss how analyses are done as well as how to evaluate, interpret, and use the results.

Note
Two (2) one-hour lectures and one (1) lab session per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 602.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

GRSC 635 - Baking Science I

Credits: 2

Introduction to chemical and physical properties of flour and other principal ingredients used in production of yeast-leavened bakery foods. Study of major processing methods for making yeasted doughs such as breads, sweet goods, frozen dough, and partially baked goods. Examination of ingredient specifications role of quality control, keeping properties of bread products, and nutritional attributes of various types of breads.

Note
Two hour lecture a week.
Online offering of this course is not open to the undergraduate students majoring in BSM, FSM, and MSM.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 265 or CHM 350 and CHM 351.
Recommended prerequisites: PHYS 113, MATH 205, and BIOL 255.

Typically Offered
Fall

GRSC 636 - Baking Science I Laboratory

Credits: 2

A laboratory course to accompany Baking Science I (GRSC 635). Laboratory exercises in theory and production of yeast-leavened baked products.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 635 or concurrent enrollment.

Typically Offered
Fall

GRSC 637 - Baking Science II

Credits: 3

Course includes study of physical, chemical, and functional properties of ingredients and processes used in production of bakery products, including cakes, cookies, doughnuts, breads and related products. Shelf-life control and packaging of baked products is also discussed. Total

quality programs, specification programs and management of distribution and purchasing systems will also be included in lectures.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Recommended Foudnation Course: GRSC 635.

Typically Offered
Spring

GRSC 638 - Baking Science II Laboratory

Credits: 1

A laboratory course to accompany Baking Science II (GRSC 637). Exercises and experiments in production of chemically-leavened and yeast-leavened bakery foods including various cakes, cookies, doughnuts, bagels, icings, and fillings.

Note
Three hours of lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 637 or concurrent enrollment.

Typically Offered
Spring

GRSC 645 - Pet Food Processing

Credits: 3

The course is designed to provide students with an understanding of pet foods, including food products meant for dogs, cats, pet rodents, pet snakes, ornamental fish, exotic and captive wild animals, and the various processing technologies that are deployed for their production. Extrusion, baking, canning, and injection molding technologies will be covered. Other important aspects of pet food production, such as ingredient handling and compounding, quality control, HACCP and sanitation, and packaging will also be discussed.

Repeat for Credit
N

Requisites
Recommended Foundation Course: CHM 230, PHYS 114, ASI 318 or FNDH 132, Junior standing.

Typically Offered
Spring

GRSC 650 - Nutritional Impacts of Processing

Credits: 3

This course explores processing-induced changes in composition and utilization of ingredients and raw materials for both animal and human foods. Discussion of benefits, limitations, and challenges resulting from processing various ingredients and compound foods, along with alternatives and food additives commonly used in industrial feed and food production to augment, retard, or prevent negative effects.

Note
3 hour lectures per week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 318 or FNDH 132, GRSC 312, junior standing.

Typically Offered
Spring

GRSC 651 - Food and Feed Product Protection

Credits: 2

Sanitation in relation to processing, handling, and storage of human and animal foods. Emphasis on contaminants, control of causative agents, equipment and plant design, applicable laws and regulations.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and BIOL 255.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

GRSC 655 - Feed Mill Plant Design

Credits: 2

This course deals with principles of modern design, feasibility, and equipment selection for new feed mills. Emphasis is placed on the effects of logistics, ingredient availability, operating efficiency, and finished product quality.

Note
Two hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and GRSC 510.

Typically Offered
Spring

GRSC 661 - Qualities of Feed Ingredients

Credits: 3

The course provides an integrated overview of the physical, biological, chemical characteristics of common feed ingredients. Quality control and evaluation of ingredients and complete feed is emphasized to ensure the productions of safe feed/safe food.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 312

Typically Offered
Spring

GRSC 670 - Bakery Layout and Management

Credits: 2

Provides the practical knowledge and skills necessary to successfully lead and manage a bakery operation. Current problems in the baking industry are discussed to improve production efficiency, performance, capability, profitability, and quality in the context of a bakery operation. This course utilizes team projects to plan and design a bakery with consideration of market demands, product selection, and feasibility.

Note
Two (2) one-hour lectures per week.

Repeat for Credit
N

Requisites
Prerequisite: GRSC 636.

Typically Offered
Spring

GRSC 712 - Vibrational Spectroscopic Analysis and Chemometrics

Credits: 1-2

Infrared and particularly modern near-infrared spectroscopic analysis of foods, natural products, and synthetic substances is accomplished with direct sampling and the use of multivariate statistics. This course is intended to enable the student to understand the principles and successfully apply this technology to practical analytical problems with emphasis upon food. Method development will be taught using specific analytes in selected products. Theoretical background, working of modern instrumentation and associated software is presented in support of achieving practical competence.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOCH 265 or CHM 350 and CHM 351 or CHM 371.

Typically Offered
Spring

GRSC 713 - Contemporary Chromatographic Analysis of Food

Credits: 1

High performance liquid chromatography (HPLC) is the primary focus of this course. This will be supported by including treatment of topics in contemporary gas chromatography and supercritical fluid chromatography and extraction. Optimizing chromatographic conditions through knowledge of the column chemistry will be covered in addition to detector options, instrumentation, and sample preparation.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOCH 265 or CHM 350 and CHM 351 or CHM 371.

Typically Offered
Spring

GRSC 740 - Biomaterials Processing

Credits: 3

This course is designed for students who are interested in plant biomaterials processing. This course will teach technologies of biobased materials processing including starch extraction (wet milling), plant oil extraction and refining, plant protein extraction and processing, cellulose processing, biofuel production, chemicals bioconversion, and drying technologies of biomaterials.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BAE 545 or GRSC 602.

Typically Offered
Fall-Even Years

Cross-listed
BAE 740

GRSC 745 - Fundamentals of Bioprocessing

Credits: 3

This course is designed for students who desire a clear understanding of bioprocessing principles as applied to the emerging bio-based industry. This course covers the fundamentals of mass and energy balances, fluid dynamics, heat and mass transfer, as applied to bioprocessing. The microbial growth, kinetics and fermenter operation will be covered in detail. Fundamentals of downstream operation as applicable to bioprocessing will be covered in this course. Industrial bioprocessing case studies that involve the integration of the course contents will be discussed.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: MATH 205 or MATH 220, PHYS 113 or PHYS 115, and BIOCH 265 or CHM 350 and CHM 351 or CHM 210.

Typically Offered
Spring

GRSC 750 - Pet Food Formulation for Commercial Production

Credits: 1

Students completing this course will become proficient at formulating pet foods and have a working knowledge of ingredients, processes, and the software necessary to create new products, revise existing formulas, and perform business and production analyses.

Note
The course will be offered as a January intersession short-course on-site at the IGP-Institute.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: GRSC 645, ASI 320, ASI 677.

Typically Offered
Intersession

GRSC 790 - Grain Science Problem

Credits: 1-18

Graduate study in an area pertinent to grain processing and utilization.

Note
For graduate students. Consent of department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRSC 810 - Particle Technology for Solids Handling and Processing

Credits: 3

Overview of particle technology with an emphasis on practical applications in milling and grain based operations. Conveying, storage, size reduction and separation are the important unit operations of grain processing industries that involve particle sizes ranging from a fraction of a micron to a few millimeters. Subjects include size and shape characterization, size distribution and measurement, characteristic dimensions, density, and their theories governing the behavior of the particles under different conditions.

Note
Two hours lecture and three hours lab each week.

Repeat for Credit
N

Typically Offered
Spring

GRSC 815 - Fundamentals of Processing Grains for Food

Credits: 3

Unit processes in the receiving and storing of grains; grinding, sifting, mixing, separation, conveying, cooling, drying, etc. This course is not open to undergraduate majors in the department.

Note
Two hours lecture and three hours laboratory a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: PHYS 213 or equivalent.

Typically Offered
Fall-Odd Years

GRSC 820 - Advanced Extrusion Processing

Credits: 4

Advanced study of the engineering principles of extrusion forming and cooking with a detailed focus on scale-up. A variety of extrusion systems will be studied in lab with associated group projects.

Note
Three hours lecture and three hrs. laboratory a week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: GRSC 620 or previous extrusion experience.

Typically Offered
Fall-Odd Years

GRSC 825 - Novel Uses of Biopolymers

Credits: 2

Teach existing value-added technology of cereal polymers, and explore new processes and utilization in non-traditional food/feed and in non-food/feed.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOCH 521 and PHYS 115.

Typically Offered
Fall

GRSC 830 - Physical Properties of Cereal Polymers

Credits: 3

Physical properties of cereal polymers include physical attributes, rheological, mechanical, thermal, electrical, and optical properties. Thermal analysis methods will be taught. Thermal analyses include glass transition, gelatinization, denaturation, and thermal softening and settings of cereal polymers. Rheological properties associated with these thermal transitions will be discussed. Applications of thermal analysis in cereal chemistry, processing, and product quality control will be discussed.

Note
Two hours lecture and discussion, and two hour lab.

Repeat for Credit
N

Requisites
Recommended Foundation Course: GRSC 602.

Typically Offered
Other

GRSC 840 - Advanced Grain Processing Technology

Credits: 3

An overview of unit operations used in the grain/food processing industry will be given. Specific applications of the unit operations will be covered in detail for dry and wet milling (wheat/corn/sorghum), masa manufacturing, oilseed processing, rice milling, and packaging systems. A term project, which will include an applied research component will be developed by each student.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student Standing.

Typically Offered
Spring

GRSC 850 - Grain Protein Chemistry & Technology

Credits: 3

This graduate course will address the structure, chemistry, properties, and applications of proteins. The primary focus will be on plant food proteins (cereals, pulses, and oilseeds). Animal (milk, egg, meat) and microorganism-derived (mycoproteins, algae) proteins will also be moderately covered to provide students with a comprehensive understanding of the subject.

Note
Three-hour lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: CHM 531, 532, and BIOCH 521 or equivalent.

Typically Offered
Fall-Odd Years

GRSC 891 - Study Abroad Experience in Grain Science

Credits: 0-3

Travel seminar coruse designed to prepare graduate students before their international study abroad experience and analyze, critique, and report about their faculty-led study tours or short courses. The academic topics will vary with each international activity.

Note
Consent of course instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

GRSC 899 - Research in Grain Science

Credits: 1-18

Basis for the M.S. Thesis.

Note

Consent of staff.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GRSC 900 - Professional Development in Grain Science

Credits: 1

A team-taught course that provides students with skills and practices needed to succeed in graduate school and future academic or professional careers.

Note
One hour lecture a week. Required of all newly enrolled graduate students in grain science during their first year.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall

GRSC 901 - Starch Chemistry and Technology

Credits: 3

Chemical and physical properties of cereal and legume starches. Isolation, structure, assay methods, and properties. Methods of modifying starches for industrial use, including chemical, physical, and enzymic modification.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOCH 521, GRSC 602, PhD students, or consent of instructor.

Typically Offered
Other

GRSC 902 - Carbohydrates in Food

Credits: 3

Structure and properties of food carbohydrates, including sugars, oligosaccharides, and polysaccharides, and methods of their modification and analysis.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: CHM 350 or BIOCH 521, PhD students, or consent of instructor.

Typically Offered
Spring-Odd Years

GRSC 905 - Enzyme and Bioprocessing Applications

Credits: 3

The course explores the applications of enzymes and microbial cultures in the bioprocessing industry, including food, feed, industrial chemicals and biofuels; and major microbial pathways for product synthesis including a clear understanding of enzyme and microbial kinetics at an advanced level.

Note
Three one hour lectures per week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: GRSC 820 or GRSC 740/BAE 740 or BIOCH 755.

Typically Offered
Fall

GRSC 910 - Topics in Grain Science

Credits: 1-18

Discussions and lectures on important areas and contributions in the field of grain science not currently covered in present courses.

Note
Consent of instructor.

Repeat for Credit

Y

Typically Offered
Fall, Spring, Summer

GRSC 915 - Advanced Cereal Chemistry

Credits: 3

The chemistry of cereal components at the molecular level. The role and interactions of the various constituents, their functionality in producing an end product, and their influence on nutritional properties.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOCH 521 and BIOCH 522.

Typically Offered
Fall

GRSC 920 - Grain Science Graduate Seminar

Credits: 1

Weekly evaluation of the scientific literature and the reasoning underlying the selection of research problems, the formulation and testing of hypotheses, and the evaluation and presentation of results. Discussion of research and technical problems in the discipline.

Note
One-hour lecture per week.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing or consent of instructor

Typically Offered
Fall, Spring

GRSC 999 - Research in Grain Science

Credits: 1-18

Basis for Ph.D. Dissertation.

Note
Consent of staff.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

GWSS 105 - Introduction to Gender, Women, and Sexuality Studies

Credits: 3

An interdisciplinary analysis of personal experiences and social and political institutions as they shape and are shaped by the intersections of gender, race, class, sex, sexuality, ethnicity, nation, citizenship, and ability on local, national, and global levels. Topics include the roles of biology and social construction in shaping gender and sexuality, sources of structural inequities; and feminist, queer, trans, anti-racist, and anti-colonial activisms.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

GWSS 220 - Climate Justice Movements

Credits: 3

Explores climate justice movements and concepts in the US and globally. Particular attention is placed on the ways that gender, race, class, and global location intersect and how different social actors (individuals, activist groups, governments, nations) define climate change and how climate justice activist movements fight for change. Through discussion and critical analysis, will explore a variety of topics and concepts including global climate change, environmental and climate justice, growth and degrowth, colonization and decolonization, and human and nature rights among others. By examining these, we can

come to understand how climate justice is a political position, series of movements, and hope for the future.

Repeat for Credit
N

Typically Offered
Fall-Even Years

K-State Core
5 Social and Behavioral Sciences

GWSS 230 - Intersectionality and Health Justice

Credits: 3

Examines intersections of gender, race, class, Indigeneity, nation, and sexuality in critiques, activisms, and histories of medicine, public health, and health sciences. Joins thinking in racial, environmental, disability, and reproductive justices with queer and trans studies in exploring questions and ethics of healthcare.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

K-State Core
5 Social and Behavioral Sciences

GWSS 240 - Activism and Social Justice

Credits: 3

Examines ethical dilemmas surrounding activism, what constitutes social justice, and civil rights justice processes. Centers Indigenous Studies, Queer Studies, Feminist Studies, American Studies, and Social Transformation Studies perspectives on ethics, activism, and justice.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State Core
5 Social and Behavioral Sciences

GWSS 275 - Gender, Race, and Sex in Science Fiction

Credits: 3

Explores the ways that gender, sex, sexuality, race, and class intersect in science fiction, including Afrofuturism, Asian futurism, Chicanafuturism, and Indigenous futurism. Examines how the ways that we imagine the future and the alien offer insight into contemporary concerns about gender, sexuality, race and racism, colonialism, imperialism, and justice.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
5 Social and Behavioral Sciences

K-State 8
Social Sciences

GWSS 300 - Selected Studies of Gender, Women, and Sexuality Studies

Credits: 3

Specific course content will vary by semester and instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

GWSS 305 - Engaging Gender, Women, and Sexuality Studies

Credits: 3

An examination of the origins and current status of the Gender, Women, and Sexuality Studies field, provides core concepts and research methodologies.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

GWSS 325 - Queer Studies: Concepts, History, and Politics

Credits: 3

Examines the origins of Queer Studies and introduces core concepts, foundational histories, and critical frameworks that will prepare students for further study.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Historical Perspectives
Human Diversity within the U.S.

GWSS 335 - Transgender Studies

Credits: 3

Explores the history of and current debates in the field of transgender studies. Examines the roles of race, class, nation, colonialism, and (dis)ability in understanding transgender identities and politics.

Repeat for Credit
N

Typically Offered
Intersession

K-State 8
Social Sciences

GWSS 350 - Gender in American Film

Credits: 3

This course examines depictions of gender, race/ethnicity, class, and sexuality in American film. It focuses on the way in which images in mainstream Hollywood films reinforce, normalize and/or question power, power relations, and stereotypes.

Note
This is a lecture and recitation course.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

GWSS 365 - Reproductive Rights and Wrongs

Credits: 3

Explores contemporary reproductive politics within the historical context of struggles for reproductive justice in the U.S.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Historical Perspectives

GWSS 375 - Disability Justice and Gender

Credits: 3

Introduces a disability justice framework and explores how ableism, as a social system, intersects with other systems of inequality. Examines disability from intersectional perspectives that center feminist, queer, and trans analyses of disability, particularly those of U.S. people of color. Explores how disability has been constructed, regulated, and disciplined by structures and institutions as well as met with resistance by individuals and social movements.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

GWSS 380 - Global Struggles for Feminist, Queer, and Trans Justice

Credits: 3

Explores how justice struggles are connected. Examines how colonialism and transnational globalization intersect with gender, sexuality, class, and nation, as well as the effects of colonization, migration, democratization, and capitalist and socialist development strategies on women and queer people in "Third," "Second," "First," and Native Nations.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Social Sciences

GWSS 405 - Resistance and Movements for Social Change

Credits: 3

Examines Women's Resistance and movements against gender violence and discrimination in the context of colonialism, globalization, war, militarism, and occupation.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Historical Perspectives

GWSS 410 - Feminist Thought

Credits: 3

Survey of a variety of feminist analyses of society, culture, and work, as well as visions for social change. The historical development of key feminist theories, contemporary debates, and multicultural and global feminism will be analyzed.

Repeat for Credit
N

Requisites
Prerequisite: GWSS 105 or GWSS 305.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

GWSS 435 - Race/Sex/Science

Credits: 3

Examines the ways that race, gender, sex, sexuality, nation, ability, colonialism, and class shape and are shaped by science and technology. Focus is on U.S,

Repeat for Credit
N

Typically Offered
Intersession

K-State 8
Social Sciences

GWSS 450 - The Stories of a Young Girl

Credits: 3

An interdisciplinary examination of female adolescence, focusing in particular on the way it is depicted in literature.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

GWSS 460 - Coming Out and Sexual Identity

Credits: 3

Examines how narratives of coming out and the organization of National Coming Out Day impact personal freedom, policies and attitudes toward sexual orientation.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

GWSS 480 - Seminar in Gender, Environment and Justice

Credits: 3

Examines the philosophical, historical, and material aspects of the human/nature relationships and the intersection of gender, race/ethnicity, class and global location with environment and environmental justice.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

GWSS 499 - Honors Project

Credits: 3

Honors Project

Note
Open only to Arts & Sciences students who are active members of the University Honors Program.

K-State 8
Human Diversity within the U.S.

GWSS 500 - Topics in Gender, Women, and Sexuality Studies

Credits: 1-3

Topics vary.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

GWSS 505 - Independent Study in Gender, Women, and Sexuality Studies

Credits: 1-3

Independent, supervised study of a topic related to Queer Studies or Gender, Women, and Sexuality Studies.

Repeat for Credit
Y

Requisites
Prerequisite: GWSS 105 or GWSS 305.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

GWSS 510 - Research Methods in Gender, Women, and Sexuality Studies

Credits: 3

An advanced course in practices of research in Gender, Women, and Sexuality Studies, with attention to what distinguishes interdisciplinary, feminist research from traditional, disciplinary practices. Methods explored may include survey, interview, oral history, ethnography, hermeneutics, content analysis, case study, experimental, and action research.

Repeat for Credit
N

Requisites
Prerequisite: GWSS 410.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

GWSS 550 - Gender and Popular Culture

Credits: 3

Using an intersectional lens, this course explores gender, race, class, global location, and sexuality in the production, portrayals, and consumption of popular culture. The popular culture forms explored in this course may include fiction, film, television, music, magazines, advertising, and/or material culture.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Social Sciences

GWSS 560 - Intersections of Violence and Resistance

Credits: 3

An examination of violence, and anti-violence justice organizing as the product of race, capitalism, gender, sexuality, nation, empire, and settler colonialism. Centers violence against women, gender violence, and the violence of the normative.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

GWSS 570 - Gender and Food Justice

Credits: 3

Uses the feminist concept of intersectionality to explore the ways that gender intersects with race, class, and global location in food justice and food sovereignty movements. Focusing on works by and about U.S. people of color, students will explore a variety of topics and concepts including systemic bias in food deserts and local food, decolonizing food, hunger and malnutrition, and human rights. Examination of these narratives enables students to understand how food and food systems are both a means of dominant control and powerful sites of gender resistance.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

GWSS 605 - Social Change Field-Experience

Credits: 3

Applied, and interdisciplinary exploration of social change in community, national, and international groups and organizations. Includes field experience, professional-related training.

Repeat for Credit
N

Requisites
Prerequisite: Permission of the instructor, and junior standing.

Typically Offered
On sufficient demand

K-State 8
Human Diversity within the U.S.
Social Sciences

GWSS 610 - Capstone Seminar in Gender, Women, and Sexuality Studies

Credits: 3

An advanced seminar for in-depth investigation of a specific topic. Students will conduct independent research and produce a substantial project or paper.

Repeat for Credit
Y

Requisites
Prerequisite: GWSS 510.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

GWSS 700 - Advanced Topics in Gender, Women, and Sexuality Studies

Credits: 1-3

Provides an in-depth theoretical and empirical analysis of scholarly works relating to an interdisciplinary topic in gender, women, and sexuality studies.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing or above and instructor permission.

Typically Offered
Other

K-State 8
Human Diversity within the U.S.

GWSS 784 - Internship in Gender, Women, and Sexuality Studies

Credits: 1-12

Supervised field work at the local, state, national, or international level in a community, volunteer, activist, or political organization.

Note
A maximum of 3 credit hours can be counted toward the gender, women, and sexuality studies minor, and a maximum of 6 credit hours towards the major.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor and two courses in gender, women, and sexuality studies.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

GWSS 799 - Independent Study for Graduate Students or Advanced Undergraduate Students

Credits: 1-3

Independent study in problems, issues, topics in Gender, Women, and Sexuality Studies. Topics vary.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.

GWSS 810 - Key Concepts in Gender, Women, and Sexuality Studies

Credits: 3

Introduction to core theoretical concepts, research methods, and methodologies in Gender, Women, and Sexuality Studies. Provides feminist, queer, trans, women's, and race and ethnic studies foundations and frameworks for graduate level inquiry.

Note
Required for Graduate Certificate in Gender, Women, and Sexuality Studies.

Repeat for Credit
N

Typically Offered
Spring

HDFS 102 - Careers in Human Development & Family Science

Credits: 1

Focuses on career development and related activities for Human Development & Family Science majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

HDFS 110 - Introduction to Human Development

Credits: 3

A study of physical, social, and psychological human development and growth across the life course with an emphasis on relationships with family, peers, and others.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.
Social Sciences

HDFS 201 - Introduction to Philanthropy

Credits: 3

Examines the history, principles, and practice of philanthropy, with a particular focus on relationship building and the desire to promote the well-being of others by working to prevent or resolve social issues.

Repeat for Credit
N

Typically Offered
Fall-Even Years

HDFS 250 - Interpersonal and Family Relationships

Credits: 3

Study of diverse family and close interpersonal relationships including romantic, parent-child, sibling, and other close relationships, with an emphasis on how individuals, families, and society influence relationships.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 or PSYCH 110 or SOCIO 211.

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Social Sciences

HDFS 300 - Problems in Human Development and Family Science

Credits: 1-18

Independent or small group study.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 301 - Interpersonal Skills for Helping Professionals

Credits: 3

Study of personal qualities necessary for working with and recognizing needs of diverse individuals and families with an emphasis on interpersonal skills needed as helping professionals.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 or PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

HDFS 302 - Introduction to Human Sexuality

Credits: 3

Study of sexual development relationships across the life course.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

HDFS 303 - Developing Intimate Relationships

Credits: 3

This course will explore topics related to intimate relationships, which include attraction, communication, casual encounters, cohabitation and conflict. Students will critically evaluate current theory and research concerning the elements of healthy relationships. This course will include a didactic and experiential opportunities for the development of a body of knowledge concerning committed relationships, the development of interpersonal skills, increasing personal awareness, and establishing appropriate expectations.

Repeat for Credit
N

Typically Offered
Intersession

HDFS 305 - Family Violence Across the Life Course

Credits: 3

Study of violence within families (e.g., child abuse, dating violence, intimate partner violence, elder abuse), prevalence rates, risk and protective factors, and outcomes with an emphasis on prevention and intervention.

Repeat for Credit
N

Typically Offered
Other

HDFS 307 - Introduction to Marriage and Family Therapy

Credits: 3

This course is designed as an introduction to the theory and practice of MFT. It includes a study of the philosophical, conceptual, and theoretical background of family therapy. The course will review theoretical formulations, common family problems, and effective treatment strategies. Readings and class discussions will provide students with practical examples of the concepts and offer opportunities for students to examine their own family dynamics.

Repeat for Credit
N

Typically Offered
Other

HDFS 322 - Transition to Parenthood

Credits: 3

This course is an empirically based evaluation of the transition to parenthood from the onset of pregnancy to three years after the child's birth.

Repeat for Credit
N

Typically Offered
Intersession

K-State 8
Social Sciences

HDFS 375 - Introduction to Research Methods in Human Development and Family Science

Credits: 3

Study of research methods in the field of human development and family science with an emphasis on the intersection of research methods, theory, and practice. Students will develop an understanding of the research process and skills necessary to be a critical consumer of research.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 and HDFS 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

HDFS 411 - HDFS Practicum

Credits: 0-3

Independent Study.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 460 - Families and Social Policy

Credits: 3

Study of the impact of policies on families and the roles of HDFS professionals in advocacy and education regarding policies and policy change related to individual and family well-being.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

HDFS 475 - Introduction to Child Life

Credits: 3

Introduction to the field of child life practices in direct and non-direct services in pediatric healthcare. Focus on the impact of illness, injury and healthcare on children and their families through the context of development theory and psychosocial treatment issues that affect the healthcare experience.

Note
Meets the required standards of the Child Life Council.

Repeat for Credit
N

Typically Offered
Spring

HDFS 500 - Special Problems in Human Development & Family Services

Credits: 0-6

Independent or small group study on special topics in human development and family services.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 501 - Philanthropy in Context

Credits: 3

Examines philanthropy in the context of diverse individuals and organizations, and considers the unique contributions of diversity in the areas of donor motivation, identification of funding sources, and approaches to philanthropic efforts that might be culturally or contextually influenced. Ethical considerations relevant to the field will also be explored.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 201

Typically Offered
Spring-Even Years

K-State 8
Human Diversity within the U.S.

HDFS 506 - Adolescent and Emerging Adult Development

Credits: 3

Study of development during adolescence and emerging adulthood with an emphasis on individual, family, societal, and contextual factors.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 or PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

HDFS 510 - Midlife to Late Adult Development

Credits: 3

Study of adult development with an emphasis on individual, family, societal, and contextual factors.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 or PSYCH 280.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

HDFS 525 - Community Mental and Relationship Health

Credits: 3

Undergraduate students will explore theoretical models and research on how social scientists, educators, and practitioners can collaborate with communities to improve mental health and relationship well-being. Teams will apply strategies by partnering with community organizations to develop a brief mental health and relationship well-being community program and walk away with materials applicable to community change in diverse future professions.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State 8
Social Sciences

HDFS 550 - Application of Theories in HDFS

Credits: 3

Study, survey, and critique of prominent human development and family theories with an emphasis on using theory to work with individuals and families in professional settings.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

HDFS 552 - Social Justice in a Family Context

Credits: 3

Study of how individuals and families experience inequality, power, and privilege related to race, ethnicity, national origin, gender, social class, religion, sexual orientation, socioeconomic status, geographic location, ability, and other social positions.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

HDFS 570 - Program Development and Implementation

Credits: 3

Study of translating research-based knowledge into educational materials and programs for individuals and families, with an emphasis on prevention programs.

Repeat for Credit
N

Requisites
Prerequisites: HDFS 110 and HDFS 250

Typically Offered
Fall, Spring

HDFS 575 - Research Practicum

Credits: 0-3

Independent or small group study. Provides students with a high impact experiential research opportunity with faculty.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 579 - Orientation to Human Development and Family Science Internship

Credits: 1

Consideration and application of professional knowledge and skills necessary for selection and placement in a social agency for a supervised experience in direct service to clients.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing; and minimum GPA of 2.50; HDFS majors only.

Typically Offered
Fall, Spring, Summer

HDFS 580 - Human Development Family Science Internship

Credits: 1-9

An internship experience at a student-selected agency or organization.

Repeat for Credit
Y

Requisites
Prerequisite: HDFS 579 with grades of B or better; senior standing; and minimum GPA of 2.50; HDFS majors only.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

HDFS 585 - Professional Seminar in Human Development and Family Science

Credits: 3

Seminar course for students completing the HDFS Internship. Consideration of professional roles and responsibilities of family science professionals, ethical decision-making, and career development. Focus on skills required in the delivery of human services with diverse groups.

Repeat for Credit
N

Requisites

Prerequisite: HDFS 579, Senior standing, and HDFC majors only. Corequisite: HDFS 580.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

HDFS 590 - Professional Capstone in Human Development and Family Science

Credits: 2

This course focuses on the development of career and professionals skills relevant to human development and family science professionals.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and HDFS majors only.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

HDFS 654 - Death and the Family

Credits: 2-3

Exploration of contemporary attitudes toward death and dying; related influences on individual development and family life.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 550 or SOCIO 640.

Typically Offered
Other

K-State 8
Social Sciences

HDFS 660 - Marriage Preparation and Enrichment

Credits: 3

History, processes, components, goals, and research support base for contemporary marriage preparation and enrichment programs.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 250 and HDFS 550.

Typically Offered
Intersession

K-State 8
Social Sciences

HDFS 670 - Working with Parents

Credits: 3

Approaches to parenting and parent education with emphasis on programmatic implications of life-span developmental principles within a family context.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 110 and HDFS 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

HDFS 700 - Problems in Human Development and Family Science

Credits: 1-6

Independent study on aspects of human development and family studies.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 708 - Topics in Human Development and Family Science

Credits: 2-3

Review of recent research and theory related to exploration of methods and family and interpersonal processes.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 711 - Foundations of Youth Development

Credits: 1

This course examines the fundamentals of youth development and the youth development profession. Through this introduction to the field, students will explore the ethical, professional and historical elements of youth development as it has evolved toward professionalization.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 712 - Community Youth Development

Credits: 3

Community Youth Development focuses upon the national emphasis of a strength-based or asset approach to community youth development. Emphasis is placed upon research, theory, and practice applied in communities throughout the United States. Students will explore existing models, theoretical and applied literature and current community efforts as a basis for understanding community youth development.

Repeat for Credit
N

Typically Offered
Fall

HDFS 713 - Adolescents and Their Families: Implications for Youth Professionals

Credits: 3

This course covers adolescent development as it is related to and intertwined with family development. The reciprocal influences between adolescents and their families will be examined. Working with youth in relation to the family system will be highlighted.

Repeat for Credit
N

Typically Offered
Spring

HDFS 714 - Program Design, Evaluation, and Implementation

Credits: 3

Overview of the program development process and outcome evaluation of community, children, and family programs. Mode of outcome scholarship and their implications for community-based programs are discussed. Participation in community-based projects involving the practical application of program design and evaluation methods.

Repeat for Credit
N

Typically Offered
Spring

HDFS 715 - Youth Issues and Life Skills

Credits: 2

This course will present three strands: issues faced by youth today and associated risk and resiliency factors; life skills for youth; and helping skills necessary for youth professionals who work with young people.

Repeat for Credit
N

Typically Offered
Summer

HDFS 716 - Topics in Contemporary Youth Issues

Credits: 1-3

This course will present issues faced by youth today and associated risk and resiliency factors.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 717 - Youth Policy

Credits: 3

Examines various federal and state policies designed specifically for youth including (a) defining and identifying current youth policies; (b) examining policies designed to "protect the well-being" of youth (e.g., zero tolerance, restorative justice, juvenile justice and reform); and (c) examining targeted youth policies (e.g., foster care, policies for youth with disabilities, homeless youth).This course examines various federal and state policies designed specifically for youth. This course will be divided into three sections: (a) what is policy and what youth policies exist? (b) policies specifically designed for to "protect the well-being" of youth (e.g., zero tolerance, restorative justice, juvenile justice and reform), and (c) targeted youth policies (e.g., foster care, policies for youth with disabilities, homeless youth).

Repeat for Credit
N

Typically Offered
Fall

HDFS 718 - Youth Professionals as Consumers of Research

Credits: 3

Designed to help youth development professionals understand and apply research results and theories to practice. Emphasis placed on research and theory reports related to the youth development with particular attention to research procedures and outcomes.

Repeat for Credit
N

Typically Offered
Spring

HDFS 719 - Program Administration and Management

Credits: 3

Designed to introduce students to the development, administration, and management of youth, family, and community service organizations.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 720 - Youth Development

Credits: 3

Designed to introduce students to the developmental period of adolescence including theory and research on positive youth development. Through a critical examination of the professional literature, students will recognize and become familiar with the major issues and transitions adolescents face as they successfully navigate this developmental stage.

Repeat for Credit
N

Typically Offered
Summer

HDFS 722 - Youth and Cultural Contexts

Credits: 3

Examine the cultural heritage of differing family structures, types, and social and educational processes experienced by youth in these families. Students will critically examine how ethnic groups fit historically into our society, and the results of how history has shaped our present day situation.

Repeat for Credit
N

Typically Offered
Fall

HDFS 723 - Practicum in Youth Development

Credits: 1-3

Supervised experience in youth development practice and service provision in organizational setting.

Note
Practicum and on-site supervisor consent required.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 724 - Working with Military Families

Credits: 3

Initial information necessary to prepare a service-provider for work with military families. Introduction to the culture, context, and complexities of the contemporary military family. This course equips learners to work in capacities which support military families through times of challenge, helping them foster resilience as they cope with military life.

Repeat for Credit
N

Typically Offered
Summer

HDFS 725 - Community Mental and Relationship Health Interventions

Credits: 3

Graduate students will explore theoretical models and research on how social scientists, educators, and practitioners can collaborate with communities to improve mental health and relationship well-being. Students will have the opportunity to lead teams that will apply strategies by partnering with community organizations to develop a brief mental health and relationship well-being community program and develop materials applicable to community change in diverse future professions.

Repeat for Credit
N

Typically Offered
Spring-Even Years

HDFS 752 - Social Justice Approach to Prevention in HDFS

Credits: 3

Study of how individuals and families experience inequality, power, and privilege related to race, ethnicity, national origin, gender, social class, religion, sexual orientation, socioeconomic status, geographic location, ability, and other social positions, with an emphasis on social justice approach to prevention.

Repeat for Credit
N

Requisites
Students who have taken HDFS 552 may not take HDFS 752 for credit.

Typically Offered
Fall, Spring

HDFS 770 - Development and Implementation of Prevention Science Programs

Credits: 3

Study of translating research-based knowledge into educational materials and programs for individuals and families, with an emphasis on prevention programs in human development and family science settings.

Repeat for Credit
Y

Requisites
Recommended Prerequisite: HDFS 850

Typically Offered
Fall

HDFS 784 - Foundations and Principles of Family and Community Services

Credits: 3

An introduction to the field of family studies and related

professions that involve working with individuals and families in communities.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 785 - Family Dynamics

Credits: 3

An examination of theories of family function and dysfunction, techniques of assessment, and models of family interventions.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 786 - Lifespan Development

Credits: 3

Human development from both lifespan and bio-ecological perspectives focusing on major theories of development and current research on the micro-macro relationship.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 787 - Resilience in Families

Credits: 3

Exploration of resilience approaches to the study of families and human development across the life cycle.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 791 - Parenting Education

Credits: 3

An examination of theories, models, methods, research, and skills related to parenting and parent education.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HDFS 801 - Grant Development and Management

Credits: 3

Introduces students to the grant development process and provides an overview of what happens after a grant is awarded. Topics include: identifying funding sources, generating fundable ideas, assessing needs, project planning, budget design, evaluation and project management.

Repeat for Credit
N

Typically Offered
Summer

HDFS 806 - Statistical Methods in Human Development and Family Science I

Credits: 3

Introductory course in the use of statistics in family and human services research. Examines the use of statistical methods from basic descriptive and univariate measures to multivariate measures including ANOVA and Multiple Regression Analyses as they are used in family and human services research. Emphasis is placed on the analytical and applied aspects of the statistical procedures.

Repeat for Credit
N

Typically Offered
Fall

HDFS 808 - Topics in Applied Family Science

Credits: 1

Recent research focusing on selected relevant topics.

Repeat for Credit
Y

Typically Offered
Fall, Spring

HDFS 809 - Qualitative Research Methods in Human Development and Family Science

Credits: 3

Expands students' skills in theories and methods associated with qualitative research. Emphasis on understanding foundations of qualitative methods, comparing and using various qualitative traditions and applying this knowledge to a research project.

Repeat for Credit
N

Typically Offered
Fall

HDFS 825 - Family Resource Management

Credits: 3

Survey course of personal finance and family resource management literature to provide an overview of how individuals and family members develop and exercise their capacity to obtain and manage resources to meet life needs. Resources include the self, other people, time, money, energy, material assets, space, and environment.

Repeat for Credit
N

Typically Offered
Summer

HDFS 850 - Family Science

Credits: 3

Survey of family research literature to illustrate various approaches to the study of the family and to understand family changes within the life cycle.

Repeat for Credit
Y

Typically Offered
Fall

HDFS 852 - Theories of Human Development and Family Science

Credits: 3

Examines theories of human development and families, with emphasis on the application of human development and family theory in prevention science.

Repeat for Credit
Y

Typically Offered
Fall

HDFS 860 - Family Policy

Credits: 3

Examines the development, formation, implementation, and application of policy issues related to the family issues and social problems. Emphasis placed on how policy is made and how professionals can influence policy issues and outcomes.

Repeat for Credit
Y

Typically Offered
Other

HDFS 862 - Interpersonal Relationships

Credits: 3

In-depth examination of interpersonal relationships, including theoretical perspectives, research methods, relationship forms, relationship processes, and how context affects relationships.

Repeat for Credit
Y

Typically Offered
Fall

HDFS 881 - Capstone in Human Development and Family Science

Credits: 1-6

Supervised experience in providing help and/or instruction in the several areas of human development and family studies presented in terms of the special interests of the students. Consent of practicum supervisor is required for each.

Repeat for Credit
Y

Requisites
Prerequisite: HDFS 719 or HDFS 770.

Typically Offered
Fall, Spring, Summer

HDFS 882 - Practicum in Study of Student Development

Credits: 1-6

Supervised experience in providing help and/or instruction in the several areas of human development and family studies presented in terms of the special interests of the students. Consent of practicum supervisor is required for each.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 888 - Research Methods in Human Development and Family Science

Credits: 3

Focuses on the study and application of research methodology in the field of Human Development and Family Science.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 225 or STAT 702.

Typically Offered
Fall

HDFS 890 - Application of Research & Statistics in Human Development and Family Science

Credits: 3

Development of students' skills as quantitative methodologists and scholars. Students will refine their thinking about their research program and explore data sets that complement their research interests. Application, for purposes of this course, involves the utilization of statistical knowledge and techniques in practice, and the ability to convey this information to others, both through academic writing and through hands-on instruction.

Note
Familiarity with the basic functions of SPSS and AMOS are recommended.

Repeat for Credit
Y

Requisites
Prerequisite: FSHS 888 and any upper division or graduate level statistics courses.

Typically Offered
Spring

HDFS 893 - Evaluation of Prevention Science Programs

Credits: 3

Study and application of program evaluation approaches and methodology pertinent to evaluating prevention science programs in human development and family science settings.

Repeat for Credit
Y

Requisites
Prerequisite: HHS 888 or another graduate level social sciences research course.

Typically Offered
Spring

HDFS 894 - Readings in Human Development and Family Science

Credits: 1-6

Implications of research findings in preparation for professional work in counseling, teaching, and research in human development and family science.

Repeat for Credit
Y

Requisites
Prerequisite: 12 hours in social-behavioral science and consent of instructor.

Typically Offered
Fall, Spring, Summer

HDFS 898 - Professional and Ethical Issues in Applied Family Science

Credits: 1

Emphasizes the research-theory-practice connection. Includes cutting-edge issues in the field, ethics and professional development.

Repeat for Credit
Y

Typically Offered
Spring

HDFS 899 - MS Research in Human Development and Family Science

Credits: 1-8

Individual research problems which may form the basis for the master's thesis or report.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HDFS 906 - Statistical Methods in Family Studies and Human Sciences II

Credits: 3

Advanced applied statistics course designed for graduate students with a foundation and understanding of basic and multivariate statistics. Examines multiple variable analyses including log-linear, discriminate analyses, OLS and logistic regression and the issues involved using these techniques; principal component and factor analyses; path analyses; structural equation modeling; hierarchical linear and nonlinear modeling; and growth curve modeling.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 806

Typically Offered
Fall

HDFS 909 - Advanced Qualitative Methods in Family Science

Credits: 3

Emphasizes the diversity and variety within qualitative methodology. Focuses on hands-on experiences of completing a qualitative research project after the basic research design has been determined.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 809 OR EDLEA 838

Typically Offered
Spring

HDFS 950 - Theory Construction in Human Development and Family Science

Credits: 3

Focuses on the philosophical underpinnings, history, and practice of theory construction in the field of Human Development and Family Science. Includes examination of strategies and approaches to developing theories about individuals and families and the relationships of theory development to research methodology and practice.

Repeat for Credit
Y

Requisites
Prerequisite: HDFS 852

Typically Offered
Spring-Odd Years

HDFS 979 - Advanced Professional Issues in Family Science

Credits: 3

Capstone course for PhD students. Examines expectations and responsibilities of working in academia or other PhD-level professional positions: submitting and reviewing scholarly publications and presentations, serving as an expert witness, professional ethics, etc.

Repeat for Credit
Y

Requisites
Prerequisite: Completed at least 24 graduate credits.

Typically Offered
Other

HDFS 981 - Applied Practicum in HDFS

Credits: 1-3

This course is designed to provide students in the Prevention Science in HDFS doctoral program with a supervised experience in the field. The practicum experience helps students synthesize and apply their coursework while learning more about being a highly skilled professional in the field.

Repeat for Credit
Y

Requisites
Recommended Prerequisite: HDFS 770 and consent of instructor.

Typically Offered
Fall, Spring, Summer

HDFS 982 - College Teaching Practicum in HDFS

Credits: 1-3

This course is designed for students in the Prevention Science in HDFS doctoral program to gain practical skills in teaching through a structured teaching experience. This will involve observing; developing activities, lectures, assignments, and exams; teaching part of the assigned course; evaluating student performance; as well as other relevant teaching experiences.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 943

Typically Offered
Fall, Spring, Summer

HDFS 983 - Research Practicum in HDFS

Credits: 1-3

This course is designed for students in the Prevention Science in HDFS doctoral program to gain practical, advanced skills in human development and family science research through a structured research experience. This may consist of data collection, data analysis, literature reviews, dissemination of findings, as well as other relevant research experiences.

Repeat for Credit
Y

Requisites
Prerequisite: HHS 888 Corequisite: HDFS 809 or CFT 983

Typically Offered
Fall, Spring, Summer

HDFS 990 - Dissertation Proposal Seminar

Credits: 1

Dissertation Proposal Seminar

Repeat for Credit
Y

Typically Offered
Other

HDFS 999 - PhD Research in Human Development and Family Sciences

Credits: 1-18

PhD research in human development and family sciences.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HHS 100 - Well-being 1: You and Community

Credits: 1

Explore the meaning of well-being and how we foster it in the context of community. Learn how a better understanding of ourselves leads to greater well-being and sense of community.

Note
This course must be taken prior to other HHS Well-Being Courses. (HHS 200 and HHS 300)

Repeat for Credit
N

Typically Offered
Fall, Spring

HHS 200 - Well-being 2: Mind and Body

Credits: 1

Reflect on and assess current physical, psychological, and social well-being. Utilize evidence-based recommendations, reliable sources, and personal strengths to set and track progress towards mind, body, and relational goals.

Repeat for Credit
N

Requisites
Prerequisite: HHS 100 OR [HHS 101 AND HHS 201].

Typically Offered
Fall, Spring

HHS 300 - Well-being 3: Money and Meaning

Credits: 1

Explore components of financial well-being and how to access advice when major life issues arise with financial implications. Examine career well-being as a broad concept and how it relates to our sense of personal well-being, purpose, and meaning. Reflect on the interrelationship of career, social, financial, physical, and community well-being across the lifespan.

Repeat for Credit
N

Requisites
Prerequisite: HHS 100 OR [HHS 101 AND HHS 201].

Typically Offered
Fall, Spring

HHS 385 - Problems in Health & Human Sciences

Credits: 0-18

Independent study.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HHS 400 - Wichita State University Nursing Partnership

Credits: 0

Wichita State University Nursing Partnership

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HHS 499 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HHS 888 - Foundations in Research Methodology

Credits: 3

Graduate level course provides a foundation in research methodology in health and human sciences.

Repeat for Credit
N

Typically Offered
Fall

HHS 995 - Grant Writing and Management

Credits: 3

Focus on identifying extramural funding sources, grant writing, and managing grants.

Repeat for Credit
N

Requisites
Prerequisite: HHS 888 or other graduate-level research methods course.

Typically Offered
Spring

HINDI 101 - Hindi I

Credits: 4

Introduction to the structure of modern Hindi. Listening, speaking, reading, and writing.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

HINDI 102 - Hindi II

Credits: 4

Continuation of Hindi I, completion of the basic structural and linguistic principles of Hindi.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

HINDI 201 - Hindi III

Credits: 4

Continuation of Hindi II. Listening, speaking, reading, and writing.

Repeat for Credit
N

HIST 581 - Gender and Sexuality in Greece and Rome

Credits: 3

Provides an introduction to constructions of gender and sexuality with special focus on their intersections with culture, ethnicity, and class. Course will combine close readings of primary texts and discussions of material culture with secondary literature. Broader discussions will emphasize change over time, noting not only how gender and sexuality develop and evolve across centuries of Greek

and Roman culture but also how they influenced subsequent Western cultures. By means of close readings of these texts students will practice analyzing, interpreting, and contextualizing literature and material culture, and also come to a greater appreciation of how antiquity and modernity construct gender and sexuality. Course format will involve lecture combined with discursive analysis of texts, material culture, and especially visual arts.

Repeat for Credit
N

Typically Offered
Spring

HIST 583 - History of France, 1400-1715

Credits: 3

France from the conclusion of the Hundred Years War to the death of Louis XIV. French economy, society, and royal administration, and the changes generated in these areas by significant events: the Reformation and the Wars of Religion; the rise of France to world power; peasant uprisings and constitutional crisis; and the reforms of Richelieu, Colbert, and Louis XIV.
