HIST 801 - Historiography

Credits: 3-4

Main currents in historical research, the writing of history, and the influence of the great historians from Herodotus to the present.

Repeat for Credit
Y

Typically Offered
Other

HIST 810 - Security Studies Methodology

Credits: 2

An exploration of commonly used research methods in history and political science. Students will investigate quantitative and qualitative humanities and social sciences methodology through selected readings and limited research exercises.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 812 or concurrent enrollment.

Typically Offered
Fall, Spring

Cross-listed
POLSC 810

HIST 815 - Research Design in Security Studies

Credits: 1

An exploration of research methods in history and political science culminating in a piece of original research in Security Studies.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 810 or POLSC 810.

Typically Offered
Fall, Spring

Cross-listed
POLSC 815

HIST 850 - History and Security: East Asia

Credits: 3

An examination of the major historical problems and literature relating to national and international security in East Asia.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or POLSC 812 or concurrent enrollment.

Typically Offered
Other

HIST 851 - History and Security: Latin America

Credits: 3

An examination of the major historical problems and literature relating to national and international security in Latin America.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or POLSC 812 or concurrent enrollment.

Typically Offered
Other

HIST 852 - History and Security: the Middle East

Credits: 3

An examination of the major historical problems and literature relating to national and international security in the Middle East.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or POLSC 812 or concurrent enrollment.

Typically Offered
Fall

HIST 853 - History and Security: Russia/Central Asia

Credits: 3

An examination of the major historical problems and literature relating to national and international security in Russian and Central Asia.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or POLSC 812 or concurrent enrollment.

Typically Offered
Other

HIST 854 - History and Security: South Asia

Credits: 3

An examination of the major historical problems and literature relating to national and international security in South Asia.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or POLSC 812 or concurrent enrollment.

Typically Offered
Other

HIST 855 - History and Security: Modern Africa since 1850

Credits: 3

Focuses on major political events and their repercussions. Key topics include war in African history, the creation and administration of colonial empires, decolonization, and the political and security struggles of the post-independence era.

Repeat for Credit
N

Typically Offered
Fall, Spring

HIST 860 - Topics in International History

Credits: 3

Introduce the most important themes and issues in

historical topics and subjects of transnational and global significance. Contextualizes historical literature to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Typically Offered
Fall, Spring

HIST 899 - Master's Research in History

Credits: 1-18

Master's Research in History

Repeat for Credit
Y

Typically Offered
Other

HIST 905 - Nineteenth-Century Europe

Credits: 3

An examination of the major historical problems and literature.

Note
This survey course is intended to introduce students to the most important themes and issues in their respective fields. It aims to put the historical literature in broad context to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Typically Offered
Other

HIST 906 - Twentieth-Century Europe

Credits: 3

An examination of the major historical problems and literature.

Note
This survey course is intended to introduce students to the most important themes and issues in their respective fields. It aims to put the historical literature in broad context to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Typically Offered
Other

HIST 907 - Colonial/Revolutionary America

Credits: 3

An examination of the major historical problems and literature.

Note
This survey course is intended to introduce students to the most important themes and issues in their respective fields. It aims to put the historical literature in broad context to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or concurrent enrollment.

Typically Offered
Other

HIST 908 - Nineteenth-Century America

Credits: 3

An examination of the major historical problems and literature.

Note
This survey course is intended to introduce students to the most important themes and issues in their respective fields. It aims to put the historical literature in broad context to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or concurrent enrollment.

Typically Offered
Other

HIST 909 - Twentieth-Century America

Credits: 3

An examination of the major historical problems and literature.

Note
This survey course is intended to introduce students to the most important themes and issues in their respective fields. It aims to put the historical literature in broad context to help students prepare for teaching and for their general field exams.

Repeat for Credit
Y

Requisites
Prerequisite: HIST 801 or concurrent enrollment.

Typically Offered
Other

HIST 911 - Historical Approaches to Security

Credits: 3

Examination of theories and approaches to military history and the history of international relations.

Repeat for Credit
Y

Typically Offered
Fall

HIST 912 - Historical Methods in Security Studies

Credits: 3

Training in primary-source research in military history, foreign policy, and international relations.

Repeat for Credit
Y

Typically Offered
Spring

HIST 920 - Seminar in American Social History

Credits: 3

This seminar is a course in which students are expected to study the primary source material for particular topics within a general area of study and to write a paper based on research using such sources. These courses are intended to develop graduate students' skills in the use of research tools and methods, ability to conceptualize and organize an argument, and facility in presenting research findings. Within the general areas listed below, these courses may focus inter alia upon political, diplomatic, social, religious, intellectual, or environmental history.

Note
Specific topics will be listed in the class schedule for the semester in which they are offered.

Repeat for Credit
Y

Typically Offered
Other

HIST 921 - Seminar in Latin American History

Credits: 3

This seminar is a course in which students are expected to study the primary source material for particular topics within a general area of study and to write a paper based on research using such sources. These courses are intended to develop graduate students' skills in the use of research tools and methods, ability to conceptualize and organize an argument, and facility in presenting research findings. Within the general areas listed below, these courses may focus inter alia upon political, diplomatic, social, religious, intellectual, or environmental history.

Note
Specific topics will be listed in the class schedule for the semester in which they are offered.

Repeat for Credit
Y

Typically Offered
Other

HIST 922 - Seminar in American Diplomatic History

Credits: 3

This seminar is a course in which students are expected to study the primary source material for particular topics within a general area of study and to write a paper based on research using such sources. These courses are intended to develop graduate students' skills in the use of research tools and methods, ability to conceptualize and organize an argument, and facility in presenting research findings. Within the general areas listed below, these courses may focus inter alia upon political, diplomatic, social, religious, intellectual, or environmental history.

Note
Specific topics will be listed in the class schedule for the semester in which they are offered.

Repeat for Credit
Y

Typically Offered
Other

HIST 927 - Seminar in American Science and Technology

Credits: 3

This seminar is a course in which students are expected to study the primary source material for particular topics within a general area of study and to write a paper based on research using such sources. These courses are intended to develop graduate students' skills in the use of research tools and methods, ability to conceptualize and organize an argument, and facility in presenting research findings. Within the general areas listed below, these courses may focus inter alia upon political, diplomatic, social, religious, intellectual, or environmental history.

Credits: 1-18

PhD Research in History

Repeat for Credit
Y

Typically Offered
Other

HM 101 - Freshman Seminar in Hospitality Management

Credits: 1

A general orientation to the university, college, and department. Students will develop an understanding of Strengths Quest, academic career planning, the enrollment process, basic interviewing skills, resume development, and other issues as they apply to students in the hospitality management program.

Repeat for Credit
N

Requisites
Prerequisite: Hospitality Management majors only.

Typically Offered
Fall, Spring

HM 120 - Introduction to the Hospitality Industry

Credits: 3

Overview of the hospitality industry. Survey of the history, scope, trends, and career opportunities that comprise the segments of the industry.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Historical Perspectives

HM 205 - Food Safety and Protection in Hospitality Operations

Credits: 1

Overview of environmental issues that impact the hospitality industry. Includes: food safety principles and applications, Hazard Analysis Critical Control Point (HACCP) systems, and governmental regulations in the hospitality industry. Successful completion of the ServSafe Food Protection Manager Exam is required of all students in the course.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

HM 230 - Issues in Tourism

Credits: 3

An overview of the history and implications of travel and tourism focusing on the understanding of tourism from the perspectives of travelers and communities, while identifying tourism's economic, socio-cultural, and environmental impacts.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

HM 275 - Hospitality Work Experience I

Credits: 1

Planned experience in a hospitality operation; minimum of 200 hours exclusive of course work.

Note
Consent of School

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

HM 301 - Junior Seminar in Hospitality Management

Credits: 1

This seminar course will emphasize and reinforce important job searching skills including resume writing, interviewing techniques, job searches, communicating with employers before and after interviews, and social media management. This course will also introduce and emphasize critical thinking, research, and presentation skills that are needed for special projects in hospitality firms. After successfully completing the course, student will be able to search and secure an internship/professional position and to design, execute, and present a job related project in a hospitality firm.

Repeat for Credit
N

Requisites
Prerequisite: STAT 250; HM 101; Junior Standing. Co-requisite: HM 375

Typically Offered
Fall, Spring

HM 303 - Operational Research in the Hospitality Industry

Credits: 3

An applied research course for hospitality operations examining researchable ideas, data collection methods, data analysis, and interpretation and presentation of data, based on activities that occur in food and beverage, lodging, and event operations.

Repeat for Credit
N

Requisites
Prerequisite: STAT 250

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

HM 321 - Hospitality Service Systems

Credits: 3

Examination of the complexities of leading quality and service within all segments of the hospitality industry. A focus on developing leadership, problem solving and process management skills, work methods, team development, and evaluation of service systems.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

HM 331 - Resort and Club Management

Credits: 3

Exploration of the topics involved in resort and private club management, including operations, ownership and management structures, history and current trends, food and beverage service, marketing, and financial management.Exploration of topics involved in club management. Topics discussed are history and current trends of public and private clubs, food and beverage service, marketing, and event and financial management.

Repeat for Credit
N

Typically Offered
Fall

HM 341 - Principles of Food Production Management

Credits: 3

Basic principles and theories of foodservice systems; menu planning; development, standardization, adjustment, and

costing of quantity recipes; procurement and production of quality food; foodservice computer applications.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Fall, Spring

HM 351 - Commercial Food Production Management

Credits: 3

Applications of principles of commercial food production and hospitality service management systems, including procurement, production, and service in a commercial foodservice system; quality and cost controls, employee performance evaluation, process improvement (i.e., work simplification, motion economy), and commercial foodservice equipment operation in the program's commercial foodservice facility.

Repeat for Credit
N

Requisites
Prerequisite: HM 205 or ServSafe Certification

Typically Offered
Fall, Spring

HM 361 - Hotel Operations

Credits: 3

The development of the lodging industry and current trends. Organization and administration of hotel operations including front desk, housekeeping, laundry, sales/marketing, management, and other positions common to hotel operations.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Spring

HM 362 - Lodging Practicum

Credits: 1

Supervised experiences in the operational areas of a lodging property.

Repeat for Credit
N

Requisites
Prerequisite: HM 361 or concurrent enrollment.

Typically Offered
Fall, Spring

HM 363 - Event Management

Credits: 3

This course introduces students to the key players and potential careers in the meeting and event industry. Students will explore various perspectives and responsibilities of event planners. Additionally, basic core concepts essential for planning a meeting will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing.

Typically Offered
Fall

HM 370 - The Business of Wedding Consulting

Credits: 3

This course will introduce the student to the competencies required to become a professional wedding consultant. Students will analyze essential services that provide the necessary infrastructure for a wedding event and will examine the business, creative, and practical aspects of coordinating the wedding environment.

Repeat for Credit
N

Typically Offered
Fall

HM 375 - Hospitality Work Experience II

Credits: 1

A 300-hour planned experience that combines observation, and employment within a hospitality operation. Must be completed in the student's declared track.

Repeat for Credit
N

Requisites
Prerequisite: HM 275; Consent of academic advisor. Co-requisite: HM 341, HM 361, or HM 363.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

HM 422 - Cost Controls in Hospitality Operations

Credits: 3

Application of accounting principles to analyze control measures used in lodging meeting/conventions/events, and commercial and noncommercial foodservice operations. Includes managerial, financial, and ethical considerations associated with procurement and human resources.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231; HM 341.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

HM 423 - Facility Management

Credits: 3

Evaluation and selection of equipment, maintenance contracts, layout, design, sustainability of hospitality operations, facility renovation, and selection of consultants. Assessment of safety and security measures and development of risk management programs to increase guest/customer safety.

Note
The course is offered during Fall semester on the Olathe campus and Spring semester on the Manhattan campus.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

HM 424 - Hospitality Sales and Promotion

Credits: 3

This course guides the student to explore and understand successful sales and sales management behaviors in the hospitality industry. This course will focus on relational selling and include both asking for sales and being a hotel sales manager. Students will develop a comprehension in selling approaches, conversations and presentations, and sales management techniques. Course topics will include hotel sales structures, duties and responsibilities, sales forms, relationships, prospecting, sales call planning, communicating the message, closing the sale, as well as how to motivate, compensate and train sales people specific to the hospitality industry.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives

HM 426 - Fundraising and Nonprofit Events

Credits: 3

This course introduces students to the basics of fundraising and nonprofit events. Students will gain an understanding of the similarities and differences across nonprofit events and the key elements that make them successful. Students

will build and develop a plan for all facets of fundraising or nonprofit events.

Repeat for Credit
N

Requisites
Prerequisite: HM 363

Typically Offered
Fall

HM 427 - Travel and Dining Auction Event Management

Credits: 3

Application of event planning principles by analyzing previous travel and dining auctions, managing and executing the current year's travel and dining auction, and evaluating the results.

Note
Consent of School

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

HM 430 - Study Abroad Experience in Hospitality Management

Credits: 1-3

A Faculty-led Study Abroad Experience in Hospitality Management.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

HM 440 - Beverage Management

Credits: 3

The study of historic, social, ethical, physiological, and legal issues relating to alcoholic beverage service and use in contemporary America with emphasis on responsible and knowledgeable service of beer, wine, and spirits in hospitality operations. Course will include beverage tasting and sensory analysis of products commonly served in the beverage industry. Must be 21 years of age to enroll in the course.

Note
100% Lecture and 50% Lab. 21 years of age or older.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

HM 442 - Introduction to Wines

Credits: 1

Overview of wine varietals and major wine regions of the world, tasting and identifying wine varietals based on their specific characteristics, proper purchasing and service of wines, and using wines to complement foods.

Note
21 years of age or olders.

Repeat for Credit
N

Typically Offered
Fall, Spring

HM 462 - Advanced Wines

Credits: 1

An in-depth look at specific wine producing regions and sub-regions, a critical view of wines that define these regions, and preparation for service of wine in the hospitality industry.

Repeat for Credit
N

Requisites
Prerequisite: HM 440 or HM 442, and 21 years of age or older.

Typically Offered
Fall, Spring

HM 463 - Business Event Coordination

Credits: 3

In this course, students will plan a theoretical event from start to completion and learn details pertinent to the organization and execution of a business meeting. Topics include objectives, timelines, finance and contracts, site selection, program development, marketing, and evaluation.

Repeat for Credit
N

Requisites
Prerequisite: HM 363

Typically Offered
Spring

HM 464 - Revenue Management

Credits: 3

Application of revenue management, capacity management, duration control, pricing, and discounting as utilized in the hotel, restaurant, theme park, and car rental industries. Comprehensive examination of the complex factors that influence revenue management strategies and tactics in order to improve decision making and maximize revenue.

Repeat for Credit
N

Requisites
Prerequisite: HM 361, Junior standing.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

HM 465 - Catering and Banquet Management

Credits: 3

Application and principles of catering management, including off-site and on-site functions. Organizational, logistical, aesthetic, and marketing aspects of the catering industry will be utilized and applied.

Repeat for Credit
N

Typically Offered
Fall

HM 475 - Internship in Hospitality Management

Credits: 3

Planned and supervised experience in a foodservice or hospitality operation; minimum of 400 hours.

Repeat for Credit
N

Requisites
Prerequisite: For HM majors and minors only, junior standing, HM 303, 500 hours of documented paid or volunteer experience in the hospitality industry, consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

HM 482 - Human Resource Management in the Hospitality Industry

Credits: 3

A focus on the role of the hospitality manager in facilitating, training, and motivating employees. Discussion and analysis of methods to attract, select, develop, motivate, and retain quality employees to promote competitive organizational advantage in the hospitality industry.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

HM 499 - Problems in Hospitality Management

Credits: 1-18

Independent study under the supervision of a faculty member.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

HM 504 - Fair and Festival Management

Credits: 3

Examination of fairs, festivals, and special events. Understanding of the similarities and differences across different event types and the key elements that make them successful.

Repeat for Credit
N

Typically Offered
Fall

HM 621 - Hospitality Law

Credits: 3

Legal aspects of managing hospitality operations and responsibilities for the operations, patron civil rights, governmental regulations, franchising, and commercial transactions.

Repeat for Credit
N

Requisites
Prerequisite: HM 475.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

HM 624 - Procurement in the Hospitality Industry

Credits: 2

Principles and theories of procurement of food and supplies for hospitality operations. Includes management, financial, safety, and ethical considerations in the procurement process.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 442.

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility

HM 640 - Entrepreneurship in Hospitality Management

Credits: 3

Development and management of small businesses or private practice within the hospitality industry. Business plan development, marketing, cost considerations. Overview of consulting to healthcare and hospitality operations and examination of skills required for success.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 231.

Typically Offered
Spring-Even Years

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

HM 650 - Senior Seminar in Hospitality Management

Credits: 3

The application of critical thinking skills to explore hospitality management problems and perspectives. Decision-making tools will integrate marketing, human resources, diversity, ethics, leadership, team work, strategic management, and financial performance for food service, lodging, and event management.

Repeat for Credit
N

Requisites
Prerequisite: Senior Standing

Typically Offered
Spring

HM 662 - Foodservice Systems Management

Credits: 3

A capstone course in foodservice management that focuses on the management, analysis, and evaluation of food and beverage systems. Emphasis on planning, coordinating, and improving commercial and noncommercial operations. Development of analytical and decision-making skills for solving managerial and operational problems.

Repeat for Credit
N

Requisites
Prerequisite: HM 351 and HM 375. Recommended Foundation Course: HM 422 and HM 475.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

HM 663 - Business Event Management

Credits: 3

A capstone course in meeting and event management. This course will provide students with an opportunity to integrate knowledge, concepts and capacities from different parts of their learning experiences into real-world event planning experiences. This course will enable students to plan an event from initial conception to final evaluation.

Repeat for Credit
N

Requisites
Prerequisite: Senior Standing. Recommended Foundation Course: HM 475

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

HM 664 - Advanced Hotel Operations

Credits: 3

This senior-level course provides students the opportunity to utilize a strategic management process as a decision-making tool that integrates marketing, human resources, operations, and financial performance measures. This is a computer simulation class, where teams will compete with each other in real-time to understand and evaluate the market dynamics of a competitive set of hotels.

Repeat for Credit
N

Requisites
Prerequisite: HM 464, Senior Standing.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

HM 665 - Casino Management

Credits: 3

Investigation of the histories and overall operations of casino properties and their impacts on the foodservice and hospitality industry from the social, economic, political and environmental perspectives.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing, 60 credit hours or more.

Typically Offered
Fall

HM 705 - Information Technology Systems in Hospitality Operations

Credits: 3

Review of computer development in foodservice and hospitality operations; development of criteria for implementation of a computer system; analysis of foodservice and hospitality hardware and software.

Repeat for Credit
N

Requisites
Prerequisite: CIS 101; and HM 480 or HM 560 or MANGT 220.

Typically Offered
Other

HM 710 - Readings in Hospitality Administration

Credits: 1-3

Directed study of current literature in hospitality management and related areas.

Repeat for Credit
Y

Requisites
Prerequisite: FNDH 543 or MANGT 220.

Typically Offered
Fall, Spring, Summer

HM 730 - Advanced Service Management

Credits: 3

Explores advanced service management strategies involved in optimizing the guest experience in service-intensive industries, with a focus on optimizing operations and driving operational efficiency.

Repeat for Credit
N

Typically Offered
Fall

HM 785 - Practicum in Hospitality Management

Credits: 1-6

Professional experiences in approved foodservice organization as a member of the management team under faculty supervision.

Repeat for Credit
Y

Requisites
Prerequisite or concurrent: HM 342; and HM 480 or HM 560 or MANGT 220.

Typically Offered
Fall, Spring, Summer

HM 800 - Topics in Hospitality Management

Credits: 1-3

Presentation of timely, cutting-edge material pertinent to professional practice in hospitality management and dietetics.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HM 805 - Advanced Foodservice Management

Credits: 3

Production planning and controls in foodservice systems analysis in foodservice systems. Decision optimization and systems analysis in foodservice organizations. Consideration of various types of foodservice systems.

Repeat for Credit

Y

Requisites
Prerequisite: HM 662 and MANGT 220 or equivalent.

Typically Offered
Fall-Odd Years

HM 810 - Research Techniques in Hospitality Management

Credits: 3

Survey and application of research methodology in foodservice and hospitality management.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or STAT 703.

Typically Offered
Spring

HM 815 - Advanced Lodging Management

Credits: 3

This course provides an introduction to conceptual and empirical research in the lodging industry and academic discipline. The course will familiarize students with the historical streams of lodging-focused research and introduce them to the current methods, trends, theory, and application of research in the lodging industry.

Repeat for Credit
N

Requisites
Prerequisite: HM 664 or equivalent.

Typically Offered
Fall-Odd Years

HM 820 - Problems in Hospitality Management

Credits: 1-18

Individual investigation of problems in foodservice and hospitality management. Conferences and reports at appointed hours.

Repeat for Credit
Y

Requisites
Prerequisite: HM 342; and HM 480 or HM 560 or MANGT 400.

Typically Offered
Fall, Spring, Summer

HM 825 - Advanced Meetings and Business Event Management

Credits: 3

This three-hour seminar course will expose students to a variety of higher level event management concepts. By the end of the course, students will be able to complete executive tasks, conduct effective event management research, incorporate findings into applicable strategic plans for the future, and disseminate knowledge to educators, industry, and executives.

Repeat for Credit
N

Requisites
Prerequisite: HM 663 or equivalent.

Typically Offered
Fall-Even Years

HM 835 - Survey of Research in Hospitality Management

Credits: 3

Explores classic and contemporary research to introduce research topics and trends in the hospitality discipline. Underlying theories, research designs, and industry implications of both theoretical and empirical research will be analyzed and critiqued.

Repeat for Credit
N

Requisites
Prerequisite: Required for Master's students only

Typically Offered
Fall-Even Years

HM 885 - Seminar in Hospitality Administration

Credits: 1

Discussions of research related to foodservice and hospitality management.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HM 890 - Administration of Hospitality Organizations

Credits: 3

Advanced study of management applied to foodservice and hospitality organizations.

Repeat for Credit
Y

Requisites
Prerequisite: MANGT 220.

Typically Offered
Fall

HM 895 - Financial Management and Cost Controls for the Hospitality Industry

Credits: 3

Overview of fundamental knowledge of financial management, managerial accounting and operational cost controls for the hospitality industry. Important topics include review of managerial accounting concepts based on the Uniform System of Accounts for the Lodging Industry, value and risk analyses, budgeting, asset management, expansion via franchising and management contracts, cost-volume-profit analyses, and operational applications for financial performance.

Repeat for Credit
Y

Requisites
Prerequisite: A basic financial or managerial accounting course

Typically Offered
Fall-Odd Years

HM 899 - Research in Hospitality Administration

Credits: 1-18

Individual research which may form the basis for master's report or thesis.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HM 905 - Advanced Hospitality Strategic Management

Credits: 3

Through lecture, case and literature review and analysis, and projects; Advanced Hospitality Strategic Management introduces students to empirical research in hospitality strategic management and is designed to improve knowledge and abilities to analyze and apply different perspectives of strategic management in the hospitality industry. Topics include but are not limited to environmental scanning techniques, value chain analyses, strategies of choice in variety of business levels, implementation strategies, and maximizing effectiveness of strategic management.

Repeat for Credit
N

Requisites
Prerequisite: HM 895, Instructor consent required. Other Requirements: An undergraduate or master's level strategic management course is recommended.

Typically Offered
Spring-Even Years

HM 975 - Research and Applied Theories in Hospitality Management

Credits: 3

Critique of theoretical constructs and research applications in the study in foodservice and hospitality management. Emphasis on preliminary stages of research development including preparation of literature reviews and preliminary proposals for research.

Repeat for Credit
Y

Typically Offered
Fall-Even Years

HM 980 - Higher Education in Hospitality Management

Credits: 3

An in-depth study of the higher education system in hospitality administration and professional development that prepares for a successful scholar/educator in hospitality education.

Repeat for Credit
Y

Requisites
Prerequisite: EDCEP 927 and consent of instructor.

Typically Offered
Spring-Odd Years

HM 985 - Advances in Hospitality Management

Credits: 3

Analysis of selected topics and research in foodservice and hospitality management.

Repeat for Credit
Y

Requisites
Prerequisite: HM 810 and consent of instructor.

Typically Offered
Other

HM 990 - Dissertation Proposal Seminar

Credits: 1

Presentation and discussion of proposals for dissertation research.

Repeat for Credit
Y

Requisites
Prerequisite: Six hours of statistics, 3 hours of research design or methods, and consent of major professor.

Typically Offered
Fall, Spring, Summer

HM 993 - Teaching Practicum in Hospitality Management

Credits: 3

This course is designed to serve as a culminating experience in which students apply the teaching and learning strategies learned in coursework through practice in the higher education classroom. In addition to teaching a subsection of a current course, weekly meetings will discuss relevant topics that affect instructors in the classroom environment.

Note
Consent of School

Repeat for Credit
N

Requisites
Prerequisite: EDCI 943

Typically Offered
Fall, Spring

HM 995 - Grantsmanship and Publication

Credits: 3

Grant writing, identifying external funding, managing grants, preparing manuscripts for peer-reviewed publication, and preparing papers and poster for presentation at professional meetings.

Note
Graduate level research methods class.

Repeat for Credit

Y

Typically Offered
Spring-Odd Years

HM 999 - Research in Hospitality Administration

Credits: 1-18

Research in hospitality management for the doctoral dissertation.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 101 - Introduction to Horticulture and Natural Resources

Credits: 1

This course is an introduction to the Horticulture and Natural Resource department. It is designed to assist students in developing skills and an awareness of resources to promote a successful college experience and prepare them for future career opportunities within the HNR fields.

Repeat for Credit
N

Typically Offered
Fall, Spring

HNR 115 - Special Topics in Horticulture and Natural Resources

Credits: 1-6

Discussion and lectures on selected topic areas related to Horticulture and Natural Resources

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 140 - Horticulture and Natural Resources Problems

Credits: 0-3

Problems and reports in horticulture, park management and conservation, or wildlife and outdoor enterprise management.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 390 - Horticulture and Natural Resources Topics

Credits: 1-18

Lectures and discussion of topics of importance to undergraduate majors in horticulture, park management and conservation, or wildlife and outdoor enterprise management.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 440 - Advanced Horticulture and Natural Resources Problems

Credits: 0-3

Advanced problems and reports in horticulture, park management and conservation, or wildlife and outdoor enterprise management.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 899 - Masters Research

Credits: 1-18

Investigations in horticulture, park management and conservation, or wildlife and outdoor enterprise management for preparation of master's thesis.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HNR 999 - PhD Research

Credits: 1-18

Investigations in horticulture, park management and conservation, or wildlife and outdoor enterprise management. Data collected may form basis for a thesis or dissertation.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 190 - Preparing for Your Horticulture Career

Credits: 1

This course is designed to assist students in their personal and professional development. Specifically, students will gain an appreciation for the significance of the horticultural industry while acquiring various skills necessary for a rewarding internship experience and their future professional career. Students will also develop an understanding, awareness and empathy of human diversity as it relates to each individual and the world around them.

Note
One hour lecture per week.

Repeat for Credit
N

Typically Offered
Fall

HORT 201 - Principles of Horticultural Science

Credits: 4

The basic principles of plant science and the environment that apply to horticulture; survey of the industry; plant taxonomy, anatomy, morphology, and physiology; environment and plant growth; plant propagation, pest management, plant breeding.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
4 Natural and Physical Sciences

K-State 8
Natural and Physical Sciences

HORT 202 - Principles of Horticultural Science Lab

Credits: 1

The lab for basic principles of plant science and the environment that apply to horticulture; survey of the industry; plant taxonomy, anatomy, morphology, and physiology; environment and plant growth; plant propagation, pest management, plant breeding.

Note
Two hours lab a week

Repeat for Credit
N

Requisites
Corequisite: HORT 201

Typically Offered
Fall, Spring

HORT 210 - Concepts of Floral Design

Credits: 3

An introduction to the use of flowers and related products with emphasis on fundamentals of design.

Note
Two hours lecture and three hours lab a week. For majors or non-majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

HORT 256 - Human Dimensions of Horticulture

Credits: 3

Introduction to horticulture applied in schools, psychiatric and medical hospitals, corrections, vocational rehabilitation centers, elderly programs, and consumer horticulture settings. Networking the art and science of horticulture with architecture, business, social sciences, health care, horticulture, and education.

Note
Two hours lecture and one hour recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

HORT 274 - Landscape Plants I

Credits: 3

An introduction to landscape plant identification of trees, shrubs, and cultivated herbaceous cultivated plants, including perennials, annuals, biennials, and bulbs. Topics covered in the course include classification and nomenclature, plant growth characteristics and their landscape use. Weekly labs consist of lengthy walking campus tours to observe and identify plant specimens. A field trip may be required.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Prerequisite: BIOL 198 or HORT 201 or AGRON 120.

Typically Offered
Fall

HORT 275 - Horticultural Design I

Credits: 3

Introduction to the landscape design process including historical perspectives and contemporary issues; development of planning, graphical presentation, and communication skills; and application of design principles to horticultural garden design.

Note
Two hours lecture and two hours lab per week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

HORT 282 - Foundations of Horticultural Pest Management

Credits: 1

Pesticide use and handling, horticultural pesticides and their characteristics, integrated pest management approaches, and pesticide applicator certification.

Note
One hour lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore Standing
Recommended prerequisite: HORT 201 and an entomology, plant pathology, or weed science course.

Typically Offered
Spring

HORT 300 - Plants and Society

Credits: 3

Provides a perspective of horticulture plants and their importance in society and how they are intertwined with everyday activities. Fosters student well-being, highlighting and emphasizing the art and science of growing and using plants to enhance and improve one's environment, through hands-on learning opportunities, while engaging in the plant world.

Repeat for Credit
N

Requisites
Prerequisite: Non-majors only.

Typically Offered
Other

K-State 8
Natural and Physical Sciences
Historical Perspectives

HORT 301 - Horticulture Practicum

Credits: 1-3

Experiential approach to learning horticulture through teaching. Students will assist faculty with specific horticulture courses.

Note
No more than 3 credits may be used as horticulture specialization electives nor may it substitute for a required horticulture course in the horticulture or horticultural therapy curricula.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201, junior standing, and successful completion of practicum assistance course with at least a C.

Typically Offered
Fall, Spring

HORT 325 - Introduction to Organic Farming

Credits: 2

This class will cover the history of organic farming principles, practices, and policies. USDA standards will be compared to similar standards in other countries, and to "green labels" that compete with organic products in the marketplace. Industry trends as well as the basics of how to certify farms and food processors will be included.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall-Even Years

K-State 8
Ethical Reasoning and Responsibility

HORT 350 - Plant Propagation

Credits: 3

Designed to develop proficiency in various skills and techniques necessary for propagation of horticultural plants. Basic fundamentals of seed structure and vegetative makeup of plants are emphasized.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201 or BIOL 198

Typically Offered
Spring

HORT 360 - Public Horticulture

Credits: 3

In-depth presentation and discussion of techniques and requirements for the management and administration of a public horticultural facility. Topics include oral and written presentation skills, proposal development, public relations, budgeting, fundraising, dealing with governing boards, interpersonal relationships and managing horticultural operations.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Spring

HORT 375 - Landscape Plants II

Credits: 3

Continued identification of cultivated landscape tree, shrubs, and herbaceous plants, including perennials, annuals, biennials, and bulbs. Topics covered in the course include classification and botanical nomenclature, plant growth characteristics and their landscape use.

Note
Weekly labs consist of lengthy walking campus tours to observe and identify plant specimens. A field trip may be required. Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 274.

Typically Offered
Spring-Even Years

HORT 377 - Interior Plantscaping

Credits: 3

A study of the interior plantscaping industry to include identification of plants used in interior environments; designing, installing and maintaining interiorscapes and green walls; and managing interior plantscaping businesses.

Note
One three-hour lab and one two-hour lecture/studio a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201.

Typically Offered
Fall-Even Years

HORT 390 - Horticulture Topics

Credits: 1-18

Lectures and discussion of topics of importance to undergraduate majors.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 391 - Independent Study in Floral Design

Credits: 3

Independent, supervised study of a topic related to floral design.

Repeat for Credit
N

Typically Offered
Fall, Spring

HORT 405 - Water Issues in the Lawn and Landscape

Credits: 3

This course will examine critical water issues related to irrigation in urbanizing watersheds, with an emphasis on water quality and quantity. Factors impacting water scarcity and quality will be discussed. Successful completion of this course will help students understand the interrelatedness of incorrect irrigation practices and water quality/quantity, and will equip them to help protect water resources through application of science based irrigation practices.

Note
This is a distance education course.

Repeat for Credit
N

Requisites
Recommended Foundation: Junior standing or one year of experience in the lawn/landscape maintenance industry.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

HORT 410 - Floral Planning for Special Events

Credits: 1

Operation of a successful event planning floral business for weddings and other special occasions with a focus on the consultation and proposal plan.

Note
Two hours lecture and two hours lab a week for first 5 weeks of the semester.

Repeat for Credit
N

Requisites
Prerequisite: HORT 210

Typically Offered
Spring-Even Years

HORT 415 - Wedding Flowers

Credits: 1

Creation of custom wedding designs such as bridal bouquets, corsages/boutonnieres, altar arrangements, and centerpieces based on parameters established during consultations and present trends.

Note
Two hours lecture and two hours lab a week, second five weeks of the semester.

Repeat for Credit
N

Requisites
Prerequisite: HORT 210.

Typically Offered
Spring-Even Years

HORT 420 - Unique Floral Designs

Credits: 1

Application of advanced principles and techniques of floral design in the creation of unique arrangements utilizing standard and nonstandard supplies in an artistic way.

Note
Two hours lecture and two hours lab a week, last five weeks of the semester.

Repeat for Credit
N

Requisites
Prerequisite: HORT 210.

Typically Offered
Spring-Even Years

HORT 490 - Horticulture Internship

Credits: 3-6

Principles of commercial or public horticulture activity including exposure to multiple phases of the working horticulture operation.

Note
Students will be placed according to specific interest. Required for horticulture majors after having completed 60 hours.

Repeat for Credit
Y

Requisites
Recommended Foundation Courses: HORT 190, HORT 201, plus one horticulture commodity course level 300 or above.

Typically Offered
Fall, Spring, Summer

HORT 495 - Undergraduate Research in Horticulture

Credits: 0-3

Undergraduate students work with faculty mentors on projects involving various elements of research in horticultural science including identifying a problem, designing and conducting experiments, interpreting and communicating the research results. The completed project must be presented at a professional forum, and students are required to write a final project report on completion of their project.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 499 - The Horticultural Professional

Credits: 0

Completion of horticulture program assessment tools. Completion of modules associated with professional development during careers in horticultural disciplines, including diversity and ethics in the workplace, job search skills, and providing leadership in the profession.

Repeat for Credit
N

Typically Offered
Fall, Spring

HORT 508 - Business of Sustainable Landscape Management

Credits: 2

Understanding and implementing maintenance requirements for the care of young trees, shrubs and herbaceous plants that focus on practices that address environmental issues related to the management of residential and commercial landscapes. Students will learn how to analyze and apply landscape management practices while creating an attractive landscape in balance with the local climate that requires minimal resource inputs, such as human energy, fertilizers, pesticides and water.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 201

Typically Offered
Spring

HORT 510 - Horticultural Design II

Credits: 3

Reinforcement of the horticultural design process as applied to the use of native and introduced plant materials. Emphasis on functional and aesthetic arrangement of plants in small-scale design to meet site design objectives and adaptation to microclimates. Students expected to develop site adapted plant palettes and graphic ability to present their design.

Note
Two three-hour studio periods a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 275 and two plant materials courses.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

HORT 515 - Basic Turfgrass Culture

Credits: 3

Turfgrass identification and adaptation; establishment and maintenance of turf for golf courses, sports fields, home lawns, parks, and commercial/institutional grounds.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites

Recommended Foundation Courses: HORT 201 and AGRON 205.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

HORT 517 - Golf Course and Sports Turf Operations

Credits: 3

Strategies involved in golf course and sports turf operation, including development of cultural practices, effective communication, personnel management, and budgeting.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 515.

Typically Offered
Fall

HORT 520 - Fruit Production

Credits: 3

Principles and practices of cultivating fruit and nut crops commercially. Laboratory offers experiences in pomological practices.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201 or equivalent. Recommended Foundation Course: HORT 350.

Typically Offered
Spring-Odd Years

Natural and Physical Sciences

HORT 525 - Horticulture for Special Populations

Credits: 3

An intensive study of the concepts and methods of using plants and gardening as therapeutic activities with developmentally disabled, geriatric, economically and socially disadvantaged, emotionally disturbed, or educationally deprived clients.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

HORT 530 - Horticultural Therapy Case Management

Credits: 1

Guest lecturer and student presentations of topics relating to professionalism, current issues, or goals of horticultural therapy. The course is intended to help students focus expectations and assumptions about a professional career in horticultural therapy and to give them practice in articulating their understanding of the field. Client case management is used as part of career practice.

Note
One hour recitation a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

HORT 535 - Horticultural Therapy Field Techniques

Credits: 3

Students under supervision will plan, conduct, and evaluate horticultural therapy activities at Manhattan institutional sites selected according to student's interest. A weekly discussion session addresses evaluation and issues of professionalism.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 525.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

HORT 540 - Horticultural Therapy Field Experiences

Credits: 3-6

Supervised training at institutions with horticultural therapy programs to gain experience in the application and use of horticultural activities for special populations. Six months (1,000) hours continuous internships required in psychiatric and correctional programs.

Note
Two 3-month (500 hours) internships may be completed at two different sites. Students are required to complete 6 credits of field experience before graduation.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

HORT 545 - Computer Applications in Horticultural Design

Credits: 3

Introduction to a variety of computer software packages that students may encounter in the nursery/garden center environment. These include planning, routing, and estimating packages.

Note
Students must provide their own laptop computer.

One hour recitation and four hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 510, or instructor permission.

Typically Offered
Fall

HORT 550 - Horticultural Irrigation Systems

Credits: 3

Application of the principles and practices of horticultural irrigation which involve the various aspects of irrigation system installation, maintenance and scheduling, electrical troubleshooting, basic hydraulics, and drip irrigation as these topics pertain to residential and commercial landscapes, recreational turf areas, and greenhouse and field production systems.

Note
Two hour lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: MATH 100; HORT 201; and AGRON 205.

Typically Offered
Fall

HORT 551 - Landscape Contracting and Construction

Credits: 2

The study of contracts and specifications, and the bidding and estimating processes as applied to landscape

contracting. The interpretation and implementation of small-scale landscape construction (hardscape) projects.

Note
1 hour lecture and 2 hours lab a week

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 275.

Typically Offered
Fall

HORT 552 - Horticultural Landscape Construction

Credits: 1

The interpretation and implementation of small-scale landscape construction (hardscape) projects.

Note
Three hours lab a week, for the last 11 weeks of the semester.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 275.

Typically Offered
Spring

HORT 560 - Vegetable Crop Production

Credits: 3

Study of production principles and cultural practices involved in the growing of vegetable crops.

Note
Two hours lecture and two hours lab or field trips a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201.

Typically Offered
Spring-Even Years

Natural and Physical Sciences

HORT 570 - Greenhouse Operations Management

Credits: 3

Greenhouse systems operations and management including greenhouse layout; structures; glazing materials; heating, ventilation, irrigation, lighting, benching, growing medium handling, and fertilization systems; traffic flow; crop handling, processing and shipping.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

HORT 575 - Nursery Management

Credits: 3

A study of the various practices and methods of operating a commercial nursery for the production of woody ornamental plants for the landscaping industry. Nursery layout, planting systems, nutrition management, plant maintenance, and harvesting technologies will be discussed.

Note
Two hours lecture and three hours lab a week. Field trips may be required.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 350 and AGRON 205.

Typically Offered

Fall

Natural and Physical Sciences

HORT 580 - Advanced Horticultural Design

Credits: 3

Emphasis is on horticultural design projects with clients, working with the design process, design articulation and communication with the clients.

Repeat for Credit
N

Requisites
Prerequisite: HORT 510.

Typically Offered
Other

K-State 8
Aesthetic Interpretation

HORT 585 - Arboriculture

Credits: 3

Principles and practices of maintaining shade and ornamental trees under urban environments.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 201; and HORT 274 or FOR 330.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

HORT 587 - Turfgrass Diseases and Their Management

Credits: 1

Biology, diagnosis and integrated management of turfgrass diseases. Emphasis is on diseases of intensively maintained turfgrass.

Note
Two hours lecture and two hours lab a week, for the first five weeks of the semester.

Repeat for Credit
N

Requisites
Prerequisite: HORT 282

Typically Offered
Fall-Even Years

K-State 8
Natural and Physical Sciences

HORT 588 - Turfgrass Weeds and Their Management

Credits: 1

Biology, diagnosis and integrated management of turfgrass weeds.

Note
Two hours lecture and two hours lab a week, for the middle five weeks of the semester.

Repeat for Credit
N

Requisites
Corequisite or Prerequisite: HORT 282 and HORT 515

Typically Offered
Fall-Even Years

K-State 8
Natural and Physical Sciences

HORT 589 - Turfgrass Insects and Their Management

Credits: 1

Biology, diagnosis and integrated management of turfgrass insect pests.

Note
Two hours lecture and two hours lab a week, for the last

five weeks of the semester.

Repeat for Credit
N

Requisites
Corequisite or Prerequisite: HORT 282 and HORT 515

Typically Offered
Fall-Even Years

K-State 8
Natural and Physical Sciences

HORT 591 - Small Farm Practicum

Credits: 3

Project-based practical experience in small-scale, diversified, agricultural production.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 520, or HORT 560 or HORT 570

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

HORT 595 - Horticulture Study Abroad

Credits: 3

Seminar and travel course designed to prepare students before an international study abroad experience focused on horticulture. Upon completion of travel, students will analyze, critique, and report their experiences. In addition, students will be introduced and immersed in historical components, both disciplinary and culturally.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

HORT 600 - Herbaceous Plant Production

Credits: 3

The principles and commercial practices for producing annual and herbaceous perennial plants from seed and cuttings, including vegetable and herb crops in controlled environments. Analysis of crop production costs and plant growth regulation will be emphasized.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 350 and HORT 570.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

HORT 625 - Floral Crops Production and Handling

Credits: 2

The principles and commercial practices for producing floral potted crops and fresh flowers crops, emphasizing the physical responses of plants to their environment. Aspects of postharvest physiology of fresh flowers will be covered.

Note
One hour recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 201. Recommended Foundation courses: HORT 350, BIOL 500, and HORT 570.

Typically Offered
Spring-Odd Years

Global Issues and Perspectives

HORT 630 - General Viticulture

Credits: 3

Focus is on aspects of grapes, from vine anatomy to final products produced from them. Includes cultivars, propagation, canopy management, diseases, weed control, physiology, anatomy, irrigation, wine production, climates and soils.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 520.

Typically Offered
Spring-Odd Years

HORT 640 - Horticultural Problems

Credits: 0-3

Problems and reports in floriculture, olericulture, ornamental horticulture, pomology, turfgrass and horticultural therapy.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 650 - Agrarian Traditions: Literature Shaping Modern Food Movements

Credits: 3

Examines the Agrarian literary and philosophical traditions to better understand the drivers of food and agriculture movements in the United States and globally. Studies Virgil, Sir Albert Howard, Aldo Leopold, and Wendell Berry, among others. Analyzes texts both within their historical contexts and as they apply to modern food movements.

Repeat for Credit
Y

Requisites
Prerequisite or Corequisite: ENGL 200 and Junior standing.

Typically Offered
Fall-Even Years

K-State 8
Historical Perspectives

HORT 695 - Introduction to Permaculture

Credits: 3

Exploration of a thinking/design methodology that seeks to provide for the physical needs of humans, including food, water, shelter, energy, etc. while doing so in an environmentally-friendly, sustainable manner.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 201 and HORT 275.

Typically Offered
Fall-Odd Years

HORT 705 - Hydroponic Food Production

Credits: 3

This hands-on course explores hydroponic growing methods both regionally and internationally, incorporating production of tomatoes, cucumbers, peppers, leafy greens, herbs, microgreens, and berries into a variety of production systems used in controlled environment agriculture. Topics will also include sustainability of the systems and an introduction to safe food handling practices.

Repeat for Credit
N

Requisites
Requisite: Junior standing or consent of Instructor. Recommended Foundation Course: HORT 570.

Typically Offered
Spring-Even Years

HORT 706 - Advanced Culture of Golf and Sports Turf

Credits: 3

Advanced topics in golf and sports turf maintenance focusing on construction methods and management of abiotic and biotic stresses.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: HORT 515.

Typically Offered
Fall

HORT 710 - Plant Cell, Tissue and Organ Culture

Credits: 3

Course will cover the principles and laboratory exercises that demonstrate major concepts and practical techniques in plant cell, tissue and organ culture. The history and use of plant cell-, tissue-, and organ-culture for crop improvement will be explained. The variety of tissue-culture techniques will be highlighted. Selected readings and practical tissue culture projects will be required.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 350.

Typically Offered
Spring

HORT 715 - Advanced Interiorscaping

Credits: 3

Focus is the physiological principles and industry practices in the production, moving, care, and maintenance of interior plants. This course will provide students the career tools to design, install and maintain interior plantscapes through knowledge of interior plant physiology, care and maintenance.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 201 and BIOL 500.

Typically Offered
Spring-Even Years

HORT 720 - Environmental Nursery Production

Credits: 3

Cultural practices used with nursery production will be presented with focus on the adoption of best management practices, conservation of resources, scientific research-based investigations related to nursery cultural practices, potential risks to nursery personnel, and off-site movement of air-borne materials and effluents to surrounding areas and public watersheds.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 575.

Typically Offered
Spring-Odd Years

HORT 725 - Postharvest Technology and Physiology of Horticultural Crops

Credits: 3

A study of the principles and practices involved in the

harvesting, handling and storage of horticultural products. The relationship of plant structure and physiology will be emphasized in discussing effects of postharvest handling and storage to maximize quality and shelf life of products.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Spring-Odd Years

HORT 751 - Human Issues in Horticultural Therapy

Credits: 3

This course will explore human issues in horticulture generally, and human issues in horticultural therapy specifically. Consideration of selected topics and issues such as people-plant relationship theories, horticultural therapy as a specialized allied health field, health-care gardens and their use, societal impacts on horticultural therapy, and research issues. Provides students with a knowledge and understanding of the literature in horticultural therapy and develops an appreciation of the interrelationships involved in this multidisciplinary area.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: A course in research methods and a course in statistics.

Typically Offered
Fall

HORT 752 - Horticulture in Horticultural Therapy

Credits: 3

Application of horticulture principles and practices in therapeutic settings; considerations for greenhouse systems operations and management in therapeutic settings; landscape maintenance, fruit and vegetable gardening, and production horticulture as part of a therapeutic program; and plant propagation for production and therapy.

Repeat for Credit
N

Typically Offered
Spring

HORT 753 - Clinical Skills in Horticultural Therapy

Credits: 3

Development of horticultural therapy skills and methodology is facilitated through real-life case studies. Includes instruction, practice, and evaluation of clinical skills with population groups typically served through horticultural therapy.

Repeat for Credit
N

Typically Offered
Fall

HORT 755 - Practicum in Horticultural Therapy

Credits: 3

The practicum is a means of demonstrating the interconnections between 'theory' and 'practice'. By conducting a practicum project, students demonstrate the ability to apply concepts and ideas from their study of horticultural therapy to a specific population or setting.

Repeat for Credit
N

Typically Offered
Fall, Spring

HORT 760 - Business Management for Horticultural Enterprises

Credits: 3

Focus is on developing a detailed business plan for the service, design and production businesses in horticulture that incorporates considerations of start-up capitalization, insurance, investments, legal accounting and employee compensation. Strategic decision-making and aspects of a

horticulture firms that are unique to its industries, such as product seasonality and perishability, will be discussed.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 500-level or above.

Typically Offered
Fall

HORT 775 - Plant Breeding Methods in Horticulture

Credits: 3

Focus is on introductory plant breeding principles with emphasis on traditional methods of developing improved cultivars of crosspollinated, self-pollinated, and asexually-propagated horticultural crops, and the genetic principles on which breeding methods are based. The course provides a general background in all areas of plant breeding as a foundation for mastering more complex breeding principles.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: ASI 500 and STAT 300-level or above.

Typically Offered
Fall-Even Years

HORT 780 - Health-Promoting Phytochemicals: Fruits and Vegetables

Credits: 2

The course deals with various aspects of phytochemicals in plant-based foods including fruits and vegetables and their impact on human health and well-being. It includes potential effects of phytochemicals in promoting human health, preventing various diseases and fostering wellness. It also includes biosynthesis and metabolism of phytochemicals in plants. Emphasis is placed on developing strategies to improve the phytochemical content of food crops through approaches involving crop management, environmental and biotechnology tools. Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and CHM 110 or CHM 210.

Typically Offered
Fall-Odd Years

HORT 790 - Sustainable Agriculture

Credits: 2

Historical perspectives of the sustainable agriculture movement in the United States and world-wide will be examined and critiqued. Components of sustainable agriculture such as agroecosystem theory, permaculture, energy use efficiency, and organic standards will be compared and evaluated. Students will demonstrate their understanding and application of the material by conducting research on a topic within sustainable agriculture and presenting the topic to the rest of the class.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall-Odd Years

K-State 8
Global Issues and Perspectives

HORT 791 - Urban Agriculture

Credits: 2

Students will become familiar with a wide variety of urban agriculture types and production systems utilized in urban settings. The course will include background readings, case studies, guest speakers, student-facilitated class

discussions, and lectures.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

Social Sciences

HORT 792 - Urban Food Production Practicum

Credits: 1

Students will complete a 400 hour practicum in an approved urban agriculture setting to gain exposure to a broad range of tasks facing the urban farmer. This includes planning, production and marketing of crops in high tunnels and open field.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: HORT 520 and HORT 560.

Typically Offered
Fall, Spring, Summer

HORT 793 - Farm to Fork Produce Safety

Credits: 2

This course will cover all aspects of food safety for fresh produce grown in urban and rural environments, including pathogen ecology and production aspects as well as pre-harvest and postharvest factors that influence the risk of microbial contamination. More specifically, we will discuss ways to minimize the risk of human pathogens on fresh produce using strategies such as the implementation of Good Agricultural Practices (GAPs) and Good Handling Practices (GHPs). The course will cover postharvest interventions that are currently used (chemical sanitizers) as well as innovative technology applications like physical treatments, irradiation, and biological control techniques. Additionally, students will explore the impact of food borne outbreaks on public health and the fresh produce industry in terms of economics, consumer acceptance, and legal aspects.

Repeat for Credit
N

Requisites
Recommended Foundation Course: A course in microbiology.

Typically Offered
Fall-Even Years

HORT 794 - Urban Food Systems

Credits: 2

This course will cover all components of urban food systems through the lens of food security, food justice, access, policy, and community planning. Students will gain skills in grant-writing, non-profit planning and management, and working with urban policy and planning boards.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
HORT/UFS 794

HORT 795 - Urban Agriculture Study Tour

Credits: 1

Faculty-led trip for students to explore leading examples of urban agriculture. Each year, a trip will occur within North America, lasting approximately 7 days. The study tours will focus on urban food system development in major cities and will highlight examples of how food is being grown in urban areas and the impacts that it has on the community.

Note
Instructor permission

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

HORT 796 - Professional Development in Urban Food Systems

Credits: 0-1

A team instructed seminar course that provides urban food systems students with a suite of skills complimentary to their research experience but still necessary for professional career success.

Note
Urban Food System students will be expected to enroll in this course 4 semesters.

Repeat for Credit
Y

Typically Offered
Fall, Spring

HORT 800 - Horticultural Physiology

Credits: 3

Discussions of recent advances in horticultural crop plant physiology, including improvements in horticultural crops resulting from applications of molecular biology and biotechnology.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall

HORT 815 - Plant Nutrition and Nutrient Management

Credits: 3

Focuses on the macro and micronutrient elements and their function in the growth and development of plants. Emphasis will be placed on the roles of single elements, interactions/balances between elements, and nutrient deficiency/toxicity symptoms as they affect the physiology of the whole plant and management of nutrient applications. The relationships between crop nutrition and production and environmental considerations (yield, drought, temperature, pests) will be explored.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: AGRON 205 and BIOL 500.

Typically Offered
Spring-Even Years

HORT 846 - Plant Research Methods

Credits: 3

Review of history and forms of plant science literature. Discussion on selecting experimental procedures, interpreting data, and reporting results.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: One statistics course or consent of instructor.

Typically Offered
Fall

HORT 880 - Topics in Horticulture

Credits: 0-18

Discussion and lectures of important papers and contributions in this field.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 898 - Master's Report

Credits: 1-18

Investigations in pomology, olericulture, floriculture, ornamental horticulture, turfgrass, or horticultural therapy for preparation of master's report.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 899 - Research-MS

Credits: 1-18

Investigations in pomology, olericulture, floriculture, ornamental horticulture, turfgrass, or horticultural therapy for preparation of master's thesis.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 910 - Advances in Plant Cell Culture

Credits: 2

Course will cover current topics in plant cell culture, applications and commercial practices, with emphasis on plant genetic improvement. Research-level skills in this area will be taught.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: HORT 710.

Typically Offered
Spring-Odd Years

HORT 940 - Plant Regulators in Horticulture

Credits: 3

A study of synthetic plant regulators used to initiate, induce, promote, inhibit, or alter characteristics of horticultural plants and crops. Included are kinds and types of exogenous plant regulators used on crops, their activity, plant responses, benefits and problems, and application technology.

Note
One hour lecture and two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 510 or BIOL 500, and one graduate plant commodity course.

Typically Offered
Fall-Even Years

HORT 951 - Horticulture Graduate Seminar

Credits: 1

Student presentations and discussion of investigational works in the various disciplines of Horticulture and Natural Resources.

Repeat for Credit
Y

Typically Offered
Fall, Spring

HORT 960 - Environmental Plant Stress

Credits: 3

Physiological, biochemical and morphological factors involved in stress development and resistance will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: HORT 800

Typically Offered
Spring

HORT 970 - Topics in Horticultural Therapy

Credits: 0-18

Discussion and lectures on important papers and contributions in horticultural therapy.

Note
Permission of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

HORT 999 - Research in Horticulture, PhD

Credits: 1-18

Investigations in pomology, olericulture, floriculture, ornamental horticulture, and turfgrass. Data collected may form basis for a thesis or dissertation.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IAID 290 - Design and Material Culture

Credits: 3

This course examines contemporary topics within material culture and design across the three domains of practice and scales: Interior Architecture, Furniture Design, and Industrial Design. It serves as an introduction to the disciplinary topics that are shaping current and future design practice. The course begins with a chronological survey of design movements and their grounding theories which serves to frame a deeper thematic discussion around the three major course topics: environmental sustainability, health, and equity.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

IAID 299 - History of Furniture

Credits: 3

Exploration of furniture history from prehistory to the present. Focus on socio-cultural, architectural, technological, material culture, manufacturing, spiritual, aesthetic, sustainable factors over the human timeline.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

IAID 407 - Design Workshop I

Credits: 4

An introduction to the principles of furniture design, with special emphasis on material properties, fabrication methods, tectonics, and structural considerations of furniture design. The course also serves as an introduction to best-practice techniques for safely using the tools and equipment within the Fabrication Lab. Through a series of initial exercises students will develop a versatile foundation in woodworking and metalworking skills that will be applied to the design and fabrication of small-scale furniture projects.

Repeat for Credit
N

Requisites
Prerequisite: IAID 290

Typically Offered
Fall, Spring, Summer

IAID 430 - Visual Communication I

Credits: 3

Seeks to provide a basic understanding of design visualization and presentation in both traditional and digital applications. A two and three-dimensional sensitivity is developed through a series of projects and lectures utilizing the principles of proportion, scale, hierarchy, balance, movement, line, plane, volume, texture, color and an introduction of vector and raster graphics software.

Repeat for Credit
N

Requisites
Prerequisite: ENVD 202.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

IAID 431 - Visual Communication II

Credits: 3

Provides an advanced understanding of design visualization and presentation. Introduces a variety of 3D modeling and rendering software commonly used in the Industrial and Product Design field. Explores digital form development, materials representation, perceptual education and visual communication.

Repeat for Credit
N

Requisites
Prerequisite: IAID 430

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

IAID 432 - Visual Communication III

Credits: 3

Explores advanced techniques in design visualization and presentation. Advanced techniques in image generation and editing using raster and vector tools. Advanced topics in layout and typesetting. Introduction to time-based media, including audio and video editing and 2D animation. Introduction to web and interaction design.

Repeat for Credit
N

Requisites
Prerequisite: IAID 431

Typically Offered
Fall, Spring, Summer

IAID 456 - Introduction to Industrial Design

Credits: 2

Introduction to the Profession of Product/Industrial Design including history; major movements; key practitioners; socio-cultural, architectural and technological drivers; unique design/make processes and methodologies; materials and manufacturing techniques; and, contemporary issues.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

IAID 602 - Furniture Design II

Credits: 4

This course continues to enhance and increase the understanding of a human-centered approach to the design and prototyping of furniture, while focusing more deeply on function and context. Students will develop and practice intermediate woodworking and metalworking techniques and skills. The topics of the course may also include contextual and functional analysis for furniture design, sustainable practices, intermediate structural considerations,and an introduction to human factors as they relate to the design of furniture and accessories.

Repeat for Credit
N

Requisites
Prerequisite: IAID 407 and no grade lower than a C in any IARC or INDD studio course.

Typically Offered
Fall, Spring, Summer

IAID 605 - Problems in IAID

Credits: 1-18

Study of specific problems related to Interior Architecture, Industrial Design, or Furniture Design.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IAID 615 - Topics in Furniture Design

Credits: 1-3

Study of specific furniture design topics.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IAID 680 - Production Furniture for the Contract Market Research

Credits: 1

Introduction and implementation of market research; client end-user research; manufacturing implications; BIFMA and other testing requirements; and, competitive market analysis and implications to develop a complete "design brief" for a line of contract furniture within a major manufacturer's existing line.

Repeat for Credit
N

Typically Offered
Fall

IAID 681 - Production Furniture for the Contract Market Design

Credits: 2

This course builds upon the knowledge gained and the design brief developed in IARC 680, Production Furniture for the Contract Market Research and develops the designers' understanding of intersecting forces affecting the design of a line of furniture, from conception to final production. Students work in teams with a manufacturer in the design and development of a line/family of products-expectations of design, prototyping, royalties and licensing-as well as the manufacturing processes and knowledge of effectively specifying furnishings.

Repeat for Credit
N

Requisites
Prerequisite: IAID 680.

Typically Offered
Spring

IAID 753 - Professional Practice: Professional Responsibility

Credits: 1

Interdisciplinary course addresses the connections between allied design professions and the larger community. It helps students to understand and appreciate their professional legal and ethical responsibilities.

Repeat for Credit
N

Typically Offered
Fall, Spring

IAID 754 - Professional Practice: Office Practices

Credits: 1

Interdisciplinary course addresses practice-based issues concerning professional relationships in the design and delivery process, management of projects, communication practices, and fiscal concerns.

Repeat for Credit
N

Typically Offered
Fall, Spring

IAID 814 - Furniture Design III

Credits: 4

Advanced exploration of contemporary topics in furniture design. Students explore innovative design solutions through an iterative, inclusive, and human-centered design process. There is a special emphasis on the generation of multiple mock-ups and prototypes to explore and test their design solutions.

Repeat for Credit
Y

Requisites
Prerequisite: IAID 602 and no grade lower than a C in any IARC or INDD studio course.

Typically Offered
Fall, Spring, Summer

IAID 824 - Advanced Furniture Design Studio

Credits: 6

Advanced design, construction, and finishing of contemporary furniture. Students explore projects programmed under the previous semester's Advanced Studio Programming. Projects must be relevant in a contemporary socio-cultural, architectural and technological context; employ rigorous design research processes and methodologies; identify user and usability needs/ desires; accommodate market opportunities and constraints; explore multiple conceptual solutions in a variety of hand and digital media; and demonstrate experimentation in the design of spatial components utilizing advanced construction techniques and materials through the development and documentation of models and prototypes. A book, oral and visual presentation and display materials for exhibition of the student's work will be required at the completion of the course.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 810 or INDD 810, IARC 815 or INDD 815.

Typically Offered
Fall, Spring, Summer

IAID 891 - Contemporary Design Seminar

Credits: 3

Seminar on current interior architecture, product design and furniture design that illustrate principles and practical concerns that motivate design with readings, class discussion, student presentations, research papers or projects.

Note
Open to non-majors accepted in the College of Architecture, Planning and Design.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

IAPD 821 - Advanced IAPD Design Studio

Credits: 4

Advanced study of interior space planning, product design, and interior design.

Repeat for Credit
Y

Typically Offered
Spring, Summer

IARC 248 - Fundamentals of Architectural Technology

Credits: 3

Instruction in the fundamentals of architectural technology with emphasis on the concepts and principles necessary for developing an integrated approach to building design.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Admission to a professional program in the college.

Typically Offered
Fall

Cross-listed
ARCH 248: Fundamentals of Architectural Technology

IARC 300 - Design and Material Culture

Credits: 3

People's personal characteristics or social position can be expressed by the products they purchase, the possessions they own, and the physical environments they create. Design has become a major factor influencing one's final decision for purchasing these products. This course examines material culture which is created from the influences of human behavior, design, history, marketing, economics, politics, geography, the arts, and sociology.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

IARC 307 - IARC Design Studio I

Credits: 5

Introduction to the Interior Architecture design process. Generation of design concept and design alternatives for small-scale projects. Introduction to basic design theory, beginning design research, human scale, behavior, ergonomics and anthropometrics as they affect design decisions. Introduction of structure and environmental analysis as informants and determinants of design. Focus on multiple graphic representations and compositions, including diagramming, sketching, freehand drawing, and enhancing through digital means.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the professional program in interior architecture.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

IARC 310 - IARC Digital Applications

Credits: 2

This course addresses current digital media as it is used by the profession to draft and visualize design projects. Survey a wide variety of contemporary design and visualization software. The intention is not mastery of any single software but instead to form an understanding of the interface and use of the tools and when they are appropriate. Enable the thoughtful discussion and understanding of design representation and process in both drafting and visualization. Enable and empower the student to comfortably engage design software as they continue to evolve.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the professional program in interior architecture.

Typically Offered
Fall, Summer

K-State 8
Aesthetic Interpretation

IARC 320 - IARC Design Studio II

Credits: 5

This studio introduces the principles of design, design terminology, and the values of a human centered design philosophy for the interior environment. Significant emphasis will be on the theoretical underpinnings of project ideation and development; and formal design processes and decision-making. Oral, graphic and visual communication skills and model making techniques will also be stressed to assist students in representing their design ideas.

Repeat for Credit
N

Requisites
Prerequisite: IARC 307; no grade lower than a C in any interior architecture and product design studio course.

Typically Offered
Fall, Spring, Summer

K-State 8

Aesthetic Interpretation
Historical Perspectives

IARC 391 - Topics in Contemporary Design Seminar

Credits: 3

Seminar on current interior architecture, industrial design, and furniture design that illustrate principles and practical concerns that motivate design with readings, class discussion, student presentations, research papers or projects.

Repeat for Credit
N

Requisites
Prerequisite: Open to non-majors accepted in the College of Architecture, Planning and Design; third-year standing.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

IARC 406 - Problems in IARC

Credits: 1-18

Study of specific interior architectural problems under direct supervision of a member of the department.

Repeat for Credit
Y

Requisites
Prerequisite: ENVD 201.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

IARC 409 - Materials and Finishes

Credits: 3

Introduction to materials, textiles, and finishes specific to interior applications. Criteria for evaluation, selection, and application of interior materials and finishes with the building fabric and their impact on building design. Preparation of written and graphic communications to illustrate and direct the construction process.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the professional program in interior architecture.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

IARC 412 - Design Workshop I Studio

Credits: 1

Exploration of design alternatives; process, presentation and construction graphics communicating design.

Repeat for Credit
N

Requisites
Corequisite: IARC 407.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

IARC 435 - IARC Design Studio III

Credits: 5

This studio builds on the knowledge and skills developed in IARC 320. It provides an in-depth understanding of the design methodologies and principles of interior architecture enhanced with an introduction to evidence-based design through the principles of environment-behavior, review and analysis of historic precedents, user needs, and the impact of shapes and forms, materials, lighting and color.

Repeat for Credit

N

Requisites
Prerequisite: IARC 320, no grade lower than a C in any interior architecture studio course.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Social Sciences

IARC 440 - IARC Design Studio IV

Credits: 5

This course will build upon and extend the knowledge and skill base gained by students in previous studios, and will include the introduction of programming methodology and its relationship to the design and organization of interior space. Emphasis will be placed on an understanding of how human behavior affects the designed environment, including the elements and objects that shape it such as the appropriate selection of furniture, finishes, fixtures, and equipment within the context of their relationships to form, function, task and users' needs.

Repeat for Credit
N

Requisites
Prerequisite: IARC 435, no grade lower than a C in any interior architecture and industrial design studio course.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Social Sciences

IARC 603 - Design Workshop II Studio

Credits: 1

Studio component of Design Workshop II. Exploration of design alternatives; process, presentation and construction graphics, students increase their proficiency at communicating ideas through working and presentation drawings for projects to be created in IARC 802: Design Workshop II.

Repeat for Credit
N

Requisites
Prerequisite: IARC 407, IARC 412 and no grade lower than a C in any IAPD or INDD studio course.
Corequisite: IARC 602.

Typically Offered
Fall, Spring, Summer

IARC 605 - Problems in IARC

Credits: 1-18

Study of specific problems related to Interior Architecture.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

IARC 606 - IARC Design Studio VI

Credits: 5

This semester of study provides an option for an interdisciplinary collaborative studio course oriented towards replicating the learning experience and interactive activities that takes place in the modern multidisciplinary professional office or a validated equivalent studio completed in an approved study program.

Repeat for Credit
N

Requisites
Prerequisite: ARCH 433 and IARC 801, and no grade lower than a C in any interior architecture design studio course.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Natural and Physical Sciences

IARC 625 - Lighting

Credits: 3

An examination of design and technical issues related to luminous environments in building interiors. Topics include color and light, vision, light sources, luminaire selection and design, and the evaluation of lighting solutions.

Repeat for Credit
N

Requisites
Prerequisite: IARC 435

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

IARC 628 - Construction Documentation

Credits: 3

A technical capstone course that explores the development of construction documentation for interior architecture projects includes demolition, partition, and reflected ceiling plans, power and communications plans, finish and furnishings plans, interior elevations, sections, details, and schedules. Understanding of the mechanical, electrical, plumbing and structural systems, as well as building and life-safety codes, and the Americans with Disabilities Act will be demonstrated through completion of the set of drawings.

Repeat for Credit
N

Requisites
Prerequisite: IARC 435.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

IARC 644 - Internship

Credits: 9

Fifteen week internship in a professional environment with a focus on interior architecture, product/industrial design and/or furniture design: office and field experience.

Repeat for Credit
N

Requisites
Prerequisite: IARC 440; Corequisite: IARC 645.

Typically Offered
Fall, Spring

IARC 645 - Internship Report

Credits: 5

Development of the student's analysis; observation, and communication skills in relationship to the professional office and field environment. Detailed documentation, online and on-campus, of the experiences encountered during internship, allowing classmates to learn from their peer's varied experiences as well as provide a detailed documentation of the student's work during internship.

Repeat for Credit
N

Requisites
Corequisite: IARC 644.

Typically Offered
Fall, Spring

IARC 664 - Summer Internship

Credits: 6

Ten week internship in a professional environment with a focus on interior architecture, industrial/product design and/or furniture design: office and field experience.

Repeat for Credit
N

Requisites
Prerequisite: IARC 440 and IARC 628 and no grade lower than a C in any IARC or INDD studio course.

Corequisite: IARC 665.

Typically Offered
Summer

IARC 665 - Summer Internship Report

Credits: 1

Development of the student's analysis, observation, and communication skills in relationship to the professional office and field environment. Detailed documentation, online and on-campus, of the experiences encountered during internship, allowing classmates to learn from their peer's varied experiences as well as provide a detailed documentation of the student's work during internship.

Repeat for Credit
N

Requisites
Corequisite: IARC 664.

Typically Offered
Summer

K-State 8
Empirical and Quantitative Reasoning

IARC 710 - Advanced 3-D Computer Modeling

Credits: 3

Lighting, materials, animation, advanced modeling techniques, sound, and storyboarding are methodologies required to successfully build a digital presentation for projection in a two dimensional, or 3-dimensional environment using the vision domes. Projects that utilize these topics will include an introduction to 3D modeling, animation, sound, titling, lighting, and a material editor.

Repeat for Credit
N

Requisites
Prerequisite: IARC 410.

Typically Offered
Fall

IARC 755 - Professional Practice: Discipline-Specific Topics

Credits: 1

Covers discipline-specific concerns, focusing on issues specific to architecture, interior architecture and product design, landscape architecture or regional and community planning.

Repeat for Credit
N

Typically Offered
Fall, Spring

IARC 760 - IARC Seminar

Credits: 0-18

Readings and discussion of contemporary thought and movements within the field of interior architecture design with special emphasis on the societal factors that produce and effect change.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring

IARC 801 - IARC Design Studio V

Credits: 5

This semester of study provides an option for an interdisciplinary collaborative studio course oriented towards replicating the learning experience and interactive activities that take place in the modern multi-disciplinary professional office.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 440 and no grade lower than a C in any IARC studio course.

Typically Offered
Fall, Spring, Summer

IARC 802 - Design Workshop II

Credits: 3

Design Workshop II is intended to further develop the student's understanding of the three dimensional design process through research, design, prototype construction, evaluation and redesign. Enhance and increase the student's

understanding of the structural characteristics of materials.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 407, IARC 412 and no grade lower than a C in any IARC or INDD studio course.
Corequisite: IARC 803.

Typically Offered
Fall, Spring, Summer

IARC 803 - Design Workshop II Studio

Credits: 1

Studio component of Design Workshop II. Exploration of design alternatives, process, presentation and construction graphics, students increase their proficiency at communicating ideas through working and presentation drawings for projects to be created in IARC 802: Design Workshop II.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 407, IARC 412 and no grade lower than a C in any IARC or INDD studio course.
Corequisite: IARC 802.

Typically Offered
Fall, Spring, Summer

IARC 810 - IARC Capstone Studio

Credits: 5-6

Students are to pursue design projects that encompass their previous educational experience validating their knowledge of the IARC program studies. The project will be based on extensive research and review. The project presentation will suggest unique and applicable solutions with clearly identified methodology of implementation.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 801 and IARC 811.

Typically Offered
Fall

IARC 811 - Design Research

Credits: 2-3

Identify evaluation criteria appropriate for design research and problem solving, analysis of literature, construction of problem statements, development and documentation of design problem proposals and reports.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 440.

Typically Offered
Fall, Spring, Summer

IARC 813 - Furniture Design Workshop Studio

Credits: 1

Studio component of IARC 814 Furniture Design Workshop. Exploration of contemporary design alternatives, students explore innovation and demonstrate knowledge through design processes and including process, presentation and construction graphics for projects to be created in IARC 814: Furniture Design Workshop.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 603. Corequisite: IARC 814.

Typically Offered
Fall, Spring, Summer

IARC 815 - Advanced Studio Programming

Credits: 2-3

Research of programming methodologies culminating in a programmatic document used as the basis for the design project in IARC 822, IARC 823 or IARC 824.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 801.

Typically Offered
Fall, Summer

IARC 822 - Advanced Product Design Studio

Credits: 6

Students explore projects programmed under the previous semester IARC 815 Advanced Studio Programming. Projects must be relevant in a contemporary socio-cultural, architectural and technological context; employ rigorous design research processes and methodologies; identify user and usability needs/desires; accommodate market opportunities and constraints; explore multiple conceptual solutions in a variety of hand and digital media; build and document models and prototypes; and estimate material and manufacturing costs. A book, oral and visual presentation, and display materials for exhibition of the student's work will be required at the completion of the course.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 810 and IARC 815.

Typically Offered
Fall, Spring, Summer

IARC 823 - Advanced Interior Architecture Design Studio

Credits: 6

Students explore projects programmed under the previous semester IAPD 815 Advanced Studio Programming. Projects focus on interior architecture represent a suitable design relevancy and proper academic rigor on the level of graduate design study. Design solutions must be relevant in a contemporary socio-cultural and architectural context; employ rigorous design research processes and methodologies; respond to user needs and desires; explore multiple innovative conceptual solutions in a variety of hand and digital media; and illustrate advanced knowledge and application of materiality, understanding of structural and building environmental systems' implication on interior architecture, and the selection or design of furnishings that enhance the goals for the spaces.

Repeat for Credit
Y

Requisites
Prerequisite: IARC 810 and IARC 815.

Typically Offered
Fall, Spring, Summer

IARC 830 - Problems in IARC

Credits: 0-18

Study of specific interior architectural problems under direct supervision of the departmental staff.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring

IDFS 350 - Our Sustainable World

Credits: 3

Sustainability has become one of the most pressing scientific and social challenges of the modern era. This course introduces students to the theory, principles, and practices of sustainability - by focusing on environmental, social, and economic sustainability perspectives, behaviors, policies, and customs on a global level. It includes discussions on creating ecological health, economic welfare, and social justice.

Repeat for Credit
N

Typically Offered
Spring, Summer

Cross-listed
ID 350

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

IDFS 650 - Resilient Systems for a Sustainable World

Credits: 3

Study of resilience in environmental, economic, and social systems to foster human wellbeing from a human ecology perspective. Examines theories and approaches that create resilient systems resulting in ecological health, economic welfare, and social justice.

Repeat for Credit
N

Requisites
Prerequisite: IDFS 350 OR GEOG 360 OR FASH 700

Typically Offered
Fall, Spring

IDFS 670 - Problem Solving for a Sustainable World

Credits: 3

Study of problem solving approaches with application to personal action, social systems, and the ecology of the planet from a human ecology perspective. The course will emphasize developing solutions to problems through the application of problem solving methods and thinking skills. Systems thinking, design thinking, critical thinking, and creative thinking will be employed as means to solve challenges to human wellbeing.

Repeat for Credit
N

Requisites
Prerequisite: IDFS 350 OR GEOG 360 OR FASH 700

Typically Offered
Fall, Spring

IDFS 750 - Leading Change for a Sustainable World

Credits: 3

Study of skills, techniques, and methods of leading groups to overcome challenges to human wellbeing associated with the climate crisis from a human ecology perspective. Students in the course will learn and apply effective leadership approaches and processes and develop individual skills of effective change leadership.

Repeat for Credit
N

Requisites
Prerequisite: IDFS 650 and IDFS 670

Typically Offered
Fall, Spring

IDSN 115 - First Year ID Student Seminar

Credits: 1

First Year Seminar is structured to engage and support students during their first semester of study. The course is focused on learning strategies and resources that build toward successful outcomes for the remainder of their college studies.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the Interior Design Program.

Typically Offered
Fall

IDSN 210 - Design and Behavior in the Interior Environment

Credits: 3

Developing awareness of aesthetic and behavioral relationships fundamental to interior design.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

IDSN 225 - Interior Design Studio 1

Credits: 4

Introduction to two-dimensional and three-dimensional design fundamentals including design elements and principles, the design process, interior design theory and its application, and fundamental design communication methods including drawing and model building.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the interior design program.

Typically Offered
Fall

IDSN 245 - Interior Design Studio 2

Credits: 4

Exploration of two-dimensional and three-dimensional design fundamentals. Introduction to color theory in spatial design. Introduction to light, shade, and shadow. Introduction to rendering, constructed perspective, and paraline drawing.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 225 with a C or better.

Typically Offered
Spring

IDSN 300 - Global Experiences in Interior Design

Credits: 0-6

An experiential learning course that prepares students for and immerses them in an international study tour designed to enhance their global and cultural awareness. Lectures and tours target important interior/architectural design, furniture, and objects of material culture.

Note
Instructor's permission.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IDSN 310 - Construction Methods and Materials for Interior Design

Credits: 4

Introduction to theories, concepts, selection, and application of construction processes, materials, and finishes. Introduction to codes, regulations, representation of construction methods, and sustainability.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 245 and IDSN 350 with C or better.

Typically Offered
Fall

IDSN 315 - Digital Visualization I

Credits: 2

Introduction to and application of digital technologies used by interior design professionals for 2D drafting and presentation layout.

Repeat for Credit
N

Requisites
Corequisite: IDSN 325

Typically Offered
Fall

IDSN 320 - History of Interior Design I

Credits: 3

A historic survey of all aspects of the built environment, including architecture, furniture, textiles, and the minor arts from antiquity to 1850.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

IDSN 325 - Interior Design Studio 3

Credits: 4

Advanced spatial design fundamentals. Application of human factors and theories of human behavior in the built environment. Selection of materials and colors. Emphasis on design conceptualization and creativity. Advanced visual communication methods including perspective drawing and rendering and other rapid visualization skills.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 245 with a C or better
Corequisite: IDSN 315

Typically Offered
Fall

IDSN 330 - Textiles for Interior Design

Credits: 3

Introduction to textiles for interior environments, with a focus on the fabrication and application of materials designed specifically for use as upholstery, window coverings, soft floor coverings, wall coverings, panel systems, and other miscellaneous interior applications. Also includes the regulatory, environmental, and human health impacts of textile production, application, and maintenance.

Repeat for Credit
N

Typically Offered
Spring

IDSN 345 - Interior Design Studio 4

Credits: 4

Application of interior design theory and evidence-based design in small scale projects. Introduction of project programming for interior design. Application of codes and regulations. Continued emphasis on design communication skills.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 310 and IDSN 325 with a C or better.

Typically Offered
Spring

IDSN 360 - History of Interior Design II

Credits: 3

A survey of design evolution of architecture, interiors, furniture, textiles, and the minor arts from 1850 to the present.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 320.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

IDSN 399 - Interior Design Practicum

Credits: 0-2

Off-campus professional experience in an appropriate design-related setting.

Repeat for Credit
Y

Requisites
Prerequisite: IDSN 345 and IDSN 415 with a C or better.

Typically Offered
Summer

IDSN 410 - Housing and Its Environment

Credits: 3

Socioeconomic, political-legal, and consumer overview of housing. Includes individual, family, and public decisions related to residential alternatives, their acquisition, and housing and environmental standards.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring

IDSN 415 - Digital Visualization II

Credits: 2

Introduction to and application of digital technologies used by interior design professionals for 3D representation and rendering of design solutions.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 310 and IDSN 325 with a C or better. Co-requisite: IDSN 345.

Typically Offered
Spring

IDSN 425 - Interior Design Studio 5

Credits: 4

Application of theory and research in medium scale projects. Focus on construction systems, materials, and methods. Continued emphasis on communication skills, programming, spatial design, and application of codes and regulations.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 345 and IDSN 415 with a C or better. Co-requisite: IDSN 435.

Typically Offered
Fall

IDSN 435 - Systems and Technology for Interior Design I

Credits: 3

Introduction to the principles of lighting, daylighting, acoustics, water supply, sanitation, thermal comfort, and indoor air quality to enhance human wellbeing.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 101 and PHYS 103 or PHYS 113 or PHYS 115 with a C or better

Typically Offered
Spring

IDSN 440 - Systems and Technology for Interior Design II

Credits: 3

Integration and application of all building systems with a focus on new technology and support of human wellbeing.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 425 and IDSN 435 with a C or better.

Typically Offered
Fall

IDSN 445 - Interior Design Studio 6

Credits: 4

Development of working drawings and specifications for projects integrating building systems and interior construction.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 425 and IDSN 435 with a C or better. Co-requisite: IDSN 440.

Typically Offered
Spring

IDSN 499 - Problems in Interior Design

Credits: 0-18

Independent study.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

IDSN 530 - Interior Design Practices and Procedures

Credits: 3

Ethics, business procedures, and professional development; contract services and administration; and preparation for job market entry as applied to the practice of interior design.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 425 with a C or better and admission to the interior design program.

Typically Offered
Spring

IDSN 545 - Interior Design Studio 7

Credits: 4

Application of design theory to create solutions for complex, large-scale interior spaces. Projects require implementation of all phases of the design process. Students will gain greater understanding of the interior designer's responsibilities within the context of the design professions.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 445 and IDSN 530 with a C or better.

Typically Offered
Fall

IDSN 599 - Interior Design Internship

Credits: 3-4

Supervised off-campus professional experience in appropriate design-related firms, government agencies, or the housing industry.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 445 and IDSN 530 with a C or better and admission to the interior design program and a 2.2 cumulative GPA and 2.5 GPA in professional areas.

Typically Offered
Fall, Spring, Summer

IDSN 600 - Interior Design Study Tour

Credits: 1-3

Supervised off-campus tour to acquaint the student with rich artistic and cultural locations around the world and expand student's global perspectives of the design profession. Lectures and tours target important interior/architectural design and furniture collections.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor's permission.

Typically Offered
Fall, Spring, Summer

IDSN 630 - Topics in Advanced Interior Design Theory

Credits: 3

An examination of contemporary social and cultural influences on design theory and applications within the interior design profession.

Repeat for Credit
Y

Requisites
Prerequisite: IDSN 345 with a C or better.

Typically Offered
Fall, Spring

IDSN 645 - Interior Design Studio 8

Credits: 4

Application of design theory to create solutions for complex, large-scale interior spaces. Projects will conform to professional standards regarding design process, protection of health, safety, and welfare, and construction methods.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 445 and IDSN 530 with a C or better.

Typically Offered
Spring

IDSN 650 - Advanced Design and Behavior in the Interior Environment

Credits: 3

The design of interior environments explored in an ecological, behavioral, and cultural context.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 345 or consent of instructor.

Typically Offered
Fall, Spring

IDSN 651 - Design for Supportive Environments

Credits: 4

Analysis of the age and ability related needs and challenges faced by children, older adults, and persons with disabilities. Team approaches to providing living and work environments that accommodate both universal and special human needs.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 345 with a C or better.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

IDSN 660 - Advanced Kitchen and Bath Design

Credits: 3

Functional and research basis for planning and arranging based on activity analysis, equipment, materials, lighting, and ventilation.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 345 and IDSN 435 with a C or better and admission to the interior design program.

Typically Offered
Spring

IDSN 760 - Historic Preservation and Restoration of Interiors

Credits: 3

Principles, guidelines, and qualities of preservation and restoration of interiors. Research and application.

Repeat for Credit
N

Requisites
Prerequisite: IDSN 320 and IDSN 360; or ENVD 250 and ENVD 251.

Typically Offered
Fall, Spring

IHS 110 - Introduction to Integrative Human Sciences

Credits: 1

This course will provide the foundation for students in the IHS major. The course will introduce students to the framework that guides the discipline and the curriculum.

Repeat for Credit
N

Typically Offered
Fall

IHS 200 - Topics in Integrative Human Sciences I

Credits: 0-3

Exploration of topics in human science/family and consumer sciences.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IHS 310 - Foundations of Integrative Human Sciences

Credits: 3

Examination of the Family & Consumer Sciences Body of Knowledge Framework and application to professional practice and ethical decision-making.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing or consent of instructor.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

IHS 399 - Integrative Human Sciences Applied Learning Orientation

Credits: 1

Provides support and guidance for students as they select an applied learning experience specific to their personal and professional goals.

Repeat for Credit
N

Requisites
Prerequisite: IHS 110 with a grade of C or better; IHS Majors only.

Typically Offered
Fall, Spring

IHS 400 - IHS Applied Learning Experience

Credits: 1-3

Learners will participate in applied learning experiences specific to their personal and professional goals. These experiences will be designed to meet the needs of the individual learner and provide an opportunity for application of skills and knowledge; reflection on professional practice and preparation for roles as future leaders and change agents.

Repeat for Credit
Y

Requisites
Prerequisites: IHS 110; IHS 399 with a grade of B or better; IHS majors only.

Typically Offered
Fall, Spring, Summer

IHS 410 - Integrative Human Sciences Seminar

Credits: 2

Application of career and professionals skills relevant to students majoring in Integrated Human Sciences. Specific focus on the application of the FCS Body of Knowledge to professional practice.

Repeat for Credit
N

Requisites
Prerequisite: IHS 310

Typically Offered
Fall-Odd Years

IHS 420 - Family and Consumer Science Methods for Secondary and Middle Schools

Credits: 3

Principles of teaching applied to family and consumer sciences instruction in the secondary and middle schools including: motivation, organization of subject matter, lesson/unit planning, assessment and reporting, organization and management of the classroom, and methodology and materials of the secondary and middle schools.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDSP 323, and EDCI 320. Corequisite: EDSEC 455, EDSEC 477, EDSEC 525 and IHS 425.

Typically Offered
Fall

IHS 425 - Family and Consumer Science Education Practicum

Credits: 2

This field-based experience provides the opportunity for students to plan, teach, and evaluate family and consumer science education lessons within a placement at the middle or secondary level. This practicum also allows students to incorporate instructional strategies and application of materials from the methods course.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDSP 323, and EDCI 320. Corequisite: EDSEC 455, EDSEC 477, EDSEC 525, and IHS 420.

Typically Offered
Fall

IHS 500 - Topics in Integrative Human Sciences II

Credits: 0-3

Advanced exploration of topics in human science/family and consumer sciences.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 015 - Engineering Assembly

Credits: 0

Assemblies are held once a month for practicing industrial engineers to make presentations to the students. Students are given an opportunity to interact with the visitors. The purpose is to provide an opportunity to learn about various companies and their products and operations.

Note
Required every semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

IMSE 050 - Industrial Plant Studies

Credits: 0

Trip to industrial centers for study of facilities of special interest to industrial engineering students.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing in industrial engineering.

Typically Offered
Spring

IMSE 201 - Introduction of Industrial Engineering

Credits: 3

Introduction to the core areas of industrial engineering including ergonomics, operations, research, quality control, management, engineering economics, resource management, production systems and inventory control. Both engineering ethics and careers in industrial

engineering will be discussed.

Note
Two hours lecture and two hours lab week.

Repeat for Credit
N

Requisites
Corequisite: MATH 220.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

IMSE 250 - Introduction to Manufacturing Processes and Systems

Credits: 2

This course provides an introduction to manufacturing processes and systems. The history and impact of manufacturing on society will be explored. A review of manufacturing processes and the products to which they are best suited will be emphasized. The impact of product design on manufacturability will be introduced. The role of engineers in designing good manufacturing processes and systems will be discussed.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: MATH 205 or MATH 220.

Typically Offered
Fall, Spring

IMSE 251 - Manufacturing Processes Laboratory

Credits: 1

General introduction to foundry, welding, and machining. Includes safe manufacturing practices, metrology, and hands-on experience in foundry, welding, and machining operations.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: IMSE 250.

Typically Offered
Fall, Spring

IMSE 252 - Welding Laboratory

Credits: 1

Introduction to welding. Includes safe welding practices and lab experiments in gas, spot, and arc welding.

Note
Three hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

IMSE 255 - Computer Numerical Control Laboratory

Credits: 1

Introduction to computer numerical control. Part programming for CNC lathes and mills will be accomplished.

Note
Three hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

IMSE 441 - Introduction to Analytics

Credits: 3

This course covers an introduction to analytics, which includes computer programming, statistics and mathematical decision making. Topics include: arrays,

loops, data structures, data visualization, hypothesis testing, confidence intervals, multidimensional linear regression, distribution fitting, and identifying objectives and constraints to recommend data driven solutions.

Repeat for Credit
N

Requisites
Prerequisite: At least 3 hours of STAT courses at the 300 level or above and at least 3 hours of CIS courses at the 200 level or above.

Typically Offered
Fall, Spring

IMSE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

IMSE 499 - Honors Research in Industrial Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. Open to students in the College of Engineering honors program. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

IMSE 501 - Industrial Management

Credits: 3

Basic functions in an industrial organization and their interrelationships; management considerations involving product, process, plant, and personnel.

Note
Three hours recitation a week.

Repeat for Credit
N

Typically Offered
On sufficient demand

IMSE 530 - Engineering Economic Analysis

Credits: 2

The analysis of the economic aspects of engineering/industrial projects. Focus on decision making among competing alternatives, including replacement decisions. It includes: cost estimating, time-value of money and effects of depreciation and taxation. Methods of comparing alternatives are developed, including: equivalent worth, rate of return, break even analysis, and benefit-cost ratio.

Note
This course period lasts the first ten weeks of a semester.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220.

Typically Offered
Fall, Spring

IMSE 532 - Industrial Project Evaluation

Credits: 1

The analysis and selection of engineering/industrial projects. This course is a continuation of IMSE 530. Topics in addition to IMSE 530 includes: risk/uncertainty, impact of inflation, capital rationing, multiple criteria decision making, and determining the MARR.

Note
This course must be taken concurrently with IMSE 530 in the same semester. This course period lasts the last five weeks of a semester.

Repeat for Credit
N

Typically Offered
Fall, Spring

IMSE 541 - Statistical Quality Control

Credits: 3

Normal, binomial, and frequency distributions. Seven process improvement tools. Control charts on means and variances for variables and attributes. Design of experiments for process and product design. Acceptance sampling plans.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 441 or STAT 511 or STAT 705

Typically Offered
Fall

IMSE 555 - Industrial Facilities Layout and Design

Credits: 3

Design of industrial facilities with emphasis on manufacturing engineering and material handling.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 251 and corequisite or prerequisite: IMSE 530.

Typically Offered
Spring

IMSE 560 - Introduction to Operations Research I

Credits: 3

A study of the methods of operations research including model formulation and optimization. Topics include: linear programming, sensitivity analysis, network flows, and graph optimization.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222 and MATH 551.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

IMSE 562 - Materials and the Impact of Manufacturing Processes

Credits: 3

The categorization and analysis of materials used in manufacturing is introduced. Emphasis is placed on the electronic and mechanical properties of materials along with the impact that manufacturing processes have on these properties. Through laboratory work, the students will learn how to design and conduct manufacturing experiments to measure material properties and explore the interplay between processes and properties. 3 credit hours, 2 hours lecture, 1 hour lab per week [2 lab sections]. Offered spring semesters every year.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214, CHE 354.

Typically Offered
Spring

IMSE 563 - Manufacturing Processes Engineering

Credits: 3

The effects of operating variables on manufacturing processes such as machining, metal forming, casting, welding, plastics, etc. Emphases are on manufacturing process theory, process variables measurement, and the

technical inferences of collected data. Strength of materials, manufacturing process theory, instrumentation, computer data acquisition, and data analysis concepts are included. Laboratory testing of manufacturing processes and the engineering design of experiments for process variable measurements are used to develop efficient manufacturing processes.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 251, CHE 355, and CE 530 or CE 333 and ME 512.

Typically Offered
Fall-Odd Years

IMSE 564 - Product and Process Engineering

Credits: 3

A study of the interrelationships between product design and production process selection. Emphasis is on the development of economic production systems for discrete products in a competitive manufacturing environment. Concepts of design for manufacture and assembly, tool engineering, and manufacturing systems design are included.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 250, IMSE 251, IMSE 530.

Typically Offered
Spring-Even Years

IMSE 580 - Manufacturing Systems Design and Analysis

Credits: 4

Comprehensive design and analysis of a manufacturing system: integration of the undergraduate industrial engineering and manufacturing engineering courses.

Note
Two hours recitation and four hours lab a week.

Repeat for Credit
N

Requisites
(Prerequisite or concurrent; IMSE 541, IMSE 555, IMSE 633, and IMSE 660) or (Prerequisite; ME 533)

Typically Offered
Fall

IMSE 591 - Senior Design Project I

Credits: 2

Students organize themselves in teams, not exceeding five students in each team. Each team is responsible to establish a client. The teams select a general subject agreeable to the client, formulate a specific design project, and gather data and resources needed to support the project.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: 24 credit hours of IMSE 500 level and above courses.

Typically Offered
Fall, Spring

IMSE 592 - Senior Design Project II

Credits: 2

Continuation of IMSE 591 in which student teams complete engineering design projects formulated and approved in IMSE 591.

Note
Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 591.

Typically Offered
Fall, Spring

IMSE 602 - Topics in Industrial Engineering

Credits: 1-18

Lectures on recent topics in industrial engineering.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 604 - Independent Study of Industrial Engineering

Credits: 1-18

This course involves independent study at the introductory graduate level.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 605 - Advanced Industrial Management

Credits: 3

Contemporary management philosophies and their impact on engineers and engineering managers. Topics include: planning, organizing, leading, and controlling.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 501 or MANGT 220.

Typically Offered
Fall

IMSE 610 - Occupational Safety Engineering

Credits: 3

An overview of factors affecting safety in organizations, emphasizing analysis techniques and design strategies. Topics include occupational safety, accidents, fire protection, industrial hygiene, hazardous waste, toxicology, radiation safety, product liability and federal standards. A project involving a hazard analysis and the design of a solution for a field location is required.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 251.

Typically Offered
Spring-Even Years

IMSE 623 - Industrial Ergonomics

Credits: 3

Process analysis and charting; principles of motion economy and ergonomics; work stations and environments; micromotion analysis and an introduction to standard data systems.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

IMSE 625 - Work Environments

Credits: 3

Basic structure and performance of the human, viewed as a component in information processing and control systems. Effect of visual, auditory, toxic, and thermal environments.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 251.

Typically Offered
Other

IMSE 633 - Production Planning and Inventory Control

Credits: 3

Principles, techniques, and applications of production planning and inventory control. The course covers strategic planning tools such as forecasting and aggregate planning as well as tactical tools such as inventory management and scheduling.

Note
Three hours recitation.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 250. Prerequisite or concurrent: IMSE 560.

Typically Offered
Spring

IMSE 641 - Quality Engineering

Credits: 3

An introduction to the modern practice of quality engineering concepts, systems, strategies, and tools to both manufacturing and service industries. Topics include advanced techniques related to statistical process control, international quality standards, quality data management, and automatic inspection.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 441 or STAT 511 or STAT 705

Typically Offered
Spring

IMSE 643 - Industrial Simulation

Credits: 3

Basic concepts of computer simulation modeling of manufacturing, production, service and other stochastic systems. Use of a commercial simulation software environment to build, analyze, verify and validate models. Use of models as a system design tool through statistical and optimization techniques.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: CIS 200 or CIS 209 or ME 400
Prerequisite or concurrent: IMSE 441 or STAT 511 or STAT 705, and IMSE 660

Typically Offered
Fall, Spring

IMSE 660 - Operations Research II

Credits: 3

Continuation of IMSE 560. Topics include: integer programming, nonlinear programming, Markov chains, and queuing theory.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 560 and STAT 510.

Typically Offered
Spring

IMSE 662 - Computer Aided Manufacturing

Credits: 3

Concepts in CAM, integrated control of machine tools and transport devices with production control. Concepts of CAM and automated assembly in small lot production environment.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 251 and CIS 209, or 200, or ME 400.

Typically Offered
Fall

IMSE 664 - Additive Manufacturing

Credits: 3

A study of current 3D printing or additive manufacturing technologies that convert a digital file into a physical object. Emphasis is on rapid prototyping involving materials, processes, techniques, and 3D printing machines. Capabilities and limitations of 3D printing technologies are included.

Note
Two hours lecture and two hours lab.

Repeat for Credit
N

Requisites
Prerequisite: ME 212.

Typically Offered
Spring-Odd Years

IMSE 666 - Operations Research III

Credits: 3

A continuation of IMSE 660. Covers more advanced aspects of LP and NLP. Introduces three new topics: normative theory of decision and games, dynamic programming and Markov decision systems.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 660. Prerequisite or concurrent: IMSE 530.

Typically Offered
Spring

IMSE 680 - Quantitative Problem Solving Techniques

Credits: 3

Survey of decision making techniques. Topics covered include: linear, integer and nonlinear programming; network flows and stochastic processes. A focus of the course will include modeling and the use of software to solve these problems.

Note
Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 205.

Typically Offered
Summer

IMSE 685 - Principles of Manufacturing Information Systems

Credits: 3

Introduction to the theory and concepts of information for manufacturing. Design of manufacturing systems such as MRP, SFRS, CAD/CAM, etc. Concerns of integration and man-machine interface in manufacturing systems.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE computer programming elective from approved Departmental list.

Prerequisite or concurrent: IMSE 633.

Typically Offered
Spring

IMSE 710 - Transportation Logistics

Credits: 3

This course provides comprehensive coverage of logistics system design, analysis, and management, with a particular emphasis on freight transportation and supply chain systems. It introduces key challenges arising in supply chain systems, quantitative models for addressing these challenges, and methods for solving the models. Emphasis is placed on analyzing model results and communicating their implications for decision-making.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 660, IMSE 680 or IMSE 780.

Typically Offered
Spring-Odd Years

IMSE 730 - Data Engineering I – Time Series & Topological Data Analysis

Credits: 3

Introduction to theories and concepts of data analytic and machine learning on time series and topological data. Data models and analysis systems include forecasting, predictive models, process change point detections, classification, clustering, stage-dependent decisions applying to high-dimensional time series data and topological data. Applications include data integration and data-to-decisions in real-world systems, such as supply chain, logistics, financial engineering, and advanced manufacturing processes.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 441 (or (CIS 209 and STAT 511)), MATH 222, and MATH 551

Typically Offered
Spring

IMSE 751 - Normative Theory of Decisions and Games

Credits: 3

Bayes theorem, Bayesian estimators, utility, loss function and risk, minimax strategies, elementary game theory.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510.

Typically Offered
Fall-Odd Years

IMSE 752 - Multiple Criteria Decision Analysis

Credits: 3

This course covers decision processes for problems involving multiple conflicting criteria, including individual and group decision making. Multiple approaches, including value function methods, goal/aspiration methods, and outranking methods, are considered.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 560

Typically Offered
Fall-Even Years

IMSE 760 - Stochastic Calculus Financial Engineering

Credits: 3

This course will serve as an introduction to the basic concepts and computing techniques of financial engineering and its real-life applications. These basics can be applied in many other aspects of Industrial Engineering used throughout stochastic processes, probability theory, system simulation, portfolio/risk management, and supply chain optimization.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 530; IMSE 660; and CIS 209, or CIS 200, or ME 400.

Typically Offered
Spring-Odd Years

IMSE 780 - Methods of Operations Research

Credits: 3

This course is intended to give an overview of OR at the graduate level. After this course, the student will have the general basic knowledge in OR and a better idea about the usefulness and interrelationships of the various subjects in O.R. Topics to be covered include the various optimization techniques, stochastic processes and optimization, and the various approaches in the treatment of uncertainty.

Note
Three hours recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 560 and STAT 510.

Typically Offered
Fall

IMSE 785 - Big Data Analytics

Credits: 3

Topics include big data management, data architecture of hosting big data, big data retrieval languages, parallel computing methods, big data analytical methods, and data visualization.

Repeat for Credit
N

Requisites
Prerequisite: CIS 209; STAT 510 or STAT 250.

Typically Offered
Summer

IMSE 802 - Advanced Topics in Industrial Engineering

Credits: 1-18

Lectures on recent advanced topics in industrial engineering.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 804 - Advanced Independent Study in Industrial Engineering

Credits: 1-18

This course involves independent study of recent advanced topics in industrial engineering.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 805 - Management of Research and Engineering

Credits: 3

Engineering administration; organization factors in decision-making.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 501 or MANGT 220

Typically Offered
On sufficient demand

IMSE 806 - Engineering Project Management

Credits: 3

Planning, scheduling, and controlling engineering projects. Includes determination of appropriate project team, cost/benefit analysis, PERT and CPM scheduling

techniques, reporting, and use of computerized project management tools.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 530 and IMSE 501 or MANGT 220.

Typically Offered
Spring

IMSE 808 - Systems Engineering Fundamentals

Credits: 3

Systems engineering is an interdisciplinary engineering management process used to develop an integrated, life-cycle balanced set of system solutions that satisfy customer needs. This course provides the fundamentals of a systems engineering approach to solving complex engineering systems problems. This course will address systems engineering processes and tools as they relate to the development and life cycle management of complex systems. Topics included in the course are analyzing customer's needs, requirements development, systems design, development and integration, developing technical performance measures, system verification and managing cost, schedule, and risk in engineering tasks. This course will also introduce reliability, availability and maintainability concepts and their applicability with complex systems. This course is applicable to all engineering disciplines involved with complex engineering systems.

Repeat for Credit
N

Requisites
Prerequisite: 9 graduate credits from any engineering discipline, B.S. Engineering or Computer Science degree.

Typically Offered
On sufficient demand

IMSE 810 - Industrial Logistics Engineering

Credits: 3

The course provides comprehensive coverage of supply chain logistics components and system issues, including control of the movement of goods and information, coordination of supply and demand in creation and maximization of time and place utility. Emphasis is given to integrating workflow modeling, control, and design concepts and performance evaluation of logistic activities such as transportation, inventory, warehousing, and information technology. The systems viewpoint is explored at the individual firm level and from the perspective of inter-firm relationships among participants in logistics supply chains. Recognition is also given to important interrelationships between logistics and production, marketing, and financial management.

Note
Three hours recitation per week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 660, IMSE 680 or IMSE 780.

Typically Offered
On sufficient demand

IMSE 811 - Advanced Production and Inventory Control

Credits: 3

Analytical and mathematical methods of making decisions on production, inventories, human resources, and shipping in modern industrial plants.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 633.

Typically Offered
Spring

IMSE 822 - Advanced Engineering Economy

Credits: 3

This course expands on the principles of the fundamental

engineering economics analysis. Emphasis is placed on quantification and evaluation of risk and uncertainty factors, effects of inflation and taxes, economic consequences of estimating models, utility theory, engineering capital equipment replacement analysis and decision-tree and multi-attribute decision models.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 530, or ME 560, or CE 680.

Typically Offered
Fall-Odd Years

IMSE 825 - Tribology in Manufacturing

Credits: 3

An introduction to system approach to Tribology; Surface Topography; Physical, Chemical, and Geometric Nature of Surfaces; and the Mechanics of contact between surfaces. This course also investigates various theories of friction and wear; hydrodynamic; elastohydrodynamic, and boundary lubrication; frictional instabilities; rolling contact problems; and application of system methodology to tribological problems in engineering design and manufacturing.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 214 and IMSE 563.

Typically Offered
On sufficient demand

IMSE 830 - Applied Fuzzy Set Theory

Credits: 3

The emphasis will be on applicational aspects. Topics covered are elementary fuzzy set theory, fuzzy measure, possibility theory, fuzzy linear programming and other fuzzy optimization techniques, fuzzy linguistics and expert systems, fuzzy production and inventory control, and fuzzy operations research models.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 510.

Typically Offered
On sufficient demand

IMSE 841 - Advanced Topics in Quality Engineering

Credits: 3

A survey of current advances in quality engineering. Includes both off-line and on-line quality engineering.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 704, STAT 705; IMSE 641 and CIS 209, or CIS 200, or ME 400.

Typically Offered
Fall-Even Years

IMSE 842 - Reliability Theory

Credits: 3

The mathematics of reliability theory. The hazard function. Calculation of failure density and mean life for series, parallel systems, and various types of standby systems. Hypotheses tests on mean life. Life testing with censoring.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 511.

Typically Offered
On sufficient demand

IMSE 850 - Ergonomics (Human Factors) Engineering

Credits: 3

The design and analysis of applied experimental research on human behavior as applied to engineering systems. An experimental project.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 703.

Typically Offered
On sufficient demand

IMSE 865 - Simulation of Industrial Management Systems

Credits: 3

Simulating industrial management systems on computers utilizing Monte Carlo techniques and simulation languages. Numerical methods related to simulation.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 643.

Typically Offered
Summer-Odd Years

IMSE 866 - Applied Stochastic Processes

Credits: 3

Survey of stochastic processes. Topics covered include: discrete and continuous Markov chains, random walks, queuing theory and renewal theory.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510.

Typically Offered
Fall-Even Years

IMSE 867 - Stochastic Programming

Credits: 3

Stochastic programming (SP) aims to determine optimal solutions in the presence of data uncertainty. The course covers two-stage stochastic linear programming, recourse, chance constraint optimization, multi-stage SP, stochastic integer programming, Benders decomposition, L-shaped method, heuristics, simulation-based (Monte Carlo simulation) methods, and bounds on optimal solutions. Numerous applications exist, and examples may be taken from agriculture planning, manufacturing, supply chain, reliability, cyber security, power grids or other systems.

Repeat for Credit
N

Requisites
IMSE 560 and STAT 510 or equivalent

Typically Offered
Fall-Odd Years

IMSE 868 - Manufacturing Processes for Semiconductor Materials and Devices

Credits: 3

Research topics on manufacturing processes for semiconductor materials and devices. Processes covered include; crystal growing, slicing, edge profiling, lapping, wafer grinding, wet etching, polishing, cleaning, oxidation, lithography, dry etching, diffusion, metallization, CMP (Chemical-Mechanical Planarization), backside thinning, dicing, bonding, packaging, final testing.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites

Prerequisite: IMSE 250 and IMSE 563.

Typically Offered
Fall-Even Years

IMSE 871 - Advanced Topics in Computer Integrated Manufacturing

Credits: 3

Modern issues of computerized manufacturing considering both hardware and software approaches and methods. Advanced concepts in intelligent machine programming and applications, group technology, computer aided process planning, and scheduling will be discussed. Research issues will be presented.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 633, IMSE 662 or equivalents.

Typically Offered
On sufficient demand

IMSE 872 - Industrial Forecasting Techniques and Applications

Credits: 3

The problems of model construction for industrial forecasting. The application of least squares, regression, exponential smoothing, and adaptive fitting will be studied in solving industrial engineering problems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 511 or STAT 705.

Typically Offered
On sufficient demand

IMSE 873 - Industrial Systems Analysis

Credits: 1-18

Analysis and synthesis of automatic control systems with application to machines and processes and industrial management systems. A study of optimal control, stability, and sensibility of industrial management systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor and IMSE 660.

Typically Offered
On sufficient demand

IMSE 881 - Linear Programming

Credits: 3

Development of the theory of linear programming and related topics including simplex methods, duality theory, integer programming, transportation methods, and stochastic linear programming. Application to industrial problems and the use of computer solutions are emphasized.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 560.

Typically Offered
Fall-Even Years

IMSE 882 - Network Flows and Graph Theory

Credits: 3

Survey of topics from Network Flows and Graph Theory with an emphasis on algorithmic analysis. The topics covered include: Complexity Analysis, Shortest Paths, Maximum Flows, Network Simplex, Minimum Spanning Trees, Matching, Planar Graphs, Colorings, Perfect Graphs and Heuristics.

Note
Three hours lecture a week.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

IMSE 884 - Integer Programming and Combinatorial Optimization

Credits: 3

Solution techniques to optimization problems invloving integer variables. The topics covered include: single-and multiple-branching, implicit enumeration, polyhedral theory and cutting planes, mixed integer programs, unimodular matrices and matroids.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 660.

Typically Offered
Spring-Odd Years

IMSE 885 - Advanced Manufacturing Information Systems

Credits: 3

Survey of topics in Computer Integrated Manufacturing. Issues such as the Manufacturing Automation Protocol (MAP), representation of solids in CAD, storage and retrieval of such information are considered.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: IMSE 685 or equivalent.

Typically Offered
On sufficient demand

IMSE 888 - Research Methods in Industrial Engineering

Credits: 3

This course will provide students with effective methods to perform literature reviews, survey current solution methodologies, develop and evaluate research and present research results.

Repeat for Credit
Y

Requisites
Prerequisite or concurrent enrollment: IMSE 780 or IMSE 641 or IMSE 811.

Typically Offered
On sufficient demand

IMSE 889 - Applied Methods in Industrial Engineering

Credits: 1

This class requires students to have at least 6 weeks of full-time work experience in a job related to Industrial Engineering.

Note
This course can be taken only once by a graduate student. Approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Summer

IMSE 890 - Applied Methods in Industrial Engineering II

Credits: 2

This class requires students to have at least 12 weeks of full-time work experience in a job related to Industrial Engineering.

Note
This course can be taken only once by a graduate student. Approval of major professor and department head.

Repeat for Credit

Y

Typically Offered
Fall, Spring, Summer

IMSE 892 - Graduate Seminar in Industrial Engineering

Credits: 0

Presentation and discussion of topics of contemporary interest in industrial or manufacturing engineering. M.S. and Ph.D. candidates make one presentation.

Note
One one-hour seminar meeting a week.

Repeat for Credit
Y

Typically Offered
Fall, Spring

IMSE 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

IMSE 971 - Industrial Queuing Processes

Credits: 3

Introduction to the queuing process and theory of queues; analysis of single and multistation queues; application to production, materials handling, inventory and maintenance systems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 510.

Typically Offered
On sufficient demand

IMSE 976 - Scheduling Theory

Credits: 3

Project scheduling, assembly line balancing, shop scheduling, basic structure, measures of performance, combinatorial and statistical aspects. Various approaches to the analysis of shop scheduling.

Note
Three hours recitation a week. Consent of instructor.

Repeat for Credit
N

Typically Offered
On sufficient demand

IMSE 980 - Advanced Topics in Manufacturing Research

Credits: 1-3

Study of topics related to recent advances in manufacturing processes and manufacturing engineering. Selected topics vary by semester according to the interests and needs of students and faculty.

Repeat for Credit
Y

Typically Offered
On sufficient demand

IMSE 982 - Nonlinear Programming

Credits: 3

Study of nonlinear models and their solution. Topics covered are nonlinear programming including Kuhn-Tucker theory, quadratic programming, separable programming, geometric programming, gradient and search methods, quasilinearization, and invariant imbedding.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 510.

Typically Offered
Spring-Even Years

IMSE 990 - Advanced Topics in Operations Research

Credits: 1-6

Study of topics related to operations research not covered in other courses. Selected according to the interests and needs of graduate students.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
On sufficient demand

IMSE 991 - Advanced Topics in Decision Theory

Credits: 3

Decision processes for problems involving multiple conflicting criteria; multiple attribute decision making; multiple objective decision making, and group decision making under multiple criteria. Various methods/approaches for different problems are discussed.

Note
We are concurrently introducing IMSE 752 so that the undergraduate student can take it. This 991 course will be for graduate students only.

Repeat for Credit
N

Requisites
Prerequisite: IMSE 751 or IMSE 752.

Typically Offered
On sufficient demand

IMSE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

INDD 292 - Design Thinking

Credits: 3

Design Thinking is the process of analyzing the problem areas from a given project statement and generating a solution through observation, research, conceptualization, and iteration. Through this course, students will learn how to apply user-centered design approaches to a given design challenge. This course will cover selected design thinking tools and methods in four phases: 1) Explore, 2) Discover, 3) Develop, and 4) Deliver. Several case studies will demonstrate how Design Thinking can be applied to other fields, and students will share their reflections and experiences about how they can make use of the process, methods, and tools they have learned in their respective fields.

Repeat for Credit
N

Typically Offered
Summer

K-State Core
6 Arts and Humanities

INDD 307 - INDD Design Studio I

Credits: 5

Introduction to design research, user behavior, ergonomics, and human factors in the context of product design. Projects focus on iterative ideation and development through ink and marker sketching and physical model making. Students will learn to document and present designs including physical models, detailed renderings, and documentation of their design development process.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the professional program in industrial design.

Typically Offered
Fall

INDD 310 - INDD Digital Applications

Credits: 2

Provides an advanced understanding of digital lighting, materials, animation, advanced modeling techniques, and renders. Explores parametric design uses and applications. Investigates strategies and techniques to create products using digital tools.

Repeat for Credit
N

Requisites
Prerequisite: IAID 431.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

INDD 320 - INDD Design Studio II

Credits: 5

Basic principles of Product Design process through research, ideation, sketching, modeling, prototyping and presentation. Explores and analyzes complex social, cultural, and economical aspects of society for product design development.

Repeat for Credit
N

Requisites
Prerequisite: INDD 307.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

INDD 325 - Human Factors in Industrial Design

Credits: 3

Deals with an interdisciplinary science focusing on the interaction of human performance, capabilities, limitations and behavior with design factors in performance environments like workplaces and products with the emphasis on optimal safety, efficiency, productivity and comfort for diverse human populations.

Repeat for Credit
N

Requisites
Prerequisite: INDD 307

Typically Offered
Fall

INDD 350 - Product Semantics

Credits: 3

Explores visual and symbolic qualities of the man-made forms in the context of their use and application of this knowledge in order to understand the aspects of communication in Industrial Design. Course also focuses on the cognitive and social context of the products.

Repeat for Credit
N

Typically Offered
Spring

INDD 433 - User Interface and User Experience Design

Credits: 3

In-depth study of the development, strategy, and execution of interactive products and services to create meaningful experiences that enhance user engagement and satisfaction within the scope of industrial design. Applies user-centered design by conducting user research including surveys, interviews, and usability testing. Students will create prototypes with high fidelity mockups using industry standard tools.

Repeat for Credit
N

Requisites
Prerequisite: INDD 435 and INDD 310

Typically Offered
Spring

INDD 435 - INDD Design Studio III

Credits: 5

Advanced principles of the Industrial Design process. Explores different theories and techniques to develop products utilizing Human Centered Design, Design Thinking, and Universal Design. Holistic thinking in regard to ethical responsibility throughout the product's Life Cycle from decisions made in manufacturing processes, material choices and human factor design.

Repeat for Credit
N

Requisites
Prerequisite: INDD 320.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

INDD 440 - INDD Design Studio IV

Credits: 5

Exposes students to a deeper understanding about user experience, user interface and form development in the Industrial Design process. Provides an advance research and analysis of design problems and opportunities, using Human Centered Design, Universal Design and Design Thinking.

Repeat for Credit
N

Requisites
Prerequisite: INDD 435.

Typically Offered
Spring

INDD 500 - Materials and Manufacturing Processes

Credits: 3

Seeks to provide an advanced understanding of materials and processes commonly used by Industrial Designers and manufacturers. The objective is to develop a more precise, professional and accurate approach to design while broadening the student's technical base.

Repeat for Credit
N

Typically Offered
Spring

INDD 520 - Materials and Manufacturing Processes II

Credits: 3

Building upon the knowledge established in INDD 500, this course deepens comprehension of materials and processes. Emphasizing practical applications to a design development and expand student's technical proficiency.

Repeat for Credit
N

Requisites
Prerequisite: INDD 500

Typically Offered
Fall

INDD 600 - Professional Practice

Credits: 3

Studies of conventional and newly developing modes of

professional design practice. Presented are the relationships of Industrial Designers to users, clients, manufacturing industry, society, government, and one another. Provides an overview of design services and principal structures for industrial designers including consultancy, in-house, freelance, and self-production.

Repeat for Credit
N

Requisites
Prerequisite: INDD 435

Typically Offered
Spring

INDD 605 - Problems in INDD

Credits: 1-18

Study of specific Industrial Design problems under the direct supervision of a member of the department.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

INDD 606 - INDD Design Studio V

Credits: 5

This semester of study provides an option for an interdisciplinary collaborative studio course oriented towards replicating the learning experience and interactive activities that takes place in the modern multidisciplinary professional office or a validated equivalent studio completed in an approved study program.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

INDD 644 - Internship

Credits: 9

Fifteen-week internship in a professional environment with a focus on Industrial Design and/or Furniture Design: office and field experience.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440. Corequisite: INDD 645

Typically Offered
Fall, Spring, Summer

INDD 645 - Internship Report

Credits: 5

Development of the student's analysis; observation, and communication skills in relationship to the professional office and field environment. Detailed documentation, online and on-campus, of the experiences encountered during internship, allowing classmates to learn from their peer's varied experiences as well as provide detailed documentation of the student's work during internship.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440. Corequisite: INDD 644

Typically Offered
Fall, Spring, Summer

INDD 664 - Summer Internship

Credits: 6

Ten-week internship in a professional environment with a focus on Industrial Design and/or Furniture Design: office and field experience.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440. Corequisite: INDD 665

Typically Offered
Summer

INDD 665 - Summer Internship Report

Credits: 1

Development of the student's analysis; observation, and communication skills in relationship to the professional office and field environment. Detailed documentation, online and on-campus, of the experiences encountered during internship, allowing classmates to learn from their peer's varied experiences as well as provide a detailed documentation of the student's work during internship.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440. Corequisite: INDD 664

Typically Offered
Fall, Spring, Summer

INDD 755 - Professional Practice: Discipline-Specific Topics

Credits: 1

Covers discipline-specific concerns, focusing on issues specific to architecture, interior architecture and product design, landscape architecture or regional and community planning.

Repeat for Credit
N

Typically Offered
Fall, Spring

INDD 800 - Professional Practice

Credits: 3

Studies of conventional and newly developing modes of professional design practice. Presented are the relationships of Industrial Designers to users, clients, manufacturing industry, society, government, and one another. Provides an overview of design services and principal structures for industrial designers including consultancy, in-house, freelance, and self-production.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing.

Typically Offered
Spring

INDD 801 - INDD Design Studio VI

Credits: 5

Examines the interdisciplinary and collaborative design process with the aim of different formations in accordance with entrepreneurship studies, marketing, business, and engineering, as well as research and development. Focus areas vary from interdisciplinary practices to innovative technologies.

Repeat for Credit
N

Typically Offered
Spring

INDD 810 - INDD Capstone Studio

Credits: 5-6

Students are to pursue design projects that encompass their previous educational experience validating their knowledge of the INDD program studies. The project will be based on extensive research and review. The project presentation will suggest unique and applicable solutions with clearly identified methodology of implementation.

Repeat for Credit
N

Requisites
Prerequisite: INDD 801, INDD 811.

Typically Offered
Fall, Spring, Summer

INDD 811 - Design Research

Credits: 3

Identify evaluation criteria appropriate for design research and problem-solving; analysis of literature; construction of problem statements, development and documentation of design problem proposals and reports.

Repeat for Credit
N

Requisites
Prerequisite: INDD 440.

Typically Offered
Fall, Spring, Summer

INDD 815 - Advanced Studio Programming

Credits: 2-3

Research of programming methodologies culminating in a programmatic document used as the basis for the design project in INDD 822 or IAID 824.

Repeat for Credit
N

Requisites
Prerequisite: INDD 801.

Typically Offered
Fall, Spring, Summer

INDD 822 - Advanced Industrial Design Studio

Credits: 6

Students explore projects programmed under the previous semester INDD 815: Advanced Studio Programming. Projects must be relevant in a contemporary socio-cultural, architectural and technological context; employ rigorous design research processes and methodologies; identify user and usability needs/desires; accommodate market opportunities and constraints; explore multiple conceptual solutions in a variety of hand and digital media; build and document models and prototypes; and estimate material and manufacturing costs.

Note

A book, oral and visual presentation and display materials for an exhibition of the student's work will be required at the completion of the course.

Repeat for Credit
N

Requisites
Prerequisite: INDD 810, INDD 815.

Typically Offered
Fall, Spring, Summer

ITAL 101 - Italian I

Credits: 4

Introduction to the structure of modern Italian.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ITAL 102 - Italian II

Credits: 4

Continuation and completion of the study of modern Italian grammar, using the facilities of the language laboratory for audiolingual practice.

Repeat for Credit
N

Requisites
Prerequisite: ITAL 101 or equivalent.

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ITAL 105 - Italian for Travelers

Credits: 1-8

Prepares students for everyday situations on a visit to Italy.

Repeat for Credit

N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

ITAL 300 - Italian III

Credits: 4

Grammar review and reading selections from Italian literature.

Repeat for Credit
N

Requisites
Prerequisite: ITAL 102 or equivalent.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ITAL 301 - Italian IV

Credits: 4

Selective review of grammar and reading of examples of modern Italian literature.

Repeat for Credit
N

Requisites
Prerequisite: ITAL 300.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

ITAL 520 - Special Studies in Italian

Credits: 1-18

Special Studies in Italian

Note
Consent of department head and instructor involved.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation

JAPAN 101 - Japanese I

Credits: 4

Introduction to the fundamental linguistics and cultural characteristics of the Japanese language and its writing systems (Hiragana, Katakana, and Kanji).

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 200 - Japanese II

Credits: 4

Continuation of Japanese I. Development of functional skills for familiar situations.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 101 or equivalent.

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 201 - Japanese III

Credits: 4

Continuation of Japanese II with emphasis on building and applying basic language knowledge in communicative tasks; exercises in oral interactions and interactions involving text; weekly language lab; approx. 1-- new kanji in text.

Note
Not open to native speakers of Japanese.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 200 or equivalent.

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 299 - Special Studies in Japanese

Credits: 1-8

Special Studies in Japanese

Repeat for Credit
Y

Requisites
Prerequisite: Permission of the instructor.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 301 - Japanese IV

Credits: 4

Continuation of Japanese III. Enhancement of speaking and writing skills, and reading and listening comprehension.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 201 or equivalent.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 391 - Culture of Japanese Communication

Credits: 3

Introduction to verbal and nonverbal cultural aspects of Japanese discourse. Includes comparative study, followed by discussion on application of knowledge in cross-cultural context.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 191.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 501 - Japanese V

Credits: 3

Development of communication skills through application

activities such as problem-solving tasks and role plays. Enhancement of vocabulary, structures, and their usage. Emphasis on extended discourse.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 301 or equivalent.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 502 - Japanese VI

Credits: 3

Continuation of Japanese V. Development of functional skills for general situations.

Repeat for Credit
N

Requisites
Prerequisite: JAPAN 501 or equivalent.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

JAPAN 599 - Special Studies in Japanese

Credits: 0-18

Special Studies in Japanese

Note
Consent of department head and instructor.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation

KIN 100 - Adaptive Physical Activities

Credits: 1

Exercise programs adapted to the needs of the special student.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 101 - Topics in Strength and Conditioning

Credits: 1

Discussion of topics and participation in activities of importance in strength and conditioning.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 102 - Topics in Aerobic Exercise

Credits: 1

Discussion of topics and participation in activities of importance in aerobic exercise.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 104 - Swimming I

Credits: 1

Beginning instruction for students who have no previous experience with swimming.

Repeat for Credit
N

Typically Offered
Fall, Spring

KIN 105 - Swimming II

Credits: 1

For the beginning swimmer who has had some previous swimming experience.

Repeat for Credit
N

Typically Offered
Other

KIN 106 - Swimming III

Credits: 1

Swimming III

Note
For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
N

Requisites
Prerequisite: KIN 105 or consent of instructor.

Typically Offered
Other

KIN 107 - Fitness Swimming

Credits: 1

Fitness Swimming

Note
For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
N

Requisites
Prerequisite: KIN 106 or consent of instructor.

Typically Offered
Other

KIN 108 - Strength and Conditioning Specialist

Credits: 2

Course prepares students for completion of exam required for Certified Strength and Conditioning Specialist (CSCS) credential from the National Strength and Conditioning Association.

Note
Online lecture/lab.

Repeat for Credit
N

Requisites
Prerequisite: KIN 220, KIN 335, Junior standing and above.

Typically Offered
Summer

KIN 109 - Professional Development for Coaches

Credits: 2

Principles of improving relationships, enhancing engagement and gaining trust of athletes through targeted communication.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 111 - Adaptive Training

Credits: 2

Course covers techniques related to functional fitness classes for Adaptive Athletes including veterans, active duty personnel, and civilians alike.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 112 - Electrocardiography Technician Certification Preparation

Credits: 2

Course presents an introductory overview related to the anatomy and physiology of the heart and explores normal electrical conduction as well as common variations as evidenced by changes in the waveform on the cardiac monitoring device. Focus on the student's ability to perform cardiac monitoring via 3, 5 and 12 lead monitoring devices and prepare students certification as an electrocardiography technician through the National Healthcareer Association.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 114 - Phlebotomy Certification Preparation

Credits: 2

This course is designed to present students with an introduction to phlebotomy & infection control, legal issues, human anatomy & physiology, phlebotomy equipment & supplies, phlebotomy procedures, and phlebotomy fundamental essentials. Allows for preparation for the Certified Phlebotomy Technician certification exam offered by the National Healthcareer Association.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 160 - Aerobic Dancing and Exercise

Credits: 1

Aerobic Dancing and Exercise

Note
For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
N

Typically Offered
Other

KIN 161 - Fitness and Conditioning

Credits: 1

Fitness and Conditioning

Note
For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
Y

Typically Offered
Other

KIN 162 - Jogging

Credits: 1

Jogging

Note
For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
N

Typically Offered
Other

KIN 163 - Weight Training

Credits: 1

For students in the College of Health and Human Sciences, no more than 4 credit hours in lifetime sports and exercise activity classes may be applied toward a degree.

Repeat for Credit
Y

Typically Offered
Other

KIN 220 - Biobehavioral Bases of Physical Activity

Credits: 4

Current perspectives from the biological and behavioral domains of kinesiology will be used to explore the significance of physical activity for optimal health. Topics include physiology of physical activity, social and behavioral epidemiology of physical activity and health, control and biomechanics of human movement.

Note
Three hours of lecture and two hours of lab experiences.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Human Diversity within the U.S.
Natural and Physical Sciences

KIN 230 - Introduction to Public Health

Credits: 3

An introductory survey course designed to provide a history of public health, an overview of the five core disciplines (epidemiology, biostatistics, environmental health, social and behavioral health, and health policy and management), and information about career options in public health. Investigation and analysis of contemporary issues in public health such as bioterrorism, threats to the nation's food supply, the importance of health promoting behaviors in the prevention of disease, distribution of infectious diseases on a global population, and the role of public health in disaster preparedness and management.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
FNDH 110

K-State 8
Global Issues and Perspectives
Social Sciences

KIN 310 - Measurement and Research Techniques in Kinesiology

Credits: 4

Theory and techniques of measurement and research in the biological and behavioral aspects of kinesiology.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

KIN 312 - Methods and Analysis of Public Health

Credits: 3

Introductory course on conducting and critiquing research in public health through fundamental principles of public health research methodologies. Skills developed include understanding ethical approaches to research and working with humans, and critically appraising data from scientific studies, understand materials and issues associated with the logic of the scientific method, research design, and qualitative and quantitative analysis.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

KIN 318 - Rural Community Health

Credits: 3

Study of social, economic, political, and cultural influences that impact the health of individuals and families in rural communities with special focus on Kansas and the Midwest. Focuses on theories and concepts relevant to rural community health and their utility in designing rural public health interventions.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230.

Typically Offered
Fall, Spring

KIN 320 - Motor Learning and Development

Credits: 3

Issues of motor learning and development as they relate to the application of instructional techniques.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

KIN 330 - Biomechanics

Credits: 3

Mechanical and anatomical aspects of human movement. Kinematic and kinetic principles applied to the analysis of human movement.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: C or better in KIN 220; and a C or better in either KIN 360, or BIOL 441 and BIOL 442, or 8 hours of Anatomy and Physiology transfer credit.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

KIN 335 - Physiology of Exercise

Credits: 4

The responses of the human body to exercise. Emphasis will be placed on understanding the structure-function relationships of the respiratory, cardiovascular, and muscular systems and how their function is integrated to support the dynamics of muscular contraction. Limitations to exercise performance will be examined in health and disease and the adaptability of the human body to physiological (i.e., exercise training) and environmental (e.g., hypoxia) stressors will be examined.

Note
Four hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: C or better in either KIN 360, or BIOL 441 and BIOL 442, or 8 hours of Anatomy and Physiology transfer credit.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

KIN 336 - Physiology of Exercise Lab

Credits: 1

A laboratory course to supplement the material of KIN 335.

Note
Two hours lab per week.

Repeat for Credit
N

Requisites
Prerequisite: KIN 335 or concurrent enrollment.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

KIN 345 - Exercise Behavioral Science

Credits: 5

Examination of the social and behavioral determinants of physical activity using a social ecological framework. Social ecological levels include individual, interpersonal, community, institutional and societal/policy factors.

Repeat for Credit
N

Requisites
Prerequisite: KIN 220, PSYCH 110; SOCIO 211 with a grade of C or better.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

KIN 346 - Laboratory Experience for Social and Behavioral Epidemiology of Public Health Physical Activity

Credits: 1

A laboratory experience for KIN 345.

Note
Two hours of contact time per week.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent enrollment in KIN 345.

Typically Offered
Other

K-State 8
Social Sciences

KIN 360 - Anatomy and Physiology

Credits: 8

Anatomy and Physiology of the organ systems of the human body. Laboratory includes physiology experiments, study of anatomy from computer simulation, dissection demonstrations, X-rays, and slide work.

Note
Five hours lecture and two three-hour lab sessions a week.

Repeat for Credit
N

Requisites
Prerequisite: C or better in either BIOL 198 or transferred introductory Biology credit.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

KIN 361 - Anatomy and Physiology I

Credits: 4

Rigorous, comprehensive study of human anatomy and physiology at the cellular, tissue, and organ systems level with an emphasis on the structure/function relationships of the integumentary, skeletal, muscular, and nervous systems.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 or equivalent with a grade of C or better.

Typically Offered
Fall, Spring, Summer

KIN 362 - Anatomy and Physiology II

Credits: 4

Rigorous, comprehensive study of human anatomy and physiology at the cellular, tissue, and organ systems level

with an emphasis on the structure/function relationships of the endocrine, cardiovascular, lymphatic, respiratory, digestive, urinary, and reproductive systems.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 or equivalent with grade of C or better and KIN 361.

Typically Offered
Fall, Spring, Summer

KIN 380 - Principles of Exercise Training

Credits: 3

This course is designed to cover the application of current scientific research on program design for healthy athletes competing in any sport or physically active individuals. Contributing science include anatomy, biochemistry, biomechanics, endocrinology, nutrition, exercise physiology and psychology. Emphasis will be placed on adaptations to resistance training, plyometric training, speed/agility/speed endurance training and aerobic endurance training. Exercise Techniques, Testing and Evaluation and Program Design will also be major components of the course. Students should be prepared for strenuous physical activity.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 381 - Exercise and Chronic Disease

Credits: 3

Focus on the epidemic of chronic disease impacting society and the benefits/use of exercise as a therapy for selected diseases.

Repeat for Credit
N

Requisites
Prerequisite: KIN 335 with a grade of C or better.

Typically Offered
Fall, Spring, Summer

KIN 382 - Strength and Conditioning for Performance

Credits: 3

Examine relationship of imposed physical demands (stress) on physiological adaptation. Both the mechanisms of adaptation and the methods used to impose desired adaptations will be investigated. Focus on performance outcomes including strength training, power training (RFD), speed training, and endurance training.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 383 - Exercise and Older Adults

Credits: 3

Examines the relationship between exercise and the aging process. Specific focus will be on the impacts of aging on the organ systems of the human body, the extent to which exercise may beneficially impact this process, and methodology for assessment of fitness and prescription of exercise in the older adult population

Repeat for Credit
N

Requisites
Prerequisite: KIN 220 with a C or better.

Typically Offered
Fall, Spring, Summer

KIN 384 - Certifications in Health and Fitness

Credits: 3

Examine careers and certifications available within the field of Kinesiology/Applied Fitness.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 385 - Fundamentals of Health and Fitness

Credits: 3

Examine human behavior and exercise as the forefront of discussions about health. Examine relationship between health behavior, exercise, inactivity, and fitness adaptations.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 386 - Pediatric Physical Activity, Exercise & Sport

Credits: 3

Introduction to physiological and behavioral exercise considerations for a holistic approach to increasing activity levels effectively and safely in the pediatric population. Prepares students planning to work with healthy to obese 3-17 year olds in physical activity, exercise, and sport to encourage lifelong physical activity adherence and obesity reduction.

Repeat for Credit
N

Requisites
Prerequisite: KIN 220

Typically Offered
Summer

KIN 387 - Introduction to Integrative Human Pathophysiology

Credits: 3

Focus on the main mechanisms that lead to organ and system dysfunction. The basic processes covered will highlight some common diseases, rather than covering an exhaustive list of known diseases.

Repeat for Credit
N

Requisites
Prerequisite: C or better in either KIN 360 or BIOL 441 and BIOL 442; or 8 hours of Anatomy and Physiology transfer credit at C or better.

Typically Offered
Fall, Spring, Summer

KIN 398 - Topics in Kinesiology

Credits: 1-3

Study of a selected topic in an area not covered in the curriculum or involving application of theory presented in a related subject core course.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 418 - Social Determinants and Diversity in Public Health

Credits: 3

Examination of social determinants of health such as class, race, and gender, and an exploration of how social inequalities have contributed to differences in health among certain population groups. Topics addressed include immigration patterns, social justice, health equity, and promoting cultural competency.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230; SOCIO 211.

Typically Offered
Fall, Spring

KIN 419 - Health Policy and Administration

Credits: 3

Provides understanding of health policy issues at the local, state, federal, and global levels, with focus on U.S. health policy-making and law including health insurance, health economics, legal system, health policy and law including health insurance, health economics, individual rights in health care, and health care access and quality.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230.

Typically Offered
Fall, Spring

KIN 430 - Practicum in Lifetime Sports

Credits: 2

Supervised students assist in lifetime sports classes.

Note
Four hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of Undergraduate Coordinator.

Typically Offered
Fall, Spring

KIN 463 - Laboratory Practicum in Kinesiology

Credits: 1-2

Supervised students assist in laboratory.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and successful completion of lab experience, consent of undergraduate coordinator.

Typically Offered
Fall, Spring

KIN 498 - Honors Tutorial in Kinesiology

Credits: 1-3

Individually directed research in kinesiology, normally as a preliminary to writing a senior honors thesis.

Repeat for Credit
Y

Requisites
Prerequisite: Sophomore standing, membership in the honors Program of the College of Health and Human Sciences, and permission of instructor.

Typically Offered
Fall, Spring

KIN 499 - Honors Project

Credits: 3

Open only to Health and Human Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Requisites
Prerequisite: Membership in Human Ecology Honors Program.

Typically Offered
Fall, Spring, Summer

KIN 520 - Practicum in Fitness Settings

Credits: 1-3

Practical experiences in the fitness setting such as observation and participation in exercise testing and prescription, exercise leadership, and record keeping and program management.

Note
Consent of School required

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 521 - Prac/Public Health Physical Activity

Credits: 1-3

Practical experiences in the public health setting, such as

observation and participation in public health physical activity program planning and evaluation.

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 345 and instructor consent.

Typically Offered
Fall, Spring, Summer

KIN 550 - Health Promotion Practice Methods

Credits: 4

A health promotion course in which the role of a public health professional in community-based program planning will be discussed including the steps of a needs assessment. Additionally, students will learn various intervention strategies that can be used in the public health field to promote health. Major concepts, theories, and principles of health promotion/education and intervention strategies will form the foundation of this class. Cultural, social, and developmental influences on health behavior will also be explored.

Repeat for Credit
N

Requisites
Prerequisite: KIN 418

Typically Offered
Fall

KIN 580 - Internship in Kinesiology

Credits: 3-8

Supervised field experience in approved fitness, strength and conditioning, clinical, public health, or healthcare setting 3-8 credit hours, 50 hours required at the internship site per credit.

Note
May be completed with half-time assignment for 12-16 weeks or full-time assignment for 6-8 weeks. Consent of School required.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 591 - Psychology of Exercise and Sport Injury

Credits: 3

Underlying effects, treatment of psychological consequences, and physical trauma of exercise and sport injury. Topics include the impact of injury on exercise behavior, the athlete at risk, behavioral risk factors, injury assessment, treatment of injury, and psychological factors addressed by the sports medicine team.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

KIN 592 - Sport and Exercise Personality

Credits: 3

The role of personality in sport, sport performance and exercise behavior. Theories relevant to sport and exercise personality will be examined to provide a theoretical framework for understanding and applying research. Assessment instruments and relevant research will be examined and critiqued.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 310 and KIN 345.

Typically Offered
Intersession

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

KIN 594 - Sport and Exercise Psychology

Credits: 3

This course is designed to introduce the student to the basic psychological principles related to sport and exercise behavior and performance. Factors that influence sport performance will be examined as will the principles related to exercise and exercise behavior.

Repeat for Credit
N

Typically Offered
Spring, Summer

KIN 596 - Teaching Experience in Kinesiology

Credits: 3

This course will be a learning experience for students supporting a faculty course. Objectives include identifying and discussing learning and teaching, leading discussions, and providing assistance and direction to students in the course.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

KIN 597 - Research Experience in Kinesiology

Credits: 0-3

Exposure to and assisting with current research projects in a laboratory setting in Kinesiology.

Note
Consent of School required. Maximum of 3 credit hours applicable toward a degree.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 598 - Topics in Kinesiology

Credits: 1-3

Study of a selected topic in kinesiology involving either an in-depth study or application of theory presented in a related core course.

Repeat for Credit
Y

Requisites
Prerequisite: Related core course.

Typically Offered
On sufficient demand

KIN 599 - Independent Studies in Kinesiology

Credits: 1-3

Selected topics in kinesiology. Maximum of 3 hours applicable towards a degree.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring

KIN 600 - Interpersonal Aspects of Physical Activity

Credits: 3

Examination of theory and research related to interpersonal aspects of physical activity. Topics include: social networks, social support, social influence, cohesion and intervention strategies that target interpersonal factors to increase and maintain physical activity participation.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in KIN 310 and KIN 312; and a grade of C or better in KIN 345.

Typically Offered
Fall, Spring

KIN 601 - Cardiorespiratory Physiology

Credits: 3

An examination of the structure and function of the respiratory system and the manner in which oxygen passes from the atmosphere to its site of utilization in the mitochondria. Exercise, disease, and environmental stresses will form the basis for examining the capacity, plasticity, and limitations to respiratory function.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in both KIN 310 and KIN 335.

Typically Offered
Spring-Odd Years

KIN 602 - Social Structural Determinants of Physical Activity

Credits: 3

An examination of how social structural determinants impact participation in physical activity. Topics include: social class, race and ethnicity, gender, sexual orientation, family, education, and work. Promising physical activity intervention strategies are also discussed.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in KIN 310 or KIN 312; and a grade of C or better in KIN 345.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

KIN 603 - Cardiovascular Physiology

Credits: 3

Study of the structure and function of the cardiovascular system as it pertains to health and disease. Topics include the control of blood pressure, vascular volume, and blood flow during orthostasis, aging and disease.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in both KIN 310 and KIN 335.

Typically Offered
Spring

KIN 605 - Topics in the Biological Basis of Kinesiology

Credits: 1-3

Study of a selected topic in the biological basis of kinesiology involving either an in-depth study or application of theory presented in a related course area.

Repeat for Credit
Y

Requisites
Prerequisite: A grade of C or higher in KIN 310 and KIN 335.

Typically Offered
On sufficient demand

KIN 606 - Topics in the Behavioral Basis of Kinesiology

Credits: 1-3

Study of a selected topic in the behavioral basis of kinesiology involving either an in-depth study or application of theory presented in a related course area.

Repeat for Credit
Y

Requisites
Prerequisite: A grade of C or higher in KIN 310 and KIN 345.

Typically Offered
On sufficient demand

KIN 607 - Muscle Physiology

Credits: 3

Subcellular, cellular, and tissue structure of skeletal muscle and the relationship of these structural characteristics to the functioning of the muscle. Examines energy pathways available to the muscle to support the various functions, and mechanisms underlying changes in exercise tolerance that accompany exercise training and detraining, aging, and diseases that affect skeletal muscle.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in both KIN 310 and KIN 335.

Typically Offered
Fall

KIN 609 - Environmental Physiology

Credits: 3

Study of the physiological adaptations to acute and chronic challenges imposed by the environment. Topics will focus on how different physiological systems respond to different environmental stressors (heat, cold, deep sea diving, high altitude).

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335.

Typically Offered
Spring

KIN 610 - Program Planning and Evaluation

Credits: 3

Theories and models and the stages and activities of planning, implementing, and evaluating health promotion programs.

Repeat for Credit
N

Requisites
Prerequisite: grade of C or better in KIN 310 or KIN 312; and a grade of C or better in KIN 345.

Typically Offered
Spring

KIN 611 - Autonomic Neurophysiology

Credits: 3

Study of the structure and function of the autonomic nervous system primarily as it pertains to physical stress. Particular emphasis is placed on the mechanisms evoking changes in the autonomic nervous system during physical stress including feed-forward and feedback autonomic control signals. The effects of disease and exercise training on those neural control signals are discussed

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335

Typically Offered
Fall, Summer

KIN 612 - Policy, Built Environment and Physical Activity

Credits: 3

Examination of the characteristics of active living policies and neighborhood/community design that contribute to improved health.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in KIN 310 or KIN 312; and a grade of C or better in KIN 345.

Typically Offered
Fall, Summer

KIN 614 - Physical Activity Behavior Settings: Youth Sport to Senior Centers

Credits: 3

The course is a study of key physical activity behavior settings across life-span development. Topics include observation of social and physical environmental variables, surveillance of physical activity in behavior settings,

motivational theory and responses, setting interventions and developmental outcomes, and intervention evaluation methods.

Repeat for Credit
N

Requisites
Prerequisite: KIN 310 and KIN 345 with grades of C or higher.

Typically Offered
Spring

K-State 8
Social Sciences

KIN 615 - Cardiorespiratory/Comparative Physiology in Health and Disease

Credits: 3

This course seeks to fulfill the following objectives: (1) To provide the student with an awareness and mechanistic understanding of the effects of physical activity on humans and animals and the concept of homeostasis. (2) Foster an understanding of the integrative nature of kinesiology/physiology by considering the relationships among different systems and their response to stress in humans and animal species in health and disease. Focus is brought to bear in particular on the pulmonary, cardiovascular and muscle systems. Chronic and acute adaptations to special environments and physical stress are considered and the students are asked to consider how the different systems are controlled in health and disease. This course is recommended for pre-med students, biology and physiology majors, aspiring scientists in physiology and/or medicine and those interested in a career in health and human services.

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335

Typically Offered
Fall, Spring, Summer

KIN 616 - Obesity and Physical Activity: Behavioral, Environment, and Policy Influences

Credits: 3

Examines the contributing factors to obesity, especially through the lens of physical activity/inactivity. Attention is paid to the environment and policy influences on behaviors that contribute to weight gain.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in KIN 310 or KIN 312 and a Grade of C or better in KIN 345.

Typically Offered
Fall, Spring

KIN 617 - Signaling Pathways in Physiology

Credits: 3

Current concepts of biological signaling transduction and its role in controlling genes expression and protein synthesis involved in exercise adaptation, including resistance and endurance exercise, and disease states, including cardiovascular disease and cancer. This course seeks to fulfill the following
objectives: (1) To train students to understand the molecular and cellular signaling mechanisms associated with changes in skeletal and cardiac muscle mass, cardiac function, and endothelial function change in response to exercise and disease. (2) Foster an understanding of the correlation of
'macro-level' concepts like muscle hypertrophy to 'micro-level' concepts such as mTOR signaling with the goal of understanding the role cell signaling plays in mediating chronic adaptation. This course is recommended for pre-med students, pre-physical therapy students, biology and physiology majors, 80 and those interested in a career in health and human services. This course will cover concepts that are of emphasis of the MCAT exam.

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335; or Instructor Permission

Typically Offered
Fall, Spring

KIN 618 - Seminar Public Health Practice

Credits: 1

Pre-practicum course of field-based observations and experiences to connect academic concepts to practice in public health culminating in a portfolio to showcase accomplishments to prospective employers and peers.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230.

Typically Offered
Fall, Spring

KIN 619 - Public Health Practicum

Credits: 3

Course provides students with an opportunity to synthesize, integrate, and apply practical skills, knowledge, and training learned in courses, to gain professional experience in a public health work environment, and to work on public health practice projects that are of particular interest.

Repeat for Credit
N

Requisites
Prerequisite: KIN 230, KIN 312, and KIN 618 with a grade of C or higher; and permission of public health-coordinator.

Typically Offered
Fall, Spring

KIN 622 - Capstone Project in Public Health

Credits: 2

Focuses on integrating public health knowledge, skills, and practice acquired during coursework and the practicum experience, and culminating in a paper and presentation demonstrating critical thinking on public health topics and further understanding in an area of public health practice. This course is typically completed in the last semester of the undergraduate public health program.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in KIN 230; KIN 618, and KIN 619.

Typically Offered
Fall, Spring, Summer

KIN 625 - Exercise Testing and Prescription

Credits: 3

Benefits and risks of exercise testing and prescription with healthy populations, individuals at risk, and patients with cardiovascular and metabolic diseases. Includes experiences with exercise test technology and methods of exercise prescription.

Note
Two hours recitation and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335, CPR, and First Aid.

Typically Offered
Fall, Spring

KIN 635 - Nutrition and Exercise

Credits: 3

The interrelationships between diet, nutrition, and exercise. Topics covered include physical fitness, weight control, nutrient metabolism during exercise, and athletic performance.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 132 or FNDH 400 and a grade of C or higher in KIN 310 and KIN 335

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

KIN 650 - Development of Motor Control

Credits: 3

A multi-level analysis of the neurophysiological activation of muscle, reflexes, sensory integration during movement, and theories of voluntary movement.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: C or better in both KIN 310 and either BIOL 340, KIN 360 or 8 hours of transfer Anatomy and Physiology.

Typically Offered
On sufficient demand

K-State 8
Natural and Physical Sciences

KIN 655 - Individual Physical Activity Promotion

Credits: 3

An in-depth study of individual-level influences on physical activity and strategies to promote physical activity among individuals.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in KIN 310 or KIN 312; and a grade of C or better in KIN 345.

Typically Offered
Fall, Spring

KIN 657 - Integrative Human Pathophysiology

Credits: 3

This course is designed to introduce the student to the mechanistic pathways of prominent chronic diseases (e.g., cardiovascular, respiratory, renal, cancer) and the mechanistic basis for current recommended treatments. This course will focus on the vertical integration of cardiovascular, renal, respiratory, and neural physiological pathways as they relate to pathogenesis, diagnosis, and treatment of these chronic diseases. A large emphasis will be placed on the cellular and molecular response, how they manifest in histological analysis and subsequent organ system dysfunction with the role of exercise therapy (example: cardiac/respiratory therapy) and pharmacology in mitigating these physiological changes.

Repeat for Credit
N

Requisites
Prerequisite: A grade of C or higher in both KIN 310 and KIN 335.

Typically Offered
Fall, Spring

K-State 8
Natural and Physical Sciences

KIN 700 - Interpersonal Aspects of Physical Activity

Credits: 3

Examination of theory and research related to interpersonal aspects of physical activity. Topics include: social networks, social support, social influence, cohesion, and intervention strategies that target interpersonal factors to increase and maintain physical activity participation.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission

Typically Offered
Spring

KIN 701 - Cardiorespiratory Physiology

Credits: 3

An examination of the structure and function of the respiratory system and the manner in which oxygen passes

from the atmosphere to its site of utilization in the mitochondria. Exercise, disease, and environmental stresses will form the basis for examining the capacity, plasticity, and limitations to respiratory function.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 with a grade of C or better

Typically Offered
Spring

KIN 703 - Cardiovascular Physiology

Credits: 3

Study of the structure and function of the cardiovascular system as it pertains to health and disease. Topics include the control of blood pressure, vascular volume, and blood flow during orthostasis, aging and disease.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 with a grade of C or better

Typically Offered
Fall, Spring

KIN 707 - Muscle Physiology

Credits: 3

Subcellular, cellular, and tissue structure of skeletal muscle and the relationship of these structural characteristics to the functioning of the muscle. Examines energy pathways available to the muscle to support the various functions, and mechanisms underlying changes in exercise tolerance that accompany exercise training and detraining, aging, and diseases that affect skeletal muscle.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 or equivalent with a grade of C or better

Typically Offered
Fall, Spring, Summer

KIN 709 - Environmental Physiology

Credits: 3

Study of the physiological adaptations to acute and chronic challenges imposed by the environment. Topics will focus on how different physiological systems respond to different environmental stressors (heat, cold, deep sea diving, high altitude).

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 with a grade of C or better

Typically Offered
Fall, Spring

KIN 710 - Program Planning and Evaluation

Credits: 3

Theories and models and the stages and activities of planning, implementing, and evaluating health promotion programs.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 345 with a grade of C or better

Typically Offered
Spring

KIN 711 - Autonomic Neurophysiology

Credits: 3

Study of the structure and function of the autonomic nervous system primarily as it pertains to physical stress. Particular emphasis is placed on the mechanisms evoking changes in the autonomic nervous system during physical stress including feed-forward and feedback autonomic control signals. The effects of disease and exercise training on those neural control signals are discussed.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 with a grade of C or better

Typically Offered
Fall, Summer

KIN 712 - Policy, Built Environment and Physical Activity

Credits: 3

Examination of the characteristics of active living policies and neighborhood/community design that contribute to improved health.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 345 with a grade of C or better

Typically Offered
Fall, Summer

KIN 715 - Cardiorespiratory/Comparative Physiology in Health and Disease

Credits: 3

This course seeks to fulfill the following objectives: (1) To provide the student with an awareness and mechanistic understanding of the effects of physical activity on humans and animals and the concept of homeostasis. (2) Foster an understanding of the integrative nature of kinesiology/physiology by considering the relationships among different systems and their response to stress in humans and animal species in health and disease. Focus is brought to bear in particular on the pulmonary, cardiovascular and muscle systems. Chronic and acute adaptations to special environments and physical stress are considered and the students are asked to consider the the different systems are controlled in health and disease. This course is recommended for pre-med students, biology and physiology majors, aspiring scientists in physiology and/or medicine and those interested in a career in health and human services.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission OR KIN 335 with a grade of C or better

Typically Offered
Fall

KIN 716 - Obesity and Physical Activity: Behavioral, Environment, and Policy Influences

Credits: 3

Examines the contributing factors to obesity, especially through the lens of physical activity/inactivity. Attention is paid to the environment and policy influences on behaviors that contribute to weight gain.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission

Typically Offered
Fall, Summer

KIN 755 - Individual Physical Activity Promotion

Credits: 3

An in-depth study of individual-level influences on physical activity and strategies to promote physical activity among individuals.

Note
Intended for graduate students only

Repeat for Credit
N

Requisites
Prerequisite: Graduate student status OR instructor permission

Typically Offered
Fall, Spring

KIN 780 - Graduate Internship in Kinesiology

Credits: 3-6

Supervised field experience in approved fitness, strength and conditioning, clinical, public health, or healthcare setting 3-8 credit hours, 50 hours required at the internship site per credit.

Note
Consent of School required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

KIN 793 - Internship/Public Health Physical Activity

Credits: 1-8

Supervised field experience in settings such as public health departments, foundations, government offices, or research programs.

Repeat for Credit
N

Requisites
Prerequisite: KIN 345, KIN 346, KIN 521, KIN 655.

Typically Offered
Fall, Spring, Summer

KIN 796 - Topics in Exercise Physiology

Credits: 3

Selected topics in exercise physiology involving either greater in-depth study, or application of theory presented in a related course.

Repeat for Credit
Y

Requisites
Prerequisite: C or better in both KIN 310 and KIN 335 and consent of instructor.

Typically Offered
On sufficient demand

Cross-listed
AP 796

KIN 797 - Topics in Public Health Physical Activity Behavior

Credits: 3

Selected topics in public health physical activity behavior involving either greater in-depth study, or application of theory presented in a related course.

Repeat for Credit
Y

Requisites
Prerequisite: C or better in both KIN 310 and KIN 345 and consent of instructor.

Typically Offered
On sufficient demand

Cross-listed
AP 797

KIN 800 - Advanced Physiology of Exercise

Credits: 3

An in-depth study of the physiological responses of the human body during exercise, the adaptations that occur with exercise training, and the laboratory techniques to assess these responses and adaptations.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 335.

Typically Offered
Fall

Cross-listed
Anatomy and Physiology See AP 800

KIN 801 - Physical Activity: Physiology to Public Health Impact

Credits: 3

This graduate seminar covers the study of physical activity and its impact on public health across levels of analysis from basic exercise physiology to social ecology.

Repeat for Credit
N

Typically Offered
Fall

KIN 805 - Physical Activity and Human Behavior

Credits: 3

An examination of the theory and research related to the psychological antecedents and outcomes of participation in physical activity and exercise. Topics include models of exercise motivation, social cognitive theory of exercise and social ecological models of physical activity.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 655.

Typically Offered
Fall

KIN 807 - Motor Learning and Control

Credits: 3

Application of learning principles to skill acquisition in sport and human domain; and practical applications.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 320 or 9 hours of graduate credit in psychology (500 level or above).

Typically Offered
Fall

KIN 808 - Social Epidemiology of Physical Activity

Credits: 3

An examination of the social factors that contribute to an understanding of why people participate in physical activity. Topics include the consideration of individual social and demographic factors such as gender, race, socioeconomic status, education, and social support as well as social structural factors such as the role of the social institutions (e.g. family, work and school environments).

Repeat for Credit
Y

Requisites
Prerequisite: KIN 655.

Typically Offered
Fall

KIN 815 - Research Methods in Kinesiology

Credits: 3

A study of techniques of the research process including the identification of a research problem, the design of experimental and non-experimental strategies, and the

presentation of written research.

Repeat for Credit
Y

Typically Offered
Spring

KIN 818 - Social and Behavioral Bases of Public Health

Credits: 3

The role of behavioral, social, psychological, economic, environmental, and social structural factors in both the occurrence of health problems in groups and populations, and in the development of the risk factors that contribute to these problems. Principles of health behavior change and the application of these principles to a variety of health issues as well as an emphasis on how social structural factors impact health are examined to better understand health behavior and health inequities in contemporary society.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate status in public health or kinesiology program.

Typically Offered
Fall

Cross-listed
MPH 818

KIN 822 - Advanced Muscle Physiology

Credits: 3

Course will examine current topics in muscle physiology. Format to include discussion of scientific papers, oral presentations, and debate of controversial topics.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Spring

KIN 824 - Physiology of Oxygen Transport

Credits: 3

This course is designed to promote critical reading of the literature, particularly with respect to the understanding of exercise physiology and cardiorespiratory, vascular and muscle energetics responses. Activities will include presenting papers, debate and discussion regarding all aspects of science and scientific philosophy.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Spring

KIN 825 - Mechanical Analysis of Human Movement

Credits: 3

Mechanical principles and analysis procedures for the study of overt human movement. Applications to movements in exercise, sport, occupational, and daily living activities will be emphasized.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 330.

Typically Offered
Spring

KIN 826 - Advanced Cardiovascular Physiology

Credits: 3

Discussion and critical examination of cardiovascular control mechanisms, with specific emphasis on regulation of blood pressure during severe challenges such as exercise, heat stress, and upright posture.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 335 or permission of instructor

Typically Offered
Fall

KIN 830 - Advanced Public Health Physical Activity

Credits: 3

Exploration of the social and behavioral epidemiology of physical activity in public health: outcomes, influences, and promotion in individuals, settings, and communities.

Repeat for Credit
Y

Typically Offered
Spring

KIN 835 - Group Dynamics and Physical Activity

Credits: 3

Examines the principles of group development and maintenance in physical activity environments. Topics include the nature of groups, group environment, important member attributes, group structure, group cohesion, group processes and tactics of group development.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 655.

Typically Offered
Spring

KIN 840 - Public Health Practice

Credits: 3-6

Supervised field experience in an international, state, local, or district health agency or other appropriate health agency.

Repeat for Credit
N

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

KIN 845 - Exercise Adherence

Credits: 3

Study and discussion of empirical research and theory as it relates to exercise adherence from psychological, behavioral, and public health perspectives. Topics addressed are epidemiological trends, conceptual issues of measurement, research design, statistical analysis, and interventions focusing on settings and populations.

Repeat for Credit
N

Requisites
Prerequisite: KIN 600 or KIN 805.

Typically Offered
Spring

KIN 851 - Topics in the Physiological Basis of Kinesiology

Credits: 1-3

Study of a selected topic in the physiological basis of kinesiology involving either an in-depth study or application of theory presented in a related course area.

Repeat for Credit
Y

Typically Offered
On sufficient demand

KIN 852 - Topics in the Behavioral Basis of Kinesiology

Credits: 1-3

Study of a selected topic in the behavioral basis of kinesiology involving either an in-depth study or application of theory presented in a related course area.

Repeat for Credit
Y

Typically Offered
On sufficient demand

KIN 855 - Exercise Psychology in Special Populations

Credits: 3

A study of the psychological determinants and outcomes of exercise participation in special populations (e.g. arthritic, obese, cardiovascular disease). Emphasis in understanding the motive underlying involvement in exercise and physical activity and the situational and personal determinants associated with failure to initiate and/or adhere to exercise and physical activity programs.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 655.

Typically Offered
Fall

KIN 890 - Graduate Seminar in Kinesiology

Credits: 1

Designed to provide students opportunities to improve oral and written communication skills and to expose them to the breadth of research topics within the Kinesiology department.

Repeat for Credit
Y

Requisites
Prerequisites: Current graduate student status (MS, PhD, MPH). Undergraduate students by instructor permission only.

Typically Offered
Fall, Spring

KIN 896 - Independent Study in Kinesiology

Credits: 1-4

Intensive independent study in a topic or problem involving the integration, application, and synthesis of theory presented in a related course. The course culminates in the preparation of an original paper.

Repeat for Credit
Y

Requisites
Prerequisite: KIN 815 and related graduate subject core courses.

Typically Offered
Fall, Spring, Summer

KIN 897 - Research in Kinesiology

Credits: 1-4

Independent study in one or more of the research processes involved in the scientific method.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or STAT 703, KIN 815, and related graduate subject core course.

Typically Offered
Fall, Spring, Summer

KIN 898 - Master's Report

Credits: 1-4

Master's Report

Repeat for Credit
Y

Typically Offered
Other

KIN 899 - Master's Thesis

Credits: 1-6

Master's Thesis

Repeat for Credit
Y

Typically Offered
Other

KIN 999 - Dissertation Research

Credits: 1-15

Dissertation Research

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

LAR 010 - Travel: Regional 1

Credits: 0

Multi-day regional field trip experience. Students will study existing natural and/or built environments to develop landscape architecture knowledge base and apply findings to other courses.

Repeat for Credit
Y

Requisites
Prerequisite: LAR 220.

Typically Offered
Spring, Summer

LAR 020 - Travel: Regional 2

Credits: 0

Multi-day field trip experience in an urban environment. Students will study notable works of landscape architecture, and visit professional offices to develop landscape architecture knowledge base and apply findings to other courses.

Repeat for Credit
N

Requisites
Prerequisite: LAR 010.
Corequisite: LAR 433.

Typically Offered
Spring

LAR 030 - Travel: Narratives and Placemaking

Credits: 0

Immersive field trip experience that supports the Narrative and Placemaking Studio.

Repeat for Credit
N

Requisites
Prerequisite: LAR 020.
Corequisites: LAR 425, LAR 430, LAR 352.

Typically Offered
Summer

LAR 040 - Travel: Major City 1

Credits: 0

Multi-day field trip experience in a major city. Students will study notable works of landscape architecture, and visit professional offices to develop landscape architecture knowledge base and apply findings to other courses.

Repeat for Credit
N

Requisites
Prerequisite: LAR 030.
Corequisite: LAR 442.

Typically Offered
Fall

LAR 050 - Travel: Major City 2

Credits: 0

Multi-day field trip experience in a major city. Students will study notable works of landscape architecture, and visit professional offices to develop landscape architecture knowledge base and apply findings to other courses.

Repeat for Credit
N

Requisites
Prerequisite: LAR 040.

Typically Offered
Spring

LAR 101 - Introduction to Landscape Architecture

Credits: 3

Exploratory lecture course open to students in all majors providing an overview of landscape architecture which focuses on innovations in natural and built environments. Students will learn about a wide variety of global issues and perspectives, types of planning and design projects, and professional aspects of the discipline.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Global Issues and Perspectives
Aesthetic Interpretation

LAR 211 - Unlocking Creativity

Credits: 3

Do you want to become creative? Good news, you already are! For students in all majors, this course is designed to help you access your creative potential and become more imaginative, innovative, and courageous. Learning outcomes include overcoming blocks, refining your creative process, practicing activities to enhance creativity, and effectively communicating ideas.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

LAR 220 - Drawing Landscapes Studio

Credits: 5

Foundational aspects of 2D analog and digital medium. Students will learn how to view, analyze, represent and design through the lens of landscape architecture.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the LA professional program.
Corequisite: LAR 350.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

LAR 230 - Modeling Landscapes Studio

Credits: 5

Foundational aspects of 3D modeling using both analog and digital medium. Students will learn how to view, analyze, represent and design through creation and fabrication of 3D models.

Repeat for Credit
N

Requisites
Prerequisite: LAR 220.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

LAR 248 - Landscape Architecture Materials and Methods

Credits: 3

To provide the student a basic understanding of materials and methods commonly utilized in the practice of landscape architecture as a basis to pursue subsequent land design and land construction course work.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113, PHYS 115 or PHYS 213. Prerequisite or co-requisite: LAR 520.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 298 - Ethics and Environmental Dilemmas

Credits: 3

Introduction to environmental ethics and significant local and global dilemmas. Students will learn about how humans have impacted the environment through time and the implications of those actions, and environmental/social movements and justice.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

LAR 310 - Design Graphics and Visual Thinking

Credits: 2

A study of graphic communication techniques for the exploration and presentation of landscape architecture design ideas.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the LA professional program.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

LAR 320 - Site Design Studio II

Credits: 5

Small- to medium-scale site design studies with emphasis placed on design process, response to cultural and natural conditions, detailed articulation of space including definition and use of materials, and design communication.

Repeat for Credit
N

Requisites
Prerequisite: LAR 220. Prerequisite or corequisite: LAR 520.

Typically Offered
Spring

K-State 8
Historical Perspectives

LAR 350 - Plants and Design

Credits: 3

Introduction to plant morphology, forms of classification, and a basic understanding of plant habitat. Students will learn to identify a palette of plants in the field and understand their application for design.

Repeat for Credit
N

Requisites
Corequisite: LAR 220.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Natural and Physical Sciences

LAR 351 - Plant Patterns and Use

Credits: 1

Introduction to the patterns and use of plants in cultural and natural contexts. Students will identify plant palettes and communities in historical and contemporary landscapes.

Repeat for Credit
N

Requisites
Prerequisite: LAR 350.
Corequisite: LAR 433.

Typically Offered
Spring

LAR 352 - Landscape Performance Lab

Credits: 3

Introduction to the scientific process as well as methods for assessing landscape performance. Students will learn how to acquire, organize and analyze information using qualitative and quantitative methods.

Repeat for Credit
N

Requisites
Prerequisite: LAR 298, LAR 420

Typically Offered
Fall

K-State 8
Natural and Physical Sciences
Empirical and Quantitative Reasoning

LAR 353 - Plant Selection

Credits: 1

Selection of plants for specific site requirements. Students learn how to anticipate plant performance and identify plants to achieve design goals in associated courses.

Repeat for Credit
N

Requisites
Prerequisite: LAR 352.

Typically Offered
Fall

LAR 354 - Landscape Restoration

Credits: 3

Development of landscape restoration plans. Students will learn the principles, methods, and plants of ecological restoration at local and regional scales.

Repeat for Credit
N

Typically Offered
Spring

LAR 410 - Planting Design Studio

Credits: 5

Design studies emphasizing functional, aesthetic, and ecological uses of plants. projects emphasize design process and the relationship between plants and the built environment; elements and principles of planting design; plant selection; preparation of planting plans; specification writing; and design implementation.

Repeat for Credit
N

Requisites
Prerequisite: LAR 320. Prerequisite or corequisite: LAR 520, HORT 274.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Natural and Physical Sciences

LAR 420 - Socio-Ecological Systems Studio

Credits: 5

Introduction to key principles of ecology as related to ecological planning and design. Students will learn how to connect theoretical knowledge of socio-ecological systems and processes to address multi-scale problems in urban and rural contexts.

Repeat for Credit

N

Requisites
Prerequisite: LAR 230.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 425 - Narratives and Placemaking Seminar

Credits: 2

Immersive exploration into fundamentals of landscape narratives, place theory and placemaking. Students will examine and engage in a variety of locations, create expressions of narrative using a variety of representational techniques, and apply knowledge gained in site design.

Repeat for Credit
N

Requisites
Prerequisite: LAR 420.
Corequisite: LAR 030, LAR 352.

Typically Offered
Summer

LAR 430 - Narratives and Placemaking Studio

Credits: 4

Immersive exploration into fundamentals of landscape narratives, place theory and placemaking. Students will examine and engage in a variety of locations, create expressions of narrative using a variety of representational techniques, and apply knowledge gained in site design.

Repeat for Credit
N

Requisites
Prerequisite: LAR 420.
Corequisite: LAR 030, LAR 352, LAR 425.

Typically Offered
Summer

K-State 8
Aesthetic Interpretation
Social Sciences

LAR 433 - Landscape History and Design Studio

Credits: 5

Introduction to the history and theory of landscape architecture materials and design from the Middle Ages to the present with a focus on Europe and North America. Students will gain competency in landscape architecture vocabulary, the ability to recognize notable works and practitioners, and apply historical precedents to site design projects.

Repeat for Credit
N

Requisites
Prerequisite: LAR 230.
Corequisite: LAR 351.

Typically Offered
Fall

K-State 8
Historical Perspectives
Aesthetic Interpretation

LAR 438 - Site Design Implementation

Credits: 5

Introduction to construction materials, methods, and documentation appropriate for design implementation at the site scale. Focus on producing a set of construction documents including grading, stormwater management, plants and materials.

Repeat for Credit
N

Requisites
Prerequisite: LAR 425, LAR 430.
Corequisite: LAR 353.

Typically Offered
Fall

K-State 8

Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 439 - Master Plan Design and Implementation

Credits: 5

Design implementation at the master plan and regional scales. Focus on suitability analyses and systems supporting community services such as pedestrian and vehicular transportation, land use, hydrology and other natural systems.

Repeat for Credit
N

Requisites
Prerequisite: LAR 438.
Corequisite: LAR 354.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 442 - Site Research and Design Studio

Credits: 5

Iterative development of site plans and designs. Students will research and share precedent studies to expand knowledge base, and will apply findings to multiple design projects.

Repeat for Credit
N

Requisites
Prerequisite: LAR 352, LAR 425, LAR 430.
Corequisite: LAR 040.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

LAR 444 - Career and Academic Planning

Credits: 3

Exploration and identification of career paths and development of academic plans for reaching personal and professional goals including specific coursework, internships, study abroad and extracurricular activities.

Repeat for Credit
N

Requisites
Prerequisite: LAR 430.

Typically Offered
Fall

LAR 445 - Career Development Communications

Credits: 1

Development of visual, written and oral communication skills for career development. Students will prepare materials for internship application, job search, or career advancement.

Repeat for Credit
N

Requisites
Prerequisite: LAR 444.

Typically Offered
Spring

Cross-listed
PLAN 444

LAR 500 - Site Planning and Design

Credits: 3

Theory, principles, and elements of site planning and design. Lectures, readings, short problems, and site visits dealing with site analysis, ecological consideration, grading drainage, circulation and parking, lighting, planting design, materials and details, management and maintenance, and cost factors.

Repeat for Credit
N

Requisites

Prerequisite: ARCH 403 or concurrent enrollment with ARCH 403, or admission to RCP professional program.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

LAR 501 - Landscape Architecture Seminar I

Credits: 2

Discussion of current trends in landscape architecture and related fields by students, faculty, and invited speakers.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

LAR 510 - Landscape Architecture Tech Module I

Credits: 1

Introductory theory, methods, and application of technological skills and support of concurrent landscape architecture studios and courses. Emphasis is on data collection and management and mapping and analysis.

Repeat for Credit
N

Requisites
Prerequisite: Admission to LA professional program.

Typically Offered
Fall

LAR 520 - Landscape Architecture Tech Module II

Credits: 1

Introductory theory, methods, and application of technological skills and support of concurrent landscape architecture studios and courses. Emphasis is on CAD and 3-D modeling.

Repeat for Credit
N

Requisites
Prerequisite: LAR 510.

Typically Offered
Spring

LAR 530 - Landscape Architecture Tech Module III

Credits: 2

Intermediate theory, methods, and application of technological skills and support of concurrent landscape architecture studios and courses. Emphasis is on CAD and 3-D modeling and surveying.

Repeat for Credit
N

Requisites
Prerequisite: LAR 520.

Typically Offered
Fall

LAR 540 - Landscape Architecture Tech Module IV

Credits: 1

Intermediate theory, methods, and application of technological skills and support of concurrent landscape architecture studios and courses. Emphasis is on CAD and 3-D modeling and presentation graphics.

Repeat for Credit
N

Requisites
Prerequisite: LAR 530.

Typically Offered
Spring

LAR 550 - Landscape Architecture Tech Module V

Credits: 2

Advanced application of technological skills and support of concurrent landscape architecture studios and courses. Emphasis is on CAD and 3-D modeling, thematic mapping, and geoprocessing.

Repeat for Credit
N

Requisites
Prerequisite: LAR 540.

Typically Offered
Fall

LAR 560 - Landscape Architecture Tech Module VI

Credits: 1

Advanced project specific applications in data collection and management, CAD modeling, thematic mapping and GIS, and presentation graphics.

Repeat for Credit
N

Requisites
Corequisite: LAR 705.

Typically Offered
Spring

LAR 580 - Planning and Design Intro to GIS

Credits: 2

This course will provide students with the essential background in geospatial analysis and information systems for the design and planning fields. Students will learn basics about data models and management, vector and raster analysis and cartography. Students will learn how to use these skills to develop suitability analyses to evaluate the performance of plans and designs or to identify which location would be best for a particular purpose.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

LAR 635 - Golf Course Planning and Design

Credits: 1-4

Fundamentals of golf course planning and design, including: history, management, design, facilities, aesthetics, and technical development.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

LAR 645 - Professional Internship Report

Credits: 1

Oral and graphic presentation of work completed in LAR 702 and LAR 703.

Repeat for Credit
N

Requisites
Prerequisite: LAR 702 or LAR 703.

Typically Offered
Fall

LAR 646 - Community Engagement Studio

Credits: 5

Engagement with communities and stakeholders through service learning projects. Focus on engagement methods and visualization, representation and communication to general audiences. Utilizes planning and design techniques and knowledge gained in previous semesters.

Repeat for Credit
N

Requisites
Prerequisite: LAR 442. Corequisite: LAR 050.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

LAR 647 - Design Implementation III

Credits: 5

Continuation of LAR 439 to include large scale site design, road alignment, large area grading, soils and excavation methods, storm drainage, and utilities routing.

Repeat for Credit
N

Requisites
Prerequisite: LAR 439.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 650 - Landscape Architecture Seminar II

Credits: 2

Literature review and discussion of current issues and trends in community planning and design. Readings and discussion in preparation for field trip.

Repeat for Credit
N

Typically Offered
Summer

LAR 655 - Landscape Architecture Professional Internship

Credits: 6-9

Confirmed internship with a professional sponsor subject to departmental approval.

Repeat for Credit
N

Requisites
Corequisite: LAR 703.

Typically Offered
Spring

LAR 700 - Project Programming

Credits: 3

Research and the development of a program directed toward the advancement of a capstone project for LAR 705 Master's Project and Report.

Repeat for Credit
N

Requisites
Prerequisite: LAR 725, LAR 740, LAR 750 or corequisite: LAR 750.

Typically Offered
Fall

LAR 702 - Landscape Architecture Practicum

Credits: 0

Off-campus design studies fulfilled in an approved professional design office or international studies program.

Repeat for Credit
N

Requisites
Prerequisite: LAR 439, LAR 445 and LAR 646

Typically Offered
Spring, Summer

LAR 703 - Landscape Architecture Off-Campus Studio

Credits: 5

Off campus design studies fulfilled in an approved professional design office or in an approved international studies program.

Repeat for Credit
N

Requisites
Prerequisite: LAR 439, LAR 445 and LAR 646.

Typically Offered
Spring

LAR 704 - Environmental Landscape Planning and Design

Credits: 3

Introduction to and understanding of environmental planning, design and management of natural and social landscape systems beyond site scale. The course focuses on theories, techniques and processes for designing sustainable landscapes and urban environments. Students will develop a final project starting with the conceptualization, through inventory, analysis and simulation, in order to develop a final design proposal.

Repeat for Credit
N

Requisites
Prerequisite: LAR 580, or GEOG 508 or equivalent, or instructor permission.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

LAR 705 - Master's Project Studio 1

Credits: 5

In-depth exploration of a specific landscape architecture topic through research and design supervised by a major professor in accordance with Graduate School guidelines.

Repeat for Credit
N

Requisites
Prerequisite: LAR 725, LAR 740, LAR 750.
Corequisite: LAR 897. This course must be successfully taken in tandem with LAR 897, with a concurrent professor; the failure of either requires a retake (in tandem) of both with a concurrent instructor.

Typically Offered
Fall

LAR 710 - Master's Project Studio 2

Credits: 3

In-depth exploration of a specific landscape architecture topic through research and design supervised by a major professor in accordance with Graduate School guidelines.

Repeat for Credit
N

Requisites
Prerequisite: LAR 705 and LAR 897.
Corequisite: LAR 898. This course must be successfully taken in tandem with LAR 898, with a concurrent professor; the failure of either requires a retake (in tandem) of both with a concurrent instructor.

Typically Offered
Spring

LAR 720 - Public Lands and Natural Resources Law

Credits: 3

Legal aspects of land use and natural resource management on the federal public lands. A brief history of the acquisition and disposition of the public domain and a review of legal authority on the public lands are followed by an examination of key legal issues concerning the resources of water, minerals, timber, range, wildlife, recreation and wilderness.

Repeat for Credit
N

Requisites
Prerequisite: Advanced standing.

Typically Offered
Fall, Spring

LAR 725 - Research Methods

Credits: 3

Development of the research design process. Students will learn to employ appropriate methods and strategies to answer research questions, and to effectively and clearly communicate research-based information to peers and the public.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
PLAN 803

LAR 734 - Rivers: Processes & Forms

Credits: 3

This course addresses key aspects of hydrology such as precipitation and movement of water from uplands to channels. This movement, generally referred to as "runoff processes," is responsible for shaping the watershed. It then focuses upon fluvial geomorphology, the science of riverscapes, to examine processes and resultant landforms. This course teaches field observation skills and field survey procedures that allow the classification of natural rivers and streams. Finally, it previews methods of prediction and monitoring of river channel stability parameters.

Repeat for Credit
N

Typically Offered
Fall

LAR 735 - Advanced Golf Course Planning and Design

Credits: 1-4

Advanced methods and strategies of golf course and resort planning and design.

Repeat for Credit
N

Requisites
Prerequisite: LAR 635.

Typically Offered
Fall, Spring, Summer

LAR 740 - Advanced Studio

Credits: 5

In-depth exploration of a specific landscape architecture topic.

Repeat for Credit
N

Requisites
Prerequisite: LAR 354, LAR 439, LAR 444, LAR 646.
Corequisite: LAR 750.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

LAR 741 - Problems in Landscape Architecture

Credits: 1-18

Specific problems and/or reports in the area of landscape architecture.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

LAR 742 - Topics in Italian Landscape Architecture

Credits: 3

Investigation of Italian culture, landscape and communities through analytical readings and/or drawings.

Repeat for Credit
Y

Typically Offered
Spring

LAR 744 - Community Planning and Design

Credits: 4

Study of the relationships between planning and design in the growth and development of cities and towns.

Note
Two hours lecture and six hours studio a week.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315.

Typically Offered
Fall

LAR 745 - Professional Practice

Credits: 3

Studies of conventional and newly developing methods of professional design practice. Instruction in the relationships of architects, landscape architects, interior architects, and other professionals to users, clients, construction industry, society, government, and one another.

Repeat for Credit
N

Typically Offered
Fall

LAR 746 - Urban Design Studio I

Credits: 4

An interdisciplinary design studio involving large-scale design; projects with extensive time implementation sequence; responses to socioeconomic, cultural, environmental, and technical needs; and implementation strategies. Design methods are applied to selected urban areas of the Midwest.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315 or equivalent and concurrent enrollment in PLAN 745.

Typically Offered
Fall

LAR 750 - Advanced Seminar

Credits: 3

Studies and discussion of topics related to specialization studio.

Repeat for Credit
Y

Typically Offered
Fall

LAR 751 - Comprehensive Studio 1

Credits: 5

Culminating experience in landscape architecture design studio.

Repeat for Credit
N

Requisites
LA program students are required to obtain a "C" or better in this course.

Typically Offered
Fall, Spring

LAR 752 - Comprehensive Studio 2

Credits: 5

Culminating experience in landscape architecture studio.

Repeat for Credit
N

Requisites
LA program students are required to obtain a "C" or better in this course.

Typically Offered
Fall, Spring

LAR 753 - Professional Practice: Professional Responsibility

Credits: 1

Interdisciplinary course addresses the connections between allied design professions and the larger community. It helps students to understand and appreciate their professional legal and ethical responsibilities.

Repeat for Credit
N

Requisites

Prerequisite: LAR 442.

Typically Offered
Fall, Spring

LAR 754 - Professional Practice: Office Practices

Credits: 1

Interdisciplinary course addresses practice-based issues concerning professional relationships in the design and delivery process, management of projects, communication practices, and fiscal concerns.

Repeat for Credit
N

Requisites
Prerequisite: LAR 442.

Typically Offered
Fall, Spring

LAR 755 - Professional Practice: Discipline-Specific Topics

Credits: 1

Covers discipline-specific concerns, focusing on issues specific to architecture, interior architecture and product design, landscape architecture or regional and community planning.

Repeat for Credit
N

Requisites
Prerequisite: LAR 442.

Typically Offered
Fall, Spring

LAR 756 - Design of Parks and Recreation Areas

Credits: 3

Site planning of national, state, municipal, and private parks, and specialized recreation areas.

Repeat for Credit
N

Typically Offered
Fall

LAR 759 - Landscape Resource Evaluation

Credits: 3

The determination of the impact of physical project design upon the natural and man-made environment. Studies of existing site conditions and projections of the effect of such projects upon the site and vicinity.

Repeat for Credit
N

Requisites
Prerequisite: Senior or graduate standing.

Typically Offered
Spring

LAR 761 - Comprehensive Seminar 1

Credits: 2

Culminating experience in landscape architecture seminar.

Repeat for Credit
N

Requisites
LA program students are required to obtain a "C" or better in this course.

Typically Offered
Fall, Spring

LAR 762 - Comprehensive Seminar 2

Credits: 2

Culminating experience in landscape architecture design seminar.

Repeat for Credit
N

Requisites
LA program students are required to obtain a "C" or better in this course.

Typically Offered
Fall, Spring

LAR 806 - Portfolio Design

Credits: 3

The Portfolio Design course guides students in development of a professional portfolio of work, with the goal of producing a product that can be used for internship application, job search, or career advancement. Students explore visual thinking and visual communication with a culminating goal of producing a final portfolio.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student standing and familiarity with Adobe Creative Suite or Creative Cloud software.

Typically Offered
Fall, Spring, Summer

LAR 811 - Unlocking Creativity

Credits: 3

Do you want to become creative? Good news, you already are! For students in all majors, this course is designed to help you access your creative potential and become more imaginative, innovative, and courageous. Learning outcomes include overcoming blocks, refining your creative process, practicing activities to enhance creativity, and effectively communicating ideas.

Repeat for Credit
N

Typically Offered
Fall, Spring

LAR 860 - Advanced Planting Design

Credits: 1-4

Special studies in advanced planting design.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

LAR 870 - Advanced Landscape Architecture

Credits: 1-4

Special studies and design in advanced landscape architecture.

Repeat for Credit
Y

Requisites
Prerequisite: LAR 702.

Typically Offered
Fall, Spring, Summer

LAR 880 - Advanced Landscape Architecture Construction

Credits: 1-4

Specialized study of large-scale landscape planning involving landscape construction and grading.

Repeat for Credit
Y

Requisites
Prerequisite: LAR 439.

Typically Offered
Fall, Spring, Summer

LAR 897 - Proposal Writing

Credits: 2

Development of a master's thesis proposal.

Repeat for Credit
Y

Requisites
Prerequisite: LAR 725 and LAR 740
LA program students are required to obtain a "C" or better in this course.

Typically Offered
Fall, Spring

LAR 898 - Master's Report

Credits: 2

Comprehensive application of research and design study through individual studies approved by the department faculty.

Repeat for Credit
N

Requisites
Prerequisite: LAR 705 and LAR 897.
Corequisite: LAR 710. This course must be successfully taken in tandem with LAR 710, with a concurrent instructor; the failure of either requires a retake (in tandem) of both with a concurrent instructor.

Typically Offered
Spring

LAR 899 - Research in Landscape Architecture

Credits: 1-18

Investigations in landscape architecture and related areas, of such caliber as to form the basis for a graduate thesis.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing in landscape architecture.

Typically Offered
Fall, Spring, Summer

LATIN 101 - Latin I

Credits: 4

An introductory study of the structure of Latin.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

LATIN 102 - Latin II

Credits: 4

Continuation and completion of the study of the structure of Latin.

Repeat for Credit
N

Requisites
Recommended Prerequisite: LATIN 101 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

LATIN 301 - Intermediate Latin - Prose

Credits: 3

Continuation of the study of Latin syntax and grammar, based upon reading of Roman prose. Topics may include Caesar, Cicero, or Sallust.

Repeat for Credit
Y

Requisites
Prerequisite: LATIN 102.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

LATIN 302 - Intermediate Latin - Poetry

Credits: 3

The reading of Latin poetry in the original at an intermediate level. Topics may include Virgil, Ovid, and

Lucretius.

Repeat for Credit
Y

Requisites
Prerequisite: LATIN 301.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

LEAD 195 - CAT Community Connections

Credits: 1-3

Interdisciplinary course that explores the connections among two different fields, courses, or disciplines. For first-year students enrolled in a specific CAT (Connections Across Topics) Community linked to the Staley School of Leadership Studies.

Repeat for Credit
N

Typically Offered
Fall, Spring

LEAD 200 - Foundations of Leadership of Society

Credits: 1-3

Expose students to a variety of concepts, theories and skills relevant to contemporary leadership thought. Consider their personal conceptions and philosophy of leadership. Examine leadership within particular contexts such as creating change, ethical leadership, leadership and management, and historical leadership thought and leaders.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

LEAD 212 - Introduction to Leadership Concepts

Credits: 2-3

This course is organized to provide students with a broad overview of leadership theories, an introduction to ethical decision making, identification of personal leadership styles, and current societal issues for leaders.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.

LEAD 213 - Applied Leadership Skills

Credits: 3

This course provides opportunities for all interested students to be introduced to leadership skills application, with emphasis on practice in supervised clinical settings.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

LEAD 225 - Fundamentals of Global Food Systems Leadership

Credits: 3

An interdisciplinary approach to the fundamental roles people, policies, and cultures play in the global food system enterprise as it relates to sustainable food production, processing, distribution, and availability. Students will explore complexities within self, others, and community related to leadership in the context of a rapidly increasing global population.

Note
Course Description

An interdisciplinary approach to the fundamental roles

people, policies, and cultures play in the global food system enterprise as it relates to sustainable food production, processing, distribution, accessibility, and availability. Students will explore complexities within self, others, and community related to leadership in the context of an increasing global population.

Course Objectives

At the conclusion of the course, students will be able to:

Identify the fundamental systems, levels, stakeholders, and complexities of the global food system and explore their codependent nature

Provide examples of successes and limitations of governmental and non-governmental organizations in implementing change in global food systems

Examine the challenges of food abundance, food insecurity, nutrition, obesity, and poverty in global food systems

Distinguish between low-income and high-income countries and domestic and international food systems challenges

Critically reflect on leadership processes, practice, and purpose

Distinguish between the roles of authority and leadership

Recognize the necessity of working across disciplines

Name the possible multiple interpretations that exist around global food challenges

Summarize the cultural views of gender roles within food production and processing systems and the impact these values play in global food systems development efforts

Recognize different narratives about food

Describe the social, political, and economic dimensions of global food systems

Consistently articulate a broad, integrated food systems perspective focused on health, humans, agriculture, environments, communities, and economies

Examine the various global food systems through the lens of nutrition, vulnerable populations, food waste, post-harvest loss, climate change, and sustainable intensification.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
GENAG 225, DAS 225

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives

LEAD 251 - Honors Leadership I

Credits: 3

This is the first of two courses in a year-long curriculum that is designed to explore four tenets of leadership: citizenship, stewardship, humanitarianism, and purposeful passion. Students will begin to clarify and express their core values as they explore questions around effective leadership and followership concepts and strategies.

Repeat for Credit
N

Requisites
Prerequisite: Freshman standing with honors.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

LEAD 252 - Honors Leadership II

Credits: 3

This is the second of two courses in a year-long curriculum that is designed to explore four tenets of leadership: citizenship, stewardship, humanitarianism, and purposeful passion. Students will continue to explore their values and develop leadership and teamwork skills through service, reflection, and designing a purposeful passion project.

Repeat for Credit

N

Requisites
Prerequisite: LEAD 251 Honors Leadership I. Freshman standing with honors.

Must be taken in the semester immediately subsequent to LEAD 251 Honors Leadership I.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

LEAD 310 - Strengths Peer Coach Practicum

Credits: 0-3

This course is designed to help students develop the skill of coaching within the context of strengths-based leadership while serving as a strengths peer coach. Additional frameworks will include research on employee engagement, well-being, and positive psychology. Students will participate in training, peer observations, weekly seminars, reflections, and debriefs around the peer coaching experience. Students will also apply their coaching skills by holding weekly peer coaching sessions.

Repeat for Credit
N

Typically Offered
Fall or Spring

LEAD 312 - Peer Leader Practicum

Credits: 0-3

This course uses experiential learning to prepare students with the personal, relational, planning, and facilitation skills needed to effectively lead a team or organization. Weekly LEAD 212 facilitation, class preparation seminars, and peer feedback will allow for experience, reflection, meaning-making, and experimentation.

Repeat for Credit
Y

Requisites
Prerequisite: LEAD 212 - Introduction to Leadership Concepts.
Corequisite: Junior standing.

Typically Offered
Fall, Spring

LEAD 320 - Theories of Leadership

Credits: 3

This course provides an overview of the major theories of leadership and the empirical and theoretical evidence supporting those theories. Students will demonstrate an understanding of the theories and the empirical evidence supporting them as well as develop their ability to critically assess the theoretical and empirical work surrounding leadership theories and models.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Social Sciences

LEAD 325 - Uncertainty in Global Food Systems Leadership

Credits: 3

Explore technical and adaptive elements of grand challenges across disciplines. This course addresses the impact of cultural identity, life experience, and world views on leadership relationships as it relates to privilege and inclusion in the context of global food systems. Students will consider elements of community-engaged work.

Repeat for Credit
N

Requisites
Prerequisite: GENAG 225 or LEAD 225 or DAS 225.

Typically Offered
Spring

Cross-listed
GENAG 325, DAS 325

K-State 8
Global Issues and Perspectives

LEAD 350 - Culture and Context in Leadership

Credits: 3

Opportunity to integrate the course and leadership experiences in light of contemporary issues in the study of leadership behavior across cultures and contexts. Based on the current research and writing that introduce and discuss the impact of culture and context on the concept of leadership and development of individuals as interculturally competent leaders.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

LEAD 399 - Internships for Career Development

Credits: 1-2

This course helps you apply your academic knowledge, skills and understanding to experiences as a developing leader within the workplace. The course is structured to incorporate your internship experience with self-directed analysis to develop your personal, academic and professional competencies. You will practice and reflect on your leadership strengths.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

LEAD 405 - Leadership in Practice

Credits: 3

This course provides an opportunity to practice leadership and followership in an experiential setting followed by an in-depth classroom discussion.

Repeat for Credit
Y

Requisites
Prerequisite: LEAD 212, LEAD 350, and junior standing.

Typically Offered
Fall, Spring, Summer

LEAD 420 - Theories of Nonprofit Leadership

Credits: 3

This course provides an overview of nonprofit organization leadership by integrating concepts and theories with applied practice. Students will demonstrate an understanding and application of competencies (knowledge and skills) necessary for professional success as a nonprofit organization leader.

Repeat for Credit
N

Typically Offered
Fall, Spring

LEAD 425 - Global Food Systems Leadership in Action

Credits: 3

In this capstone course, students will conduct a community-engaged global food systems leadership research/service project. Emphasis will be placed on data collection, analysis and dissemination to appropriate audiences. Additional emphases will be on ethical dimensions of leadership and individual exploration of careers and roles within global food systems.

Repeat for Credit
N

Requisites
Prerequisite: GENAG 325 or LEAD 325 or DAS 325.

Typically Offered
Fall

Cross-listed
GENAG 425

K-State 8
Global Issues and Perspectives

LEAD 430 - Women and Leadership

Credits: 3

This course addresses issues related to leadership as it intersects with women's studies scholarship, such as: women's styles of leadership, women and competition, sexism in the workplace, gender differences in communication, and feminist models of leadership. This course will explore issues related to women's leadership development in the theoretical contexts of leadership studies and women's studies.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 212 or WOMST 105.

Typically Offered
Fall, Spring, Summer

K-State 8
Historical Perspectives
Human Diversity within the U.S.

LEAD 450 - Capstone in Leadership

Credits: 3

In this capstone course students will integrate and apply learning from the minor. Emphasis will be on the clarification of the students' personal values, their evaluation of codes of ethics for organizations in their proposed professions, and their analysis of current events through the lens of ethical dimensions of leadership.

Repeat for Credit
Y

Requisites
Prerequisite: LEAD 212, LEAD 350, LEAD 405

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

LEAD 489 - Seminar in International Service-Learning

Credits: 0-3

This course is the first phase of the International Service Teams service-learning program. Learning in the course facilitates preparation for the summer service experience. This course is designed around the PARE service-learning model; both the curriculum and class expectations will be reflective of the service-learning process.

Repeat for Credit
N

Requisites
Prerequisite: Students must complete a program application, interview, and be accepted into the International Service Team program prior to enrollment in the course.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

LEAD 499 - Nonprofit Organization Internship

Credits: 3

This course provides a capstone opportunity for students in the nonprofit leadership focus of the leadership studies minor to document and present their achievement of the foundation and professional development competencies required by American Humanics national certification in nonprofit leadership through coursework, co-curricular and work experiences, and their 300-hour internship experience. Current texts focusing on the leadership of high impact nonprofit organizations will be incorporated into this process.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 350, LEAD 420.

Typically Offered
Other

LEAD 502 - Independent Study in Leadership Studies

Credits: 0-3

Selected topics in leadership studies.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of department chair.

Typically Offered
Fall, Spring, Summer

LEAD 510 - Foundations of Community-Engaged Leadership

Credits: 3

This course integrates leadership theory and practice exploring principles, purposes, and processes of community engagement and democratic practice. Utilizing service-learning methods, students will partner with community to consider and examine foundational forms of civic and public life. Community paradigms will be explored and deconstructed in relation to course themes.

Repeat for Credit
N

Typically Offered
Fall

LEAD 515 - Teaching Leadership

Credits: 0-3

Preparing people for leadership in a diverse and changing world requires new thinking and approaches to leadership learning and development. Learners will explore philosophies, frameworks, and strategies for designing, delivering, and assessing leadership courses and programs in educational (curricular and co-curricular), workplace, and civic contexts. Learners will develop a philosophy of leadership teaching statement and create a contextually and culturally relevant curricular design document (e.g., class syllabus or program outline). We will serve and attract learners who are working in the field of leadership studies and programs, or aspiring leadership educators.

Note
This course will be listed as 715 at the graduate level.

Repeat for Credit
Y

Typically Offered
Fall, Spring

LEAD 520 - Approaches to Community-Engaged Leadership

Credits: 3

Through theory and practice, students consider the ethical dimensions of leadership in relation to community systems, organizations, and institutions. Students will deconstruct concepts of community-engaged leadership including race, class, gender, justice, and power. Through service-learning, students will work with partners to understand community systems, organizations, and institutions.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 510.

Typically Offered
Spring

LEAD 560 - Experiences in Community-Engaged Leadership

Credits: 6

In this capstone experience students design, plan, execute, and evaluate a community-engaged research project. The project will be consistent with the principles of community engagement and the purposes and process of democratic practice. Students will exercise leadership with community partners to build capacity for systemic change.

Repeat for Credit
N

Requisites
Prerequisites: LEAD 510 and LEAD 520.

Typically Offered
Spring

LEAD 700 - Nonprofit Leadership Concepts

Credits: 3

Explores the unique facets of nonprofits and how to

establish vision, mission, and practices that best position organizations to build leadership capacity for community change. Leadership within the nonprofit sector has unique considerations separate from those in governmental or business organizations including democratic governance, championing a cause, volunteer leadership, and mission-driven organizational design.

Repeat for Credit
N

Typically Offered
Fall or Spring

LEAD 701 - Foundations of Leadership

Credits: 3

Study of the key issues in the theory, research, and application of leadership in organizations. This includes defining leadership, understanding situational characteristics that facilitate / hinder effective leadership, understanding effective / dysfunctional leadership, and gaining greater insight into one's own leadership style and functioning.

Repeat for Credit
Y

Typically Offered
Fall, Spring

LEAD 708 - Facilitating Leadership in Complex Adaptive Systems

Credits: 3

This course surveys the theory and practice of facilitating leadership activity in Complex Adaptive Systems through various process models and approaches to practice.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
N

LEAD 715 - Teaching Leadership

Credits: 0-3

Preparing people for leadership in a diverse and changing world requires new thinking and approaches to leadership learning and development. Learners will explore philosophies and frameworks **of leadership and leadership development, as well as** strategies for designing, delivering, and assessing leadership courses and programs in educational (curricular and co-curricular), workplace, and civic contexts. Learners will develop a leadership teaching philosophy statement and create a contextually and culturally relevant **leadership curriculum** design document (e.g., class syllabus or program outline).

Updated 3.25.24 after feedback from Dr. Collins in EdLea

Note
This course can be taken as LEAD 515 or LEAD 715 based on UG or GRAD status. LEAD 515 has been approved.

Repeat for Credit
Y

Typically Offered
Fall or Spring

LEAD 720 - Leadership Coaching

Credits: 0-3

This course develops practices of coaching, listening, and empathy for leadership and examines current theory and practice around coaching as a leadership practice. Coaching frameworks from the field of leadership will be examined through the lens of contemporary theories and frameworks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

LEAD 750 - Leading Change

Credits: 3

This course introduces theoretical and practical leadership frameworks for understanding and responding to local and global challenges of sustainable development. Students in the course will learn and apply effective leadership processes and develop individual capacity for leading change.

Note
Impact Report for LEAD 750
There are no results for this report.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

LEAD 755 - Systems Leadership

Credits: 3

This course examines theories and approaches to leadership through a systems lens, a critical approach to leading complex organizations and addressing global challenges. Learners will develop an in-depth understanding of systems dynamics and gain skills necessary to navigate and influence systems effectively. The course will equip learners with capacities to catalyze, enable, and support processes of systems-level change in their own organizations and society.

Repeat for Credit
N

Typically Offered
Fall or Spring

LEAD 799 - Practicum in Leadership for Conflict Transformation

Credits: 3

In this capstone seminar, participants will explore culminating perspectives and reflect on learning related to leadership, conflict transformation, and change. Participants will complete a final portfolio representing a trajectory of learning. They will synthesize key learning from the program, describe practical implications from prior learning, and design future application goals to support the practice of leadership, conflict transformation, and change in their personal lives and professional careers.

Note
Intended for students in Leadership for Conflict Transformation masters program.

Repeat for Credit
N

Requisites
Prerequisite: LEAD 701 (or 801)
Prerequisite: LEAD 750
Prerequisite: LEAD 755

Typically Offered
Fall or Spring

LEAD 814 - Graduate Studies in Leadership Communication

Credits: 3

This course examines the intersections of community-engaged scholarship and leadership through practices of relationship, story, strategy, and action. Students are introduced to resources and opportunities for pursuing public engagement, community-engaged scholarship, and successful program completion.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
AGCOM 814, COMM 814

LEAD 815 - Seminar in Leadership Communication

Credits: 1

This seminar provides doctoral students opportunities for collaboration and mentorship with peers, faculty, and visiting scholars, and exploration of career pathways in public engagement.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

Cross-listed
AGCOM 815, COMM 815

LEAD 818 - Qualitative Approaches to Studying Leadership and Engagement

Credits: 3

This course is designed to provide students a survey of community-engaged and qualitative approaches to studying leadership and engagement process and practice in community and organizations.

Repeat for Credit
N

Typically Offered
Fall or Spring

Cross-listed
NA

LEAD 820 - Contemporary Perspectives on Leadership Theory and Practice

Credits: 3

This course is designed to build students' capacity to engage with leadership theory as critical learners. Students will explore ideas, philosophical assumptions, and practices associated with the term "leadership" as a concept through theories that have developed over time. We will also examine how the practice of leading in contemporary contexts can be understood through theories.

Repeat for Credit
N

Typically Offered
Fall

LEAD 845 - Approaches to Public/Community Engagement

Credits: 3

The course will provide students a survey of key concepts and theoretical frameworks associated with deliberative democracy and public engagement. A specific focus will be given to how forms of community-engaged scholarship intersect course content in both theory and practice.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
AGCOM 845, COMM 845

LEAD 886 - Seminar in Leadership Studies

Credits: 1-3

Seminar in Leadership Studies.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
AGCOM 886, COMM 886

LEAD 945 - Social Science Research for Public Problem Solving

Credits: 3

The study of how social science research and social sector evaluation can be applied to address public problems, including the identification of public problems and the critique of current evaluation methods, and applying concepts by developing an evaluation including quantitative and qualitative analysis in partnership with social sector partners.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
AGCOM 945, COMM 945

LEAD 999 - Research in Leadership Communication

Credits: 1-15

Doctoral research demonstrates the candidate's ability to conduct significant original research related to leadership and communication, to analyze the information obtained from the research, and to present the results in a dissertation format appropriate to the field.

Repeat for Credit

Y

Typically Offered
Fall, Spring, Summer

Cross-listed
AGCOM 999, COMM 999

MANGT 220 - Principles of Management

Credits: 3

Provides an introduction to the four basic managerial functions of planning, organizing, leading and controlling and their application to today's complex work environment. An emphasis is placed on the roles and responsibilities of managers that help them to successfully meet organizational objectives by effectively leading employees and optimizing processes.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MANGT 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MANGT 491 - International Management Experience

Credits: 3

This course is designed to provide students with an opportunity to observe international business and management perspectives by participating in a field trip outside the United States. This experiential course may involve a combination of business visits, cultural experiences, internship activities, applied research projects, personal reflection exercises, or other learning activities while abroad.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives

MANGT 495 - Management Internship

Credits: 1-3

Applied management business experience designed to coordinate the interests of students and firms.

Repeat for Credit
Y

Requisites
Prerequisite: MANGT 220 or consent of instructor.

Typically Offered
Fall, Spring, Summer

MANGT 497 - Topics in Management

Credits: 1-3

Discussion and analysis of current issues in management, including topics related to new theory, the practice of management, and management development.

Repeat for Credit
Y

Typically Offered
On sufficient demand

MANGT 498 - Independent Studies in Management

Credits: 1-6

In-depth analysis of special problems in management including study of current literature.

Repeat for Credit
Y

Requisites
Prerequisite: MANGT 220 or consent of department head.

Typically Offered
On sufficient demand

MANGT 515 - Managerial Consulting

Credits: 3

This course provides an overview of the management consulting process. Students will learn how to apply consulting tools and frameworks to engage clients, analyze organizational problems, formulate and present recommendations, and implement change initiatives. The content is relevant to anyone interested in analyzing internal business opportunities, tasked with managing organizational change, or those pursuing traditional consulting careers.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220 or Junior standing.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MANGT 522 - Operations Planning and Control

Credits: 3

Development of concepts and understanding of planning and control systems for allocating resources and scheduling activities in business firms. To guide and coordinate the flow of materials, labor inputs, and goods and services through physical productive systems. Topics include: aggregate planning, master production scheduling, production activity planning and control, operations information systems, inventory control, material requirements planning, and total quality control.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 421.

Typically Offered
On sufficient demand

MANGT 523 - Human Resources Analytics

Credits: 3

Explores using data analytics to examine Human Resource Management issues in organizations. A diverse set of research methods and analytic techniques will be used to collect, organize, analyze, and visualize data to examine problems and formulate solutions that can help organization better manage their HR processes.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or consent of department head

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MANGT 525 - Organizational Management and Data Analytics

Credits: 3

Provides students with new knowledge and capability in the use of a diverse set of research methods and data analytic techniques to collect, organize, analyze, and visualize data to examine organizational management problems and present solutions that can help create a sustainable competitive advantage.

Note
MANGT 366 or consent of department head

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or consent of department head

Typically Offered
Fall, Spring

K-State 8

MANGT 580 - K-State MIS: Health Info Sys Portfolio I

Credits: 9

This course serves a mechanism to indicate students have completed a series of Health Information Systems courses at Johnson County Community College in the process of completing their Associate's Degree. It is used solely for transfer credit tracking and fulfills the thematic sequence requirement in the College of Business. Students cannot enroll in this class nor can this course be transferred into programs other than Management Information Systems in the College of Business Administration.

Repeat for Credit
N

Requisites
Prerequisite: Associates Degree in Health Information Systems from JCCC.

Typically Offered
Fall, Spring, Summer

MANGT 581 - K-State MIS: Health Info Sys Portfolio II

Credits: 15

This course serves a mechanism to indicate students have completed a series of Health Information Systems courses at Johnson County Community College in the process of completing their Associate's Degree. It is used solely for transfer credit tracking and fulfills the unrestricted electives requirement in the College of Business. Students cannot enroll in this class nor can this course be transferred into programs other than Management Information Systems in the College of Business Administration.

Repeat for Credit
N

Requisites
Prerequisite: Associates Degree in Health Information Systems from JCCC.

Typically Offered
Fall, Spring, Summer

MANGT 590 - International Management

Credits: 3

Analysis of the political, legal, economic, and sociocultural environments and how they influence international management decisions such as timing and place of foreign market entry, mode of entry, and formulations and implementation of international strategies. Students develop the knowledge and skills necessary for managing international operations including cross-cultural communication, negotiations, ethical decision making, leadership, staffing, and workforce motivation..

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220 or Junior standing.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

MANGT 595 - Strategic Management

Credits: 3

Undergraduate capstone course that requires integration of knowledge gained in prior functional coursework and application of strategic management concepts to develop value-creating solutions to business challenges. Students develop the knowledge and skills necessary to identify and analyze strategic issues, formulate strategic plans, and implement strategic initiatives within organizations.

Note
Open only to students with 75 credit hours or non-business graduate students.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450 and MANGT 220 and MKTG 250 and 75 credit hours and admitted in a College of Business Administration major (ACCTG, ENTRP, FINAN, GENBA, MANGT, MIS, MKTG, PSS).

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MANGT 596 - Business Ethics and Corporate Citizenship

Credits: 3

Delivers a managerial perspective on how corporations can fulfill their economic, legal, ethical, and philanthropic responsibilities to a broad array of business stakeholders.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220, MKTG 250, and senior-level students admitted in a College of Business Administration degree track (major).

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

MANGT 610 - Managing for Sustainability: Strategy, Investing, and Impact

Credits: 3

Examines how organizations create long-term value for stakeholders and society through environmental, social, and governance (ESG) strategy, investment, and impact. Students explore the concept of business sustainability from an applied perspective, to understand better how economic, human, and natural environmental systems are interlinked. Specific topics include the formulation and implementation of ESG strategies within organizations, managing relationships with stakeholders, and the measurement and disclosure of ESG impact.

Repeat for Credit
N

Typically Offered
On sufficient demand

MANGT 623 - Compensation and Performance Management

Credits: 3

An in-depth analysis of compensation system design and performance management strategies needed to attract, retain, develop and motivate the human capital required for organizational effectiveness and strategic success.

Repeat for Credit
N

Requisites
Corequisite: MANGT 531.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

MANGT 630 - Sports Management

Credits: 3

An exploration into management issues associated with professional and amateur sports. Major topics include strategic planning, operational planning, human resource management, team management, leadership, communication, and diversity all in the context of sports.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220 or MKTG 250 or Junior standing.

Typically Offered
Fall, Spring

MANGT 633 - Advanced Human Resource Management

Credits: 3

An in-depth analysis of selected topics in human resource management including study of current research and literature.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 531.

Typically Offered
On sufficient demand

MANGT 643 - Organizational Staffing

Credits: 3

Focuses on recruitment, selection, and retention issues, including an in-depth consideration of legal and practical issues involved in the acquisition and retention of human resources. Detailed coverage of job analysis, criterion development, recruitment strategies, and techniques and procedures for ensuring valid and effective selection of employees.

Repeat for Credit
N

Requisites
Corequisite: MANGT 531.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MANGT 652 - Constraint Management and Continuous Improvement

Credits: 3

The intent of this course is to provide an overview of the application of Theory of Constraints (TOC). TOC suggests that every process or system has at least one constraint that prevents the operation from being more efficient. TOC offers methodologies that are specifically developed to identify and manage constraints to enable the operation to achieve its goals. Students will be taught the skills required for the identification and management of constraints within an operation system.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220, MANGT 421, MANGT 521.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

MANGT 660 - Supply Chain Planning and Control

Credits: 3

Provides a framework of how the demand side of the supply chain should interface with supply side in the context of global manufacturing and service. Topics include: layout/process design and control, capacity planning, master scheduling, materials requirement, coordination, and revenue management.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 421 or graduate school status

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MANGT 662 - Procurement, Logistics and Supply Chain Design

Credits: 3

Addresses the interrelationship between operations and other functions required to deliver value to the end customer of a supply chain. Topics include: strategic procurement and purchasing operations and process, sourcing decisions, location strategies, distribution network design, global supply chain network design, and supply chain risk management.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 421 or graduate school status.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

MANGT 663 - Supply Chain Analytics

Credits: 3

The objective of this course is to introduce models and tools to effectively manage a supply chain that purchase, produce, and distribute products. Topics include: forecasting, production and logistics, and inventory management. We illustrate the effectiveness of these models and tools using real-life cases and examples drawn from diverse industries.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 421 or graduate school status

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning

MANGT 710 - Operations and Supply Chain Management

Credits: 3

The study of the role of operations systems in the provision of value for the customer. Operations systems design, capacity determination, resource requirements planning and control, theory of constraints, supply chain management, quality management and control and project management are discussed and analyzed.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 351 or STAT 702.

Typically Offered
Spring

MANGT 720 - Managing Organizational Behavior

Credits: 3

An in-depth analysis of the development of the behavioral bases of individual and group behavior in business, governmental, educational, and other organizations with emphasis on current research literature and applications.

Repeat for Credit
Y

Requisites
Prerequisite: Open only to students in graduate business degree or certificate programs or with permission of the instructor.

Typically Offered
Fall, Summer

MANGT 725 - Organizational Management and Data Analytics

Credits: 3

This course exposes students to a diverse set of research methods and data analytic techniques used to address organizational management problems. Students engage in experiential learning to develop their capabilities in collecting, organizing, analyzing, and visualizing data, making inferences from data analytic processes, and communicating solutions to organizational stakeholders through storytelling.

Repeat for Credit
N

Typically Offered
Spring

MANGT 815 - Advanced Managerial Consulting

Credits: 3

This course provides an overview of the management consulting process. Students will learn how to apply consulting tools and frameworks to engage clients, analyze organizational problems, formulate and present recommendations, and implement change initiatives. The content is relevant to anyone interested in analyzing internal business opportunities, tasked with managing organizational change, or those pursuing traditional consulting careers.

Repeat for Credit
N

Typically Offered
Spring

MANGT 825 - Advanced Business Law

Credits: 3

A study of civil law as it affects commercial transactions, including corporations, partnerships, property, commercial paper, and secured transactions.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate student standing.

Typically Offered
Spring

MANGT 840 - Advanced Entrepreneurship

Credits: 3

An in-depth examination of the nature of entrepreneurship including success factors, the requirements of successful new venture planning and implementation, and researching the current literature in the field. The study of new product identification, the assessment of commercial potential, and the elements of an effective business plan will be examined in detail, culminating in the preparation of a comprehensive plan for the development and marketing of a new product or service.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 715, MANGT 720, and MKTG 890.

Typically Offered
On sufficient demand

MANGT 845 - Technology Entrepreneurship and Strategy

Credits: 3

In this course the student will learn how to recognize and screen technology opportunities in diverse areas such as telecommunications to biotechnology; learn the intricacies of intellectual property creation, protection and acquisition; effectively implement the commercialization process. A major objective of the course is to help students realize that technology may be the most under-utilized asset in either the private or public sector yet, in the form of licenses or rights to use, can be sold repeated with a relatively low cost of goods sold, resulting in a continual stream of income.

Repeat for Credit
Y

Typically Offered
On sufficient demand

MANGT 853 - Business Project Management

Credits: 3

Provides an in-depth coverage of project management concepts and methodolgogies required for service and manufacturing operations. Topics to be covered include, but are not limited to: project selection and evaluation, project dynamics, motivation and evaluation of project team members, project scheduling, project budgeting, and project closure.

Note
This course is restricted to students in graduate business degree. Students from other programs must receive permission from the College of Business Graduate Program Coordinator.

Repeat for Credit
N

Requisites
Prerequisites: Open only to students in graduate business degree.

Typically Offered
Fall, Spring

MANGT 860 - Managing the Triple Bottom Line Business

Credits: 3

Examines how organizations can deliver sustainable social, environmental, and economic benefits to a plurality of stakeholders. Topics include best practices for business ethics, corporate social responsibility, and triple bottom line management.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 710, FINAN 715, MKTG 705, MANGT 710, MANGT 720, MIS 830, ECON 815 and STAT 703.

Typically Offered
Fall, Spring

MANGT 867 - Enterprise Information Systems Management

Credits: 3

Concepts and information resource management techniques are integrated into a conceptual framework of enterprise information systems. The impact of current issues and new technologies on business is emphasized through discussion and application.

Repeat for Credit
Y

Typically Offered
Spring

MANGT 870 - Managing Animal Health Organizations

Credits: 3

Relevant theoretical concepts will be drawn from strategic management, management of change, human resource management, and the management of innovation to provide and intellectual grounding for understanding industry dynamics and the analysis of contemporary managerial challenges and issues for organizations in the animal health industry. Special emphasis will be given to proposing strategic solutions to solve major problems that companies face in the animal health corridor.

Repeat for Credit
N

Typically Offered
Other

MANGT 880 - Strategic Management

Credits: 3

Graduate capstone course that requires integration of knowledge gained in prior functional coursework and application of strategic management concepts to develop value-creating solutions to business challenges. Students develop the knowledge and skills necessary to identify and analyze strategic issues, formulate strategic plans, and implement strategic initiatives within organizations.

Repeat for Credit
Y

Requisites
Prerequisite: ACCTG 710, FINAN 715, MKTG 705, MANGT 710, MANGT 720, MIS 830, ECON 815, and STAT 703.

Typically Offered
Fall

MANGT 890 - International Management

Credits: 3

Analysis of the political, legal, economic, and sociocultural environments and how they influence international management decisions such as timing and place of foreign market entry, mode of entry, and formulation and implementation of international strategies. Students develop the knowledge and skills necessary to more effectively manage the international operations of organizations.

Repeat for Credit
N

Typically Offered
Fall, Spring

MANGT 892 - International Operations Management

Credits: 3

Explores the global market context and the environment for multinational operations. Examines important tools, concepts, theories, models, and structures as defined and applied to manufacturing and service operations in other countries. Emphasis is placed on Japanese technology and practices. It draws upon those aspects of manufacturing and service operations that can help U.S. firms become increasingly competitive worldwide.

Repeat for Credit
Y

Requisites
Prerequisite: MANGT 590 and MANGT 710.

Typically Offered
On sufficient demand

MANGT 893 - Management Science

Credits: 3

The application of management science methods to business problems to provide a basis for rational decision making. Includes mathematical programming, inventory theory, simulation, model building, and heuristics.

Repeat for Credit
Y

Requisites
Corequisite: MATH 205, STAT 351 or STAT 702

Typically Offered
On sufficient demand

MANGT 897 - Topics in Management Contemporary Issues in Management

Credits: 3

Discussion and analysis of contemporary issues in management, including applications, development and study of relevant literature and research findings.

Repeat for Credit
Y

Requisites
Prerequisite: MANGT 720, MANGT 710 and MANGT 830.

Typically Offered
Spring

MANGT 898 - Special Problems in Management

Credits: 1-18

As scheduled. An in-depth study of specified topics.

Note
Consent of the instructor

Repeat for Credit
Y

Typically Offered
Other

MATH 010 - Intermediate Algebra

Credits: 3

Preparatory course for MATH 100. Includes arithmetic (signed numbers, polynomials, algebraic fractions, exponents, and roots), solutions to equations (linear, quadratic, polynomial, root, and fractional), graphs (linear and quadratic), and geometry (area, perimeter, and the Pythagorean Theorem).

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MATH 011 - Intermediate Algebra Review

Credits: 2

Supplemental algebra lab that is required to be taken in conjunction with MATH 010.

Note
Two hours recitation a week. The student will receive 2 hours credit which will not count toward graduation.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MATH 020 - College Algebra Review

Credits: 2

Supplemental algebra lab to be taken in conjunction with MATH 100 for students who need additional instruction in algebra.

Note
Two hours recitation a week. Students are placed in this course on the basis of their score on the placement exam. The student will receive 2 hours credit which will not count toward graduation.

Repeat for Credit
N

Typically Offered
Fall, Spring

MATH 100 - College Algebra

Credits: 3

Fundamental concepts of algebra; algebraic equations and inequalities; functions and graphs; zeros of polynomial functions; exponential and logarithmic functions; systems of equations and inequalities.

Repeat for Credit
N

Requisites
Prerequisite: A test score equal to or greater than, Math ACT 22 OR Math SAT 540 OR ALEKS PPL 46 OR Accuplacer QAS 326; OR (HS GPA 3.25 AND grade of B- or better in Algebra 2 or Integrated Math 3).

Typically Offered
Fall, Spring, Summer

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 101 - College Algebra Support

Credits: 2

Note: College Algebra Support credits cannot count towards the 120 credits of the degree program. This course was designed through the Kansas Board of Regents Math Pathways initiative. Students who do not meet one of the multiple placement measures must enroll concurrently in MATH 101 and MATH 100.

College Algebra Support is the corequisite support course for MATH 100 - College Algebra. The support course provides additional review of the background knowledge and foundational skills which promote student success in MATH 100. The content of MATH 101 is directly aligned with the course objectives of MATH 100.

Note
MATH 101 is the KBOR math pathways corequisite course for the college algebra course. Students that do not meet any of the KBOR multiple placement measures must also enroll in MATH 101 as the corequisite course to MATH 100.

Repeat for Credit
N

Requisites
Corequisite: MATH 100

Typically Offered
Fall, Spring, Summer

MATH 150 - Plane Trigonometry

Credits: 3

Trigonometric and inverse trigonometric functions; trigonometric identities and equations; applications involving right triangles and applications illustrating the laws of sines and cosines.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 100; OR a test score equal to or greater than, MATH ACT 24 OR MATH SAT 590 OR ALEKS PPL 61 OR Accuplacer QAS 270, OR (HS GPA 3.5 AND grade of A- or better in Algebra 2).

Typically Offered
Fall, Spring, Summer

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 151 - Applied Plane Trigonometry

Credits: 2-3

Trigonometry and inverse trigonometric functions, trigonometric identities and equations; applications involving right triangles and applications illustrating the laws of sines and cosines. Emphasis is placed on applications to engineering technology, tool and machine design.

Note
Two hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 160 - Introduction to Contemporary Mathematics

Credits: 3

Mathematics as used in the contemporary world. Combinatorics and probability; descriptions of data; graph theory; and various additional topics selected by the individual instructors.

Repeat for Credit
N

Requisites
Prerequisite: A test score equal to or greater than, Math ACT 19 OR Math SAT 510 OR ALEKS PPL 30 OR Accuplacer QAS 255, OR (HS GPA 3.00 AND grade of C- or better in Algebra 2 or Integrated Math 3) OR MATH 100.

Typically Offered
Fall, Spring

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 161 - Contemporary Mathematics Support

Credits: 1

Note: Contemporary Mathematics Support credits cannot count towards the 120 credits of the degree program. This course was designed through the Kansas Board of Regents Math Pathways initiative. Students who do not meet one of the multiple placement measures must enroll concurrently in MATH 161 and MATH 160.

Contemporary Mathematics Support is the corequisite support course for MATH 160 - Contemporary Mathematics. The support course provides additional review of the background knowledge and foundational skills which promote student success in MATH 160. The content of MATH 161 is directly aligned with the course objectives of MATH 160.

Note
MATH 161 is the KBOR math pathways corequisite course for the contemporary math course. Students that do not meet any of the KBOR multiple placement measures must also enroll in MATH 161 as the corequisite course to MATH 160.

Repeat for Credit
N

Requisites
Corequisite: MATH 160

Typically Offered
Fall or Spring

MATH 199 - Undergraduate Mathematics Seminar

Credits: 1-5

Topics of special interest to undergraduates in mathematics, including orientation to the mathematics curriculum, possible careers in mathematics, and cultural and professional aspects of mathematics.

Repeat for Credit
Y

Typically Offered
Fall

MATH 205 - General Calculus

Credits: 3

Introduction to calculus concepts that are particularly useful to the study of economics and business administration with special emphasis on working problems.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 100 OR MATH 120 OR MATH 150; OR a test score equal to or greater than MATH ACT 24 OR MATH SAT 590 OR ALEKS PPL 61 OR Accuplacer QAS 270, OR (HS 3.5 AND grade of A- or better in Algebra 2).

Typically Offered
Fall, Spring

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 210 - Technical Calculus I

Credits: 3

A condensed course in analytic geometry and differential calculus with an emphasis on applications.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
3 Math and Statistics

MATH 211 - Technical Calculus II

Credits: 3

A continuation of MATH 210 to include integral calculus with an emphasis on application.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
3 Math and Statistics

MATH 215 - Calculus I

Credits: 5

Course content includes a brief review of pre-calculus materials of algebra and trigonometry, functions, limits, differentiation, applications of differentiation, integration, and applications of the definite integral. Theory is presented in a style tailored for first-semester students of mathematics.

Note
Five hours recitation a week.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 216 - Calculus II

Credits: 5

An extension of MATH 215, Calculus I, to include integration, differentiation, and applications of transcendent functions.

Note
Five hours recitation a week.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 220 - Analytic Geometry and Calculus I

Credits: 4

Analytic geometry, differential and integral calculus of algebraic and trigonometric functions.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 120 OR MATH 150; OR a test score equal to or greater than MATH ACT 28 OR MATH SAT 660 OR ALEKS PPL 76 OR Accuplacer QAS 280, OR HS Precalc grade of A- or better OR HS Calc grade of B- or better.

Typically Offered
Fall, Spring, Summer

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 221 - Analytic Geometry and Calculus II

Credits: 4

Continuation of MATH 220 to include transcendental functions, techniques of integration, and infinite series.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 220 OR MATH 250 OR Calculus AB AP score of 3 or above.

Typically Offered
Fall, Spring, Summer

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

MATH 222 - Analytic Geometry and Calculus III

Credits: 4

Continuation of MATH 221 to include functions of more than one variable.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251 OR Calculus BC AP score of 3 or above.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 250 - Mathematical Scholars Calculus 1

Credits: 4

A rigorous introduction to the central ideas and techniques of calculus where students will be exposed to both the computational and conceptual underpinnings of calculus including functions, graphs, limits, continuity, derivatives and integrals. Enrollment is not restricted to students in the Mathematical Scholars Program.

Note
Cannot be taken for credit if credit has been received for MATH 220. Permission of the Mathematical Scholars Director or Enrollment in the Program

Repeat for Credit
N

Typically Offered
Fall

K-State Core
3 Math and Statistics

K-State 8
Ethical Reasoning and Responsibility

MATH 251 - Mathematical Scholars Calculus 2

Credits: 4

A continuation of MATH 250 where students will be

trained in both the computational and conceptual underpinnings of calculus including techniques of integration, transcendental functions, infinite sequences and infinite series.

Note
Cannot be taken for credit if credit has been received for MATH 221.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 250.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MATH 312 - Finite Applications of Mathematics

Credits: 3

Systems of equations, vector operations, linear algebra, and linear programming. Practice in setting up, solving, and interpreting mathematical models which arise in social sciences and business.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 100 OR MATH 120 OR MATH 150 OR MATH 205 OR MATH 220.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MATH 313 - Computational Number Theory

Credits: 3

Topics in number theory selected from: divisibility, primes, modular arithmetic and special types of numbers. Emphasis is on computations. Primarily for prospective elementary school teachers of mathematics.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing, MATH 100.

Typically Offered
Spring

MATH 320 - Mathematics for Elementary School Teachers I

Credits: 3

Mathematical problem solving and reasoning, development of whole number concepts and the whole number system, computation and estimation with whole numbers, number patterns and number theory, integers, fractions and rational numbers, decimals and real numbers, geometry and measurement.

Note
For education majors only.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 100.

Typically Offered
Fall, Spring

MATH 330 - Intuitive Geometry

Credits: 3

Geometric figures and patterns, properties of geometric figures, transformation and coordinate geometry, measurement.

Repeat for Credit
N

Requisites
Prerequisite: MATH 320.

Typically Offered
Spring

MATH 340 - Elementary Differential Equations

Credits: 4

Elementary techniques for solving ordinary differential equations and applications to solutions of problems in science and engineering.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 350 - Mathematical Scholars Calculus 3

Credits: 5

A continuation in the sequence of courses focused on Calculus. Provides the first semester of an integrated approach to linear algebra, multivariable calculus, and ordinary differential equations with specific topics including vector spaces, linear transformations, solutions to matrix equations, dimension, rank, eigenvalues, inner products, Sylvester's Theorem, multi-linear algebra, vector valued functions, vector fields and general ordinary differential equations.

Note
Cannot be taken for credit if credit has been received for MATH 551.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 251 OR Permission of the Mathematical Scholars Director

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MATH 351 - Mathematical Scholars Calculus 4

Credits: 5

A continuation in the sequence of courses focused on Calculus. Provides the second semester of an integrated approach to linear algebra, multivariable calculus, and ordinary differential equations. Students will apply knowledge from one variable calculus and linear algebra to the higher dimensional setting, but many computations will take place in the low 2 and 3 variable cases. Topics include linear ordinary differential equations, Picard's Theorem, limits and continuity in many variables, partial derivatives, optimization problems, integration of functions of several variables, Fubini's Theorem, integration of differential forms and Generalized Stokes' Theorem.

Note
Cannot be taken for credit if credit has been received for MATH 222 or 340.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 350.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MATH 395 - Academic Excellence Workshop

Credits: 1-2

This course provides enriched supplementary instruction to selected students enrolled in selected lower-division courses.

Repeat for Credit
Y

Requisites
Prerequisite: Concurrent enrollment in qualifying lower-division mathematics course and written permission of instructor.

Typically Offered
Other

MATH 399 - Honors Seminar in Mathematics

Credits: 1-3

Honors Seminar in Mathematics

Repeat for Credit
Y

Requisites
Prerequisite: Membership in honors program.

Typically Offered
Other

MATH 498 - Honors Project

Credits: 3

Open only to Arts and Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Other

MATH 499 - Undergraduate Topics in Mathematics

Credits: 1-18

Reading courses in advanced undergraduate mathematics.

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for topic undertaken and consent of instructor.

Typically Offered
Fall, Spring, Summer

MATH 500 - Mathematical Theory of Interest

Credits: 3

Extensive introduction to the mathematical theory of interest with applications to the field of actuarial science. Prepares students to take the second professional examination administered by the Society of Actuaries and the Casualty Actuarial Society.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MATH 501 - Mathematical Foundations of Actuarial Science

Credits: 3

Introduction to calculus-based applications and models with an emphasis on applications to insurance. Prepares students to take the first professional examination administered by the Society of Actuaries and Casualty Actuarial Society.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351 AND corequisite STAT 510 OR STAT 610.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MATH 506 - Introduction to Number Theory

Credits: 3

Divisibility properties of integers, prime numbers, congruences, multiplicative functions.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Spring

MATH 510 - Discrete Mathematics

Credits: 3

Combinatorics and graph theory. Topics selected from counting principles, permutations and combinations, the inclusion-exclusion principle, recurrence relations, trees, graph coloring, Eulerian and Hamiltonian circuits, block designs, and Ramsey Theory.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 511 - Introduction to Algebraic Systems

Credits: 3

Properties of groups, rings, domains and fields. Examples selected from subsystems of the complex numbers, elementary number theory, and solving equations.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall, Spring

MATH 512 - Introduction to Modern Algebra

Credits: 3

Introduction to the basic algebraic systems, viz., groups, rings, integral domains, and fields, often drawing from elementary number theory. Special emphasis will be given to methods of theorem proving.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222.

Typically Offered
Fall

MATH 515 - Introduction to Linear Algebra

Credits: 3

Finite-dimensional vector spaces, linear transformations and their matrix representations, dual spaces, invariant subspaces, Euclidean and unitary spaces, solution spaces for systems of linear equations.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222.

Typically Offered
Spring

MATH 520 - Foundations of Analysis

Credits: 3

A study of sets and sequences, neighborhoods, limit points, convergence, open and closed sets in the real line and in the plane, the concept of a continuous function.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351.

Typically Offered
Spring

MATH 521 - The Real Number System

Credits: 3

An extensive development of number systems, with emphasis upon structure. Includes systems of natural numbers, integers, rational numbers, and real numbers.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall

MATH 540 - Advanced Ordinary Differential Equations

Credits: 3

First-order scalar equations: geometry of integral curves, symmetries and exactly soluble equations; existence, uniqueness and dependence on parameters with examples. Systems of first-order equations, Hamilton's equations and classical mechanics, completely integrable systems. Higher-order equations. Initial value problems for second order linear equations, series solutions and special functions. Boundary value problems with applications. Introduction to perturbation theory and stability.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 340 OR MATH 351.

Typically Offered
Spring

MATH 551 - Applied Matrix Theory

Credits: 3

Matrix algebra, solutions to systems of linear equations, determinants, vector spaces, linear transformations, eigenvalues, linear programming, approximation techniques.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 205 OR MATH 220 OR MATH 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MATH 560 - Introduction to Topology

Credits: 3

An introduction to the basic topological concepts. Topological spaces, metric spaces, closure, interior, and frontier operators, subspaces, separation and countability properties, bases, sub bases, convergence, continuity, homeomorphisms, compactness, connectedness, quotients and products. The course will include a brief introduction to proof techniques and set theory. Other topics in topology also may be included.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351.

Typically Offered
Spring

MATH 570 - History of Mathematics

Credits: 3

A survey of the development of mathematics from ancient to modern times.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 220 OR MATH 250.

Typically Offered
Spring

K-State 8
Historical Perspectives

MATH 572 - Foundations of Geometry

Credits: 3

Euclidean, non-Euclidean, and finite geometries; role of axioms; practice proving theorems in a formal system; synthetic, metric, and transformation approaches to

Euclidean geometry.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall

MATH 591 - Topics in Mathematics for Teachers

Credits: 1-3

Topics of importance for teachers of mathematics.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MATH 599 - Topics in Mathematics

Credits: 1-3

Courses on special topics.

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 615 - Introduction to Digital Image Processing

Credits: 3

The basic ideas and techniques in digital image processing stem from mathematics, engineering, and computer science. This course focuses on ideas and techniques such as spatial filtering, frequency filtering (Fast Fourier Transform), scale filtering (Fast Wavelet Transform), and their applications to image compression standards and image recognition. The course will place equal emphasis on the mathematical ideas and their applications.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 220 OR MATH 250.

Typically Offered
Spring

MATH 620 - Convex Optimization for Data Science

Credits: 3

Convex optimization is an essential tool in data science and underlies many machine learning algorithms. This course provides students with the necessary tools, skills, vocabulary, and techniques, that will allow them to become life-long users of convex optimization in the context of data analysis.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351.

Typically Offered
On sufficient demand

MATH 630 - Introduction to Complex Analysis

Credits: 3

Complex analytic functions and power series, complex integrals. Taylor and Laurent expansions, residues, Laplace transformations, and the inversion integral.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351.

Typically Offered
Fall

MATH 632 - Elementary Partial Differential Equations

Credits: 3

Orthogonal functions, Fourier series, boundary value problems in partial differential equations.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 AND MATH 340; OR grade of C or better in MATH 351.

Typically Offered
Spring

MATH 633 - Advanced Calculus I

Credits: 3

Functions of one variable; limits, continuity, differentiability, Riemann-Stieltjes integral, sequences, series, power series, improper integrals.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 222 OR MATH 351.

Typically Offered
Fall

MATH 634 - Advanced Calculus II

Credits: 3

Functions of several variables; partial differentiation and implicit function theorems, curvilinear coordinates, differential geometry of curves and surfaces, vectors and vector fields, line and surface integrals, double and triple integrals, Green's Theorem, Stokes' Theorem, and Divergence Theorem.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 633.

Typically Offered
Spring

MATH 635 - Dynamics, Chaos, and Fractals

Credits: 3

An introduction to one dimensional real and complex dynamics: attracting and repelling cycles, iterations of quadratic polynomials, bifurcation theory, chaos, Hausdorff measures and Hausdorff dimension, fractals, Julia and Fatou sets, and Mandelbrot sets.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251.

Typically Offered
Fall

MATH 655 - Elementary Numerical Analysis I

Credits: 3

Error analysis, root finding, interpolation, approximation of functions, numerical integration and differentiation, systems of linear equations.

Note
Knowledge of a Programming Language

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 221 OR MATH 251; AND grade of C or better in MATH 350 OR MATH 515 OR MATH 551.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MATH 656 - Elementary Numerical Analysis II

Credits: 3

A continuation of MATH 655. Linear programming,

numerical solutions of differential equations, and the use of standard packages for the solutions of applied problems.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or better in MATH 340 OR MATH 351; AND grade of C or better in MATH 655.

Typically Offered
Spring

MATH 670 - Mathematical Modeling

Credits: 3

Introduction of modeling procedures. Case studies in mathematical modeling projects from physical, biological, and social sciences.

Repeat for Credit
N

Requisites
Prerequisite: 12 Credit hours of MATH courses level 500 or higher.

Typically Offered
Other

MATH 700 - Set Theory and Logic

Credits: 3

An introduction to logic, mathematical proof, and elementary set theory. Topics include elementary logic, relations, partitions, functions, cartesian products, disjoint unions, orders, construction of the natural numbers, ordinal and cardinal numbers, the Axiom of Choice, and transfinite induction. Special emphasis will be given to proving theorems.

Repeat for Credit
N

Requisites
Prerequisite: MATH 511 or MATH 512.

Typically Offered
Other

MATH 704 - Introduction to the Theory of Groups

Credits: 3

Introduction to abstract group theory, permutation groups, homomorphisms, direct products, Abelian groups. Jordan-Holder and Sylow theorems.

Repeat for Credit
N

Requisites
Prerequisite: MATH 512.

Typically Offered
Other

MATH 705 - Computational Math

Credits: 3

Topics from complex analysis, vector calculus, higher-dimensional calculus, ordinary differential equations, liner algebra, and geometry of curves.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222.

Typically Offered
Fall

MATH 706 - Theory of Numbers

Credits: 3

Divisibility, congruences, multiplicative functions, number theory from an algebraic viewpoint, quadratic reciprocity, Diophantine equations, prime numbers.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and either MATH 511 or MATH 512.

Typically Offered
Fall

MATH 707 - Theory of Numbers II

Credits: 3

Continuation of MATH 706, including p-adic numbers, basic analytic number theory, geometry of numbers, and diophantine approximation.

Repeat for Credit
N

Typically Offered
Spring

MATH 710 - Introduction to Category Theory

Credits: 3

Categories, duality, special morphisms, functors, natural transformations, limits and colimits, adjoint situations, and applications.

Repeat for Credit
N

Requisites
Prerequisite: MATH 730 and MATH 770.

Typically Offered
Other

MATH 711 - Category Theory

Credits: 3

Set-valued functors and concrete categories, factorization structures, algebraic and topological functors, categorical completions, Abelian categories.

Repeat for Credit
N

Requisites
Prerequisite: MATH 710.

Typically Offered
Other

MATH 713 - Advanced Applied Matrix Theory

Credits: 3

A development of the concepts of eigenvalues by considering applications in differential equations, quadratic forms and estimation problems. Supporting topics include the Jordan canonical form, functions of matrices, vector and matrix norms, convex sets, with selected topics from the theory and application of the simplex algorithm, Markov chains, Leslie population models, Leontieff input-output model.

Repeat for Credit
N

Requisites
Prerequisite: MATH 551 or MATH 630.

Typically Offered
Summer

MATH 715 - Applied Mathematics I

Credits: 3

Analysis of numerical methods for linear algebra. Perturbation theory and error analysis, matrix factorizations, solutions to linear systems, least-squares, problems, techniques for special matrix structures, symmetric and nonsymmetric eigenvalue problems, iterative and direct methods.

Note
Three hours recitation.

Repeat for Credit
N

Requisites
Prerequisite: MATH 515 or MATH 551 or equivalent.

Typically Offered
Fall

MATH 716 - Applied Mathematics II

Credits: 3

Linear operator theory applied to matrix, integral and differential equations. Spectral theory, the Fredholm Alternative, least-squares and pseudo-inverses. Banach and Hilbert space techniques, Fourier series and wavelets, theory of distributions, Green's functions.

Note
Recitation 3 hours.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and MATH 515 or MATH 551; or equivalent.

Typically Offered
Spring

MATH 721 - Introduction to Real Analysis

Credits: 3

Limits, continuity, uniform convergence, completeness, differentiation, Riemann integration.

Repeat for Credit
N

Requisites
Prerequisite: MATH 634 or graduate standing.

Typically Offered
Fall

MATH 722 - Introduction to Functions of Several Variables

Credits: 3

Analysis of functions of several variables, including differentiability, partial differentiability, maxima and minima, inverse function theorem, implicit function theorem, integration, Fubini's theorem.

Repeat for Credit
N

Requisites
Prerequisite: MATH 634 or graduate standing.

Typically Offered
Spring

MATH 723 - Complex Functions

Credits: 3

Introduction to the theory of analytic functions, designed to prepare students for the qualifying exams. Holomorphic functions, contour integrals, residue theory, conformal mapping and other topics.

Note
Three hours lecture each week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 721 is recommended

Typically Offered
Spring

MATH 725 - The Mathematics of Data and Networks I

Credits: 3

Develops the mathematical tools necessary for studying and handling large data-sets and networks. Includes matrix, graph, and probability theory, dimensionality reduction, clustering, maximum likelihood, Bayesian networks, sparsification, modularity, information theory, hidden Markov chains, branching processes, electrical networks, internet mathematics, random walks, random graphs, random matrices, and search algorithms.

Repeat for Credit
N

Requisites
Recommended prerequisite: MATH 551, MATH 222.

Typically Offered
Fall

MATH 726 - The Mathematics of Data and Networks II

Credits: 3

Continuation of MATH 725. Develops the mathematical tools necessary for studying and handling large data-sets and networks. Includes matrix, graph, and probability theory, dimensionality reduction, clustering, maximum likelihood, Bayesian networks, sparsification, modularity, information theory, hidden Markov chains, branching processes, electrical networks, internet mathematics, random walks, random graphs, random matrices, and search algorithms.

Repeat for Credit

N

Requisites
Recommended prerequisite: MATH 551, MATH 222.

Typically Offered
Spring

MATH 730 - Abstract Algebra I

Credits: 3

Groups, rings, fields, vector spaces and their homomorphisms. Elementary Galois theory and decomposition theorems for linear transformations on a finite dimensional vector space.

Repeat for Credit
N

Requisites
Prerequisite: MATH 512 or consent of instructor.

Typically Offered
Fall

MATH 731 - Abstract Algebra II

Credits: 3

Continuation of MATH 730.

Repeat for Credit
N

Requisites
Prerequisite: MATH 730 or consent of instructor.

Typically Offered
Spring

MATH 740 - Calculus of Variation

Credits: 3

Necessary conditions and the Euler-Lagrange equations. Hamilton-Jacobi theory, Noether's theorems, direct methods, applications to geometry and physics.

Repeat for Credit
N

Requisites
Prerequisite: MATH 722 or equivalent.

Typically Offered
On sufficient demand

MATH 745 - Ordinary Differential Equations

Credits: 3

First-order equations and applications, second-order equations and oscillation theorems, series solutions and special functions, Sturm Liouville problems, linear systems, autonomous systems and phase plane analysis, stability, Liapunov's method, periodic solutions, perturbation and asymptotic methods, existence and uniqueness theorems.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340.

Typically Offered
Fall

MATH 755 - Dynamic Modeling Processes

Credits: 3

Topics to include equilibrium and stability, limit circles, reaction-diffusion, and shock phenomena, Hopf bifurcation and cusp catastrophes, chaos and strange attractors, bang-bang principle. Applications from physical and biological sciences and engineering.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and MATH 551.

Typically Offered
Other

MATH 760 - Introduction to Probability Theory

Credits: 3

An introduction to the mathematical theory of probability. Material covered includes combinatorial probability, random variables, independence, expectations, limit

theorems, Markov chains, random walks, and martingales.

Repeat for Credit
N

Requisites
Prerequisite: MATH 633 and STAT 510.

Typically Offered
On sufficient demand

MATH 770 - Introduction to Topology/Geometry I

Credits: 3

This is the first course of a two course sequence including definitions and examples of topological spaces, simplicial complexes, topological and smooth manifolds, quotient spaces, CW complexes, projective spaces and knots. Topological properties including elementary separation, compactness, connectedness. Homotopy, the fundamental group, Covering spaces, Euler characteristics, classification of closed surfaces, differential forms, integration, Stokes' theorem, de Rham cohomology.

Repeat for Credit
N

Requisites
Prerequisite: MATH 633.

Typically Offered
Fall

MATH 771 - Introduction to Topology/Geometry II

Credits: 3

The second course in a two class introduction to topology at a graduate level. Second term topics include: covering spaces, Euler characteristic, classification of closed surfaces, differential forms, integration, Stokes' theorem, and de Rham cohomology.

Repeat for Credit
N

Requisites
Prerequisite: MATH 770.

Typically Offered
Spring

MATH 772 - Elementary Differential Geometry

Credits: 3

Curves and surfaces in Euclidean spaces, differential forms and exterior differentiation, differential invariants and frame fields, uniqueness theorems for curves and surfaces, geodesics, introduction to Riemannian geometry, some global theorems, minimal surfaces.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340.

Typically Offered
Other

MATH 789 - Combinatorial Analysis

Credits: 3

Permutations, combinations, inversion formulas, generating functions, partitions, finite geometries, difference sets, and other topics.

Repeat for Credit
N

Requisites
Prerequisite: MATH 512.

Typically Offered
Other

MATH 791 - Topics in Mathematics for Secondary School Teachers

Credits: 3

Topics of importance in the preparation of secondary school teachers to teach modern mathematics.

Repeat for Credit
Y

Typically Offered
Other

MATH 799 - Topics in Mathematics

Credits: .5-3

Courses on special topics to be taught on sufficient demand.

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 801 - Numerical Solution of Differential Equations I

Credits: 3

Single and multistep methods for initial-value problems for ordinary differential equations; discretization and round-off error; consistency, convergence, and stability of these methods; stiff equations and implicit methods; two-point boundary value problems; initial and boundary-value problems for partial differential equations; finite difference methods; marching schemes for parabolic and hyperbolic problems; consistency, stability, convergence, and the Lax equivalence theorem; treatment of boundary conditions; boundary-value problems for elliptic equations; relaxation, alternating direction, and strongly-implicit iterative methods; nonlinear problems; finite element method.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 655 and knowledge of a programming language.

Typically Offered
Fall

MATH 802 - Numerical Solution of Differential Equations II

Credits: 3

Continuation of MATH 801.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 801.

Typically Offered
Spring

MATH 810 - Higher Algebra I

Credits: 3

Theory of groups, theory of rings and ideals, polynomial domains, theory of fields and their extensions.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 731.

Typically Offered
Fall

MATH 811 - Higher Algebra II

Credits: 3

Continuation of MATH 810.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 810.

Typically Offered
Spring

MATH 812 - Homological Algebra I

Credits: 3

Introduction to the basics of homological and cohomological delta functors with applications to specific categories. Topics include Abelian categories, functors, exactness, chain complexes and maps, cochain complexes and maps, projective and injective resolutions, left and right derived functors, homological dimension, double complexes, spectral sequences, Tor and Ext functors, cohomology of groups, Lie algebras, and Hochschild homology.

Repeat for Credit
Y

Requisites

Prerequisite: MATH 811.

Typically Offered
Fall

MATH 813 - Homological Algebra II

Credits: 3

Introduction to special homology and cohomology theories. Topics include Galois cohomology, cyclic homology, local cohomology theories, localization, derived categories, and the calculus of fractions in Abelian categories.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 812.

Typically Offered
Spring

MATH 814 - Lie Algebras and Representations I

Credits: 3

Introduction to Lie algebras. Topics include ideals, homomorphisms, nilpotent and solvable algebras, radicals, killing forms, Cartan subalgebras, semisimple Lie algebras and root systems, classification of semisimple Lie algebras, conjugacy theorems, enveloping algebras and PBW theorems, Serre relations, and constructions of semisimple Lie algebras and their enveloping algebras.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 811.

Typically Offered
Fall-Odd Years

MATH 815 - Lie Algebras and Representations II

Credits: 3

Introduction to Kac-Moody algebras and their representations, Verma modules and BGG categories, and the Kac-Weyl character formula. In addition, special topics include quantum groups and their representations.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 814.

Typically Offered
Spring-Odd Years

MATH 816 - Algebraic Geometry I

Credits: 3

Introduction to affine algebraic varieties over algebraically closed fields. Topics include Hilbert Nullstellensatz, Zarski topology, morphisms, differentials, smoothness, separability, and normality, algebraic and projective varieties, sheaf theory, sheaf cohomology, and vector bundles.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 811.

Typically Offered
Fall

MATH 817 - Algebraic Geometry II

Credits: 3

Introduction to schemes. Topics include categories, representable functors, prime spectra, algebraic schemes, separable schemes, normal schemes, proper schemes, schemes with bases, completions, formal schemes, Zariski's Theorem, Frobenius morphisms, and etale morphisms.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 816.

Typically Offered
Spring

MATH 818 - Introduction to Algebraic Groups I

Credits: 3

Introduction to algebraic groups. Topics include a review of algebraic geometry on varieties and morphisms, Lie algebras of algebraic groups, actions of algebraic groups over algebraic varieties, Jordan-Chevalley decompositions, solvable and unipotent algebraic groups, radicals and unipotent radicals, Borel subgroups, and parabolic subgroups.

Repeat for Credit
N

Requisites
Prerequisite: MATH 811.

Typically Offered
Fall-Even Years

MATH 819 - Introduction to Algebraic Groups II

Credits: 3

Introduction to reductive and semisimple algebraic groups, Bruhat decompositions, flag varieties, cohomology groups of line bundles over flag manifolds, Chevalley groups and their representations, Weyl modules and classification of irreducible modules, group functors and schemes, Hopf algebras and their representations.

Repeat for Credit
N

Requisites
Prerequisite: MATH 818.

Typically Offered
Spring-Even Years

MATH 821 - Real Analysis

Credits: 3

Measure theory and integration, Lebesgue integration, L_p-spaces, Hilbert spaces, integration on product spaces, Fubini's theorem.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 721 and MATH 722.

Typically Offered
Fall

MATH 822 - Real Analysis II

Credits: 3

Measure and integration on locally compact spaces: Radon measures, the Riesz Representation Theorem. Signed measures and differentiation: Lebesgue decomposition, Radon-Nikodym theorem, Differentiation of measures. Some topics on Probability (e.g., probability measures, the Central Limit Theorem, the Law of Large Numbers) or on Harmonic analysis groups, depending on the interests of students in class

Repeat for Credit
N

Requisites
Prerequisite: MATH 821.

Typically Offered
Spring

MATH 823 - Geometric Function and Measure Theory I

Credits: 3

Topics include general measure theory, covering theorems, Hausdorff measure, area and coarea formulas, distributions, Sobolev spaces, Poincare' inequalities, embeddings theorem, changes of variables, extentions, and capacity. Applications include quasiconformal and quasiregular maps in IR^{IN} and analysis on fractals.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 821.

Typically Offered
Fall

MATH 824 - Geometric Function and Measure Theory II

Credits: 3

Continuation of Geometric Function and Measure Theory I.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 823.

Typically Offered
Spring

MATH 825 - Complex Analysis I

Credits: 3

Holomorphic functions, harmonic functions, the Cauchy integral theorem, normal families and the Riemann mapping theorem, and the Mittag-Leffler theorem.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 822 or consent of department.

Typically Offered
Fall

MATH 826 - Complex Analysis II

Credits: 3

Analytic continuation, the Picard theorem, Hp-spaces, elementary theory of Banach algebra, the theory of Fourier transforms, and the Paley-Wiener theorems.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 825.

Typically Offered
Spring

MATH 827 - Classical and Modern Fourier Analysis I

Credits: 3

Topics include Fourier analysis on the circle, singular integrals of convolution type, Littlewood-Paley theory and multipliers, BMO and Carleson Measures, and boundedness and convergence of Fourier integrals (or singular integrals of nonconvolution type).

Repeat for Credit
Y

Requisites
Prerequisite: MATH 821.

Typically Offered
Fall

MATH 828 - Classical and Modern Fourier Analysis II

Credits: 3

Continuation of Classical and Modern Fourier Analysis I.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 827.

Typically Offered
Spring

MATH 830 - Algebraic Number Theory

Credits: 3

Topics include lattice theory, geometry of numbers, algebraic number fields, Dedekind domains, discrete valuation rings, ideal class group, group units, cyclotomic fields, Galois extensions.

Repeat for Credit
N

Requisites
Prerequisite: MATH 706, MATH 730.
Corequisite: MATH 731.

Typically Offered
Spring

MATH 831 - Analytic Number Theory

Credits: 3

Potential topics include; prime number theorem characters, L-functions, Diophantine problems, exponential sums, p-

adic analysis, Diophantine approximations, Sieve Methods, Circle method.

Repeat for Credit
N

Requisites
Prerequisite: MATH 630, MATH 633, MATH 706.

Typically Offered
Spring

MATH 840 - Differential Equations I

Credits: 3

Basic ordinary and partial differential equations. First-order ordinary differential equations: symmetries and solutions in quadratures; existence, uniqueness and dependence on parameters, systems of first order equations, analysis of equilibria. Second order equations: series solutions and special functions, initial- and boundary-value problems for second-order equations. Elements of integral equations. First-order partial differential equations. Basic second-order partial differential equations: wave equations, heat equations, Poisson equation, Schrodinger equation.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 634 or MATH 745 or consent of instructor.

Typically Offered
Fall

MATH 841 - Differential Equations II

Credits: 3

Where PDEs come from. Initial and boundary-value problems. A crash course in distribution theory: different spaces of distributions, Fourier and Laplace transformations of distributions, Sobolev spaces. The Poisson equation in bounded and in exterior domains; properties of solutions of elliptic equations. The classical evolution equations revisited. Energy estimates, existence and uniqueness theorems, regularity and other properties of solutions. Simple examples of nonlinear PDEs.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 840.

Typically Offered
Spring

MATH 842 - Differential Equations III

Credits: 3

Continuation of MATH 841.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 841.

Typically Offered
Spring

MATH 843 - Advanced Probability I

Credits: 3

Review of measure theory notions specific to probability, including classical limit theorems, constructions of Brownian motion, Stochastic integration, the martingale representation theorem and martingale-based function spaces.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510 and MATH 821.

Typically Offered
Fall

MATH 844 - Advanced Probability II

Credits: 3

Topics may include stochastic processes, random matrix theory, free probability, random fractals and random analytic maps.

Repeat for Credit
N

Requisites

Prerequisite: MATH 843.

Typically Offered
Spring

MATH 852 - Functional Analysis I

Credits: 3

Topological vector spaces; locally convex spaces (Hahn-Banach Theorem, weak topology, dual pairs, Krein-Milman Theorem, theory of distributions); Banach spaces (Uniform Boundedness Principle, Open Mapping Theorem and applications, Alaoglu's Theorem, analytic vector-valued functions, Krein-Smulian Theorem); C(X) as a Banach space (Stone-Weierstrass Theorem, Riesz Theorem); Lp spaces.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 821.

Typically Offered
Other

MATH 853 - Functional Analysis II

Credits: 3

Banach Algebras (spectrum, Gelfand Fourier transform, holomorphic functional calculus); Hilbert spaces (geometric properties, Riesz's Theorem, projections, the adjoint); functional calculus for normal operators; compact operators (spectral properties, Min-Max Theorem, Schatten-vol Neumann classes); Fredholm operators; other operator topologies on B(H); unbounded self-adjoint operators. Other topics.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 852.

Typically Offered
Other

MATH 855 - Methods of Applied Mathematics I

Credits: 3

An introduction to the mathematical techniques of problem solving in the sciences and engineering. Construction of mathematical models; problem formulation, dimensional analysis and scaling; solution methods for differential equations and difference equations; methods for obtaining approximate solutions; regular and singular perturbations methods, asymptotic series, applications to specific equations and scientific problems.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 630, MATH 633 and MATH 551.

Typically Offered
Fall

MATH 856 - Methods of Applied Mathematics II

Credits: 3

A continuation of MATH 855. Asymptotic expansion of integrals; the methods of stationary phase and steepest descent; summations of series, the Shanks transformation and the Pade fractions; boundary layer theory; the WKB and Langer approximations; the method of averaging and the method of multiple scales.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 855.

Typically Offered
Spring

MATH 857 - Nonlinear Analysis I

Credits: 3

The course deals with studies of nonlinear operator equations, existence of their solutions, uniqueness of the solutions, numerical methods for finding solutions. Fixed point theorems, topological principles, nonlinear elliptic equations and evolution equations, ill-posed and inverse problems are discussed.

Repeat for Credit

Y

Requisites
Prerequisite: MATH 821, MATH 822, MATH 852, MATH 853 and MATH 840 is recommended.

Typically Offered
Fall

MATH 861 - Numerical Analysis I

Credits: 3

Topics covered may include elementary functional analysis relevant to numerical analysis; numerical solution of differential or integral equations; analysis of stability and convergence; numerical linear algebra including large-scale systems; approximation theory.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 634 and MATH 655.

Typically Offered
Fall

MATH 862 - Numerical Analysis II

Credits: 3

Continuation of MATH 861.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 861.

Typically Offered
Spring

MATH 864 - Theory of Ordinary Differential Equations I

Credits: 3

The modern theory of ordinary differential equations including general theory and the theory of linear differential equations.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 722 and MATH 731.

Typically Offered
Fall

MATH 865 - Theory of Ordinary Differential Equations II

Credits: 3

Continuation of MATH 864 to include nonlinear equations and differential equations in Banach spaces.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 864.

Typically Offered
Spring

MATH 875 - Algebraic Topology I

Credits: 3

Homology and cohomology; simplicial, singular, cellular, and axiomatic theories; cup products; universal coefficient and Kunneth theorems; Hurewicz theorem in dimension one; orientation of manifolds; degree of maps spectral sequences, Whitehead's theorem.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 771, MATH 731.

Typically Offered
Fall-Even Years

MATH 876 - Algebraic Topology II

Credits: 3

Continuation of MATH 875. Fibrations, cofibrations, higher homotopy groups, characteristic classes, sheaves,

rational homotopy theory, simplicial objects, spectra, K-theory.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 875.

Typically Offered
Spring-Odd Years

MATH 877 - Classical and Quantum General Relativity

Credits: 3

A self contained introduction to general Relativity, followed by a mathematical introduction to quantum mechanics and quantum field theory. Course culminates in review of current approaches to quantizing general Relativity.

Repeat for Credit
N

Typically Offered
Fall

MATH 881 - Differential Topology

Credits: 3

Tangent spaces and tensor bundles; derivatives; inverse function theorem, Sard's theorem and applications; vector fields and flows; Morse functions; handle decompositions; embedding theorems; orientations and orientability via tangent bundles; intersection theory; cobordism theory.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 771, MATH 722.

Typically Offered
Fall-Odd Years

MATH 882 - Differential Geometry

Credits: 3

Riemannian metrics, covariant derivatives, Gauss curvature, Riemann curvature; Gauss-Bonnet theorem; Exponential map and normal coordinates; The Hopf-Rinow Theorem; Jacobi fields; The Cartan-Hadamard Theorem; Ricci curvature and Myers' and Bonnet's Theorems; selected topics and Kähler geometry; symplectic topology; gauge theory.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 881.

Typically Offered
Other

MATH 890 - Riemann Surfaces

Credits: 3

Introduction to Riemann Surfaces. Topics will include complex charts, complex structures, holomorphic and meromorphic maps (and functions), order of poles and zeros, covering spaces, monodromy of holomorphic maps, differential forms, DeRham cohomology groups, integration on Riemann surfaces, Cech cohomology of sheaves, compact Riemann surfaces, finite theorems, divisors and sheaves of meromorphic forms, and the Riemann Roch Theorem.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 811, and MATH 822.

Typically Offered
Spring

MATH 896 - Topics in Mathematics

Credits: .5-18

Topics in Mathematics

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for topic

undertaken and consent of instructor.

Typically Offered
Fall, Spring, Summer

MATH 897 - Seminar in Mathematics Education

Credits: 1-3

Seminar in Mathematics Education

Repeat for Credit
Y

Typically Offered
Spring, Summer

MATH 898 - Master's Research

Credits: 1-18

Master's Research

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MATH 899 - Thesis Topics

Credits: 1-18

Thesis Topics

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MATH 920 - Theory of Groups

Credits: 3

Group representations and group characters, transfer, signalizer functors, theory of pushing-up, groups of Lie type, (B, N)-pairs, chamber systems and buildings, sporadic simple groups, amalgam methods, Bass-Serre theory.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 811.

Typically Offered
Fall

MATH 924 - Several Complex Variables

Credits: 3

An introduction to the theory and analytic functions of several variables, domains of homomorphy and pseudoconvexity, the Levi problem, delta bar equations, Cousin problems, zeros of analytic functions, integral formulas, holomorphic mappings.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 826.

Typically Offered
Other

MATH 925 - Group Representations and Character Theory I

Credits: 3

The basic topics in representation theory are covered: Schur's Lemma, irreducibility, class functions, characters, orthogonality relations, Frobenius-Schur theorem, induced characters and Frobenius reciprocity, Mackey's theorem, Clifford's theorem, exceptional characters and applications to group orders, generalized characters and Brauer's characterizations of characters.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 811.

Typically Offered
Fall

MATH 926 - Group Representations and Character Theory II

Credits: 3

Depending on the interests of the students, topics may be chosen from the following: modular representations, Brauer's theory of blocks, characters of the linear groups, homologically induced representations, representations of complex Lie algebras.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 925.

Typically Offered
Other

MATH 991 - Topics in Algebra

Credits: 3

Selected topics in modern algebra.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 992 - Topics in Analysis

Credits: 3

Selected topics in modern analysis.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 993 - Topics in Harmonic Analysis

Credits: 3

Selected topics in harmonic analysis.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 994 - Topics in Applied Mathematics

Credits: 3

Selected topics in applied mathematics.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 995 - Topics in Geometry

Credits: 3

Selected topics in geometry.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 996 - Topics in Topology

Credits: 3

Selected topics in topology.

Note
Consent of instructor

Repeat for Credit

Y

Typically Offered
On sufficient demand

MATH 997 - Topics in Number Theory

Credits: 3

Selected topics in number theory.

Note
Automorphic Forms and L-Functions. Consent of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MATH 999 - Research in Mathematics

Credits: 1-18

Research in Mathematics

Repeat for Credit
Y

Requisites
Prerequisite: Sufficient training to carry on the line or research undertaken and consent of instructor.

Typically Offered
Fall, Spring, Summer

MC 100 - SMC Orientation

Credits: 1

An overview of the curriculum electives, extracurricular activities in mass communications, the advising process, career options, and ways to improve student success.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 110 - Mass Communication in Society

Credits: 3

A historical, social, legal, economic, and technological study of mass communication and its role and impact in society.

Note
Open to majors and non-majors.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Historical Perspectives

MC 120 - Principles of Advertising

Credits: 3

An examination of the advertising field and its relationship to marketing and journalism.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MC 130 - Writing Conventions and Mechanics

Credits: 1

Reorientation to basic rules of grammar, spelling and punctuation, and assessment of student writing skills prior to admission to the A.Q. Miller School. Students must receive a "C" or better to advance in JMC curriculum.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MC 131 - Elements of Media Writing

Credits: 1

The basics of Associated Press writing style and writing across media platforms. Students must receive a "C" or better to advance in JMC curriculum.

Repeat for Credit
N

Requisites
Prerequisite: MC 130 with a grade of "C" or better.

Typically Offered
Fall, Spring, Summer

MC 132 - Writing Styles and Audiences

Credits: 1

Basic exposure to writing across platforms for target audiences in journalism and strategic communications. Students must receive a "C" or better to advance in JMC curriculum.

Repeat for Credit
N

Requisites
Prerequisite: MC 131 with a grade of "C" or better.

Typically Offered
Fall, Spring, Summer

MC 160 - Principles of Journalism

Credits: 3

An overview of the current news industry, including legacy media and newer platforms. Introduction to news gathering and reporting, including hands-on work on the multi-platform JMC NewsDesk.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

MC 165 - KSDB-FM Participation

Credits: 0

Students participate in various music, news, sports, program production and other operational roles on student radio station KSDB-FM.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 166 - KKSU-TV Participation

Credits: 0

Exposure to basic video production roles and participation in producing a television program for KKSU-TV.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MC 180 - Principles of Public Relations

Credits: 3

Contemporary persuasive social science principles, processes, and issues involved in the management of communications between an organization and its publics.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

MC 190 - Topics in Journalism and Mass Communications

Credits: 1-3

Selected topics in the study of mass communication practices and principles.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 191 - Audio Essentials

Credits: 1

Basic audio production concepts and techniques.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MC 192 - Photography Essentials

Credits: 1

Builds a working knowledge of photographic theory and practical application of photo composition, editing and production using DSLR cameras and professional photo editing software. Part of the Content Creator Studio.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 193 - Video Production Essentials

Credits: 1

Basic video production practices with a focus on editing concepts.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MC 194 - Social Media Essentials

Credits: 1

Introduction to basic concepts and uses of social media for business and industry. Provides foundational knowledge of today's dynamic social media environment so that students may analyze successful social media programs within their future professions.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 195 - Creative Design

Credits: 1

Introduction to essential concepts and skills needed to create effective online visual content. Examines creative strategies, identifies content design techniques that attract attention, and builds skills in developing engaging copy and visuals. Part of the Content Creator Studio.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MC 196 - Content Management for Distribution

Credits: 1

Introduction to basic knowledge and skills needed to manage, structure, and distribute online content and measure content impact. Explores various content types to be used across multiple digital platforms and content strategies such as SEO and paid promotion to maximize visibility. Part of the Content Creator Studio.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 197 - Podcasting Essentials

Credits: 1

Introduces students to podcasting and uses hands-on instruction to teach foundational skills and principles in audio, content creation, audience understanding and podcast management.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 200 - News Reporting and Writing Across Platforms

Credits: 3

Instruction in news reporting and writing for publication across various media platforms.

Repeat for Credit
N

Requisites
Prerequisite: MC 130, MC 131, and MC 132, and MC 160 with a grade of C or better; OR MC 130, AGCOM 110 and MC 160 with a grade of C or better.

Typically Offered
Fall, Spring, Summer

MC 265 - Innovations in Media and Communication

Credits: 3

Examines new technological innovations and explores how technology in historical, legal, economic and social contexts combine to enable the changes thought of as innovations in media and communication.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 280 - Writing for Advertising & Public Relations

Credits: 3

Examines various forms of advertising and public relations writing techniques, with special emphasis on creation of tactical messages for different media and audiences utilizing persuasion, engagement and professionalism.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 290 - Topics in Mass Communications

Credits: 1-3

Selected topics in the study of mass communication principles and practices.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MC 301 - Photo & Video Storytelling

Credits: 3

Explores the power of journalistic storytelling through professional still and moving images. Develops skills in shooting and retouching photographs for a wide range of genres, creating videos for commercial and journalistic applications, and developing a workflow while building your storytelling portfolio.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 306 - Photographic Storytelling

Credits: 3

Equips students with the skills necessary to excel in the modern journalism landscape. Students will delve into theoretical concepts and practical applications related to digital photography composition, editing, and workflow for convergent media. Through a blend of classroom study and hands-on experience, students will learn fundamental principles and techniques in photography, photographic copy style writing, photo editing, workflow, software, and camera operations.

Repeat for Credit
N

Typically Offered
Fall or Spring

MC 310 - What's the Score? Sports Media in Society

Credits: 3

Considers the role of sports and how the way they are covered and portrayed in the media plays a role in society. Examines how gender, race and other identities are reflected in sports coverage and fandom.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MC 316 - Interactive Journalism Design

Credits: 3

Fosters AI literacy and the understanding of its potential and implications for the media industry and news production. Builds on the foundations of news storytelling, data analytics and adds interactivity techniques to help students tell dynamic journalistic stories.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MC 331 - Photography Commercial Imaging

Credits: 3

Introduces advanced photography and commercial imaging techniques. Builds skill in producing professional images in commercial settings. Examines principles of lighting, photo/video editing, workflow, and monetization of work and portfolio.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 332 - Photography and Digital Storytelling Abroad

Credits: 3

Participants in this study abroad program will learn basic digital photography and profile writing techniques through the experience of meeting and telling the stories of those who live and work in Orvieto, Italy. Students will create an online platform to share their stories with the rest of the world. They will come away with a professional style portfolio piece, as well as a deeper understanding of the stories and customs of a different country.

Note
This course is targeted specifically for study abroad students.

Repeat for Credit
N

Typically Offered
Summer

MC 340 - Editing for Print and Online Media

Credits: 3

Fundamentals of micro and macro journalistic editing for print and digital media including industry standards, practices, and ethics.

Repeat for Credit
N

Requisites
Prerequisite: MC 200, or MC 221, or MC 280 with a grade of C or better.

Typically Offered
Fall

MC 341 - Immersive Digital Storytelling

Credits: 3

Builds on theories and concepts of visual communication. Uses special equipment and software programs to introduce concepts and build skills in

brainstorming, sketching, filming, modeling, editing, producing visual effects and immersive experiences, and distributing extended reality (XR) stories for both traditional and emerging media platforms.

Repeat for Credit
N

Requisites
Recommended Foundation Course: MC 316

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

MC 345 - Application of Layout and Printing techniques in Agriculture and Natural Resources

Credits: 3

Advances students' understanding of how industry-adopted software and hardware are used to develop print media, from individual use to integrating a variety of software and hardware in production.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: AGCOM 210 or MC 341

Typically Offered
Fall

Cross-listed
AGCOM 345

MC 360 - Theories in Strategic Communication

Credits: 3

An examination of persuasion and behavior change theories as applied to advertising and public relations messages.

Repeat for Credit
N

Requisites
Prerequisites: MC 120 or MC 180 with a C or better, or instructor permission.

Typically Offered
Fall, Spring, Summer

MC 365 - Writing in the Digital Economy

Credits: 3

Examines writing in an information and attention economy from a globalized digital perspective. Along with brief introductions to economic theory, the course will discuss and debate the role of writers and content producers within the context of digital delivery and distribution. No prior experience with economic theory is needed.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 370 - Social Media Strategy & Management

Credits: 3

Strategic methods and approaches for messaging via social media platforms.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MC 374 - Social Media Content Development

Credits: 3

Builds skills in translating ideas into authentic, interactive and meaningful social media content through compelling imagery, video, design, and writing. Covers tools and techniques needed to develop a social media content roadmap for creating engaging content across multiple platforms.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 375 - Social Media Influencing & Personal Branding

Credits: 3

Develops skills in working with social media influencers and building personal influence. Examines concepts related to building and analyzing personal brands, creatively designing influencer campaigns, engaging and persuading online audiences, and understanding the legalities of influencing.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 390 - Topics in Journalism and Mass Communications

Credits: 1-3

Selected topics in the study of mass communications practices and principles.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 396 - Research for Advertising and Public Relations

Credits: 3

Examines how research data and insights inform successful advertising and public relations strategy. Explores concepts and skills in research methods, database analysis, results communication and visualization, and research-strategy connection.

Repeat for Credit
N

Typically Offered
Fall, Spring

MC 399 - Honors Seminar in Mass Communications

Credits: 3

Honors Seminar in Mass Communications

Repeat for Credit
N

Requisites
Prerequisite: Honors students only.

Typically Offered
Other

MC 403 - Advanced Reporting and Writing Across Platforms

Credits: 3

Intensive course emphasizing advanced reportorial principles and practices for multiple media platforms.

Repeat for Credit
N

Requisites
Prerequisite: MC 200 with grade of C or better; majors have priority, others by department consent.

Typically Offered
Fall, Spring

MC 405 - Perfect Podcasting

Credits: 3

Focuses on the history, form, and functions of podcasting as a mass communication tool that is increasingly replacing broadcast radio as America's audio delivery system of choice.

Note
Nonfictional and fictional narratives, spoken word content, public service, current events-based reports, music, and a variety of "chum casts"—just a few of podcasting's ever-developing art forms—will be unpacked, demonstrated, and practiced.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 406 - Multiplatform News Reporting

Credits: 3

Advanced techniques of reporting, writing, and producing news for audio, video, and Web-related media.

Repeat for Credit
N

Requisites
Prerequisite: MC 301 with grade of C or better; majors have priority, others by department consent.

Typically Offered
Fall, Spring

MC 409 - Advanced Strategic Communications Writing

Credits: 3

Strategic aspects of public relations writing and messaging through advanced types of client communications projects.

Repeat for Credit
N

Requisites
Recommended Prerequisite: MC 280 with a C or better.

Typically Offered
Fall, Spring, Summer

MC 410 - Sports Reporting

Credits: 3

The study of today's sports media environment with an emphasis on reporting, writing, and producing sports stories for audio, video, print, Internet, and other platforms.

Repeat for Credit
N

Requisites
Prerequisite: MC 301 with a grade of C or better.

Typically Offered
Fall, Spring

MC 416 - Photojournalism

Credits: 3

The materials, principles, and processes of photography directed toward visual reporting in newspapers, magazines and other media.

Note
Lectures, demonstrations and laboratory.

Repeat for Credit
N

Requisites
Prerequisite: MC 331 with grades of C or better; majors have priority, others by department consent.

Typically Offered
Fall, Spring

MC 426 - Magazine Writing, Editing and Design

Credits: 3

Preparation of feature stories and articles for *Update* magazines and other publications; techniques of market analysis, and marketing of articles written in course.

Repeat for Credit
N

Requisites
Prerequisite: MC 200 with a grade of C or better; majors have priority, others by department consent.

Typically Offered
Fall, Spring

MC 436 - Magazine Production

Credits: 3

The practical application of theory to writing, editing, graphic reproduction, layout and management of magazines.

Repeat for Credit
N

Requisites
Prerequisite: MC 403.

Typically Offered
Spring

MC 445 - Digital Brand Strategy

Credits: 3

Exploration of modern digital brand strategy, focusing on the latest approaches to digital advertising, the influence of AI, implementation, and evaluation.

Repeat for Credit
N

Typically Offered
Spring

MC 446 - Media Planning

Credits: 3

Builds skills in creating and executing a media plan according to advertising/public relations business goals. Develops skills in multi-media strategy - digital, mobile, social media, tv, audio streaming, radio and print media - based on research and industry trends. Uses simulation software and covers up-to-date digital tools in media planning.

Repeat for Credit
N

Requisites
Prerequisite: MC 120 or MC 180 with a grade of C or better

Typically Offered
Fall, Spring, Summer

MC 451 - Health Communication

Credits: 3

Developing strategy and messages in health communication campaigns.

Repeat for Credit
N

Requisites
Recommended Prerequisite: Sophomore standing or consent of instructor.

Typically Offered
Fall, Spring, Summer

MC 466 - Media Law and Ethics

Credits: 3

A study of the legal and ethical issues relating to media, strategic communications and personal media use. Emphasis on defamation, privacy, copyright, administrative controls and other legal areas. Includes a study of ethics in the media, perfect and imperfect ethical duties, and situational ethical decision making.

Repeat for Credit
N

Requisites
Prerequisite: Junior or instructor permission.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

MC 469 - Drone Photography and Video

Credits: 3

Techniques and procedures to use a Small Unmanned Ariel System (Drone) to acquire and produce video and photographic data that can be used for storytelling, advertising, short film, public relation and other media related analyses.

Repeat for Credit
N

Requisites
Prerequisite or Corequisite: UAS 115, Junior standing.

Typically Offered
Fall, Spring, Summer

MC 470 - Account Management

Credits: 3

Examines the role of account managers in modern advertising agencies.

Repeat for Credit
N

Requisites
Prerequisite: MC 221 or MC 280 with a C or better is recommended.

Typically Offered
Fall, Spring, Summer

MC 471 - Advanced Production

Credits: 3

Emphasis on aesthetics of audio and video writing, producing, directing, sound recording, lighting, camera work, editing, mixing, and distribution.

Note
Field and studio assignments.

Repeat for Credit
N

Requisites
Prerequisite: MC 331 or MC 406 with grade of C or better; majors have priority, others by department consent.

Typically Offered
Fall, Spring

MC 472 - Multiplatform News Production

Credits: 3

An advanced production course that emphasizes producing and directing techniques for news and other information-oriented programming.

Repeat for Credit
N

Requisites
Prerequisite: MC 406 with a grade of C or better or instructor permission. Majors have priority, others by department consent.

Typically Offered
Other

MC 474 - Social Media Management Simulation Lab

Credits: 2

Uses simulation software to build experience in running a social media campaign for a business. Develops skills in multiple areas of campaign management, including content creation, budget management, impact analysis, and decision-making.

Repeat for Credit
N

Requisites
Prerequisite: MC 370 Social Media Management & Strategy

Typically Offered
Fall, Spring

MC 475 - Military Strategic Communications

Credits: 3

An examination of the U.S. military in terms of operational and communication issues and its overall relationship with the media.

Repeat for Credit
N

Requisites
Prerequisite: MC 482 with a C or better or instructor consent.

Typically Offered
Fall

MC 477 - Travel and Tourism Strategic Communications

Credits: 3

The role and function of advertising and public relations in travel and tourism, focusing on the development of communication strategies and tactics.

Repeat for Credit
N

Requisites
Prerequisites: MC 120 or MC 180, or instructor consent.

Typically Offered
Fall

MC 478 - Entertainment and Strategic Communications

Credits: 3

Strategic communications in the entertainment industry and the role that practitioners play in the development of strategies, message development, and management

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Social Sciences

MC 479 - Strategic Communications and Sports

Credits: 3

Understanding the role public relations and strategic communication play in sports. Defining strategic communication, developing communication strategy, evaluating communication channels and messages. Provides students with public relations management tools.

Repeat for Credit
N

Typically Offered
Fall

MC 482 - Ideation, Strategy and Planning for Advertising and Public Relations

Credits: 3

Develops advertising and public relations skills in long-term planning, strategy, creativity, research, and meaningful evaluation and measurement. Examines concepts such as strategic planning, effective message creation, and project management.

Repeat for Credit
N

Requisites
Prerequisite: MC 280 with a grade of C or better.

Typically Offered
Fall, Spring

MC 485 - Media Practicum

Credits: 1

Practical work in student media operations of the school under supervision of an instructor, preparing students for work in the various media industries. Topics include newspaper, radio, yearbook, and video.

Note
One hour of credit per semester, which equals a total of 120 work hours supervised by the instructor. Enrollment requires a study and work plan approved by the instructor of record.

Repeat for Credit
Y

Requisites
Prerequisite: Instructor permission. Recommended Foundation Course: MC 200, MC 301, or MC 406

Typically Offered
Fall, Spring, Summer

MC 490 - Topics in Journalism and Mass Communications

Credits: 1-3

Selected topics in the study of mass communications practices and principles.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 491 - Mass Communication Internship

Credits: 1-3

Supervised professional experience; reports from student and supervisor required.

Repeat for Credit
Y

Requisites

Prerequisite: Consent of instructor and specified MC courses. Journalism: MC 301; Strategic Communications: MC 221 or MC 280; majors have priority, others by department consent.

Typically Offered
Fall, Spring, Summer

MC 498 - Media Portfolio

Credits: 3

Emphasis on enhancement of creative concepts, personal branding and portfolio development.

Repeat for Credit
N

Requisites
Prerequisite: MC 341 or instructor consent.

Typically Offered
Fall

MC 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members on the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 506 - Social media News Strategies

Credits: 3

Social media is an ever-changing and important part of journalism today. Learn strategies, tips and techniques to be job-ready for to maximize social media strategies, from both sides of the communications pathway, journalism and strategic communications.

Repeat for Credit
N

Typically Offered
Intersession

MC 541 - Media Audiences

Credits: 3

Explores the meaning of the term "audience" and how it has undergone significant historical shifts, evolving from simply viewers to now consumers, producers, participants and performers. Topics covered include audience history and theory, audience measurement, media fandom and audience subcultures.

Repeat for Credit
N

Typically Offered
Spring

MC 564 - History of Mass Communication

Credits: 3

Growth and development of media and media technology in the United States and their economic, political and social significance.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives

MC 565 - Going Mobile!

Credits: 3

Builds knowledge of the rapidly increasing mobile media ecosystem; techniques to attract, engage and monetize mobile consumers; and ways to create learning platforms for community and organizational advocacy. Develop skills in campaign development, content creation, and impact evaluation in a mobile media context.

Repeat for Credit
N

Requisites
Prerequisite: CC 410

Typically Offered
Fall, Spring

MC 573 - Ethics in Mass Communication

Credits: 3

Making ethical decisions in mass media fields and the principles on which those decisions are based.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

MC 576 - Mass Communications and Political Campaigns

Credits: 3

The roles of journalism, advertising and public relations in political campaigns. Examines campaign communication strategies, staffing, and the role of political consultants. Analyzes how voter decision making is affected by mass communications and how voters develop attitudes about candidates and issues.

Repeat for Credit
N

Requisites
Prerequisite: Either MC 200, MC 211, MC 221, or MC 280.

Typically Offered
Other

MC 580 - Storytelling Across Platforms

Credits: 3

Reporting, writing, and production across multiple platforms. Critical analysis of media and engagement strategies for reporting in a digital world.

Repeat for Credit
N

Requisites
Prerequisite: MC 403, MC 406, MC 416 or MC 426 and senior standing.

Typically Offered
Fall, Spring

MC 581 - Campaigns in Advertising and Public Relations

Credits: 3

Implements skills learned in coursework, internships, job experiences, and elsewhere to experience all aspects of strategic communications planning in an applied environment with a client. Capstone course for the Advertising and Public Relations degree.

Repeat for Credit
N

Requisites
MC 396 and MC 482 with a grade of C or better.

Typically Offered
Fall, Spring

MC 585 - Media Management

Credits: 3

Issues, ethics and practices in managing media companies, with special emphasis on problems and practices, in converged media operations.

Note
Lecture

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

K-State 8
Social Sciences

MC 589 - Issues in Mass Communication

Credits: 1-3

Advanced topics in mass communication practices and principles.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MC 605 - Supervision of School Publications

Credits: 3

A methods course for those planning to teach secondary or community college journalism courses and advise high school or community college publications.

Repeat for Credit
N

Typically Offered
Summer

MC 612 - Diversity in Media

Credits: 3

Explores diversity issues in the media, including the nature of mass media's portrayal of gender, race, ethnicity, sexuality, sexual orientation and class in entertainment, news, advertising, public relations, and other media.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

MC 623 - Communicating in Global Markets

Credits: 3

Issues associated with advertising in a global environment, including cultural impact, international media, regulation, ethics and digital media technologies.

Repeat for Credit
N

Requisites
Prerequisite: MC 120 OR MC 180, with a grade of C or better.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

MC 680 - Readings in Mass Communications

Credits: 1-3

Investigation of the literature of mass communications. Three significant books per credit hour with written analysis and oral presentation.

Repeat for Credit
Y

Requisites
Prerequisite: Senior or graduate standing and consent of supervisory instructor.

Typically Offered
Other

MC 682 - Seminar in Public Relations

Credits: 3

Contemporary topics in public relations practice, theory, and research.

Repeat for Credit
Y

Requisites
Prerequisite: MC 280, MC 482, MC 502 with grades of C or better.

Typically Offered
Other

MC 683 - Reputation Management

Credits: 3

Managing the public perception of organizations from the standpoint of preparing for issues and unforeseen emergencies that can potentially disrupt the relationship between organizations and the publics they serve.

Repeat for Credit
N

Requisites
Recommended Prerequisites: MC 482.

Typically Offered
Fall, Spring, Summer

MC 690 - Problems in Mass Communications

Credits: 1-4

Problems in Mass Communications

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for problem undertaken.

Typically Offered
Other

MC 701 - Proseminar in Mass Communication

Credits: 1

Introduction to advanced study in mass communication with special emphasis on requirements for obtaining the master of science degree.

Repeat for Credit
N

Typically Offered
Fall

MC 710 - History of Mass Communications

Credits: 3

Growth and development of the news media and mass communication media and systems in the United States and their economic, political, and social significance.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, or instructor permission with a 2.5 GPA and completion of a United States history course.

Typically Offered
Fall

MC 712 - Environmental Communications

Credits: 3

Combines theoretical discussions with practical experience regarding communications about environmental issues and provides introduction to natural and applied science topics related to the communications plan.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Spring-Even Years

Cross-listed
AGCOM 712

MC 720 - Ethics in Mass Communications

Credits: 3

Moral analysis, argument, and decision-making by the mass communicator.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, or instructor permission with a 2.5 GPA and completion of a philosophy course.

Typically Offered
Fall, Spring

MC 725 - International Communications

Credits: 3

Comparative study of world media systems and the role of mass communications in national development.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, or instructor permission with a 2.5 GPA.

Typically Offered
Fall

MC 730 - Seminar in Issues of the Media

Credits: 3

A study of philosophical and technological advances in mass communications with emphasis on projected patterns of future growth and development.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing or instructor permission with a 2.5 GPA.

Typically Offered
Other

MC 740 - Colloquium in Mass Communications

Credits: 1-3

Discussion of selected topics in mass communications research and practice.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing or instructor permission.

Typically Offered
Other

MC 745 - Seminar in Mass Communication Law

Credits: 3

Analysis of mass communication freedoms and limitations in such areas as defamation, privacy, copyright, censorship, obscenity, and advertising and electronic media regulation.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring

MC 750 - Strategic Health Communication

Credits: 3

The role of effective communication through mass media and other communication strategies in health promotion and behavior change. Includes the theories and strategies used to promote public health messages, services, or products for multicultural audiences, with a focus on human, environment and animal health. Legal, ethical issues and gender issues in health communication will be given special attention.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, or instructor permission with a 2.5 GPA.

Typically Offered
Spring

MC 760 - Issues, Risk, and Reputation

Credits: 3

Promotes understanding of strategic communication and media as tools to prepare for, respond to, and recover from threats to organizational and brand reputation.

Note
Lecture

Repeat for Credit
N

Requisites

Prerequisite: Graduate standing, or instructor permission.

Typically Offered
Fall

MC 765 - Communication Theory

Credits: 3

An examination of major communication theories as they relate to mass communications.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, or instructor permission with 2.5 GPA.

Typically Offered
Fall

MC 770 - Mass Communication Practicum

Credits: 1-4

Supervised practical work in professional mass communications settings, including laboratory investigation, field work, internships, and applied workplace research.

Note
Instructor consent required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MC 780 - Research Methods in Mass Communications

Credits: 3

Survey of research methods used in the study of the mass media.

Repeat for Credit
N

Requisites
Prerequisite: For graduate students.

Typically Offered
Other

MC 782 - Strategic Communications Management

Credits: 3

Study of various forms of communication management and strategies that further the objectives of an organization, including organizational communication, marketing communication, and public relations.

Repeat for Credit
N

Typically Offered
Fall

MC 799 - Independent Study in Mass Communication

Credits: 1-3

Supervised independent study in mass communication. Requires contractual agreement between student and professor, specifying content, meeting times, and credits to be awarded.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing, instructor consent.

Typically Offered
Fall, Spring, Summer

MC 801 - Advanced Research Methods: Qualitative

Credits: 3

Introduction to qualitative methods, analysis, interpretation, and writing in media-related fields, and how qualitative inquiry contributes to theory construction in mass communication.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Standing.

Typically Offered
Fall

MC 820 - Digital Media Audiences and Analytics

Credits: 3

Theories and concepts related to digital audiences in mass communication, content strategies, and how media audiences are formed, analyzed, and measured in the digital age.

Repeat for Credit
N

Typically Offered
Spring

MC 830 - Media and Community Engagement

Credits: 3

Explores the role of media in increasing civic engagement and public participation, enabling the exchange of useful information, and fostering social connectivity to strengthen citizen agency and the overall democratic process.

Repeat for Credit
N

Typically Offered
Spring

MC 840 - Social Media Data Visualization

Credits: 3

Familiarizes students with social-scientific methods for large-scale social-media data analysis and visualization, including the application of relevant user and concept networks, content categorizations, and sentiment analysis. In addition, the use of germane software in emerging and digital media research is developed.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing or instructor permission.

Typically Offered
Fall

MC 850 - Applied Research in Mass Media

Credits: 3

Study and application of mass media research, its literature, and methodology.

Repeat for Credit
Y

Requisites
Prerequisite: MC 780.

Typically Offered
Other

MC 899 - Research in Mass Communications

Credits: 1-18

Research in Mass Communications

Note
Thesis/report credit.

Repeat for Credit
Y

Requisites
Prerequisite: Sufficient training to carry on the line of research undertaken.

Typically Offered
Other

ME 101 - Introduction to Mechanical Engineering

Credits: 2

Introduction to the mechanical engineering curriculum and profession. Orientation for successful transition of new students to college life. Engineering approach to problem solving and computer use in all areas of mechanical engineering. Exchange of information regarding academic, technical, social, ethical, and professional matters between students, faculty, and practicing professionals.

Note

Must be taken during the student's first eligible fall or spring semester in mechanical engineering.

Two hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent enrollment: MATH 220.

Typically Offered
Fall, Spring

ME 212 - Engineering Graphics

Credits: 2

Technical sketching, study of basic principles of projective geometry, multiview drawings, pictorials, reading and interpreting drawings, CAD, sectioning, dimensioning.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Pre/Corequisite: MATH 220 - Calculus I OR MATH 205 - General Calculus Recommended Prerequisite: Plane geometry.

Typically Offered
Fall, Spring

ME 310 - Elements of Thermodynamics

Credits: 2

Properties of pure substances. The first law of thermodynamics for open and closed systems. A brief introduction to the second law of thermodynamics.

Note
For Civil and Environmental Engineering Majors

Repeat for Credit
N

Requisites
Prerequisite: PHYS 213, MATH 221

Typically Offered
Fall, Spring

ME 312 - Advanced Engineering Graphics

Credits: 3

Advanced 3D CAD features and solid modeling techniques including an introduction to sheet metals, multi-body parts, weldments, etc. Advanced SolidWorks features such as creating configurations from other configurations, deformed features, surfacing and Macros will be introduced.

Repeat for Credit
N

Requisites
Prerequisite: ME 212

Typically Offered
Summer

ME 390 - Topics in Mechanical Engineering

Credits: 1-18

Topics selected in consultation with instructor. Intended for interdisciplinary studies or innovative studies in mechanical engineering.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

ME 400 - Computer Applications in Mechanical Engineering

Credits: 3

The development and application of computer techniques to the problems of design and analysis in mechanical engineering, including computer programming (abstraction and problem solving; algorithms; control structures; input/output; functions; arrays and array processing).

Note
Two hours lecture a week and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: MATH 340.

Typically Offered
Fall, Spring

ME 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ME 499 - Honors Research in Mechanical Engineering

Credits: 1-18

Individual research problem selected with approval of faculty advisor. Open to students in the College of Engineering honors program. A report is presented orally and in writing during the last semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

ME 500 - Robotics Programming and Design

Credits: 3

Application of mechanical engineering design and embedded programming techniques to design, build, and control a robotic system. Focus on robotic kinematics, differential motion, and trajectory planning to support the programming and design of a 3-axis pick and place machine. Robotic theory will be implemented using C++ deployed on an embedded system with the goal of implementing a complete and functional pick and place system.

Repeat for Credit
N

Requisites
Prerequisite: (ME 400 or ECE 241)

Typically Offered
Fall

ME 512 - Dynamics

Credits: 3

Vector treatment of kinematics, Newton's Laws, work and energy, impulse and momentum, with applications to problems of particle and rigid body motion.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 333. Prerequisite or concurrent: MATH 340.

Typically Offered
Fall, Spring, Summer

ME 513 - Thermodynamics I

Credits: 3

Properties of the pure substance. The first and second laws of thermodynamics. Gas mixtures and psychrometry.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 213; MATH 221.

Typically Offered
Fall, Spring, Summer

ME 519 - Electrical Circuits for Mechanical and Nuclear Engineering

Credits: 3

Analysis, design, construction, and application of electric and electronic circuits using analytic tools, fundamentals of common components, instrumentation, and computer-based tools.

Note
Three hour of lecture per week ending after week 10. Three hours of lab per week for the entire semester.

Repeat for Credit
N

Requisites
Prerequisites: PHYS 214, MATH 340, and MATH 551.

Typically Offered
Fall, Spring

ME 523 - Thermodynamics II

Credits: 3

Continuation of Thermodynamics I. Energy analysis, thermodynamic cycles, generalized thermodynamic relations, and reactive systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 513.

Typically Offered
Fall, Spring

ME 532 - Experimental Strength of Materials

Credits: 3

The experimental investigation of engineering materials used in the fabrication of products including metals, polymers, ceramics, composites, and elastomers. Provides basic knowledge in material science and inherit material properties such as elastic modulus, yield strength, toughness, etc., so students can solve real engineering problems and design engineering structures/systems.

Note
Two hours of lecture per week. One three hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: CHE 354, CHE 355, CE 533

Typically Offered
Spring

ME 533 - Machine Design I

Credits: 3

Introduction to the design and analysis of machine elements. Emphasis on materials, loads, stress, strain, deflection, failure theories, and finite element analysis. Applications include design and analysis of shafts, gears, and fasteners, weldments, springs, bearings.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 533, ME 212 and ME 512.

Typically Offered
Fall, Spring

ME 535 - Measurement and Instrumentation Laboratory

Credits: 3

Theory and application of mechanical engineering measurements, instrumentation, and computer-based data acquisition.

Note
One hour recitation and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 513 and (ECE 519 or ME 519)

Typically Offered

Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

ME 543 - Intermediate Mechanics of Materials

Credits: 3

Fundamental principles of mechanics and its application to design and analysis of engineering structures. Topics covered include stress and strain, elastic and inelastic properties of materials, composite structures, unsymmetric bending, thin-walled structures and energy methods in structural analysis.

Repeat for Credit
N

Requisites
Prerequisite: CE 533

Typically Offered
Fall

ME 563 - Machine Design II

Credits: 3

Design and analysis of machine elements. Applications include design and analysis of bearings, gears, shafts, clutches, brakes, belt and chain drives, and hydraulic fluid power.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 533.

Typically Offered
Fall, Spring

ME 570 - Control of Mechanical Systems I

Credits: 4

Introduction to modeling and control of dynamic systems encountered by Mechanical Engineers. Topics include basic linear systems modeling and analysis; feedback control; time response and stability of dynamic systems; introduction to root locus and frequency response design.

Note
Three hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340, ME 400, and ME 512.
Prerequisite or concurrent enrollment: ME 535.

Typically Offered
Fall, Spring

ME 571 - Fluid Mechanics

Credits: 3

Physical properties; fluid statics; dynamics of ideal and real fluids (for incompressible and compressible flow); impulse and momentum; laws of similitude; dimensional analysis; flow in pipes; flow in open channels; flow about immersed objects.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 512 or CE 530, and MATH 222.
Prerequisite or concurrent: ME 513 or ME 310

Typically Offered
Fall, Spring, Summer

ME 573 - Heat Transfer

Credits: 3

Fundamentals of conduction, convection, and radiation; principles of heat exchanger design and dimensional analysis.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 400, ME 571, MATH 340.

Typically Offered
Fall, Spring

ME 574 - Interdisciplinary Industrial Design Projects I

Credits: 3

Introduction to design theory, project management, team dynamics and socio-economic context of design, etc.; Application of design principles, engineering analysis and experimental methods to an interdisciplinary design project involving design, analysis, fabrication and testing. Discussion of ethics, technical/professional societies, and engineering licensing.

Repeat for Credit
N

Requisites
Prerequisite: ME 535, ME 533, ME 571.
Prerequisite or concurrent enrollment: ENGL 200, or instructor approval.

Typically Offered
Fall, Spring

ME 575 - Mechanical Engineering Capstone Design

Credits: 3

In-depth application of design principles, engineering analyses and experimental methods to an industrial project addressing design, analysis, constraints, standards, fabrication, and testing.

Repeat for Credit
N

Requisites
Prerequisite: ME 574 or instructor permission.

Typically Offered
Fall, Spring

ME 610 - Finite Element Applications in Mechanical Engineering

Credits: 3

The application of the finite element method to the solution of engineering problems. Topics include introductions to the methods, linear elastic stress analysis, thermal analysis, and modeling limitations and errors. Commercial computer codes are used in the applications.

Repeat for Credit
N

Requisites
Prerequisite: CE 533.

Typically Offered
Fall, Spring

ME 615 - Applications in Mechatronics

Credits: 3

Application of Mechanical and Electronic engineering to design. Microcontrollers; sensors; analog-to-digital signal conversion; DC motor operation and pulse with modulation; drive train configuration; embedded C programming; competition at Engineering Open House.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 400 or ECE 431. Corequisite: ME 535 (not required if ECE 431 is taken).

Typically Offered
Spring

ME 620 - Internal Combustion Engines

Credits: 3

Application of principles of thermodynamics, fluid mechanics, and chemistry, kinematics, and heat transfer to internal combustion engine processes. Performance and design characteristics of internal combustion engines.

Note
Three hours recitation a week.

Repeat for Credit

N

Requisites
Prerequisite: ME 523.

Typically Offered
Fall

ME 622 - Indoor Environmental Engineering

Credits: 3

Ventilation, heating and cooling system design for buildings. Application of thermodynamic, heat transfer, and fluid mechanics principles for determination of building heating and cooling loads. Determination of ventilation requirements. Sizing, design and integration of environmental control systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 571.

Typically Offered
Spring

ME 626 - Introduction to Micro-Electromechanical Systems

Credits: 3

MEMS (micro-electromechanical systems) adapt the fabrication techniques and materials of semiconductor IC (integrated circuits) chips to make mechanical components, like cantilever beams, hinges, micromotors, micromirrors and microfluidic chips. In this course, the fabrication, design, and application of MEMS will be covered. Students will gain the knowledge of MEMS that combines interdisciplinary subjects of mechanical, electrical, and chemical engineering and material sciences.

Note
A student may take either ME 626 or ME 826 for credit, but not both.

Repeat for Credit
N

Typically Offered
Fall

ME 627 - Introduction to Biomedical Micro-Electromechanical Systems

Credits: 3

BioMEMS and microfluidics handle minute amount of liquids (microliter to picoliter) and bio-objects (DNA, protein, and cell). The course will cover (1) unique sciences of microfluidics, (2) liquid and bio-object manipulating principles, (3) design and manufacturing of microfluidic and biosensing devices, and (4) application in in vitro (out of body) diagnosis, 3D bioprinting, origami, and tissue engineering.

Note
A student may take either ME 627 or ME 827 for credit, but not both.

Repeat for Credit
N

Typically Offered
Spring

ME 628 - Aerodynamics

Credits: 3

A general introduction to aerodynamics including the analysis of lift, drag, thrust, and performance for subsonic aircraft, and the application of aerodynamic principles to design.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 571, MATH 340.

Typically Offered
Fall

ME 631 - Aircraft Propulsion

Credits: 3

Mechanics and thermodynamics of aircraft propulsion

systems; gas turbine aircraft engines; applied compressible flow; performance and design of propulsion systems.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 523, 571, MATH 340.

Typically Offered
Spring

ME 633 - Thermodynamics of Modern Power Production

Credits: 3

The first and second law analysis of modern stationary power systems using fossil, nuclear, and renewable energy sources. Component and system design, such as cycle design, load factor, and auxiliaries are considered in conjuction with their costs.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 523.

Typically Offered
Fall

ME 640 - Control of Mechanical Systems II

Credits: 3

Design and analysis of control systems. Topics include linear and nonlinear systems modeling; parameter estimation/system identification; steady state errors; advanced root locus and frequency response design; controller implementation.

Note
Two hours lecture and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 570 and MATH 551.

Typically Offered
Fall

ME 651 - Introduction to Composites

Credits: 3

Design, fabrication and testing of various composite materials. Analysis of mechanical properties of laminated composites.

Note
Two hours recitation and 3 hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CE 533 and senior standing in engineering.

Typically Offered
Fall

ME 656 - Mechanical Vibrations

Credits: 3

A general consideration for the formation and analysis of free and forced vibration of mechanical systems of single and mulitple degrees of freedom.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 512 and MATH 340.

Typically Offered
Spring

ME 661 - Introduction to Nanoscience and Nanotechnology

Credits: 3

This interdisciplinary course will cover basic areas of

nanotechnology, which includes synthesis of various nanomaterials (0D, 1D and 2D nanostructure), mechanical property assessment (hardness, modulus, yield strength measurements), energy generation (solar energy, thermoelectrics and energy generation from vibrations), 3-D printing of nanocomposites and energy storage.

Note
This course is designed for final year senior and/ or graduate students interested in the areas of experimental nanoscale science and engineering.

Repeat for Credit
N

Requisites
Prerequisite: CHE354, CHE355, ME 533, ME 573

Typically Offered
Spring

ME 699 - Problems in Mechanical Engineering

Credits: 1-18

Problems in Mechanical Engineering

Repeat for Credit
Y

Requisites
Prerequisite: Approval of department head.

Typically Offered
Fall, Spring, Summer

ME 701 - Development of Computer Applications In Mechanical Engineering

Credits: 3

Nature of design, graphical user interface development to support computer-aided design, algorithms and computer graphics in computer applications, feature-based design, applications to design problems.

Repeat for Credit
N

Requisites
Prerequisite: ME 400.

Typically Offered
Fall

ME 710 - Intermediate Topics in Interdisciplinary Systems Analysis

Credits: 1-3

Analyze complex, interdisciplinary systems using the systems thinking framework. Model the systems using narrative and visual tools for systems thinking. Systems analyzed include engineering systems and may include economic, and/or social elements.

Repeat for Credit
Y

Requisites
Co- Req: Senior or graduate standing

Typically Offered
On sufficient demand

ME 711 - Interdisciplinary Seminar

Credits: 0-3

The interdisciplinary seminar creates an opportunity to learn from other interdisciplinary researchers, form interdisciplinary research teams, and engage in interdisciplinary discussions. Topics include interdisciplinary research and collaboration, and professional development.

Repeat for Credit
Y

Requisites
Co-Req: Senior or graduate standing, or instructor permission

Typically Offered
On sufficient demand

ME 716 - Intermediate Dynamics

Credits: 3

General vector principles of the dynamics of particles and rigid bodies; applications to orbital calculations, gyrodynamics, and rocket performance; introduction to the energy methods of advanced dynamics.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 512, MATH 340.

Typically Offered
Spring

ME 720 - Intermediate Fluid Mechanics

Credits: 3

A continuation of ME 571 in the study of general topics in fluid mechanics. Conservation of mass and momentum principles with particular emphasis on analysis of inviscid (potential) flows, compressible flows, and more advanced viscous flows including boundary layers. Numerous applications utilizing numerical methods.

Repeat for Credit
N

Requisites
Prerequisite: ME 571, MATH 340.

Typically Offered
Fall

ME 721 - Thermal Systems Design

Credits: 3

Thermal systems design including economics, simulation, and optimization. Includes heating, ventilating and air conditioning design and control.

Repeat for Credit
N

Requisites
Prerequisite: ME 573.

Typically Offered
Fall

ME 722 - Human Thermal Engineering

Credits: 3

Application of thermodynamic, heat transfer, and fluid mechanics principles of the thermal analysis of the human body. Mathematical analysis and computer modeling of human response to the thermal environment. Evaluation of heat stress and cold stress. Protection from heat and cold. Requirements for thermal comfort and impact on human performance.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 573.

Typically Offered
Fall-Odd Years

ME 728 - Computer Control of ElectroMechanical Systems

Credits: 3

Discrete modeling and analysis of dynamic physical systems in mechanical engineering. Sampling and data conversion and reconstruction. Real time implementation of control on a computer. Digital controller design and implementation. Laboratory exercises in control applications and design.

Note
Two hours of recitation and three hours of laboratory per week.

Repeat for Credit
N

Requisites
Prerequisite: ME 570.

Typically Offered
Spring

ME 730 - Control Systems Analysis and Design

Credits: 3

Use of classical analysis techniques for control system compensation. State space-control theory fundamentals are presented in addition to an introductory treatment of several

major systems areas.

Repeat for Credit
N

Requisites
Prerequisite: ECE 530 or ME 640.

Typically Offered
Spring

Cross-listed
ECE 730

ME 738 - Experimental Stress Analysis

Credits: 3

Experimental methods of investigating stress distributions. Photoelastic models, photoelastic coatings, brittle coatings, and resistance strain gauges applied to static and dynamic problems.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: CE 533.

Typically Offered
Fall-Even Years

ME 760 - Engineering Analysis I

Credits: 3

Methods of analysis and solution of problems selected from various branches of engineering. Topics typically include vector algebra, vector spaces, linear algebra and matrices, vector calculus, line, surface and volume integrals, and ordinary differential equations for engineering applications.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and senior standing.

Typically Offered
Fall

ME 773 - Intermediate Heat Transfer

Credits: 3

Conduction, convection and radiation, mass transfer, phase change, heat exchangers, introductory numerical methods.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: ME 573.

Typically Offered
Spring

ME 777 - Monte Carlo Methods

Credits: 3

The objective of this course is to explore various methods of Monte Carlo for solving direct and inverse problems in engineering. The course covers probability distributions; laws of large numbers and Central Limit Theorem; pseudo random number generation; sampling, scoring, and precision; variance reduction procedures; Markov chain Monte Carlo; inverse Monte Carlo; solution of linear operator equations; particle transport simulation.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 or equivalent and knowledge of a programming language.

Typically Offered
Spring-Even Years

ME 800 - MNE Graduate Seminar/Research Paper

Credits: 0-18

Presentation(oral and written) and discussion of progress in research. Credit hours can be earned by preparing and/or

presenting publication quality papers. Topics may be drawn from any current research area in mechanical and nuclear engineering.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing in mechanical and nuclear engineering.

Typically Offered
Fall, Spring

ME 802 - Advanced Mechanics of Materials and Applied Elasticity

Credits: 3

Two- and three-dimensional deformation analysis, equilibrium, and elastic constitutive laws. Stress-strain transformations between coordinate systems. Governing equations of elasticity. Advanced topics in bending, shearing, torsion and combined loads, with applications to engineering problems.

Note
Three hous recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: CE 533.

Typically Offered
Fall-Even Years

Cross-listed
CE 802

ME 811 - Thermodynamic Analysis

Credits: 3

Basic considerations of the three laws of equilibrium thermodynamics. Availability analysis with applications including multicomponent systems.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 523, ME 571, MATH 240.

Typically Offered
Spring-Even Years

ME 820 - Intermediate Topics in Thermal and Fluid Mechanics

Credits: 0-18

Topics may include combustion, direct energy conversion, modeling and design of internal combustion engines, nonequilibrium multiphase and multicomponent systems, refrigeration, cryogenics, stability and turbulence.

Repeat for Credit
Y

Requisites
Prerequisite: ME 720 or ME 773.

Typically Offered
On sufficient demand

ME 824 - Computational Fluid Dynamics

Credits: 3

The course introduces basic theories and algorithms for numerical simulations, and uses them to solve both model problems and classical fluid mechanics problems computationally.

Repeat for Credit
N

Requisites
Prerequisite: ME 720

Typically Offered
Spring

ME 826 - Intermediate Micro-Electromechanical Systems

Credits: 3

MEMS (micro-electromechanical systems) adapt the fabrication techniques and materials of semiconductor IC

(integrated circuits) chips to make mechanical components, like cantilever beams, hinges, micromotors, micromirrors and microfluidic chips. In this course, the fabrication, design, and application of MEMS will be covered. Students will gain the knowledge of MEMS that combines interdisciplinary subjects of mechanical, electrical, and chemical engineering and material sciences. Advanced applications of MEMS are covered.

Note
A student may take either ME 626 or ME 826 for credit, but not both.

Repeat for Credit
N

Typically Offered
Fall

ME 827 - Intermediate Biomedical Micro-Electromechanical Systems

Credits: 3

BioMEMS and microfluidics handle minute amount of liquids (microliter to picoliter) and bio-objects (DNA, protein, and cell). The course will cover (1) unique sciences of microfluidics, (2) liquid and bio-object manipulating principles, (3) design and manufacturing of microfluidic and biosensing devices, and (4) application in in vitro (out of body) diagnosis, 3D bioprinting, origami, and tissue engineering. Advanced applications of BioMEMS are covered.

Note
A student may take either ME 627 or ME 827 for credit, but not both.

Repeat for Credit
N

Typically Offered
Spring

ME 830 - Intermediate Topics in Automatic Controls

Credits: 1-18

Topics may include analysis and design of nonlinear, adaptive, optimal, digitals or stochastic control systems and the applications of intermediate control and stability theory.

Repeat for Credit
Y

Requisites
Prerequisite: ME 730 or ECE 730 or consent of instructor.

Typically Offered
On sufficient demand

ME 831 - Boundary Layer Theory

Credits: 3

The development and solution of various laminar boundary layer problems involving momentum, heat, and mass transfer for a compressible viscous fluid.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 573.

Typically Offered
Fall-Even Years

ME 836 - Introduction to Fracture Mechanics

Credits: 3

This course provides an introduction to fracture mechanics concepts and applications. Topics include the asymptotic solution for stress at a crack tip, energy balance and crack propagation, computing stress intensity factors, fatigue crack growth, fracture of concrete, applications and current topics.

Repeat for Credit
Y

Requisites
Prerequisite: ME 802 or CE 802.

Typically Offered
Fall-Odd Years

ME 840 - Intermediate Topics in Solid Mechanics and Machine Design

Credits: 1-18

Topics may include intermediate elasticity, plasticity, tribology, probabilistic machine design, robotics, computational dynamics and nonlinear mechanics.

Repeat for Credit
Y

Requisites
Prerequisite: ME 716 or ME 802 or CE 802.

Typically Offered
On sufficient demand

ME 846 - Vibrations of Continuous Media

Credits: 3

Basic mathematical and physical descriptions for wave phenomena in continuous media, with emphasis on propagations of mechanical disturbance in linearly elastic solids. Other selected topics in wave dynamics, including acoustics, water waves, nonlinear phenomena, will be discussed depending on students' interest.

Note
Three hours of recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 802 or CE 802.

Typically Offered
Fall-Odd Years

ME 860 - Engineering Analysis II

Credits: 3

Continuation of Engineering Analysis I to cover more methods of analysis and solution important for engineering applications. Topics typically include complex variable theory, differential operators and orthogonal functions, Sturm-Liouville theory, Fourier series and Fourier transforms, and partial differential equations for engineering applications.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 760 or consent of instructor.

Typically Offered
Spring

ME 862 - Finite Elements

Credits: 3

The foundations of the finite element method using weighted residuals and variational methods. Element formulation, assembly and solution are covered in detail. Formulation for dynamic and nonlinear problems. Discussion of advanced topics. The student will develop a complete finite element program.

Repeat for Credit
Y

Requisites
Prerequisite: ME 760. Prerequisite or concurrent enrollment: ME 802 or CE 802.

Typically Offered
Spring

ME 871 - Mechanics of Composite Materials

Credits: 3

Topics include classification of composite materials, elasticity theory for anisotropic and in homogeneous materials, basic model for characterization of composite properties, laminated plate theory, textile composites, strength and criteria for composite failure, and fracture modes in composites.

Repeat for Credit
Y

Requisites
Prerequisite: ME 802 or CE 802.

Typically Offered
Spring-Odd Years

ME 898 - Master's Report

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ME 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

ME 902 - Theory of Plasticity

Credits: 3

Foundations of plasticity. Vectorial and sensorial analysis. Coverage of pressure-dependent and pressure-independent materials. Hyper elasticity-Green elasticity. Deformation theory of plasticity. Flow theory of plasticity. Plastic work rate-equivalent strain. Classical yield criteria. Closed form solution of simple cases. Numerical solutions of more complex cases.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 802 or CE 802.

Typically Offered
Spring-Even Years

ME 910 - Computational Methods in Design

Credits: 0-18

Selected topics from optimal design, geometric modeling, and multi-physics finite element methods.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

ME 920 - Advanced Topics in Thermal and Fluid Mechanics - Boltzmann Transport

Credits: 3

Non-Fourier heat transfer models used for microscale transport phenomena. Boltzmann integral methods for determining ion/neutron effects on metal material temperature.

Repeat for Credit
Y

Requisites
Prerequisite: ME 720 or ME 773.

Typically Offered
On sufficient demand

ME 921 - Thermal System Analysis

Credits: 3

Advanced study of steady-state and dynamic simulation of thermal systems; thermal systems optimization. Thermodynamic availability and probabilistics in thermal system design.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 721.

Typically Offered
Spring-Odd Years

ME 930 - Advanced Topics in Automatic Controls

Credits: 1-18

Topics may include analysis and design of nonlinear, adaptive, optimal, digital, or stochastic control systems and the application of advanced control and stability theory.

Repeat for Credit
Y

Requisites
Prerequisite: ME 640.

Typically Offered
Fall, Spring

ME 935 - Heat Conduction in Solids

Credits: 3

General differential equation of heat conduction and methods of solution for steady-state and transient heat conduction, periodic heat flow, and internal heat sources.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 573.

Typically Offered
Fall-Odd Years

ME 940 - Advanced Topics in Solid Mechanics and Machine Design

Credits: 1-18

Topics may include advanced elasticity, plasticity, tribology, probabilistic machine design, robotics, advanced and computational dynamics and nonlinear mechanics.

Repeat for Credit
Y

Requisites
Prerequisite: ME 802 or CE 802 or ME 716 or ME 846.

Typically Offered
On sufficient demand

ME 942 - Convection Heat Transfer

Credits: 3

Energy and momentum equations in convective heat transfer, laminar and turbulent thermal boundary layers, steady and nonsteady convection problems.

Note
Three hours recitation a week.

Requisites
Prerequisite: ME 573.

Typically Offered
Spring-Odd Years

ME 943 - Radiation Heat Transfer

Credits: 3

Basic theories of thermal radiation, shape factors; exact and approximate solutions of integral equations of radiation heat transfer between solid surfaces with absorbing or nonabsorbing medium.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: ME 573.

Typically Offered
Fall-Even Years

ME 947 - Boiling Heat Transfer

Credits: 3

Principles of boiling heat transfer and thermal hydraulics of two-phase flow; computational methods; design and analysis applications.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites

Prerequisite: ME 942

Typically Offered
Fall-Odd Years

ME 999 - Dissertation Research in Mechanical Engineering PhD Level

Credits: 1-18

Dissertation Research in Mechanical Engineering PhD Level

Repeat for Credit
Y

Requisites
Prerequisite: Approval of department head and major professor.

Typically Offered
Fall, Spring, Summer

MET 111 - Technical Graphics

Credits: 3

Introduction to applications in sketching and 2D computer-aided design applied to geometric development and engineering communication. Techniques are applied to produce finished drawings and schematics to National and international standards. Theory and applications of orthographic and auxiliary projection and pictorial drawing. Standards for symbols, section views, and dimensioning included.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MET 117 - Mechanical Modeling and Detailing

Credits: 3

Professional practices in the development and application of 3D part and assembly modeling for design and manufacturing. Preparation of 3D model for manufacturing data or production drawing. Development of tolerances versus cost, fit tolerances, and introductory geometric dimensioning and tolerancing (GD&T) specifications. Application of handbook data and spreadsheet computation to design detail development.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MET 121 - Manufacturing Methods

Credits: 3

Introduction to contemporary manufacturing processes and practices, including precision measurement and inspection, machining, forming, casting, and welding processes. Recitation and laboratory experience in manufacturing practices, including metrology and basic setup and operation of manufacturing equipment. Observation of applications in local industry.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MET 125 - Computer-Numerical-Controlled Machine Processes

Credits: 2

Study and practice of basic CNC programming and machining operations.

Note

Six hours lab a week.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MET 211 - Statics

Credits: 3

A study of forces and their effects on the bodies upon which they act.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Corequisite: PHYS 113.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 230 - Automated Manufacturing Systems I

Credits: 3

A general survey of the various components and systems in automated manufacturing, including material handling, electropneumatic control, programmable logic control, robotics, tooling, inspection and quality control, CNC, and other production processes.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MET 231 - Physical Materials and Metallurgy

Credits: 3

A broad view of materials used in industry, including structures of materials, how they react to stress and temperature, how the polyphase structures form, and how they are controlled to produce optimum properties. Students will examine through study and laboratory experimentation ferrous and nonferrous metals, polymers, composites, and ceramics.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MET 240 - Industrial Robotics Laboratory

Credits: 2

An introduction to industrial robots emphasizing robot operation, programming, and integration with programmable logic controllers and other automation equipment.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 335 or MET 230.

Typically Offered
Fall

MET 245 - Material Strength and Testing

Credits: 3

Calculations of material strength and deformation are complemented with principles and practice of mechanical testing including instrumentation and measurement in the areas of loads, stresses, deformations, thermal stresses, and other quantities.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 211.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

MET 252 - Fluid Power Technology

Credits: 3

Study, design, analysis, operation, maintenance, and applications of hydraulic and pneumatic power systems and components.

Note
Two hours lecture and two hours labs a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 150.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 264 - Machine Design Technology I

Credits: 4

Introduction to application and selection of machine elements to design mechanical systems. Covers primary machine elements such as shafts and shaft components, screws and fasteners, welded joints, springs, bearings, gears, clutches and brakes.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: MET 245.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

MET 299 - Topics in Mechanical Engineering Technology

Credits: 1-18

Provides an opportunity for faculty to present mechanical engineering technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MET 314 - Finite Element Analysis and Design Modeling

Credits: 3

Introduction to finite element analysis applied to mechanical design. Study and application of advanced computer-aided modeling techniques.

Note
One hour lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 117 and MET 245.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MET 325 - Additive Manufacturing

Credits: 3

The course develops an understanding of additive manufacturing (AM) principles and applications combined with a problem-based learning project which develops design, manufacturing and maintenance skill sets for AM practitioners.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MET 333 - Advanced Material Science

Credits: 3

A continuation of MET 231 Physical Materials and Metallurgy. Emphasizes the understanding of material properties used to give various materials their function. Theory and laboratory work focus on controlling and testing material properties. Ferrous and non-ferrous metals, polymers and adhesives, composites, smart materials, effects of corrosion, failure analysis, and selection techniques for design.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: CHM 110 and CHM 111 and MET 231.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 336 - Dynamics of Machines

Credits: 3

Velocities, accelerations, and forces in existing mechanisms to produce motions. Work, energy, impulse and momentum concepts in kinetics. Vibrations in machine parts.

Note
Three hour lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220 and PHYS 113.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 346 - Elements of Mechanisms

Credits: 3

Fundamental motion concepts of displacement, velocity, and acceleration are studied, as well as analytical and graphical analysis and synthesis of linkages, gear trains, cams, pulleys, and combinations of these elements.

Repeat for Credit
N

Requisites
Prerequisite: MET 117 and MET 246.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 353 - Fluid Mechanics

Credits: 3

Fundamental concepts of fluid mechanics. Study of buoyancy, energy equation, viscosity, and flow measurement. Selected applications of fluid mechanics in civil and mechanical technologies. Computer-aided solution of problems in fluid mechanics.

Note
Two hours lecture and two hours labs a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220, MET 252, and PHYS 113.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 365 - Machine Design Technology II

Credits: 3

Continued study of design of mechanical elements and systems including engineering mechanics and materials, investigation of failure theories under static and variable loading, stress analysis, stress concentration, and deflections.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 264.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MET 381 - Quality Control

Credits: 3

An introductory course in quality concepts and techniques used in industry. Topics include fundamentals of statistics and probability, statistical process control charts, and quality improvement tools.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or consent of instructor.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MET 382 - Industrial Instrumentation and Controls

Credits: 3

An introduction to process control systems for industrial applications. Course topics include concepts and terminology, first- and second-order systems, measurement of motion, gauges and transducers, signal processing, and measurement of properties.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 304 or ECET 201.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 410 - Managerial and Project Economics

Credits: 3

Economic analysis of problems as applied to managerial decision making. Students consider the economic viability of solutions in engineering and a variety of other kinds of projects common in technology-oriented businesses.

Repeat for Credit
N

Requisites
Prerequisite: MATH 100.

Typically Offered
Fall

Cross-listed
BUS 410

K-State 8
Social Sciences

MET 460 - Tool Design for Manufacturing

Credits: 3

Principles and practices involved in tool drawing and design concepts necessary for the manufacture of products. Emphasis on design of jigs and fixtures, gauging devices, dies, ease of operation, and methods of assembly. Production cost related to selection of parts and methods of production is stressed. Applied laboratory exercises illustrated through specific case studies.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 117 and MET 125, and MET 346.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 462 - Senior Design Project I

Credits: 1

Selection, definition, and analysis of a project supervised by faculty. Includes consideration of project parameters, trade-off studies, alternative solutions, and justification of selected solution. Completion and presentation of a written project proposal included.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.
Corequisite: MET 365

Typically Offered
Fall

MET 464 - Senior Design Project II

Credits: 2

Development and implementation of project proposal submitted in MET 462. Construction, packaging, and testing of project culminating in a senior design project report which may include full documentation and performance specifications, functional description, theoretical analysis, schematics, cost analysis, parts list, drawings, etc. Project results will be presented orally to a select committee at the end of the course.

Note
Four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 462 and senior standing.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

MET 471 - Thermodynamics and Heat Transfer

Credits: 4

This course emphasizes thermodynamic laws and equations and the use of tables and charts for properties of important fluids. Applications to systems used for producing, transforming, and applying heat and mechanical energy are also studied. Conduction, convection, and radiation heat transfer processes are investigated.

Note
Three hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 220, MET 252, and PHYS 113.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

MET 481 - Automated Manufacturing Systems II

Credits: 3

Covers systems for manufacturing operations including facilities, supplies, materials, procedures, and control. Topics include design, programming, feedback for manufacturing, production set-up, automated work cells, and decision issues.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: MET 230 or MET 382.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Global Issues and Perspectives

MET 490 - Industrial Work Internship

Credits: 1-18

The student will work as an intern with business and industry in mechanical engineering technology field. A report detailing duties performed and tasks accomplished is required at the end of the internship period.

Repeat for Credit
N

Requisites
Prerequisite: Sophomore standing and consent of MET program coordinator.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MET 499 - Advanced Topics in Mechanical Engineering Technology

Credits: 1-18

Provides an opportunity for faculty to present advanced mechanical engineering technology topics.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MIS 366 - Introduction to Business Analytics and Information Systems

Credits: 3

A comprehensive view of organizational information systems required for obtaining and transforming data into business analytics and intelligence. Cases and hands-on exercises emphasize information systems usage in data acquisition, analysis, and presentation leading to effective organizational decision-making.

Note

Special section of MANGT 366 open to students considering a Management Information Systems (MIS) Major.

Demonstrate competence in use of computer spreadsheets.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MIS 411 - Business Programming Applications

Credits: 3

Business-related object-oriented programming fundamentals used to enhance skills for problem solving and logical thinking. Focuses on class diagrams, and the utilization of programming languages for understanding and applying software development concepts.

Note
Prerequisite or consent of department head.

Repeat for Credit
N

Requisites
Prerequisite or concurrent: MANGT 366 or MIS 366

Typically Offered
Fall

MIS 422 - Business Database and SQL

Credits: 3

Examination of database theory, design, implementation and the value of data to an organization. Study of structured query languages (SQL) including the definition and creation of database objects, manipulation of data stores including entry, modification, removal and extraction, and database programming fundamentals relevant to business and data analytics.

Note
Prerequisite or consent of department head.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MIS 433 - ERP Project Planning and Implementation

Credits: 3

Applications of enterprise systems with emphasis on ERP systems configuration, business process integration and hands-on project management.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366.

Typically Offered
Spring

MIS 444 - Business Networks and Security

Credits: 3

Study of digital networks and security considering impact and value to business organizations. Coverage includes communications protocols and standards, hardware, software, network implementation and configuration; and security. Emphasis on hands-on network setup, configuration and testing.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MIS 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MIS 495 - MIS Internship

Credits: 0-3

Eight weeks of applied Management Information Systems (MIS) experience designed to coordinate the interests of students and firms.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MIS 496 - Special Topics in MIS and Data Analytics

Credits: 1-6

Discussion and analysis of current and emerging issues in management information systems or data analytics, including topics related to new theory, new applications, and technology or data analytics practice.

Note
Permission of instructor

Repeat for Credit
Y

Typically Offered
On sufficient demand

MIS 555 - Cloud Computing with Business Programming Applications

Credits: 3

Advanced application of business-related programming fundamentals in cloud environments. Focuses on utilization of programming languages and mobile software development for creating solutions to data-intensive business problems in cloud environments.

Repeat for Credit
N

Requisites
Prerequisite: MIS 411 and either MIS 422 or MIS 667.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MIS 566 - Systems Analysis and Design

Credits: 3

An in-depth study of systems analysis and design techniques viewing information systems as an integral component of organizational strategic planning. Emphasis on systems planning, project management, use of CASE tools, process and data modeling, quality and systems reengineering.

Repeat for Credit
N

Requisites
Prerequisite: MIS 411 and either MIS 422 or MIS 667.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

MIS 665 - Business Analytics and Data Mining

Credits: 3

In-depth study of a broad range of topics and techniques in

business intelligence (BI), data mining, and database marketing (DM). Emphasis on fundamentals of relational database management, data warehousing as a business practice, customer relationship management (CRM), customer segmentation, various data mining techniques, data visualization, business performance management, use of scorecard/dashboard, and advanced BI and data mining software tools.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366 or an equivalent introductory computing course.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MIS 667 - Applications of Data Models in Business

Credits: 3

Implementation and management of extract, transform, load (ETL) processing and automation from a business perspective. Topics include design of data migration approaches, data cleaning techniques, and technologies used to move and distribute data between various database types including relational, non-relational, on-site and cloud. SQL, NoSQL and other technologies provide context and hands-on practice in data pipelines implementation and management.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366, an equivalent introductory computing course, or permission of instructor.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MIS 670 - Social Media Analytics and Web Mining

Credits: 3

This course is an in-depth study of a broad range of topics and techniques in the areas of social media analytics, web mining and social network analysis. Emphasis is on fundamentals of data acquisition from the web and social media platforms, transformation of these unstructured data into structured format, advanced data processing techniques for analysis, business intelligence through web crawling, analysis of web and social media data using classification, clustering, and association techniques, sentiment analysis (or opinion mining) for business decisions, visualization of unstructured data, and social network analysis.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366 or an equivalent introductory computing course.

Typically Offered
Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MIS 677 - Senior MIS Project

Credits: 3

Senior project. Students must demonstrate proficiency in the analysis, design and implementation of a business or data analytics project by creating a working prototype of a business application.

Note
Management Information Systems (MIS) Majors Only or consent of department head.

Repeat for Credit
N

Requisites
Prerequisite: MIS 555 and MIS 566.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MIS 756 - Business Data Pipelines

Credits: 3

Implementation and management of extract, transform, load (ETL) processing and automation from a business perspective. Topics include design of data migration approaches, data cleaning techniques, and technologies used to move and distribute data between various database types including relational, non-relational, on-site and cloud. SQL, NoSQL and other technologies provide context and hands-on practice in data pipelines implementation and management.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 366 or MIS 366, an equivalent introductory computing course, or permission of instructor.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning

MIS 797 - Topics: Information Technology and Data Analytics

Credits: 1-3

Discussion and analysis of contemporary issues in information technology, business analytics, trends, and emerging technology. Can include applications, relevant literature and research.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MIS 830 - Business Intelligence and Storytelling in Cloud Environments

Credits: 3

A practical exposure to information technology as it applies to business. Emphasis will be placed on problem-solving using spreadsheets, databases, and HTML based information systems.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate student standing.

Typically Offered
Fall

MKTG 250 - Introduction to Marketing

Credits: 3

A general study of marketing principles which lead to the development of marketing strategy. A review of environmental influences and key analytical tools used in formulating marketing plans. Product or service design, distribution, pricing, and promotional programs.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

MKTG 300 - Introduction to Digital Marketing

Credits: 3

Designed to teach students the basic fundamentals of digital marketing. Topics include digital marketing terminology, search engine marketing, search engine optimization, mobile digital marketing, social media marketing, technology integration, and marketing analytics.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250

Typically Offered
Fall, Spring, Summer

MKTG 302 - Brand Marketing

Credits: 3

Focuses on building and measuring brands as business strategy, as well as personal branding.

Repeat for Credit

N

Typically Offered
Spring

K-State 8
Social Sciences

MKTG 305 - Socially Responsible Marketing

Credits: 3

Ethical marketing practices in the U.S. and global economy. There is a brief introduction to business ethics, ethics within the marketing mix, ethics and the promotional mix and special topics in marketing ethics. It will include case studies to help build experience with real world domestic and global situations and increase critical thinking and problem-solving skills.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250

Typically Offered
Fall or Spring

MKTG 306 - Business to Business Marketing

Credits: 3

A study of the nature of the industrial marketplace, concentrating on those aspects that differentiate it from the consumer markets. The major topics include analysis of market needs, market segments, estimating market demand, organizational buying behavior, marketing channels, marketing strategy and mix for institutional customers, global marketing strategies, managing products and new product development, buyer/seller relationships, pricing strategies, and business marketing communications.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
On sufficient demand

K-State 8
Social Sciences

MKTG 311 - Services Marketing

Credits: 3

An analysis of the unique marketing challenges faced by service organizations. Major topics include the unique characteristics of services, creating and positioning a service in the marketplace, distributing, promoting and pricing services. An evaluation of marketing strategies from the perspective of a service firm.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
On sufficient demand

K-State 8
Social Sciences

MKTG 325 - International Marketing

Credits: 3

This course deals with the problems and perspectives of marketing across national boundaries. It also focuses on the tools and practices for structuring and controlling marketing programs related to overseas business. Emphasis is on the management of marketing functions in a global context. Topics include international trade organizations, international economic factors, foreign business customs, and the international marketing mix.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Social Sciences

MKTG 326 - International Business

Credits: 3

This course provides students with an appreciation of the opportunities and unique challenges in international business, an understanding of the strategic and operational options available to an international firm, and managerial decision making abilities required to be successful abroad. The course examines strategic and operational issues involved in international business activity and how to best manage these issues.

Repeat for Credit
N

Requisites
Prerequisite: MANGT 220, MKTG 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Social Sciences

MKTG 440 - Entertainment Marketing

Credits: 3

Examines the entertainment industry using strategic marketing approaches to assess market opportunities, develop marketing strategies, and design implementation tactics.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
Spring

K-State 8
Social Sciences

MKTG 450 - Consumer Behavior

Credits: 3

A study of the concepts, principles, and theories to understand, evaluate and predict consumer behavior. Explaining the behavior of consumers provides insight into ambiguous marketing situations. The course focuses on applying scientific methods to aid in marketing decision making. In addition, this course integrates current consumer research and theory, as well as current topics.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

MKTG 480 - Marketing Analytics Fundamentals

Credits: 3

Students will develop an understanding of data collection, data analysis and data visualization in order to make strategic business decisions.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, STAT 250 or equivalent.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MKTG 490 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Requisites
Prerequisite: MKTG 250, Consent of instructor.

Typically Offered
On sufficient demand

MKTG 495 - Marketing Internship

Credits: 0-3

Eight weeks of applied marketing business experience between junior and senior years designed to coordinate the interests of students and firms.

Repeat for Credit
Y

Requisites
Prerequisite: FINAN 450, MANGT 220, MKTG 250, and consent of Marketing department head.

Typically Offered
Fall, Spring, Summer

MKTG 496 - Special Topics in Marketing

Credits: 3

Discussion and analysis of current and emerging issues in marketing, including topics related to new theory, new applications, and the practice of marketing.

Repeat for Credit
Y

Typically Offered
Fall or Spring

MKTG 498 - Independent Study in Marketing

Credits: 0-18

Selected topics in marketing.

Repeat for Credit
Y

Requisites
Prerequisite: MKTG 250, Consent of instructor.

Typically Offered
On sufficient demand

MKTG 510 - Corporate Marketing Practicum

Credits: 3

For high GPA marketing students to gain additional marketing insight by working with a company in applying marketing concepts.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, MKTG 300, consent of instructor

Typically Offered
Fall or Spring

MKTG 540 - Digital Content Strategy and Development

Credits: 3

Development of strategic communications plans for digital marketing, including content structure and development. Students will have the opportunity to incorporate industry certifications as the course will instruct students on the skills needed for the certification exams.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, MKTG 300

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MKTG 551 - Data Narratives and Visualization

Credits: 3

Students learn to interpret complex datasets and effectively communicate the analysis through visualization and storytelling. They learn these techniques with and without the use of dashboards and/or presentation software.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, MKTG 300

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

MKTG 630 - Sports Marketing

Credits: 3

Covers the concepts, metrics, and techniques used to address the opportunities and challenges faced by marketers in the context of sports.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MKTG 650 - Digital Marketing Analysis and Strategy

Credits: 3

Examines aspects of tracking, analyzing, and optimizing marketing efforts to achieve strategic objectives. It provides learners with an understanding of search engine marketing (SEM) and search engine optimization (SED), web analysis and tools, and social media platforms and analytics. Learners have an opportunity to earn industry certifications.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, MKTG 300.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

MKTG 653 - Applications of Marketing Analytics

Credits: 3

Marketing analytics focuses on applications of quantitative analysis to understand dynamic marketing phenomena. This course is a mixture of lectures on essential marketing concepts/econometrics/text mining, instructions on software program (Stata and R), and discussions of marketing cases to facilitate students' critical thinking and decision making leveraged by analytical ability. To facilitate learning statistical software programs, students will practice hands-on projects in the computer lab.

Learning outcomes are that students will be able to do the following:

- Choose correct quantitative analysis methodologies
- Learn data analysis software programs (Stata and R)
- Make strategic decisions based on data analysis and communicate marketing strategies

Repeat for Credit
Y

Requisites
Prerequisite: MKTG 250, STAT 250 or equivalent.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

MKTG 654 - Marketing Research

Credits: 3

Learn the essential techniques and tools for data collection, analysis, and interpretation, including survey and experimental design (A/B testing). Students will explore qualitative and quantitative methods, learn to utilize statistical software, and engage in hands-on projects to apply concepts in marketing contexts to make strategic data-driven decisions.

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, STAT 351.

Typically Offered
Fall or Spring

K-State 8
Empirical and Quantitative Reasoning

MKTG 690 - Marketing Strategy

Credits: 3

Analysis of marketing situations which lead to appropriate management of the marketing program's objectives. Capstone course integrates knowledge of marketing and other business management principles into marketing strategy, development, implementation, and control.

Note
Undergraduates must be business students admitted in a College Business Administration degree track (major).

Repeat for Credit
N

Requisites
Prerequisite: MKTG 250, MKTG 300, SALES 300 and senior standing.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

MKTG 705 - Marketing Concepts and Research

Credits: 3

Presents marketing concepts and marketing research concepts at the graduate level. Emphasis is directed toward managerial strategy development using marketing theories and applied marketing research techniques.

Repeat for Credit
Y

Requisites
Prerequisite: Three hours of economics, three hours of statistics, and MATH 205 or MATH 220.

Typically Offered
Fall

MKTG 842 - Advanced Marketing Research

Credits: 3

Application of advanced research methods to help solve marketing problems. Intensive examination of experimental and survey designs, data collection methods, and selected multivariate analysis techniques are covered.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 351, MKTG 640, and MKTG 654.

Typically Offered
On sufficient demand

MKTG 844 - Advanced International Marketing

Credits: 3

This course is designed to develop the students' managerial decision making ability in international marketing. The course will focus on the internationalization process of firms, the unique issues in international marketing, and international marketing strategy. The course will integrate short lectures, class discussions, and case analysis to achieve its objectives.

Repeat for Credit
Y

Requisites
Prerequisite: MKTG 710.

Typically Offered
On sufficient demand

MKTG 860 - Advanced International Business

Credits: 3

This course is designed to introduce the student to the nature and scope of fundamental business skills requisite for a career in international business. A unified survey of the international aspects of accounting, finance, management, marketing and related subjects will be made that is useful to a manager in a global business enterprise. Emphasis will be placed on the identification, articulation and implementation of successful global strategies.

Repeat for Credit
N

Requisites
Prerequisite: ACCTG 710, ECON 815, FINAN 715, MANGT 720, MANGT 710, MIS 830, MKTG 705, and STAT 702 or enrollment in the MAcc program.

Typically Offered
On sufficient demand

MKTG 880 - Applied Marketing Analytics

Credits: 3

Business Intelligence is a systematic approach to harnessing customer data and competitive information to drive strategic business decision making. This course deals with how to collect and analyze business data to enhance quality of decision making in modern enterprises. Unlike courses based on data mining (inductive approach), this course will be largely based on regression techniques (deductive approach). The course will be based on lectures, case analysis, and hands on exercises to make students comfortable with powerful computing tools used for data analysis. The cases and exercises will be bundled with data which will be used to apply concepts learned in class to real business situations.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student standing.

Typically Offered
Spring

MKTG 881 - Advanced Marketing Analytics

Credits: 3

Students will gain an understanding of econometric and statistical methods of analysis and their application to business problems. Through lectures and exercises, student will use software tools often used in business for data analysis. Students will also learn how to interpret and apply the results from the software in data analyses. Emphasis will be placed on the application of econometric and statistical methods of data analyses. Topics will include customer choice analysis, customer segmentation and targeting, customer lifetime value calculation, and forecasting.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student standing.

Typically Offered
Fall

MKTG 891 - Special Topics in Marketing

Credits: 3

Investigation and discussion of a selected topic in marketing. One of the following five topics will be chosen for intensive study: (1) industrial marketing management, (2) advanced consumer behavior, (3) product policy, (4) financial aspects of marketing management, (5) marketing in the service sector.

Repeat for Credit
Y

Requisites
Prerequisite: MKTG 705 or 6 hours of marketing.

Typically Offered
On sufficient demand

MLANG 001 - Study Abroad

Credits: 0

Study Abroad

Repeat for Credit
Y

Typically Offered
Fall, Spring

MLANG 100 - Beginner Studies in Foreign Language

Credits: 1-5

Course used to transfer credit for first and second semester language courses not offered at K-State. Consultation for approval is expected.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Global Issues and Perspectives

MLANG 106 - Legal Terminology: Latin and French for Law Professions

Credits: 2

Designed to familiarize students with vocabulary at use in the American legal system. Teaches basic French and Latin components used in legal terminology.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

MLANG 110 - Hebrew for Beginners

Credits: 2

An introduction to the Hebrew language and the culture of the people who speak the language. This general introduction includes skill development in reading, writing, and speaking basic Hebrew.

Note
Designed specifically for English-speaking students.

Repeat for Credit
N

Typically Offered
Intersession

Global Issues and Perspectives

MLANG 120 - Multilingualism in the U.S.

Credits: 3

Examines the sociolinguistic and sociocultural coexistence among English and varied minority languages (e.g., French, Chinese, Spanish, and German) through different blocks or content units. Students will gain an appreciation for multiculturalism and multilingualism in the U.S. while expanding their awareness concerning global issues. To this end, the students will learn and engage in discussions about race, identity, migration, acculturation, syncretical views and practices, language variation, and linguistic adaptability as experienced by multilingual communities with diverse ethnic backgrounds.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.

MLANG 200 - Intermediate Studies in Foreign Language I

Credits: 1-5

Course used to transfer credit for third semester language courses not offered at K-State.

Note
Prior consultation for approval is expected.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Global Issues and Perspectives

MLANG 280 - Studies in World Literature and Culture

Credits: 1-5

Provides the students the opportunity to investigate in detail a particular theme or genre in World literature or culture. Taught in English.

Note
Topics will vary.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
ENGL 280

K-State 8
Aesthetic Interpretation
Historical Perspectives

MLANG 600 - Principles of Linguistics: Language Structure and Language Use

Credits: 3

Introduction to the fundamentals of linguistic analysis, including the sound system (phonetics and phonology), word formation (morphology), sentence formation (syntax), meaning (semantics and pragmatics). Formal and functional (usage-based) perspectives. Application of linguistics to language acquisition theory and to pedagogy.

Repeat for Credit
N

Requisites
Prerequisite: For ML majors & minors: GRMN 523 or GRMN 527, or FREN 513 or FREN 518 or one 700-level class, or SPAN 410 or SPAN 420 or SPAN 510; For other majors: ENGL 200.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

MLANG 710 - Introduction to Foreign Language Pedagogy

Credits: 3

Second and foreign language pedagogical theory is combined with the examination of practical concerns in the teaching of languages, in order to provide future and current instructors with the necessary background for making informed decisions concerning classroom practices. Taught in English.

Note
Instructor approval required.

Repeat for Credit
N

Typically Offered
Fall

MLANG 711 - Teaching Language Online

Credits: 3

Online education pedagogical theory is combined with the examination of practical concerns in the teaching of languages (second and foreign) in an online environment. Students explore various ways to adapt second and foreign language teaching practices for various online environments, such as synchronous and asynchronous learning, hybrid and hyflex course design, and self-paced formats. Provides future and current instructors with the tools that they need to create and teach in online environments. Taught in English.

Repeat for Credit
N

Typically Offered
Fall or Spring

MLANG 720 - Introduction to Literary Theory and Research Methodology

Credits: 3

An overview of theoretical approaches and classical texts that inform current trends in literary research in the modern languages.

Repeat for Credit
N

Typically Offered
On sufficient demand

MLANG 770 - Theories of 2nd Language Acquisition

Credits: 3

Introduction to the major theoretical frameworks of second language acquisition (SLA). Reading, discussion, and analysis of SLA research on a variety of linguistic and learning issues. Of interest to students of both language acquisition and literature. Taught in English.

Note
Instructor approval required.

Repeat for Credit
N

Typically Offered
Spring

MLANG 779 - Seminar in Modern Languages

Credits: 3

Variable topics.

Repeat for Credit
N

Typically Offered
Fall

MLANG 799 - Problems in Modern Languages

Credits: 1-18

Problems in Modern Languages

Repeat for Credit
N

Typically Offered
Other

MLANG 800 - Colloquium in Modern Languages

Credits: 2

A graduate colloquium for M. A. candidates in French, German, and Spanish. Variable topics in literary and cultural fields appropriate to study in common by students in these languages.

Repeat for Credit
Y

Typically Offered
Other

MLANG 803 - Practicum in Adult TESL/TEFL: Written and Oral Communication

Credits: 3

Overview of current issues and methodology in TES/FL and foundation for further exploration of teaching techniques used in skill specific areas of oral and written communication (including listening, speaking, reading, and writing). Provides students with training in TES/FL for adult learners. Students will acquire specific content and practice in defined skill areas.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

MLANG 804 - Seminar/Topics in TESL/TEFL

Credits: 3

Variable topics on different aspects /areas of TEFL, e.g., pragmatics, assessment, and writing, etc. Overview of key concepts for each topic, issues, and methodology, discussion of its applications in TEFL. Equip students with the necessary knowledge and skills to competently teach different areas in TEFL.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

MLANG 805 - Second Language Assessment

Credits: 3

Explores the basic concepts, principles, and methodology of second language assessment.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall, Spring, Summer

MLANG 899 - Research in Modern Languages

Credits: 1-18

Research in Modern Languages

Repeat for Credit

Y

Typically Offered
Fall

MLAS 100 - Survey of Machine Learning and Autonomous Systems

Credits: 3

Rapid progress has been made in the development of autonomous systems. Terrestrial robotics, interplanetary systems, planetary robotics, uncrewed aerial systems, remote sensing platforms, and autonomous automobiles have all made great advances. These technologies have been enhanced by advances in artificial intelligence (AI). A non-programming perspective, this course will survey the current state-of-the-art perspective on artificial intelligence technologies used in autonomous systems. We start by presenting both ML-based and AI-based architectures that form the basis of perception, path planning, cognitive arbitration, and motion control.

Repeat for Credit
N

Typically Offered
Fall

MLAS 200 - Introduction to Automata and Cybernetic Systems Theory

Credits: 3

This introductory course is a survey of the most common machine learning approaches used in creating descriptive and predictive analytical solutions. Students will be introduced to both the theoretical concepts and practical applications of machine learning and autonomous system. The course material introduces the probabilistic programming paradigm. Case studies will be used to illustrate the application of probabilistic programming frameworks in an applied industrial perspective.

Repeat for Credit
N

Requisites
Corequisite: MLAS 100

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MLAS 350 - Data Structures for Machine Learning

Credits: 3

This course will cover the design, development, and employment of data structures and algorithms with an emphasis on time-space complexity. Data structure processing and computational processing problems related to the following time-space problems will be explored: constant, logarithmic, cubic, quadratic, polynomial, and exponential. Additionally, students will leverage Bachmann-Landau notation to describe time-space complexity.

Repeat for Credit
N

Requisites
Prerequisite: MLAS 200 and CYBR 335

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MLAS 390 - Unsupervised Learning in Autonomous Systems

Credits: 3

Unsupervised learning is a type of machine learning that looks for previously undetected patterns in a data set with no pre-existing labels and with a minimum of human supervision. Using probabilistic programming languages, students will learn how to develop, interpret and deploy unsupervised machine learning models within autonomous systems. Common machine learning algorithms for unsupervised learning will be leveraged: k-means clustering, principal component analysis, non-negative matrix factorization, singular decomposition, and density-based spatial clustering of application with noise.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 and MLAS 350 or CC 315

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

MLAS 400 - Supervised learning in Autonomous Systems

Credits: 3

Supervised learning is the machine learning task of learning a function that maps an input to an output based on example input-output pairs. Using probabilistic programming languages, this course will illustrate supervised machine learning concepts via data preparation, training data, model evaluation, and operationalization. Common machine learning algorithms for supervised learning such as K-nearest neighbors, logistic regression, decision trees and random forests will be explored and operationalized within an autonomous system.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 and MLAS 350 or CC 315

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MLAS 410 - Natural Language Processing

Credits: 3

This course gives an overview of modern data-driven techniques for natural language processing. We will discuss all the steps that are required for NLP such as text classification, neural nets for text classification, language modeling, word embedding, sequence labeling, context free grammar, constituency parsing, dependency parsing syntax, computational ethics, information extraction, conversational agents, machine translation and computational social science.

Repeat for Credit
N

Requisites
Prerequisite: MLAS 350

Typically Offered
Fall or Spring

MLAS 412 - Deep Learning

Credits: 3

This advanced deep learning course is designed to provide students with a comprehensive understanding of deep learning techniques, their applications, and the practical skills needed to work with deep neural networks. By the end of this course, students will have the knowledge and skills to design, implement, and evaluate advanced deep learning models for a wide range of applications.

Repeat for Credit
N

Requisites
Prerequisite: MLAS 350

Typically Offered
Fall or Spring

MLAS 500 - Reinforcement Learning in Autonomous Systems

Credits: 3

This course will guide students through the development and operationalization of reinforcement learning frameworks. Reinforcement learning architectures such as Markov decision processes, Q-Learning, artificial neural networks, recurrent neural networks, and generative adversarial networks will be explored. This course is a guide to the complexities of reinforcement learning, their respective architectures and implementations within an autonomous system.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 and MLAS 350 or CC 315

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

MLAS 501 - Artificial Intelligence Studio

Credits: 3-6

Students are expected to develop and operationalize an artificially intelligent framework using applied statistical methods, techniques in probabilistic programming, and principles of artificial intelligence. Students will be required to document underlying AI theories and demonstrate an operationalized AI framework.

Repeat for Credit
Y

Requisites
Corequisite: MLAS 390 or MLAS 400 or MLAS 500

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

MLAS 502 - Autonomous Systems Senior Capstone

Credits: 6

Students are expected to develop and operationalize an autonomous system using cybernetic principles of learning, computational frameworks, quantitative methods, and principles of engineering. Students will develop project documentation as needed to describe their autonomous systems project. Lastly, students will be required to successfully defend their project via a final oral presentation to associated faculty members. Whenever feasible, real-world projects are solicited from businesses.

Repeat for Credit
N

Requisites
Prerequisite: MLAS 390, MLAS 400, and MLAS 500

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

MLAS 650 - Autonomous Systems Architecture Studio

Credits: 3

This course introduces the conceptualization and architectural development of cognitive processing engines within an autonomous system that also includes the architecture of autonomous systems, design of agents, models and knowledge representations, control of robotic manipulators, machine vision, the dynamics of wheeled, air, space and underwater robots, navigation and localization.

Repeat for Credit
N

Requisites
Prerequisite: Experience with computer programming.

Typically Offered
Fall, Spring

MLAS 700 - Advanced Cybernetic Systems Development

Credits: 3

This course is focused on the design and development of cognitive processing engines within the context of the larger autonomous system. General cybernetic theories will be used in specific example where students will gain experience designing and implementing computerized feedback control systems. The principles of cybernetics are universal so that students will be able to transfer their understanding and skills to other industrial domains.

Repeat for Credit
N

Requisites
Prerequisite: MLAS 650

Typically Offered
Fall, Spring

MLAS 750 - Autonomous Networking within Cyber-Physical Systems

Credits: 3

Students will design and develop communication frameworks for cognitive processing engines within autonomous systems connected to CPS frameworks. The development of communication infrastructures that connect bodied (and unbodied) autonomous entities will also be

explored. Current literature, techniques, theories, and methodologies will be reviewed and discussed. Industry-base projects will help students creatively apply cutting-edge CPS research to their autonomous systems research problems.

Repeat for Credit
N

Typically Offered
Fall, Spring

MLAS 800 - Integrated Machine Learning and Autonomous Systems

Credits: 3

Students will study and develop an intelligent autonomous system, integrating perception, manipulation, learning, planning, and interaction. The autonomous system will be capable of learning and performing a variety of tasks in real-world environments while collaborating with humans. Additional artificial intelligence topics include: contextual reasoning, knowledge representation, perception and control, deep learning, and transfer learning.

Repeat for Credit
N

Requisites
Prerequisite: MLAS/CYBR 750

Typically Offered
Fall, Spring

MPH 701 - Fundamental Methods of Biostatistics

Credits: 3

A course emphasizing concepts and practice of statistical data analysis for the health sciences. Basic techniques of descriptive and inferential statistical methods applied to health related surveys and designed experiments. Populations and samples, parameters and statistics; sampling distributions for hypothesis testing and confidence intervals for means and proportions involving one sample, paired samples and multiple independent samples; odds ratios, risk ratios, simple linear regression. Use of statistical software to facilitate the collection, manipulation, analysis and interpretation of health related data.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
STAT 701

MPH 708 - Veterinary Epidemiology

Credits: 2

Introduction to the principles and methods of veterinary epidemiology: emphasizing how diseases affect populations (and associated implications for individuals), and application to disease diagnosis, treatment, prevention, and control.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
DMP 708

MPH 720 - Administration of Health Care Organizations

Credits: 3

Comprehensive review of current health care institutions and their response to the economic, social/ethical, political/legal, technological, and ecological environments.

Note
Three hours lecture

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
FNDH 720

MPH 754 - Introduction to Epidemiology

Credits: 3

The purpose of this course is to introduce students to the basic principles and methods of epidemiology in order to recognize and understand how disease affects populations (and the associated implications for individuals). This course will prepare students to use epidemiologic methods to solve current and future challenges to diagnose, treat, prevent, and control disease during their professional training and throughout their career.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
DMP 754

MPH 802 - Environmental Health

Credits: 3

This is a three-credit graduate-level course. Students will be exposed to professional practice of environmental sciences, epidemiology, toxicology, occupational health and industrial hygiene, and consumer health and safety. Topics include the methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; ameliorating hazards; and protecting the population through waste management, regulatory programs, environmental inspections, food and product safety, and environmental policy. Participation is required.

Repeat for Credit
N

Typically Offered
Spring, Summer

Cross-listed
DMP - 802 Environmental Health

MPH 806 - Environmental Toxicology

Credits: 2

An advanced toxicology course concerned with the occurrence, biological effect, detection, and control of foreign chemicals in the environment.

Repeat for Credit
N

Requisites
Prerequisite: Consent of staff.

Typically Offered
Spring

Cross-listed
DMP 806

MPH 818 - Social and Behavioral Bases of Public Health

Credits: 3

The role of behavioral, social, psychological, economic, environmental, and social structural factors in both the occurrence of health problems in groups and populations, and in the development of the risk factors that contribute to these problems. Principles of health behavior change and the application of these principles to a variety of health issues as well as an emphasis on how social structural factors impact health are examined to better understand health behavior and health inequities in contemporary society.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate status in public health or kinesiology program.

Typically Offered
Fall

Cross-listed
KIN 818

MPH 840 - Public Health Practice

Credits: 1-6

Supervised field experience in an international, state, local, or district health agency or other appropriate health agency.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor. FDSCI 840, DMP 840, FNDH 840, and KIN 840.

Typically Offered
Fall, Spring, Summer

Cross-listed
FDSCI 840, DMP 840, FNDH 840, KIN 840

MPH 854 - Intermediate Epidemiology

Credits: 3

Epidemiologic principles of disease with a focus on measures of disease occurrence, association and impact, determinants of disease diagnostic test evaluation, study design and critical literature evaluation.

Repeat for Credit
N

Requisites
Prerequisite: DMP 708 or DMP 754 or equivalent AND STAT 701 or STAT 703 or DMP 830 or equivalent.

Typically Offered
Spring

Cross-listed
DMP 854

MSCI 100 - Introduction to Military Science and ROTC

Credits: 1-18

Basic drill, physical fitness, rappelling, army values, military presentations and basic marksmanship.

Note
Two classroom hours, a required leadership lab, and three one-hour sessions of physical fitness per week. Participation in a weekend exercise is optional, but highly encouraged.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

MSCI 101 - Introduction to Military Leadership

Credits: 1-18

Principles of effective leading. Communication skills to improve individual performance and group interaction. Relation of military organizational ethical values to the effectiveness of a leader, incorporating perspectives of the evolution of the U.S. Military from colonial times through the modern era.

Note
Two classroom hours, a required leadership lab, and three one-hour sessions of physical fitness per week. Participation in a weekend exercise is optional, but highly encouraged.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

MSCI 200 - Self/Team Development

Credits: 1-18

Ethics-based military leadership skills that develop individual abilities and contribute to building effective teams. Oral presentations, leadership, land navigation, and basic military tactics.

Note
Two classroom hours; a required leadership lab; participation in three one-hour physical fitness sessions. Participation in a weekend exercise.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

MSCI 202 - Individual/Team Military Tactics

Credits: 1-18

Introduction to individual and team aspects of military tactics in small unit operations. Safety assessments,

movement techniques, military orders process, rifle marksmanship, rappelling.

Note
Two classroom hours; a required leadership lab; participation in three one-hour physical fitness sessions. Participation in a weekend exercise is optional, but highly encouraged.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

MSCI 206 - Leaders Training Course

Credits: 0-4

A five-week summer camp conducted at Fort Knox, Kentucky. The United States Army provides pay, travel, lodging and meal costs. No military obligation incurred.

Note
Open only to students who have not completed all four of MSCI 101, MSCI 102, MSCI 201, and MSCI 202, and who pass a physical examination (paid for by ROTC).

This course is a summer camp and the student receives their grade in the Fall semester.

Repeat for Credit
N

Typically Offered
Fall, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

MSCI 301 - Leading Small Military Organizations I

Credits: 1-18

Series of practical opportunities to lead small groups in situations of increasing complexity. Uses small unit defensive tactics and opportunities to plan and conduct training.

Note
Three classroom hours, a leadership lab, participation in three one-hour physical fitness sessions. Participation in one weekend exercise is required, and one or two additional weekend exercises are offered for optional participation.

Repeat for Credit
N

Requisites
Prerequisite: Completion of the basic course. Instructor permission required for enrollment.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

MSCI 302 - Leading Small Military Organizations II

Credits: 1-18

Continues methodology of MSCI 301. Military missions and task analysis. Ethical decision making and lessons from leadership case studies.

Note
Three classroom hours, a leadership lab, participation in three one hour physical fitness sessions. Participation in one weekend exercise is required; two other weekend exercises optional.

Repeat for Credit
N

Requisites
Prerequisite: Completion of MSCI 301 and instructor permission.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 306 - Leaders Development and Assessment Course

Credits: 0-4

A five-week camp conducted at Fort Lewis, Washington, by members of Kansas State University and other university Army ROTC faculty. The U.S. Army provides pay, travel, lodging and most meal costs. Highly structured and demanding, stressing leadership at small unit levels under varying, challenging conditions.

Repeat for Credit
N

Requisites
Prerequisite: MSCI 301 and MSCI 302.

Typically Offered
Fall, Summer

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 351 - Military Leadership Studies and Practical Applications

Credits: 1-18

Independent research, analysis and monthly discussion on related military topics. Small unit tactics and practical application of leadership skills and individual research projects.

Note
Three classroom hours per week, a leadership lab, participation in three one-hour physical fitness sessions. Participation in one weekend exercise is required; two other weekend exercises optional.

Repeat for Credit
N

Requisites
Prerequisite: MSCI 301 or MSCI 302. Instructor permission.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 401 - Leadership Challenges and Objective-Setting

Credits: 1-18

Plan, conduct, and evaluate activities of the ROTC cadet organization. Articulate goals, put plans into action to attain them. Assess organizational cohesion and develop strategies to improve it. Develop confidence in skills to lead people and manage resources. Learn and apply various Army policies and programs.

Note
Three classroom hours, a two-hour leadership laboratory, and weekly physical fitness activities. Cadets will also participate in a weekend field training exercise (FTX) and a formal military social event.

Repeat for Credit
N

Requisites
Prerequisite: MSCI 301 and MSCI 302 or department head permission.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 402 - Transition to Lieutenant

Credits: 1-18

Continues the methodology from MSCI 401. Identify and resolve dilemmas. Refine counseling and motivating techniques. Examine aspects of tradition and law as relate to leading as an officer in the United States Army. Prepare for a future as a successful United States Army lieutenant.

Note
Cadets will also participate in a weekend field training exercise (FTX) and a formal military social event.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

MSCI 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program and Advanced Military Science Curriculum (must have completed the Basic Military Science Curriculum or received United States Army Cadet Command credit through prior military service or completion of the Leaders Training Course).

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 501 - Advanced Transition to Lieutenant I

Credits: 1-18

Independent research, analysis and monthly discussion on related military topics. Personal, academic, and professional goals and objectives, development and maintenance of an officer evaluation report support form.

Repeat for Credit
N

Requisites
Prerequisite: MSCI 401 and MSCI 402 or department head permission.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

MSCI 502 - Advanced Transition to Lieutenant II

Credits: 1-18

Independent research, analysis, and monthly discussion on related military topics. Personal, academic, and professional goals and objectives, development, and maintenance of an officer evaluation report support form.

Repeat for Credit
N

Requisites
Prerequisite: MSCI 501.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

Aesthetic Interpretation

MUSIC 117 - Wind Symphony

Credits: 0-1

Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 118 - Jazz Ensemble Lab A

Credits: 0-1

An intermediate level college jazz ensemble. Examine and perform various jazz ensemble pieces selected from extant literature which may include cool, swing, hard bop, bossa, Latin, samba, funk/rock, and other styles.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

MUSIC 119 - Madrigal and Motet Ensemble

Credits: 0-1

Vocal chamber ensemble open to any KSU student by audition. Ensemble performs literature from the Middle Ages through the 18th century. Rehearses once per week and perform one or two concerts per semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

MUSIC 120 - Recorder Ensemble

Credits: 0-1

Recorder Ensemble is open to all KSU students. The ensemble performs literature from the Middle Ages through contemporary compositions. Rehearses once per week and performs one or two concerts per semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

MUSIC 121 - Collegiate Chorale

Credits: 0-1

Open to all interested singers. Audition determines membership in this and other choral organizations.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 129 - University Orchestra

Credits: 0-1

A non-audition ensemble open to all KSU string musicians who perform literature ranging from grade levels 1-3. Conducted by KSU string education majors, students rehearse once per week and perform one or two concerts throughout the spring semester.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

MUSIC 130 - Symphony Orchestra

Credits: 0-1

Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 131 - Theatre Orchestra

Credits: 0-1

Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 135 - University Tenor/Bass Choir

Credits: 0-1

Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 140 - University Treble Chorus

Credits: 0-1

Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 232 - Fundamentals of Teaching Music

Credits: 2

Techniques, materials, and experiences for a variety of music classes will be examined through discovery. Furthermore, lesson plan development, writing, and implementation will be examined in detail.

Repeat for Credit
N

Typically Offered
Fall, Spring

MUSIC 233 - English Diction

Credits: 1

Focuses on enunciation and transcription of the English language as it applies to lyric (sung) diction using the international Phonetic Alphabet (IPA). Familiarity with proper pronunciation is gained through listening, singing, and transcription assignments.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

MUSIC 234 - String Techniques and Materials

Credits: 1

A beginning course in the fundamentals of playing and methods for teaching stringed instruments.

Note
For music majors only, and not open to string majors.

Repeat for Credit
N

Typically Offered
Fall, Spring

MUSIC 235 - Percussion Techniques and Materials

Credits: 1

The fundamentals of playing and methods of teaching percussion instruments.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 236 - Clarinet & Saxophone Woodwind Techniques and Materials

Credits: 1

A course in the fundamentals of playing and methods for teaching single reed woodwind instruments.

Note
For music majors only.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 237 - Double Reed and Flute Woodwind Techniques and Materials

Credits: 1

A course in the fundamentals of playing and methods for teaching double reed and flute woodwind instruments.

Note
For music majors only.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 238 - High Brass Techniques and Materials

Credits: 1

A course in the fundamentals of playing and methods for teaching high brass instruments.

Note
For music majors only.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 239 - Low Brass Techniques and Materials

Credits: 1

A course in the fundmentals of playing and methods for teaching low brass instruments.

Note
For music majors only.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 240 - Advanced String Techniques and Materials

Credits: 1

Playing and teaching skills beyond fundamentals and presentation of materials suitable for private and public school instruction at the secondary level.

Note
Required of all instrumental majors in music education.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 234.

Typically Offered
Spring

K-State Core
6 Arts and Humanities

MUSIC 241 - Italian Diction

Credits: 1

Rules for pronouncing and translating Italian vocal texts.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

MUSIC 242 - French Diction

Credits: 1

Rules for pronouncing and translating French vocal texts.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

Requisites
Prerequisite: Junior standing

Typically Offered
Fall, Spring

MUSIC 432 - Music Business 2

Credits: 2

Explores elements of the music industry including business frameworks, legal topics, and interpersonal relations. Projects are individualized to the student's specialty area within the music industry.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 431

Typically Offered
Fall, Spring

MUSIC 441 - Pop Music Icons

Credits: 3

An exploration of the musical decisions that define the world's leading pop musicians and songwriters. Using directed listening and curated playlists, students will engage with musical offerings and develop an understanding of influences for each artist studied. Individual artists or collected groups of artists are examined in detail.

Note
No previous training is necessary, but prior work with the elements of music, songwriting, or a broad popular music course may be helpful.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MUSIC 454 - Upper Division Secondary Performance

Credits: 1-4

For students who wish to study an instrument or voice other than the major performance area. Instruction is offered every semester in voice and each of the following instruments: baritone, bassoon, clarinet, double bass, early winds, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, viola da gamba, violin, and violoncello. This course allows for upper-division study within their secondary instruments.

Note
This course is aligned with upper division performance courses (MUSIC 455) but is offered to students who are achieving at the upper-division level on their secondary instrument. Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

MUSIC 455 - Upper-Division Performance

Credits: 0-4

Instruction and experience in solog performance is offered every semester in voice and each of the following instruments: baritone, bassoon, clarinet, double bass, early winds, flute, French horn, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, viola da gamba, violin, and violoncello.

Note
Students may enroll in more than one instrument simultaneously and may earn 1 to 4 hours per semester in each instrument. Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 456 - Choral Conducting

Credits: 1

Continued mastery of the skills in Conducting I while emphasizing essential techniques and interpretation for choral ensembles.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 365.

Typically Offered
Spring

MUSIC 457 - Instrumental Conducting

Credits: 1

Continued mastery of the skills in Conducting while emphasizing essential techniques and interpretation for instrumental ensembles.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 365.

Typically Offered
Spring

MUSIC 458 - Music in the Schools, PK-6

Credits: 3

The study of the musical characteristics of children and development of appropriate curriculum, instructional materials and techniques, and related technology for teaching musical understanding, literacy, multi-cultural connections, and creative improvisation in grades PK-6 instrumental, vocal, and general music.

Note
This course includes supervised field experiences.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDCI 318, EDCI 320, and EDSP 323.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

MUSIC 459 - Music Programs in Middle School/High School

Credits: 3

Organization and administration of the comprehensive music program in junior and senior high schools; including the study of vocal and instrumental ensemble development, as well as techniques and materials for other types of music classes.

Note
This course includes a supervised field experience.

Repeat for Credit
N

Requisites
Prerequisite: EDCI 315, EDCI 318, EDCI 320, and EDSP 323.

Typically Offered
Fall

MUSIC 460 - Teaching Beginning Instruments

Credits: 1

Students will learn and employ techniques and strategies for teaching beginning band and orchestra instruments.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 234, EDCEP 315, EDCI 320, EDSP 323.

Typically Offered
Spring

MUSIC 461 - Advanced Studies in Music Education

Credits: 2

Advanced instructional methods and technologies related to the teaching of music in grades pre-K-12 implemented through investigation of current trends in the field, advanced unit design, and field experience.

Repeat for Credit
Y

Requisites
Prerequisite: EDCI 315, EDCI 318, EDCI 320, EDSP 323, and MUSIC 458 with grade of C or higher or MUSIC 459 with a grade of C or higher.

Typically Offered
Fall, Spring

MUSIC 462 - Instrumental Jazz Instruction

Credits: 1

Guides future instrumental teachers on techniques to teach jazz including beginning improvisation, combo, big band techniques, and school jazz literature.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 463 - Vocal Jazz Instruction

Credits: 1

Guides future choral teachers on techniques to teach jazz including beginning improvisation, jazz choir, and school jazz literature.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 464 - Methods and Materials for the Studio

Credits: 2

Methods of teaching fundamental techniques; selection of teaching materials outlining courses of study. For undergraduate students in performance curricula. Taught in divisions according to the major. Practical application through supervised studio teaching.

Repeat for Credit
N

Requisites
Corequisite: MUSIC 455

Typically Offered
Fall, Spring, Summer

MUSIC 466 - Music History I: Ancient Greece to Beethoven

Credits: 3

An overview of stylistic trends, major composers, repertoire of ancient Greece, the Middle Ages, Renaissance and early Baroque periods.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 100, ENGL 200, and a grade of C or higher in MUSIC 320.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

MUSIC 467 - Music History II: Beethoven to Present

Credits: 3

An overview of stylistic trends, major composers, repertoire of the late Classical period to present day.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 100, ENGL 200, and a grade of C or higher in MUSIC 360 and MUSIC 361.

Typically Offered
Spring

MUSIC 468 - Music History III: 1850 to the Present

Credits: 3

An overview of the development of stylistic and cultural trends, major composers, and repertoire of the late Romantic period through the present.

Repeat for Credit
N

Requisites
Prerequisite: Grade of C or higher in Music 320.

Typically Offered
Fall

MUSIC 469 - Instrumentation and Arranging

Credits: 2

Study of writing and arranging for the strings, woodwinds, brass and percussion as well as choral ensembles. Functional ranges and practical applications through score study and projects.

Repeat for Credit
N

Requisites

Prerequisite: MUSIC 360, MUSIC 361

Typically Offered
Fall

MUSIC 475 - Opera Workshop

Credits: 1-18

Principles and techniques of operatic and musical theatre production, with emphasis on class rehearsal and performance of selected scenes from opera and musical drama; brief survey of the history of opera.

Note
Offered jointly by the Departments of Music and Communication Studies. Vocal ensemble credit may be earned in this course.

Repeat for Credit
Y

Typically Offered
On sufficient demand

Cross-listed
THTRE 475

K-State 8
Aesthetic Interpretation

MUSIC 480 - Upper-Division Ensemble Performance

Credits: 1

Instruction is offered each semester in the following areas: brass, chamber music, concert jazz, jazz combo, strings, winds, percussion, and vocal ensemble.

Note
Admission is by audition and students may enroll in more than one ensemble simultaneously.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

MUSIC 490 - Collegium Musicum

Credits: 0-1

A vocal and instrumental ensemble devoted to the historically-informed performance of music written primarily during the Medieval, Renaissance, and Baroque periods (c. 1100-1750. Instruments of the historical period used when possible.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

MUSIC 500 - Applied Recital

Credits: 0

Public performance; vocal or instrumental with suggested performing time of 25 minutes. Intended for performances in addition to required recital performances (MUSIC 502 and/or 501).

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 255
Corequisite: MUSIC 255 or MUSIC 455

Typically Offered
Fall, Spring

MUSIC 501 - Half Recital

Credits: 1

Public performance; vocal or instrumental with suggested performing time of 25 minutes.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MUSIC 502 - Full Recital

Credits: 2

Public performance; vocal or instrumental with suggested performing time of 50 minutes.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MUSIC 523 - Upper-Division Composition

Credits: 0-18

Composition instruction through individual lessons and group seminar instruction. Emphasis on meeting professional standards of composition and score/part preparation and creation of a varied portfolio of works.

Note
Submission of a portfolio of pieces for faculty review and approval.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MUSIC 599 - Special Studies in Music

Credits: 1-3

Special Studies in Music

Repeat for Credit
Y

Requisites
Prerequisite: Background of courses needed for studies undertaken.

Typically Offered
Fall, Spring, Summer

MUSIC 696 - Jazz Theory I

Credits: 1

Basic fundamentals of jazz theory to develop critical thinking and performing skills.

Note
Instructor permission.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 697 - Jazz Theory II

Credits: 1

Intermediate level fundamentals of jazz theory to develop critical thinking and performing skills.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 696, MUSIC 298.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

MUSIC 698 - Jazz Improvisation I

Credits: 1

Develop skills in the area of jazz improvisation in a performance lab setting.

Note
Instructor consent.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 699 - Jazz Improvisation II

Credits: 1

Continued development of jazz improvisational skills in a performance lab setting.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 697 or consent of instructor.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

MUSIC 700 - Literature Analysis

Credits: 3

Explore, evaluate, and analyze the masterworks of the wind, choral, and orchestral genres.

Note
This course will alternate annually between Instrumental and Choral literature.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 701 - Graduate Theory Review

Credits: 2

For graduate students in music for whom additional work in the harmonic and formal aspects of tonal and chromatic music is needed.

Note
This course does not fulfill degree requirements.

Repeat for Credit
N

Typically Offered
Fall, Summer

MUSIC 702 - Style Analysis

Credits: 3

Training in a comprehensive, systematic analytical approach to all style periods, and in verbalizing analytical perceptions.

Repeat for Credit
N

Typically Offered
Fall, Summer

MUSIC 703 - Graduate History Review

Credits: 2

For graduate students in music for whom additional work in music history is needed based on thier performance on the Graduate Music History Entrance Exam. This course does not fulfill graduate degree requirements. A grade of an A or B is required to enroll in graduate level music history courses.

Repeat for Credit
N

Typically Offered
Fall, Summer

MUSIC 704 - Symphonic Literature

Credits: 3

The development of orchestral music from the late Baroque to the present, with emphasis on selected symphonies of the late eighteenth and nineteenth centuries.

Repeat for Credit
N

Typically Offered
Other

MUSIC 705 - Chamber Music Literature

Credits: 3

A selected survey of masterpieces of small ensemble music from 1750 to the present. Special emphasis on the string quartet.

Repeat for Credit
N

Typically Offered
Other

MUSIC 706 - Song Literature

Credits: 3

Survey, by historical period and national styles, of major solo vocal works.

Repeat for Credit
N

Typically Offered
Other

MUSIC 707 - History of Wind Bands

Credits: 3

Development of the wind band medium from the Renaissance to the present, with focus on the composers and literature.

Repeat for Credit
N

Typically Offered
Spring-Even Years

MUSIC 708 - Choral Literature

Credits: 3

A study of standard choral masterpieces in both large and small forms from 1450 to the present.

Repeat for Credit
N

Typically Offered
Other

MUSIC 709 - History of School Choral Music

Credits: 3

Development of choral music in schools with focus on composers and literature.

Repeat for Credit
N

Typically Offered
Other

MUSIC 710 - Percussion Pedagogy

Credits: 2-3

Advanced study of percussion instruments and related performance techniques, teaching methods and responsibilities, organization, and literature.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 711 - Concert and Ethnic Percussion Techniques

Credits: 2-3

Advanced study of percussion performance techniques commonly associated with concert band and percussion ensemble, as well as percussion techniques associated with music of other cultures.

Note
The three credit-hour option includes additional assignments.

Repeat for Credit
N

Typically Offered
Other

MUSIC 712 - Jazz and Marching Percussion Techniques

Credits: 2-3

Advanced study of percussion performance techniques commonly associated with marching percussion and jazz idioms.

Note
The three credit-hour option includes additional assignments.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 713 - Survey of Vocal Solos for Adolescents

Credits: 3

An in-depth study of appropriate solo literature for adolescent singers.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 714 - Advanced Orchestration

Credits: 2

The study of orchestra and band scores. Exercises in orchestrating this type of music for different choirs of instruments, as well as scoring for full orchestra and symphonic band.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 469.

Typically Offered
Spring

MUSIC 715 - Advanced Woodwind Techniques

Credits: 2

Advanced techniques in the teaching of all woodwind instruments for music teachers.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 716 - Advanced Brass Techniques

Credits: 2

Advanced techniques in the teaching of all brass instruments for music teachers.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 717 - Lower String Pedagogy

Credits: 2

Study of low string technique and related teaching methods. Intended for teachers of string, concert/jazz bands and vocal music if they use a bass with accompaniment combos for pit orchestras or swing choirs.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 718 - Upper String Pedagogy

Credits: 2

Study of violin technique and related teaching methods, also applicable to other bowed string instruments.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 719 - Marching Band Techniques

Credits: 2

Philosophical and practical purposes of the marching band, and the skills necessary to design, organize, instruct, and evaluate a marching band show.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 720 - Choral Ensemble Techniques

Credits: 2

Philosophical and practical study of the choral ensemble, and the skills necessary to design, organize, instruct and evaluate the choral program.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 721 - Jazz Techniques

Credits: 2

Basic practices found in jazz education, including literature, teaching techniques, and resource materials.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 722 - Arranging for Bands

Credits: 2

Assessing, evaluating, and applying the basic issues, techniques, and possibilities inherent in scoring and arranging for various wind band media. Primary attention will be given to concert and marching bands, but students will also spend time learning about various jazz ensembles and other possible combinations of wind and percussion instruments.

Repeat for Credit
N

Typically Offered
Summer

K-State 8
Aesthetic Interpretation

MUSIC 723 - Arranging Choral Music

Credits: 2

Examination of basic compositional issues. Application of compositional techniques. Scoring and arranging for various choral ensembles.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 724 - 18th Century Counterpoint

Credits: 2

Contrapuntal compositional techniques from the late Baroque to Classical periods, including compositional procedures for the canon and fugue.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 360, MUSIC 361.

Typically Offered
Fall, Summer

MUSIC 725 - Theories of Contemporary Music

Credits: 2

Introduction to analytical and compositional techniques applicable to the predominately non-tonal music of the 20th and 21st centuries.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 360, MUSIC 361.

Typically Offered
Spring, Summer

MUSIC 726 - History of the Opera

Credits: 3

A study of selected masterpieces of musical drama, with emphasis on the relationship of music and drama, and on the unique qualities of opera as a collective artwork.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 320.

Typically Offered
Other

MUSIC 727 - Introduction to Historical Performance Practice

Credits: 3

Studies the changing performance styles in music from the Middle Ages to the 18th century. Examines problems in the field of historical performance practices. Interpretation of musical performances (ornamentation, articulation, tuning, temperament, rhythmic elements, and tempo) based on contemporaneous sources. Students will perform short selections and prepare musical editions based on their findings.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 360

Typically Offered
Spring

MUSIC 728 - Advanced Instrumental Rehearsal Techniques

Credits: 2

Explore, evaluate, and develop the musical understanding and skills necessary in leading instrumental ensembles toward significant musical expression through effective rehearsal techniques.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 729 - Advanced Choral Rehearsal Techniques

Credits: 2

Explore, evaluate, and develop the musical understanding and skills necessary in leading choral ensembles toward significant musical expression through effective rehearsal techniques.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 730 - Organization and Administration of School Music Programs

Credits: 2

Provides models and ideas on organizing program/teaching to enable the teacher and students to succeed and enjoy the music making process. Present strategies and philosophies on dealing with administrators, parents, peers, and students will be discussed, as well as motivation of self and student.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

MUSIC 731 - Music Business 1

Credits: 2

Provides students with the entrepreneurial tools for a career in music. Topics covered include: resumes, curriculum vitas, developing music websites, creating an on-line presence, tax protocol for musicians, goal-setting strategies, and meeting short and long-term music business goals

Repeat for Credit
N

Requisites
Prerequisite: Junior Standing

Typically Offered
Fall, Spring

MUSIC 732 - Music Business 2

Credits: 2

Explores elements of the music industry including business frameworks, legal topics, and interpersonal relations. Projects are individualized to the student's specialty area within the music industry.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 731

Typically Offered
Fall, Spring

MUSIC 733 - Music Marketing and Management Internship

Credits: 2

Students engage directly with the music industry though established internships in the area. Opportunites will vary by specialty and availability.

Note
Music 733 is the opportunity to engage in components of the music industry through various faculty facilitated internships or projects. The student will gain field experience, network, engage in large- and small-scale marketing structures, participate in career building projects, gain experience in administration, and audio-visual elements, and learn about management roles in both academic and professional situations. It will culminate in a data driven presentation or paper based on their cumulative internship experiences. Student internship types can vary based on specialty area and availability. Efforts will be made to match students with the best possible internship.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 731 and MUSIC 732

Typically Offered
Fall, Spring

MUSIC 734 - Technology of the Electronic Music Studio

Credits: 2

Instrumentation and systematic procedures as applied to the construction of electronic music. Principles of voltage-controlled systems, synchronous tape machines, and audio mixing. Individual and team projects.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 323 or instructor consent.

Typically Offered
Fall, Summer

MUSIC 735 - Digital Sound Synthesis

Credits: 2

Exploration of real-time interactive systems. Theory and application pertaining to the creation of instruments and scores using additive and FM techniques. Team projects.

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 734.

Typically Offered
On sufficient demand

MUSIC 737 - Organ Literature

Credits: 3

A survey of significant compositions from the Renaissance to the present with emphasis on performance practice.

Repeat for Credit
N

Typically Offered
Other

MUSIC 738 - Piano Literature

Credits: 3

Selective survey of music for piano from 1750 to the present.

Repeat for Credit
N

Typically Offered
Other

MUSIC 740 - Studies in Music Literature

Credits: 3

Study of the repertory of a selected musical genre or medium of performance.

Repeat for Credit
N

Typically Offered
Other

MUSIC 759 - Techniques of Music Technology

Credits: 2

Students develop skills of notation, scanning, manipulating, sequencing, and recording necessary to integrate digital technologies into the practice of music making and teaching.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 766 - Seminar in the Life and Works of an Individual Composer

Credits: 3

Study of the career and achievements of a selected composer of major stature.

Repeat for Credit
Y

Typically Offered
Fall, Summer

MUSIC 767 - Topics in American Music

Credits: 3

Studies of the various genres of American music.

Repeat for Credit
Y

Typically Offered
On sufficient demand

MUSIC 791 - Advanced Vocal Pedagogy

Credits: 2

Advanced study of vocal production, exploring the scientific principles of breathing, resonance, timbre, and other vocal features. Discussion of vocal health and teaching styles.

Repeat for Credit
N

Typically Offered
Other

MUSIC 799 - Problems in Music

Credits: 1-18

Individual guided work in a selected area.

Note
No more than three hours of Problems in Music may be applied to the master's degree.

Repeat for Credit
Y

Requisites
Prerequisite: 6 hours graduate credit in music.

Typically Offered
Fall, Spring, Summer

MUSIC 801 - Introduction to Graduate Study in Music

Credits: 2

Library procedures, bibliography, research methods, and practice in preparing scholarly papers.

Note
Required of all graduate students in music.

Repeat for Credit
Y

Requisites
Prerequisite: At least 30 hours of music theory and music history.

Typically Offered
Other

MUSIC 802 - Seminar in Music Theory

Credits: 3

Comparison of major theoretical treatises and historical compositional practices; practical application for the modern musician.

Repeat for Credit
Y

Requisites
Prerequisite: Twenty hours of music theory.

Typically Offered
Other

MUSIC 803 - Seminar in Music History

Credits: 2

The history of music with emphasis on the correlation of stylistic factors and man's cultural environment.

Repeat for Credit
Y

Typically Offered
Summer

MUSIC 804 - Advanced Analysis

Credits: 3

An in-depth study of works by later Romantic and modern composers: techniques and styles in relation to form.

Repeat for Credit
N

Requisites
Prerequisite: Twenty hours music theory.

Typically Offered
Other

MUSIC 805 - Theories of Music Education

Credits: 3

A survey of the history of music teaching in the United States, with emphasis on the relationship of various theories of music, musical perception, and musical cognition to current practices in teaching music at all levels.

Repeat for Credit
N

Typically Offered
Fall-Even Years

MUSIC 806 - Psychology of Music

Credits: 3

Acquaints students with musical acoustics, perception and cognition of music, music learning, nature and testing of musical aptitude and achievement, affective response to music, musical preference, and the functionality of music.

Repeat for Credit
N

Typically Offered
Other

MUSIC 807 - History and Philosophy of Music Education

Credits: 3

The study of history and philosophy of music education in the U.S.

Repeat for Credit
N

Typically Offered
Spring-Even Years

MUSIC 808 - Research in Music Education

Credits: 3

An introduction to historical, descriptive, and experimental research in music education, including a study of techniques for the evaluation of music teaching and learning.

Repeat for Credit

Y

Typically Offered
Fall-Odd Years

MUSIC 809 - Seminar in Music Education

Credits: 3

Advanced studies of various topics related to the music.

Repeat for Credit
Y

Typically Offered
Other

MUSIC 810 - Curriculum Development and Learning Assessment

Credits: 3

MUSIC 810 focuses on development and implementation of comprehensive music education in K-12 public schools. Attention is given to sequential scaffolding of content within and across developmental levels, measuring student outcomes, and options for dissemination. Among factors studied will be evaluation materials, techniques, and design of reliable and valid measures.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

MUSIC 811 - Symposium in Music

Credits: 2

Intensive short-term studies of various topics in music, featuring presentations by nationally known scholars in the field.

Repeat for Credit
Y

Typically Offered
Summer

MUSIC 813 - Improvisation and Composition in Elementary Curriculum

Credits: 3

Development of pedagogical practices in the areas of improvisation and composition as appropriate for the elementary music classroom.

Repeat for Credit
N

Typically Offered
Other

MUSIC 814 - World Music Pedagogy, Culturally Relevant Pedagogy, and Special Populations in Music Education

Credits: 3

Explores current issues facing music education, including culturally relevant pedagogy, world music pedagogy, special learners in music education, and popular music.

Repeat for Credit
N

Typically Offered
Summer

MUSIC 815 - The Undergraduate Music Curriculum

Credits: 1

Provides foundational understanding and developing skills in designing, administering, and assessing learning in an undergraduate music education curriculum. Focuses on preparing future music teacher educators for success in their future profession.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 816 - Field Experiences in an Undergraduate Music Curriculum

Credits: 1

Prepares future music education professors to design, administer, and guide undergraduate music education field

experiences.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 821 - Piano Pedagogy I

Credits: 3

Piano Pedagogy I focuses on how to teach and perform a broad spectrum of intermediate piano repertoire.

Repeat for Credit
N

Typically Offered
Fall

MUSIC 822 - Piano Pedagogy II

Credits: 3

Piano Pedagogy II teaches students how to teach and perform selected advances-level piano repertoire by notable composers for the instrument.

Repeat for Credit
N

Typically Offered
Spring

MUSIC 823 - Supervised Teaching in Piano

Credits: 2

Students will be observed by the instructor and classmates teaching lessons and provide feedback and commentary in a masterclass format.

Repeat for Credit
N

Typically Offered
Fall, Spring

MUSIC 824 - Half Recital in Piano

Credits: 1

Students will present a 30 minute recital demonstrating proficiencies as defined by the instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring

MUSIC 825 - Lecture Recital in Piano

Credits: 1

Students will present a lecture-recital that will be a musically-illustrated presentation on some aspect if piano pedagogy.

Repeat for Credit
N

Typically Offered
Fall, Spring

MUSIC 828 - Methods and Materials for the Studio

Credits: 1-3

Methods of teaching fundamental techniques; selection of teaching materials outlining courses of study. For graduate students in performance curricula. Taught in divisions according to the major. Practical application through supervised studio teaching.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MUSIC 830 - Seminar in Medieval and Renaissance Music

Credits: 3

In-depth investigation of a selected area or problem in medieval or Renaissance music. Emphasis on individual research.

Repeat for Credit

Y

Typically Offered
Other

MUSIC 832 - Seminar in Baroque Music

Credits: 3

In-depth investigation of a selected area or problem in Baroque music. Emphasis on individual research.

Repeat for Credit
Y

Typically Offered
Other

MUSIC 834 - Seminar in Classical Music

Credits: 3

In-depth investigation of a selected area or problem in classical music. Emphasis on individual research.

Repeat for Credit
Y

Typically Offered
Other

MUSIC 836 - Seminar in Romantic Music

Credits: 3

In-depth investigation of a selected area or problem in Romantic music. Emphasis on individual research.

Repeat for Credit
Y

Typically Offered
Other

MUSIC 837 - Seminar in 20th-Century Music

Credits: 3

In-depth investigation of a selected area or problem in twentieth-century music. Emphasis on individual research.

Repeat for Credit
Y

Typically Offered
Other

MUSIC 838 - Opera Theatre

Credits: 0-18

Opera workshop for graduates.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 839 - Vocal Ensemble

Credits: 0-1

Performance and study with established University vocal organization or small ensemble.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 840 - Instrumental Ensemble

Credits: 0-1

Performance and study with an established University instrumental organization or a small ensemble.

Note
Students may enroll in more than one instrument simultaneously and may earn 1 to 4 hours per semester in each instrument.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 841 - Collegium Musicum Early Music Ensemble

Credits: 0-1

A vocal and instrumental ensemble devoted to the historically-informed performance of music written primarily during the Medieval, Renaissance, and Baroque periods (c. 1100-1750. Instruments of the historical period used when possible.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 842 - Concert Choir

Credits: 0-1

Concert Choir

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 843 - Symphony Orchestra

Credits: 0-1

Symphony Orchestra

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 844 - Concert Jazz Ensemble

Credits: 0-1

Concert Jazz Ensemble

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 845 - Wind Ensemble-Wind Symphony

Credits: 0-1

Performing Ensemble for Graduate Instrumentalists. Audition Required.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 846 - Marching Band - Graduate Level

Credits: 0-1

Athletic Band Performing at Football Events.

Repeat for Credit
Y

Typically Offered
Fall

MUSIC 847 - Cat Band - Graduate Level

Credits: 0-1

Athletic Band Performing at Volleyball and Basketball Events.

Repeat for Credit
Y

Typically Offered
Spring

MUSIC 848 - Concert Band

Credits: 0-1

Using a player-pool concept, the ensemble will explore outstanding and varied wind literature. Repertoire may range from a classical octet to a one-on-a-part performance of a major large band work. Admission by audition.

Repeat for Credit
Y

Typically Offered
Fall, Spring

MUSIC 854 - Graduate Secondary Applied Performance

Credits: 1-3

For graduate students who wish to study an instrument (or voice) other than the major performance area. Pedagogical methods and fundamentals are stressed.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MUSIC 855 - Graduate-Level Performance

Credits: 1-18

Instruction is offered every semester in voice and each of the following instruments: baritone, bassoon, clarinet, double bass, early winds, flute, french horn, guitar, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, viola, viola da gamba, violin, and violoncello.

Note
Students may enroll in more than one instrument simultaneously and may earn 1 to 4 hours per semester in each instrument.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MUSIC 857 - Advanced Composition

Credits: 1-2

Advanced Composition

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

MUSIC 858 - Advanced Choral Conducting

Credits: 1-2

Exercises and techniques to refine the conducting gesture; techniques of noted choral conductors; and score study.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

MUSIC 859 - Advanced Instrumental Conducting

Credits: 1-2

Advanced Instrumental Conducting

Repeat for Credit
N

Requisites
Prerequisite: MUSIC 365 and consent of instructor.

Typically Offered
Fall, Spring, Summer

MUSIC 885 - Advanced Diction

Credits: 1

Concentrated study of Italian, German, and French diction for singing. Materials are related to work in the voice studio, and concurrent registration in MUSIC 855 is required.

Repeat for Credit
N

Typically Offered
On sufficient demand

MUSIC 898 - Master's Report in Music

Credits: 0-18

Independent directed research leading to master's report.

Repeat for Credit
Y

Requisites
Prerequisite: sixteen hours graduate credit in music.

Typically Offered
Fall, Spring, Summer

MUSIC 899 - Research in Music

Credits: 1-18

Independent research that may lead to master's thesis.

Repeat for Credit
Y

Requisites
Prerequisite: sixteen hours graduate credit in music.

Typically Offered
Fall, Spring, Summer

NE 350 - Reactor Operations Laboratory

Credits: 3

A basic course in reactor operator licensing, nuclear safety, and reactor operations with structured laboratory exercises.

Note
Two hours lecture and one three-hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214.

Typically Offered
Fall, Spring, Summer

NE 415 - Introduction to Engineering Analysis

Credits: 3

Introduction to analytical, statistical, and numerical analysis, including computer programming, as applied to engineering.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 211 or 221.

Typically Offered
Fall

NE 495 - Elements of Nuclear Engineering

Credits: 3

Survey of nuclear engineering concepts and applications. Nuclear reactions, radioactivity, radiation interaction with matter, reactor physics, risk and dose assessment, applications in medicine, industry, agriculture, and research.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221, PHYS 213.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

NE 497 - Undergraduate Research Experience

Credits: 0-3

Open to students pursuing undergraduate research projects.

Repeat for Credit
Y

Typically Offered
Fall, Spring

NE 585 - Nuclear Engineering Design Projects

Credits: 3

In-depth application of design principles, engineering analyses, and experimental methods to a nuclear engineering design project addressing design, analysis, constraints,

standards, fabrication, and testing.

Note
Majors only

Repeat for Credit
N

Requisites
Prerequisite: ME 574 and NE 690 and NE 612 and NE 630 and NE 650

Typically Offered
Spring

NE 602 - Radiation Transport Simulation and Modeling

Credits: 3

Become proficient in solving nuclear radiation transport problems using common Monte Carlo simulation software, including an open-source interface package called TOPAS for the Geant4 toolkit. Obtain capability to simulate shielding problems, dose rate problems, and radiation sensing problems students will encounter in required nuclear engineering courses and in research.

Note
A student may take either NE 602 or NE 802 for credit, but not both.

Repeat for Credit
N

Requisites
Prerequisite: NE495

Typically Offered
Fall

NE 612 - Principles of Radiation Detection

Credits: 3

Operating principles and general properties of devices used in the detection and characterization of ionizing radiation. Fundamental methods of data interpretation and presentation.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: NE 495.

Typically Offered
Spring

NE 620 - Problems in Nuclear Engineering

Credits: 1-18

Specific studies in current and advanced problems in various phases of nuclear engineering.

Note
Consult program director.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

NE 630 - Nuclear Reactor Theory

Credits: 3

Theory of neutron diffusion and thermalization with application to steady-state nuclear reactors.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340, NE 495.

Typically Offered
Fall

NE 635 - Generation IV Reactor Design

Credits: 3

Introduction to the complex field of nuclear reactor design, with emphasis on Gen IV reactor technology. Discussion topics include nuclear power cycles, the nuclear fuel cycle, the reactor design process, and reactor safety. The conceptual design of an advanced nuclear reactor based on

a candidate Generation IV technology.

Note
Three hours lecture.

Repeat for Credit
N

Requisites
Prerequisite: NE 630.

Typically Offered
Spring

NE 640 - Nuclear Reactor Thermal Hydraulics

Credits: 3

Engineering principles underlying the design and operation of nuclear power plant components and systems. Fundamentals of nuclear energy generation, heat transport, and single- and two-phase flows.

Repeat for Credit
N

Requisites
Prerequisite: NE 495
Corequisite: ME 573

Typically Offered
Spring

NE 648 - Nuclear Reactor Laboratory

Credits: 3

Theory and measurement of nuclear and reactor parameters of fundamental importance to nuclear reactors and their operation.

Note
Two hours lecture and three hours lab. a week.

Repeat for Credit
N

Requisites
Prerequisite: NE 612 and NE 630.

Typically Offered
Spring

NE 650 - Nuclear Fuel Cycles

Credits: 3

Examines the various aspects of the processing of nuclear fuel including mining, milling, conversion, enrichment, fabrication, irradiation, shipping, reprocessing, and waste disposal. Compares in-core and out-of-core nuclear fuel management. Presents nuclear fuel cycle economics.

Repeat for Credit
N

Requisites
Prerequisite: MATH 340 and NE 415

Typically Offered
Spring

NE 690 - Radiation Protection and Shielding

Credits: 3

Basic concepts of radiation protection, doses, associated risks, and exposure limits. Properties of natural and other radiation sources, and evaluation of internal and external doses. Techniques for shield design including ray, point kernel, and transport theories for both neutrons and gamma rays.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: NE 495, PHYS 214, MATH 340.

Typically Offered
Fall

NE 691 - Principles of Radiation and Human Health

Credits: 3

Explores characterization of human health effects due to ionizing and nonionizing radiation exposure. Includes radiation health effects; radiation sources; radiation interactions with biological material; computational methods for exposure assessment; limits and safety guidelines; and risk analysis.

Note
A student may take either NE 691 or NE 891 for credit, but not both.

Repeat for Credit
N

Requisites
Prerequisite: ME 400 or CIS 200; NE 690

Typically Offered
Spring-Even Years

NE 730 - Applied Reactor Physics

Credits: 3

Principles of reactor physics as used in practice. Topics include the fundamentals of nuclear data processing, pin- and lattice-level analysis for generation of multigroup constants, and full-core models of nuclear reactors based on multigroup diffusion theory. Throughout, students will use commercial-grade software, including CASMO 4 and SIMULATE 3, to complete computational laboratory assignments.

Repeat for Credit
N

Requisites
Prerequisite: NE 630 and ME 400.

Typically Offered
Spring-Even Years

NE 737 - Intermediate Radiation Measurement Applications

Credits: 3

The course will cover physical principles and mathematical modeling of radiation-based measurement systems used in medical and non-medical applications. Topics include measurement principles and inverse methods, radio-gauging, radio-tracing, quantitative analysis methods, imaging with ionizing radiation, and radiation scanning.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: NE 612, NE 690.

Typically Offered
Spring-Odd Years

NE 740 - Nuclear Systems and Design

Credits: 3

Principles underlying the design and operation of nuclear systems with emphasis on nuclear power reactors. Energy generation and removal in heat transfer fluids, reactor and component control systems and nuclear fuel reloading patterns. Design philosophy of existing, advanced and passively safe nuclear reactors will be covered.

Repeat for Credit
N

Requisites
Prerequisite: ME 573.

Typically Offered
Fall

NE 761 - Radiation Measurement Systems

Credits: 3

Execute methods and techniques to acquire, process, display, and interpret electrical signals from the most common types of radiation sensors with focus on the complexity of gamma-ray spectroscopy and the sensing applications of detection, localization, and isotope identification.

Note
A student may take either NE 761 or NE 861 for credit, but not both.

Repeat for Credit
N

Requisites
Prerequisite: NE 612.

Typically Offered
Fall-Odd Years

NE 799 - Special Topics in Nuclear Engineering

Credits: 0-18

Topical material of importance in nuclear engineering, such as controlled thermonuclear reactions, numerical analysis, Monte Carlo methods in radiation transport, effects of nuclear explosions, etc.

Note
Consent of program director.

Repeat for Credit
Y

Typically Offered
On sufficient demand

NE 802 - Radiation Transport Simulation and Modeling

Credits: 3

Become proficient in solving nuclear radiation transport problems using and developing common Monte Carlo simulation software, including a new interface package called TOPAS for the Geant4 toolkit. Obtain capability to simulate shielding problems, dose rate problems, and radiation sensing problems to support experiments and analysis in research.

Note
A student may take either NE 602 or NE 802 for credit, but not both.

Repeat for Credit
N

Requisites
Grad bypass.

Typically Offered
Fall

NE 806 - Neutronics

Credits: 3

Particle transport, theories of diffusion, numerical analysis of diffusion, transient core analysis.

Note
Three hours recitation a week.

Repeat for Credit
Y

Requisites
Prerequisite: NE 630.

Typically Offered
Fall

NE 810 - Graduate Problems in Nuclear Engineering

Credits: 1-18

Specific studies in advanced problems in various phases of nuclear engineering.

Note
Consent of program director.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing

Typically Offered
Fall, Spring, Summer

NE 851 - Nuclear Engineering Laboratory

Credits: 2

Design of experiments for the TRIGA nuclear reactor.

Note
Six hours lab a week.

Repeat for Credit
Y

Requisites
Prerequisite: NE 630 and NE 648.

Typically Offered
On sufficient demand

NE 860 - Advanced Topics in Nuclear Engineering

Credits: 1-18

A presentation of various special topics covering advanced

nuclear engineering specialties.

Note
Consent of program director.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing

Typically Offered
Fall, Spring, Summer

NE 861 - Advanced Radiation Measurement Systems

Credits: 3

Execute methods and techniques to acquire, process, display, and interpret electrical signals from the most common types of radiation sensors with focus on the complexity of gamma-ray spectroscopy and the sensing applications of detection, localization, and isotope identification.

Note
A student may take either NE 761 or NE 861 for credit, but not both.

Repeat for Credit
N

Requisites
Prerequisite: NE 612.

Typically Offered
Fall-Odd Years

NE 891 - Advanced Radiation and Human Health

Credits: 3

Explores characterization of human health effects due to ionizing and nonionizing radiation exposure. Includes radiation health effects; radiation sources; radiation interactions with biological material; computational methods for exposure assessment; limits and safety guidelines; and risk analysis. Application of state-of-the-art exposure and risk assessment.

Note
A student may take either NE 691 or NE 891 for credit, but not both.

Repeat for Credit
N

Requisites
Prerequisite: ME 400 or CIS 200; NE 690.

Typically Offered
Spring-Even Years

NE 898 - Master's Report

Credits: 0-18

Topics selected with approval of major professor and department head.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

NE 899 - Master's Thesis

Credits: 1-18

Topics selected with approval of major professor and program director.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

NE 998 - Selected Advanced Topics in Nuclear Engineering

Credits: 0-18

Current topics of interest in nuclear engineering at an advanced level, such as controlled thermonuclear reactions, numerical analysis, Monte Carlo methods in radiation transport, etc.

Note
Consent of program director.

Repeat for Credit
Y

Typically Offered
Spring

NE 999 - Dissertation Research

Credits: 1-18

Topics selected with approval of major professor and program director.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PAS 700 - Applied Anatomy and Physiology I

Credits: 4

Intensive study of human anatomy and physiology with clinical application of medical terminology. Designed to develop the PA student's working knowledge and understanding of the general structures and functional principles of the human body. Clinically relevant areas of radiographic imaging, surface anatomy, and clinical case correlations are integrated in course. Students will acquire anatomic knowledge with clinical application through cadaveric laboratory experience to include human and/or virtual dissection. Develops a strong foundation for the study of pathophysiology and disease states.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA Program

Typically Offered
Spring

PAS 710 - PA Profession

Credits: 1

Explores the history of the Physician Assistant (PA) profession, the role of the PA in today's health care system, and the factors affecting the PA. Designed to aid the student's transition into the medical profession, and serve as an introduction to multiple professional practice issues.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Spring

PAS 711 - Applied Anatomy and Physiology II

Credits: 4

The second of two intensive human anatomy and physiology courses. Designed to develop the PA student's working knowledge and understanding of the human body's general structures and functional principles. Clinically relevant areas of radiographic imaging, surface anatomy, and clinical case correlations are integrated. Students will acquire anatomic knowledge with clinical application through the virtual dissection experience. Develops a strong foundation for the study of pathophysiology and disease states.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA Program and PAS 700

Typically Offered
Summer

PAS 720 - Evidence Based Medicine

Credits: 1

Intensive study in evidence based medicine and critical thinking about the information and evidence needed to produce clinical decisions. The student will be prepared to cope with the vast amount of medical literature produced every year. The course is structured to equip the student to effectively evaluate medical literature, and apply the information acquired to clinical decision making in the provision of individualized patient care.

Note
Intended for Master of Science in Physician Assistant Studies (MPAS) program or Athletic Training M.S. (MATHR) program students.

Repeat for Credit

N

Requisites
Prerequisite: Admission to the Master of Science in Physician Assistant Studies (MPAS) program or Athletic Training (M.S.) (MATHR) program.

Typically Offered
Fall

PAS 721 - Medical Genetics

Credits: 1

Will review the basic principles of medical genetics and its application to clinical practice. Students will learn to obtain a detailed family history, and assess possible modes of inheritance. This involves the ability to understand the medical genetics literature, as well as the clinical application of genetic knowledge in the care of individual patients. Ethical principles related to genetic evaluation, testing, and diagnosis will be discussed. The underlying etiology, clinical presentation, evaluation, diagnosis, prognosis, and treatment options of specific genetic disorders will be reviewed.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Summer

PAS 722 - Clinical Geriatrics

Credits: 2

Designed to provide an overview of the aging population and age-related disorders, and correlates theory and clinical practice in providing care to the geriatric population. The adjustment of older adults to degenerative changes, nursing home placement, and alternatives to placement in long term care facilities are discussed. Concepts relevant to pathophysiology, nutrition, pharmacology, psychosocial development, and ethical/legal responsibilities are emphasized using an evidence-based and functional approach.

Repeat for Credit
N

Requisites
Prerequisite: PAS 780.

Typically Offered
Fall

PAS 731 - Clinical Pediatrics

Credits: 2

Course introduces the PA student to pediatric medicine. Focuses on the physiological and psychological fundamentals of child development, major common pediatric illnesses, various immunizations and medications used in pediatrics, pediatric emergencies, and the management of both healthy and ill infants, children and adolescents.

Repeat for Credit
N

Requisites
Prerequisite: PAS 780.

Typically Offered
Summer

PAS 732 - Psychiatry & Behavioral Medicine

Credits: 2

Course will present an introduction to the neurobiological, psychobiological, emotional, social, and cultural influences on mental health and illness of diverse patient populations with acute and chronic conditions across the lifespan, including end-of-life care, and will integrate human physical and psychological development, human sexuality, and responses to stress, injury, illness and death. Also incorporated is the training in substance use, abuse, addiction, and treatment adherence issues. Principles of violence identification and prevention will be examined, and basic counseling skills and instruments for the evaluation and management of psychiatric disorders will be presented.

Repeat for Credit
N

Requisites
Prerequisite: PAS 780.

Typically Offered
Fall

PAS 740 - Clinical Procedures I

Credits: 2

Designed to allow students to become competent in a variety of patient care skills. Skills are sequenced to the body systems being covered in the physical diagnosis course. Allows students to safely apply the medical-decision making process, and learn the procedural skills in a simulated environment. Course will utilize simulators, task trainers and standardized patient experiences.

Repeat for Credit
N

Requisites
Prerequisite: Admission to PA program.

Typically Offered
Spring

PAS 741 - Clinical Procedures II

Credits: 2

Designed to allow students to become competent in a variety of patient care skills. Skills are sequenced to the body systems being covered in the physical diagnosis course. Allows students to safely apply the medical-decision making process, and learn the procedural skills in a simulated environment. Course will utilize simulators, task trainers and standardized patient experiences.

Repeat for Credit
N

Requisites
Prerequisite: PAS 740.

Typically Offered
Summer

PAS 742 - Clinical Procedures III

Credits: 2

Designed to allow students to become competent in a variety of patient care skills. Skills are sequenced to the body systems being covered in the physical diagnosis course. Allows students to safely apply the medical-decision making process, and learn the procedural skills in a simulated environment. Course will utilize simulators, task trainers and standardized patient experiences.

Repeat for Credit
N

Requisites
Prerequisite: PAS 741.

Typically Offered
Fall

PAS 750 - Physical Diagnosis I

Credits: 2

Designed to provide training on the skills and competencies necessary for obtaining a patient's medical history, and performing a physical examination. Includes an approach to patient interviewing, acquiring clinical information, organizing and processing this information, and presenting it in a clear and concise manner. This will be achieved by learning examination techniques through lectures, small group settings, faculty mentoring, practicum examinations, and select body system specialty exams.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Spring

PAS 751 - Physical Diagnosis II

Credits: 2

Designed to provide training on the skills and competencies necessary for obtaining a patient's medical history, and performing a physical examination. Includes an approach to patient interviewing, acquiring clinical information, organizing and processing this information, and presenting it in a clear and concise manner. This will be achieved by learning examination techniques through lectures, small group settings, faculty mentoring, practicum examinations, and select body system specialty exams.

Repeat for Credit
N

Requisites
Prerequisite: PAS 750.

Typically Offered
Summer

PAS 752 - Physical Diagnosis III

Credits: 2

Designed to provide training on the skills and competencies necessary for obtaining a patient's medical history, and performing a physical examination. Includes an approach to patient interviewing, acquiring clinical information, organizing and processing this information, and presenting it in a clear and concise manner. This will be achieved by learning examination techniques through lectures, small group settings, faculty mentoring, practicum examinations, and select body system specialty exams.

Repeat for Credit
N

Requisites
Prerequisite: PAS 751.

Typically Offered
Fall

PAS 760 - Diagnostics I - Laboratory

Credits: 2

First of a three-part series designed to introduce the student to clinical diagnostics in medicine. Presents a foundation for understanding the appropriate use and interpretation of diagnostic testing. Various diagnostic tests will be reviewed to allow the student to differentiate normal from abnormal values, and provide the basis for selection, utilization, and interpretation of the tests used to evaluate principal functions of body systems, and their correlation to clinical conditions.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Spring

PAS 761 - Diagnostics II - EKG

Credits: 2

Second of a three-part series designed to introduce the student to clinical diagnostics in medicine. Presents a foundation for understanding the appropriate use and interpretation of diagnostic testing. Various diagnostic tests will be reviewed to allow the student to differentiate normal from abnormal values, and provide the basis for selection, utilization, and interpretation of the tests used to evaluate principal functions of body systems, and their correlation to clinical conditions.

Repeat for Credit
N

Requisites
Prerequisite: PAS 760.

Typically Offered
Summer

PAS 762 - Diagnostics III - Radiology

Credits: 2

Third of a three-part series designed to introduce the student to clinical diagnostics in medicine. Presents a foundation for understanding the appropriate use and interpretation of diagnostic testing. Various diagnostic tests will be reviewed to allow the student to differentiate normal from abnormal values, and provide the basis for selection, utilization, and interpretation of the tests used to evaluate principal functions of body systems, and their correlation to clinical conditions.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Fall

PAS 770 - Applied Pathophysiology I

Credits: 2

Designed to develop the PA student's working knowledge and comprehensive understanding of the pathophysiological principles of the human body. An intensive study of pathology of the human body, which explores the etiology of organic and systemic disease, providing an insight into the disordered physiological changes resulting from specific disease processes. Provides

the necessary linkage between the basic sciences and the clinical presentation of disease states.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Spring

PAS 771 - Applied Pathophysiology II

Credits: 2

Designed to develop the PA student's working knowledge and comprehensive understanding of the pathophysiological principles of the human body. An intensive study of pathology of the human body, which explores the etiology of organic and systemic disease, providing an insight into the disordered physiological changes resulting from specific disease processes. Provides the necessary linkage between the basic sciences and the clinical presentation of disease states.

Repeat for Credit
N

Requisites
Prerequisite: PAS 770.

Typically Offered
Summer

PAS 772 - Applied Pathophysiology III

Credits: 2

Designed to develop the PA student's working knowledge and comprehensive understanding of the pathophysiological principles of the human body. An intensive study of pathology of the human body, which explores the etiology of organic and systemic disease, providing an insight into the disordered physiological changes resulting from specific disease processes. Provides the necessary linkage between the basic sciences and the clinical presentation of disease states.

Repeat for Credit
N

Requisites
Prerequisite: PAS 771.

Typically Offered
Fall

PAS 780 - Clinical Medicine I

Credits: 6

The first in a series of three courses designed to guide the development of problem-solving skills in the medical decision-making process. This course uses a body systems approach to thoroughly study diseases/disorders encountered in primary care practice. Medical knowledge includes the epidemiology, etiology, pathophysiology, clinical manifestations, diagnosis, management and patient education of diseases/disorders. Instruction includes providing care to preventive, emergent, acute, chronic, adolescent, adult, and elderly populations as it applies to disease processes. Instruction will consist of lectures, problem/case-based learning, and small group collaboration.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA Program

Typically Offered
Spring

PAS 781 - Clinical Medicine II

Credits: 6

The second in a series of three courses designed to guide the development of problem-solving skills in the medical decision-making process. This course uses a body systems approach to thoroughly study diseases/disorders encountered in primary care practice. Medical knowledge includes the epidemiology, etiology, pathophysiology, clinical manifestations, diagnosis, management and patient education of diseases/disorders. Instruction includes providing care to preventive, emergent, acute, chronic, adolescent, adult, and elderly populations as it applies to disease processes. Instruction will consist of lectures, problem/case-based learning, and small group collaboration.

Repeat for Credit
N

Requisites
Prerequisite: PAS 780, Clinical Medicine I

Typically Offered
Summer

PAS 782 - Clinical Medicine III

Credits: 7

The third in a series of three courses designed to guide the development of problem-solving skills in the medical decision-making process. This course uses a body systems approach to thoroughly study diseases/disorders encountered in primary care practice. Medical knowledge includes the epidemiology, etiology, pathophysiology, clinical manifestations, diagnosis, management and patient education of diseases/disorders. Instruction includes providing care to preventive, emergent, acute, chronic, adolescent, adult, and elderly populations as it applies to disease processes. Instruction will consist of lectures, problem/case-based learning, and small group collaboration.

Repeat for Credit
N

Requisites
Prerequisite: PAS 781, Clinical Medicine II

Typically Offered
Fall

PAS 790 - Pharmacology I

Credits: 2

Designed as a survey of pharmacology, course emphasizes the fundamentals of drug absorption, distribution, metabolism, and elimination. Course focuses on the relationship between drugs and receptors, adverse drug reactions, toxicity, and drug indications and contraindications. Utilizing evidence-based medicine, pharmacotherapeutics with application to patient care is also incorporated.

Repeat for Credit
N

Requisites
Prerequisite: Admission to the PA program.

Typically Offered
Spring

PAS 791 - Pharmacology II

Credits: 2

Designed as a survey of pharmacology, course emphasizes the fundamentals of drug absorption, distribution, metabolism, and elimination. Course focuses on the relationship between drugs and receptors, adverse drug reactions, toxicity, and drug indications and contraindications. Utilizing evidence-based medicine, pharmacotherapeutics with application to patient care is also incorporated.

Repeat for Credit
N

Requisites
Prerequisite: PAS 790.

Typically Offered
Summer

PAS 792 - Pharmacology III

Credits: 2

Designed as a survey of pharmacology, course emphasizes the fundamentals of drug absorption, distribution, metabolism, and elimination. Course focuses on the relationship between drugs and receptors, adverse drug reactions, toxicity, and drug indications and contraindications. Utilizing evidence-based medicine, pharmacotherapeutics with application to patient care is also incorporated.

Repeat for Credit
N

Requisites
Prerequisite: PAS 791.

Typically Offered
Fall

PAS 800 - Family Medicine I - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical

decision-making process while developing the appropriate knowledge, skills, and abilities to provide care in the ambulatory outpatient family medicine clinic. The course will deliver education on providing comprehensive evidence-based, gender/age specific individualized care, addressing acute and chronic diseases, health promotion and disease prevention in the context of each patient's social, economic, cultural and religious background. Students will engage with the interprofessional team, and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Spring

PAS 810 - Family Medicine II - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision-making process while developing the appropriate knowledge, skills, and abilities to provide care in the ambulatory outpatient family medicine clinic. The course will deliver education on providing comprehensive evidence-based, gender/age specific individualized care, addressing acute and chronic diseases, health promotion and disease prevention in the context of each patient's social, economic, cultural and religious background. Students will engage with the interprofessional team, and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 820 - Internal Medicine - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing the appropriate knowledge, skills and abilities to provide care in the in/outpatient internal medicine practice. Students will encounter a full range of experiences to include, preventative care, acute and chronic illness, and palliative/end of life care in the context of each patient's social, economic, cultural and religious background. Students will have the opportunity to work as part of the primary team while coordinating with subspecialist, and interdisciplinary allied health professionals.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 830 - Emergency Medicine - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing the appropriate knowledge, skills and abilities to provide care in the emergency medicine practice. The rotation will take place in emergency departments. This rotation allows students to establish triage skills, learn to recognize and manage conditions that need immediate attention and prioritize care for conditions that are less urgent. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 840 - Pediatric Medicine - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing the appropriate knowledge, skills and abilities to provide care in a pediatric medicine practice. The course provides education in comprehensive, evidence-based, gender/age specific individualized care, addressing acute and chronic diseases (sick child), health promotion (well child) and disease prevention in the context of each patient's social, economic, cultural and religious background. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 850 - Surgery - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing the appropriate knowledge, skills and abilities to provide care in the surgical practice. The experiences in this rotation will include pre-operative, intra-operative (assisting) and post-operative surgical care. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
Y

Requisites
Successful completion of the PA program's clinical orientation and didactic phase (C or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 860 - Behavioral Medicine - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing appropriate knowledge, skills and abilities to recognize and provide care for various behavioral/mental health problems. In settings such as in/outpatient behavioral/mental health facilities and multiservice centers, students will participate in behavioral/mental health evaluations, observe behavioral/mental therapy/interventions, and discuss management plans. Emphasis is on applying skills learned to treatment of behavioral/mental health issues in primary care. Students will engage with the interprofessional team, and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 870 - Women's Health - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision making process while developing the appropriate knowledge, skills and abilities to provide care in a women's health medicine practice. Experiences include prenatal care, obstetric/gynecologic health histories, OB/GYN exams, evaluation and management planning. Emphasis is on applying skills learned to the treatment of OB/GYN health issues in primary care in the context of each patient's social, economic, cultural and religious background. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 890 - Geriatric Medicine - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision-making process while developing the appropriate knowledge, skills, and abilities to provide care to the geriatric population. Students will be exposed to a variety of experiences including ambulatory practice, nursing facilities, assisted living centers, and hospice. The course will deliver education on providing comprehensive evidence-based, geriatric specific individualized care, addressing acute and chronic conditions, health promotion and disease prevention in the context of the elderly patient's social, economic, cultural and religious background. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 891 - Orthopedics - SCPE

Credits: 4

A supervised clinical practice experience designed to give students the opportunity to participate in the medical decision-making process while developing the appropriate knowledge, skills, and abilities to provide care in orthopedics. The course will deliver education on providing comprehensive evidence-based, gender/age specific individualized care, addressing acute and chronic musculoskeletal conditions with and without surgical intervention, health promotion and disease prevention in the context of each patient's social, economic, cultural and religious background. Students will engage with the interprofessional team and behave as a medical professional with patients, families and other members of the medical team.

Repeat for Credit
N

Requisites
Successful completion of clinical orientation and didactic phase of the PA program (B or better in PAS 700-792).

Typically Offered
Fall, Spring, Summer

PAS 892 - Elective Experience I

Credits: 4

A supervised clinical practice experience selected by the student designed to give students the opportunity to develop appropriate knowledge, skills, and abilities in patient care, medical knowledge, practice based learning, communication, professionalism, interprofessional collaboration, system based practice and/or professional development. Options for students to achieve this include but are not limited to, additional experience in a required rotation; medical discipline of interest not encountered in the previous rotations; public health service; administration; and health policy.

Repeat for Credit
N

Requisites
Successful completion of all prior clinical rotations (B or better in PAS 800-891).

Typically Offered
Spring

PAS 895 - Summative

Credits: 2

Designed to prepare students for the final transition from student to medical provider. Didactic and clinical year grades, preceptor evaluations, and assignments specific to the Summative assessment will be reviewed to ascertain the student's ability to function as a successful graduate Physician Assistant. Physician Assistant practice topics will be covered, including certifying examination review, certification process, professional licensure, malpractice, professional career planning, contract negotiations, credentialing process and financial planning. Content will be delivered in lecture, lab and small groups.

Repeat for Credit
N

Requisites
Successful completion of Clinical Year Rotations (B or

better is PAS 800-892).

Typically Offered
Spring

PAV 101 - Private Pilot

Credits: 5

Awards academic credit for the Federal Aviation Administration Private Pilot certificate.

Note
This may be used as a substitute for PPIL 111 and 113 for the purpose of awarding academic credit for ratings earned elsewhere. This course may not be used to fulfill the requirements for Reduced ATP as outlined in the FAA-KSU LOA.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 102 - Instrument Pilot

Credits: 4

This course is offered to give academic credit for the Federal Aviation Administration Instrument Pilot rating.

Note
This may be used as a substitute for PPIL 112 and 114 for the purpose of awarding academic credit for ratings earned elsewhere. This course may not be used to fulfill the requirements for Reduced ATP as outlined in the FAA-KSU LOA.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 201 - Commercial Pilot

Credits: 7

This course is offered to give academic credit for the Federal Aviation Administration Commercial Pilot certificate.

Note
This may be used as a substitute for PPIL 211, 212, and 213 for the purpose of awarding academic credit for ratings earned elsewhere. This course may not be used to fulfill the requirements for Reduced ATP as outlined in the FAA-KSU LOA

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 202 - Additional Aircraft Category, Class, and/or Type Rating

Credits: 1-5

This course is offered to give academic credit for the Federal Aviation Administration additional aircraft category, class and/or type ratings. Credit will be given for one type rating only.

Note
This may not be used as a substitute for PPIL 262 and PPIL 263 in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 217 - Airframe A

Credits: 9

This course is offered to give partial academic credit for the Federal Aviation Administration Airframe certificate.

Note
This may not be used as a substitute for AVM courses in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after

being accepted in the BATN-PA degree option.

Repeat for Credit
N

Requisites
Corequisite: PAV 318

Typically Offered
Fall, Spring, Summer

PAV 227 - Powerplant A

Credits: 9

This course is offered to give partial academic credit for the Federal Aviation Administration Powerplant certificate.

Note
This may not be used as a substitute for AVM courses in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Requisites
Corequisite: PAV 328

Typically Offered
Fall, Spring, Summer

PAV 301 - Instructor Pilot

Credits: 8

This course is offered to give academic credit for the Federal Aviation Administration Flight Instructor certificate.

Note
This may not be used as a substitute for PPIL 310, PPIL 311, PPIL 312 or PPIL 314 in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 302 - Airline Transport Pilot

Credits: 2

This course is offered to give academic credit for the Federal Aviation Administration Airline Transport Pilot certificate.

Note
This may not be used as a substitute for PPIL 385 in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 318 - Airframe B

Credits: 6

This course is offered to give partial academic credit for the Federal Aviation Administration Airframe certificate.

Note
This may not be used as a substitute for AVM courses in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Requisites
Corequisite: PAV 217

Typically Offered
Fall, Spring, Summer

PAV 328 - Powerplant B

Credits: 6

This course is offered to give partial academic credit for the Federal Aviation Administration Powerplant certificate.

Note
This may not be used as a substitute for AVM courses in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Requisites
Corequisite: PAV 227

Typically Offered
Fall, Spring, Summer

PAV 401 - Additional Flight Instructor Ratings

Credits: 1-4

This course is offered to give academic credit for the Federal Aviation Administration Instrument Flight Instructor certificate.

Note
This may not be used as a substitute for PPIL 482, PPIL 483, PPIL 492, or PPIL 493 in any program. Since the Professional Aviation degree option is specifically designed as a degree completion option for students that have significant aviation experience, credit will not be allowed for certificates or ratings earned after being accepted in the BATN-PA degree option.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PAV 497 - Senior Capstone

Credits: 3

This is a culminating experience for the Professional Aviation option. Students will integrate the intellectual, creative, and expressive skills/knowledge they have cultivated in their undergraduate curriculum. Additionally, students will combine discipline-specific knowledge with communication and inquiry methods to solve problems and communicate mastery of their respective area of interest.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and instructor consent.

Typically Offered
Fall, Spring

PFP 101 - Money 101

Credits: 1

This course provides an introduction to resources and tools available to assist students in developing beginning personal finance skills that will assist them throughout their lifetime. Application exercises will allow students to apply personal finance knowledge in solving real-life problems.

Note
This course has an online format.

Repeat for Credit
N

Typically Offered
Fall, Spring

PFP 105 - Introduction to Personal Financial Planning

Credits: 3

Fundamental principles for making financial decisions. Analysis and evaluation of personal and family money management strategies.

Repeat for Credit
N

Typically Offered

Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PFP 300 - Problems in Personal Financial Planning

Credits: 0-3

Relevant topics in personal financial planning will be explored in a small group setting.

Repeat for Credit
Y

Typically Offered
On sufficient demand

PFP 305 - Advanced Personal Financial Planning

Credits: 3

In-depth applications of personal and family money management principles with emphasis on credit, savings, insurance, and budgeting.

Repeat for Credit
N

Requisites
Prerequisite: PFP 105 with grade of "B" or better or FINAN 450.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PFP 315 - Love and Money

Credits: 3

Explores the connection between money and relationships. Understand the factors that influence how individuals, couples, and families perceive and manage money. Become familiar with current literature and research in this area. Gain insight into their own relationship with money and how it influences their relationships in order to enhance their ability to help and work with others experiencing financial difficulties.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PFP 320 - Applied Behavioral Finance

Credits: 3

Introductory exploration of the field of behavioral finance and its relationship to personal and financial decision-making.

Repeat for Credit
N

Typically Offered
Spring

PFP 456 - Financial Counseling and Communication

Credits: 3

This course provides an introduction to the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues.

Repeat for Credit
N

Typically Offered
Fall

PFP 460 - Retirement Planning Concepts

Credits: 3

This course surveys various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits.

Repeat for Credit
N

Requisites
Prerequisite: PFP 305 or FINAN 450 with a grade of "C" or better

Typically Offered
Fall, Spring

PFP 462 - Personal Investment Concepts I

Credits: 3

An in-depth study of investment options for clients, this course will include common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choice will be studies. Current and emerging issues, and ethics will be an integral part of the course.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450 or Corequisite: PFP 305

Typically Offered
Fall

PFP 464 - Estate Planning Concepts

Credits: 3

This course provides an introduction to fundamentals of the estate planning process. Includes property transfer, tax consequences, probate avoidance, powers of appointment, and various tools/techniques used in implementing an effective estate plan.

Repeat for Credit
N

Requisites
Prerequisite: PFP 305 or FINAN 450 with a grade of "C" or better.

Typically Offered
Spring

PFP 466 - Personal Risk Management and Insurance Planning

Credits: 3

This course provides an analysis of risk management concepts, tools, and strategies for individuals and families, including: life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs.

Repeat for Credit
N

Requisites
Prerequisite: FINAN 450 or Corequisite: PFP 305.

Typically Offered
Fall, Spring

PFP 468 - Professional Practice Management in PFP

Credits: 1

Issues and solutions for challenges of managing family financial planning practices.

Repeat for Credit
N

Requisites
Corequisite: PFP 105 or PFP 305

Typically Offered
Spring

PFP 472 - Personal Income Tax Concepts

Credits: 3

This course provides an introduction to personal income tax practices and procedures including tax regulations, tax return preparation, the tax audit process, the appeals process, preparation for an administrative or judicial forum, and ethical considerations of taxation. New and emerging issues related to taxation will be covered. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies.

Repeat for Credit
N

Requisites
Co-requisite: PFP 305.

Typically Offered
Fall, Summer

PFP 482 - Personal Investment Concepts II

Credits: 3

This course is designed to build off of PFP 462 (Personal Investment Concepts I) and to help students develop a better understanding of the available tools and procedures of investment planning for family and individual goal attainment. Lectures, reading, case studies, and problem sets are designed to help students in preparing for the Investment Planning section of the Certified Financial Planner™examination.

Repeat for Credit
N

Requisites
Prerequisite: PFP 462

Typically Offered
Spring

PFP 579 - Pre-Internship Orientation in Personal Financial Planning

Credits: 1

Consideration and application of professional knowledge and skills necessary for selection and placement in a financial planning firm for a supervised experience.

Repeat for Credit
N

Typically Offered
Fall

PFP 580 - Internship in Personal Financial Planning

Credits: 3

Internship experience in personal financial planning or an allied field.

Repeat for Credit
N

Typically Offered
Summer

PFP 595 - Capstone in Personal Financial Planning

Credits: 3

Examination of professional issues in personal financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Development of skills needed for personal financial planners working with families in meeting their financial needs.

Repeat for Credit
N

Requisites
Prerequisite: PFP 305, PFP 460, PFP 462, PFP 466, PFP 472 Co-requisite: PFP 464, PFP 482.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PFP 624 - Fundamentals of Family Financial Planning

Credits: 3

This course provides an overview of family financial planning by integrating concepts and issues with planning and counseling applications. Students will be introduced to the key concepts of family financial planning, including: insurance, tax, investments, retirement, and estate planning. The family financial planning process is introduced with an emphasis on the integration and application of concepts in meeting individual and family financial goals and objectives. Other topics presented include an ethics overview, compensation trends within the industry, and regulatory frameworks.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PFP 675 - Field Study in Family Economics

Credits: 1-3

Supervised experiences in financial planning, financial counseling, community action, or consumer services.

Note
Consent of School required

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PFP 756 - Financial Counseling

Credits: 3

Theory and research regarding the interactive process between the client and the practitioner, including communication techniques, motivation and esteem building, the counseling environment, ethics, and methods of data intake, verification, and analysis. Other topics include legal issues, compensation, uses of technology to identify resources, information management, and current or emerging issues.

Repeat for Credit
N

Requisites
Prerequisite:KSU cumulative GPA of 2.5 or higher.

Typically Offered
Fall

PFP 760 - Retirement Planning for Families

Credits: 3

Study of micro and macro considerations for retirement planning. Survey of various types of retirement plans, ethical considerations in providing retirement planning services, assessing and forecasting financial needs in retirement, and integration of retirement plans with government benefits.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 305 or FINAN 450 with a grade of "B" or better and KSU cumulative GPA of 2.5 or higher.

Typically Offered
Fall

PFP 762 - Investing for the Family's Future I

Credits: 3

An in-depth study of investment options for clients, this course will include common stocks, fixed income securities, convertible securities, and related choices. Relationships between investment options and employee/employer benefit plan choice will be studied. Current and emerging issues, and ethics will be an integral part of the course.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 305 or FINAN 450 with a grade of "B" or better and KSU cumulative GPA of 2.5 or higher.

Typically Offered
Spring

PFP 764 - Estate Planning for Families

Credits: 3

Introduction to fundamentals of the estate planning process. Includes property transfer, tax consequences, probate avoidance, powers of appointment, and various tools/techniques used in implementing an effective estate plan.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 305 or FINAN 450 with a grade of "B" or better and KSU cumulative GPA of 2.5 or higher.

Typically Offered
Spring

PFP 766 - Insurance Planning for Families

Credits: 3

An in-depth study of risk management concepts, tools, and

strategies for individuals and families, including: life insurance; property and casualty insurance; liability insurance; accident, disability, health, and long-term care insurance; and government-subsidized programs. Current and emerging issues, as well as ethical considerations, relative to risk management will be discussed. Case studies will provide experience in selecting insurance products suitable for individuals and families.

Repeat for Credit
N

Requisites
Prerequisite: HDFS 305 or FINAN 450 with a grade of "B" or better and KSU cumulative GPA of 2.5 or higher.

Typically Offered
Fall

PFP 768 - Introduction to Financial Therapy

Credits: 3

An applied financial psychology course that examines the intersection of financial planning, coaching, and therapy; the psychology of investing; money disorders frequently seen by financial professionals; advanced techniques to establish rapport; helping clients change problematic/destructive money-related behaviors; dealing with client resistance to change; working with couples and families; and integrating financial psychology tools into personal financial planning.

Repeat for Credit
N

Typically Offered
Fall, Spring

PFP 769 - Money and Relationships

Credits: 3

This course will explore the connection between money and couple and family relationships. The objective of the course is to understand the factors that impact how individuals, couples, and families perceive and manage money. Students will gain in-depth knowledge of current literature, research, and theory in this area. Students will gain personal insight into their own relationship with money and how it impacts their relationships in order to enhance their ability to help and work with others to improve financial well-being.

Repeat for Credit
N

Typically Offered
Fall, Spring

PFP 770 - Applied Behavioral Finance

Credits: 3

This course is applied behavioral finance course that examines the intersection of behavioral finance and financial planning. It reviews the research on behavioral finance, neuroeconomics, and investor psychology; exploring the effects of human emotions and cognitive errors on financial decisions and the financial planning process. This course focuses on the application of behavioral finance theory and research to the practice of personal financial planning to help financial planners improve the financial health of their clients.

Repeat for Credit
N

Typically Offered
Spring, Summer

PFP 771 - Financial Therapy Theory & Research

Credits: 3

Survey of financial therapy and planning literature, conceptual models, and empirical research. Students will be expected to read empirical research related to financial therapy and write a short report on their findings on a weekly basis.

Repeat for Credit
N

Typically Offered
Fall, Spring

PFP 772 - Personal Income Taxation

Credits: 3

This course provides in-depth information of income tax practices and procedures including tax regulations, tax return preparation, the tax audit process, the appeals process, preparation for an administrative or judicial forum,

and ethical considerations of taxation. New and emerging issues related to taxation will be covered. Family/individual case studies provide practice in applying and analyzing tax information and recommending appropriate tax strategies.

Repeat for Credit
N

Requisites
Prerequisite: KSU cumulative GPA of 2.5 or higher.
Corequisite: HDFS 305.

Typically Offered
Summer

PFP 782 - Investing for the Family's Future II

Credits: 3

The focus of this course is to develop a better understanding of the available tools and procedures of investment planning for family and individual goal attainment. Lectures, readings, case studies, and problem sets are designed to help students in preparing for the Investment Planning section of the Certified Financial Planner™examination.

Repeat for Credit
N

Requisites
Prerequisite: PFP 762.

Typically Offered
Spring

PFP 802 - Theories and Research in Family Financial Planning II

Credits: 3

Macroeconomic theory as it relates to family resource allocation decisions. Advanced theories of household economic behavior including the life cycle hypothesis, behavioral economics, behavioral finance, theories of behavioral change, and psychological theories of subjective economic well-being. Focus on empirical research investigating household financial decision-making.

Repeat for Credit
N

Requisites
Prerequisite: PFP 702

Typically Offered
Fall, Summer

PFP 805 - Statistical Software Applications in Personal Financial Planning

Credits: 3

Exposure to and practice in using statistical software to investigate Personal Financial Planning relevant data sets.

Repeat for Credit
N

Requisites
Corequisite: STAT 705.

Typically Offered
Other

PFP 806 - Statistical Methods in Personal Financial Planning I

Credits: 3

The course covers applied regression models that are common in personal financial planning research with focus on categorical outcomes. Regression models covered include binomial, multinomial, and ordinal logit and probit models. Particular emphasis is on applying these models in national datasets (e.g., Survey of Consumer Finances) commonly used in financial planning related research and on the interpretation of results.

Repeat for Credit
N

Requisites
Prerequisite: PFP 805

Typically Offered
Fall

PFP 808 - Research Application in Personal Financial Planning

Credits: 3

In-depth applications of personal and family money management principles with emphasis on credit, savings,

insurance, and budgeting.

Repeat for Credit
Y

Typically Offered
On sufficient demand

PFP 825 - Survey of Personal Financial Planning Research and Theory

Credits: 3

This course is a survey of current personal finance and family resource management literature designed to provide an overview of current consumer finance research from multiple perspectives. The course also provides an introduction to doctoral studies in Personal Financial Planning at Kansas State University.

Repeat for Credit
N

Typically Offered
Spring, Summer

PFP 835 - Professional Practice Management in Personal Financial Planning

Credits: 3

Challenges of managing personal financial planning practices including, business valuation, personnel, marketing, client services, ethics and technological applications. Relying both on theoretical and applied approach, students analyze case studies that provide relevant, practical exposure to practice management issues, with a strong emphasis on current research findings.

Repeat for Credit
Y

Typically Offered
Fall

PFP 836 - Financial Planning Case Studies

Credits: 3

This course examines professional issues in financial planning, including ethical considerations, regulation and certification requirements, communication skills, and professional responsibility. Students are expected to utilize skills obtained in other courses and work experiences in the completion of personal finance case studies, the development of a targeted investment policy, and other related financial planning assignments.

Repeat for Credit
Y

Typically Offered
Fall, Spring

PFP 860 - Advanced Retirement Planning Issues

Credits: 3

Advanced study of micro and macro considerations for retirement planning and its inter-relationship with estate planning objectives, comprehensive assessment of peer-reviewed journal resources and models for forecasting retirement needs; survey of and detailed techniques for implementing various types of retirement plans; integration of retirement plans with marital matters, Social Security benefits, and tax aspects.

Repeat for Credit
N

Requisites
Prerequisite: PFP 460, PFP 760 or equivalent.

Typically Offered
Spring

PFP 863 - Advanced Personal Income Tax Planning

Credits: 3

Explores the complex issues of personal income tax planning and working with individuals with advanced tax situations in business and family income as well as trusts and estates.

Repeat for Credit
N

Typically Offered
Fall

PFP 864 - Advanced Estate Planning Issues

Credits: 3

Advanced study of the principles and concepts of estate planning. Topics of discussion will include the advantages, disadvantages, consequences, and risks of lifetime transfers versus transfers at death; minimization of gift and estate taxes through legal means; intergenerational wealth transfers and the impact on families; intrafamily and business succession techniques; planning for nontraditional or special needs clients; and recent case law updates on family limited partnerships and various trusts used in estate planning.

Repeat for Credit
N

Requisites
Prerequisite: PFP 464, PFP 764, or equivalent.

Typically Offered
Spring

PFP 888 - Research Methods in Personal Financial Planning I

Credits: 3

Study and application of social science methodology for research in personal financial planning graduate programs and professional careers.

Repeat for Credit
N

Typically Offered
Fall, Spring

PFP 889 - Theories and Models in Personal Financial Planning

Credits: 3

This course is designed to provide a broad exposure to common theoretical frameworks in the field of personal finance.

Repeat for Credit
N

Requisites
Prerequisite: PFP 806, PFP 888, PFP 890, PFP 906 or equivalent graduate level research or statistics courses.

Typically Offered
Fall

PFP 890 - Research Methods in Personal Financial Planning II

Credits: 3

Intermediate research methods course with a focus on the dissertation proposal process.

Repeat for Credit
N

Requisites
Prerequisite: PFP 888 and PFP 806

Typically Offered
Spring

PFP 894 - Professional Issues in Personal Financial Planning

Credits: 1

Implications of research findings in preparation for professional work in teaching, research, and practice of personal financial planning.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PFP 900 - Research Seminar

Credits: 1-2

In this course, students will attend a research seminar during which a scholar will present current research on topics relevant to Personal Financial Planning. Speakers may include KSU faculty, advanced PFP graduate students, and researchers from other institutions. Students and faculty not only listen to learn from the speaker's expertise but also actively engage with the presentation by asking questions. Asking questions is critical for scientific inquiry and advancement. Questions should be asked to (1) allow the speaker to clarify or expand on material, (2) constructively criticize the methods, research design, or findings, and (3) suggest ways the scholar might improve the analysis.

Repeat for Credit
Y

Typically Offered
Other

PFP 906 - Statistical Methods in Personal Financial Planning II

Credits: 3

Advanced applied statistics course designed for graduate students with a foundation and understanding of basic and multivariable statistics. Examines panel data analyses, such as random-effects and fixed-effects regression, as well as issues involved using these techniques in personal financial planning datasets.

Repeat for Credit
N

Requisites
Prerequisite: PFP 806

Typically Offered
Spring

PFP 909 - Topics in Personal Financial Planning

Credits: 0-3

Recent research, theory construction, and program development in personal financial planning, which will focus on selected relevant topics. Designed for doctoral students in personal financial planning.

Repeat for Credit
Y

Typically Offered
On sufficient demand

PFP 956 - Clinical Research and Applications in Financial Counseling and Planning

Credits: 3

An overview of client relationship building strategies and the design and application of clinical research methods. Designed for doctoral students in personal financial planning.

Repeat for Credit
N

Requisites
Prerequisite: Doctoral Student in Personal Financial Planning.

Typically Offered
Summer

PFP 979 - Global Issues in Personal Financial Planning

Credits: 3

This course study will give students the opportunity to examine cross cultural differences in defining and practicing personal financial planning. This course will allow students to gain experiences familiarizing them with different cultural views. Students are expected to present research related to the areas of financial planning and counseling to their international counterparts. Students will have the opportunity to learn from guest lecturers and students as well as to experience local culture through sight visits.

Repeat for Credit
N

Requisites
Prerequisite: Completed at least 24 graduate credits.

Typically Offered
Spring-Even Years

PFP 990 - Dissertation Proposal Seminar

Credits: 1

Presentation and discussion of proposals for dissertation research.

Repeat for Credit
N

Requisites
Prerequisite: Six hours of statistics, three hours of research design or methods, and consent of major professor.

Typically Offered
Other

PFP 999 - Dissertation Research

Credits: 1-21

Presentation and discussion of final dissertation research.

Note
Consent of School

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PHILO 100 - Introduction to Philosophical Problems

Credits: 3

An introduction to some of the main problems of philosophy, such as the nature of morality, knowledge, mind and body, political authority, and the existence of God.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 105 - Introduction to Critical Thinking

Credits: 3

A basic introduction to both deductive and inductive reasoning. Emphasis is placed on constructing, analyzing, and evaluating arguments.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Empirical and Quantitative Reasoning

PHILO 110 - Introduction to Formal Logic

Credits: 3

Systematic study of deductive reasoning (and possibly inductive reasoning) using the techniques of modern logic. Examines different types of valid inference, the logical structure of English sentences, and the validity of arguments generally. Involves the development and use of a symbolic system which models logical relations among sentences.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

PHILO 112 - Causal and Statistical Reasoning

Credits: 3

This course introduces students to some ideas about causation, and also to some elementary tools for thinking both critically and constructively about causal claims. The treatment is broadly formal, and introduces ideas from statistics, computer science, and philosophy, but requires no mathematical background beyond high school algebra. Some sections are taught using web-based course-ware.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Empirical and Quantitative Reasoning

PHILO 115 - Introduction to Philosophy of Religion

Credits: 3

Arguments pertaining to the existence of God, the nature of religious experience, the problem of evil, the proper relation between reason and faith, and religious diversity.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 120 - Introduction to Philosophy of Art

Credits: 3

Philosophical problems concerning the concepts of art and aesthetic value, patterns of reasoning in art appreciation and criticism, and writing histories of art and artistic movements.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

PHILO 125 - Introduction to Philosophy of Science

Credits: 3

Examines the nature of science and how it differs from pseudo-sciences such as astrology, and raises questions about the nature of reality and social value of science.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PHILO 130 - Introduction to Moral Philosophy

Credits: 3

Philosophical issues arising in and about morality, such as the nature of moral judgments, moral knowledge, moral justification, and the relation of morality to religion. Topics might be approached by a study of contemporary moral Problems, by reading of classical texts, or by both methods.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 131 - Introduction to the Philosophy of Gender

Credits: 3

Introduction to philosophy focusing on the concept of gender and its effects in the world, including the metaphysics, language, ethics and the social-political implications of gendered concepts and language.

Repeat for Credit
N

Typically Offered
Fall, Spring

PHILO 132 - Introduction to the Philosophy of Sex and Love

Credits: 3

An introduction to philosophy that focuses on philosophical

issues pertaining to intimate human relationships, including the concept of love, the ethics of sexuality, and the role of biology and culture in shaping our intimate lives.

Repeat for Credit
N

Typically Offered
Fall or Spring

PHILO 135 - Introduction to Social and Political Philosophy

Credits: 3

Examines rival theories of justice and applies them to current debates about economic inequality, gender, race, and sexual orientation. Combines some influential historical texts with contemporary philosophical literature on current political issues.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 137 - Introduction to Religious Freedom and Democracy

Credits: 3

Religious freedom and religious toleration. Consider this topic in a variety of contexts, including Western democracies and Muslim majority states.

Repeat for Credit
N

Typically Offered
Fall or Spring

PHILO 138 - Ethics and Social Media

Credits: 3

Introduces ethical theories, concepts and methods, e.g. utility, rights and perfect obligations in deontic and consequentialist theories, and applies them to ethical issues in social media, e.g. privacy, bullying, hate speech, doxing, bots and preferences in dating apps. Students learn to evaluate and apply competing ethical systems, and to defend the resulting analysis in written form.

Note
Rationale: The 2030 plan for KSU highlights the need to increase recruiting efforts, train students in ways relevant to their future careers and post-university lives, while maintaining credible academic standards. The Philosophy Department has been offering 100 level courses in ethics (e.g., Introduction to Moral Philosophy) as part of the general education requirement for students in A&S. This proposal has several aims: 1) to create a course in the ethics of social media developing the analytic skills common to philosophical courses in ethics while applying those skills to issues of social importance and interest to students, which course should be 2) available to on-campus students, 3) appropriate for offerings through Global Campus, and 4) made accessible in the near term to high school students in addition to all KSU students.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 140 - Introduction to Philosophy of Mind

Credits: 3

Philosophical problems concerning the nature of human beings, including the relation between mind and body, the existence of the soul, the nature of consciousness, the possibility of artificial intelligence, human freedom and personal identity.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

PHILO 145 - Historical Introduction to Philosophy

Credits: 3

Introduction to philosophy through the study of major thinkers in the history of philosophy, such as Plato, Descartes, Hume. Topics may include the immortality of the soul, the existence of God, skepticism, reasons for being moral.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Historical Perspectives

PHILO 150 - Introduction to Philosophy of Feminism

Credits: 3

Philosophical examination of issues such as femininity and masculinity, the social conditions of gender equality, multiculturalism and gender, affirmative action, sexual harassment, and welfare policy.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 160 - Introduction to Philosophy of Law

Credits: 3

Examines fundamental issues concerning the nature and justification of legal institutions. Topics selected from: the nature of law and its relations to morality, criminal justice and punishment, responsibility and liberty, and legal interpretation.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 175 - Philosophical Composition

Credits: 4

The purpose of this course is to provide students an introduction to philosophy while assisting them to further develop writing skills in preparation for Expository Writing II. Topics covered vary, but typically are related to understanding ourselves and our moral practices.

Repeat for Credit
N

Requisites
Prerequisite: ENGL 100 and open only to freshmen and sophomores.

Typically Offered
Spring

PHILO 180 - Introduction to Philosophy of Race

Credits: 3

Introduction to concepts of race and racial identity; contemporary controversies about the nature of racism and social justice are examined through theories of ethics and political philosophy using various sources, including movies, music, social media.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
Ethical Reasoning and Responsibility

PHILO 185 - Engineering Ethics

Credits: 3

An examination of the principles of ethics as applied to cases arising in the practice of the various branches of engineering.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 215 - Honors Introduction to Philosophy

Credits: 3

Central problems of philosophy, such as skepticism and knowledge, the nature of human minds, freedom, the nature of morality, justice and the existence of God.

Note
For students in an honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 230 - Honors Introduction to Moral Philosophy

Credits: 3

Philosophical issues arising in and about morality. Topics selected from: the nature of moral judgments, moral knowledge, moral justification, and the relation of morality to religion.

Note
For students in an honors program.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Ethical Reasoning and Responsibility

PHILO 295 - Introduction to Environmental Ethics

Credits: 3

Introduces and compares ethical theories applying to issues arising from the use and exploitation of the environment, such as the value of biodiversity, obligations to future generations, obligations to non-humans, and the ethics of environmental risk management.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 297 - Honors Introduction to the Humanities I

Credits: 3

Study of selected major works of history, literature, and philosophy which have been of central importance in the Western cultural tradition. Considerable emphasis is placed on classroom discussion and writing interpretive essays.

Note

For students in an honors program. Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
ENGL 297, HIST 297, MLANG 297

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

PHILO 298 - Honors Introduction to the Humanities II

Credits: 3

Continuation of PHILO 297.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 297 or consent of instructor.

Typically Offered
Spring

Cross-listed
ENGL 298, HIST 298, MLANG 298

K-State Core
6 Arts and Humanities

PHILO 300 - History of Ancient Philosophy

Credits: 3

Ancient Greek Philosophy, particularly in the writings of Plato and Aristotle. Pre-Socratic and/or Hellenistic philosophers may be represented as well.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy, major standing, or consent of instructor.

Typically Offered
Fall

K-State 8
Historical Perspectives

PHILO 301 - History of Philosophy

Credits: 3

This course introduces students to the development of philosophical ideas from ancient Greece to the modern era, and develops skills in the critical interpretation of original texts.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Historical Perspectives

PHILO 303 - Writing Philosophy

Credits: 3

Introduction to philosophical composition to develop skills necessary to succinctly explicate single arguments, dialectics relating several arguments, and critical analyses of arguments. Philosophical topics covered vary, but typically are related to understanding ourselves and our moral practices.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

PHILO 305 - Introduction to Decision Theory

Credits: 3

Introduction to decision and social choice theory emphasizing theories of utility, equilibria, and aggregation.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 320 - Symbolic Logic I

Credits: 3

First order logic, covering truth tables and truth functions, and derivations in both propositional and predicate logic.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

PHILO 326 - Philosophy of Science: Evidence, Evolution and Intelligent Design

Credits: 3

This course is an introduction to philosophy of science using the controversy over evolutionary theory and creation science/intellegent design to explore ideas about evidence, explanation and tests of scientific theories.

Repeat for Credit
N

Typically Offered
Fall or Spring

PHILO 330 - Moral Philosophy

Credits: 3

An introduction to ethics, surveying central issues in normative ethical theory with an emphasis on consequentialism, virtue theory, and deontology.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 331 - Philosophy of Gender

Credits: 3

The concept of gender and its effects in the world, including the metaphysical nature of gender, the potentially gendered nature of many areas of "traditional" philosophy, the nature of structural injustice, and the way in which gender influences life choices in areas such as career, family life, and sexuality.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PHILO 332 - Philosophy of Sex and Love

Credits: 3

Engages philosophical issues pertaining to intimate human relationships, including the concept of love, the ethics of sexuality, and the role of biology and culture in shaping our intimate lives.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PHILO 335 - Introduction to Social and Political Philosophy

Credits: 3

Introduction to modern social and political philosophy, examining questions about central political values, such as equal citizenship, property rights, distributive justice,

fairness, and democratic social and political institutions.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

PHILO 336 - Global Justice

Credits: 3

Addresses philosophical and ethical issues of global and international justice, including responsibility to help the poor, human rights, cosmopolitanism and global equality, the moral dimensions of immigration, just war, global health, and responsibility for combatting climate change.

Repeat for Credit
N

Requisites
Prerequisite: One philosophy course or consent of instructor.

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

PHILO 337 - Religious Freedom and Democracy

Credits: 3

Religious freedom and religious toleration. Consider this topic in a variety of contexts, including Western democracies and Muslim majority states.

Repeat for Credit
N

Typically Offered
On sufficient demand

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

PHILO 340 - Justification and Reliable Knowledge

Credits: 3

This course offers an introduction to epistemology, surveying the historical development of important theories of knowledge, alternative conceptions of justification, and differing ideas about evidence and reliable inference.

Repeat for Credit
N

Requisites
Prerequisite: One philosophy course, major standing, or consent of instructor.

Typically Offered
Fall

PHILO 345 - Worlds, Things and Properties

Credits: 3

Introduction to metaphysics, surveying the historical development of different metaphysical theories, including alternative conceptions of causation and of identity through time, and alternative theories about the relationship between physical and non-physical (e.g. mental) properties.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy, major standing, or consent of instructor.

Typically Offered
Spring

PHILO 346 - Grasping Reality: The Art of Analysis

Credits: 3

Introduction to the formal and informal methods of philosophical analysis. Topics include thought experiments, reflective equilibrium, counterfactual analysis, conceptions of 'knowledge' and 'evidence', notions of proof, causation and causal inference, supervenience, natural laws and other dependence relations.

Repeat for Credit

N

Typically Offered
Fall

PHILO 352 - Philosophy of Horror

Credits: 3

Explores philosophical themes in horror films, including the nature of fear and why humans enjoy feeling afraid; the relationship between fear and humor; existentialism and attitudes towards death; the nature of justice; and the horror genre as a medium for social commentary on race, gender, and animal welfare.

Repeat for Credit
N

Typically Offered
Spring-Even Years

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

PHILO 360 - Topics in Continental Philosophy

Credits: 3

A study of selected figures (such as Kierkegaard, Fichte, Marx, Nietzsche, Beauvoir, Hegel, Schopenhauer, Sartre, Heideggar, Husserl, Wittgenstein, Gadamer, Ricoeur, Foucault, Lacan), or movements (such as Transcendental Idealism, Existentialism, Marxism, Phenomenology, Post-Modernism), or issues in continental philosophy (such as humanity's relation to God, free will, the state, irrationalism, gender, philosophical methodology).

Repeat for Credit
N

Typically Offered
On sufficient demand

PHILO 365 - Medical Ethics

Credits: 3

Selected moral issues which confront the medical professional, including experimentation on human subjects, informed consent, abortion, euthanasia, conflict of interest, and confidentiality.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 380 - Philosophy and Race

Credits: 3

The concept of race and racial identity, and contemporary controversies about the nature of racism and social justice, examined through fiction, movies, and readings in biology, anthropology, history, and philosophy.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PHILO 386 - Philosophy of Computer Science and Software Engineering

Credits: 3

Explores conceptual, ethical, and practical questions about computers and software including the nature of computer science, digital rights, special and general AI, and the ethical responsibilities of software engineers.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

PHILO 390 - Business Ethics

Credits: 3

An examination of the principles of ethics as applied to situations and practices in modern American business.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 399 - Honors Seminar in Philosophy

Credits: 3

Honors Seminar in Philosophy

Repeat for Credit
N

Typically Offered
Fall

PHILO 492 - Computers and Society

Credits: 1-2

A study of ethical issues raised by the impact of computers and associated technologies on society, including such topics as ethics of computer use, computer fraud, protection of privacy; legal, moral, and public policy-making responsibilities of computer professionals.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing plus concurrent enrollment in CIS 415; CIS 520.

Typically Offered
Spring

PHILO 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PHILO 501 - Perspectives on Science

Credits: 3

Provides historical, philosophical, and sociological perspectives on science, its methods and products, the social processes by which its methods are deployed and its products used, and the ways in which its results become imbued with cultural meaning.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

PHILO 510 - Symbolic Logic II

Credits: 3

An advanced study of logical systems and problems in logical theory.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 220 or PHILO 110.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning

PHILO 525 - Social-Political Philosophy

Credits: 3

Examines key developments in contemporary political philosophy in such areas as liberalism, libertarianism, communitarianism, Marxism, and feminism, and on topics of special interest where these theories are applied.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 305, or PHILO 330, or PHILO 335 or consent of instructor.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 535 - Philosophy of Law

Credits: 3

Philosophical issues arising in the legal context, such as the nature of legal reasoning, the nature and scope of constitutional protections, the justification of punishment, affirmative action, and civil disobedience.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy (PHILO 135, PHILO 160, or PHILO 330 recommended), or consent of instructor.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

PHILO 550 - Philosophy of Social Sciences

Credits: 3

Epistemic methods and metaphysical presuppositions in the social sciences. Topics selected from: models, measurement, reduction, explanation, theories of function, theories of ideal types, and rational choice theory.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy, one of which must be PHILO 100 or PHILO 320.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

PHILO 565 - Advanced Topics in Medical Ethics

Credits: 3

An advanced, focused discussion of special topics in the biomedical sciences. Topics vary and include the ethics governing human experimentation, stopping rules for CRTs, justice in funding medical research, justice in the distribution of access to medical care, decision rules for choice of treatment, definitions of disease, medicalization of behavioral patterns, and other related topics.

Repeat for Credit
Y

Requisites
Prerequisite: PHILO 365

Typically Offered
On sufficient demand

PHILO 570 - Aesthetics

Credits: 3

A study of selected topics in aesthetics and the philosophy of art.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy or consent of instructor.

Typically Offered
On sufficient demand

K-State 8
Aesthetic Interpretation

PHILO 585 - Ethics

Credits: 3

Examines key developments in moral philosophy. May

focus on issues in metaethics, ethical theory, or history of ethics.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 330.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 590 - Topics in Philosophy

Credits: 3

A study of selected topics in applied ethics, applied philosophy, or the continental tradition.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy.

Typically Offered
On sufficient demand

PHILO 595 - Environmental Ethics

Credits: 3

Ethical issues that arise from the use and exploitation of the environment, such as the value of biodiversity, obligations to future generations, obligations to non-humans, and the ethics of environmental risk management.

Repeat for Credit
N

Requisites
Prerequisite: One course in philosophy, or one course in the natural sciences.
Recommended Pre-requisite: Philo 330.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PHILO 601 - Advanced Issues in the History of Philosophy

Credits: 3

Particular sets of issues in the history of philosophy or in-depth examination of the thought of a particular philosopher. Emphasis on issues in metaphysics and epistemology.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy and consent of instructor. Depending on topic, PHILO 300 or PHILO 301 required.

Typically Offered
Fall, Spring

PHILO 610 - Special Topics in Logic

Credits: 3

Examination of one or more advanced topics in mathematical or philosophical logic, such as: modal, temporal, and epistemic logics; counterfactuals; intuitionistic and other sub-classical logics; higher-order and other super-classical logics; formal semantics of natural language; or theories of truth.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 110 or PHILO 320, or consent of instructor.

Typically Offered
On sufficient demand

PHILO 615 - Philosophy of Religion

Credits: 3

Concepts of religion, including truth and faith, God and atheism, reason and revelation, morality and religion, evil, humanity, sin, salvation, eschatology.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy. PHILO 305, PHILO 320, or PHILO 340 recommended.

Typically Offered
Fall, Spring

PHILO 620 - The Development of Analytical Philosophy

Credits: 3

The history of analytic philosophy from 1870 to 1960, examining the works of most of the following philosophers: Frege, Russell, Wittgenstein, Moore, the logical positivists, and Quine.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy, one of which must be PHILO 110 or PHILO 320.

Typically Offered
Fall, Spring

PHILO 625 - The Philosophy of Language

Credits: 3

Philosophical problems concerning the nature of language and such concepts as meaning and truth.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy, one of which must be PHILO 110 or PHILO 320.

Typically Offered
Fall, Spring

PHILO 635 - Metaphysics

Credits: 3

A critical examination of theories about objects and their qualities, causality, space, and time. Both traditional and contemporary sources may be used, but emphasis will be placed on the latter.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy. PHILO 305, PHILO 320, or PHILO 340 recommended.

Typically Offered
Fall, Spring

PHILO 640 - Epistemology

Credits: 3

Philosophical issues relating to human knowledge. Issues selected from: the difference between knowledge and belief, whether knowledge is really attainable, whether we have epistemic duties and what they might be, what counts as justification for belief. Special topics may include self-knowledge, a prior knowledge, inductive knowledge, and naturalism.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy. PHILO 305, PHILO 320, or PHILO 340 recommended.

Typically Offered
Fall, Spring

PHILO 645 - The Philosophy of Science

Credits: 3

Philosophical problems concerning science, its methods. Topics selected from: qualitative and quantitative confirmation theories and the nature of scientific theories, laws, and explanation in the physical and biological sciences.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy, one of which must be PHILO 110 or PHILO 320.

Typically Offered
Fall, Spring

PHILO 646 - Philosophy of Physics

Credits: 3

This course offers an exploration of the conceptual foundations of modern physics, including topics from relativistic space-time theories, quantum mechanics and gauge theories, and related topics in the philosophy of science, including the nature of physical laws, reduction, the measurement problem and non-locality.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy.

Typically Offered
Other

PHILO 647 - Philosophy of Biology

Credits: 3

This course will introduce a range of topics in the philosophy of biology, including: the conceptual foundations of evolutionary theory, interpretations of fitness and selection, group selection, definitions of species, epistemological problems in phylogenetic inference, design arguments, explanation in biological sciences and reliable modeling in ecology and evolutionary biology.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy.

Typically Offered
Other

PHILO 650 - Rationality and Action

Credits: 3

Philosophical issues connected with human action and reasons for action, such as the existence of objective reasons to act one way rather than another, the existence of reasons to act that do not stem from desires, the difference between reasoning about how to act and reasoning about what is true, the nature of intention and desire and their specific roles in action.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy.

Typically Offered
Fall, Spring

PHILO 655 - Philosophy of Mind

Credits: 3

A philosophical examination of major theories about the nature of the mind, mental causation, consciousness, intentionality, cognition and psychological explanation.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy. PHILO 305, PHILO 320 or PHILO 340 recommended.

Typically Offered
Other

PHILO 660 - Advanced Ethics

Credits: 3

Selected topics in contemporary ethical theory.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 330 and one other philosophy course.

Typically Offered
Fall, Spring

PHILO 665 - Philosophy of Economics

Credits: 3

Moral and conceptual foundations of modern economic systems. Topics selected from: the relations between "economics rationality" and the quality of life, the just distribution of wealth, the nature of property rights, and the value of technology in society.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in philosophy.

Typically Offered
Fall, Spring

PHILO 670 - Advanced Social-Political Philosophy

Credits: 3

A study of a single topic in contemporary philosophical literature, with application to current political issues. Topic selected from: multiculturalism, minority rights, nationalism, justification of democracy.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 525 and one other philosophy course.

Typically Offered
Fall, Spring

PHILO 680 - Independent Study in Philosophy

Credits: 1-18

Independent Study in Philosophy

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PHILO 685 - Current Topics in Metaphysics and Epistemology

Credits: 3

Selected philosophical issues of current interest in analytic metaphysics and epistemology.

Repeat for Credit
Y

Requisites
Prerequisite: PHILO 340 and two additional philosophy courses.

Typically Offered
Fall, Spring

PHILO 690 - Special Topics in Philosophy

Credits: 3

Selected topics in metaphysics, epistemology, philosophy of science, philosophy of language, or philosophy of mind.

Repeat for Credit
N

Requisites
Prerequisite: PHILO 320 and additional background courses required for topic.

Typically Offered
On sufficient demand

PHILO 701 - Topics in Metalogic

Credits: 3

Selected topics in the analysis of first-order theories and the foundations of mathematics.

Repeat for Credit
Y

Requisites
Prerequisite: PHILO 510 or MATH 511.

Typically Offered
On sufficient demand

PHILO 801 - Topics in Philosophy and Methodology of Science

Credits: 1-3

This course explores philosophical problems concerning sciences and its methods. Topics selected from: conceptual foundations of modern science, qualitative and quantitative confirmation theories, and the nature of theories, laws, and explanation in the sciences.

Note
Instructor permission.

Repeat for Credit
Y

Typically Offered
On sufficient demand

PHYS 017 - Colloquium in Physics

Credits: 0

Weekly lectures on topics of current interest in physics by faculty and visiting scientists.

Repeat for Credit
N

Typically Offered
Fall, Spring

PHYS 101 - The Physical World

Credits: 3

Presents an overview of physics for students who have little or no physics background. The Physical World is principally classical physics with some discussion of modern physics. The observations and phenomena are simple and basic.

Note
Three hours lecture a week. Not available for credit to students who have credit in PHYS 106.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 102 - Current Topics in the Physical World

Credits: 3

May include nuclear physics, atomic theory, quantum mechanics, chemistry, geology, molecular biology, astronomy, and other topics of current interest.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 103 - The Physical World Laboratory

Credits: 1

This laboratory is designed to introduce students to the scientific method with an emphasis on basic physics experiments in mechanics, thermal physics, electricity and magnetism.

Note
Two hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PHYS 101.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 106 - Concepts of Physics

Credits: 4

An introductory course in physics which emphasizes the topics of physics normally presented to elementary school children. A qualitative approach with integrated laboratory, this course is recommended for students preparing for careers as elementary school teachers.

Note
Not available for credit to students who have completed

PHYS 101.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 109 - Astronomy

Credits: 3

A qualitative study of the earth, sun, planets, stars, galaxies and the universe; a survey of what is known about the universe and how we know it.

Note
2 hours lecture and one 2-hour lab per week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 113 - General Physics I

Credits: 4

A basic development of the principles of mechanics, heat, fluids, oscillations, waves and sound. Emphasis is on conceptual development and numerical problem solving.

Note
Two hours lecture, one hour recitation, one hour quiz, and two hours lab week.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 114 - General Physics II

Credits: 4

The continued treatment of the fundamentals of electricity and magnetism, light and optics, atomic and nuclear physics. These concepts are used to understand D.C. and A.C. circuits, motors, and generators. Emphasis is placed on conceptual development and problem solving.

Note
Two hours lecture, one hour recitation, one hour quiz, and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 113.

Typically Offered
Fall, Spring, Summer

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 115 - Descriptive Physics

Credits: 5

Covers mechanics, electricity, heat, light, sound, and atomic theory. Surveys of the major fields of physics concentrating on how physicists work to understand and describe physical phenomena.

Note
Two hours lecture, one hour quiz, and four hours studio a week. High school algebra.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 122 - Physics Today I

Credits: 1

The first of a two-semester study of problem solving in physics. Introductory physics problems as well as problems encountered in research will be discussed. Introductory problems will focus on mechanics and thermodynamics. Research discussions will center on topics of current interest at K-State and elsewhere.

Note
One class of two hours per week.

Repeat for Credit
N

Requisites
Prerequisite: Physics major OR consent of instructor.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

PHYS 123 - Physics Today II

Credits: 1

Second of a two-semester study of problem solving in physics. Introductory physics problems as well as problems encountered in research will be discussed. Introductory problems will focus on electricity, magnetism, and optics. Research discussions will center on topics of current interest at K-State and elsewhere.

Note
One class of two hours per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 122 AND (physics major OR consent of instructor).

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

PHYS 213 - Engineering Physics I

Credits: 5

Mechanics and heat; for students of science and engineering.

Note
Two hours lecture, one hour quiz, and four hours studio a week.

Repeat for Credit
N

Requisites
Corequisite: MATH 220.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 214 - Engineering Physics II

Credits: 5

Sound, electricity, magnetism, light, and modern physics; for students of science and engineering.

Note
Two hours lecture, two hours recitation, one hour quiz, and four hours studio a week.

Repeat for Credit
N

Requisites

Prerequisite: PHYS 213 AND corequisite MATH 221.

Typically Offered
Fall, Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 223 - Physics I, Mechanics, and Thermodynamics

Credits: 5

For physics majors. Lecture and quiz in common with PHYS 213. Special studio.

Repeat for Credit
N

Requisites
Corequisite: (PHYS 122 OR consent of instructor) AND MATH 220.

Typically Offered
Fall

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 224 - Physics II, Electromagnetism, and Sound

Credits: 5

For physics majors. Lecture and quiz in common with PHYS 214. Special studio.

Repeat for Credit
N

Requisites
Corequisite: (PHYS 123 OR consent of instructor) AND PHYS 223 AND MATH 221.

Typically Offered
Spring

K-State Core
4 Natural and Physical Sciences

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 300 - Physics in Relation to Other Disciplines

Credits: 1-3

Variable content, offered only by prearrangement with the physics department and with the instructor. A brief syllabus will be available for each offering of PHYS 300 outlining the objectives and organization of the course for the semester in which offered.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 325 - Physics III, Relativity, and Quantum Physics

Credits: 4

An introduction to modern physics as exemplified by atomic, nuclear, condensed matter, and particle phenomena.

Note
Three hours of lecture and one two-hour lab per week.
A working knowledge of spreadsheets and use of computers as data analysis tools.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214.

Typically Offered

Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 399 - Physics Honors Seminar

Credits: 1-3

Discussions of topics of current interest in physics.

Note
Students must be enrolled in the arts and sciences honors program or have permission of the instructor. Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 400 - Independent Study in Physics

Credits: 1-3

Independent theoretical or experimental investigation of a topic for physics majors or for a senior honors thesis.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing AND consent of instructor.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning

PHYS 451 - Principles of Contemporary Physics

Credits: 3

A non mathematical introduction to twentieth century physics: relativity, quantum mechanics, the physics of solids, and fundamental particles.

Note
Not open to physics majors. Credit is not granted for both PHYS 451 and PHYS 452.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 101.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 452 - Contemporary Physics: Problems and Principles

Credits: 4

An introduction to twentieth century physics; relativity, quantum mechanics, the physics of solids, and fundamental particles. The lectures are in common with PHYS 451.

Note
Three hours lecture and two hour lab each week. The laboratory will include the quantitative aspects of the subject matter.

Not open to physics majors. Credit is not granted for both PHYS 451 and PHYS 452.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 114.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 460 - Undergraduate Topics in Physics

Credits: 1-6

Special topics in physics not completely treated in other courses.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 114.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 495 - Astronomy

Credits: 3

Topics in modern astronomy. Use of a telescope for observational astronomy will be emphasized.

Note
Two hours lecture and two hours independent observational astronomy a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 109.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 497 - Senior Research in Physics

Credits: 1-3

Individually directed research in atomic physics, condensed matter, particle physics or physics education.

Repeat for Credit
Y

Requisites
Prerequisite: Senior in physics AND consent of instructor.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 498 - Honors Tutorial in Physics

Credits: 1-3

Individually directed research in physics, normally taken as a preparation for writing an honors thesis.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 506 - Advanced Physics Laboratory

Credits: 4

The completion of experiments of current and/or historical interest in contemporary physics. Students develop skills in

and knowledge of measurement techniques using digital and analog instruments. Various data analysis techniques are used.

Note
Four (4) class hours per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 515 - Physics for Science Teachers

Credits: 1-4

Study of current topics in physics, with laboratory experience and demonstration of the processes or phenomena under consideration. Topics and activities will be directed toward providing teachers with material for demonstrations and student experiments or projects. Examples of topics are: solar power, laser applications, holography, and subnuclear particles, relativity, or the historical development of some physical concept.

Repeat for Credit
Y

Requisites
Prerequisite: Two semesters of college physics.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 522 - Mechanics

Credits: 4

Principles of statistics and dynamics of systems of particles and rigid bodies. Topics include Newton's laws for one particle, non-inertial reference frames, central forces, system of particles, rigid body statics and motion in a plane and in three dimensions, Lagrangian mechanics and Hamilton's equations, oscillating systems and normal coordinates.

Note
Three hours of lecture and one hour recitation per week
The recitation will focus on mathematical methods and techniques applied to problem solving.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 532 - Electromagnetic Fields I

Credits: 4

An introduction to electricity and magnetism. The first of a two semester study of Maxwell's equations in both integral and differential forms. Topics include electrostatics with vector calculus; electrostatic potential solutions in rectangular, cylindrical, and spherical coordinates; dielectrics; electrostatic energy and capacitance; magnetostatics with vector calculus; Biot-Savart law; vector and scalar potentials for magnetisml magnetic permeability; Faraday's law in integral and differential form; magnetic energy and inductance; displacement current; lumped oscillations and LCR systems; impedance.

Note
Three hours of lecture and one hour recitation per week. The recitation will focus on mathematical methods and techniques applied to problem solving.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214.

Typically Offered
Fall

PHYS 620 - Teaching University Physics

Credits: 3

A discussion of techniques which will aid in the development of understanding the concepts in physics. Emphasis is placed on models of learning and teaching techniques which can be applied to the teaching of contemporary physics to university students. These models and techniques are used to analyze a teaching approach of topics, such as quantum mechanics, which is important to today's physicist.

Note
Three class hours per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 633 - Electromagnetic Fields II

Credits: 3

Second of a two semester study of Maxwell's equations in both integral and differential forms. Special relativity; Lorentz transformations; relativistic invariants; transformation properties of electric and magnetic fields and potentials; Lorentz force and electrodynamics; electromagnetic fields of a point charge; electromagnetic waves; solutions to the wave equation in rectangular, cylindrical, and spherical geometries; wave propagation in matter; reflection, refraction, and transmission; wave guides and fiber optics; Fresnel equations; polarization; dipole radiation.

Note
Three lectures per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 532 OR graduate standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 636 - Physical Measurements Instrumentation

Credits: 4

A laboratory-oriented course to acquaint students with electrical circuits, their interfacing with measuring instruments, and their use in making physical measurements.

Note
Four class hours per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214 OR (PHYS 114 AND MATH 220) OR graduate standing.

Typically Offered
Spring

PHYS 639 - Computations in Physics

Credits: 3

An introduction to applying computational and numerical techniques to solve problems of interest to physicists. Topics include the application of computational analysis and solution to physical problems in both classical, and quantum physics including particle structure and motion, interaction of particles with fields, and model building for simulation of physical phenomena. A practicum is an integral part of the course. Students will use both personal computers and advanced workstations.

Note
One hour lecture, two hours of computer lab per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 642 - Nuclear Physics

Credits: 3

An introduction to the structure of the nucleus, radioactivity, and nuclear energy; the application of quantum mechanics to describe nuclear physics.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
On sufficient demand

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 651 - Introduction to Optics

Credits: 4

Introduction to modern concepts in optics: electromagnetic waves, propagation of light through media, geometrical optics of lenses, mirrors and simple optical instruments, polarization, interference, coherence, and diffractions.

Note
Taught in a studio format; three hours of lecture and two hours of laboratory per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 652 - Applied Optics and Optical Measurement

Credits: 3

Topical approach oriented toward measurements including coherence, Fourier Optics, holography, light scattering, interferometry, laser technology.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 651 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 655 - Physics of Solids

Credits: 3

An introduction to the physics of solids with an emphasis on energy band structures, electrical and optical properties of solids and solid state devices.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 662 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 662 - Introduction to Quantum Mechanics

Credits: 4

Concepts and mathematical models of quantum physics. Solutions to the time independent Schrödinger equation, descriptions of one-electron and multi-electron atoms, electron spin and magnetic moments.

Note
Three hours lecture and one hour recitation per week. The recitation will focus on mathematical methods and techniques applied to problem solving.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 664 - Thermodynamics and Statistical Physics

Credits: 3

An introduction to thermodynamics developed from the concepts of statistical physics. Applications include the gas laws, concepts of heat and work, phase transitions, and kinetic theory with applications to statistical physics.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Fall

PHYS 691 - Introduction to Astrophysics

Credits: 3

An introduction to the application of physical principles to understanding astronomical objects. Topics include properties of stars, stellar evolution, galaxies, and cosmology.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 692 - Introduction to Cosmology

Credits: 3

An introduction to the physics and astrophysics of the hot big bang model to the Universe.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Spring-Even Years

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 694 - Particle Physics

Credits: 3

An experimental and phenomenological introduction to high energy physics. The course will emphasize understanding the experimental basis of what is known about the subnuclear domain. Students will be asked to design simple conceptual experiments in addition to solving problems.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 325 OR graduate standing.

Typically Offered
Other

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PHYS 701 - Cosmology

Credits: 3

A general-relativity-based discussion of the physics of the hot big bang model of the Universe.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 692 OR graduate standing.

Typically Offered
Fall-Even Years

PHYS 707 - Topics in Physics

Credits: 1-18

Special topics courses. Topics and credits announced for the semester in which offered. May be given in conjunction with lecture series by visiting scientists.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate OR senior standing, AND consent of instructor.

Typically Offered
Fall, Spring, Summer

PHYS 709 - Applied Quantum Mechanics

Credits: 3

A study of Schrödinger's theory of quantum mechanics and its application to one electron atoms, multielectron atoms, quantum statistics, spectra of molecules and selected topics in quantum excitations of solids, nuclear physics, and elementary particles.

Note
Three hours of lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 662 OR graduate standing.

Typically Offered
Fall

PHYS 741 - The Physics of Lasers

Credits: 3

The theory of lasers including Light-matter interactions, atomic rate equations, threshold and oscillation; resonators and cavity modes; and laser dynamics including Q-switching and mode-locking.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 652 OR graduate standing.

Typically Offered
On sufficient demand

PHYS 775 - Biological Physics

Credits: 3

This lecture course introduces basic cellular biology for students lacking a biological background and established connections between molecular and cellular phenomena (such as photosynthesis, cellular foraging, and nerve stimulation) and experimentally verifiable models built from physical (classical, statistical, and quantum mechanical, as well as electromagnetic) considerations.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 214 OR (PHYS 114 AND MATH 220) OR graduate standing.

Typically Offered
On sufficient demand

PHYS 800 - Problems in Physics I

Credits: 1

Independent study of the solution of advanced problems in physics at a level appropriate to the M.S. Degree.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Spring

PHYS 801 - Mathematical Methods of Physics

Credits: 3

Mathematical techniques for the solution of physical problems. Mathematical topics employed include vector and tensor analysis, matrices, group theory, complex variable theory, differential equations, Sturm-Liouville theory, orthogonal functions, special functions, Fourier series, integral transforms, and the calculus of variations.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Fall

PHYS 802 - Computational Methods in Physics

Credits: 4

Methods of solving physical problems using digital computers including numerical differentiation and integration, error analysis and curve fitting, interpolation, ordinary and partial differential equations, matrix operations, eigenvalues, special functions of mathematical physics. Monte Carlo simulations, and stability of solutions.

Note
Two hours lecture each week and a self-paced practicum.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Spring

PHYS 806 - Journal Club

Credits: 1-18

Seminar in current topics in physics.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Fall

PHYS 807 - Graduate Physics Seminar

Credits: 1

Lecture by faculty and graduate students on topics of current research interest.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Fall, Spring

PHYS 808 - Advanced Problems

Credits: 1-18

Independent study in a special problem in physics at the graduate level chosen with the advice of a faculty mentor.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Fall, Spring, Summer

PHYS 811 - Quantum Mechanics I

Credits: 3

Fundamental concepts and general formalisms of quantum theory and its applications to bound states, scattering or few state systems. Introduction to quantum applications of operators and state vectors.

Repeat for Credit
Y

Requisites
Prerequsite: PHYS 801.

Typically Offered
Spring

PHYS 821 - Advanced Dynamics

Credits: 3

Study of Lagrangian and Hamiltonian mechanics. Includes canonical transformations, the Hamilton-Jacobi equation, and elements of classical chaos theory.

Repeat for Credit
Y

Requisites
Prerequsite: PHYS 801.

Typically Offered
Spring

PHYS 831 - Electrodynamics I

Credits: 3

The interaction of electrical charges with each other and radiation as described by the theory of Maxwell and Lorentz. Topics include Coulomb's law and vector fields, Ampere's law and magnetic fields. Faraday's law and inductive fields, continuity relations and conservation laws.

Repeat for Credit
Y

Requisites
Prerequsite: PHYS 801.

Typically Offered
Fall

PHYS 850 - Theory of Atomic Structure and Atomic Interactions

Credits: 3

The quantum mechanics of atomic structure and spectra: one and two electron atoms, many electron atoms, molecular structure and spectra, atomic collision theory for electron-atom and ion-atom collisions.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Other

PHYS 860 - Electron and Ion Impact Phenomena

Credits: 3

Atomic collision phenomena; experimental techniques in accelerator-based atomic physics; charged particle and photon spectroscopy; elastic, inelastic, and rearrangement collisions; and applications.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Other

PHYS 870 - Nonlinear and Quantum Optics

Credits: 3

Theory and applications of nonlinear optics: difference and sum frequency generation; ultrashort pulse characterizations; third order effects; Raman scattering; and higher harmonic generation. Fundamentals of quantum optics including field quantization; coherent state; nonclassical light; and optical tests of quantum mechanics.

Repeat for Credit
N

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
On sufficient demand

PHYS 881 - Introduction to Solid State Physics

Credits: 3

Introduction to the physics of condensed matter: crystal lattices; lattice dynamics; electron energy bands; fermi surfaces; optical, magnetic, and transport properties of insulators, semiconductors, and metals.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing OR consent of instructor.

Typically Offered
Other

PHYS 899 - Research in Physics

Credits: 1-18

Master's level research.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Fall, Spring, Summer

PHYS 907 - Advanced Topics in Physics

Credits: 0-18

Critical studies of selected advanced topics.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Other

PHYS 910 - Problems in Physics II

Credits: 1

Independent study of the solution of advanced problems in physics at a level appropriate to the Ph.D. Degree.

Repeat for Credit
Y

Typically Offered
Other

PHYS 911 - Quantum Mechanics II

Credits: 3

Formalisms and applications of quantum theory, including symmetry in quantum systems, space-time symmetries, the rotation group, many body systems, and an introduction to relativistic quantum mechanics.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 811.

Typically Offered
Fall

PHYS 912 - Advanced Quantum Mechanics

Credits: 3

Relativistic quantum mechanics; scattering theory; second quantization and the many-body problem. Introduction to quantum electrodymatics.

Repeat for Credit

Y

Requisites
Prerequisite: PHYS 911.

Typically Offered
On sufficient demand

PHYS 913 - Advanced Topics in Mathematical Physics

Credits: 3

Critical studies of selected advanced topics.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 801.

Typically Offered
Other

PHYS 914 - Quantum Field Theory

Credits: 3

Topics may include second quantization, quantization of the free scalar and Dirac fields, quantum electodynamics, quantization of the electromagnetic fild, propagators and Feynman rules, or other contemporary topics in quantum field theory.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 911.

Typically Offered
On sufficient demand

PHYS 915 - Quantum Field Theory II

Credits: 3

Topics may include: Radiative Corrections of QED; Gauge Theories; Weak Interactions, Gauge Theory of Weak Interactions, Spontaneous Symmetry Breaking, and the Standard Electroweak Theory; Field Theory Methods, and Path Integrals; Quantum Chromodynamics; Regularization; Asymptotic Freedom.

Repeat for Credit
N

Requisites
Prerequisite: PHYS 914.

Typically Offered
Fall-Even Years

PHYS 931 - Electrodynamics II

Credits: 3

The interaction of electrical charges with each other and radiation as described by the theory Maxwell and Lorentz. Topics include the propagation and production of radiation, Lorentz transformations and relativistic dynamics.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 831.

Typically Offered
Spring

PHYS 953 - Advanced Topics in Atomic Interactions

Credits: 1-18

Critical studies of advanced topics in atomic interactions.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Other

PHYS 971 - Statistical Mechanics

Credits: 3

The study of equilibrium states of physical systems involving many particles. Introduces basic concepts of statistical ensembles and presents applications to non-interacting systems for both classical and quantum-mechanical particles. Discusses aspects of interacting

classical systems, including a brief introduction to phase transitions and critical phenomena.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 821.

Typically Offered
Fall

PHYS 981 - Solid State Physics

Credits: 3

Quantized lattice vibrations, methods of band structure calculations, effective mass formulations, applications to optical absorption, excitons, magnetism, and superconductivity.

Note
Continuation of PHYS 881.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 811.

Typically Offered
Other

PHYS 982 - Advanced Topics in Solid State Physics

Credits: 3

Critical studies of selected advanced topics.

Repeat for Credit
Y

Requisites
Prerequisite: PHYS 881.

Typically Offered
Other

PHYS 999 - Research in Physics

Credits: 1-18

Doctoral level research.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing AND consent of instructor.

Typically Offered
Fall, Spring, Summer

PLAN 010 - Planning Field Trip 1

Credits: 0

Multi-day field trip experience in a location of planning significance. Students will learn about professional planning practice in location to develop planning knowledge base and apply findings to other courses.

Repeat for Credit
Y

Typically Offered
Spring

PLAN 020 - Planning Field Trip

Credits: 0

Multi-day field trip experience in a location of planning significance. Students will learn about professional planning practice in location to develop planning knowledge base and apply findings to other courses.

Repeat for Credit
N

Typically Offered
Spring

PLAN 115 - Introduction to Regional and Community Planning

Credits: 3

The origins and evolution of planning in response to economic, social, political, physical, and environmental issues. The planning process and its relationship to the design professions and the social and behavioral sciences.

Repeat for Credit
N

Typically Offered
Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

PLAN 215 - World Cities

Credits: 3

This course introduces undergraduates from a variety of disciplines to some of the major urban areas in the world, how and why they developed, what makes them unique, what it might be like to live there, and what issues they may face in achieving a sustainable future. This course gives students a way of thinking about cities in a global context that highlights both their differences and their similarities. Through lectures, text and other multi-media formats, students explore some of the main opportunities and challenges facing the inhabitants of large cities in today's world.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

PLAN 316 - Planning Principles Seminar

Credits: 2

Discussion of the principles and process of regional and community planning as practiced by the profession. The tools, skills and knowledge of the planning professions are presented in a focused introduction to the profession.

Repeat for Credit
N

Requisites
Corequisite: PLAN 315, admission to the Regional and Community Planning program.

Typically Offered
Fall

PLAN 320 - Community Development Field Workshop

Credits: 3

This course integrates meaningful field experiences with in-class instruction and reflection to introduce students to community assets. Coursework focuses on critical thinking, cultural literacy, and applied classroom knowledge of community assets to encourage shared civic engagement.

Repeat for Credit
N

Requisites
Prerequisite or co-requisite: PLAN 115.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

PLAN 444 - Career Planning Seminar

Credits: 2

Exploration and identification of career paths and development of academic plans for reaching personal and professional goals including specific coursework internships, study abroad and extracurricular activities.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315.

Typically Offered
Fall

PLAN 510 - Graphic Composition and Representation for Planning

Credits: 2

A hands on, introductory course that prepares built environment professionals to meet the varying challenges of the practice world by making them familiar with digital graphic tools, representation and composition rules and skills, and color theory.

Repeat for Credit
N

Requisites
Corequisite: PLAN 215 or PLAN 315 and PLAN 640.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

PLAN 640 - Urban Design and Development

Credits: 3

Review of recent and historical developments of urban form and space, presented through lecture and discussion. Criteria and methodology for urban design and planning as well as the role of historic preservation.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 215 and PLAN 115.

Typically Offered
Fall

K-State 8
Historical Perspectives

PLAN 641 - Special Studies in Planning

Credits: 1-18

Special Studies in the area of regional and community planning.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLAN 645 - Professional Internship Report

Credits: 1

Oral and graphic presentation of work completed in PLAN 703.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 703

Typically Offered
Fall

PLAN 650 - Housing and Development Programs

Credits: 3

Review and evaluation of historical and current housing issues, production, and financial systems, including consideration of racial, ethnic, income, and gender issues as they relate to the role of housing developments and programs in community development.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315; ENGL 200.

Typically Offered
Spring

PLAN 655 - Land Development Planning

Credits: 3

Examination of the process of land development in the United States, and its impacts from the perspective of developers, financial institutions, community planners, and city administrators. Focus is on the understanding of the land development process in meeting community goals and shaping land development to meet community expectations for the improvement of the community. Conflict resolution and negotiation skills represent a communication emphasis.

Repeat for Credit
N

Requisites

Prerequisite: PLAN 315.

Typically Offered
Spring-Odd Years

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

PLAN 660 - Community Development Planning

Credits: 3

Examination of past and present approaches to community development planning in the United States. Review and assessment of community development planning policies, programs and practices.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PLAN 661 - Community Development Workshop

Credits: 3

The organization, planning, design, development, and evaluation of community development projects with real clients and actual locations.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PLAN 665 - Professional Internship

Credits: 1-9

Internship with an approved planning sponsor subject to the approval of the departmental faculty.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 444.

Typically Offered
Fall, Spring, Summer

PLAN 667 - Transportation Planning

Credits: 3

The background, framing theories, professional activities and policy debates of transportation planning regarding transit, roads, non-motorized travel, energy use and climate change, land use, congestion, finance, economic development, health, safety, politics, asset management, politics, emerging technologies and the sharing economy.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

PLAN 668 - Travel Demand Modeling

Credits: 3

The history, evolving theory, application, and debates surrounding travel demand modeling. Instruction in one of the main travel demand modeling software packages. Practical use of that software.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

PLAN 670 - Planning in POP Culture

Credits: 3

Planning in POP Culture is an exploratory educational adventure of regional and community planning issues through the cultural media of song, literature, visual art, and film.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PLAN 672 - Collective Decisions

Credits: 3

Provides an introduction to planning as a collective decision-making tool; examines how planners work within a decision-making environment to move from regional and community planning concepts to implementing plans.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315 or instructor permission.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PLAN 674 - Regional Economic Development Policy

Credits: 3

Introduce students to the theory and practice of economic development at the sub-national level. Evaluate the design and implementation of economic development activities.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Social Sciences

PLAN 703 - Off-Campus Studies

Credits: 5

Off campus studies fulfilled in an approved professional office, in an approved international studies program, or at the Kansas City Design Center (KCDC).

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PLAN 704 - Report Preparation

Credits: 3

Comprehensive data collection and analysis based on an approved research proposal.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 897

Typically Offered
Fall

PLAN 705 - Master's Project

Credits: 3

Comprehensive application of research and planning through individual studies approved by the department faculty.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 897

Typically Offered
Spring

PLAN 707 - Writing and Thinking the City

Credits: 3

Hands-on discussion and writing course focused on building an in-depth understanding of the growth, development and social dimensions of cities, and critical thinking and writing skills for built environment scholars and professionals.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 215 or PLAN 115.

Typically Offered
Fall

PLAN 718 - Principles and Strategies of Community Change

Credits: 3

This course prepares built environment professionals to address the field of community development through application of community development principles and strategies.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

PLAN 720 - Infrastructure and Plan Implementation

Credits: 3

Examination of infrastructure systems, the transportation process, land-use, and development standards; consideration of policy options and strategies; review of financing options and regulatory requirements associated with the various infrastructure elements. The course also reviews social and other issues that affect and are affected by infrastructure related decisions.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 115 or PLAN 215.

Typically Offered
Fall

PLAN 730 - Planning Professional Practice

Credits: 3

Students will learn the functions of public and private sector professional practice including organizational structures, administration and management, and professional ethics.

Repeat for Credit
N

Typically Offered
Fall

PLAN 740 - Small Community and Rural Area Planning

Credits: 3

Synthesis of small community and rural area change, including socio-economic-political determinants as bases for community design and planning.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 115.

Typically Offered
Fall

PLAN 741 - Special Studies in Planning

Credits: 1-18

Special Studies in the area of regional and community planning.

Repeat for Credit
Y

Requisites
Prerequisite: PLAN 115.

Typically Offered
Fall, Spring, Summer

PLAN 749 - Metropolitan Planning and Design

Credits: 3

Examination of urban form and the making of livable and sustainable metropolitan regions from an urban design perspective. Introduction to public and private roles in the creation of urban form at regional, city, neighborhood, and site scales; consideration of regional and global consequences of local decisions; examination of design tools and methods used to shape decision making in urban development.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 115.

Typically Offered
Spring

PLAN 753 - Planning Law

Credits: 3

Examination of the evolution and current state of land use regulation within constitutional limits. Introduction to zoning, subdivision, and other police power controls within the comprehensive planning process.

Repeat for Credit
N

Typically Offered
Fall

PLAN 755 - Professional Practice: Discipline-Specific Topics

Credits: 1

Covers discipline-specific concerns, focusing on issues specific to architecture, interior architecture and product design, landscape architecture or regional and community planning.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 316.

Typically Offered
Fall, Spring

PLAN 765 - Growth Management

Credits: 3

Study of the process of city growth and change in relation to planning techniques and socio-economic-political determinants. Criteria and methodology for the growth management are reviewed and applied to the contemporary city.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315, PLAN 720.

Typically Offered
Spring

PLAN 801 - Knowledge Methods

Credits: 3

A course on quantitative analytical methods for planners. The students will learn problem solving and data analysis in the planning profession such as population project, economic analysis and introductory statistics.

Repeat for Credit
N

Typically Offered
Fall

PLAN 802 - Planning Methods II

Credits: 3

The application of computer concepts to problem solving and data analysis in the planning profession for community demographic analysis, economic analysis, and market analysis. Included are elements of professional report preparation and visual graphic presentations of planning projects for use in public meetings and for public viewing. Material developed in PLAN 801 form the subject matter

of the presentations.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 801.

Typically Offered
Spring

PLAN 803 - Community Research Methods

Credits: 3

Focus is on the analytical tools for the selection, collection, analysis, and interpretation of regional and community policy planning activities. Included is the development of survey instruments and interpretation, work flow and work measurement skills, performance standards and program evaluation techniques for policy planning and analysis at the local governmental level.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 225, STAT 250, STAT 702, or STAT 703.

Typically Offered
Fall

PLAN 805 - Internship in Planning

Credits: 1-4

Assignment to a planning staff for a period of at least 10 weeks; supervision by a professional planner with periodic reports of activities to planning faculty.

Repeat for Credit
Y

Requisites
Prerequisite: Completion of two semesters of graduate study in planning.

Typically Offered
Fall, Spring, Summer

PLAN 812 - Planning Theory & Law

Credits: 3

A course on planning theory and planning law. Students will learn about the procedural theories and legal frameworks that support planning practice.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 115.

Typically Offered
Spring

PLAN 815 - Planning Theory, Ethics and Practice

Credits: 3

Review of the basic theories of regional and community growth and change, analysis of the process of urbanization in relation to societal determinants and environmental constraints, and the study of a process of planning for professional practice. Exploration of societal and human values in relation to issues of equity, social justice, economic welfare, and efficient use of resources, as well as ethical approaches to these issues.

Repeat for Credit
Y

Requisites
Prerequisite: PLAN 115.

Typically Offered
Spring

PLAN 836 - Plan Making

Credits: 5

This course is about plan-making. Students will learn criteria, standards, and methodology for community and/or regional analysis and planning, and apply them to the practice of planning.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 315, PLAN 720 and GEOG 508 or equivalent.

Typically Offered
Spring

PLAN 880 - Topics in Planning

Credits: 1-18

Independent study of selected concepts and trends in regional and community planning and development.

Repeat for Credit
Y

Requisites
Prerequisite: PLAN 803.

Typically Offered
Fall, Spring, Summer

PLAN 897 - Proposal Writing

Credits: 2-3

Exploration of procedures of planning, design, scheduling, organization, and management of a regional and community planning research project.

Note
Thesis students enroll for 2 credit hours. Master's Project and Report students enroll for 3 credit hours.

Repeat for Credit
Y

Requisites
Prerequisite: PLAN 707 and PLAN 801.

Typically Offered
Fall, Spring

Cross-listed
PLAN/LAR 897: Proposal Writing

PLAN 898 - Master's Report

Credits: 2

Comprehensive application of research and planning through individual studies approved by the department faculty.

Repeat for Credit
N

Requisites
Prerequisite: PLAN 704.
Corequisite: PLAN 705.

Typically Offered
Spring

PLAN 899 - Research in Planning

Credits: 0-18

Original research and advanced study in regional and community planning, urban design, and related fields for the master's report/thesis.

Repeat for Credit
Y

Requisites
Prerequisite: PLAN 803 or LAR 725 or ARCH 725 and completion of two semesters of graduate study in planning.

Typically Offered
Fall, Spring, Summer

PLPTH 495 - Undergraduate Research in Plant Pathology

Credits: 0-3

Research experience is offered in classical and molecular plant pathology and biotechnology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

PLPTH 500 - Principles of Plant Pathology

Credits: 3

An introductory class in the nature of plant pathogens and the cause, effect, and control of plant diseases. Diseases of

field and horticultural crops will be addressed.

Note
Two hours lecture, one 2-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PLPTH 575 - Topics in Plant Pathology

Credits: 1-3

Discussions and lectures on important areas and contributions in the field of plant pathology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

PLPTH 576 - Special Topics in Plant Pathology

Credits: 1-3

Discussions and lectures on important areas and contributions in the field of plant pathology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

PLPTH 585 - Crop Diseases

Credits: 2

An overview of plant diseases associated with Kansas crops, with an emphasis on identification and management strategies.

Note
Two hour lecture and four hour lab a week. To meet first half of the semester.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 500.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

PLPTH 587 - Turfgrass Diseases and Their Management

Credits: 1

Biology, diagnosis and integrated management of turfgrass diseases. Emphasis is on diseases of intensively maintained turfgrass.

Note
Two hours lecture and two hours lab a week, for the first five weeks of the semester.

Repeat for Credit
N

Requisites
Corequisite: HORT 582 and HORT 515

Typically Offered
Fall-Even Years

Cross-listed
HORT 587

K-State 8
Natural and Physical Sciences

PLPTH 590 - Landscape Diseases

Credits: 2

An overview of plant diseases associated with Kansas greenhouse and nursery production systems as well as landscape settings, with an emphasis on identification and management strategies.

Note
One hour lecture and one lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 500 or concurrent enrollment.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences

PLPTH 610 - Biotechnology

Credits: 3

The use of biotechnology and molecular genetic approaches in plant and animal sciences. Emphasis is on the use of molecular techniques for plant and animal improvement.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500 or BIOL 398.

Typically Offered
Fall

Cross-listed
AGRON 610

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

PLPTH 676 - Fusarium Laboratory Workshop

Credits: 1

A one-week laboratory/lecture course on the identification, systematics, physiology, mycotoxicology, genetics, and molecular biology of fungi in the genus Fusarium. Students should not be enrolled in any other class while attending this workshop.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255 or BIOL 604; and consent of instructor.

Typically Offered
Summer-Odd Years

PLPTH 730 - Plant Nematology

Credits: 3

An introduction to the morphology, taxonomy, and ecology of phytoparasitic and free-living nematodes found in plants, soil, and fresh water. Emphasis is on the identification and control of plant parasitic nematodes and on lab techniques used in their study.

Note
Two hours lecture, one 2-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 500.

Typically Offered
Spring-Even Years

PLPTH 732 - Introduction to Plant Resistance to Pests

Credits: 2

Basic concepts of the biology, ecology, genetics and breeding for pest resistance in plants.

Note
Four hours lecture and discussion a week. Meets first half of semester.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 300 or PLPTH 500 or ENTOM 312 and ENTOM 313, and one course in plant or animal genetics.

Typically Offered
Fall-Even Years

Cross-listed
ENTOM 732 and AGRON 732

PLPTH 750 - Problems in Plant Pathology

Credits: 1-3

Work is offered in general plant pathology, plant virology, plant nematology, disease physiology, epidemiology, and disease diagnosis.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 755 - Plant Resistance to Diseases

Credits: 2

Survey of recent literature on conventional and novel strategies for obtaining durable resistance to plant diseases. Several well-characterized host/pathogen systems will be selected for in-depth analysis.

Note
Four hours lecture a week. To meet second half of semester for four hours per week.

Repeat for Credit
N

Requisites
Prerequisite: ENTOM 732 or PLPTH 732.

Typically Offered
Fall-Even Years

PLPTH 765 - Integrated Plant Disease Management

Credits: 2

Advanced topics in integrated plant disease management will be examined, including: epidemiological concepts, disease loss assessment, fungicides, resistance traits, on farm research trials and utilization of precision agriculture technologies to measure disease impacts.

Note
The course will meet the second eight weeks of the semester.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 590 or concurrent enrollment with PLPTH 585.

Typically Offered
Fall

PLPTH 812 - Introduction to Integrative Genome Analysis

Credits: 3

An introduction to genomics technologies genomics technologies, methods and approaches and their integration to the study of genome biology.

Note
Three hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 398 or ASI 500. Recommended Foundation Course: 700 level statistics course.

Typically Offered
Fall-Even Years

PLPTH 813 - Bioinformatics Applications

Credits: 3

This course will cover the basic principles of regular bioinformatics applications and emphasize the practice of bioinformatics in biological research. The course will introduce the use of computation skills in data analysis focused on the application of bioinformatics in next-generation sequencing (NGS). The goal of this course is to help students be prepared for the next-generation biological research that often generates large data and requires researchers to have the capability in data management and data mining.

Note
Two hour lecture and two hours lab per week.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: BIOL 398 or ASI 500 and a 700 level statistics course.

Typically Offered
Spring-Odd Years

PLPTH 820 - Population Genetics

Credits: 3

Theoretical basis for and applications of population genetic principles to populations of humans, domesticated plants and animals, and natural ecosystems.

Note
Three hours lecture/discussion per week.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500, BIOCH 521, MATH 220, and STAT 510 or STAT 703.

Typically Offered
Spring-Odd Years

PLPTH 835 - Plant Virology

Credits: 3

A study of the composition, symptomatology, diagnosis, isolation, replications, molecular biology, genetics, and evolution of plant-infecting viruses.

Note
Two hours lecture a week plus one hour of recitation.

Repeat for Credit
N

Requisites
Prerequisite: ASI 500, BIOCH 521, BIOCH 522, and PLPTH 500.

Typically Offered
Fall-Odd Years

PLPTH 840 - Plant Pathogenic Bacteria

Credits: 2

Emphasizes the diversity, mechanisms of pathogenicity, host-parasite relations, control measures, and the principles and methods of identifying plant pathogenic bacteria.

Note
The course will meet for half of the semester. Four hours lec/ week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521, PLPTH 500.

Typically Offered
Spring-Odd Years

PLPTH 845 - Plant Pathogenic Fungi

Credits: 3

The isolation, handling, storage, inoculation, terminology and taxonomy of fungal pathogens of plants. Particular attention will be given to techniques used to study fungi and to the genus and species concepts for important plant pathogenic fungal genera.

Note
Two hr lecture, and one 3-hr lab a week.

Repeat for Credit
N

Requisites

Prerequisite: PLPTH 500 and BIOL 604.

Typically Offered
Fall-Even Years

PLPTH 850 - Introduction to R Programming for Biologists

Credits: 1

An introduction to the R programming environment for biological applications, including an overview of data management, graphics, introductory statistics, phylogenetic analyses, biomathematical modeling, and bioinformatics.

Note
Lec/recitation Four half days.

Repeat for Credit
N

Requisites
Prerequisite: One course in introductory statistics or quantitative biology.

Typically Offered
Summer

PLPTH 870 - Thesis/ Dissertation Proposal Seminar

Credits: 1

Theory and practice of research proposal development.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Spring

PLPTH 871 - Professional Communications in Plant Pathology

Credits: 1

Theory and practice of effective communication of plant pathology research and concepts to scientific and non-scientific audiences.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall

PLPTH 880 - Plant Molecular Biology

Credits: 3

A study of plant genes and genome organization, plant gene expression and regulation, and functional analysis of plant genes.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521, PLPTH 610, or BIOL 541.

Typically Offered
Fall-Even Years

Cross-listed
AGRON 880

PLPTH 885 - Genomic Technologies Workshop

Credits: 2

Lecture and laboratory on the modern techniques to study genes and genomes.

Repeat for Credit
Y

Requisites
Recommended Foundation Course: One of the following courses: PLPTH 610, AGRON 610, BIOCH 521, BIOCH 522, BIOL 675, BIOL 676, PLPTH 680, AGRON 680

Typically Offered
Summer

PLPTH 898 - Master's Report

Credits: 1-2

Master's Report

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 899 - Research in Plant Pathology for the MS Degree

Credits: 1-18

Work is offered in each of the major pathogen groups, genetics of plant-microbe interactions, disease physiology, ecology, and epidemiology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 905 - Ecology and Epidemiology of Plant Pathogens

Credits: 3

Experimental and theoretical approaches to the study of plant disease ecology in agricultural and natural systems.

Note
Three hours lecture a week.

Repeat for Credit
Y

Requisites
Prerequisite: A course in Statistics, a course in Calculus, and one of the following: PLPTH 500, PLPTH 730, PLPTH 835, PLPTH 840, PLPTH 845, or a course in Ecology.

Typically Offered
Spring-Even Years

PLPTH 910 - Molecular Plant-Microbe Interactions

Credits: 3

Discussions of molecular and genetic perspectives of resistant and susceptible interactions between plants and bacterial, viral and fungal pathogens. Evaluation of current hypotheses on the nature of disease resistance.

Repeat for Credit
N

Requisites
Prerequisite: PLPTH 500, BIOCH 521, and BIOL 500; BIOL 450 or ASI 500; PLPTH 835, PLPTH 840, or PLPTH 845.

Typically Offered
Fall-Odd Years

PLPTH 915 - Advanced Plant Genetics

Credits: 3

In-depth treatment of advanced concepts in molecular, quantitative, and cytogenetics of plants.

Note
Three hrs. lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: \AGRON 680.

Typically Offered
Fall-Odd Years

Cross-listed
AGRON 915

PLPTH 916 - Cytogenetics Laboratory

Credits: 1

An advanced laboratory course in classical and molecular cytogenetic techniques, C-banding and flourescence in situ hybridization techniques.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PLPTH 915

Typically Offered
Fall-Odd Years

PLPTH 920 - Topics in Plant Pathology

Credits: 1-18

Discussions and lectures on important areas and contributions in the field of plant pathology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 921 - Special Topics in Plant Pathology

Credits: 1-18

Discussions and lectures on important areas and contributions in the field of plant pathology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 922 - Teaching Practicum in Plant Pathology

Credits: 1-2

Practical training in teaching courses offered in the Department of Plant Pathology. Most students will serve as Teaching Assistants.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PLPTH 927 - Fungal Genetics

Credits: 3

A study of the classical, molecular, and population aspects of fungal genetics in both model and commercially important systems. Topics to be discussed include genetic analysis via mitosis and meiosis, models of recombination, genetic control of fungal development, basic molecular genetics of fungi, and genetic factors affecting fungal population structure and stability.

Note
Three hours lecture discussion a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521, ASI 500; Recommended Foundation Courses: BIOL 604 and a 600-level or higher course in genetics.

Typically Offered
Spring-Even Years

PLPTH 999 - Research in Plant Pathology for the PhD Degree

Credits: 1-18

Work is offered in each of the major pathogen groups, genetics of plant-microbe interactions, disease physiology, ecology, and epidemiology.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 110 - Environmental Education and Leadership

Credits: 1

This course will help students develop and understand the value of outcome based outdoor recreation/environmental education experiences for youth. Students will gain experience in group dynamics and a variety of leadership approaches involving nationally recognized environmental education programs.

Note
Some local field trips are required.

Schedule by appointment.

Repeat for Credit
N

Requisites
Prerequisite: Park Management and Conservation majors only.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.

PMC 115 - Topics in Park Management and Conservation

Credits: 1-3

Discussion of topics and activities of importance in park management and conservation.

Note
Instructor permission required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 120 - Outdoor Recreation Certification

Credits: 0

This course is designed to provide the PMC major ability to obtain outdoor recreation certifications not directly taught by Kansas State University. Examples are numerous, and include Wilderness First Responder, Archery in Schools Instructor, Aquatic Facility Operator, Playground Inspector Certification, Leave No Trace. Certifications being accepted must involve a minimum of 16 hours of contact, exercise and assessment hours; or additional requirements can be added by PMC faculty to meet 16 hours of content.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 210 - Intro to Outdoor Recreation

Credits: 3

Overview of the outdoor recreation industry and profession with emphasis on history of outdoor recreation in the U.S., current trends, public/private delivery systems, and associated individual and societal benefits. Highlights the breadth and diversity of the outdoor recreation industry and emphasizes the contributions and outcomes associated with outdoor recreation participation.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall

PMC 275 - Introduction to Natural Resource Management

Credits: 3

A survey of historic and present-day uses, problems, and basic management approaches associated with our renewable and nonrenewable natural resources. The impact of society, economics, law, politics, and philosophy on the management and use of our natural resources will also be examined.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Natural and Physical Sciences

PMC 350 - Parks and Outdoor Recreation Practicum

Credits: 1-2

Required professional work experience (paid or volunteer), 120 hours minimum for 1 hour of credit; 240 hours minimum for 2 credit hours of credit. Designed to provide the future park and recreation professional an opportunity to apply acquired professional knowledge, skills and abilities in a supervised setting. A special problem allows the student to explore a topic/issue of professional interest.

Repeat for Credit
N

Requisites
Prerequisite: Completion of at least 12 PMC (prefixed) core hours.

Typically Offered
Fall, Spring, Summer

PMC 410 - Natural Resource Based Tourism

Credits: 3

This course will explore the obstacles and opportunities of using ecotourism and agritourism to contribute to rural economic development. Examples of successful ecotourism projects both domestically and internationally will be presented with an emphasis on the role of National Parks as tourism destinations. Agritourism efforts in Kansas will be highlighted and compared to similar efforts in other states and countries. Principles of attracting and managing tourists and park visitors in a sustainable manner also will be covered.

Repeat for Credit
N

Requisites
Prerequisite: PMC 275 Recommended Foundation Courses: PMC 210 and PMC 620.

Typically Offered
Fall

PMC 441 - Topics in Park Management and Conservation

Credits: 0-18

Discussion of topics and activities of importance in park management and conservation.

Note
Instructor permission required.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 475 - Natural History for Park Professionals

Credits: 3

This course will introduce students to the vertebrate fauna of Kansas. Specifically, students will learn to identify the amphibians, reptiles, birds and mammals found regularly in Kansas parks and wildlife areas. The course will prepare students to take the Kansas Conservation Officer wildlife identification test as well as prepare park interpreters and managers to identify species found in their parks and educate the public about them.

Note
One hour lecture and one three-hour lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PMC 275

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

PMC 489 - Outdoor Recreation Program and Event Development

Credits: 3

A focused study of the design, supply, and marketing of specific outdoor recreation programs and events. The

course will focus on tools and techniques of both the direct supply and facilitation of planned outdoor activities and events.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: PMC 275, Recommended Foundation Course: PMC 210

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

PMC 492 - Internship in Parks and Recreation

Credits: 6

An intensive, paid practical experience with an approved agency, extending over a 10-week, 400-hour span.

Note
For seniors only.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 495 - Undergraduate Research in Park Management and Conservation

Credits: 0-3

Undergraduate students work with faculty mentors on projects involving various elements of research in PMC including identifying a problem, designing and conducting experiments, interpreting and communicating the research results. The completed project must be presented at a professional forum, and students are required to write a final project report on completion of their project.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PMC 510 - Forestry for Park Professionals

Credits: 3

Principles and practices of managing forest resources in the park setting. Special emphasis will be given to tree management in high use areas such as parks where human visitors present special problems for tree survival and development.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Recommended Foundation Course: PMC 330.

Typically Offered
Fall

PMC 575 - Water Management for Natural Resource Managers

Credits: 3

A study of the management of water resources for public and commercial uses. The course investigates the use of rivers, lakes, reservoirs, and marine resources. Management considerations, including agency policy formation, legal rights, use conflicts, and use valuation are covered.

Note
Three hours lecture a week.

Repeat for Credit
N

Typically Offered
Fall

PMC 580 - Park Operations and Maintenance Management

Credits: 4

A focus on the principles and practices of operating and maintaining park and recreation areas and facilities. The focus of the course will be on the daily operation and related issues of various public parks (e.g. federal, state, county and municipal) and specific park features, including: campgrounds, trails and OHV areas, marinas, zoos, shooting ranges, aquatic facilities, and multipurpose sports complexes and limited facilities.

Note
Two hours lecture and two hours lab a week, with an extended 8 hour on-site lab experience.

Repeat for Credit
N

Typically Offered
Fall

PMC 620 - Park Planning and Design

Credits: 3

Analyzes park and protected area planning, its importance, the planning process from beginning to implementation, barriers to successful implementation, and problem-based solutions. Understanding the planning process, related planning policy and the importance of public involvement in the process are the main focus of this course.

Repeat for Credit
N

Requisites
Recommended Foundation Courses: PMC 210, PMC 275

Typically Offered
Spring

PMC 635 - Methods of Environmental Interpretation

Credits: 3

This course focuses on principles and techniques necessary to communicate environmental and cultural values to visitors in park areas. The philosophy, theory, design, and application of interpretive media to communicate information about the environment is studied.

Note
Two hours recitation and three hours lab a week. Field trips required.

Repeat for Credit
N

Requisites
Prerequisite: PMC 210 and PMC 275

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

PMC 690 - Parks and Recreation Administration

Credits: 4

This course will introduce students to the use of specific practices to effectively manage a contemporary leisure service enterprise. Special emphasis is placed on financial management, human resource management, policy development, risk management and general administrative operations.

Note
Four hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: PMC 275 and Junior standing or Senior standing

Typically Offered
Spring

PMC 740 - Advanced Environmental Interpretation

Credits: 3

This course builds on the principles and interpretive techniques which are introduced in PMC 635. Specifically, labs emphasize development of personal interpretive skills and students are introduced to interpretive media not covered in PMC 635 (e.g., video equipment, computers, etc.). The lecture and readings focus on the philosophy of interpretation and the theoretical framework for designing and evaluating interpretive strategies.

Note
One hour lecture and four hours lab a week. Field trips required.

Repeat for Credit
N

Requisites
Prerequisite: PMC 635.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

PMC 810 - Quantitative Research Methods in Park Management and Conservation

Credits: 3

An overview of quantitative research design and methods in park management and conservation settings, focusing on survey design, scale development, and associated statistical analyses.

Repeat for Credit
N

Typically Offered
Fall

PMC 820 - Outdoor Recreation Behavior

Credits: 3

The practical and theoretical basis of recreational use of public and private lands is examined in the context of ecosystem management. The statutory and regulatory policies and current issues regarding the management and use of lands in wilderness systems, wild and scenic river corridors, parks, and protected areas are discussed in detail. The impacts of recreational uses on the environment and conflicts with other uses of land and resources are discussed. Land use planning policies and decisions, which respond to recreation, wilderness and protected area issues will be examined.

Repeat for Credit
N

Typically Offered
Fall

PMC 830 - Conservation Attitudes and Behaviors

Credits: 3

Explores the development of the field, psychological constructs that influence behaviors, theories that explain the relationship of these constructs to conservation outcomes, strategies to foster a connection to nature, influencing responses to the natural and built environments, and how to cultivate sustainability through the adoption of conservation behaviors. The main focus is to understand the relationship of humans to nature and how this influences conservation.

Repeat for Credit
N

Typically Offered
Fall

POLSC 101 - Political Science First Year Orientation

Credits: 1

Each meeting of Political Science Freshman Seminar covers a topic related to student success, including student help sources such as tutoring and academic coaching, the Career Center, student involvement opportunities within the Political Science Department (such as research), the university, and community. In addition, students develop a graduation plan after going over degree requirements and gain competency in navigating KSU online resources.

Repeat for Credit
N

Typically Offered
Fall, Spring

POLSC 107 - Political Science Colloquium

Credits: 2

Topics in political science chosen to illustrate current research of political scientists and approaches to the study of politics. Each time the course is offered, a syllabus will outline the topics to be studied and the way the course will

be administered.

Note
Not open to political science majors.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

POLSC 110 - Introduction to Political Science

Credits: 3

Introduction to politics, public policy, and governmental processes from a political science perspective, studying political power, political thought, public opinion, groups, parties, institutions, public law, careers in politics, and related topics.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 111 - Introduction to Political Science, Honors

Credits: 4

Introduction to politics, public policy, and governmental processes. Distribution and use of political power, political thought, public opinion, groups, parties, institutions, public law, careers in politics, and related topics.

Repeat for Credit
N

Requisites
Prerequisite: Membership in arts and sciences honors program.

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 115 - U.S. Politics

Credits: 3

The national government with emphasis on constitutional principles, basic structure, functions, and the political process.

Repeat for Credit

Social Sciences

POLSC 652 - International Politics of South Asia

Credits: 3

Study of regional problems of South Asia and of international roles and foreign policies of South Asian states.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 135 or POLSC 623.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 653 - International Politics of the Middle East

Credits: 3

Consideration of the Arab-Israeli conflict, inter-Arab relations, foreign policies of Middle Eastern states, and the impact of the major foreign powers on the area.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 145, POLSC 135, or three hours of other social sciences.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 654 - International Politics of Africa

Credits: 3

The course analyzes contemporary relations among African countries including economic and political security, border claims, formal and informal economic relations, and regional groupings. The course also examines the relations between African countries, the United States and the former Soviet Union, and between African countries and the former colonial rulers.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 135, or junior standing.

Typically Offered
Other

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 655 - International Politics of Latin America

Credits: 3

Analysis of international relations of Latin America. Examining theoretical approaches to the study of Latin America's relations, United States Latin American relations, and comparative foreign policies of Latin American states. This course also explores special topics such as regional integration and geopolitics.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 145 or POLSC 341.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

POLSC 661 - Ancient and Medieval Political Thought

Credits: 3

Systematic study of ideas about law, politics, and government of great philosophers of Western civilization from Greek antiquity to the sixteenth century.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 110, POLSC 155, or junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

POLSC 663 - Early Modern Political Thought

Credits: 3

Study of the development of Western political thought from the sixteenth century to the twentieth century.

Repeat for Credit
N

Requisites

Prerequisite: POLSC 110, POLSC 155, or POLSC 115 or junior standing.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

POLSC 667 - American Political Thought

Credits: 3

Political ideas underlying the American union, including the doctrine of rights, the nature of union, liberty, property, and democracy.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 110, POLSC 155, POLSC 115 or three hours in other social sciences.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

POLSC 670 - Law, Politics, and Literature

Credits: 3

Classic and contemporary works of literature, including novels, plays, short stories, and poems, are used to explore themes in law and politics.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 155 or junior standing.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Social Sciences

POLSC 671 - Late Modern Political Thought

Credits: 3

Study of contemporary political ideas and social thought.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 110, POLSC 155, POLSC 115, or junior standing.

Typically Offered
Other

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

POLSC 675 - Religion and Politics

Credits: 3

Focuses on religious life in America and its changing relationship to politics and government. Examination of the American founding as it relates to church/ state issues, the controversy over meaning of the First Amendment's establishment and free exercise clauses, and contemporary political agendas of mainline and evangelical churches.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 110, POLSC 115, POLSC 155 or 3 hours in other social sciences.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

POLSC 700 - Research Methods in Political Science

Credits: 3

Principles of research design, of measurement of political phenomena, and of methods for collecting and analyzing political data.

Repeat for Credit
N

Requisites
POLSC 115 or POLSC 400 or graduate standing, or consent of the instructor

Typically Offered
Fall

POLSC 701 - Computer and Quantitative Analysis in Political Science

Credits: 3

Advanced data management, data analysis, and computing skills involved in conducting political science and public policy research.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 400 or POLSC 700.

Typically Offered
Spring

POLSC 702 - Public Administration and Society

Credits: 3

Introduction to the discipline and profession of public administration, which may include the cultural, constitutional, institutional, organizational, and ethical context of public administration. Introduction to central issues facing public administrators, using the related perspectives of management, politics, and law.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 115 or POLSC 307 or graduate standing, or consent of the instructor

Typically Offered
Fall

POLSC 707 - Comparative Administrative Systems

Credits: 3

Comparative analysis of public administration concepts and the morphology of administrative systems. Included are U.S., British,and French models and attempts by Third World countries to adapt these to their local cultures.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 135 or POLSC 307.

Typically Offered
Fall

POLSC 708 - Public Personnel Administration

Credits: 3

Personnel aspects of administration at all levels of government, including recruitment, selection, discrimination law, pay, and motivation. Emphasis on to those features unique to the public sector, e.g. civil service systems, public unions, and public sector ethics law.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 115, or POLSC 307 or graduate standing, or consent of the instructor

Typically Offered
Fall

POLSC 710 - Policy Analysis and Evaluation

Credits: 3

Methods of policy analysis and evaluation. Includes a discussion of the relationship between public policy and the distribution of values in society. Students analyze policies in an area of their choice; e.g., agriculture, business, health, income, trade.

Repeat for Credit
N

Requisites
Prerequisites: POLSC 115 or POLSC 400 or graduate standing, or consent of the instructor

Typically Offered
Spring

POLSC 711 - Administrative Ethics

Credits: 3

Ethical issues, approaches, and strategies in public service.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 115 or POLSC 307 or graduate standing, or consent of the instructor.

Typically Offered
Fall

POLSC 712 - Game Theory for Political Scientists

Credits: 3

Introduction to game theoretic models as applied to problems in American politics, international relations and comparative politics.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 115, POLSC 135, POLSC 155, POLSC 145.

Typically Offered
Fall, Spring, Summer

POLSC 731 - Comparative Civil-Military Relations

Credits: 3

A look at civil-military relations in the United States, Russia, Germany, and Spain. Primary focus will be on understanding the political role of the military in totalitarian, authoritarian, and democratic states.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 110, POLSC 135, or junior standing.

Typically Offered
Fall

POLSC 734 - State and Local Government Management

Credits: 3

Examines the main operations and important issues in administering governments at the state and local levels and the similarities and differences of their environment, institutions, organizations, and processes.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student Standing

Typically Offered
Summer

POLSC 735 - Public Organization Theory

Credits: 3

Theories of the structure and mission of public organizations. Explores the use of analytical questioning of various theories, to solve organizational problems.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 115 or POLSC 307.

Typically Offered
Fall

POLSC 736 - Strategic Management of Public and nonprofit Organizations

Credits: 3

Strategic management in the public sector of democratic societies. Provides a set of tools and research skills to focus thinking, judgment and decision making in order to act strategically.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student Standing

Typically Offered
Spring

POLSC 737 - Public Budgeting

Credits: 3

Budgeting as apart of our political system and as a fiscal process assists in allocating scarce resources. Overview of the budgetary decision-making process and the various budgetary approaches.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 307 or MANGT 220.

Typically Offered
Fall

POLSC 738 - Public Finance

Credits: 3

Economics of the public sector, addressing the fundamental issue of the appropriate role of government activity in a market economy. Behavioral consequences of government policy. Model construction to explain real world government policy making.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 737.

Typically Offered
Fall

POLSC 739 - Intergovernmental Relations

Credits: 3

Evolution of the intergovernmental system in the United States and internationally. Emphasis on federal, state, and local interrelationships.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

POLSC 740 - Nonprofit Financial Management

Credits: 3

Introduction to the major issues in nonprofit management. Highlights the unique nature of the nonprofit sector with government (public) and business (for-profit) sectors. Issues may include governance roles and responsibilities, ethics and risk management, financial management and resource generation, managing staff and volunteers, performance measurements, and the emerging trends that threaten nonprofits' tax-exempt status.

Repeat for Credit
N

Requisites
Prerequisite: Graduate Student standing.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

POLSC 754 - The Professional Diplomat and Foreign Policy Formulation

Credits: 3

Present day foreign policy formulation in the United States government, including the role of professional diplomats and foreign affairs specialists in the State Department and embassies abroad, as well as within other United States government agencies.

Repeat for Credit
N

Requisites
Prerequisite: POLSC 145.

Typically Offered
Fall

POLSC 756 - International Political Economy

Credits: 3

The course introduces students to the political and historical dimensions of the international economy, dimensions that include trade, monetary systems, foreign investment, aid, dependency, and global interdependence. This course also examines various theories and practices of the international system, the state, bureaucracies, interest groups, international organizations, bargaining processes, and distributive norms.

Repeat for Credit
N

Requisites
Prerequisite: ECON 110 and ECON 120, POLSC 145, POLSC 135, and POLSC 341, or junior standing.

Typically Offered
Other

POLSC 775 - Teaching the Bill of Rights

Credits: 1

Examines the rights protected by the United States Constitution and the ways that rights protected by the United States Constitution and the ways that rights empower citizens, limit government, and contribute to constitutional government. Explores how to teach effectively about rights.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 785

POLSC 780 - Engaged Citizens: Public Policy Issues and Processes

Credits: 3

Examines the teaching of the workings of constitutional government through the lens of the public policymaking processes and the roles of individual voters, organized publics, the media, and state and local governments in that process.

Repeat for Credit
N

Typically Offered
Summer

Cross-listed
EDCI 790

POLSC 781 - Teaching the Theoretical Foundations of Constitutional Government

Credits: 1

Examines the theories (e.g., natural rights, classical republicanism, and constitutionalism) and theorists (e.g., Aristotle, Locke, Hobbes, and Montesquieu) that most influenced constitutional thinking in the United States. Explores how to teach effectively about these theories and theorists.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 781

POLSC 782 - Teaching the Historical Origins of Constitutional Government

Credits: 1

Examines seminal ideas, documents, and events in the creation of the United States Constitution such as problems with the Articles of Confederation, the characteristics of good government, the debates at the Philadelphia Convention, the Federalist Papers, and the Antifederalist Papers. Explores how to teach effectively these ideas, document, and events.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 782

POLSC 783 - Teaching the Development of Constitutional Principals

Credits: 1

Examines the development of political ideas and constitutional thinking since the Founding. Focuses on how the Bill of Rights, the amendment process, judicial review, and the Fourteenth Amendment are used to empower and limit government. Explores how to teach effectively about developments in constitutional thought.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 783

POLSC 784 - Teaching the Institutions of Government

Credits: 1

Examines the powers, limits, and development of political institutions such as Congress, the President, the Supreme Court, and political parties. Explores how to teach effectively about these institutions.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 784

POLSC 785 - Readings in Political Science

Credits: 3

Directed reading and discussion of a selected topic in political science.

Repeat for Credit
Y

Typically Offered
Fall, Spring

POLSC 787 - Teaching Citizenship

Credits: 1

Examines development of the rights, responsibilities, and challenges of citizenship in the United States. Explores how to teach effectively about citizenship.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
EDCI 787

POLSC 788 - Teaching the Constitutional Principles of America's Founders

Credits: 3

Develops constitutional principles; explores perspectives of constitutional interpretation, change, and preservation; raises questions about the immediate and enduring significance of America's founding principles and documents; and introduces sound pedagogical practices to teach about them.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
EDCI 788

POLSC 789 - Methods and Materials in Civic Education

Credits: 3

Focuses on the pedagogical aspects of civic education and engagement such as research-based approaches to concept attainment, skill development, discussion, and deliberation as well as analysis of curriculum materials and programs that apply these pedagogies.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
EDCI 789

POLSC 790 - Problems in Political Science

Credits: 3

Students will complete a research project and prepare an original paper under the supervision of a faculty member.

Repeat for Credit
Y

Typically Offered
Fall, Spring

POLSC 791 - Topics in Political Science

Credits: 3

Extensive exploration of a specific problem in political thought. American government, comparative politics, international relations, and public administration.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

POLSC 799 - Pro-Seminar in Political Science

Credits: 3

Study and analysis in various areas of the discipline with emphasis on critical evaluation of political conflicts and issues.

Repeat for Credit
Y

Typically Offered
Fall, Spring

POLSC 800 - Seminar: Scope and Methodology of Political Science

Credits: 3

Exploration of theoretical foundations of political science, and critique of various analytical models in the study of political phenomena; construction and application of research designs and techniques.

Repeat for Credit
Y

Typically Offered
Other

POLSC 805 - Seminar in American Government

Credits: 3

This seminar introduces students to the methods and the theories used to study American politics. Topics to be addressed include the constitution and the American founding, political and electoral processes, institutional structure and function, and public policy. Exams and a seminar paper are required.

Repeat for Credit
Y

Typically Offered
Fall

POLSC 810 - Security Studies Methodology

Credits: 2

An exploration of commonly used research methods in history and political science. Students will investigate quantitative and qualitative humanities and social sciences methodology through selected readings and limited research exercises.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
HIST 810.

POLSC 811 - Seminar in International Politics

Credits: 3

The seminar introduces students to the different school of

thought in international relations as well as the different methods used to study the subject. It also analyzes middle range theories on subjects such as the causes of interstate conflict, the democratic peace, and foreign policy decision-making. Exams and a seminar paper are required.

Repeat for Credit
Y

Typically Offered
Spring

POLSC 812 - Foundations of Security Studies

Credits: 3

An interdisciplinary introduction to the major historical developments and scholarly approaches in the fields of military history, international relations, and security studies.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

POLSC 813 - International Security

Credits: 3

Surveys traditional issues in the study of international security such as the causes of war, the utility of deterrence, coercion, and engagement, international intervention, and the proliferation of weapons of mass destruction. Attention will also be placed on security and conflict in important regional settings, such as East Asia and the Middle East.

Repeat for Credit
Y

Typically Offered
Fall

POLSC 814 - Terrorism and Transnational Security Issues

Credits: 3

Introduction to the general aspects of terrorism and counter-terrorism in order to build transnational security. The course examines these issues in terms of forms, causal factors, goals, and consequences. The main objective is to understand terrorism as part of new international security issues such as failed states, environmental degradation, demographic explosion and poverty, conflict in developing world, post-conflict reconstruction, income distribution, humanitarian emergencies, and globalization.

Repeat for Credit
Y

Typically Offered
Fall

POLSC 815 - Research Design in Security Studies

Credits: 1

An exploration of research methods in history and political science culminating in a piece of original research in Security Studies.

Repeat for Credit
Y

Requisites
Prerequisite: POLSC 810

Typically Offered
Fall, Spring

Cross-listed
HIST 815

POLSC 821 - Seminar: Political Thought

Credits: 3

A study of the history of political philosophy as well as contemporary scholarship. Political philosophy as a subdiscipline of political science and its relevance for other subdisciplines as well as for leadership and administration. Class discussion and research training will focus on textual analysis, or exegesis. Course requirements include a major research paper.

Repeat for Credit
Y

Typically Offered
Spring

POLSC 831 - Public Administration Capstone

Credits: 3

Students integrate previous classroom learning with practical experience. Operation of a government agency on a day-to-day basis. The meaning of public service and communication in the public sector.

Repeat for Credit
N

Requisites
Prerequisite: Graduate student standing.

Typically Offered
Spring

POLSC 841 - Seminar: Comparative Politics

Credits: 3

The seminar introduces students to the methods and theories of comparative politics as well as critical analysis of various topics in political science such as institution and institutional change, social movements and state building, regime and development, political parties and electoral processes, policy making and political performance. Course requirements include two exams, book reviews, research design, and a major research paper.

Repeat for Credit
Y

Typically Offered
Fall

POLSC 842 - Seminar in Comparative Ideologies

Credits: 3

This seminar provides a graduate level exploration of ideologies such as liberalism, conservatism, socialism, communism, and fascism. The tension between ideology and philosophy is also examined.

Repeat for Credit
Y

Typically Offered
Other

POLSC 897 - Internship

Credits: 1-6

Directed off-campus employment experience.

Note
Must be taken for a total of 3 hours.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

POLSC 898 - Master's Report

Credits: 0-18

Master's Report

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

POLSC 899 - Master's Thesis

Credits: 6

Master's Thesis

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

POLSC 900 - Advanced Research Methods I

Credits: 3

The first of a two course methods sequence in security studies. Surveys the role of theory, hypotheses testing, operationalization and measurement, and research design in social science. Case study and historical methods will be given particular attention. Students will also be provided with a brief introduction to quantitative social science analysis.

Repeat for Credit

Y

Typically Offered
Fall

POLSC 901 - Advanced Research Methods II

Credits: 3

The course is the second in the sequence of two method courses in security studies. It emphasized quantitative analysis in political science and covers regression analysis, violation of regression assumptions, and logit models. The course also introduces students to time series, decision theory, and game theory.

Repeat for Credit
Y

Requisites
Prerequisite: POLSC 900.

Typically Offered
Spring

POLSC 985 - Readings in Security Studies

Credits: 1-6

Directed reading and discussion of a selected topic in international security.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

POLSC 991 - Topics in Security Studies

Credits: 3

Exploration of a specific issue in one of the fields or areas of international security.

Note
Specific topics will be listed in the class schedule for the semester in which they are offered.

Repeat for Credit
Y

Requisites
Prerequisite: POLSC 900 and POLSC 901.

Typically Offered
Fall, Spring, Summer

POLSC 999 - PhD Research in Security Studies

Credits: 1-15

PhD research culminating in completed PhD dissertation.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PORT 572 - Special Studies in Portuguese

Credits: 1-3

Special Studies in Portuguese

Repeat for Credit
N

Requisites
Prerequisite: 15 hours of Portuguese and consent of instructor.

Typically Offered
Other

PPIL 101 - FAA Pilot Certificate Validation

Credits: 1-4

Flight and knowledge validation of FAA pilot certifcates.

Repeat for Credit
N

Requisites
Prerequisite: Instructor permission.

Typically Offered
Fall, Spring, Summer

PPIL 108 - Private Pilot Flight Lab Solo

Credits: 0.5

This course provides students with basic flight knowledge and fundamentals for solo flight as outlined by the Federal Aviation Administration (FAA). The successful completion of this course is the solo stage check.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PPIL 111

Typically Offered
Fall, Spring, Summer

PPIL 110 - Private Pilot Flight Lab Certification

Credits: 0.5

A continuation of PPIL 108 after solo flight and stage check. Upon completion of the course, students will meet the requirements for the FAA Private Pilot Certificate.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 108
Corequisite: PPIL 111

Typically Offered
Fall, Spring, Summer

PPIL 111 - Private Pilot

Credits: 4

The subject areas necessary for completion and passing of the FAA Private Pilot Knowledge Test are presented.

Note
Four hours recitation a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PPIL 112 - Professional Instrument Pilot

Credits: 3

A study of the procedures, regulations, and techniques required to safely fly in instrument meteorological conditions within our national airspace system. The course will prepare the student to pass the FAA Instrument Airplane Knowledge Test.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 111
Corequisite: MATH 100.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PPIL 113 - Private Pilot Flight Lab

Credits: 1

An introduction of the fundamentals of flight. Solo flights to include all flight operations and maneuvers necessary for meeting the aeronautical experience for the FAA Private Pilot Certificate.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PPIL 111.

Typically Offered
Fall, Spring, Summer

PPIL 114 - Professional Instrument Pilot Flight Lab

Credits: 1

Instructional flight training necessary to maneuver the aircraft safely in actual or simulated instrument meteorological conditions within the national airspace system.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 111, PPIL 113. Corequisite: PPIL 112.

Typically Offered
Fall, Spring, Summer

PPIL 196 - VFR Pilot Proficiency Lab

Credits: 1

Instruction and flight training necessary to safely operate an aircraft to meet the Federal Aviation Regulations. This course provides the student the opportunity to review and demonstrate proficiency to satisfactorily meet the FAA regulations for the current ratings held.

Note: Successful completion will result in a flight review required by FAR 61.56.

Note
Please add to description: Successful completion will result in a flight review required by FAR 61.56.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PPIL 197 - IFR Pilot Proficiency Lab

Credits: 1

Instruction, simulator, and flight training necessary to safely operate an aircraft, to meet and maintain the Federal Aviation Regulations currency requirement of Instrument Competency, and maintain instrument currency and proficiency.

Note: Successful completion will result in an Instrument Proficiency Check (IPC) required by FAR 61.57d.

Note
Catalog change only

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

PPIL 210 - Aviation Safety

Credits: 3

This course provides an introduction to the field of aviation safety with an emphasis on promoting a safety culture. Various safety programs and their relevance in the field of aviation are discussed. Students will examine numerous accident reports and discuss safety issues facing the aviation industry today.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PPIL 211 - Professional Commercial Pilot

Credits: 3

The subject areas necessary for passing the FAA Commercial Pilot Knowledge Test.

Note
Three hours recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 112, PPIL 114.

Typically Offered
Fall, Spring

K-State 8

Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PPIL 212 - Professional Commercial Pilot Flight Lab I

Credits: 2

Instructional cross country flight training necessary to maneuver the aircraft safely in actual or simulated instrument meteorological conditions within the national airspace system.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 112, PPIL 114. Corequisite: PPIL 211.

Typically Offered
Fall, Spring, Summer

PPIL 213 - Professional Commercial Pilot Flight Lab II

Credits: 2

An introduction to complex airplane operations and a review of those operations required of a commercial pilot. The completion of this course readies the student to take the commercial FAA Practical test.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 212.

Typically Offered
Fall, Spring, Summer

PPIL 214 - Extended Cross Country

Credits: 1

A characteristic of aviation is that aircraft can cover a large geographic area. Aircraft operations in other geographic areas may differ greatly from a student's training base. The experience of long-range navigation can be a great learning experience as well as a confidence booster. Selection of a destination that allows the student to increase their knowledge of aviation also aids in producing a more well-rounded, responsible professional.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 113.

Typically Offered
Other

PPIL 215 - Mountain Flying

Credits: 1

A characteristic of aviation is that aircraft can cover a large geographic area. Aircraft operations in mountainous areas may differ greatly from a student's training. The experience of reduced aircraft performance caused by high-density altitudes can be a great training into operations with aircraft exhibiting marginal performance. Learning of weather patterns, hypoxia, and survival allows the student to increase their knowledge of aviation and also aids in producing a more well-rounded, responsible professional.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 114 and instructor consent.

Typically Offered
On sufficient demand

PPIL 216 - Altitude Chamber

Credits: 1

This course offers a 1-day aviation physiology course for civil aviation pilots through the CAMI's Aeromedical Education Division in Oklahoma City, OK. In addition to the basic academic contents, this course offers practical demonstrations of rapid decompression and hypoxia in a hypobaric chamber, as well as a practical demonstration of spatial disorientation. Upon completion of the course students will receive a certificate noting that they have completed the FAA's Physiological Training course. The

FFA requires a current Aviation Medical Certificate.

Repeat for Credit
N

Typically Offered
Fall, Spring

PPIL 217 - Glider Towing

Credits: 1

Instruction and flight training necessary to obtain a logbook endorsement in the techniques and procedures for the safe towing of gliders.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 113.

Typically Offered
Fall

PPIL 219 - Single Engine Seaplane Transition

Credits: 1

Instruction and flight training necessary to add the seaplane rating to the commercial pilot certificate. Course requires a one-week trip to a specified contract training location.

Note
One hour lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 213.

Typically Offered
Spring

PPIL 221 - Preventive Maintenance

Credits: 2

This course will give the student hands-on experience with the maintenance tasks allowed under FAR 43 entitled preventive maintenance.

Note
One hour lecture and two hours lab a week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PPIL 230 - Private Pilot Glider Transition

Credits: 1

Instruction and flight training in the design, performance, operating characteristics, and flight proficiency for the safe operation of glider aircraft that will lead to an Private Pilot Glider certificate. This course provides students the opportunity to enhance and develop their skills in this segment of aviation.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 113.

Typically Offered
Other

K-State 8
Natural and Physical Sciences

PPIL 231 - Commercial Pilot Glider Transition

Credits: 1

Instruction and flight training in the design, performance, operating characteristics, and flight proficiency for the safe operation of glider aircraft that will lead to a commercial pilot glider certificate. This course provides students the opportunity to enhance and develop their skills in this segment of aviation.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 213 and PPIL 230.

Typically Offered

Other

K-State 8
Natural and Physical Sciences

PPIL 262 - Multi-Engine Ground School

Credits: 1

Ground instruction covering multi-engine aircraft to develop the aeronautical knowledge to meet the ground school requirements for a multi-engine land class rating.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 211.

Typically Offered
Fall, Spring, Summer

PPIL 263 - Multi-Engine Flight Lab

Credits: 1

Flight instruction and experience in a multi-engine aircraft to develop the aeronautical skills to meet the requirements to add a multi-engine land class rating to the student's existing pilot certificate.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Corequisite: PPIL 262.

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences

PPIL 290 - Multi-Engine Crew Coordination

Credits: 1

Instruction, simulator and flight training necessary to operate a multi-engine aircraft as a member of a crew. Enhances multi-engine, instrument and cross country skills.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 211, PPIL 263.

Typically Offered
Other

PPIL 295 - Tailwheel Transition

Credits: 1

Instruction and flight training in the design, performance, operating characteristics, and flight proficiency for the safe operation of conventional-geared (tailwheel) aircraft that will lead to an endorsement allowing the student to act as pilot-in-command. This course provides students the opportunity to enhance and develop their skills in this segment of aviation.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 113.

Typically Offered
Other

K-State 8
Natural and Physical Sciences

PPIL 296 - Complex/High Performance Transition

Credits: 1

Instruction and flight training in the design, performance, operating characteristics, and flight proficiency for the safe operation of complex/high performance aircraft that will lead to endorsements allowing the student to act as pilot-in-command. This course provides students the opportunity to enhance and develop their skills.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 211

Typically Offered
Fall, Spring, Summer

PPIL 310 - Fundamentals of Instruction/Advanced Ground Instructor Ground School

Credits: 3

This course will prepare the student for the Federal Aviation Administration (FAA) Fundamentals of Instruction (FOI) and Advanced Ground Instructor (AGI) Knowledge Tests.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 211

Typically Offered
Fall, Spring

PPIL 311 - Certificated Flight Instructor-Airplane Ground School

Credits: 3

Instruction techniques, practices, and procedures necessary to provide skill in organizing and presenting lessons. This course will prepare the student for the FAA Certificated Flight Instructor-Airplane practical test and the Flight Instructor Airplane (FIA) Knowledge Test.

Repeat for Credit
N

Requisites
Co-requisite: PPIL 213 and PPIL 310

Typically Offered
Fall, Spring

PPIL 312 - Certified Flight Instructor Ground School

Credits: 6

Instruction techniques, practices, and procedures necessary to provide skill in organizing and presenting lessons. This course will prepare the student for the FAA Certified Instructor Knowledge Test.

Note
Six hours recitation a week.

Repeat for Credit
N

Requisites
Co-requisite: PPIL 213.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PPIL 314 - Certified Flight Instructor Flight Lab

Credits: 2

The needed flight skills and proper display of teaching ability will be emphasized. The demonstration of flight maneuvers with recognition of common errors in students performing the demonstrated maneuvers is stressed.

Note
Six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 213. Concurrent enrollment: PPIL 311 or PPIL 312.

Typically Offered
Fall, Spring, Summer

PPIL 325 - Advanced Aircraft Systems

Credits: 3

Electrical, environmental, hydraulic, fuel, ignition, and lubrication systems, including theory of operation and calculations. Principles, systems, analysis, operation, and limitations of advanced electronic navigation, flight director, and automatic flight control systems, including Inertial Navigation Systems and GPS.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 211.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PPIL 379 - Turbine Transition

Credits: 3

To provide required knowledge to meet FAA requirements to operate as second-in-command in KSU transportation aircraft. Covers systems performance and emergency procedures for turbine aircraft. In conjunction with simulator training, students will be qualified to operate as co-pilots on university transportation trips.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 213.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PPIL 385 - Airline Transport Pilot Rating

Credits: 2

Provides the student with the aeronautical knowledge necessary to prepare for the FAA Airline Transport Pilot Knowledge Test. The demonstration of flight maneuvers, with recognition of proper control of emergencies in compliance of the Airline Transport Pilot Practical Test Standards will be stressed.

Note
One hour lecture and three hours lab a week.

Repeat for Credit
N

Typically Offered
Other

PPIL 387 - Crew Resource Management I

Credits: 3

This course involves using all available resources for a safe and efficient flight. Aircraft crew performance is reviewed to include the background and philosophy of Crew Resource Management (CRM) communication, decision behavior, team building, workload management, and situational awareness. Students accomplish two flight scenarios using modern advanced jet aircraft training device.

Note
Two hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 262, PPIL 325.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PPIL 389 - Problems in Aviation

Credits: 1-18

To provide the student an opportunity to apply aviation education to the improvement of skills previously learned as designated by the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PPIL 396 - Introduction to Upset Training and Recovery

Credits: 1

Instruction and flight training necessary to develop an understanding and flight proficiency in basic upset flight

attitudes. This course provides the student the opportunity to develop a better understanding of aircraft and safety of flight in other than normal flight attitudes.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 114.

Typically Offered
Other

K-State 8
Natural and Physical Sciences

PPIL 416 - Crew Resource Management II

Credits: 3

Utilizing a modern advanced jet aircraft training device, special emphasis is placed on systems knowledge, Flight Management Systems (FMS) programming, flight profiles and cockpit flows. Students fly Line Orientated Flight Training (LOFT) missions and self-critique their performance.

Note
One hour lecture and five hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 387 and AVT 340.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

PPIL 482 - Certified Instrument Flight Instructor Ground School

Credits: 1

Instrument instruction techniques, practices, and procedures necessary to provide skills in organizing and presenting lessons in instrument flying procedures. This course will prepare the student for the FAA Certified Instrument Flight Instructor knowledge test.

Note
One hour recitation per week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 311 or PPIL 312.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

PPIL 483 - Certified Instrument Flight Instructor Lab

Credits: 1

Instrument instruction techniques, practices, and procedures necessary to provide skills in organizing and presenting lessons in instrument flying procedures. This course will prepare the student for the FAA Certified Instrument Flight Instructor practical test.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 314. Prerequisite or corequisite: PPIL 482.

Typically Offered
Fall, Spring, Summer

PPIL 492 - Certified Multi-Engine Flight Instructor Ground School

Credits: 1

Provides the student with the aeronautical knowledge necessary to meet the requirements for the addition of an airplane, multi-engine rating to the flight instructor certificate.

Note
One hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 311 or PPIL 312, PPIL 314.

Typically Offered
Fall, Spring

PPIL 493 - Certified Multi-Engine Flight Instructor Lab

Credits: 1

Provides the student with the aeronautical skills and experience necessary to meet the requirements for the addition of an airplane, multi-engine rating to the flight instructor certificate.

Note
Three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: PPIL 314. Prerequisite or corequisite: PPIL 492.

Typically Offered
Fall, Spring, Summer

PSYCH 110 - General Psychology

Credits: 3

An introductory survey of the general content areas of psychology, including methods, data and principles.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 115 - General Psychology (Honors)

Credits: 4

An introductory survey of the general content areas of psychology, including methods, data and principles.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 120 - Psychology of College Success

Credits: 3

Apply psychological techniques to succeed in college. Psychological theories and techniques related to cognition, social behavior and emotional well-being are covered. Students will discuss the science behind topics that are relevant to academic performance, belonging, and well-being, such as learning, motivation, self-control, culture, relationships, health, and happiness.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State 8
Social Sciences

PSYCH 202 - Drugs and Behavior

Credits: 3

Effects of drugs on human performance, cognition, and physiological processes will be discussed and the empirical evidence surveyed and critically evaluated in relation to both use and abuse of drugs in society.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Natural and Physical Sciences
Social Sciences

PSYCH 270 - Brain Myths: Fact or Fiction?

Credits: 3

Introduction to the basic principles of brain function and neuroscience methodology. Popular press and peer reviewed scientific literature will be critically evaluated to develop scientific literacy skills.

Repeat for Credit
N

Requisites
PSYCH 110 or instructor permission

Typically Offered
Fall, Spring

PSYCH 280 - Psychology of Childhood and Adolescence

Credits: 3

Survey of behavioral development from birth through adolescence.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 290 - Innovative Studies in Psychology

Credits: 1-6

Topics selected in consultation with the instructor. To be used for interdisciplinary and innovative approaches to psychological topics.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Social Sciences

PSYCH 310 - Controversial Issues in Psychology Research

Credits: 3

Covers selected topics across areas of physiological psychology, human development, cognitive and social psychology, and mental health disorders and their treatment. Students will explore in greater depth several controversial ideas and concepts in contemporary psychology.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

PSYCH 350 - Experimental Methods in Psychology

Credits: 3

Introduction to basic principles of research design and scientific methodology as applied to psychological sciences.

Repeat for Credit
N

Requisites
Prerequisite: Psych 110, Psych Major or Minor, Sophomore standing

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PSYCH 351 - Experimental Methods Laboratory

Credits: 2

Application of experimental design and data analysis emphasized in the psychological literature, procedures, and reporting of research findings.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility

PSYCH 370 - Introduction to Behavioral Neuroscience

Credits: 3

A general overview of human brain function using case studies as a primary means for understanding the relationship between behavior and brain mechanisms.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences
Social Sciences

PSYCH 399 - Honors Seminar in Psychology

Credits: 3

Selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State 8
Social Sciences

PSYCH 400 - Practicum in Teaching Psychology

Credits: 1-4

Supervised experience in presentation of psychological concepts in various classes. May be taken only with approval of the instructor of a psychology class under whose supervision the student will obtain this experience.

Repeat for Credit
Y

Requisites
Prerequisite: Consent of instructor; nine hours of psychology including PSYCH 110; junior standing.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

PSYCH 425 - Judgment and Decision Making

Credits: 3

Covers the academic field of judgment and decision making, its major methods, results, and controversies. Examines the generality of experimental results across various domains including gambling, clinical prediction, perception of randomness, and legal and medical decision making. Focus on practical analytical skills for decision making that are useful in everyday life and work.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 430 - Forensic Psychology

Credits: 3

Survey of psychological principles and facts in areas such as perception, cognition, neuropsychology, social psychology, personality, and decision making, as they apply to forensic psychology. Topics include: polygraph (lie detection), eyewitness testimony, jury decision making, and profiling.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 450 - Applications of Memory

Credits: 3

Examination of the applications of memory in such diverse areas as courtroom testimony, expert performance, mnemonic procedures, and advertising. Relevant theories and research in each area are examined.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Social Sciences

PSYCH 460 - Cognitive Psychology

Credits: 3

A survey of the manner in which people extract and use relevant information from their environment as a basis for behavior. Topics may include memory storage and retrieval, attention, imagery, mnemonic devices, decision making, and other cognitive processes.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 (Psychology majors only).

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 465 - Cognitive Neuroscience

Credits: 3

The foundations of the neural bases of cognition and human behavior. A focus on neuroanatomy, hemispheric specialization, brain development, and higher-order cognitive functions, such as language, executive functions, attention, learning, and memory. Additional topics include cutting-edge brain imaging techniques (e.g., electroencephalography, functional MRI, and brain stimulation), lesion studies and examinations of brain injuries and other neurological disorders.

Repeat for Credit

N

Requisites
PSYCH 110 or instructor permission

Typically Offered
Fall, Spring, Summer

PSYCH 470 - Principles of Neuroscience

Credits: 3

A more in-depth course on brain-behavior interactions. Topics include: neuroanatomy, neuron transmission, sensory systems, emotions and stress, learning and memory, sleep, language and neural disorders.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 101 or BIOL 198, PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Natural and Physical Sciences
Social Sciences

PSYCH 475 - Principles of Learning

Credits: 3

Introduction to the principles of learning and their relevance to the understanding of the behavior of animals and humans.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 (Psychology majors only).

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PSYCH 480 - Fundamentals of Perception and Sensation

Credits: 3

Empirical and theoretical approaches to phenomena of sensation and perception.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 (Psychology majors only).

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PSYCH 490 - Honors Tutorial in Psychology

Credits: 1-3

Individual directed research and study of a topic in psychology, normally as a preliminary to writing a senior honors thesis.

Repeat for Credit
Y

Requisites
Prerequisite: Sophomore standing, membership in the honors program of the College of Arts and Sciences, and permission of instructor.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

PSYCH 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

PSYCH 500 - Junior Seminar in Psychology

Credits: 1

Discussion of professional, research, and educational methods and objectives in psychology. Acquaints psychology majors with psychology as a profession, and with the various options available to them at various levels of training.

Note
Should be taken during first semester of junior year.

Repeat for Credit
N

Requisites
Prerequisite: Psych/Pre-Psych Major; Junior standing.

Typically Offered
Fall

PSYCH 505 - Introduction to Psychopathology

Credits: 3

An introductory study of behavior pathologies, with emphasis on their etiology and treatment.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing; PSYCH 110.

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 510 - Introduction to Behavior Modification

Credits: 3

Study of the principles of behavior modification and applications to human behavior. Emphasis on the learning principles and research in behavior modification.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 505.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PSYCH 515 - Introduction to Psychology Applied to Work

Credits: 3

Introduction to the basic theories and practices used by industrial and organizational psychologists to enhance individual and organizational effectiveness and well-being. Topics include personnel selection, training, performance management, job attitudes, work motivation, leadership, occupational health, and group processes at work.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 518 - Introduction to Health Psychology

Credits: 3

Psychosocial factors relevant to general health maintenance, recovery from disease or injury, and the achievement of health. Topics include stress-management techniques, personality characteristics associated with disease, cognitive-emotional effects of diet and exercise, and theories of pain and pain management. Concepts of prevention and behavioral medicine are also included.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 520 - Life Span Personality Development

Credits: 3

Theories and research in the development of personality from infancy through old age. Origins of personality in heredity and early experience, socialization practices, life crises and choices at various stages throughout life, and problems of aging.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110; sophomore standing.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

PSYCH 530 - Psychology of Mass Communications

Credits: 3

The psychological effects of mass communication on behavior and thought, including advertising, stereotyping of women and minorities, effects on children, violence and sex in the media, effects of news on behavior, and the promotion of prosocial behavior through the media.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 535 - Social Psychology

Credits: 3

Psychology of the individual in society. Survey of empirical studies and theoretical models of social perception, attitudes, and social behavior (e.g., attribution, ethnic and gender prejudice, conformity). Relationship of these topics to personal and media influence, social mores, and social systems is also included.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State 8

Empirical and Quantitative Reasoning
Social Sciences

PSYCH 538 - Cross-Cultural Psychology

Credits: 3

Introduction to general theories and methods related to understanding the role of culture in human psychology. Focus is on how human psychology and behaviors both differ and are consistent across cultures, and sometimes within subcultures. Topics may include perception, cognitive processes, development, emotions and nonverbal behavior, personality and gender, social relationships, judgments of morality, and mental illness.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

PSYCH 540 - Psychology of Gender

Credits: 3

Investigation of psychological processes involved in gender with emphasis on development and major life events. Topics include physiology, early socialization into sex/gender roles, friendship, achievement, motivation, sexuality, romantic relationships, family development, work, and mental health.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 545 - Consumer Psychology

Credits: 3

Survey of psychological principles and facts in perception, learning, attitude formation, personality, etc., as they apply to behavior of consumers.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 550 - Advanced Psychological Research Methods

Credits: 4

Students will read primary literature, design research studies, employ the instruments and technology currently used in psychological research.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350, STAT 225 or equivalent.
Corequisite: Majors only, Grade of B or better in PSYCH 350.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Ethical Reasoning and Responsibility

PSYCH 556 - Multicultural Psychology

Credits: 3

Introduce and familiarize students with the concept of multicultural psychology.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PSYCH 557 - The Psychology of Ethnic Humor

Credits: 3

Reviews the structure, dynamics, and social functions of ethnic humor.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 or SOCIO 211.

Typically Offered
Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 559 - Psychological Testing

Credits: 3

Principles of psychological testing in industrial, clinical/counseling, and research environments. Topics include technical issues such as reliability, validity, norming, selection, placement, discrimination, etc. Also covers procedures for selecting, administering, and interpreting psychological tests.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Human Diversity within the U.S.

PSYCH 560 - Personnel Psychology

Credits: 3

An exploration of the industrial aspect of the industrial/organizational psychology discipline and provides an overview of human behaviors and psychological principles in personnel and selection contexts. Topics include recruiting, selecting, assessing, and training personnel; evaluating job performance; conducting job analyses; and implementing human capital strategies.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Summer

K-State 8
Social Sciences
Empirical and Quantitative Reasoning

PSYCH 563 - Gender Issues in the Workplace

Credits: 3

Psychological experiences of women and men in the world of work, with emphasis on traditional and nontraditional sex-role behavior, sexual discrimination and harassment,

and relevant socialization experiences.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 564 - Psychology of the Workplace

Credits: 3

An exploration of organizational aspect of the industrial/organizational psychology discipline and provides coverage of relationships between individuals, groups, and organizations; how organizational factors contribute to individual behavior; and how individuals affect groups and organizational functioning. Emphasis on traditional topics such as work motivation, job satisfaction and other attitudes, leadership, communication, socialization, and organization and job design.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Spring

K-State 8
Social Sciences
Empirical and Quantitative Reasoning

PSYCH 565 - Occupational Health Psychology

Credits: 3

Survey of occupational health issues for juniors and seniors. Provides students with a background in psychologically related health issues occurring at work. The basic processes for identification, prevention, treatment, and well being of workers will be identified and explored.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 570 - Psychopharmacology

Credits: 3

Survey of basic principles of neural communication and pharmacology, the etiology and bio-behavioral bases of substance abuse, and chemical treatments of psychiatric disorders.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 202, PSYCH 470.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

PSYCH 575 - History of Psychology

Credits: 3

A survey of the people and intellectual movements that

shaped the emergence and growth of modern psychology. Topics covered include early philosophy and founders of psychology, Gestalt movement, Behaviorism, applied psychology, and clinical/counseling psychology.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 or permission of instructor

Typically Offered
Spring

K-State 8
Historical Perspectives
Social Sciences

PSYCH 580 - Psychology of Sexual Behavior

Credits: 3

Study of psychological determinants and consequences of human sexual behavior; roles of personality, attitudinal and emotional factors will be emphasized.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110, sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

PSYCH 584 - Group Psychotherapy

Credits: 3

Principles of psychoeducational training, strategies, and group norms. The group experience is practiced within the classroom, offering experience as both a group member and a group leader through role-playing and experiential exercises. Research and program planning are conducted to create and guide a psychoeducational group.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110

Typically Offered
Fall, Spring

PSYCH 585 - Basic Concepts in Clinical Psychology

Credits: 3

Critical analysis of the profession. Review of theoretical and empirical bases of such areas as intelligence and its measurement, personality and diagnosis, psychotherapy, and other modes of behavioral change.

Note
500-level psychology courses cannot be taken for graduate credit by students in psychology graduate programs.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110, PSYCH 505, and 3 additional hours of psychology.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Human Diversity within the U.S.

PSYCH 586 - Psychology Internship Readiness

Credits: 1

Exploration of the efficacy of decisions and actions within a professional internship. The topics of professional communication, dress, engagement, timeliness, and conflict resolution will prepare the student for an internship. Additionally, ethics, confidentiality, the duty to warn and self-care impacting the delivery of human services will be explained.

Note
This course must be taken in preparation for PSYCH 587.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110

Typically Offered
Fall, Spring, Summer

PSYCH 587 - Psychology Internship in Mental Health

Credits: 1-6

Supervised internship in an agency or institutional setting in the application of psychological techniques to individuals, groups, or organizations. Regular supervision emphasizes relationship between theory and application and the evaluation of outcomes.

Repeat for Credit
Y

Requisites
Prerequisite: PSYCH 585 and PSYCH 586 and consent of PSYCH 586 instructor

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility

PSYCH 590 - Interdisciplinary Topics in Psychology

Credits: 1-3

Topics selected in consultation with the instructor, covering interdisciplinary and innovative approaches to psychological topics.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PSYCH 595 - Behavioral Neuroscience Lab Skills

Credits: 3

Provides practical training in the foundations of Behavioral Neuroscience, which is the study of the biological basis of behavior in animals. Students will engage in theoretical work and practical experiments addressing behavioral and physiological processes as well as relationships between different biological and behavioral processes in various species.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110; PSYCH 370 or PSYCH 470

Typically Offered
Fall, Spring, Summer

PSYCH 596 - Cognitive Neuroscience Lab Skills

Credits: 3

Provides practical training in the foundations of Cognitive Neuroscience, which is the science of the human brain and behavior. Students will engage in theoretical work and practical experiments addressing behavioral, cognitive, and physiological processes as well as relationships between different biological and behavioral processes.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110; PSYCH 465

Typically Offered
Fall, Spring, Summer

PSYCH 598 - Research in Neuroscience

Credits: 0-18

Investigation of selected problems within the area of neuroscience.

Note
May be repeated. Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PSYCH 599 - Research in Psychology

Credits: 0-18

Investigation of selected problems.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

PSYCH 605 - Advanced Social Psychology

Credits: 3

An advanced look at some of the core topics in social psychology (e.g. the self, social influence, personal relationships, prejudice and discrimination, group processes) with a strong emphasis on applying the theory in these areas to current social problems and students' daily lives.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 (Psychology majors only).

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.

PSYCH 620 - Psychology of Personality

Credits: 3

Discussion of different approaches to the study of personality.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350.

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 625 - Human Factors Psychology

Credits: 3

The application of psychological principles to the design and operation of machines, products, and systems, including human-computer interactions, automation, and training.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110; STAT 225-799

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

PSYCH 630 - Human Neuropsychology

Credits: 3

Study of brain-behavior relationships in humans. Brief review of human neuroanatomy followed by a major emphasis on brain function in learning, memory, language, and other cognitive behaviors. Also includes an examination of behavioral alterations following brain damage.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and PSYCH 110, or BIOL 101 and PSYCH 110.

Typically Offered
Spring

K-State 8
Natural and Physical Sciences
Social Sciences

PSYCH 650 - Psychology of Language

Credits: 3

Experimental study of language, including sentence comprehension and memory, language acquisition and development, speech perception, and effects of context, perception, reasoning, and linguistic structure on processing of language.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 and junior standing.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Social Sciences

PSYCH 670 - Neural Mechanisms of Learning and Memory

Credits: 3

Survey of topics on the neurobiology of learning and memory including memory formation and maintenence, long term potentiation, and the role of various brain areas involved in memory such as the hippocampus and corticostriatal circuits. Discussions of relevant research articles and current topics in the neuroscience of learning and memory.

Repeat for Credit
N

Requisites
Prerequisites: PSYCH 110, BIOL 101 or BIOL 198

Typically Offered
Fall, Spring, Summer

PSYCH 715 - Psychology of Aging

Credits: 3

The psychological aspects of human aging. An analysis of the contributions of experimental, developmental, and personality-social psychology to the study of aging. The psychopathology of aging and psychological intervention strategies are also covered.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 and junior standing.

Typically Offered
Spring

PSYCH 790 - Topics in Psychology

Credits: 1-18

Topics in Psychology

Repeat for Credit
Y

Requisites
Prerequisite: PSYCH 110 and consent of instructor.

Typically Offered
Fall, Spring, Summer

PSYCH 799 - Problems in Psychology

Credits: 1-18

Problems in Psychology

Repeat for Credit
Y

Requisites
Prerequisite: PSYCH 110 and consent of instructor.

Typically Offered
Fall, Spring, Summer

PSYCH 802 - Psychological Research Design and Analysis I

Credits: 3

Introduction to techniques of research planning and design, including critical evaluation of psychological research practices and selected research studies.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 or equivalent, and Psychology major or consent of instructor.

Typically Offered
Fall

PSYCH 803 - Physiological Psychology

Credits: 3

An advanced survey of basic technique, theory, and research in the field of behavioral neuroscience, including memory and learning, sensory and motor processes, motivation, and sexual behavior.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198 and PSYCH 110.

Typically Offered
Fall

PSYCH 804 - Industrial/Organizational Psychology

Credits: 3

Advanced survey of theory and research pertaining to human behavior in work organizations. Topics include selection, training, and evaluation of employees, job analysis and evaluation, work motivation and satisfaction, organizational structure and development, and working conditions.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 560 or PSYCH 564.

Typically Offered
Fall

PSYCH 805 - Psychological Research Design and Analysis II

Credits: 3

Extensive coverage of repeated measures designs, advanced experimental design, and the treatment of common psychological measures.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 802 with a grade of B or better.

Typically Offered
Spring

PSYCH 806 - Psychological Measurement

Credits: 3

The logic and methodology underlying the construction of psychological measuring instruments from the psychophysical estimate of threshold to the scaling of complex psychological variables.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 110 and STAT 225.

Typically Offered
Fall

PSYCH 807 - Research Methods in Occupational Health Psychology

Credits: 3

Reviews research methods used in social science with emphasis on occupational health psychology issues.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225.

Typically Offered
Fall

PSYCH 808 - Applied Research Methods

Credits: 3

Examines research methods and analyses that are used in the applied psychology literature. Focuses on planning and conducting program evaluation.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225.

Typically Offered
Spring-Even Years

PSYCH 809 - Applied Research Methods II

Credits: 3

Provides students with a detailed knowledge of human resource management research methods and analyses. Focuses on how to plan and conduct research in industrial/organizational psychology. Preparation for the M.S. practicum.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 808.

Typically Offered
Summer

PSYCH 810 - Learning

Credits: 3

In-depth study of empirical and theoretical research on basic learning principles and their effects on behavior.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 or equivalent.

Typically Offered
Spring

PSYCH 812 - Perception

Credits: 3

Various systematic approaches to perception, with emphasis on experimental and quantitative data. The role of perception in affectivity, motivation, and personality theory is stressed.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 or equivalent.

Typically Offered
Spring

PSYCH 814 - Advanced Cognitive Psychology

Credits: 3

Study of contemporary trends and research in cognition, including memory, language, problem solving, decision making, and human learning.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 or equivalent.

Typically Offered
Fall

PSYCH 816 - Psychology of Health

Credits: 3

Presents psychological research investigating illness and related dysfunction, as well as the promotion and maintenance of health. Provides students with the theoretical, empirical and clinical aspects of health psychology from a number of perspectives, discusses leading research and explores personal and practical implications of this information.

Repeat for Credit
N

Typically Offered
Fall

PSYCH 820 - Personality Theory and Research

Credits: 3

A comparative examination of contemporary theories of personality as well as research findings relevant to such theories.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 620 or equivalent.

Typically Offered
Spring

PSYCH 822 - Developmental Psychology

Credits: 3

Human psychological development throughout the lifespan. Examination of major theoretical systems relevant to Developmental Psychology.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring

PSYCH 825 - Judgmental Processes

Credits: 3

Examination of empirical findings and theoretical approaches to decision making and judgment with emphasis on higher cognitive processes.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 and PSYCH 802.

Typically Offered
Fall

PSYCH 830 - Pro-Seminar in Social Psychology

Credits: 3

Discussion of empirical findings and theoretical approaches to selected problem areas, such as attitude change, personality and social structure, person perception, small group processes.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 535.

Typically Offered
Fall

PSYCH 840 - Proseminar in Occupational Health Psychology

Credits: 3

Survey of occupational health issues for first or second year graduate students in health and related fields.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225.

Typically Offered
Fall-Odd Years

PSYCH 841 - Seminar in Occupational Health Behaviors

Credits: 3

Focuses on organizational and individual prevention and coping behaviors relevant to work-related health problems.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 840.

Typically Offered
Fall-Even Years

PSYCH 842 - Practicum in Occupational Health Psychology

Credits: 3

Provides supervised practical experience with occupational health problems in various business, manufacturing and government settings. Students will prepare evaluative analyses of their assigned sites.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 840 and PSYCH 841.

Typically Offered
Spring-Odd Years

PSYCH 850 - Current Issues in Health Psychology

Credits: 1

Introduction to current issues in health psychology research.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring

PSYCH 851 - Practicum in Health Psych

Credits: 3

Independent health research designed in conjunction with major faculty advisor plus another faculty member to produce a journal submission and departmental presentation.

Note
Consent of instructor.

Repeat for Credit
N

Typically Offered
Fall, Spring

PSYCH 853 - Seminar in Psychopharmacology

Credits: 3

Surveys basic principles of neural communication and pharmacology, the etiology and bio-behavioral bases of substance abuse, and chemical treatment of psychiatric disorders.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

PSYCH 860 - Practicum in Psychology

Credits: 1-18

Supervised practical experience in applied psychology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PSYCH 870 - Practicum in Teaching Psychology

Credits: 1-4

Supervised experience regularly teaching a college psychology course.

Repeat for Credit
Y

Requisites

Prerequisite: Graduate standing in Department of Psychology.

Typically Offered
Fall, Spring

PSYCH 875 - Industrial Psychology: Personnel Training

Credits: 3

An examination of the training of personnel in an organization. Topics include: determination of an organization's training needs, selection and motivation of trainees, design and evaluation of training programs, and examination of several specific strategies for accomplishing the training function.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 560 or equivalent.

Typically Offered
Spring

PSYCH 876 - Industrial Psychology: Work Motivation

Credits: 3

An examination of empirical findings and theoretical approaches to understanding the relationship between worker motivation and job outcomes.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 564 or GENBA 520.

Typically Offered
Fall

PSYCH 877 - Industrial Psychology: Leadership

Credits: 3

Examination of current leadership theories, research, and practice in the work setting, focusing on situational approaches to leadership, leadership styles, and interactions between personal characteristics and organizational factors.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 564 or equivalent.

Typically Offered
Fall

PSYCH 878 - Industrial Psychology: Personnel Selection

Credits: 3

Examination of theoretical and practical issues in staffing industrial organizations, including recruitment, test validation, and other equal employment opportunity issues (test fairness, adverse impact, etc.).

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 560 or equivalent.

Typically Offered
Spring

PSYCH 879 - Organizational Psychology

Credits: 3

An examination of the individual's role in industrial organizations and the effects of organizational variables on the individual worker. Topics include organizational communication, employee socialization, psychological climates of organizations, psychological stress in organizations, group processes and employee performance, and organizational change.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 564.

Typically Offered
Fall

PSYCH 880 - Industrial Psychology: Performance Appraisal

Credits: 3

Examination of data sources, rating procedures, psychometric criteria for evaluating performance appraisal systems, and models/theories of the performance evaluation process.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 560 or equivalent.

Typically Offered
Spring

PSYCH 885 - History and Trends in Psychology

Credits: 3

A review of the contributions of individuals and intellectual movements to the development of modern psychology. A survey of theoretical systems currently of influence.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 350 or equivalent.

Typically Offered
Spring

PSYCH 899 - Master's Research in Psychology

Credits: 1-18

Master's Research in Psychology

Note
Consent of supervisory committee.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PSYCH 951 - Seminar in Physiological Psychology

Credits: 1-3

Selected topics in physiological psychology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 952 - Seminar in Sensory Processes

Credits: 1-3

Selected topics in sensory psychology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 953 - Seminar in Personality

Credits: 1-3

Intensive discussion of current problems of theoretical and empirical interest in the field of personality.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 954 - Seminar in Experimental Psychology

Credits: 1-18

Intensive discussion of a problem of current interest based on the class's study of the pertinent original literature.

Repeat for Credit
Y

Requisites
Prerequisite: PSYCH 810 or consent of instructor.

Typically Offered
Other

PSYCH 956 - Seminar in Psychological Measurement

Credits: 1-18

Intensive discussion of a problem of current interest, based on the class's study of the pertinent original literature.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 957 - Seminar in Cognitive Processes

Credits: 1-3

Selected topics in the study of human thinking and cognition.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 958 - Seminar in Mathematical Models of Behavior

Credits: 1-3

Selected topics in mathematical psychology, and applications of mathematical models to behavior.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 959 - Seminar in Social Psychology

Credits: 1-3

Emphasis on discussion of advanced topics of current interest in social psychology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 960 - Seminar in Industrial Psychology

Credits: 3

Intensive examination of current empirical and theoretical issues in industrial and organizational psychology.

Repeat for Credit
Y

Requisites
Prerequisite: PSYCH 560 or equivalent.

Typically Offered
Fall

PSYCH 961 - Multivariate Analyses of Behavioral Data

Credits: 3

Methods of working with behavioral sciences multivariate data, including screen data for compliance with assumption and addressing violations of assumptions. Coverage of common multivariate analyses used, with specific

application to behavioral research content and topics.

Repeat for Credit
N

Requisites
Prerequisite: PSYCH 805 or consent of instructor.

Typically Offered
Fall

PSYCH 968 - Seminar in Professional Problems

Credits: 1-3

Intensive study and discussion of current professional problems in psychology.

Note
Consent of instructor.

Repeat for Credit
Y

Typically Offered
Other

PSYCH 990 - Internship in Psychology

Credits: 1-18

Internship in Psychology

Note
Consent of the supervisory committee.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

PSYCH 999 - PhD Research in Psychology

Credits: 1-18

PhD Research in Psychology

Note
Consent of the supervisory committee.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

RA 305 - Robotics Programming

Credits: 3

Concepts and practices related to programming robotic systems emphasizing the unique input/output (I/O) and concurrency requirements of robotics. Students learn about sensors, actuators, kinematics, control systems, teleoperated operation and autonomous algorithms. Students write programs that run on a robot as well as a drive station computer with network communication to a robot.

Repeat for Credit
N

Requisites
Prerequisite: ETB 310 or CYBR 247 or CMST 302.
Corequisite: MATH 150 or MATH 151.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning
Natural and Physical Sciences

RA 342 - Industrial Robotics Lab 2

Credits: 1

A project-based robotics and automation laboratory course focused on industrial robots emphasizing robot operation, programming, and integration with programmable logic controllers, machine vision systems, and other automation equipment.

Repeat for Credit
N

Requisites
Prerequisite: MET 240

Typically Offered
Fall

RA 343 - Industrial Robotics Lab 3

Credits: 1

A project-based robotics and automation laboratory course focused on industrial robots emphasizing robot operation, programming, and integration with programmable logic controllers, machine vision systems, and other automation equipment.

Repeat for Credit
N

Requisites
Prerequisite: MET 342

Typically Offered
Spring

RA 357 - Machine Vision

Credits: 3

Introduction to practical concepts and techniques for image processing and computer vision emphasizing the fundamental algorithms applicable to robotics, automation and unmanned aerial systems. Major topics covered include: MATLAB programming, image acquisition, geometric and intensity transformations, spatial and frequency domain filtering, image enhancement and restoration, morphological transformations, edge detection, segmentation, compression, feature extraction, and pattern recognition.

Repeat for Credit
N

Requisites
Prerequisite: ETB 310, or CMST 302, or CYBR 247.

Typically Offered
Spring

RA 444 - Integrated Robotics Studio

Credits: 0-2

Students complete self-directed projects that bring together and extend applications from previous and concurrent courses toward integrated robotics solutions. Expected topics of focus draw from industrial robot programming and implementation, programmable logic control, machine vision, human-machine interfaces, other automated systems equipment, data integration, and other aspects of contemporary and emerging automation. Collaborative projects with industry partners are encouraged.

Repeat for Credit
Y

Requisites
Prerequisite: MET 240

Typically Offered
Fall or Spring

RAS 212 - Introduction to Robot Operating System (ROS)

Credits: 3

A foundational understanding of the current ROS distribution and its application in robotics, preparing students for more advanced topics and practical robotics projects.

Repeat for Credit
N

Typically Offered
Fall

RAS 225 - Robot Power Systems

Credits: 3

A comprehensive study of power systems for robotics, focusing on the design, implementation, and management of energy sources for mobile and stationary robots.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100

Typically Offered
Spring

RAS 260 - Path Planning and Navigation

Credits: 3

Gain hands-on experience controlling robots using various sensors while exploring advanced techniques for guiding mobile robots. Develop and implement algorithms for efficient path planning and navigation in various environments including both virtual and real-world

applications.

Repeat for Credit
N

Requisites
Prerequisite: RAS 212

Typically Offered
Fall

RAS 268 - Mobile Robotics Navigation Studio

Credits: 1

A practical, project-based course that focuses on the development and implementation of navigation systems for mobile robots.

Repeat for Credit
N

Requisites
Prerequisite: RAS 360

Typically Offered
Spring

RAS 320 - Sensors and Perception for Robotics

Credits: 3

Explore a wide range of sensors used in robotics along with the algorithms needed to interpret sensor data. Learn to select the right sensors for various applications, apply perception algorithms, and resolve sensor-related challenges.

Repeat for Credit
N

Requisites
Prerequisite: ECET 100

Typically Offered
Fall

RAS 335 - Digital Manufacturing

Credits: 3

Discover the cutting-edge world of digital manufacturing, where traditional fabrication methods merge with advanced technology to create precise and complex components. Explore the fundamentals and applications of key digital manufacturing tools.

Repeat for Credit
N

Requisites
Prerequisites: MET 117 and MET121.

Typically Offered
Fall

RAS 348 - Mobile Robotics Fabrication Studio

Credits: 1

A hands-on, project-based course where students design, build, and test mobile robot systems from the ground up.

Repeat for Credit
N

Requisites
RAS 335 and ECET 340

Typically Offered
Spring

RAS 358 - Industrial Inspection Systems

Credits: 2

Explore inspection systems used in industrial processes. Primary focus on vision inspection equipment including cameras, lenses, sensors, and lighting.

Repeat for Credit
N

Typically Offered
Fall

RAS 385 - Advanced Programmable Logic Controllers

Credits: 3

Study of the applications of programmable logic controllers (PLCs) in industrial environments. Topics include

hardware, wiring, configurations, programming, documentation, troubleshooting, and maintenance of PLC systems.

Note
Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: ECET 335 or MET 230 or AIT 335.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

RAS 387 - Data Acquisition and Monitoring

Credits: 2

An in-depth exploration of data acquisition systems and monitoring techniques, focusing on their application in modern engineering and robotics systems.

Repeat for Credit
N

Requisites
Prerequisite: MET 382

Typically Offered
Fall

RAS 415 - Robot Design and Kinematics

Credits: 3

Gain a broad understanding of robot systems, focusing on both physical and mathematical models. Design and analyze mobile robots, explore the dynamics of mobile platforms, and assess various mobility solutions to optimize robot designs for specific tasks.

Repeat for Credit
N

Requisites
Prerequisites: ETB 310 and MATH 220

Typically Offered
Spring

RAS 455 - Robot Embedded Systems

Credits: 3

Delve into the application of embedded systems in robotics. Develop skills in extending robot capabilities to resource-limited embedded platforms, exploring microcontroller architecture, real-time operating systems (RTOS), and embedded hardware.

Repeat for Credit
N

Requisites
Prerequisite: RAS 212 and ECET 354

Typically Offered
Fall

RAS 458 - Mobile Robotics Embedded Development Studio

Credits: 1

An advanced, hands-on course focused on the design and programming of embedded systems within mobile robot platforms.

Repeat for Credit
N

Requisites
Prerequisite: RAS 455

Typically Offered
Spring

RAS 480 - Robotics Capstone I

Credits: 1

Application of robotic principles and design methodology to solve a significant design problem in a team context. Includes determining customer requirements, exploring and choosing design alternatives, scheduling, and project management.

Repeat for Credit
N

Requisites
Senior-level standing

Typically Offered
Fall

RAS 481 - Robotics Capstone II

Credits: 2

A continuation of RAS 480 including the implementation, testing, and delivery of the proposed project.

Repeat for Credit
N

Requisites
Prerequisite: RAS 480

Typically Offered
Spring

RRES 200 - Topics in Recreation Resources

Credits: 1-3

Discussion of topics and activities of importance in recreation resources.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

RUSSN 101 - Russian I

Credits: 5

Introduction to the structure of modern Russian. Emphasis on the sounds of Russian, the use of the Cyrillic alphabet, and oral drills with added practice in the language laboratory.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 102 - Russian II

Credits: 5

Continuation of the study of Russian grammar and oral communication.

Repeat for Credit
N

Requisites
Prerequisite: RUSSN 101 or equivalent.

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 250 - Russian Culture and Civilization

Credits: 3

Russia's past and present in the light of principal ideologies with emphasis upon fine art, literature, music, religion, politics, and education. Equal time will be devoted to the Tsarist and Soviet periods.

Note
Knowledge of Russian is not required.

Repeat for Credit
N

Typically Offered
Other

Cross-listed
HIST 250

K-State Core
6 Arts and Humanities

K-State 8

Aesthetic Interpretation
Historical Perspectives

RUSSN 300 - Russian III

Credits: 4

Completion of the study of Russian grammar. Reading of selected prose on the intermediate level.

Repeat for Credit
N

Requisites
Prerequisite: RUSSN 102 or equivalent.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 301 - Russian IV

Credits: 3

Intensive review of Russian grammar. Exercises in reading selected modern Russian texts in the original.

Repeat for Credit
N

Requisites
Prerequisite: RUSSN 301 or equivalent.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 398 - Intermediate Studies in Russian

Credits: 1-18

Offered only to participants in study abroad programs. Prior consultation for approval is expected.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 504 - Russian Literature in Translation: The Nineteenth Century

Credits: 3

Survey of principal writers of Tsarist Russia with emphasis upon Turgenev, Dostoevsky, Tolstoy, and Chekhov.

Note
Courses taught in English.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

RUSSN 508 - Russian Literature in Translation: The Soviet Period

Credits: 3

The development of Russian literature since the Revolution, with emphasis upon Mayakovsky, Sholokov, Pasternak, and Solzhenitsyn.

Note
Courses taught in English.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Historical Perspectives

RUSSN 551 - Russian V

Credits: 3

Reading of Russian short stories of the nineteenth and twentieth centuries, including works by Pushkin, Lermontov, Dostoevsky, and Chekhov.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 553 - Russian Conversation and Composition

Credits: 3

Discussion in Russian. Extensive practice in writing Russian compositions.

Repeat for Credit
N

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

RUSSN 559 - Special Studies in Russian

Credits: 1-18

Special Studies in Russian

Note
Consent of department head and instructor involved.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation

SALES 300 - Fundamentals of Professional Selling

Credits: 3

Focuses on interpersonal communications between buyers and sellers, both oral and written. The mechanics and intricacies of the sales process will be explored in detail. Sales skills will be further developed via sales role plays.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

SALES 326 - International Sales Experience

Credits: 3

Embark on an immersive education abroad experience that takes learning beyond the classroom and into the heart of global communities. This course offers students the unique opportunity to explore a foreign country through academic study, cultural engagement, and hands-on experiences.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300

Typically Offered
On sufficient demand

SALES 450 - Sales Technology

Credits: 3

This course reviews sales technology and examines the application of sales technologies to the sales process. Course projects will include role plays, along with the active use of technology systems. Content will include managing leads, prospects, and the sales pipeline using technology.

Repeat for Credit
N

Requisites

Prerequisite: SALES 300, must be admitted to Professional Strategic Selling major (BPSS) or certificate (CPSS).

Typically Offered
Fall, Spring

SALES 451 - Sales Force Leadership

Credits: 3

Management of the sales force in non-retail settings including coaching, supervising, providing feedback, training, and other sales management frameworks and techniques.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300, must be admitted to Professional Strategic Selling major (BPSS) or certificate (CPSS)..

Typically Offered
Fall, Spring

K-State 8
Social Sciences

SALES 452 - Customer Relationship Management

Credits: 3

This course introduces students to the strategies, methodology and technology used to manage customer relationships; and support and enhance the sales and marketing functions.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

SALES 453 - Advanced Selling

Credits: 3

Students apply their professional selling skills through advanced instruction and skill development. Course projects include role plays, along with real-time use of CRM systems, as part of a live sales experience. Content includes prospecting, sales pipeline management, effective sales conversations, and adaptive selling in a real-world sales context.

Repeat for Credit
N

Requisites
Prerequisite: SALES 450, must be admitted to Professional Strategic Selling major (BPSS) or certificate (CPSS)..

Typically Offered
Spring

K-State 8
Social Sciences

SALES 454 - Sales Practicum

Credits: 3

The student will work as a sales intern in a business environment as a means to gain applied sales experience. A report detailing duties performed and tasks accomplished is required at the end of the internship period, along with an evaluation by the supervisor and a self-assessment. Additionally, the student will complete required reading and assignments related to the reading.

Note
Restricted to students who have completed at least their sophomore year.
Need to have been accepted into the Certificate or Major in Professional Strategic Selling Program.
Cannot be taken concurrently with another internship class.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300, must be accepted into the Certificate or Major in Professional Strategic Selling Program, must be sophomore or higher level.

Typically Offered
Summer

SALES 455 - Sales Negotiation

Credits: 3

Students learn the fundamentals of negotation, and how those fundamentals are used during the sales process, with the goal of improving understanding of negotiation theory and practical application. Students are expected to participate in role playing excercises.

Repeat for Credit
N

Typically Offered
Spring

SALES 456 - Key Account Management

Credits: 3

Students are introduced to the complex strategies and tactics used in identifying and managing key customer accounts, including those with large multi-national footprints.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300.

Typically Offered
Fall

SALES 457 - Cooperation Selling

Credits: 3

Students learn how to successfully synchronize their selling process with the decision maker's buying process in order to completely satisfy customers and generage more sales. Students are expected to participate in role playing exercises.

Repeat for Credit
N

Requisites
Prerequisite: SALES 300.

Typically Offered
Fall

SALES 496 - Special Topics in Sales

Credits: 3

Discussion and analysis of current and emerging issues in sales, including topics related to new sales models, new technologies, and the practice of sales.

Repeat for Credit
Y

Requisites
Prerequisite: SALES 300

Typically Offered
On sufficient demand

SALES 498 - Independent Study in Sales

Credits: 0-3

Independent Study in sales.

Repeat for Credit
Y

Requisites
Prerequisite: SALES 300, must be admitted to Professional Strategic Selling major (BPSS) or certificate (CPSS)..

Typically Offered
On sufficient demand

SALES 891 - Special Topics in Sales

Credits: 3

Investigation and discussion of a selected topic or group of topics in sales.

Repeat for Credit
Y

Typically Offered
Fall, Spring

SENS 701 - Sensory Analysis

Credits: 3

Sensory analysis of appearance, texture, aroma, flavor; physiology of sensory receptors; laboratory and consumer panels; and interpretation of data.

Note
Two hour recitation and three to six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: One course in statistics required.

Typically Offered
Fall-Odd Years

SENS 711 - Pet Food Sensory Analysis

Credits: 2

Sensory analysis of food and other products for non-food animals (e.e. dogs and cats with mention of other species) with an emphasis on methods (descriptive, discrimination, consumer, sensory-related instrumental) used in the laboratory and in the field.

Note
Two hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 or STAT 702 or STAT 703 or equivalent.

Typically Offered
Spring-Odd Years

SENS 833 - Descriptive Sensory Analysis: Methods

Credits: 1

Specification and application of descriptive sensory analysis methods for use in product development, research, and quality control. Practical experiences in conducting these tests.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701

Typically Offered
Spring

SENS 834 - Descriptive Sensory Analysis: Food and Fragrance

Credits: 1

Identification and use of descriptive sensory attributes as they relate to food and fragrance for product development, research, and quality control. Practical experiences in identifying, describing, and application of food and fragrance attributes.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 833 or co-requisite.

Typically Offered
Spring

SENS 835 - Descriptive Sensory Analysis: Non-Food

Credits: 1

Identification and use of descriptive sensory methods and attributes as they relate to non-food product development, research, and quality control. Practical experiences and case studies in identifying, describing, and application methods and attributes for research using products such as textiles, cosmetics, and personal goods.

Repeat for Credit
N

Requisites
Prerequisite: FNDH 833 or co-requisite.

Typically Offered
Spring

SENS 836 - Descriptive Sensory Analysis: Panel Training

Credits: 1

Techniques for training and evaluating sensory descriptive

panels for use in product development, research, and quality control.

Repeat for Credit
N

Requisites
Co-requisite: SENS 833.

Typically Offered
Spring

SENS 837 - Descriptive Sensory Analysis: Rapid Methods

Credits: 1

Use and understanding of rapid sensory techniques to descriptively evaluate products.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 OR SENS 833

Typically Offered
Summer-Odd Years

SENS 841 - Consumer Research - Fundamentals

Credits: 1

Fundamentals of consumer research in terms of organizing and executing studies. Planning studies, selecting products, recruiting target consumers, and organizing study execution are included.

Repeat for Credit
N

Requisites
Prerequisite: Needs one course in Statistics

Typically Offered
Fall

SENS 843 - Consumer Research - Qualitative

Credits: 1

This course provides a deep dive into qualitative research, including the design, application, execution, and reporting. This course will educate the student on the appropriate tools for qualitative data collection based on the objective, with a particular emphasis on interviews and focus groups.

Repeat for Credit
N

Requisites
Prerequisites-SENS 701 OR SENS 841

Typically Offered
Fall

SENS 845 - Consumer Research – Observational and Behavioral

Credits: 1

Study of observational and behavioral research methods as they are applied to consumer product research, including ethics and techniques for such research. Methods and analysis for both qualitative and quantitative methods for such data collection will be covered.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 OR SENS 841

Typically Offered
Spring

SENS 846 - Consumer Research – International and Special Populations

Credits: 1

Study of consumer product research with international and special populations including children and other special populations.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 OR SENS 841

Typically Offered
Spring

SENS 847 - Consumer Research – Attitudinal

Credits: 1

Study of attitudinal research methods, including questionnaires and facial recognition, for product understanding. Techniques including emotion, mood, and psychographic research methods will be covered. Methods for consumer segmentation beyond traditional demographical segmentation will be discussed.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 OR SENS 841

Typically Offered
Spring

SENS 848 - Consumer Research – Quantitative

Credits: 1

Methods and issues associated with measuring consumer responses to products including preference testing, preference ranking, acceptance testing, hedonic scales, and consumption testing.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 or SENS 841.

Typically Offered
Fall

SENS 851 - Sensory Analysis Applications of Statistics

Credits: 2

Application of statistics to sensory data. Emphasis on appropriate analyses, software use, interpretation of data, and reporting.

Repeat for Credit
Y

Requisites
Prerequisite: Prerequisite: SENS 701 AND (STAT 730 or STAT 720 or STAT 722)

Typically Offered
Fall-Even Years

SENS 852 - Practicum in Sensory Analysis

Credits: 3

Application of statistics to sensory data. Emphasis on appropriate analyses, software use, interpretation of data, and reporting.

Note
Consent of School

Repeat for Credit
Y

Requisites
Prerequisite: SENS 841 or SENS 833

Typically Offered
Fall, Spring, Summer

SENS 853 - International Research Experience

Credits: 2

International experience in conducting research. Development of strong collaboration and pre-planning, actual conduct, and reporting of results. International travel is required for this course. One hour of lecture per week and 1-2 week in-country practicum.

Note
Consent of School Required.

Repeat for Credit
N

Requisites
Prerequisite: SENS 701 AND (SENS 833 OR SENS 841)

Typically Offered
On sufficient demand

SENS 856 - Sensory and Instrumental Volatile Analysis and their Relationship

Credits: 2

Use and relationship of methods for measuring and relating volatiles including sensory and instrumental methods such as gas chromatography mass-spectrometry (GC-MS) and gas chromatography olfactometry (GC-O).

Repeat for Credit
N

Requisites
Prerequisite: SENS 701.

Typically Offered
On sufficient demand

SENS 881 - Seminar in Sensory Analysis and Consumer Behavior

Credits: 1

Student experiences for professional development including developing and delivering a presentation and navigating the workplace.

Repeat for Credit
Y

Requisites
Prerequisite: SENS 701

Typically Offered
Spring

SENS 958 - Critical Experiences in Industry Research

Credits: 3-6

Practicum in professional communication in the disciplines including proposal writing, networking and collaborating with professional colleagues, and developing and/or presenting project results.

Note
Student may re-enroll to accumulate additional credit. Consent of school.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SOCIO 211 - Introduction to Sociology

Credits: 3

Development, structure, and functioning of human groups; social and cultural patterns; and the principal social processes.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 214 - Introduction to Sociology, Honors

Credits: 4

Development, structure, and functioning of human groups; societal and cultural patterns; the nature of sociological inquiry. Lecture, discussion, and independent study.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 260 - Social Problems

Credits: 3

Analysis of social problems such as drug use, crime, juvenile delinquency, mental illness, unemployment, and family instability.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring, Summer

K-State Core
5 Social and Behavioral Sciences

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

SOCIO 301 - Topics in Sociology

Credits: 1-18

Supervised independent and/or interdisciplinary study projects.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 211 and consent of instructor.

Typically Offered
Fall, Spring

SOCIO 363 - Global Problems

Credits: 3

Analysis of globalization and contemporary social problems around the world. Emphasis on non-Western, low-income countries. Examines food and hunger, global warming, debt crisis, democratization, ethnic conflict, and structures of economic and political inequality.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Social Sciences

SOCIO 399 - Honors Seminar in Sociology

Credits: 1-3

Readings and discussion of selected topics.

Note
Open to non-majors in the honors program.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211

Typically Offered
On sufficient demand

SOCIO 423 - Methods of Social Research I

Credits: 4

Treatment of the logic and procedures involved in the formulation of a research problem and the difficulties encountered in conducting research. Examines problems of explanation and prediction, the process of inquiry, elements of the scientific method, the design of research, and analysis in the social sciences.

Note
To include 1 credit hour of lab and field research experience.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211, STAT 225.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

SOCIO 431 - Comparative Social Theories

Credits: 3

A systematic survey of major theoretical approaches in sociology. The works of Marx, Weber, Durkheim, and other classical theorists are examined, along with selections

from major contemporary perspectives such as functionalism, symbolic interactionism, structuralism, critical theory, and feminist theory. Current debates over structure versus agency, postmodernism, and other controversies are considered.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

SOCIO 435 - Sport and Contemporary Society

Credits: 3

An analysis of sport and its role in contemporary society. Course creates a greater awareness of the social significance of sport in society and fosters the capacity to use critical thinking in the analysis of significant sport issues.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

Cross-listed
KIN 435

SOCIO 440 - Social Organization

Credits: 3

Principles and processes of the organization and structure of human societies. Examines how people create social institutions and how these organizations and structures shape human relations and experience. Analysis of capitalism and other forms of social organization.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

SOCIO 450 - Introduction to Social Interaction

Credits: 3

A survey of theories of social interaction and social psychology with special attention to research on principles of interpersonal relations in social situations, group formation, maintenance, and change.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SOCIO 500 - Sociological Perspectives on Contemporary Issues

Credits: 1-3

Analysis of a selected topic of contemporary interest. Topics vary from semester to semester and might include: impact of public policy on rural life; white collar crime;

student-athlete education; social change in the Third World.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

SOCIO 501 - Proficiency Development

Credits: 1-3

Integrative review of sociological concepts and skills under faculty supervision.

Note
For single students or groups of students. Not applicable to major field requirements. For undergraduate credit only. Consent of instructor and superior performance in relevant course.

Repeat for Credit
N

Typically Offered
On sufficient demand

SOCIO 504 - Political Sociology

Credits: 3

An introduction to the principles of political sociology. Processes of political socialization, participation within and outside established organizational channels, recruitment of elites, communication and influence, power, decision making, and policy outputs. Data are presented from a cross-national perspective.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211, POLSC 110.

Typically Offered
Spring-Even Years

Cross-listed
POLSC 504

SOCIO 505 - South Asian Civilizations

Credits: 3

Interdisciplinary survey of the development of civilizations in India, Pakistan, Sri Lanka, Bangladesh, Nepal, Bhutan, and Afghanistan, including geography, philosophy, social, economic, political institutions, and historical movements.

Repeat for Credit
N

Requisites
Prerequisite: 3 hours of social science or junior standing.

Typically Offered
Fall-Even Years

Cross-listed
GEOG 505, HIST 505, POLSC 505, ECON 505, ANTH 505

K-State 8
Global Issues and Perspectives
Social Sciences

SOCIO 507 - International Development and Social Change

Credits: 3

A survey of the socioeconomic and political dimensions of international development, with attention focused on developing world contexts. Special attention is given to understanding post-war development trends, including the debt crisis, globalization and neoliberalism, and movements for social change, such as the anti-globalization and the fair trade movements.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211 or consent of instructor.

Typically Offered
Other

K-State 8

Ethical Reasoning and Responsibility
Global Issues and Perspectives

SOCIO 510 - Social Welfare as a Social Institution

Credits: 3

The development and present status of social welfare in meeting changing human needs and the requirements in other parts of our social system; the analysis of present-day philosophy and functions of social welfare.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring

K-State 8
Historical Perspectives
Human Diversity within the U.S.

SOCIO 522 - Community Engaged Research and Evaluation

Credits: 3-6

Introduction to partnering with community organizations and
applying observation, surveys, interviews, governmental resources, secondary data identification and analysis, and basic program and policy evaluation. Students
practice notetaking, report writing, and ethical standards that protect the well-being of study participants.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 423.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning
Social Sciences

SOCIO 531 - Urban Sociology

Credits: 3

Growth, development, and structure of the city as determined by geographical, ecological, and social factors; relation of rural and urban communities; problems of the city and various approaches to their solution.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

K-State 8
Historical Perspectives
Social Sciences

SOCIO 532 - Our Communities, Our Futures

Credits: 3

Combines real-world experience and sociological knowledge about community organization. Explores organizational ties, social interaction, social capital, and leadership in communities.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 533 - Society, Food, and Agriculture

Credits: 3

Examines the relationships between agriculture, food, and society. Topics to be examined include the changing structure of agriculture, food system resilience, the globalization of food and agriculture, issues of distribution, access, and food security, and related social movements. Examines implications for both rural and urban societies in the US and around the world.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

SOCIO 535 - Population Dynamics

Credits: 3

World population trends and their implications for economic development, public policy, and social and cultural change. The interaction of fertility, mortality, and migration with the size, distribution, and structure of populations in nations and world regions.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring-Odd Years

K-State 8
Global Issues and Perspectives
Social Sciences

SOCIO 536 - Society and Natural Resources

Credits: 3

The interrelations among human societies, social institutions, and the biophysical environment. Emphasis on the reciprocal links among technological change, economic structure, and the ecological basis of human societies.

Repeat for Credit
N

Typically Offered
Fall, Spring

SOCIO 537 - Sociology of Emotions

Credits: 3

Examines different sociological perspectives on the role of emotions in social life, from the level of self and identity, through social interaction, to the macro level of social structure, social order, and social change. Emotions as both social products, and as factors constitutive of social life.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Aesthetic Interpretation

SOCIO 538 - Sociology of Culture

Credits: 3

Introduction to the concept of "culture" and the role of culture and collective meaning in social life and social change. How we make sense of the world, and how this affects our responses and actions in the world. Relationship between cultural change and social change.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Social Sciences

SOCIO 540 - Sexuality and Society

Credits: 3

Overview of key concepts related to sexuality studies and examination of social and cultural constructions of sexuality. Discussion of issues of power, inequalities, and social control.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Summer

SOCIO 541 - Wealth, Power, and Privilege

Credits: 3

Analysis of social inequality, particularly within the contemporary United States. Competing explanations for unequal wealth, status, power, etc. Emphasis on explanations related to class, occupational structure, gender, and ethnicity.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 544 - Social Gerontology: An Introduction to the Sociology of Aging

Credits: 3

Analysis of the phenomenon of human aging in its individual, social, and cultural aspects with special attention to the problems of aging populations in Western societies.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

SOCIO 545 - The Sociology of Women

Credits: 3

Examines patterns of gender in contemporary society and corresponding experiences of women. The course emphasizes both interactional and structural approaches and provides an overview of theoretical work in the field. Particular attention is paid to how gender interacts with ethnicity, class, and sexuality.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Other

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 546 - Bureaucracy in Modern Societies

Credits: 3

The nature and types of bureaucratic organizations in modern societies. Selected aspects of their internal structure, such as peer group and hierarchical relations in organizations, processes of communication, management, and impersonal mechanisms of control.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall

K-State 8
Historical Perspectives
Social Sciences

SOCIO 565 - Program and Policy Formulation and Analysis

Credits: 3

Examination of policies and programs developed to cope with various social problems. Emphasis will be on analysis of existing programs and policies and the formulation of alternative policies. Attention will be given to policy change through legislative action.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 510.

Typically Offered
Fall, Spring

Cross-listed
SOCWK 565

SOCIO 567 - Pre-Internship Orientation

Credits: 1

This course prepares students for internship placements. Resumes are written, interview procedures discussed, agency interviews conducted, internships selected, and agency orientation completed.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 520.

Typically Offered
Fall, Spring

K-State 8
Social Sciences

SOCIO 568 - Criminology and Sociology Internship

Credits: 6-9

Supervised field experience in various agencies within the criminal justice systems or other public or private organizations in areas involving applied sociological analysis or practice. Criminology majors wishing to pursue careers in the field of criminal justice are strongly encouraged to complete an internship. General sociology students may take this course under the direction of a faculty member who agrees to serve as their internship advisor. Does not fulfill sociology or criminology elective requirements.

Note
Must be taken concurrent with SOCIO 569.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 567.

Typically Offered
Fall, Spring, Summer

K-State 8
Social Sciences

SOCIO 569 - Criminology and Sociology Professional Seminar

Credits: 3

Integrates field experience and everyday practices with relevant bodies of sociological and criminological theory and research. Must be taken concurrent with SOCIO 568.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 567.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

SOCIO 570 - Race and Ethnic Relations in the USA

Credits: 3

This survey of racial and ethnic relations focuses on discrimination and conflict now as well as on background factors of the past to enlarge understanding of dominant and minority groups.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 599 - Senior Thesis in Sociology

Credits: 3-6

Independent research in sociology. Students conduct original research and produce a senior thesis in sociology.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 423; SOCIO 431, and instructor consent.

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

SOCIO 618 - Religion in Culture

Credits: 3

The nature of religion and its manifestations in different cultural systems.

Repeat for Credit
N

Requisites
Prerequisite: ANTH 200 or SOCIO 211.

Typically Offered
Spring-Odd Years

Cross-listed
ANTH 618

K-State 8
Ethical Reasoning and Responsibility
Global Issues and Perspectives

SOCIO 633 - Gender, Power, and Development

Credits: 3

Examination of various models of development and their impact on roles of women and men in various cultures. Emphasis upon Africa, Asia, and Latin America. Comparisons of public, service, and economic sectors, including agriculture, marketing, and industry. Examination of policy issues.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211 or ANTH 200 and 3 additional hours in sociology or cultural anthropology.

Typically Offered
On sufficient demand

Cross-listed
ANTH 633

K-State 8
Global Issues and Perspectives
Social Sciences

SOCIO 635 - Sociology of Human Trafficking

Credits: 3

The course explores a range of topics related to human trafficking, anti-trafficking institutions, and legislation in the context of globalization. Analysis of contemporary forms of slavery-like practices (forced labor, child trafficking, domestic servitude, and others), with primary focus on sex trafficking of women.

Repeat for Credit
N

Typically Offered
Summer

SOCIO 640 - Sociology of the Family

Credits: 3

Origin and development of marriage customs and systems of family organization; the preparation for family life under present conditions.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall

K-State 8

Human Diversity within the U.S.
Social Sciences

SOCIO 643 - Sociology of Religion

Credits: 3

The role of religion as an institution in American society. An assessment of the functions of religion and an exploration of contemporary trends and movements, including information on traditional denominations and emerging sects and cults.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Fall

SOCIO 645 - Post-Communist Societies

Credits: 3

Analysis of divergent scenarios of post-communist social transformation, primarily in the countries of Eastern Europe and Eurasia. Discussion of the history of communist societies, changing social institutions, and social stratification in the post-communist contexts. Examines post-communist space and mobility, class and gender inequalities, political democratization, youth culture and prospects, crime, global connections of the transformation, human rights and civil society, security and conflict, religion and ethnicity, and the changing family.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211.

Typically Offered
Spring

SOCIO 647 - Sociology of Work

Credits: 3

Analysis of the world of work, both paid and unpaid. Examines changes that affect the organization of work and the distribution of income, and examines how change alters class, gender, and ethnic relations.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211 and junior standing.

Typically Offered
Other

K-State 8
Historical Perspectives
Human Diversity within the U.S.

SOCIO 670 - Diversity and Social Interaction in the Workplace

Credits: 3

Examines changes in the world of work; examines various contexts of work, such as business, the professions, education, and home; analyzes the social organization of work, both in terms of formal arrangements, such as authority and hierarchy, and in terms of informal structure, such as gender, race, class, and other categories of social difference; provides hands-on experience in dealing with interpersonal relations, management styles, communication, diversity issues, and conflict and stress management.

Repeat for Credit
N

Requisites
Prerequisite: 6 hours of social science.

Typically Offered
Intersession

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCIO 701 - Problems in Sociology

Credits: 1-18

Problems in Sociology

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 211 and junior standing.

Typically Offered
Fall, Spring, Summer

SOCIO 738 - International Migration

Credits: 3

A comprehensive examination of international migration dynamics with a focus on immigration to the United States. Introduces current theoretical debate on migration and examines global migration trends, integration and community formation of immigrants, construction of immigration policies, and impacts on United States society.

Repeat for Credit
N

Typically Offered
Other

SOCIO 742 - Society and Change in South Asia

Credits: 3

Examines recent studies of family and community, population, mobility, urbanization, and modernization in the India-Pakistan region, with focus on social change.

Repeat for Credit
N

Requisites
Prerequisite: SOCIO 211 or ANTH 200 and either a 500-level course in South Asian studies or one in social change and development.

Typically Offered
Spring-Even Years

SOCIO 801 - Introductory Proseminar

Credits: 1

Discussions designed to introduce entering graduate students to the discipline of sociology as a profession and to the members of the sociology graduate faculty.

Note
Required during the first fall semester on campus.

Repeat for Credit
Y

Requisites
Prerequisite: Admission to the graduate program in sociology.

Typically Offered
Fall

SOCIO 802 - Teaching Proseminar

Credits: 1

Designed to aid new graduate teaching assistants. Includes such topics as planning a sociology course, handling sensitive issues, leading discussions in large and small classes, use of audiovisuals, special projects, classroom deportment, designing and grading examinations.

Note
Required of first-semester GTAs.

Repeat for Credit
Y

Requisites
Prerequisite: Interest in teaching sociology and enrollment in the sociology graduate program.

Typically Offered
Fall

SOCIO 809 - Classical Social Theory

Credits: 3

Intensive seminar in classical sociological theory. Examines the theoretical frameworks and methodologies of Karl Marx, Max Weber, and Emile Durkheim, along with selections from the works of other major classical theorists. Analysis of primary texts will be emphasized.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 511 or equivalent.

Typically Offered
Fall

SOCIO 810 - Contemporary Sociological Theory

Credits: 3

Comparative analysis of contemporary schools of sociological thought showing their development, current status, and possible future trends. Emphasis on structural functionalism, Marxism and neo-Marxism, symbolic interactionism, phenomenology and ethnomethodology, and exchange theory. A working knowledge of classical sociological theory is assumed.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 710 or equivalent.

Typically Offered
Spring

SOCIO 822 - Introduction to Methods of Social Analysis

Credits: 3

Provides an introduction to the methods and techniques utilized in sociological research. Includes such topics as basic collecting and analyzing sociological data.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or equivalent.

Typically Offered
Fall

SOCIO 823 - Intermediate Methods of Social Research

Credits: 3

Current sociological research techniques, strategies of research design, construction of research instruments, logic of sociological inquiry, conceptualization, problem formation, and preparation of research proposals.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring

SOCIO 824 - Qualitative Methodology

Credits: 3

Collection, analysis, and presentation of sociological data using such methods as participant observation, ethnomethodology, community analysis, documentary research and historiography, case study, and life history. Emphasis upon formulation of problems and the execution of research.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
On sufficient demand

SOCIO 825 - Quantitative Methods

Credits: 3

Provides instruction for advanced techniques in the quantitative analysis of sociological data. Includes regression analysis and estimation of models with categorical data. A working knowledge of basic statistical concepts is assumed.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 702 or equivalent.

Typically Offered
Fall

SOCIO 830 - Social Demography

Credits: 3

The study of human population, including the social, economic, political, ecological, and cultural determinants and consequences of changes in fertility, mortality, and migration.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall

SOCIO 831 - Sociology of Agriculture

Credits: 3

Provides a survey of the subfield of sociology of agriculture, including an examination of its roots, growth and current theoretical and substantive directions. Explores the linkages between agriculture, commodity systems, food and the environment.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring-Odd Years

SOCIO 832 - Sociology of Community

Credits: 3

A survey of theoretical perspectives and current research on the sociology of community in the U.S. and other countries. Examples of issues covered include community growth and decline, social inequality, community power and politics, social implications of community economic change, urbanization, and the global context of local change.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring-Odd Years

SOCIO 833 - Gender Differentiation and Inequality

Credits: 3

Offers an analysis of the social construction and reproduction of gender identities. Focuses on current feminist theory and research on the links between gender identities and gender inequality.

Repeat for Credit
Y

Typically Offered
Spring-Even Years

SOCIO 835 - Environment and Society

Credits: 3

The interrelationships among population, technology, environment, and social organization. An examination of the origins and development of human ecology in sociology, and recent attempts to redefine the area. Special emphasis on current theoretical and research efforts focusing on the history and uses of ecological ideas.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring-Even Years

SOCIO 838 - Sociology of Culture

Credits: 3

Intensive reading and discussion of classical and contemporary works relating to the study of culture, all those things that render the world around us comprehensible, communicable, and meaningful. The Focus on collective meaning, the process through which meaning is generated, and the roles collective meanings play in social life.

Repeat for Credit
N

Typically Offered
Fall

SOCIO 840 - Comparative Social Systems

Credits: 3

Compares social systems in different regions of the world. Examines models of comparative and historical sociology. Provides students with a background for conducting and evaluating comparative research. Treats such issues as socioeconomic development, group relations, and age and sex roles from a cross-cultural perspective.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall-Even Years

SOCIO 841 - Social Stratification

Credits: 3

Survey of major sociological theories and research on inequality in modern societies. Examines the distribution of wealth, status, political power, and other valued resources; the effects of class, race, gender, and other modes of social differentiation; social mobility and the reproduction of inequality.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Fall

SOCIO 842 - Technology and Society

Credits: 3

Technology has contributed to significant changes in our social, cultural, and economic landscape. Provides a survey of theoretical perspectives and current research on the role of technology in society.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring-Even Years

SOCIO 850 - Criminal Justice in Context

Credits: 3

Examines various institutions of contemporary criminal justice operations, focusing primarily on the "three C's"-cops, courts, and corrections-and adjacent subjects such as law. Emphasis will be given to foundational works that emphasize history, theory, policy, and empirical research.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Other

SOCIO 851 - Sociology of Development

Credits: 3

Introduction to the sociology of development. Focus is comparative-historical, involving theoretical and empirical analysis of development dynamics over time and across places, both within the U.S. and abroad. Significant attention to the interdisciplinary aspects of the sociology of development, including economic, geographic-spatial, and political analyses.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing.

Typically Offered
Spring-Odd Years

SOCIO 853 - International Development

Credits: 3

Comparative analysis of competing theories and experiences of development in post-WWII Asian, African, and Latin American societies. Topics include how core theories of development have changed over time and how well they explain related and changing patterns of finance and production, class struggle, state society-relations, labor

rights, gender relations, and migration.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 809.

Typically Offered
Fall

SOCIO 861 - Sociology of Deviance

Credits: 1

A critical examination of the nature, types, and societal reactions to deviant behavior. Special emphasis will be given to the process of stigmatization, the social construction of deviance as a social problem, and the effect of inequalities such as race, gender, class, and sexuality on the process of creating and applying deviant labels to individuals and groups.

Repeat for Credit
Y

Requisites
Prerequisite: 9 hours social science credit.

Typically Offered
Fall-Odd Years

SOCIO 862 - Criminological Theory

Credits: 3

Focuses on traditional and contemporary criminological theories with secondary emphasis on presentation of empirical studies employing the theories under study. Theoretical integration will be stressed.

Repeat for Credit
Y

Requisites
Prerequisite: Twelve hours of social science.

Typically Offered
Spring-Odd Years

SOCIO 863 - Sociology of Victimology

Credits: 3

Focuses on the unique area of Victimology. Examines recent scholarship, methodological issues, and theoretical perspectives. Requires research paper and peer criticism.

Repeat for Credit
N

Typically Offered
Fall, Spring

SOCIO 880 - Social Movements

Credits: 3

Examines sociological theories about social movements and their organizational structures and strategies, with an analysis of historical and contemporary nationalist, socialist, labor, womens, civil rights, and environmental movements in the United States and around the world.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

SOCIO 897 - Practicum in Social Analysis

Credits: 3-6

Provides professional field experience for students enrolled in the Master's in Social Analysis program in an approved public agency, organization, or private firm, under direction of a faculty member. Requires participation in a quarterly seminar.

Repeat for Credit
Y

Requisites
Prerequisite: One semester in the MSA program and SOCIO 822.

Typically Offered
Spring

SOCIO 898 - Master's Report Research

Credits: 1-18

Master's Report Research

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SOCIO 899 - Master's Thesis Research

Credits: 1-18

Master's Thesis Research

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SOCIO 901 - Research Problems in Sociology

Credits: 1-18

Individual study and research for students admitted to doctoral standing in the Graduate School.

Repeat for Credit
Y

Requisites
Prerequisite: M.A., consent of instructor.

Typically Offered
Fall, Spring, Summer

SOCIO 911 - Seminar in Sociological Theory

Credits: 3

Selected topics in sociological theory. May be repeated with consent of supervisory committee.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 710 and SOCIO 810.

Typically Offered
Spring

SOCIO 923 - Methods of Social Policy Research

Credits: 3

Examination of principles, techniques, and design of retrospective and prospective social policy research.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 823 or equivalent.

Typically Offered
Fall-Even Years

SOCIO 925 - Specialized Approaches to Sociological Research

Credits: 3

Intensive examination of methodological approaches developed for analysis of sociological problems. The approaches to be examined will depend on faculty and student interests. Likely foci include estimation procedures for structural equation models, advanced techniques for quantitative analysis of categorical data, techniques for social network analysis and methods for comparative and historical analysis.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 823 and instructor's permission.

Typically Offered
Spring-Odd Years

SOCIO 931 - Seminar in Demographic Methods

Credits: 3

Demographic processes such as fertility, mortality, and migration, with emphasis on measurements, methods, and analytical techniques. Includes the construction of life tables and population estimates and projections.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 823 and SOCIO 830.

Typically Offered
Spring-Even Years

SOCIO 932 - Seminar in Comparative Community Organization

Credits: 3

Recent developments in theory and research on processes affecting community organization. Topics will vary. Possible emphases include world urbanization, community linkages to regional and global systems, technology and local economic development, rural community development, and community-based collective action.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 832 or SOCIO 834 or equivalent.

Typically Offered
Fall-Odd Years

SOCIO 933 - Gender and Society

Credits: 3

Exploration of feminist theorizing of gender relations in constructing and maintaining social institutions. Objective is to acquaint students with the strengths and weaknesses of current theories of gender, and to analyze social structures as both constituting and constitutive of gender relations at the macro/meso level of society.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 841.

Typically Offered
Spring-Odd Years

SOCIO 934 - Sociology of Rural Development

Credits: 3

Consideration of selected topics and issues in the social organization of rural areas, both international and in the U.S.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 851 or consent of instructor.

Typically Offered
Fall-Odd Years

SOCIO 935 - Seminar in Demography

Credits: 3

Consideration of selected topical areas in demography such as fertility and family planning, migration, population and development, and regional demography.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 830 or equivalent.

Typically Offered
On sufficient demand

SOCIO 940 - Seminar in Work and Organizations

Credits: 3

Topics and issues in the social structure of industries, firms, and labor processes.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 841.

Typically Offered
Fall-Odd Years

SOCIO 944 - Seminar in the Sociology of Aging

Credits: 3

Consideration of selected topics and issues in the sociology of aging such as retirement and institutional change,

societal reactions to aging, population structure and socioeconomic consequences of aging populations, the social organization of leisure, the impact on social organization of services for older people, the structural and organizational consequences of widowhood, age-grading and stratification in aging populations, analysis of the impact on community structure, and organization of special institutions for older people.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 744.

Typically Offered
Other

SOCIO 950 - Seminar in Social Interaction

Credits: 3

Examination of current theoretical, methodological, and research issues and topics.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 852, or equivalent.

Typically Offered
Spring-Even Years

SOCIO 951 - Political Sociology

Credits: 3

A survey of core readings in the subfield of political sociology. Covers classical sociological and political theory followed by current debates and research agendas, including world systems theory, post-colonial theory, neo-marxism, resource mobilization theory, game theory, and cultural theories of political action.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 809

Typically Offered
Spring-Even Years

SOCIO 953 - States and Civil Society

Credits: 3

Examines the relationship between the modern nation-state and powerful non-state institutions and social forces. Introduces prominent theories on the rise of the nation-state and its global transmission as the dominant form of governance. Addresses the role of social capital, social movements, NGOs, religious organizations, and educational institutions in upholding or challenging nation-state legitimacy.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 809; SOCIO 851.

Typically Offered
Spring-Even Years

SOCIO 961 - Methods Seminar in Criminology/Deviance

Credits: 3

Examination of principles, techniques, and design of research in criminology, deviance, and corrections.

Repeat for Credit
Y

Requisites
Prerequisite: SOCIO 824 or SOCIO 825.

Typically Offered
Fall-Even Years

SOCIO 962 - Topics Seminar in Criminology/Deviance

Credits: 3

Selected topical areas in criminology/deviance such as gender, race and/or class and crime; social control; domestic violence; lethal violence; victimology; issues in corrections; and issues in law.

Repeat for Credit
Y

Requisites

Prerequisite: SOCIO 850 or consent of instructor.

Typically Offered
Spring-Odd Years

SOCIO 999 - PhD Dissertation Research

Credits: 1-18

PhD Dissertation Research

Repeat for Credit
Y

Typically Offered
Other

SOCWK 100 - Social Work: The Helping Profession

Credits: 3

An introduction to the profession of social work and the various fields of social service by observing, experiencing, and analyzing social work and its place in society. An opportunity for the student to test social work as a possible career choice.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Historical Perspectives
Social Sciences

SOCWK 141 - First Year Orientation

Credits: 1

Orients first year students to the social work major and on-campus resources that will enable them to be successful. Engages students in discussion groups and community engagement activities to meet social work faculty members and students within the major. Develops student relationships and practices that allow them to effectively utilize college resources and become members of a community of learners.

Repeat for Credit
N

Typically Offered
Fall or Spring

SOCWK 151 - Social Work Career Development

Credits: 1

Develops career goals of social work majors. Exposes students to the breadth of career options in social work. Connects students with practicing social workers and faculty members.

Repeat for Credit
N

Typically Offered
Fall or Spring

SOCWK 200 - Basic Skills for Working with People

Credits: 3

Course develops basic skill components for the helping professions. Students learn fundamentals of interpersonal communication.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
5 Social and Behavioral Sciences

K-State 8
Ethical Reasoning and Responsibility

SOCWK 240 - Self-care for the Helping Professional

Credits: 1

Explores personal health and self-care of the helping professional. Discusses importance of self-care and best practices for maintaining personal and professional well-

being across the physical, mental, social, and spiritual self.

Repeat for Credit
N

Typically Offered
Spring

SOCWK 261 - Client Perspectives in Social Work

Credits: 1

Develops student critical thinking skills and understanding of client experiences through memoirs and first-person accounts of living within different at-risk populations. Explores client experiences and needed policies to address social problems.

Repeat for Credit
Y

Typically Offered
Fall or Spring

SOCWK 300 - Diversity, Equity, Inclusion, and Belonging in Social Work Practice

Credits: 3

Provides foundational knowledge of diversity, equity, inclusion, and belonging within social work practice in the United States. Examines theoretical, conceptual, and policy-based knowledge of systems of oppression, and the ways in which power and privilege are manifested within them.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State 8
Social Sciences
Human Diversity within the U.S.

SOCWK 310 - Topics in Social Work

Credits: 1-3

Supervised independent study projects.

Note
Consent of the instructor.

Repeat for Credit
Y

Typically Offered
Fall, Spring

SOCWK 312 - Fundamentals of Communication for the Agriculture and Food Science Community

Credits: 3

This course develops communication skills among the scientific community to improve discourse with lay persons. Fundamentals of active listening as well as techniques to diffuse tense situations are addressed.

Repeat for Credit
N

Typically Offered
Fall, Spring

SOCWK 315 - Human Behavior in the Social Environment I

Credits: 3

An introduction to the relationship among biological, social, psychological, and cultural systems as they affect or are affected by human behavior as it relates to social world models of practice. Emphasis on social systems understanding of human development.

Repeat for Credit
N

Requisites
Prerequisite: Two courses in the social sciences and sophomore standing.

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCWK 320 - Dynamics of Working with Older Adults

Credits: 3

Provide students in all fields a unique foundation upon which successful interaction with older adults is built. Specific communication techniques will be taught along with the knowledge, skills and values necessary to understand working with, or on the behalf of, older consumers, clients, patients and family members.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Social Sciences

SOCWK 340 - Global Social Work

Credits: 3

Explores the underlying theories, concepts, and practice skills related to international social work.

Repeat for Credit
N

Typically Offered
Fall-Odd Years

K-State 8
Global Issues and Perspectives

SOCWK 350 - Social Work with Criminal Offenders and Victims

Credits: 3

This course offers an overview of social work practice and professional helping skills in the criminal justice and legal systems.

Repeat for Credit
N

Requisites
Prerequisites: SOCWK 100 or SOCIO 211 and SOCIO 361.

Typically Offered
Fall-Even Years

K-State 8
Social Sciences
Human Diversity within the U.S.

SOCWK 360 - Substance Abuse Case Management and Holistic Recovery

Credits: 3

Introduction to the concept of case management and the role case managers play in helping persons with substance use disorders obtain and maintain recovery.

Repeat for Credit
N

Typically Offered
Spring, Summer

SOCWK 370 - Child Welfare

Credits: 3

Provides students with an understanding of the dynamics of child maltreatment and the role of the child welfare system in responding to maltreatment. Explores maltreatment across generations, the role of societal norms in perpetuating maltreatment, and culturally competent services for ending the intergenerational cycle of abuse. Examines government policies over time to promote child welfare and the effect of these policies on child safety, permanency, and family reunification.

Repeat for Credit
Y

Requisites
Recommended Prerequisite or Corequisite: SOCWK 100

Typically Offered
Fall, Spring

K-State 8
Social Sciences

SOCWK 380 - Social Work and Intimate Partner Violence

Credits: 3

This course will provide students an understanding of the knowledge and skills necessary to respond to intimate partner violence in an ethical, victim-centered and trauma informed manner.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 100 or SOCIO 211.

Typically Offered
Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

SOCWK 468 - Community Activism and Social Change

Credits: 3

Examines how social workers and citizens, individually and collectively, can achieve social progress through nonviolent social change.

Repeat for Credit
Y

Requisites
Prerequisite: SOCWK 100 or SOCIO 211.

Typically Offered
Spring-Even Years

K-State 8
Empirical and Quantitative Reasoning
Historical Perspectives

SOCWK 499 - Honors Project

Credits: 3

Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

SOCWK 501 - Proficiency Development

Credits: 1-3

Integrative review of social work concepts and skills under faculty supervision.

Note
For single students or groups of students. Not applicable to major field requirements. Consent of instructor and superior performance in relevant course.

Repeat for Credit
Y

Typically Offered
Other

SOCWK 510 - Social Welfare as a Social Institution

Credits: 3

Examines policies and programs to address social problems and their impact on individuals. Explores values and beliefs underlying social welfare policy and history of social welfare policy in the United States. Identifies strengths and weaknesses of current government interventions, with special emphasis on policies to promote social and economic justice in the United States and abroad. Reviews ways to conduct effective social welfare policy analysis and interventions.

Repeat for Credit
N

Requisites
Prerequisite: One course in each of the following areas: sociology, economics, and political science.

Typically Offered
Fall, Spring

Cross-listed
SOCIO 510

SOCWK 530 - Social Work Research and Evaluation Methods

Credits: 3

Focuses on applying research skills to engage in the evidence-based practice (EBP) process, a core component of generalist practice. Students will prepare a program evaluation proposal, including formulating a problem statement, EBP development, designing an evaluation plan, and selecting appropriate outcome measures.

Note
Social work and addiction counseling majors only.

Repeat for Credit
Y

Requisites
Prerequisite: MATH 100 OR STAT 225
Social Work and Addiction Counseling majors only

Typically Offered
Fall

K-State 8
Empirical and Quantitative Reasoning

SOCWK 550 - Field Practicum Preparation

Credits: 1-3

Social work majors take this course in the semester before enrollment in SOCWK 562 Field Experience, in preparation for the field practice experience. Students explore various fields of practice and social work settings and work with the instructor to plan their practicum for the following semester.

Note
Social work majors only.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing and instructor permission.

Typically Offered
Fall, Spring

SOCWK 560 - Social Work Practice I

Credits: 3

Continued development of social work practice skills. The social systems perspective is used to guide the development of a problem-solving methodology with attention to information gathering, assessment, and problem identification. Values clarification and self awareness are emphasized and the skills needed for intervention, termination, and evaluation are introduced.

Note
Social Work majors only.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 100, SOCWK 200, SOCWK 315, and SOCWK 510; junior standing; and permission of the instructor.
Social Work majors only.

Typically Offered
Fall, Spring

SOCWK 561 - Social Work Practice II

Credits: 3

Continuation of SOCWK 560 with emphasis on skill development in interventinon techniques, and practice evaluatiuon from a social systems perspective. A variety of intervention strategies and techniques is presented with emphasis on the development of a social work frame of reference.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 560 and senior standing and permission of the instructor.
Must be taken concurrently with SOCWK 571 or by instructor permission.

Typically Offered
Fall, Spring

SOCWK 562 - Field Experience

Credits: 1-10

Supervised field experience in community agencies and programs as a practical application of social work knowledge and skills gained from major course work. Emphasis on direct work with clients, whether individuals,

groups, or communities. Seminars make use of student's experiences to analyze social work theory and practice.

Note
Social work majors only.

Repeat for Credit
Y

Requisites
Prerequisite: SOCWK 550 and SOCWK 561; senior standing; permission of the instructor.
Social work majors only

Typically Offered
Fall, Spring, Summer

SOCWK 563 - The Practice of Social Work in Rural Areas

Credits: 3

A review of characteristics and social problems of rural areas. The development of practice competency in social work roles and skills necessary for rural practice.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 560.

Typically Offered
On sufficient demand

SOCWK 564 - Social Work Professional Seminar

Credits: 1-2

A review of various theories in the behavioral sciences which influence the practice of social work. Primary focus of the course is on the use of these theories in implementing change in various client systems.

Note
Social work majors only.

Repeat for Credit
Y

Requisites
Prerequisite: To be taken concurrent with SOCWK 562.

Typically Offered
Spring, Summer

SOCWK 565 - Social Policy

Credits: 3

Examination of policies and programs developed to cope with various social problems. Emphasis will be placed on analysis of existing programs and policies and the formulation of alternative policies. Attention will be given to policy change through organizational and legislative action.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 510; one course in each of the following areas: sociology, economics, and political science; and one course in social science research methods.

Typically Offered
Fall, Spring

Cross-listed
SOCIO 565

K-State 8
Ethical Reasoning and Responsibility
Social Sciences

SOCWK 568 - Macro Practice and Theory

Credits: 3

Continuation of social work practice sequence with focus on skills development for macro-level social work practice and an understanding of macro-systems using the ecological perspective as a framework. Community and organization intervention strategies with emphasis on the development of a social work frame of reference. Focus on institutional racism, institutional discrimination, and the importance of recognizing these functions within society.

Note
Social work majors only.

Repeat for Credit
N

Requisites

Co-requisite: SOCWK 560 or instructor permission.
Social work majors only

Typically Offered
Fall, Spring

SOCWK 570 - Social Work with Groups

Credits: 3

Theoretical framework for effective generalist social work practice with groups, facilitates the development of group leaders who possess an understanding of group dynamics and effective leadership skills through group discussion, experiential exercises and leadership experiences. To be taken concurrently with SOCWK 561.

Note
Social work majors only.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 560 or instructor permission.
Co-requisite: SOCWK 561.
Social work majors only.

Typically Offered
Fall, Spring

SOCWK 610 - Topics in Social Work

Credits: 1-3

Supervised independent study projects.

Repeat for Credit
Y

Requisites
Prerequisite: SOCWK 100 plus 6 hours of behavioral science foundation courses and consent of instructor.

Typically Offered
Other

SOCWK 611 - Social Welfare as a Social Institution

Credits: 3

Examines policies and programs to address social problems and their impact on individuals. Explores values and beliefs underlying social welfare policy and history of social welfare policy in the United States. Identifies strengths and weaknesses of current government interventions, with special emphasis on policies to promote social and economic justice in the United States and abroad. Reviews ways to conduct effective social welfare policy analysis and interventions.

Repeat for Credit
N

Typically Offered
Spring

SOCWK 612 - Fundamentals of Communication for the Agriculture and Food Science Community

Credits: 3

This course develops communication skills among the scientific community to improve discourse with lay persons. Fundamentals of active listening as well as techniques to diffuse tense situations are addressed. Students will apply the skills learned to their career field through a final research project.

Repeat for Credit
N

Typically Offered
Fall, Spring

SOCWK 630 - Social Work Research and Evaluation Methods

Credits: 3

This course focuses on applying research skills to engage in the evidence-based practice (EBP) process, a core component of generalist practice. Students will prepare a program evaluation proposal, including formulating a problem statement, EBP development, designing an evaluation plan, and selecting appropriate outcome measures.

Repeat for Credit
Y

Typically Offered
Fall

SOCWK 650 - Assessment and Treatment of Substance Use Disorders

Credits: 3

Comprehensive examination of substance use treatment and rehabilitation includes a thorough examination of the treatment models of addiction, recovery, and relapse.

Repeat for Credit
N

Typically Offered
Fall, Summer

SOCWK 660 - Social Work Practice I

Credits: 3

Development of social work practice skills. The social systems perspective is used to guide the development of a problem-solving methodology with attention to information gathering, assessment, and problem identification. Values clarification and self-awareness are emphasized and the skills needed for intervention, termination and evaluation are introducted.

Repeat for Credit
N

Typically Offered
Fall

SOCWK 661 - Social Work Practice II

Credits: 3

Advanced development of social work practice skills with emphasis on skill development in intervention techniques, and practice evaluation from a social systems perspective. A variety of intervention strategies and techniques is presented with emphasis on the development of a social work frame of reference.

Repeat for Credit
N

Requisites
Prerequisite: SOCWK 660.

Typically Offered
Spring

SOCWK 662 - Field Experience

Credits: 1-10

Supervised field experience in community agencies and programs as a practical application of social work knowledge and skills gained from social work course work. Emphasis on direct work with clients, whether individuals, groups, or communities. Assignments make use of student's experiences to analyze social work theory and practice.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SOCWK 668 - Macro Practice and Theory

Credits: 3

Social work practice with focus on skills development for macro-level social work skills and an understanding of macro-systems using the ecological perspective as a framework. Community and organization intervention strategies with emphasis on the development of a social work frame of reference. Focus on institutional racism, institutional discrimination, and the importance of recognizing these functions within society.

Repeat for Credit
N

Typically Offered
Fall

SOCWK 670 - Social Work with Groups

Credits: 3

Provides the theoretical framework for effective generalist social work practice with groups, facilitates the development of group leaders who possess an understanding of group dynamics and effective leadership skills through group discussion, experiential exercises and leadership experiences.

Repeat for Credit
N

Typically Offered
Spring

Credits: 0

Orientation for Summer School Abroad Program in Zacatecas/Cuernavaca, Mexico

Repeat for Credit
Y

Typically Offered
On sufficient demand

SPAN 101 - Spanish I

Credits: 4

Designed for students with no prior Spanish experience. Develops basic language skills and cultural awareness to function in everyday situations in Spanish-speaking communities. Conducted in Spanish with practice in speaking, listening, reading, and writing.

Note
Heritage speakers of Spanish see SPAN 302 or 411 and/or contact spanishcoordination@ksu.edu for placement.

Repeat for Credit
N

Requisites
Recommended Prerequisite: Less than 1-year previous Spanish study, and/or contact spanishcoordination@ksu.edu for placement.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 102 - Spanish II

Credits: 4

Continuation of Spanish 1. Develops basic language skills and cultural awareness to function in everyday situations in Spanish-speaking communities. Conducted in Spanish with practice in speaking, listening, reading, and writing.

Note
Heritage speakers of Spanish see SPAN 302 or 411 and/or contact spanishcoordination@ksu.edu for placement.

Repeat for Credit
N

Requisites
Recommended Prerequisite: SPAN 101, 1-2 years high school, and/or contact spanishcoordination@ksu.edu for placement.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 110 - Conversational Spanish for the Workplace

Credits: 3

Introduction to the basic Spanish conversational skills focusing on everyday language used in the workplace with an emphasis on technical terms and concepts, supplemented with grammar and writing.

Repeat for Credit
N

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

SPAN 201 - Spanish III

Credits: 3

Enhances skills in reading and analysis to develop intermediate proficiency in Spanish. Grammatical structures presented in context through literary and informational texts, media, to promote cultural awareness. Conducted in Spanish.

Note
This course applies toward major or minor requirements. Heritage speakers of Spanish see SPAN 302 or SPAN 411, and/or contact spanishcoordination@ksu.edu for placement

Repeat for Credit
N

Requisites
Recommended Prerequisite: SPAN 102, 3-4 years high school, and/or contact spanishcoordination@ksu.edu for placement.

Typically Offered
Fall, Spring, Summer

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 301 - Spanish IV

Credits: 3

Bridges to more advanced language, culture, and literature courses. Grammatical structures studied in context through literary and informational materials. Conducted in Spanish. Practice in researching and presenting the history and cultures of Spanish-speaking countries.

Note
This course applies toward major or minor requirements. Heritage speakers of Spanish see SPAN 302 or SPAN 411, and/or contact spanishcoordination@ksu.edu for placement

Repeat for Credit
N

Requisites
Recommended Prerequisite: SPAN 201, 4-5 years high school or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 302 - Spanish IV for Heritage Speakers

Credits: 3

Designed for individuals who have been exposed to Spanish from an early age at home. Promotes awareness of linguistic variation in Spanish; exposes students to an academic register; develops basic literary skills, such as spelling and lexicon, so that learners can effectively engage in scholarly contexts and endeavors.

Note
This course is equivalent to SPAN 301, and applies toward major or minor requirements.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Human Diversity within the U.S.

SPAN 398 - Intermediate Studies in Spanish

Credits: 1-18

Offered only to participants in study abroad programs. Prior consultation for approval is expected.

Repeat for Credit
Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 410 - Spanish Communication through Pop Culture

Credits: 3

Improve spontaneous conversation in Spanish through impromptu discussions, word games, partner conversations and more. Improve our writing skills through creative writing prompts, peer-review and writing workshops. Activate language absorption through authentic input by listening to music, watching documentaries, tv shows and films, and reading short stories and graphic novels in Spanish.

Repeat for Credit
N

Requisites
Recommended: SPAN 301 or SPAN 302 or equivalent.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 411 - Spanish for heritage speakers: Composition and grammar

Credits: 3

Course for heritage speakers of Spanish to improve reading and writing skills, including grammar, and develop a professional and academic knowledge of the language.

Repeat for Credit
N

Requisites
Prerequisite: Recommended SPAN 302.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

SPAN 420 - Spanish Conversation

Credits: 3

Intensive practice in conversation to develop listening and speaking skills, expand vocabulary, and review grammatical structures.

Note
May be taken with SPAN 410. Course designed for students whose primary language is not Spanish or whose competence has been demonstrated in the language at this level.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 301 or equivalent.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 421 - Listening Skills

Credits: 3

Develops aural comprehension skills for communicative situations with focus on Spanish phonetics and interpretation of oral texts within the corresponding cultural context.

Note
Not open to native speakers of Spanish.

Repeat for Credit
N

Requisites
Prerequisites: SPAN 410 or equivalent.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives

SPAN 530 - Professional Spanish: Business

Credits: 3

Develops culturally relevant communication skills in business and professional contexts. Specialized content and vocabulary including professional writing, such as employment materials.

Repeat for Credit

N

Requisites
Prerequisite: SPAN 410 or SPAN 411.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives

SPAN 531 - Professional Spanish: Health and Human Services

Credits: 3

Develops culturally relevant communication skills in health and human services contexts (including social work, kinesiology, dietetics, education). Specialized content and vocabulary, community-based learning, and experience in professional writing.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 410 or SPAN 411.

Typically Offered
Fall

K-State 8
Global Issues and Perspectives
Ethical Reasoning and Responsibility

SPAN 550 - Introduction to Hispanic Readings and Media

Credits: 3

Communication, critical thinking, and analytical skills applied to Spanish-language literary texts, film, and art. Skill development through conversation, presentations, papers, and creative projects.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 410 or SPAN 411.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 551 - Hispanic Readings and Media for Heritage Language Learners

Credits: 3

Spanish literary introductory course for students who have acquired Spanish at home at an early age. A wide variety of literary productions and modalities are explored (e.g., songs, poems, fiction, and films). Special emphasis is placed on 1) identity-related discussions and 2) the sharing of cultural experiences to facilitate the co—construction of knowledge and the creation of a community.

Repeat for Credit
N

Requisites
Recommended Prerequisite: SPAN 411

Typically Offered
Fall or Spring

SPAN 560 - Cultures of the Spanish-speaking World: U.S. Latinx

Credits: 3

Explores the development of literature and other media representing Latinx experiences in the United States since the Mexican-American War.

Note
Taught in Spanish, may include some texts in English.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 410 or SPAN 411.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

SPAN 565 - Cultures of the Spanish-speaking World: Spain

Credits: 3

Develops critical understanding of the historical, political, and social forces that have shaped Spanish literature and culture through interdisciplinary focus on a topic (e.g. cities, music, sport).

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

SPAN 566 - Cultures of the Spanish-speaking World: Spanish America

Credits: 3

Develops critical understanding of the historical, political, and social forces that have shaped Spanish-America through interdisciplinary focus on a region or topic (e.g. food identity, journeys, revolutions).

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550.

Typically Offered
Spring

K-State 8
Global Issues and Perspectives
Historical Perspectives

SPAN 567 - Cultures of the Spanish-speaking World: Transatlantic

Credits: 3

Develops critical understanding of the historical, political, social forces that have connected Spanish and Spanish American literatures and cultures over time through interdisciplinary focus on a topic (e.g., conflict, exploration, social class).

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and SPAN 565.

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives
Historical Perspectives

SPAN 568 - Literature of Spanish America

Credits: 3

Analysis of representative works of Spanish American literature from the pre-Columbian period to the present. Develops an understanding of historical and cultural context within the framework of Spanish American literary criticism.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and SPAN 566.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Historical Perspectives

SPAN 569 - Special Studies in Spanish

Credits: 1-18

Special Studies in Spanish

Note
Consent of department head and instructor involved.

Repeat for Credit
Y

Typically Offered
Other

SPAN 575 - Introduction to Spanish Translation

Credits: 3

Introduction to concepts of translation, including aspects of history, theory, and professional ethics. Practice in bi-directional translation [Spanish-English-Spanish] of a variety of texts in different genres including literature.

Repeat for Credit
N

Requisites
Prerequisite: Minimum of 3 credit hours at the 500 level or instructor permission.

Typically Offered
On sufficient demand

K-State 8
Global Issues and Perspectives

SPAN 580 - Introduction to Spanish Linguistics

Credits: 3

Introduction to the fundamentals of linguistic analysis, including the sound system, word and sentence formation, and semantic and pragmatic meaning. Formal and usage-based perspectives. Application of linguistics to language acquisition theory and to pedagogy.

Note
Taught in Spanish.

Repeat for Credit
N

Requisites
Prerequisite: Minimum of 3 hours at the 500 level or instructor permission.

Typically Offered
Fall, Spring

K-State 8
Global Issues and Perspectives
Social Sciences

SPAN 670 - Advanced Spanish Grammar

Credits: 3

Intensive study of the structures of the Spanish Language for communicative and pedagogical purposes. Comparison/contrast to English structures.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 410 or equivalent.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SPAN 730 - Medieval Spanish Literature

Credits: 3

Texts and contexts in Medieval Spain, from *jarchas* to *La Celestina*. Focus on the roles of ideologies, schools and genres. Incorporates manuscripts and oral traditions. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 567 or SPAN 568. SPAN 565 recommended.

Typically Offered
Fall, Spring

SPAN 731 - Early Modern Literature of Spain

Credits: 3

Contextualized discussion and analysis of literature and cultural life in 15th-17th-century Spain. Course may be focused on a theme, genre, or writer (such as Miguel de Cervantes).

Note
Note: Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 732 - Cervantes

Credits: 3

Reading and discussion of the works of Cervantes and of his literary and cultural background.

Note
Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 567 or SPAN 568. SPAN 565 recommended.

Typically Offered
Fall, Spring

SPAN 734 - 18th - and 19th - Century Spain

Credits: 3

Contextualized discussion and analysis of literature and cultural life in 18th-19th-century Spain. Course may be focused on a theme, genre, or movement (Enlightenment, Romanticism, Realism, Naturalism). Topics may include anticlericalism and Catholicism; revolution and empire; scientific reasoning.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 735 - 20th- and 21st-Century Spain

Credits: 3

Contextualized discussion and analysis of contemporary Spanish literature and cultural life. Course may be focused on a theme or genre (e.g., the Generation of '27, the Spanish Civil War, the Franco dictatorship and transition to democracy, feminism, or immigration).

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 736 - Spanish Poetry

Credits: 3

Texts and contexts of poetry in Spain from the *jarchas* of the early Middle Ages through the 21st Century.

Note
Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 567 or SPAN 568. SPAN 565 recommended.

Typically Offered
Other

SPAN 750 - Spanish American Narrative

Credits: 3

Contextualized discussion and analysis of literary and cultural narratives over time, focused on a theme or

region. Topics may include cultural encounters, illness and disability, ecology, modernity.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 751 - Spanish-American Narrative: Early Twentieth Century

Credits: 3

Contextualized discussion and analysis of early twentieth-century narrative literature. Includes *modernismo*, the Avant-Garde, and *criollismo/la novela de la tierra.*

Note
Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 567 or SPAN 568. SPAN 565 recommended.

Typically Offered
Fall, Spring

SPAN 752 - Spanish American Topics

Credits: 3

Interdisciplinary exploration of a Spanish American political, social, or cultural issue over time. Examples: memory and testimonio, utopia and dystopia, gender and sexuality. Includes literary readings and media.

Repeat for Credit
Y

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 755 - Spanish American Performance Studies

Credits: 3

Contextualized interdisciplinary approach to performance studies in Spanish America. Discussion and analysis of plays and other performative events (political protests, rituals, installations). May focus on a time period, region, or theme.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 757 - Spanish-American Poetry

Credits: 3

Contextualized discussion of Spanish American poetry over time, focused on a theme or region. Examples: musicality and song lyrics, places and journeys, voice and identity, innovation.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and additional 6 hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 760 - U.S. Latinx Literature and Culture in Spanish

Credits: 3

Examines the border as a metaphorical concept in Latinx literature and culture. Analysis of literary texts and media that explore intersecting identities, languages, and counter-traditions that shape the Latinx cultural legacy in the U.S.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 550 and 6 additional hours at the 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 768 - Hispanic Cinema

Credits: 3

Critical analysis of films representing a selected region, period, or theme, within their theoretical, cultural, socio-political and historic contexts.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
Y

Requisites
Prerequisite: SPAN 550 and 6 additional hours at 500-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 771 - Advanced Spanish Translation

Credits: 3

Analysis and practice in bi-directional translation [Spanish-English-Spanish] of a variety of texts from a number of genres, including literary texts. Discussion of professional opportunities for translators and interpreters. Development of personal portfolio.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 575 or senior level.

Typically Offered
Spring, Summer

SPAN 772 - Spain Today

Credits: 3

Explores key issues of contemporary Spain including the legacy of the Spanish Civil War. Interdisciplinary focus on a topic, such as regional tensions, economics, politics. Representative literary texts and media serve as a basis for developing a critical view of the region.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: Minimum of 3 hours at the 700-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 773 - Spanish America Today

Credits: 3

Focus on the most significant cultural, social, political, ecological and economic issues affecting Spanish America in recent years. Representative literary texts and media serve as a basis for developing a critical view of the region.

Note
Develops ability to interpret and craft complex, abstract language. Reading- and writing-intensive class.

Repeat for Credit
N

Requisites

Prerequisite: Minimum of 3 hours at the 700-level or instructor permission.

Typically Offered
On sufficient demand

SPAN 774 - Topics in Spanish Translation/Interpreting

Credits: 3

Theory, strategies, terminology, and practice in a designated field in Spanish<>English translation and/or interpreting (fields: healthcare, literary translation, legal, technical and scientific community interpreting).

Repeat for Credit
Y

Requisites
Prerequisite: SPAN 575 or SPAN 771.

Typically Offered
Other

SPAN 776 - History of the Spanish Language

Credits: 3

The development of Spanish from Latin to its present-day variation in the Spanish-speaking world. Influence of and interaction with world cultures and languages across time.

Note
Reading- and writing-intensive class.

Repeat for Credit
N

Requisites
Prerequisite: SPAN 565 or SPAN 566 or SPAN 567 or SPAN 568.

Typically Offered
Spring

SPAN 777 - Hispanic Cultures and Literatures: Teaching Strategies

Credits: 3

An integrated teaching program that develops linguistic, cultural and literary skills through the analysis and interpretation of texts from Spain and Spanish-America. Emphasis on student-centered cooperative and collaborative learning. Reading- and writing-intensive class.

Repeat for Credit
Y

Requisites
Prerequisite: SPAN 565 or SPAN 566 or SPAN 567 or SPAN 568.

Typically Offered
Fall, Spring

SPAN 779 - Selected Topics in Spanish

Credits: 3

In depth exploration of a special cultural, linguistic and/or literary subject. Reading- and writing-intensive class.

Repeat for Credit
Y

Requisites
Prerequisite: SPAN 565 or SPAN 566 or SPAN 567 or SPAN 568.

Typically Offered
Fall, Spring, Summer

SPAN 780 - Spanish in the US

Credits: 3

Surveys sociolinguistic features, socio-historical events, and matters pertaining to identity as key elements that shape a growingly popular linguistic variety despite its continuous stigmatization: Spanish in the US.

Repeat for Credit
N

Requisites
Prerequisites: Two 500-level SPAN courses (SPAN 580 preferred), instructor permission or Modern Language graduate student status.

Typically Offered
Fall or Spring

SPAN 799 - Research Topics in Spanish

Credits: 1-18

A seminar with variable topics.

Repeat for Credit
Y

Typically Offered
Other

SPAN 898 - Master's Report

Credits: 1-2

A written report of either research or problem work on a topic in the major field.

Note
Consult of major professor.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

SPAN 899 - Research in Modern Languages

Credits: 1-18

Research in Modern Languages

Repeat for Credit
Y

Typically Offered
Other

SSO 735 - Electron Microscopy of Aerospace Materials

Credits: 3

This course introduces students to the theory, fundamental operating principles, specimen preparation techniques, and chemical analysis utilizing scanning electron microscopy (SEM). Additionally, this course will emphasize these principles and techniques for characterizing the structure of aerospace materials at different length scales.

Repeat for Credit
N

Typically Offered
Fall, Spring

SSO 736 - Aerospace Metallurgy and Ceramics

Credits: 3

The science of metallurgy and ceramics and their manufacture will be the basis of this course and is aimed at providing the necessary fundamentals for understanding aerospace materials.

Repeat for Credit
N

Typically Offered
Fall, Spring

SSO 738 - Advanced Composite Materials

Credits: 3

The fundamentals of polymer-, metal-, and ceramic-matrix composites will be taught in this course and will be applied to solving a variety of aerospace problems.

Repeat for Credit
N

Typically Offered
Fall, Spring

SSO 739 - Space Systems Design and Dynamics

Credits: 3

This course focuses on introducing students to the analysis, architecture, and design of spacecraft including the analysis of orbit and attitude control, navigation systems, physical structures, propulsion systems, communication systems, thermal and electrical power systems. Similarities between spacecraft will be covered in detail and systems aspects of mission profiles will be discussed and analyzed.

Repeat for Credit
N

Typically Offered
Fall

SSO 740 - Space Systems Modeling, Simulation, and Control

Credits: 3

The course will introduce students to space mission modeling, simulation and control with an emphasis on space missions supporting civil and commercial operations. Topics include orbital mechanics, communications, space environment, spacecraft technology, civil/commercial space systems, model-based systems engineering concepts applied to physical systems, agent-based modeling and discrete event simulation of space systems. Systems dynamics modeling will be applied to physical space systems operating in various microgravity environments.

Repeat for Credit
N

Typically Offered
Fall

SSO 742 - Manufacturing and Materials in Space and on Earth

Credits: 3

The course will introduce the student to the world of manufacturing on Earth and in space. The course content includes the history of manufacturing in space, manufacturing spacecraft on Earth (spacecraft, telescopes, satellites, rovers, etc.), manufacturing standards, additive manufacturing, manufacturing construction in space, materials science aboard the International Space Station, challenges of manufacturing in space, circular economics and sustainability and planetary mining, materials and manufacturing.

Repeat for Credit
N

Typically Offered
Spring

SSO 801 - Space Operations and Environment

Credits: 3

Concentrates on the commercial and military use of space operations. Space operations have two goals: exploration and commercialization of space to benefit humanity as well as space warfare and conflict to defend earth resources and space resources.

Repeat for Credit
N

Typically Offered
Spring

STAT 100 - Statistical Literacy in the Age of Information

Credits: 3

Focus will be on the development of an awareness of statistics at the conceptual and interpretative level, in the context of everyday life. Data awareness and quality, sampling, scientific investigation, decision making, and the study of relationships are included. Emphasis will be on the development of critical thinking through in-class experiments and activities, discussions, analysis of real data sets, written reports, and collaborative learning. Computing activities will be included where appropriate; no previous computing experience required.

Intended for majors in non-quantitative fields.

Note
Cannot be taken for credit if credit has been received for any other statistics course.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

STAT 150 - Statistics and Data Science: Introductory Seminar for Majors

Credits: 1

An introduction to the field of statistics and data science. Topics of special interest to undergraduates majoring in statistics and data sciences, including cultural and professional aspects of the field and exploration of careers available to those trained in statistics and data science.

Repeat for Credit
N

Typically Offered
Fall, Spring

STAT 225 - Introduction to Statistics

Credits: 3

A first course in probability and statistics; random sampling; graphical and numeric summaries of qualitative and quantitative data; correlation and least squares regression; probability and random variables; the normal distribution, sampling distributions and the Central Limit Theorem; confidence intervals for one mean and one proportion; sample size estimation; hypothesis tests for one parameter, power and type I and II errors; statistical inference for the difference of two means based on independent samples and matched pairs designs; statistical inference for the difference of two population proportions.

Note
Cannot be taken for credit if credit has been received for STAT 240 or 250.

Repeat for Credit
N

Requisites
Students not meeting at least one of the KBOR placement measures below are required to also take STAT 226, which is a 2-credit corequisite support class.
Placement measures: A test score equal to or greater than, Math ACT 19 OR Math SAT 510 OR ALEKS PPL 30 OR Accuplacer QAS 255; OR (unweighted HS GPA 3.00 AND grade of C- or better in Algebra 2 or Integrated Math 3); OR MATH 100.

Typically Offered
Fall, Spring, Summer

K-State Core
3 Math and Statistics

K-State 8
Empirical and Quantitative Reasoning

STAT 226 - Introduction to Statistics Support

Credits: 2

Note: Introduction to Statistics Support credits cannot count towards the 120 required credits of a degree program. Students who do not meet any of the KBOR multiple placement measures for elementary statistics must also enroll in STAT 226 as the corequisite course to STAT 225.

Introduction to Statistics Support is the corequisite course for STAT 225 -Introduction to Statistics. STAT 226 aims to fill in gaps in students' background knowledge to promote success in STAT 225. The content of STAT 226 is directly aligned with the course objectives and content of STAT 225 but allows for flexibility to fit individual student needs. Topics vary based on student needs but can include simplifying and manipulating numerical and algebraic expressions; and reviewing functions, plots, graphs of functions, exponents, logarithms, and set theory. Students must enroll concurrently in STAT 225 and STAT 226.

This course was designed through a Kansas Board of Regents Math Pathways initiative. STAT 226 is the KBOR math pathways corequisite course for the Introduction to Statistics course.

Repeat for Credit
N

Requisites
Corequisite: STAT 225

Typically Offered
Fall, Spring

STAT 240 - Biometrics I

Credits: 3

A basic first course in probability and statistics with textbook, examples, and problems aimed toward the biological sciences. Frequency distributions, averages, measures of variation, probability, confidence intervals; tests of significance appropriate to binomial, multinomial, Poisson, and normal sampling; simple regression and correlation.

Note
Cannot be taken for credit if credit has been received for STAT 225 or 250.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

K-State 8
Empirical and Quantitative Reasoning

STAT 250 - Business and Economic Statistics I

Credits: 3

A basic first course in probability and statistics with textbook, examples, and problems pointed toward business administration and economics. Frequency distributions, averages, index numbers, time series, measures of variation, probability, confidence intervals, tests of significance appropriate to binomial, multinomial, Poisson, and normal sampling; simple regression and correlation.

Note
Cannot be taken for credit if credit has been received for STAT 225 or 240.

Repeat for Credit
N

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

STAT 341 - Biometrics II

Credits: 3

Analysis and interpretation of biological data using analysis of variance, analysis of covariance, and multiple regression. Negative binomial distribution and its applications.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225 or STAT 240 or STAT 250.

Typically Offered
Spring

STAT 351 - Business and Economic Statistics II

Credits: 3

Continuation of STAT 250 including study of index numbers, time series, business cycles, seasonal variation, multiple regression and correlation, forecasting; some nonparametric methods applicable in business and economic studies.

Repeat for Credit
N

Requisites
Prerequisite: STAT 225, STAT 240 or STAT 250.

Typically Offered
Fall, Spring, Summer

STAT 410 - Probabilistic Systems Modeling

Credits: 3

Descriptive statistics and graphical methods; basic probability; probability distributions; several random variable; Poisson processes; computer simulation of random phenomena; confidence interval estimation; hypothesis testing.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221 and CIS 300.

Typically Offered
Spring

STAT 450 - Special Topics for Undergraduates in Statistics and Data Science

Credits: 1-3

Study of special topics in statistics and data science methods for undergraduates.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STAT 490 - Statistics for Engineers

Credits: 1

First course in statistics with examples and problems toward engineering. Distributions, means, measures of variation, confidence intervals, graphical display of data, simple regression and correlation, philosophy of experimentation.

Note
Must be taken concurrent with a laboratory course in engineering which uses statistics.

Repeat for Credit
N

Typically Offered
Fall, Spring

STAT 491 - Statistics for Engineers II

Credits: 1

A continuation of STAT 490. Offered second half of the semester following STAT 490. Statistical tests, multiple regression, model fitting, simple comparative and factorial experiments. Emphasis on computer analysis of data.

Repeat for Credit
N

Requisites
Prerequisite: STAT 490.

Typically Offered
Fall, Spring

STAT 499 - Honors Project

Credits: 3

Open only to Arts and Science students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

STAT 510 - Introductory Probability and Statistics I

Credits: 3

Descriptive statistics, probability concepts and laws, sample spaces; random variables; binomial, uniform, normal, and Poisson; two-dimensional variates; expected values; confidence intervals; binomial parameter, median, mean, and variance; testing simple hypotheses using CIs and X^2; goodness of fit. Numerous applications.

Repeat for Credit
N

Requisites
Prerequisite: MATH 221.

Typically Offered
Fall, Spring

K-State 8
Empirical and Quantitative Reasoning

STAT 511 - Introductory Probability and Statistics II

Credits: 3

Law of Large Numbers, Chebycheff's Inequality; continuation of study of continuous variates; uniform, exponential, gamma, and beta distribution; Central Limit Theorem; distributions from normal sampling; introduction to statistical inference.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510.

Typically Offered
Spring

K-State 8
Empirical and Quantitative Reasoning

STAT 610 - Introduction to Mathematical Statistics I

Credits: 3

Development of axiomatic probability; univariate and multivariate random variables and their probability distribution functions; conditional distributions and independent random variables; methods of transformation

for distributions of functions of random variables; convergence in distribution and probability.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222.

Typically Offered
Fall

STAT 611 - Introduction to Mathematical Statistics II

Credits: 3

Estimation of probability distribution parameters by maximum likelihood, Bayesian and bootstrap methods; minimum variance unbiased estimation based on sufficient statistics; mean squared error and consistency of estimators; confidence interval estimation; statistical tests of hypotheses by likelihood ratios; most powerful tests; distribution-free inference; applications to regression models and categorical data.

Repeat for Credit
N

Requisites
Prerequisite: STAT 610.

Typically Offered
Spring

STAT 701 - Fundamental Methods of Biostatistics

Credits: 3

A course emphasizing concepts and practice of statistical data analysis for the health sciences. Basic techniques of descriptive and inferential statistical methods applied to health related surveys and designed experiments. Populations and samples, parameters and statistics; sampling distributions for hypothesis testing and confidence intervals for means and proportions involving one sample, paired samples and multiple independent samples; odds ratios, risk ratios, simple linear regression. Use of statistical software to facilitate the collection, manipulation, analysis and interpretation of health related data.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

Cross-listed
MPH 701

STAT 703 - Introduction to Statistical Methods for the Sciences

Credits: 3

Statistical concepts and methods applied to experimental and survey research in the sciences; tests of hypotheses, parametric and rank tests; point estimation and confidence intervals; linear regression; correlation; one-way analysis of variance; contingency tables, chi-square tests.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing and equivalent of college algebra.

Typically Offered
Fall, Spring, Summer

STAT 705 - Regression and Analysis of Variance

Credits: 3

Simple and multiple linear regression, analysis of covariance, correlation analysis, one-, two- and three-way analysis of variance; multiple comparisons; applications including use of computers; blocking and random effects.

Repeat for Credit
N

Requisites
Prerequisite: One previous statistics course.

Typically Offered
Fall, Spring, Summer

STAT 706 - Basic Elements of Statistical Theory

Credits: 3

The mathematical representation of frequency distributions, their properties, and the theory of estimation and hypothesis testing. Elementary mathematical functions are used to illustrate theory.

Repeat for Credit
N

Requisites
Prerequisite: MATH 205, MATH 210 or MATH 220 and STAT 225 or equivalent.

Typically Offered
Fall

STAT 710 - Sample Survey Methods

Credits: 3

Design, conduct, and interpretation of sample surveys.

Repeat for Credit
N

Requisites
Prerequisite: STAT 510 or STAT 770.

Typically Offered
Fall-Even Years

STAT 713 - Applied Linear Statistical Models

Credits: 3

Matrix-based, applied linear regression procedures at a mathematical level appropriate for a first-year graduate statistics major. Topics include basic methodological development for simple and multiple linear regression, model building and diagnostics, analysis of variance/covariance and multiple comparison methods. Other topics from ANOVA modeling may also be covered if time permits.

Note
A student may not receive graduate credit for both STAT 705 and STAT 713.

Repeat for Credit
N

Requisites
Prerequisite: MATH 515/551 or an equivalent course and one prior course in statistics.

Typically Offered
Fall

STAT 716 - Nonparametric Statistics

Credits: 3

Hypothesis testing when form of population sampled is unknown: rank, sign, chi-square, and slippage tests; Kolmogorov and Smirnov type tests; confidence intervals and bands.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 713.

Typically Offered
Fall-Odd Years

STAT 717 - Categorical Data Analysis

Credits: 3

Analysis of categorical count and proportion data. Topics include tests of association in two-way tables; measures of association; Cochran-Mantel-Haenzel tests for 3-way tables; generalized linear models; logistic regression; loglinear models.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 713.

Typically Offered
Spring

STAT 720 - Design of Experiments

Credits: 3

Planning experiments so as to minimize error variance and avoid bias; Latin squares; split-plot designs; switch-back or reversal designs; incomplete block designs; efficiency.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 713.

Typically Offered
Spring, Summer

STAT 722 - Experimental Designs for Product Development and Quality Improvement

Credits: 3

A study of statistically designed experiments which have proven useful in product development and process improvement. Topics include randomization, blocking, factorial treatment structures, factional factorial designs, screening designs, and response surface methods.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 511 or STAT 713.

Typically Offered
Fall

STAT 725 - Introduction to the SAS Computing

Credits: 1

Topics may include basic environment and syntax, reading and importing data from files, writing and exporting data to files, data manipulation, basic graphics, and built-in and user-defined functions.

Repeat for Credit
N

Requisites
Prerequisite: One prior course in Statistics.

Typically Offered
Fall

STAT 726 - Introduction to R Computing

Credits: 1

Topics may include basic environment and syntax, reading and importing data from files, data manipulation, basic graphics, and built-in and user-defined functions.

Repeat for Credit
N

Requisites
Prerequisite: One prior level course in Statistics.

Typically Offered
Fall

STAT 727 - Statistical Computing/Numerical Methods of Statistics

Credits: 3

Topics may include efficient programming techniques, generating data from non-standard distributions, designing simulation studies, resampling methods, creating and using functions and subroutines, parallel computing in statistics, interfacing lower-level languages (e.g., C, C++, Fortran) with data analysis software (e.g., SAS, R), computational complexity, convergence analysis of algorithms.

Repeat for Credit
N

Requisites
Prerequisite: STAT 726 and STAT 771 or STAT 511.

Typically Offered
Spring

STAT 730 - Multivariate Statistical Methods

Credits: 3

Multivariate analysis of variance and covariance; classification and discrimination; principal components and introductory factor analysis; canonical correlation; digital computing procedures applied to data from natural and social sciences.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 713.

Typically Offered
Spring

STAT 736 - Bioassay

Credits: 2

Direct assays; quantitative dose-response models; parallel line assays; slope ratio assays; experimental designs for bioassay; covariance adjustment; weighted estimates; assays based on quantal responses.

Note
Meets four times a week during second half of semester.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or STAT 713.

Typically Offered
Spring-Odd Years

STAT 745 - Statistical Graphics

Credits: 3

Visual display of quantitative information. Statistical graphics topics to include visual perception, basic graphics construction, quantitative univariate to multivariate statistical graphics, trellis displays, introduction to smoothing and graphics, introduction to density estimation and graphics, and categorical graphics. Modern graphics software will be used.

Repeat for Credit
N

Requisites
Prerequisite: STAT 705 or equivalent.

Typically Offered
Spring-Even Years

STAT 750 - Studies in Probability and Statistics

Credits: 1-4

Studies of topics in probability, statistics, experimental design, stochastic processes, or other topics.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
On sufficient demand

STAT 760 - Optimization for Data Science

Credits: 3

The class presents the theory and algorithms for linear and nonlinear optimization problems with continuous variables. Topics covered include convex analysis, first- and second-order optimality methods, duality, KKT conditions, algorithms for unconstrained optimization, linearly and nonlinearly constrained problems, and convergence rates of algorithms. The theory and algorithms are applied to data science problems arising in machine learning, statistics, and related fields (e.g., maximizing likelihood and penalized likelihood functions, MM algorithms, EM algorithms, model selection, Sparse PCA). Students are expected to be comfortable with rigorous mathematical arguments.

Repeat for Credit
N

Requisites
Prerequisite: STAT 511 or STAT 771, and prior knowledge of linear algebra and matrix theory e.g., MATH 551, and some programming knowledge e.g., STAT 726.

Typically Offered
Spring-Even Years

STAT 761 - Discrete Optimization and Scalability for Data Science

Credits: 3

Topics covered include computational complexity, NP-hardness, data as networks, graph theoretic algorithms, exact, approximation, heuristic and online algorithms, and connections between convex and non-convex optimization problems. The theory and algorithms are applied to data science problems arising in statistical machine learning, statistical clustering, design of experiments, observational studies, sampling, and variable selection. Applications may be motivated using data from social networks, search engines, the stock market and elections.

Repeat for Credit
N

Requisites
Prerequisites: STAT 705 or STAT 713 and STAT 720 and programming knowledge e.g. STAT 726.

Typically Offered
Spring-Odd Years

STAT 764 - Applied Spatio-Temporal Statistics

Credits: 3

Construction and analysis of spatial, time-series, and spatio-temporal data sets. Topics include data generation using geographic information systems, exploratory data analysis and visualization, and descriptive and dynamic spatio-temporal statistical models. For context, a focus will be on biological or ecological data.

Repeat for Credit
N

Requisites
Prerequisites: STAT 510 or STAT 770, and STAT 705, or STAT 713, and STAT 726 or equivalent.

Typically Offered
Spring-Even Years

STAT 766 - Applied Data Mining/Machine Learning and Predictive Analytics

Credits: 3

Addresses the complete process of building analytical tools suitable for learning from data, including automatic online data collection, feature extraction, supervised and unsupervised statistical machine learning methods, evaluation, and report writing. Automatic retrieval of various format online data, including JSON, REST, and Streaming API, http(s), html, xml, and databases. Statistical text processing/mining, state of the art supervised and unsupervised data mining methods, case studies and applications to business, government,social and news media data. Methods include regularized linear and logistic regression, classification trees, nearest neighbor methods, support vector machines, naive Bayes, random forests, boosting/bagging/AdaBoost, clustering, latent Dirichlet allocation, network analysis, and topic modeling models.

Repeat for Credit
N

Requisites
Prerequisites: STAT 705 or STAT 713 or STAT 717, and prior computer programming proficiency on C, C++, Fortran, R, or Python e.g., CIS 209, STAT 726.

Typically Offered
Fall

STAT 768 - Applied Bayesian Modeling and Prediction

Credits: 3

Bayes rule, principles of Bayesian inference, Bayesian perspective on statistical models, posterior distribution computations using simulations, Markov Chain Monte Carlo (MCMC) (including Gibbs sampling, Metropolis-Hastings algorithm, slice sampler, hybrid forms and alternative algorithms), convergence monitoring and diagnosis, hierarchical models, model checking and model selection, and applications in the sciences using computer software such as R and WinBUGS.

Repeat for Credit
N

Requisites
Prerequisites: STAT 705 or STAT 713, and STAT 510 or STAT 770.

Typically Offered
Spring-Odd Years

STAT 770 - Theory of Statistics I

Credits: 3

Introduction to probability theory, random variables, transformations of random variables, expectations, discrete and continuous distributions, moment generating functions, families of distributions, multivariate random variables, joint and marginal distributions, conditional distributions and independence, sampling distributions of normal populations, order statistics, convergence of random variables, and the central limit theorem.

Repeat for Credit
N

Requisites
Prerequisite: MATH 222.

Typically Offered
Fall

STAT 771 - Theory of Statistics II

Credits: 3

Introduction to the sufficiency principle, the likelihood principle, point estimation, uniformly minimum-variance unbiased estimators, hypothesis testing, uniformly most powerful tests, interval estimation, and asymptotic evaluations of estimators and tests.

Repeat for Credit
N

Requisites
Prerequisite: STAT 770.

Typically Offered
Spring

STAT 799 - Topics in Statistics

Credits: 0-3

Topics in Statistics

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STAT 810 - Seminar in Probability and Statistics

Credits: 1

Discussion and lectures on topics in probability and statistics; one seminar talk by each student registered for credit.

Repeat for Credit
Y

Requisites
Prerequisite: Graduate standing and at least two graduate courses in statistics.

Typically Offered
Fall, Spring

STAT 818 - Theory of Life-Data Analysis

Credits: 3

A study of models and inferential procedures important to life-data analysis. Comparison of estimators (MLE, BLUE, etc.). Pivotal quantities. Design and regression models for non-normal distributions. Analysis of censored data.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 771 and STAT 705 or STAT 713.

Typically Offered
Fall-Even Years

STAT 842 - Probability for Statistical Inference

Credits: 3

Probability spaces and random elements, distributions, generating and characteristic functions, conditional expectation, convergence modes and stochastic orders, continuous mapping theorems, central limit theory and accuracy, laws of large numbers, asymptotic expansions for approximating functions of random variables and distributions.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 770 and STAT 771, or equivalent; MATH 633 or equivalent, or concurrent enrollment in MATH 633.

Typically Offered
Fall

STAT 843 - Statistical Inference

Credits: 3

Distributions (commonly used univariate and multivariate distributions, including exponential families of distributions and properties), order statistics and distributional properties, (asymptotic) unbiased estimation and the

information inequality, likelihood inference for parametric statistical models (including the multi-parameter case, regular and non-regular cases), confidence sets, functional parameters and statistical functional, density estimation and nonparametric function estimation, permutation methods.

Repeat for Credit
N

Requisites
Prerequisite: STAT 842; MATH 634 or equivalent, or concurrent enrollment in MATH 634.

Typically Offered
Spring

STAT 850 - Stochastic Processes

Credits: 3

Normal processes and covariance stationary processes; Poisson processes; renewal counting processes; Markov chains; Brownian motion; applications to science and engineering.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 770.

Typically Offered
Spring-Even Years

STAT 860 - Linear Models I

Credits: 3

Subspaces, projections, and generalized inverses; multivariate normal distribution, distribution of quadratic forms; optimal estimation and hypothesis testing procedures for the general linear model; application to regression models, correlation model.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 713, STAT 771.

Typically Offered
Fall

STAT 861 - Linear Models II

Credits: 3

Continued application of optimal inference procedures for the general linear model to multifactor analysis of variance, experimental design models, analysis of covariance, split-plot models, repeated measures models, mixed models, and variance component models; multiple comparison procedures.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 860.

Typically Offered
Spring

STAT 870 - Analysis of Messy Data

Credits: 3

Design structures; treatment structures; equal and unequal variances; multiple comparisons; unequal subclass numbers; missing cells; interpretation of interaction; variance components; mixed models; split-plot and repeated measures; analysis of covariance; cross-over designs.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 720.

Typically Offered
Fall

STAT 880 - Time Series Analysis

Credits: 3

Autocorrelation function; spectral density; autoregressive integrated moving average processes; seasonal time series; transfer function model; intervention analysis; regression model with time series error.

Repeat for Credit
Y

Requisites

Prerequisite: STAT 713 and STAT 771.

Typically Offered
Fall-Odd Years

STAT 898 - Master's Report

Credits: 2

Master's Report

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STAT 899 - Master's Thesis Research

Credits: 1-18

Master's Thesis Research

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STAT 903 - Statistical Methods for Spatial Data

Credits: 3

Theoretical development of modeling and inference techniques for spatially and/or temporally referenced data, including geostatistical data, lattice data and spatial point patterns; methodology for autocorrelation estimation and prediction; nonstationary spatial processes; asymptotics and computational methods for large spatial datasets; computer-aided applications.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 771, plus one introductory course in statistical computing (e.g. STAT 726 or equivalent background).

Typically Offered
Spring-Odd Years

STAT 904 - Resampling Methods

Credits: 3

Theoretical development of resampling procedures, including parametric and nonparametric bootstrap, jackknife, randomization and permutation methods; expansion theory for bootstrap inference; implementation of resampling procedures via statistical computational tools.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 713, STAT 771.

Typically Offered
Spring-Even Years

STAT 905 - High-Dimensional Data and Statistical Learning

Credits: 3

Theoretical framework of statistical methods for the analysis of large-scale data with the aim of understanding data mining, supervised and unsupervised statistical learning techniques from a statistical decision theoretic framework. Methods for model selection, dimensionality reduction, multiple testing control, and estimation in high-dimension data. Emphasis on the conceptual underpinning of different tools for analysis of large-scale data and how they relate to each other. Applications in various fields, including the sciences and engineering, using computer software.

Repeat for Credit
N

Requisites
Prerequisite: (STAT 713 and STAT 771), or (STAT 727 and STAT 760).

Typically Offered
Fall-Even Years

STAT 907 - Bayesian Statistical Inference

Credits: 3

Principles of Bayesian estimation, testing and prediction; Bayes factors and posterior probabilities of hypotheses; hierarchical modeling; Bayesian model selection and assessment; Bayesian computation and asymptotics; nonparametric Bayesian models.

Repeat for Credit
N

Requisites
Prerequisite: STAT 713 and STAT 771, plus one introductory course in statistical computing (e.g. STAT 725 or STAT 726 or equivalent background).

Typically Offered
Fall-Odd Years

STAT 920 - Experimental Design Theory

Credits: 3

Incomplete block designs; theory of the construction and analysis of experimental designs.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 720 and STAT 861.

Typically Offered
Spring-Odd Years

STAT 930 - Theory of Multivariate Analysis

Credits: 3

The multivariate normal distribution, the Wishart distribution, Jacobians of vector and matrix transformations, Hotelling's T2statistic, the union-intersection principle, tests on mean vectors and covariance matrices, Box's approximations to critical points, the multivariate general linear model, discriminant analysis, and principal component analysis.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 730 and STAT 861.

Typically Offered
Spring-Even Years

STAT 940 - Advanced Statistical Methods

Credits: 3

Generalized linear models and generalized mixed models. Statistical models based on the exponential family of distributions. Applications to non-normal and discrete data, including binary, Poisson and gamma regression, and log-linear models. Topics include likelihood-based estimation and testing, model-fitting, residual analyses, over-dispersed models, quasi-likelihood, large sample properties, and the use of computer packages. Also, methods for longitudinal repeated measures data that will include inference for continuous and discrete data. Inferential objectives include prediction of response and estimation of correlation/covariance structures. Nonparametric and semiparametric methods covered as time permits.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 861, plus one introductory course in statistical computing (e.g. STAT 725 or STAT 726 or equivalent background).

Typically Offered
Fall-Even Years

STAT 941 - Advanced Statistical Inference

Credits: 3

Foundations and methods of modern statistical inference including asymptotic theory in parametric models (including local asymptotic normality and contiguity), efficiency of estimators and tests, Bayes procedures, rank, sign and permutation statistics, U-,M-, L-, R-estimates, chi-square tests, empirical processes and the functional delta method, quantiles and order statistics, inference for nonparametric and semi-parametric models.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 843.

Typically Offered
Spring-Even Years

STAT 945 - Problems in Statistical Consulting

Credits: 1-3

Principles and practices of statistical consulting. Supervised experience in consultation and consequent research concerning applied statistics and probability associated with on-campus investigations.

Repeat for Credit
Y

Requisites
Prerequisite: STAT 720 and instructor consent

Typically Offered
On sufficient demand

STAT 950 - Advanced Studies in Probability and Statistics

Credits: 1-3

Theoretical studies of advanced topics in probability, decision theory, Markov processes, experimental design, stochastic processes, or advanced topics.

Note
Instructor consent

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STAT 999 - Research in Statistics

Credits: 1-18

Research in Statistics

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

STRAN 400 - Transforming Society

Credits: 3

Examines a range of social concepts such as race, ethnicity, indigeneity, gender, sex, sexuality, class, disability, citizenship, nation, coloniality, and global location from the perspective of Social Transformation Studies.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Human Diversity within the U.S.
Ethical Reasoning and Responsibility

STRAN 550 - Practicing Social Justice

Credits: 3

Students apply their classroom learning by engaging in a community-based social justice project. Students will work with an organization, program, or creative movement that engages and supports underrepresented and/or historically marginalized communities.

Repeat for Credit
N

Requisites
Prerequisite: AMETH 160 OR GWSS 105.

Typically Offered
Fall, Spring, Summer

K-State 8
Human Diversity within the U.S.
Social Sciences

STRAN 600 - Pathways to Social Change

Credits: 3

An advanced seminar in which students design and launch a research-based social transformation project on a topic and in a form of their choosing.

Repeat for Credit
N

Requisites
Prerequisite: junior or senior standing.

Typically Offered
Spring

SWAH 101 - Swahili I

Credits: 4

Introduction to Swahili. A foundation in listening, speaking, writing, and reading the basic grammatical structures and vocabulary of Swahili. Aspects of Swahili/African culture will be introduced and highlighted as essential components toward achieving communicative competence.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SWAH 102 - Swahili II

Credits: 4

A continuation of Swahili 101. A foundation in listening, speaking, writing, and reading the basic grammatical structures and vocabulary of Swahili. Aspects of Swahili/African culture will be introduced and highlighted as essential components toward achieving communicative competence.

Repeat for Credit
N

Requisites
Prerequisite: SWAH 101 or equivalent.

Typically Offered
Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SWAH 201 - Swahili III

Credits: 4

Continuation of Swahili II. Further development of functional skills. Intensive practice of spoken and written Swahili.

Repeat for Credit
N

Requisites
Prerequisite: SWAH 102.

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Global Issues and Perspectives

SWAH 202 - Swahili IV

Credits: 4

Continuation of Swahili III. Further development of functional skills. Intensive practice of spoken and written Swahili.

Repeat for Credit
N

Requisites
Prerequisite: SWAH 201.

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8

Aesthetic Interpretation
Global Issues and Perspectives

THTRE 111 - Production Participation

Credits: 1

Provide students with practical experience when working on a theatre production. Students must choose and complete one production assignment to earn 1 credit hour. This course is available for both Theatre majors and non-majors.

Repeat for Credit
Y

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

THTRE 171 - Fundamentals of Acting

Credits: 3

Theory and practice of fundamental skills and techniques of acting. Major emphasis is on freeing and training the individual's imagination, intellect, body, and voice through designed exercise and performed scenes.

Note
Three hours recitation per week.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

THTRE 201 - Drugs and Alcohol in Theatre and Film

Credits: 3

Exploration of alcohol and drug use as depicted on stage and in film.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

THTRE 202 - Taboo! Transgression and Censorship in Theatre and Film

Credits: 3

An examination of the cultural controversies surrounding theatrical and cinematic productions.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

THTRE 203 - Stage to Screen: Theatre into Film

Credits: 3

Explores the adaptation of theatrical works into motion pictures.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

THTRE 205 - Contemporary American Theatre

Credits: 3

Investigation of contemporary American work of dramatic literature and Theatre from the 1990s to the present.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

THTRE 211 - Run Crew

Credits: 0-2

Work on run crew (sets, props, light or sound board) for theatrical production.

Repeat for Credit
Y

Requisites
Prerequisite: concurrently enrolled with THTRE 369.
Corequisite: THTRE 369.

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 212 - Wardrobe Crew

Credits: 1

Work on wardrobe crew for a theatrical production.

Repeat for Credit
N

Requisites
Corequisite: THTRE 368 or may be taken alone.

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 220 - Musical Theatre History

Credits: 3

Surveys the history of musical theatre.

Repeat for Credit
N

Typically Offered
Fall or Spring

K-State Core
6 Arts and Humanities

THTRE 235 - Introduction to the Art of Film

Credits: 3

Survey of Cinema, including history, analysis and the process of production. Will include film screenings outside of regular class meetings.

Repeat for Credit
N

Typically Offered
Spring, Summer

K-State Core
6 Arts and Humanities

THTRE 260 - Stage Movement

Credits: 3

A study of the technique of stage movement and an investigation of the language of gesture.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 263 - Oral Interpretation of Literature

Credits: 3

Techniques of reading from the printed page, selecting portions from various forms of literature, including narrative poetry, essay, lyric, sonnet, nonfictional prose, scenes from plays, and selected short stories.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

THTRE 265 - Fundamentals of Improvisation I, II

Credits: 3

Introduction to the techniques of improvisation with the emphasis upon practical participation.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 268 - Techniques of Makeup

Credits: 1

Techniques of makeup for the stage.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 269 - Fundamentals of Technical Production

Credits: 3

Basic techniques, equipment and materials used in scenery construction and theatrical drafting.

Repeat for Credit
N

Typically Offered
Fall

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 270 - Introduction to Theatre

Credits: 3

A comprehensive introduction to theatre: basic elements of theatre and theatre production, theatre history, dramatic literature, multicultural theatre traditions and perspectives, and the theatre experience.

Repeat for Credit
N

Typically Offered
Other

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Historical Perspectives

THTRE 271 - Intermediate Acting

Credits: 3

Emphasis upon expanding the actor's capabilities through more advanced scene work and character study.

Repeat for Credit
N

Typically Offered

Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation
Ethical Reasoning and Responsibility

THTRE 280 - Script Analysis

Credits: 3

Examination of the play script to develop a common vocabulary and method for analyzing a script.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 299 - Vocal Expression for Actors

Credits: 3

Study and application of vocal techniques for stage productions; emphasis on development of the actor's vocal mechanism.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State Core
6 Arts and Humanities

K-State 8
Aesthetic Interpretation

THTRE 344 - Storytelling

Credits: 2

Techniques of storytelling to people of all ages. History and cultural importance of storytelling. Fictional and personal storytelling will be covered.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

THTRE 364 - Scene Painting

Credits: 3

Practical application of painting techniques for the stage.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

THTRE 366 - Fundamentals of Theatre Management

Credits: 3

Non-profit theatre management, including budgeting, marketing, box office, and development practices, plus examination of relevant history.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Empirical and Quantitative Reasoning

THTRE 369 - Fundamentals of Theatrical Design

Credits: 3

An exploration of the four areas of stage design: sets,

lights, costumes, and sound. Includes examination of relevant history and technology in these areas. Emphasis is on the design process and design development.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

THTRE 475 - Opera Workshop

Credits: 1-6

Principles and techniques of operatic and musical theatre production, with emphasis on class rehearsal and performance of selected scenes from opera and musical drama; brief survey of the history of opera.

Note
Offered jointly by the Department of Communication Studies and School of Music, Theatre and Dance.

Repeat for Credit
N

Typically Offered
Other

Cross-listed
MUSIC 475

K-State 8
Aesthetic Interpretation

THTRE 499 - Honors Project

Credits: 3

Honors Project

Note
Open only to Arts & Sciences students who are active members of the University Honors Program.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

THTRE 503 - Theatre for Young Audiences (TYA) in Production

Credits: 3

Students will gain insight into the philosophies, practicalities, and processes of developing and producing Theatre for Young Audiences (TYA).

Repeat for Credit
Y

Typically Offered
Fall or Spring

THTRE 504 - Stage Combat

Credits: 3

Focuses on specific stage combat disciplines and techniques.

Repeat for Credit
Y

Requisites
Prerequisite: Theatre 261

Typically Offered
Fall or Spring

THTRE 552 - Sound Design

Credits: 3

Introduces the student to the fundamental processes involved in Sound Design.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

THTRE 560 - Advanced Stage Movement

Credits: 3

Study in the physical development of character and advanced techniques of stage movement.

Repeat for Credit

Y

Typically Offered
Other

K-State 8
Aesthetic Interpretation

THTRE 563 - Stage Management

Credits: 3

Theory and practice of stage management in the professional and nonprofessional theatre. Emphasis is on the organization of all areas of theatre knowledge needed for the running of theatrical productions.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

THTRE 565 - Principles of Directing

Credits: 3

Principles, processes and techniques of directing for the theatre.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 171.

Typically Offered
Other

K-State 8
Aesthetic Interpretation

THTRE 566 - Rehearsal Techniques

Credits: 0-12

A laboratory course for students enrolled in performance and production classes.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

THTRE 567 - Costume Design

Credits: 3

Introduction to the theory and practice of costume design for stage.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 367.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

THTRE 568 - Scene Design

Credits: 3

Examination of the role of scene design in theatre, principles and techniques of design. Development, presentation, and synthesis of design images with the scripted play.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 368 and THTRE 369.

Typically Offered
Other

K-State 8
Aesthetic Interpretation

THTRE 569 - Advanced Technical Production

Credits: 3

Independent study in advanced technical theatre problems.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 368.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation

THTRE 572 - History of Theatre I

Credits: 3

A survey of the development of the theatre from ancient times to 1700.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 370.

Typically Offered
Spring

K-State 8
Historical Perspectives

THTRE 573 - History of Theatre II

Credits: 3

A survey of the development of the theatre from 1700 to the present.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing or consent of instructor.

Typically Offered
Fall

K-State 8
Historical Perspectives

THTRE 575 - Darmaturgy

Credits: 3

An introduction to the theory and practice of dramaturgy, including a survey of contemporary critical theories as they apply to the work of the dramaturg.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 270

Typically Offered
Fall or Spring

THTRE 579 - Lighting Design

Credits: 3

Theory and practice of theatrical lighting design, control systems, projection equipment, and lighting consulting. Production work with KSU Theatre season required.

Repeat for Credit
N

Typically Offered
Spring

THTRE 580 - Music Theatre Workshop

Credits: 0-1

Principles and techniques of musical theatre production with emphasis on rehearsal and performance of selected scenes from musical theatre. Dance, music, and theatre are studied as integrated elements within the musical theatre genre. Culminates in a public performance.

Note
Course may be repeated twice for credit.

Repeat for Credit
Y

Requisites
Prerequisite: two semesters of voice; THTRE 171; and DANCE 280; or consent of instructor.

Typically Offered
Spring

THTRE 599 - Senior Seminar

Credits: 3

Students in their final year of study will develop skills for professional presentation and create a portfolio or audition based on the standards developed for the URTA National Unified Auditions/Interviews.

Repeat for Credit
N

Typically Offered
Fall, Spring

THTRE 610 - Internship In Theatre

Credits: 0-6

Supervised participation in an internship at a professional theatre.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 171 or THTRE 368; junior standing and consent of supervising faculty member and approval of faculty.

Typically Offered
Fall, Spring, Summer

THTRE 630 - Topics in Theatre

Credits: 1-4

Selected topics in theatre.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of instructor.

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

THTRE 661 - Professional Development

Credits: 1

Study of audition techniques including supervised preparation of appropriate material. Business aspects of professional theatre, including unions, contracts, and professional ethics.

Repeat for Credit
N

Requisites
Prerequisite: 12 hours in theatre, music, and/or dance.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation

THTRE 662 - Playwriting

Credits: 3

Theoretical study and practical application of techniques of playwriting with regard to plot, characters, and production; emphasis on the one-act form.

Repeat for Credit
N

Typically Offered
Other

Cross-listed
ENGL 662

K-State 8
Aesthetic Interpretation

THTRE 663 - Solo Performance

Credits: 3

Students create their own solo performance piece through developing and rehearsing a script. Students will create drafts, conduct rehearsals, and culminate with a final performance of their own work.

Repeat for Credit
Y

Typically Offered
Fall or Spring

THTRE 664 - Creative Drama

Credits: 3

The development of creative imagination and personal well-being through theatre games, improvisation, storytelling, and puppetry for use in educational and recreational settings.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Other

K-State 8
Aesthetic Interpretation

THTRE 665 - Drama Therapy with Special Populations

Credits: 3

The therapeutic uses of drama in the development of creative imagination, self expression, and social relatedness with special populations such as clients who have developmental disabilities, physical disabilities, health issues, or are aging.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall, Spring

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

THTRE 667 - Period Styles for the Theatre 1

Credits: 3

Survey of historical styles of architecture, furnishings, and clothing in relation to theatrical design and the history of the theatre from the Greeks to 1800.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 572 or concurrent enrollment.

Typically Offered
Spring

K-State 8
Aesthetic Interpretation
Historical Perspectives

THTRE 668 - Period Styles for the Theatre 2

Credits: 3

Survey of historical styles of architecture, furnishings, and clothing in relation to theatrical design and the history of the theatre from 1800 to present.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 573 or concurrent enrollment.

Typically Offered
Fall

K-State 8
Aesthetic Interpretation
Historical Perspectives

THTRE 670 - Playback Theatre

Credits: 1-3

Improvisational theatre form in which actors listen to stories told by audience and improvisationally act the story out. Students will learn playback acting forms and how to conduct a session. Playback is often used as a technique by drama therapists in performance and in therapy sessions.

Note
1-3 units per offering with a limit of 6 credit hours taken total.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Aesthetic Interpretation

THTRE 672 - American Ethnic Theatre

Credits: 3

Drama and stagecraft of ethnic groups in the United States, including the theatre of African, Asian, Hispanic, Jewish, and Native Americans.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Other

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

THTRE 673 - Theatre for Conflict Resolution

Credits: 3

Drama and theatre techniques used to explore the nature of conflict and how to promote collaboration through action.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Summer

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

THTRE 674 - Drama Therapy with Adolescents

Credits: 3

The therapeutic uses of drama with adolescents, including normal development, youth-at-risk, ESL, SED, and BD adolescents.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Summer

K-State 8
Aesthetic Interpretation

THTRE 675 - Drama Therapy with Older Adults

Credits: 1-3

The therapeutic uses of drama with older adults, focusing on the development of life review, social relatedness, and creative self-expression in the here and now.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Summer

K-State 8
Aesthetic Interpretation
Human Diversity within the U.S.

THTRE 710 - Practicum in Theatre

Credits: 0-6

Supervised participation in a position of major responsibility.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 160 or THTRE 171 or THTRE 368; junior standing; consent of supervising faculty member and approval of faculty members are required.

Typically Offered
Other

THTRE 711 - Topics in Technical Theatre

Credits: 3

Selected topics in creative techniques and investigation for technical theatre.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 269 and consent of instructor.

Typically Offered
Other

THTRE 712 - Theatre Management

Credits: 3

Theatre management, promotion, finance, organization; emphasis on contract negotiations and use of facilities.

Repeat for Credit
N

Typically Offered
Other

THTRE 761 - Advanced Acting: Decolonizing the Classics

Credits: 3

This acting class will examine classic plays (Greek Shakespeare, Moliere, Ibsen etc.) and reinvent scenes to better address contemporary themes towards diversity, inclusion, and equity.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 271 and consent of instructor.

Typically Offered
Other

THTRE 762 - Advanced Playwriting

Credits: 3

Further study in the writing of drama; emphasis on problems of writing the full-length play.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 662.

Typically Offered
Other

Cross-listed
ENGL 762

THTRE 763 - Advanced Acting: Consent and Intimacy in Performance

Credits: 3

An in-depth examination and practice in consent and intimacy in performance. Work will cover the language, process and best practices of Intimacy Direction and Coordination.

Repeat for Credit
N

Typically Offered
Fall or Spring

THTRE 765 - Practice in Directing

Credits: 3

A lecture-lab course with emphasis on directing dramatic productions under performance conditions.

Note
Consent of instructor

Repeat for Credit
Y

Typically Offered
Other

THTRE 780 - Theatrical Design Studio

Credits: 0-3

Advanced problems in conceptualization and realization of design, including sets, costumes, lights and technical production. Emphasis on advanced techniques in research, analysis, and production problems.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 567, THTRE 568, THTRE 569, or THTRE 579.

Typically Offered
Fall, Spring

THTRE 782 - Women in Theatre

Credits: 3

A history of the contributions made by women in theatre as playwrights, managers, directors, and performers; contemporary women in theatre and their experiments in expressing women's consciousness.

Repeat for Credit
N

Typically Offered
Other

THTRE 783 - Practice in Acting

Credits: 3

Advanced studies in characterization with emphasis on communicating with the director. Taught in conjunction with the Practice in Directing workshop.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 271 and consent of instructor.

Typically Offered
Other

THTRE 784 - Psychodrama

Credits: 3

Theory and practice of psychodrama as a treatment modality for use in drama therapy.

Repeat for Credit
N

Typically Offered
Other

THTRE 785 - Sociodrama

Credits: 3

Theory and practice of sociodrama as a therapeutic and educational modality for use in drama therapy.

Repeat for Credit
N

Typically Offered
Other

THTRE 799 - Projects in Theatre

Credits: 1-4

Individual guided work in selected area.

Note
Only 3 hours may be applied to MA.

Repeat for Credit
Y

Requisites
Prerequisite: Junior standing and consent of instructor.

Typically Offered
Fall, Spring

THTRE 800 - Introduction to Graduate Studies in Theatre: Library, Research, and Information Skills

Credits: 1-3

Skills for accessing research tools and resources needed in the age of the internet, along with instruction on citations, literature reviews, and other formatting necessary for graduate research papers.

Repeat for Credit
N

Typically Offered
Other

THTRE 810 - Survey of Research in Drama Therapy

Credits: 3

Basic terminology, concepts, and principles underlying research in drama therapy and the helping fields.

Repeat for Credit
N

Typically Offered
Fall, Spring

THTRE 820 - Principles of Drama Therapy

Credits: 3

Theory, history, and practice in the use of drama as therapy group treatment. Survey of major drama therapy methods.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 664 or 665.

Typically Offered
Other

THTRE 830 - Creative Arts Therapies

Credits: 3

Survey of five creative arts therapy modalities: drama/psychodrama, art, poetry/bibliotherapy, music, and dance/movement. Instruction in theory and hands-on experience with each modality, as well as reading, discussion and methods for using modalities interdisciplinarily.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

THTRE 840 - Play Therapy Practices and Techniques

Credits: 3

The history and philosophy of, and rationale for, using play media in counseling and therapy with children and adults. Directive Play Therapy models will be explored and practiced.

Repeat for Credit
N

Typically Offered
Fall, Spring, Summer

THTRE 862 - Workshop in Playwriting

Credits: 3

Advanced writing of drama.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 762 or ENGL 762 or proof of equivalence. Proficiency.

Typically Offered
Other

Cross-listed
ENGL 862

THTRE 865 - Ethics and Professionalism in Drama Therapy

Credits: 3

The application of ethical principles involved in the practice of drama therapy in a variety of educational and therapeutic settings.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 820 or THTRE 830.

Typically Offered
Spring, Summer

THTRE 870 - Greek and Roman Theatre

Credits: 3

Studies in the drama and stagecraft of the Greek and

Roman period.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 572.

Typically Offered
Other

THTRE 871 - Medieval and Baroque Theatre

Credits: 3

Studies in the drama and stagecraft of the Medieval and Baroque periods.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 572.

Typically Offered
Other

THTRE 875 - Contemporary Theatre

Credits: 3

Studies in drama and stagecraft since 1968.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 573.

Typically Offered
Other

THTRE 876 - Seminar in Theatre

Credits: 3

Selected topics in theatre research.

Repeat for Credit
Y

Requisites
Prerequisite: THTRE 572 or THTRE 573.

Typically Offered
Other

THTRE 878 - History of the Physical Stage

Credits: 3

A survey course in the emergence and development of the theatre building as a distinct architectural form, with particular emphasis on the effect of the physical environment on the play.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 368.

Typically Offered
Other

THTRE 879 - Modern Theatre

Credits: 3

Studies in the drama and stagecraft of Europe and America in the period from 1870 to the present.

Repeat for Credit
N

Requisites
Prerequisite: THTRE 573.

Typically Offered
Spring-Even Years

THTRE 880 - Master's Project

Credits: 3

Major project undertaken to demonstrate competence in Drama Therapy as required for the Master's Degree.

Repeat for Credit
N

Requisites
Prerequisite: Sixteen hours of graduate credit in theatre.

Typically Offered
Fall, Summer

UAS 114 - Remote Pilot Certification for UAS

Credits: 2

This course helps prepare students to become an FAA-Certified UAS Pilot. This course covers all knowledge topics important for a commercial UAS pilot. Once complete, the student takes the FAA's Remote Pilot in Command knowledge test.

Repeat for Credit
N

Typically Offered
Fall, Spring

UAS 115 - Introduction to Multi-Rotor Flight Lab

Credits: 1

Basic through advanced flight training on multi-rotor uncrewed aircraft. This course establishes the foundation of manual flight, basic automation and features. Proficiency is built through standardized maneuvers to meet practical test standards.

Note
For portions of the course, students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites
Corequisite: UAS 114 or proof of a valid RPIC

Typically Offered
Fall, Spring

UAS 270 - Introduction to UAS

Credits: 3

Introduction to the history of UAS and survey of current UAS platforms, terminology, challenges to airspace integration and operational theory.

Repeat for Credit
N

Typically Offered
Fall, Spring

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

UAS 272 - UAS Safety Fundamentals

Credits: 3

Introduction to aviation safety, with an emphasis on best practices for safe operation of unmanned aircraft systems. Topics include safety/risk assessments, human factors, crew resource management, aeronautical decision-making, risk management, and safety assurance.

Repeat for Credit
N

Typically Offered
Fall, Spring

UAS 275 - Small UAS Maintenance I

Credits: 3

This course provides students with the knowledge and skill necessary to repair and maintain both fixed- and rotary-wing aircraft during field operations and to ensure continued airworthiness throughout the service life of the aircraft. Instruction emphasizes safe practices, provide an introduction to basic shop tools and machinery used in maintaining sUAS, and develop fundamental skills in platform fabrication and the troubleshooting/repair of the circuits, subsystems and components typically found on sUAS aircraft.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Typically Offered
Spring

UAS 280 - Multi-Rotor Construction Lab

Credits: 2

This course focuses on the construction of a multi-rotor UAS. This includes gaining an understanding of individual components within the system and integrating the components into a fully functional system. Students will

also test and tune the UAS once assembled.

Repeat for Credit
N

Typically Offered
Fall, Spring

UAS 285 - Small Unmanned Aircraft Maintenance II

Credits: 3

This course provides students with advanced knowledge and a high level of skill in the maintenance and repair of both fixed- and rotary-wing unmanned aircraft and associated systems. The concept of continued airworthiness is emphasized. Topics include advanced techniques in the fabrication and repair of small unmanned aircraft systems and airframes, maintenance of ground support systems and principles of electronic and integrated circuit maintenance, troubleshooting and repair.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: UAS 275.

Typically Offered
Fall

UAS 300 - UAS Powerplant Fundamentals

Credits: 3

A study of the principles of operation, design features, and operating characteristics of various powerplants used in UAS. Includes inspection procedures and operational theory of current electric, piston, hybrid, and turbine propulsion systems.

Note
Two hours lecture and three hours lab per week.

Repeat for Credit
N

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

UAS 312 - UAS Flight Instructor Ground School

Credits: 3

Intended to prepare the student for the role of UAS flight instructor. Focuses on the fundamentals of flight instruction. Lecture topics cover the techniques and the procedures necessary to generate, organize and present lessons in instructional environment while building necessary skills and emphasizing aspects of instruction necessary to ensure student competencies in the areas of UAS field and flight operations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 114 &UAS 115.
Corequisite: UAS 314.

Typically Offered
Fall

UAS 314 - Multi-rotor Instructor Flight Lab

Credits: 1

This course refines advanced multi-rotor skills and provides the practical experience necessary to produce competent multi-rotor flight instructors.

Note
Two hours of lab per week. For portions of the course, students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 115
Corequisite: UAS 312 and proof of a valid Remote Pilot in Command (RPIC)

Typically Offered
Fall

UAS 353 - Command and Control Links and Circuitry

Credits: 3

This course provides a detailed examination of the theory and design of UAS command and control (2C) systems and applies this knowledge to develop a thorough understanding of the principles used in the design, maintenance and repair of 2C circuits and subsystem components. Topics include design choices in component selection, circuit and overall system design concepts and troubleshooting.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: UAS 275 or consent of instructor.

Typically Offered
Fall

UAS 357 - Introduction to UAS Fixed-Wing Flight Lab

Credits: 2

Provides an introduction to the use of an external pilot (EP) console to control fixed-wing UAS. In the event of a lost communications link, avionics or autopilot failure or other emergency, the external pilot is critical to human-in-the-loop operation of the UAS in effecting a successful recovery of the aircraft. This course develops the skills necessary to ensure students are capable of conducting safe EP operation of fixed-wing UAS during adverse flight conditions.

Note
Four hours of lab per week. Students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 314.

Typically Offered
Spring

UAS 367 - Introduction to UAS Automated Fixed-Wing Flight Lab

Credits: 3

This course focuses on developing the pilot's ability to control the UAS via a computer ground control station in the crew role of air vehicle operator (AVO). Students will become proficient in conducting site surveys, building UAS flight plans, contingency planning, emergency procedures, crew resource management, and developing mission briefings. Students will also learn methods for effectively instructing fixed-wing flight operations by developing lesson plans and conducting instructional flights.

Note
Six hours of lab per week plus individual simulator work. Students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 357 and UAS 312.

Typically Offered
Spring

UAS 373 - Small Unmanned Aircraft Design and Construction for Non-Aviators

Credits: 3

Topics include: Unmanned Aircraft System platform, payload and component design and interfacing, system and vehicle maintenance, and systems integration. Intended for non-pilot majors and those without the FAA certifications and ratings required for UAS 370.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Corequisite: UAS 270.

Typically Offered
Fall

UAS 374 - Processing Remotely Sensed Data

Credits: 3

Students are introduced to basic theory, history, and practical applications of remote sensing technology, with an emphasis on high spatial resolution multispectral aerial imagery collected using UAS. Other topics include geographic information systems, aerial image interpretation, sensor resolution, orthomosaicing, georegistration, vegetation indices, and image classification.

Repeat for Credit
N

Typically Offered
Fall

UAS 387 - UAS Safety Applications

Credits: 2

This course provides students with the knowledge needed to best prepare for and conduct advanced UAS operations while staying safe. This course will cover Crew Resource Management, Human Factors, Safety Risk Mitigation strategies, and case study investigations.

Repeat for Credit
N

Requisites
Prerequisite: UAS 115.

Typically Offered
Fall

UAS 417 - Fixed-wing Instructor Flight Lab

Credits: 2

This is the culminating course intended to prepare students for roles as fixed-wing unmanned aircraft flight instructors. This course furthers develop and refine the flying skills necessary to assume control of the aircraft during adverse circumstances or unusual aircraft attitudes induced by a less experienced pilot. The fixed-wing instructor-in-training is required to demonstrate, in practice, the skills and knowledge obtained in earlier courses covering crew resource management and flight instruction as well as achievement of a high level of piloting skills. Upon successful completion of this course, the student is qualified as a K-State instructor on fixed-wing platforms and as pilot-in-command/operator-in-command during research missions authorized by the unmanned aircraft systems program.

Note
Four hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: UAS 367.

Typically Offered
Spring

UAS 461 - Autonomous Flight Simulation Lab

Credits: 1

This course provides the student with simulation on high-end, sophisticated, proprietary autopilot systems in preparation for field operations flying aircraft equipped with similar autopilot/avionics packages.

Note
To hours of lab per week.

Repeat for Credit
N

Requisites
Prerequisite: UAS 370.
Corequisite: UAS 465.

Typically Offered
Spring

UAS 463 - Introduction to Autopilots and Mission Planning for Non-Aviators

Credits: 3

Focus is on mission planning and operations within the context of the simulated environment. Students are introduced to commercial, open source and/or proprietary autopilots and are required to complete simulated training missions with the ultimate goal of demonstrating skills competency and knowledge acquisition through evaluations of proficiency (e.g., through "check-outs" or "check-rides"). Students integrate autopilots into selected fixed-wing platforms. Intended for non-UAS majors and those without the FAA certifications and ratings required for

UAS 370, UAS 461 and UAS 465.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: UAS 373.

Typically Offered
Spring

UAS 465 - Fixed-Wing Construction Lab and Autopilot Integration

Credits: 3

In this course, students will build a fixed-wing UAS. After completing the build and conducting a successful flight, students will integrate an autopilot into their platform. Using open source ground station software and commercial-off-the-shelf (COTS), open source autopilot firmware and hardware, students learn techniques for integrating autopilots into their selected fixed-wing platform and for exploring precision autonomous flight in preparation for conducting field operations to acquire remotely sensed data.

Repeat for Credit
N

Requisites
Prerequisite: UAS 280

Typically Offered
Spring

UAS 467 - Small Unmanned Aircraft Systems Payloads

Credits: 3

Course content covers various types of sUAS sensor packages and appropriate applications, preparing the student to properly select sensors based on mission profile, data needs and mission objectives. Students develop, design and construct a payload for integration into previously constructed aircraft in preparation for conducting missions to obtain data for post-flight processing.

Note
Studio format incorporating lecture and lab elements.

Repeat for Credit
N

Requisites
Prerequisite: UAS 465.

Typically Offered
Fall

UAS 470 - Flight and Field Operations

Credits: 3

Emphasis is on advanced unmanned aircraft systems operations in the live flight environment with a focus on safety and crew resource management. Emphasis is on experiential learning. Students are required to travel to an area designated for flight operations.

Note
Studio format incorporating predominantly lab components with less emphasis on lecture.

Repeat for Credit
N

Requisites
Prerequisite: UAS 461 and UAS 465.

Typically Offered
Fall

UAS 471 - Advanced Fixed-Wing Operations Flight Lab

Credits: 2

This course provides students with training on a high-end sophisticated, proprietary autopilot system. Course delivery will focus on safety and crew resource management. Emphasis is on experiential learning.

Note
3 hours of lab per week. Students are required to travel to an area designated for flight operations.

Repeat for Credit
N

Requisites

Prerequisite: UAS 357.

Typically Offered
Fall

UAS 475 - Data Acquisition and Post-processing

Credits: 3

Students build upon the basic image processing skills gained in the previous course, expanding their knowledge of common aerial image data processing tasks using industry-standard software packages. Aerial data collection methodologies are introduced, including consideration of aerial mission flight parameters.

Repeat for Credit
N

Requisites
Prerequisite: UAS 115 and UAS 374.

Typically Offered
Spring

UAS 476 - Low Altitude Remote Sensing Project Development

Credits: 3

Students gain practical experience collecting and processing their own high resolution aerial datasets using multirotor and/or fixed-wing UAS, and are instructed in proven workflows for successful commercial UAS mapping operations. The topic of payload selection and integration will enable a project to collect data for subsequent processing.

Repeat for Credit
N

Requisites
Prerequisite: UAS 475

Typically Offered
Fall

UAS 477 - Fundamentals of Thermography

Credits: 3

Students learn the process of acquiring and interpreting radiometrically calibrated thermal imagery, including real-time analysis and ortho mosaicking. Specific topics include history of thermal sensors, best practices for calibration and mission planning, and imagery post-processing methods, analysis, and deliverables. This course will prepare students to enroll in a Level 1 Thermography Certification course.

Note
Elective option for Aeronautical Technology BS–Unmanned Aircraft Systems Option
Course within the UAS Data Analytics Certificate

Repeat for Credit
N

Requisites
Prerequisite: UAS 374

Typically Offered
Fall, Spring

UAS 478 - Fundamentals of LIDAR

Credits: 3

Students learn how Light Detection and Ranging (LiDAR) systems are used in an sUAS setting and demonstrate their ability to collect, process, and analyze LiDAR data in various class, group, and individual projects. Specific topics include sUAS LiDAR integration, Global Positioning Systems (GPS), mission planning, post-processing methods and software, and final product deliverables.

Note
Elective option for Aeronautical Technology BS–Unmanned Aircraft Systems Option
Course within the UAS Data Analytics Certificate

Repeat for Credit
N

Requisites
Prerequisite: UAS 374

Typically Offered
Fall, Spring

UAS 480 - UAS Senior Design Project I

Credits: 1

Culminating experience is a sustained occasion when students will put into independent practice the intellectual, creative, and expressive skills/knowledge they have cultivated in their undergraduate curriculum. In this course students integrate discipline-specific knowledge in addition to communication and inquiry methods to solve problems and communicate mastery of their respective area of interest.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing.

Typically Offered
Fall

UAS 481 - UAS Senior Design Project II

Credits: 2

A continuation of UAS 480. Includes the implementation, testing, and delivery of the project initiated in UAS 480 UAS Senior Design I. Significant milestones are the completion of checkpoints outlined in the project proposal prepared in UAS 480 along with implementation, final report and final presentation.

Repeat for Credit
N

Requisites
Prerequisite: UAS 480

Typically Offered
Spring

UFS 640 - Topics in Urban Food Systems

Credits: 1-3

Selected topics in urban food systems.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

UFS 791 - Urban Agriculture

Credits: 2

Students will become familiar with a wide variety of urban agriculture types and production systems utilized in urban settings. The course will include background readings, case studies, guest speakers, student-facilitated class discussions, and lectures.

Repeat for Credit
N

Requisites
Prerequisite: Junior standing.

Typically Offered
Fall

Cross-listed
HORT 791

UFS 794 - Urban Food Systems

Credits: 2

This course will cover all components of urban food systems through the lens of food security, food justice, access, policy, and community planning. Students will gain skills in grant-writing, non-profit planning and management, and working with urban policy and planning boards.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
HORT 794

UFS 796 - Professional Development in Urban Food Systems

Credits: 1

A team instructed seminar course that provides urban food systems students with a suite of skills complimentary to their research experience but still necessary for professional career success.

Repeat for Credit
N

Typically Offered
Fall, Spring

Cross-listed
HORT 796

UFS 798 - Urban Food Systems Field Experience

Credits: 1

Students will engage in a work experience at Willow Lake Student Farm, Olathe Horticulture Research and Extension Center or another approved site. Three hours of field work per week are required.

Repeat for Credit
Y

Typically Offered
Fall, Summer

UHP 189 - Honors First-Year Seminar

Credits: 1

Selected topics seminar for new members of the University Honors Program. Focal topics will vary by section, but all seminars will overview student requirements and consider potential benefits and opportunities associated with the program.

Repeat for Credit
N

Requisites
Prerequisite: Admitted to the university honors program or instructor permission.

Typically Offered
Fall, Spring

VAP 788 - Basic and Applied Pharmacokinetics

Credits: 3

Provides a conceptual and quantitative understanding of the absorption, distribution, metabolism, and excretion of drugs and factors that influence these processes.

Repeat for Credit
Y

Typically Offered
Fall

Cross-listed
AP 788 Basic & Applied Pharmacokinetics

VAP 802 - Advanced Toxicology

Credits: 3-6

Advanced Toxicology

Repeat for Credit
N

Typically Offered
Other

VAP 805 - Cell Physiology

Credits: 3

Functions of the animal body are described with a primary focus at the cellular and molecular level with correlations to clinical topics. Course content builds on knowledge of chemistry, biochemistry, physics and biology. Basic physiological and pathophysiological mechanisms are examined in the context of the cell environment, intermediary metabolism and cell signaling.

Repeat for Credit
N

Requisites
First year standing in DVM degree or permission of course instructors

Typically Offered
Fall

VAP 806 - Gross Anatomy I

Credits: 6

Gross dissection of the dog with comparative aspects of the cat.

Note
Two hours lecture and nine hours lab a week.

Repeat for Credit

N

Requisites
Prerequisite: First-year standing in College of Veterinary Medicine or consent of the instructor.

Typically Offered
Fall

VAP 807 - Veterinary Systems 1

Credits: 6

Microstructure and function of the cardiovascular, endocrine, respiratory, and renal systems of domestic animals with emphasis on physiologic control mechanisms, interrelationships of body systems, and criteria for evaluating animal health.

Repeat for Credit
N

Requisites
Standing as a 1st year veterinary student or equivalent

Typically Offered
Fall

VAP 808 - Introduction to Veterinary Medicine and Biomedical Research: Concepts and Values

Credits: 1

This course is intended to provide first-year students an opportunity to experience the depth of veterinary/biomedical research required to advance the practice of veterinary medicine, and advance the field of medicine in general. The students will examine the challenges of conducting 1) foundational and translation research (genetic/genomic and mechanistic research), 2) foundational and applications to clinical research 3) population and observational research (epidemiology, prospective clinical trials, retrospective studies), 4) pharmacologic research (the impact of pharmacology on the biomedical sciences). The students will examine relevant connections, consider conceptual relationships, and critically evaluate integrative issues germane to both the practice of and the innovative progress of veterinary medicine. Faculty members in the Departments of A&P, DM/P, and CS, will present topical overviews, based on their professional experiences. This will be designed to connect and integrate fundamental principles and relationships between research and clinical application. These presentations provide examples of the fundamental requirements for clinical therapies and also provide examples of how innovative science leads to new therapies for long standing clinical disease. Additionally, students will learn the tools required to search relevant topic to their career paths within the medical literature. Finally, drawing on the multidisciplinary literature presented by faculty, students will explore the challenges in conducting genetic/genomic research, using genomic information, implementing research results to clinical practice, as well as addressing the social, legal, and professional policies that are emerging from new research. Students will be expected to do reading and to complete online worksheets and present their findings/opinions in class. Class time will be devoted to presentations and to discussion of readings and related current events.

Repeat for Credit
N

Typically Offered
Fall

VAP 816 - Gross Anatomy II

Credits: 5

Gross dissection of the horse and ruminant with comparative aspects of the pig, laboratory animals, and the chicken.

Note
Three hours lecture and nine hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: VAP 806.

Typically Offered
Spring

VAP 817 - Veterinary Systems 2

Credits: 4

Microstructure and function of the reproductive and digestive systems of domestic animals with emphasis on physiologic control mechanisms, interrelationships of body systems, and criteria for evaluating animal health.

Repeat for Credit
N

Requisites
Standing as 1st year veterinary student or equivalent

Typically Offered
Spring

VAP 835 - Animal Care and Welfare

Credits: 1

This course will describe the veterinarian's role in protecting the health and welfare of animals. Students will be introduced to the major philosophical positions of animal use. The evolution of animal welfare science will be discussed and students will learn how to assess the welfare of companion, laboratory, zoo and food animals. Common causes of reduced animal welfare and ethical dilemmas will be covered.

Repeat for Credit
N

Typically Offered
Fall

Cross-listed
AP 835 Animal Care and Welfare

VAP 844 - Veterinary Pharmacology I

Credits: 4

The basic principles of pharmacology, the interactions of drugs and living systems including fundamental principles of pharmacokinetics, pharmacodynamics, receptor-coupling, and mechanisms of action. A systems-based approach to drug classes will be emphasized.

Note
Four hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: VAP 804 and VAP 818 or equivalent.

Typically Offered
Fall

VAP 846 - Veterinary Pharmacology II

Credits: 2

The basic principles of pharmacology, the relationship of drug actions and interactions on physiological principles and pathophysiological conditions. Pharmacokinetics, pharmacodynamics, and a systems-based approach to drug classes will be emphasized.

Repeat for Credit
N

Requisites
Prerequisite: Student must have a "C" or higher in VAP 844 and DMP 712.

Typically Offered
Spring

VAP 871 - Toxicology

Credits: 3

Effects of harmful substances on the animal body. Emphasis placed on toxicologic principles and management of the poisoned patient.

Repeat for Credit
N

Requisites
Prerequisite: 3rd year standing in the College of Veterinary Medicine or graduate students in the College of Veterinary Medicine.

Typically Offered
Spring

VAP 888 - Practical Use and Interpretation of Veterinary Scientific Literature

Credits: 1

Designed primarily for veterinary students in the first, second or third year of the DVM curriculum. The course is intended to teach literature search skills, organization of your own literature library, and critical evaluation of clinical reports and research literature. The format is lecture as well as small group and online discussion. Students are required to contribute to classroom and online discussions and to complete written assignments.

Repeat for Credit
Y

Typically Offered
Fall

VAP 891 - A&P Veterinary Medicine Elective Graded

Credits: .5-3

Special topics for veterinary students in the disciplines offered by the department.

Note
Lecture or combination lecture with lab.

Repeat for Credit
Y

Requisites
Prerequisite: 1st, 2nd, or 3rd year students in Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VAP 893 - Introduction to Nanomedicine

Credits: 1

This course is a brief introduction to nanomaterials and nanomedicine with a focus on clinical applications of nanotechnology. The course presents basic principles of nanotechnology; current clinical applications of nanomedicine; future horizons in nanomedicine.

Repeat for Credit
N

Typically Offered
Spring

VAP 894 - Comparative Embryology

Credits: 1

An overview of development anatomy as it relates to clinically important developmental defects and/or normal structure and function of common domestic animals.

Repeat for Credit
N

Requisites
Prerequisites: Enrollment in the One Year Master's (non-thesis M.S. in Veterinary Biomedical Science) program or permission of instructor.

Typically Offered
Spring

VAP 897 - Problems in Animal Welfare

Credits: 1

This course will expand on the role of veterinarians in the field of animal welfare. Students will be introduced to the major philosophical positions of animal use. The evolution of animal welfare science will be discussed and students will learn how to assess the welfare of companion, laboratory, zoo and food animals. Contemporary issues in animal welfare will also be explored.

Repeat for Credit
N

Requisites
Recommended Prerequisite: VAP835 or AP835

Typically Offered
Spring

VAP 900 - Advanced Clinical Anatomy and Teaching Practicum

Credits: 2

This 2-week clinical anatomy rotation elective is designed for DVM students seeking advanced knowledge and teaching experience in veterinary anatomy. Participants will enhance their understanding of regional and systemic anatomy through hands-on dissection, journal club presentations, and the development of clinical teaching materials. This course is especially beneficial for those with interests in surgical specialties, radiology, neurology, and emergency medicine.

Repeat for Credit
N

Requisites
DVM 4th Year Standing

Typically Offered
Fall, Spring

VCS 809 - Veterinary Clinical and Professional Skills I

Credits: 1

The course will be taught during the fall semester as a required introductory level course for first year veterinary students. This is the first in a series of foundational courses designed to introduce students to key clinical skills, including communication and critical thinking, that they will encounter in a clinical setting and to provide students with a problem-based approach to learning.

Repeat for Credit
N

Requisites
Prerequisite: First year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 816 - Veterinary Clinical Skills and Professional Skills II

Credits: 1

The course will be taught during the spring semester as a required introductory level course for first year veterinary students.

The primary objective of the course is to provide students with an opportunity to learn normal animal behavior for the most commonly evaluated large animal species in clinical practice (the horse and the cow); to safely handle and restrain them; and to practice basic physical examination skills. A secondary objective of the course is to introduce students to the basic principles of biosecurity, sterile technique, venipuncture, and intravenous catheterization.

In addition, students will build onto first-semester instruction in clinical communication, written documentation within the medical record, and introductory surgical skills.

The course will include introductory lectures as well as structured and self-directed laboratory sessions that will involve both live animals and non-animal teaching models.

Note
Two 1.5-hour laboratory sessions will occur weekly.

Repeat for Credit
N

Requisites
Prerequisite: VCS 809.

Typically Offered
Spring

VCS 819 - Veterinary Medicine in a Foreign Context

Credits: 1

Lecture and discussion-based course preparing students to enroll in CS 821. Students will investigate agricultural and veterinary medicine in a specific country.

Repeat for Credit
Y

Requisites
Pre-requisite: Commitment to enroll in VCS 821 International Veterinary Study Tours and enrolled as 1st, 2nd, or 3rd year student in the College of Veterinary Medicine. Additional students admitted with discretion of the faculty member leading VCS 821.

Typically Offered
Spring

VCS 820 - Topics in Global Veterinary Medicine

Credits: 1

An overview of the role of veterinarians around the world. Topics include international uses and attitudes about animals, problems the world faces pertaining to livestock production, and social tensions. One hour lecture each week.

Note
One hour lecture each week.

Repeat for Credit
N

Requisites
Prerequisite: 1st or 2nd year standing in the College of Veterinary Medicine, or enrolled as a graduate student with instructor permission.

Typically Offered
Spring

VCS 821 - International Vet Study Tours

Credits: 1

Faculty-led trip for students to explore veterinary medicine in a foreign country. Prior to travel, students will learn about the country through lectures, research, presentations. During the trip they will interact with nationals in the veterinary profession and experience the culture.

Repeat for Credit
Y

Requisites
Prerequisite: Successful completion of VCS 819 in the semester immediately preceding. Enrolled as a 1st-3rd year or grad student in the College of Vet Med. Additional students admitted with discretion of faculty leading the tour.

Typically Offered
Summer

VCS 822 - Introduction to Sustainable Beef Systems

Credits: 1

This course provides the fundamentals of assessing sustainability in beef production systems through evaluation of aspects of sustainability pillars, people, planet and profit, in each sector of the beef value chain. The course focuses on principles of sustainable food systems, beef cattle production practices, systems thinking, and impacts of food choices.

Repeat for Credit
N

Requisites
Prerequisite: 1st, 2nd, or 3rd Year Standing in the College of Veterinary Medicine.

Typically Offered
Fall

Cross-listed
CS 822

VCS 832 - Antimicrobial Resistance in Bacteria: A One Health Perspective

Credits: 1

This course addresses the concept of One Health which integrates the knowledge of the biological elements necessary for the evolution of antimicrobial resistance (AMR) in bacteria and other factors (animals, humans, environments, socioeconomic features, and behavioral changes) involved in its emergence and dissemination.

Repeat for Credit
N

Requisites
Prerequisite: 1st, 2nd, or 3rd Year Standing in the College of Veterinary Medicine

Typically Offered
Fall

Cross-listed
CS 832 Antimicrobial Resistance in Bacteria: A One Health Perspective

VCS 839 - Veterinary Clinical and Professional Skills III

Credits: 1

A continuation of Veterinary Clinical and Professional Skills II. Introduces how to perform common diagnostic tests in clinical practice and interpret them. Builds upon basic palpation skills to practice isolating specific tissues and organs. Applies surgical principles to the practice of advanced suture patterns.

Repeat for Credit
N

Requisites
Prerequisite: VCS 809 and VCS 816

Typically Offered
Fall

VCS 840 - Communication with the Agricultural Worker

Credits: 2

An elective course focused on improving communications

between veterinarians and animal caretakers in production agriculture and equine industries. The course will use face to face discussions and online seminars in KSOL to teach communications skills with a focus on common terminology and vocabulary necessary for effective communication. Audio-visual teaching utilizing immersion philosophy is utilized to provide the material course work.

Repeat for Credit
N

Requisites
Prerequisite: 2nd or 3rd year standing in the College of Veterinary Medicine or enrolled as a graduate student.

Typically Offered
Fall, Spring

VCS 843 - Introduction to Veterinary Surgery

Credits: 2

The purpose of VCS 843 Introduction to Veterinary Surgery is to introduce the second year veterinary student to small animal surgical principles, specific small animal surgical conditions, their clinical signs, appropriate diagnostic evaluation, surgical treatment, pre- and post-operative care, and complications. Clinical application and reasoning will also be a focus. This course will establish a foundation of knowledge that students will build on in VCS 863 Veterinary Surgery I in the fall semester of the third year.

Repeat for Credit
N

Requisites
2nd Year Standing in the College of Veterinary Medicine

Typically Offered
Spring

VCS 844 - Medicine I

Credits: 4

Consideration of medical and pathophysiologic aspects of diseases affecting the urinary, endocrine, integumentary, respiratory, hemic, and
neuromuscular systems.

Note
Four one hour lectures per week.

Repeat for Credit
N

Requisites
Prerequisite: Second-year standing in the College of Veterinary Medicine.

Typically Offered
Spring

VCS 845 - Radiology

Credits: 3

The theory and principles of x-rays, production and interpretation of radiographs and exposure factors, special radiographic methods, film storage and handling, processing, safety measures, and biologic effects of radiation.

Note
Two hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Second-year standing in the College of Veterinary Medicine.

Typically Offered
Spring

VCS 846 - Veterinary Clinical and Professional IV

Credits: 1

A continuation of Veterinary Clinical and Professional Skills III. Introduces advanced organ-specific examination techniques including otoscopy and ophthalmoscopy. Expands the concepts of diagnostic testing and diagnostic test interpretation. Prepares students for surgical anesthesia and anesthetic monitoring through the use of non-animal teaching models.

Repeat for Credit
N

Requisites
Prerequisites: VCS 809, VCS 816, and VCS 839.

Typically Offered
Spring

VCS 861 - Food Animal Medicine

Credits: 4

A study of the etiology clinical signs, diagnosis, treatment and control of diseases which affect cattle, swine, and sheep.

Note
Four hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 862 - Theriogenology

Credits: 3

Consideration of prevention, diagnosis, and treatment of disease, and maintenance of health and productivity of the genital tract of domestic animals. Three hours of lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in College of Veterinary Medicine or graduate student.

Typically Offered
Fall

VCS 863 - Veterinary Surgery I

Credits: 3

Introduction to the basics of veterinary anesthesia, surgical techniques, and patient management by a systems design. Problems common to all species of domestic animals will be presented to provide foundations of surgical knowledge and experience.

Note
Three hours of lecture.

Repeat for Credit
N

Requisites
Prerequisite: Satisfactory completion of all required second year veterinary courses.

Typically Offered
Fall

VCS 864 - Applied Clinical Skills and Surgical Laboratories

Credits: 3

The VCS 864 Applied Clinical Skills and Surgical Laboratories course is a hands-on live animal laboratory course with multiple objectives. This course teaches basic clinical skills including small animal handling, physical examination, sample collection, diagnostic procedures, patient assessment and management, medical records, and clinical communication. Additionally, the course will teach basics of small animal veterinary anesthesia, surgical techniques, and live animal patient management. Skills taught in this course will build on introductory skills learned in 1st and 2nd year clinical skills courses. The student will progress to performing general anesthesia, surgery (spays and neuters), and perioperative care for humane shelter animals. The skills taught in this course will be used as a framework for students to continue building on during their senior year as they learn to function as effective veterinarians.

Repeat for Credit
N

Requisites
Prerequisite: Concurrent with or successful completion of VCS 863

Typically Offered
Fall

VCS 865 - Exotic Pet Medicine

Credits: 2

Entry-level knowledge base for the species likely to be encountered in a private practice setting including snakes/small reptiles, caged birds, and small mammals

(ferrets, gerbils, hamsters, chinchillas).

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 867 - Medicine II

Credits: 4

Consideration of the medical and pathophysiological aspects of diseases affecting the gastrointestinal, cardiovascular, and ophthalmic systems, oncology, and dentistry.

Note
Four one hour lectures per week.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 868 - Artificial Intelligence in Veterinary Medicine

Credits: 1

This elective course explores the impact of artificial intelligence on the field of medicine, with a focus on veterinary applications. Students will learn about the fundamentals of AI, machine learning, and data science, and how these technologies are used to improve diagnostics, treatment planning, patient monitoring, and overall patient care. The course will also address ethical considerations, regulatory frameworks, and the future of AI in healthcare. Through lectures, case studies, and hands-on projects, students will gain a comprehensive understanding of AI's role in advancing medical and veterinary practices.

Repeat for Credit
N

Requisites
1st, 2nd, or 3rd Year Standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring

VCS 874 - Ethics and Jurisprudence

Credits: 1

Socratic ethics are discussed along with the American Veterinary Medical Association's Code of Ethics and practical situations with a fundamental ethical basis. The Kansas Practice Act is explored as an example of governance in veterinary medicine. The role of animals in humans' well being is addressed along with the philosophy of animal welfare. The law and the practicing veterinarian are discussed with emphasis upon professional liability.

Repeat for Credit
N

Requisites
Prerequisite: Third year standing in College of Veterinary Medicine.

Typically Offered
Spring

VCS 876 - Applied Large Animal Clinical Skills

Credits: 1

Demonstration, instruction and experience in physical examination and diagnostic skills necessary for routine veterinary practice.

Note
DVM Course only

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine.

Typically Offered
Spring

VCS 877 - Clinical Nutrition

Credits: 2

A focus on practical aspects of nutrition as it relates to performance, health and animal well-being of food-producing animals and, programs designed for health and well-being of small animals including exotic animals. Nutritional aspects of the mechanisms of health and disease are taught primarily at the individual and population level with some molecular and cellular aspects included. Designed for all students to be able to properly nourish animals in their care during their career.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in the College of Veterinary Medicine or graduate student.

Typically Offered
Spring

Cross-listed
ASI 886 and AP 886

VCS 878 - Veterinary Surgery II

Credits: 3

A continuation of Veterinary Surgery I. Introduction to the basics of veterinary anesthesia, surgical techniques, and patient management by a systems design. Problems common to all species of domestic animals will be presented to provide foundations of surgical knowledge and experience.

Note
Three hours lecture.

Repeat for Credit
N

Typically Offered
Spring

VCS 879 - Veterinary Surgery II Laboratory

Credits: 1

A continuation of Veterinary Surgery I Lab. Introduction to the basics of veterinary anesthesia, surgical techniques, and patient management by a systems design. Problems common to all species of domestic animals will be presented to provide foundations of surgical knowledge and experience.

Note
One lab per week.

Repeat for Credit
N

Typically Offered
Spring

VCS 880 - Veterinary Business and Professional Development

Credits: 1

This course provides a foundation in business management and marketing to prepare veterinary students for success in private veterinary practice. Lectures include personal marketing, business organizational structure, gauging and monitoring production, management practice finance, recruitment, personnel management, effective practice marketing (internal and external), achieving better client satisfaction and retention, and the road to practice ownership.

Repeat for Credit
N

Typically Offered
Spring

VCS 881 - Clinical Pharmacology

Credits: 2

Course focuses on the clinical application of drugs in veterinary species. Clinical pharmacologists and clinicians from multiple clinical specialties will focus on commonly used drugs. Students will be expected to review and build upon their previous pharmacology and medicine courses. Emphasis will be placed on administration (including routes, dosing calculations, and methods), avoiding adverse drug reactions and interactions, evaluating patient response, written and verbal client communication, and utilizing reference resources to select and properly use veterinary

therapeutics.

Repeat for Credit
N

Requisites
Prerequisite: Third-year standing in College of Veterinary Medicine.

Typically Offered
Spring

VCS 882 - Equine Medicine

Credits: 3

A study of the etiology, clinical signs, diagnosis, treatment, and control of common diseases which affect horses.

Note
Three hours lecture a week.

Repeat for Credit
N

Requisites
Prerequisite: VCS 867

Typically Offered
Spring

VCS 890 - CS Veterinary Medicine Elective Aux. (Graded)

Credits: 0.5-3

VCS 890 (Variable credit .5-3) fall, summer, and spring offering. Special topics for veterinary students in the disciplines offered by the department. Lecture or combination lecture with lab. Continuation of Topics from VCS 891.

Repeat for Credit
Y

Requisites
Prerequisite: 1st, 2nd, or 3rd year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 891 - CS Veterinary Medicine Elective

Credits: .5-3

Special topics for veterinary students in the disciplines offered by the department. Topics include:

Beef Production Medicine: The role of the veterinarian in livestock production units, including interactions with producers, nutritionists, investors and others in decision analysis. Emphasis is on the professional services that veterinarians provide to beef production systems.

Emergency Medicine: Presentations of cases in the ICU or cases that were recently seen on emergency. Current literature that is relevant to the case will be discussed.

Advanced Exotic Pet Medicine: Advanced study of the diseases, medicine, and captive management of non-traditional species including companion birds, reptiles, rabbits, ferrets, and rodents.

The Basics of Bovine Theriogenology: This class is designed to provide students enrolled in the veterinary curriculum a very practical knowledge base regarding bovine reproduction.

Equine Medicine: This course is designed to be complementary to CS 710. The material presented in this class will focus on diagnostic procedures and case presentations that will not be covered in the core curriculum.

The Learning Curve of Equine Practice: Covers various aspects of equine practice, not usually covered in traditional didactic lectures, including: equine husbandry, communication issues and insurance, horse colors, genetics, and genetic related diseases, aspects of equine practice and practice management, drug and medication rules for performance horses, and preventative medicine.

Pain Management: Discussion of the mechanisms of pain, certain pain syndromes, and the drugs and techniques available to provide analgesia.

Surgical Skills: Manual surgical skills will be taught using surgical models and cadaver tissues. Students will be taught the following skills and techniques: instrument handling, speed and efficiency, hand ties, ligature under tension, suture patterns, closure under tension, anastomosis and enterotomy technique and excision of circular lesions.

Advanced Concepts in Veterinary Clinical Anesthesia: The lectures will be divided among topics to enhance student preparation for practical clinical application of anesthetic principles in both small and large animal environments. Topics: anesthetic implications for certain disease states, management of intraoperative

complications, and special topics in large animal anesthesia.

Veterinary Management of Sheep and Goats: Topic content is delivered both as online seminars via KSOL and case-based discussions and problem solving exercises in the classroom on herd management, preventive health care, nutrition, medicine, diseases, reproduction, and surgery of sheep and goats.

Veterinary Ultrasonography: Topic content will be delivered both as online seminars via KSOL and case-based discussions. The physics, basic principles of use, and common artifacts of ultrasound will be covered as it relates to veterinary diagnostic imaging. Ultrasound imaging of the thorax (non-cardiac), abdomen, musculoskeletal system, and other areas (eye, thyroid/parathyroid) will be covered, predominantly in small animals. The course will cover both normal and pathologic ultrasound findings.

Applied Small Animal Behavior: Introduction to the commonly encountered canine and feline behavior topics in veterinary medicine. Students will learn how to address these behavioral concerns through behavior modification, desensitization, counter conditioning, and psychopharmacology. An additional goal of the course is to discuss practices that reduce fear in these patients during visits to their veterinarian.

Note
Lecture or combination lecture with lab.

Repeat for Credit
Y

Requisites
Prerequisite: 1st, 2nd, or 3rd year students in Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 892 - CS Veterinary Medicine Elective Cr/NC

Credits: .5-3

Special topics for veterinary students in the disciplines offered by the department. Topic Include:

Pre-Clinical Food Animal (Mixed) Practice Mentorship: Structured one week (45 contact hours) mentorship in a large animal (bovine) practice designed to promote clinical skills training in a private practice setting with practitioners who have expressed an interest in training and mentoring veterinary students.

Pre-Clinical Small Animal Practice Mentorship: Structured one week (45 contact hours) mentorship in a small animal practice designed to promote clinical skills training in a private practice setting with practitioners who have expressed an interest in training and mentoring veterinary students.

Practicing Veterinary Medicine in a Multicultural Society: Diversity in the broadest sense of the word (cultural, racial, sexual, gender, age, religious, etc.) will be explored in the context of the practice of veterinary medicine. Understanding diversity issues can positively affect the bottom line of nearly every veterinary practice.

Pre-Clinical Exotics/Zoological Practice Mentorship: Structured one week (45 contact hours) mentorship in an exotics/zoological practice designed to promote clinical skills training in a private practice setting with practitioners who have expressed an interest in training and mentoring veterinary students.

Note
Lecture or combination lecture with lab.

Repeat for Credit
Y

Requisites
Prerequisite: 1st, 2nd, or 3rd Year students in Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 900 - Veterinary Radiology and Diagnostic Imaging

Credits: 3

Radiographic, ultrasonographic and nuclear imaging in the clinical setting, with emphasis on making/identifying images of diagnostic quality, interpretation, indications for imaging, and radiation safety.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 901 - Clinical Externship and/or Programmed Study

Credits: 0-6

Provides the professional student with the opportunity to study with specialists not available at Kansas State University or in unique areas of veterinary medical practice or research.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine and the approval of the externship or program of study by the course coordinator.

Typically Offered
Fall, Spring, Summer

VCS 903 - Laboratory Animal Medicine

Credits: 2

The study of laboratory animal medicine or comparative medicine to include colony health monitoring, preventive medicine, surgery, investigator support, and regulatory oversight.

Repeat for Credit
N

Requisites
Prerequisite: DMP 759 or requires coordinator approval. Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 904 - Clinical Anesthesia

Credits: 3

Practical instruction in the skills and techniques used in the practice of clinical veterinary anesthesia of both large and small animals.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 905 - Zoo, Exotic, Wildlife, and Avian Medicine and Surgery

Credits: 3

Study of exotic, wildlife, and zoo animal medicine through participation in the clinical service in the Veterinary Health Center. Problem solving, differential diagnosis, diagnostic procedures, and medical and surgical therapy of non-traditional animals will be emphasized. Annual preventive medicine, medical procedures, and surgical procedures are also routinely performed at the City of Manhattan Sunset Zoo. Occasional medical and surgical procedures are performed in other zoos around the area.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 906 - Ophthalmology

Credits: 2

The study of the surgery and medical diagnosis and treatment of ocular disease in animals in the setting of the veterinary medical center. Problem solving, differential diagnosis, diagnostic procedures and medical and surgical therapy will be emphasized using veterinary patients.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 907 - Supplemental Zoo, Exotic, Wildlife and Avian Medicine and Surgery

Credits: 3

Additional training in the study of exotic, wildlife, and zoo animal medicine and surgery through participation in the clinical service in the Veterinary Health Center. Problem solving, differential diagnosis, diagnostic procedures, and medical and surgical therapy of non-traditional animals will be emphasized. Annual preventative medicine, medical procedures, and surgical procedures are also routinely performed at the City of Manhattan Sunset Zoo. Occasional medical and surgical procedures are performed in other zoos around the area.

Repeat for Credit
Y

Requisites
Prerequisite: 4th year standing in the College of Veterinary Medicine

Typically Offered
Fall, Spring, Summer

VCS 909 - Urgent Care

Credits: 1

Additional training and skills in triaging and managing patients in need of urgent or emergent care. Examples include wounds, fractures, trauma, cardiovascular shock, respiratory distress, and other urgent/emergent conditions. This will be conducted through lecture/discussion topic rounds and case-based learning.

Repeat for Credit
Y

Requisites
4th Year Standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 910 - Livestock Local Practice

Credits: 2

A study of the role of the veterinarian in the practice of clinical medicine in livestock production units. Students will work under faculty supervision in ambulatory and local practice settings.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 912 - Livestock Medicine and Surgery

Credits: 2

A study of individual livestock medicine and surgery. Students will work under faculty supervision in an in-house setting.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 913 - Advanced Feedlot Production Management

Credits: 2

Students desiring feedlot/stocker production training. Focus on effects of nutrition, preventative medicine, environment, personnel training and other issues on the health of growing/finishing cattle.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Summer

VCS 915 - Advanced Cow-Calf Production Management

Credits: 1

For students desiring in-depth cow-calf production training including management and assessment of production data, nutrition and ration balancing, reproductive strategies, quality assurance and economic and Standardized Performance Analysis of cow-calf enterprises.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Spring, Summer

VCS 917 - Advanced Rural Food Animal Business Management

Credits: 1

An elective course that incorporates economic and food animal practice management skills. Course will focus on business aspects of agricultural industries and skills to manage a food animal practice.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Spring

VCS 919 - Food Animal Bull Reproduction

Credits: 2

Students will get hands-on experience and become competent performing a complete Breeding Soundness Exam. Other reproductive topics will be covered.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring

VCS 920 - Equine Medicine

Credits: 2

This course will offer general exposure to equine internal medicine and theriogenology. Students will be responsible for diagnoses, treatment and nursing care of out-patients, in-patients, and emergency duties.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 921 - Clinical Equine Theriogenology

Credits: 2

Students will participate in routine procedures that develop skills in handling horses, rectal exams, ultrasonography, semen collection, artificial insemination, uterine therapies and minor surgical procedures.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Spring, Summer

VCS 922 - Equine Surgery

Credits: 2

This course will offer general exposure to equine surgery and theriogenology. Students will be responsible for diagnoses, treatment, and nursing care of out-patients, in-patients, and emergency duties.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 923 - Advanced Equine Studies

Credits: 4

Students will have opportunities for routine and advanced clinical skills training and case management. Course discussions and case presentations will be targeted for the equine interested student and will therefore present advanced material; case discussion and rounds materials.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 924 - Equine Field Service

Credits: 2

This course will offer general exposure to equine field service and theriogenology. Students will be responsible for diagnoses, treatment, and nursing care of out-patients, in-patients and emergency duties.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 925 - Supplemental Equine

Credits: 2-4

An opportunity for students to pursue additional equine studies (medicine, surgery, etc.) in depth and assume substantial responsibility for care of hospitalized cases. Or students will have option to conduct research and present a seminar on a medicine or surgical subspecialty and pursue a special problem.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 930 - Small Animal Internal Medicine

Credits: 3

The study of internal medicine in the setting of the Veterinary Health Center. Students will be engaged in the diagnosis and management of complex cases referred to the internal medicine service.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 931 - Clinical Oncology

Credits: 2

The approach to diagnosis and treatment of cancer-bearing patients will be emphasized. Skills to master include fine needle aspirates and basic cytology, biopsy techniques (punch, wedge, pinch and tru-cut), bone marrow aspirate and core biopsy procedures and chemotherapy administration. A greater depth of understanding of the biologic behavior and treatment options of commonly seen tumor types (lymphoma, mast cell tumors, hemangiosarcoma, osteosarcoma, etc.) and chemotherapy safety will be emphasized. Medical management of cancer-related problems as well as treatment of therapy-induced side effects will also be covered.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 932 - Small Animal General Medicine

Credits: 3

The study of preventative medicine, general practice medicine, and specialty medicine. Students spend three weeks with the Pet Health Center learning the various aspects of outpatient services.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 933 - Dermatology/Medicine

Credits: 2

Designed to emphasize dermatology diagnostic work-up and management of dermatologic cases. May include proper techniques for performing procedures such as skin scraping, bacterial and fungal culturing, performing cytology, obtaining skin biopsies, ear clearing and trichography.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 934 - Clinical Small Animal Soft Tissue Surgery

Credits: 3

This course is designed to train senior or elective veterinary students in the diagnosis and treatment of small animal soft tissue and general surgical diseases through participation in the Small Animal Soft Tissue Service of the Veterinary Medical Teaching Hospital.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the KSU College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 935 - Comparative Cardiology

Credits: 2

Designed to expose students to the cardiovascular system of domestic animals, emphasizing clinical management and understanding of common congenital and acquired cardiac diseases.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 936 - Clinical Small Animal Orthopedic Surgery

Credits: 3

Course is designed to train senior or elective veterinary students in diagnosis/treatment of small animal orthopedic surgical diseases through the Orthopedic Service of the Veterinary Medical Teaching Hospital.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 937 - Shelter Medicine

Credits: 2

The rotation will be a combination of in-class and laboratory exercises in Manhattan, and hands-on experiences at regional shelters. Topics include population medicine, infectious disease recognition and control, surgical sterilization, behavioral testing, and legal issues common to shelter settings.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 938 - General Dentistry

Credits: 1

Skills and concepts common to general dentistry practice in the feline and canine, pre-operative exams, day-long wet lab to take and interpret digital intraoral radiographs, extract teeth, and perform dental nerve blocks. Also may participate in the evaluation, diagnosis, and treatment of primary care patients.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 939 - Supplemental Clinical Small Animal Soft Tissue Surgery

Credits: 3

Additional training in the diagnosis and treatment of small animal soft tissue and general surgical diseases through participation in the Small Animal Soft Tissue Service of the Veterinary Medical Teaching Hospital.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 940 - Small Animal Emergency Rotation

Credits: 2

Enhanced training in the management of small animal patients presented to the emergency service. Evaluation, management, and monitoring of small animal patients in the intensive care unit.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 941 - Supplemental Small Animal Internal Medicine

Credits: 3

Additional training in the diagnosis, management and treatment of dogs and cats referred to the Internal Medicine service at the Veterinary Health Center.

Note
This course will be scheduled after your core Internal Medicine rotation.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 942 - Advanced Surgical Experience

Credits: 2

Designed to increase exposure to soft tissue surgical theories and techniques by providing both hands on surgical experience on cadavers and literature review skills.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring

VCS 943 - Supplemental Clinical Small Animal Orthopedic Surgery

Credits: 3

Additional training in the diagnosis and treatment of small animal orthopedic surgical diseases through participation in the Small Animal Orthopedic Service of the Veterinary Medical Teaching hospital.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the KSU College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 944 - Supplemental Small Animal Emergency

Credits: 2-4

An opportunity to pursue additional training in the management of small animal patients presented to the emergency services. Evaluation, management, and monitoring of small animal patients in the intensive care unit.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 945 - Supplemental Dentistry for Small Animals

Credits: 1

A one week course where students will be instructed through lecture, cadaver labs, and live animal care. Topics covered will include dental evaluation techniques, instrumentation, dental radiography, tooth extraction techniques and regional anethesia. Objectives of the course will be to provide 4th year students with additional training of basic dentistry knowledge and experience performing oral exams, dental probing, scaling, polishing, radiographs and tooth extractions.

Note
Vet Course

Repeat for Credit
N

Requisites
Prerequisite: 4th Year Standing in the College of Veterinary Medicine and successful completion of CS 771 General Dentistry.

Typically Offered
Fall, Spring

VCS 946 - Shelter Operations Consultation

Credits: 1

This rotation will expose veterinary students to formal shelter consultation procedures. Students will learn how to take a critical look at the health of animal shelters to identify what is being done well and what needs to be improved. Students will also learn how to formulate recommendations in a way that does not overwhelm the administration of the shelters and can easily be implemented in a step-wise fashion.

Repeat for Credit
N

Requisites
Prerequisite: CS 781 Shelter Medicine and 4th Year Standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VCS 947 - Advanced Bovine Palpation

Credits: 2

Provide numerous opportunities for the student to learn how to identify the different structures of the bovine reproductive tract through rectal palpation and transrectal ultrasound, accurately diagnose pregnancy both manually and via ultraonography, and to identify various bovine reproductive abnormalities.

Repeat for Credit
N

Requisites
Prerequisite: VCS 891 Topics in Bovine Palpation Techniques and Reproductive Evaluation and 4th Year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VCS 948 - Supplemental Small Animal General Medicine

Credits: 3

Additional training in the study of preventative medicine, general practice medicine, and specialty medicine through participation in the Small Animal General Medicine Service in the Veterinary Health Center.

Repeat for Credit
Y

Requisites
Fourth-year standing in the College of Veterinary Medicine

Typically Offered
Fall, Spring, Summer

VCS 949 - Shelter Medicine - Community Outreach

Credits: 1

Designed to give students an opportunity to build practice skills in a community outreach setting. This one week elective course will introduce students to access to care issues and prepare them to deliver veterinary services in socioeconomically diverse settings. The rotation will consist of in-class lessons and discussion followed by outreach clinics. Clinics will primarily focus on wellness exams, preventative medicine and treatment of routine medical conditions.

Repeat for Credit
Y

Requisites
Prerequisite: 4th Year Standing in College of Veterinary Medicine

Typically Offered
Fall, Spring, Summer

VCS 950 - Problems in Medicine or Surgery

Credits: 1-9

The course provides for the study of medical or surgical problems. The student, in conference with the major professor, outlines the methodology and procedures, conducts the study, and prepares a detailed report.

Repeat for Credit
Y

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VDMP 800 - Veterinary Career Development

Credits: 0

Introduction to career opportunities in veterinary medicine.

Note
A required zero-credit class. No tuition is charged.

Repeat for Credit
N

Requisites
1st year standing in the College of Veterinary Medicine.

Typically Offered
Fall

VDMP 811 - Clinical Pathology I

Credits: 2

Principles, application and interpretation of clinical laboratory procedures in clinical cases.

1 credit lecture / 1 credit lab

Repeat for Credit
N

Requisites
Corequisite: Current enrollment in the DVM 1st year curriculum

Typically Offered
Spring

VDMP 814 - Veterinary Bacteriology & Mycology

Credits: 3

Morphology, biology and classification of pathogenic bacteria and fungi and their relation to the causes of disease.

Note
Three hours of lecture; moving one semester forward in curriculum and dropping laboratory portion

Repeat for Credit
N

Requisites
Prerequisite: BIOL 255

Typically Offered
Spring

VDMP 816 - Trade and Agricultural Health

Credits: 2

This course considers the multilateral trading system as it relates to food safety, food security, animal health, plant health, and international cooperation. The course content will be of value to students interested in food safety and security, epidemiology, public health, agriculture, food science, security studies, political science, agricultural economics, veterinary medicine, and international relations.

Repeat for Credit
N

Typically Offered
Spring

VDMP 817 - Principles of Veterinary Immunology

Credits: 3

Innate and adaptive defense mechanisms in domestic animals. Topics include vaccinology, immunopathology, autoimmunity, immunodeficiency, and immunomodulation.

Repeat for Credit
N

Requisites
Prerequisite: BIOCH 521 and BIOL 255.

Typically Offered
Spring

VDMP 818 - Veterinary Epidemiology

Credits: 2

Introduction to the principles and methods of veterinary epidemiology: emphasizing how diseases affect populations (and associated implications for individuals), and application to disease diagnosis, treatment, prevention, and control.

Repeat for Credit
N

Typically Offered
Spring

Cross-listed
MPH 708

VDMP 831 - Veterinary Virology

Credits: 3

Morphology, biology, and classification of viruses and their relation to the causes of disease.

Veterinary Virology is a 3 credit lecture course that is designed for veterinary students in the second year of the professional curriculum. The course provides basic and

fundamental knowledge on the classification, pathogenesis, and diagnosis of viral pathogens affecting common veterinary species, including ovine, caprine, feline, canine, equine, bovine, avian, and porcine species. In addition, the course is designed to provide adequate knowledge and training for veterinarians in practice on the prevention and management of these viral diseases.

Note
Two hours recitation and three hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: VDMP 817.

Typically Offered
Fall

VDMP 832 - General Pathology

Credits: 4

Etiology, pathogenesis, lesions, and termination of processes of disease, including inflammation, necrosis, regeneration, oncology, and disturbances of metabolism, circulation, and growth.

Note
Three hours lecture and four hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: AP 806, AP 816 and AP 810.

Typically Offered
Fall

VDMP 834 - Veterinary Parasitology

Credits: 4

Study of the helminth, arthropod, and protozoan parasites of companion and food animals. Emphases are on diagnosis, clinical signs, lesions, treatment, control epidemiology, and public heath aspects of parasitic disease.

Repeat for Credit
N

Requisites
Prerequisite: AP 810, AP 804, AP 818 and DMP 817 & DMP 818. Must be 2nd yr student in the Veterinary Curriculum.

Typically Offered
Fall

VDMP 835 - Clinical Pathology II

Credits: 3

Principles, application and interpretation of clinical laboratory procedures in clinical cases

Two credits lecture, 1 credit lab.

Repeat for Credit
N

Requisites
Prerequisite: VDMP 811 Clinical Pathology I

Typically Offered
Fall

VDMP 841 - Veterinary Public Health

Credits: 2

The linkages between human health and animal health and production. Topics include zoonotic disease, emerging and exotic animal diseases, disaster preparedness, regulatory and community health issues focusing on the role of the veterinarian in all.

Note
Two hours lecture per week.

Repeat for Credit
N

Requisites
Prerequisite: Second-year standing in the College of Veterinary Medicine and VDMP 818.

Typically Offered
Spring

VDMP 857 - Systemic Pathology

Credits: 5

Pathology of the organ systems of domestic animals including gross and microscopic study of lesions.

Note
Three hours lecture and six hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: VDMP 832.

Typically Offered
Spring

VDMP 888 - Globalization, Cooperation, & the Food Trade

Credits: 1

This course will focus on issues and topics including, but not limited to, disputes in the international agricultural and food trade, new concepts such as Food and Agriculture Security, and the food-related challenges faced by wealthy as well as economically poor societies. The course will also address such important topics as the roles played by innovation and investment in the agricultural and food system, the importance of cross-border cooperation in regulation and trade, and the accomplishments of public health and trade policy thought leaders across history.

Repeat for Credit
N

Typically Offered
Fall, Spring

VDMP 891 - DMP Veterinary Medicine Elective

Credits: 1-3

Special topics for veterinary students in the disciplines offered by the department, including: Immunology, Parasitology, Microbiology, Toxicology, Pathology, Epidemiology, Biosafety and Biosecurity, Herd Disease Outbreak Investigation Techniques, Laboratory Animal Science, Laboratory Diagnosis, and Exotoxicology.

Note
Lecture or combination lecture with lab.

Repeat for Credit
Y

Requisites
Prerequisite: 1st, 2nd, or 3rd year students in Veterinary Medicine.

Typically Offered
Fall, Spring

VDMP 902 - Diagnostic Medicine

Credits: 2

Practical experience in necropsy procedures and laboratory findings.

Repeat for Credit
N

Requisites
Prerequisite: Fourth-year standing in the College of Veterinary Medicine.

Typically Offered
Fall, Spring, Summer

VDMP 911 - Dairy Production Medicine

Credits: 3

This course will be conducted using both in-class discussions and field experiences on Kansas dairies. The discussion portion will incorporate about 60% of class time, and field experiences 40%.

Repeat for Credit
N

Requisites
Prerequisite: 4th year standing in the College of Ve

Typically Offered
Other

WOEM 201 - Firearms, Cartridges and Ballistics

Credits: 1

This course will cover the types and functions of firearms used in hunting/shooting sports to include rifles, shotguns and handguns. Basic firearms maintenance will also be covered in this course.

Note
Class held off campus. Minimum 15 contact hours.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Fall

WOEM 202 - Rifle and Handgun Range Design, Construction and Operations

Credits: 1

This course covers the design and construction of rifle/handgun shooting ranges based on national standards. The course will also cover operational issues including events planning and implementation.

Note
Class held off campus at Fancy Creek State Shooting Range over a weekend. Minimum 15 contact hours.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Fall

WOEM 203 - Bowhunting Equipment and Skills

Credits: 1

This course covers the bowhunting equipment currently used for hunting. Bowhunting skills to include distance estimation, shot placement, etc. are also covered in this course.

Note
Class held off campus at Fancy Creek State Shooting Range over a weekend. Minimum 15 contact hours.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Fall

WOEM 205 - Sporting Clays Range Development and Operations

Credits: 1

This course will cover the history and present day rules of sporting clays, the development of sporting clays ranges and their ongoing operations and maintenance.

Note
Class held off campus at Flint Oak Hunting/Shooting Resort, Fall River, Kansas over a weekend. Minimum 15 contact hours.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Spring

WOEM 206 - Trap and Skeet Range Development and Operations

Credits: 1

This course will cover the development of "trap" and "skeet" shooting ranges. Operating principles will be covered to include staffing, event planning and implementation.

Note
Class held off campus at Flint Oak Hunting/Shooting Resort, Fall River, Kansas, over a weekend. Minimum 15 contact hours.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor

Enterprise Management majors.

Typically Offered
Spring

WOEM 250 - Introduction to Wildlife and Outdoor Enterprise Management

Credits: 1

This course covers the wildlife and outdoor enterprise management business and profession in North America and worldwide.

Note
One hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

WOEM 350 - Fauna and Flora of the Great Plains

Credits: 3

Identification, natural history, and distributions of fauna and flora species occurring in the Great Plains.

Repeat for Credit
N

Requisites
Prerequisites: BIOL 101 or BIOL 198.

Typically Offered
Fall

K-State 8
Natural and Physical Sciences

WOEM 400 - Pond and Sportfish Management

Credits: 3

Examines principles to manage ponds and recreational sportfish populations in North America including: pond design, construction, and maintenance, sportfish stocking and harvesting, life history of common species, fish habitat requirements, aquatic vegetation identification and control, and fundamentals of operating aquatic guiding operations.

Note
Two one-hour lectures and one three-hour lab per week. Field trips required.

Repeat for Credit
N

Requisites
Prerequisite: Available only to Wildlife and Outdoor Enterprise Management and Division of Biology majors.

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility

WOEM 495 - Undergraduate Research in Wildlife and Outdoor Enterprise Management

Credits: 0-3

Undergraduate students work with faculty mentors on projects involving various elements of research in WOEM including identifying a problem, designing and conducting experiments, interpreting and communicating the research results. The completed project must be presented at a professional forum, and students are required to write a final project report on completion of their project.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

WOEM 555 - Big Game Management

Credits: 3

Application of practices to manage North American big

game species including harvest management, land management, ethics, laws, species' habitat requirements, natural history, daily and seasonal activities of each species, socioeconomic factors, and basics of managing a hunting operation.

Note
Two hours lecture and two hours lab a week. Field trips required.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 101 or BIOL 198

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

WOEM 560 - Upland Game Bird Management

Credits: 3

Application of practices to manage upland game birds in North America to include: harvest management, land management, ethics, laws, species' habitat requirements, daily and seasonal activities of each species, natural history, socioeconomic factors, and basics of managing a hunting operation.

Note
One weekend field trip required. Two hours lecture and two hours lab a week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 101 or BIOL 198

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

WOEM 561 - Waterfowl and Wetlands Management

Credits: 3

This course explores the natural history of waterfowl and wetland birds and habitat management. It includes basic information on the habitat requirements, management techniques, ranges, migration patters, history, problems, diseases, and identification of the waterfowl resources of North America. Professional principles and practices associated with hunting waterfowl species in North America to include: ethics, laws, species' habitat requirements, and daily and seasonal activities of each species, methods of harvest, dog handling, post-harvest handling and clientele interactions. Includes the following success skills: Communicates Effectively and Maintains Professional Skills and Attitudes.

Note
Two one hour lectures and one two hour lab per week.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 101 or BIOL 198

Typically Offered
Fall

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

WOEM 562 - Advanced Wildlife Habitat Management

Credits: 4

Theory and practice of managing terrestrial and aquatic vegetation for wildlife production.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 333.

Typically Offered
Fall

WOEM 570 - Internship for Wildlife and Outdoor Enterprise Management

Credits: 6-10

Intensive, paid practical experience with an approved hunting and/or shooting sports and/or fishing business.

Note
This is a three to seven month continuous experience.

Repeat for Credit
N

Requisites
Prerequisite: Available only to students majoring in Wildlife & Outdoor Enterprise Management.

Typically Offered
Fall, Spring, Summer

K-State 8
Ethical Reasoning and Responsibility
Historical Perspectives

WOEM 590 - Problems in Wildlife and Outdoor Enterprise Management

Credits: 0-6

Independent study and/or research project development guided by faculty in Wildlife and Outdoor Enterprise Management.

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

WOEM 595 - Wildlife and Outdoor Enterprise Management Senior Seminar

Credits: 1

This course will be used as a capstone course for the Wildlife and Outdoor Enterprise Management curriculum; to include case studies and field experience reviews.

Note
One hour recitation a week.

Repeat for Credit
N

Requisites
Prerequisite: Senior standing. Available only to Wildlife and Outdoor Enterprise Management majors.

Typically Offered
Spring

K-State 8
Ethical Reasoning and Responsibility

WOEM 596 - Wildlife and Outdoor Enterprise Management Study Abroad

Credits: 3

Seminar and travel course designed to prepare students before an international study abroad experience focused on several facets of wildlife and conservation, natural resources, diseases, and land management research. Upon completion of travel, students will analyze, critique, and report their experiences. Course will focus on appropriate oral and written documentation of the experience.

Note
Instructor permission

Repeat for Credit
Y

Typically Offered
Fall, Spring, Summer

K-State 8
Global Issues and Perspectives

WOEM 620 - Human-Wildlife Conflicts

Credits: 3

This course explores the theory and practice of assessing and controlling damage done by wild and feral vertebrate animals, especially mammals and birds. Content covers the philosophical, biological, and practical basis for managing human-wildlife conflicts. It includes basic information on use of traps, toxicants, repellents, exclusion and other wildlife control methods. Emphasis is on protecting agricultural crops and livestock, forest resources, and property.

Repeat for Credit
N

Requisites
Prerequisite: BIOL 198

Typically Offered
Spring-Odd Years

K-State 8
Ethical Reasoning and Responsibility
Natural and Physical Sciences

WOEM 855 - Resource Selection Methods and Theory

Credits: 3

Develops graduate students' knowledge and application of theory and methods used to evaluate the resource selection and distribution of wildlife and plant species.

Repeat for Credit
N

Typically Offered
Fall-Even Years

The College of Agriculture offers 14 bachelor of science degree programs, 10 master of science programs, 9 programs leading to the PhD, and a pre-veterinary medicine program. The programs and options provide flexibility to meet the needs of students who will enter varied careers in the food chain and related agribusinesses.

The profession

Professional agriculture is the application of the physical, biological and social sciences and the principles of management to food production, preservation and processing, crop and livestock production, marketing and processing, culture of flowers, turf grass, and ornamentals, life processes of plants and animals, natural resources management, economic development, agricultural education and communication, and related fields.

Faculty

Faculty in the College of Agriculture are actively involved in research and publish their findings regularly in scientific journals. They work closely with Extension specialists. This integration of teaching, research, and Extension helps ensure that courses are current and relevant.

Facilities

Effective instruction in the application of basic sciences to modern agricultural industries requires land, buildings, livestock, and equipment. More than 4,000 acres of land are used for experimental work and for instruction.

A feed mill, flour mill, and bakery include modern equipment from eight countries, and new facilities have recently been constructed. Colbert Hills Golf Course supports teaching and research related to the golf course management program. Greenhouses, laboratories, and field plots provide resources for horticulture and agronomy courses.

Modern animal industry and dairy and poultry units near campus contain some of the latest equipment for teaching and research in nutrition, genetics, and food processing (meat, milk, eggs). Livestock of many breeds, plus various soil types, field crops, fruits, vegetables, and ornamentals, are used in teaching and research.

Internships and cooperative education

Internships and co-op programs throughout the state and nation are available with agribusiness firms and agencies and in production agriculture to gain on-the-job experience. Specific internship and co-op requirements vary among departments and interdepartmental programs. Students may earn academic credit and salaries for approved internships and co-op experiences. The number of internships and co-op programs in the College of Agriculture is growing as companies seek to attract K-State graduates.

Extracurricular activities

Leadership, communication, and interpersonal skills are essential for today's agriculture graduate. K-State offers many opportunities to become involved on campus through departmental clubs, service organizations, student government, agricultural competition teams, and much more. Each contributes to greater personal and professional development.

International study opportunities

The College of Agriculture supports various programs for international experiential learning through agricultural study tours, semester abroad programs, and summer internships in other countries. The college also offers international study scholarships. An international agriculture minor that requires completion of an international experience is available to agriculture majors. Students in all majors are encouraged to include foreign language and international culture and business courses in their curricula. International travel and study programs are coordinated by the associate dean in 135 Waters Hall.

Scholarships

All students applying for College of Agriculture scholarships must complete and file electronically the K-State scholarship application. By completing the university's scholarship application, you become eligible for all university, college, and departmental scholarships for which you are qualified. Scholarship applications for entering freshmen and transfer students should be submitted by November 1 to receive priority consideration by the university and college.

General Requirements

Selection of a major

Students usually select a curriculum or major when they enter the college. They are provided academic advisors in their major fields. Students enroll in general agriculture if they want to enter some part of professional agriculture but are not yet ready to identify a particular major. These students are urged to choose majors before the end of the freshman year.

The curriculum or major may be changed at almost any time and with relative ease, though a change after the sophomore year may delay graduation.

Electives permit adaptation of the program to the student's goals. The student should work with an advisor to develop the most beneficial and effective academic program.

Many students work part time at K-State laboratories, greenhouses, and farms. This experience adds greatly to students' learning and understanding.

Selection of an option

Most major fields of study in agriculture provide for selection of groups of courses known as options. Some typical options include:

Business and industries
Students who wish to emphasize business, marketing, and management related to agribusiness firms may select an option in business and industries. Course work includes classes in business administration and economics.

Production/technical
Those who plan to enter farming, ranching, horticultural production, landscape and turf management, or other technical positions in agriculture or agribusiness may select a production/ technical option. Study in one of these options allows students to gain more depth in the technical aspects of their majors.

Sciences/professional
A science/professional option prepares students for research and graduate and professional schools. This option allows students to structure programs strong in the basic sciences and/or other areas that will enhance success in graduate and professional schools such as law and veterinary medicine. Additional options are available in certain curricula or majors to allow students to develop specific strengths or specializations.

General Education: K-State Core

Please click on the following link to learn more about General Education: K-State Core.

Program Choices

General agriculture

Students who are undecided regarding the selection of a major in agriculture may want to enroll in the general agriculture exploratory program. Courses taken in this area are selected with the help of an advisor to meet basic requirements and expose students to potential areas of study in agriculture through introductory course work in one or more departments.

Natural resource management

Students interested in natural resource management can pursue programs in park management and conservation; environmental communications; range management; or soil and environmental science.

A major in park management and conservation with options in law enforcement, park manager, recreation business, or interpretation can be earned in the Department of Horticulture and Natural Resources.

Range management and soil and environmental science options are available through the Department of Agronomy.

Students may major in agricultural and natural resource communications through the Department of Communications and Agricultural Education.

These programs provide training for individuals interested in interpretation and application of ecological principles to environmental problems involving natural resources. Each program contains courses in the social sciences and humanities to help students become sensitive to the interactions between humans and their environmental surroundings. Courses in the physical and biological sciences help students understand and solve environmental problems, and courses in communications assist them in

interpreting, conveying, and employing solutions. Many students in these programs also complete the secondary major in natural resources and environmental sciences.

Pre-veterinary medicine program (UVMA) and Bachelor of Science in Veterinary Medicine (BVMA)

The pre-veterinary medicine program in the College of Agriculture benefits students working toward admission to veterinary school. Students work with an advisor to find the best classes for their individual needs. While fulfilling the pre-vet curriculum, students can take additional courses to apply their skills.

The College of Veterinary Medicine does not offer a Bachelor of Science degree. The Doctor of Veterinary Medicine (DVM) is awarded after successfully completing a minimum of 64 hours of pre-professional requirements and four years of the professional curriculum.

The Bachelor of Science in Veterinary Medicine (BVMA): College of Agriculture students admitted into a College of Veterinary Medicine without a Bachelor of Science degree from Kansas State University will be granted a Bachelor of Science in Veterinary Medicine (BVMA) after successfully completing two years of the professional program. Go to the **Veterinary Medicine (BS)** curriculum for additional details.

Dual degrees/dual majors

The agribusiness complex of industries (processing, preservation, distribution, and retailing of farm-produced food, and manufacture and sale of farm equipment, feeds, and agricultural chemicals) employs a variety of professionally trained personnel. The type of education required varies with the nature of the work performed. A dual degree or a dual major may be appropriate, depending on the student's occupational objectives.

Dual degrees may be earned by a student who desires a BS degree in some discipline in agriculture along with a bachelors degree in some other college at K-State. To earn a dual degree, the student must complete the requirements for each degree. The student must complete all course requirements for each degree. Within the College of Agriculture, most majors receive a bachelor of science degree.

Dual majors are completed by students who wish to complete two different programs of study in the College of Agriculture while earning a bachelor of science degree. This approach allows the student to select two majors to give greater depth and breadth to the educational program. The student is required to complete the requirements for both majors and earns a bachelor of science degree. Notation of a Dual Major will be made on the student's transcript, however, only one BS will be awarded.

Secondary majors

Certain departmental courses have been approved for credit toward secondary majors in gerontology, global food systems leadership, international studies, and natural resources and environmental sciences. A popular choice that links well with several agriculture majors is the natural resources and environmental sciences secondary major.

Minors

To pursue a minor in the College of Agriculture, students must: (1) file a declaration of intent to pursue a minor with the minor-granting department, and (2) consult with an advisor in the minor-granting department prior to enrolling in the last three courses used to satisfy minor requirements. See departmental listings for more information about requirements for those minors.

- Agribusiness
- Agricultural economics

- Agronomy
- Animal sciences and industry
- Entomology
- Floral Design
- Food science
- Grain Science and Industry: Bakery Science, Cereal Chemistry, Pet Food Science
- Horticulture
- International agriculture
- Park Management and Conservation
- Pet Food Science
- Plant pathology

Certificates

Undergraduate certificate programs are offered in the college.

- Agricultural and Occupational Safety and Health
- Animal Health
- Animal Nutrition
- Baking Technology
- Dairy Science
- Equine Science
- Feed and Pet Food Manufacturing
- Food Safety and Quality
- Grain Processing
- Meat science
- Beef Cattle Feedlot Management
- Beef Cattle Ranch Management

University Honors Program

Please click on the following link to learn more about the University Honors Program .

Agriculture Scholars Program

The College of Agriculture Honors and Scholars Program enables capable undergraduate students to expand their skills and stimulate their curiosity for continual learning. Several unique benefits result from participation in the Honors and Scholars Programs. Students can explore a career area of interest through working closely with a faculty member on a research/creative project or other scholarly activity. Students may have an opportunity to attend professional meetings to give presentations and have the potential for publication of the final paper in a student or professional research journal. Participants are recognized at the College of Agriculture student recognition program and at commencement. Funding for undergraduate research project expenses are also available.

Students, on advice from faculty members, propose, prepare, and conduct a project of their choice. This activity provides students with hands-on experience in the functioning of persons in academia and, therefore, must be of a creative nature. This project will be relevant to one or more of the missions of land-grant institutions: research, Extension, and/or instruction. The research project

is typically completed during the junior or senior year. Supporting courses taken during the freshman and sophomore years are designed to build toward the development of a successful project proposal.

Eligibility - Agriculture Scholars Program

New freshman agriculture students with a 28 ACT (or equivalent SAT) or in the top 10 percent of their high school graduating class, new transfer students with a 3.5 GPA on 24 hours or more of transfer credit, and continuing students with a 3.5 or above K-State GPA are invited to join the Agriculture Scholars Program.

College of Agriculture Scholars Program Requirements

To graduate as a College of Agriculture scholar, students must have a cumulative K-State GPA of 3.4 or higher and complete the following 4 credits:

- **GENAG 000** Agriculture Scholars Program (0 credit) Enroll each semester
- **GENAG 396** Research Topic and Proposal Development
- **GENAG 515** Honors/Scholars Project: (2 credits) Written and oral report required upon completion of research or creative project. Project must be approved by college advisory committee and supervised by a faculty mentor.
- In addition to the GENAG courses, students are expected to complete at least one three-credit course numbered 600 or above in their curriculum

Research/Creative Project

The core of the both the College of Agriculture Scholars Program and the University Honors Program is the Research/Creative project. Working with a faculty mentor, students propose, prepare and conduct an honors/scholars project of their choice. The intent is to provide a creative academic experience relevant to the land-grant missions of research, Extension and instruction. The project is typically completed during the junior or senior year.

Questions about membership and requirements should be directed to the College of Agriculture Academic Programs Office in 135 Waters Hall.

Agricultural Economics

Allen M. Featherstone, Head

342 Waters Hall
785-532-6702
Fax: 785-532-6925
www.ageconomics.k-state.edu

Our curricula offers students the skills needed in business, while taking into account their own interests and career goals. The agribusiness degree has three options: agribusiness, agricultural sales, and international. The agricultural economics major has two options: specialty and farm management. Two pre-professional programs (pre-law and pre-vet) are available under the specialty option.

Bachelor of Science

Agribusiness - Agribusiness (BS)

Students will complete course work in science, math, and communication, plus courses in agribusiness and agricultural economics. To give a better understanding of agribusiness and the broad range the field covers, students will choose from three degree options: agribusiness, agricultural sales, and international agribusiness.

This program of study provides fundamental agribusiness content with course work in agricultural economics, agribusiness, and business courses that will prepare graduates for the industry and its related issues.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Agricultural Economics: 27 credit hours

- AGEC 105 - Agricultural Economics and Agribusiness Orientation **Credits:** 1
- AGEC 115 - Decision Tools for Agricultural Economics and Agribusiness **Credits:** 2
- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
  OR
- AGEC 121 - Honors Agricultural Economics and Agribusiness **Credits:** 3
- AGEC 315 - Contemporary Issues in Global Food and Agricultural Systems **Credits:** 3
- AGEC 318 - Food and Agribusiness Management **Credits:** 3
- AGEC 500 - Production Economics **Credits:** 3
- AGEC 501 - Data Analysis and Optimization **Credits:** 3
- AGEC 505 - Agricultural Market Structures **Credits:** 3
- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
  OR
- AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics **Credits:** 3
- AGEC 599 - Food and Agribusiness Management Strategies **Credits:** 3

Agricultural Economics Electives: 15 credit hours

Include at least three credit hours numbered 598 or above.

No more than 3 combined total credits from AGEC 460, AGEC 751, and GENAG 515 can be used toward Ag Econ Electives.

- AGEC 411 - Agricultural Policy **Credits:** 3
- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 470 - Cooperative Management **Credits:** 3
- AGEC 513 - Agricultural Finance **Credits:** 3
- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
- AGEC 516 - Agricultural Law and Economics **Credits:** 3
- AGEC 520 - Market Fundamentals and Futures/Options Trading **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGEC 535 - Agricultural Sales **Credits:** 3
- AGEC 560 - Data Analytics for Agricultural Economics **Credits:** 3
- AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics **Credits:** 3

Choose at least one course from the list below:

- AGEC 598 - Farm Management Strategies **Credits:** 3
- AGEC 605 - Price Analysis and Forecasting **Credits:** 3
- AGEC 610 - Current Agriculture and Natural Resource Policy Issues **Credits:** 3
- AGEC 615 - Global Agricultural and Economic Development **Credits:** 3
- AGEC 623 - International Agricultural Trade **Credits:** 3
- AGEC 632 - Agribusiness Logistics **Credits:** 3
- AGEC 680 - Risk Management **Credits:** 3
- AGEC 710 - Comparative Food and Agriculture Systems **Credits:** 3
- AGEC 712 - Optimization Techniques for Agricultural Economics **Credits:** 3
- ECON 631 - Principles of Transportation **Credits:** 3

Cannot take more than 3 credit hours from the courses listed below:

- GENAG 515 - Honors/Scholars Project **Credits:** 0-1
- AGEC 460 - International Food and Agribusiness Study Tour **Credits:** 0-6
- AGEC 751 - Risk Management Fellows Seminar **Credits:** 1

Economics/Business: 21 credit hours

- ACCTG 231 - Introduction to Managerial Accounting **Credits:** 3
- ACCTG 241 - Introduction to Financial Accounting **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 510 - Intermediate Macroeconomics **Credits:** 3
- MANGT 220 - Principles of Management **Credits:** 3

ACCTG, ENTRP, FINAN, MANGT, MIS, MKTG, or SALES Elective (200-level or above) 3 credit hours
ACCTG, ENTRP, FINAN, MANGT, MIS, MKTG or SALES Elective (500-level or above) 3 credit hours

Agricultural and Food Science Technology Electives: 6 credit hours

See department list for courses.

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

Agricultural and Food Science Technology or Business Electives: 6 credit hours

Select from many non-AGEC courses in agriculture not used in Ag and Food Science Technology restricted electives, FNDH 132, FNDH 301, or any College of Business class (>300 level).

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

Communication: 3 credit hours

Communication elective is required to be at the 300-level or above.

Courses in this block cannot be used to meet K-State Core requirements.

- COMM 311 - Business and Professional Speaking **Credits:** 3
- COMM 321 - Advanced Public Speaking **Credits:** 3
- COMM 130 - Interpersonal Communication **Credits:** 3
- COMM 323 - Nonverbal Communication **Credits:** 3
- COMM 326 - Group Communication **Credits:** 3
- COMM 535 - Communication and Leadership **Credits:** 3
- ENGL 417 - Written Communication for the Workplace **Credits:** 3
- ENGL 516 - Written Communication for the Sciences **Credits:** 3

  Any Modern Language course 300 or above

Math and Statistics: 3 credit hours

The courses with a KSC designation are required if not met through University Core Requirements.

Statistics

- STAT 250 - Business and Economic Statistics I **Credits:** 3

  Math: Select 1 course
- MATH 205 - General Calculus **Credits:** 3

  KSC-030
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Finance Overlay: 3 credit hours

Students must take at least one of the courses below. Course can fulfil other curriculum requirements.

- AGEC 513 - Agricultural Finance **Credits:** 3
- FINAN 450 - Principles of Finance **Credits:** 3

Unrestricted electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Agribusiness - Agricultural Sales (BS)

Students will complete course work in science, math, and communication, plus courses in agribusiness and agricultural economics. To give a better understanding of agribusiness and the broad range the field covers, students will choose from three degree options: agribusiness, international agribusiness, and agricultural sales.

The agricultural sales program provides fundamental agribusiness content with course work in agricultural economics, agribusiness, and business courses that will prepare graduates for the sales industry and its related issues.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Agricultural Economics: 33 credit hours

- AGEC 105 - Agricultural Economics and Agribusiness Orientation **Credits:** 1
- AGEC 115 - Decision Tools for Agricultural Economics and Agribusiness **Credits:** 2

K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Agribusiness - International (BS)

Students will complete course work in science, math, and communication, plus courses in agribusiness and agricultural economics. To give a better understanding of agribusiness and the broad range the field covers, students will choose from three degree options: agribusiness, agricultural sales, and international agribusiness.

This program focuses on global issues facing agribusinesses today. Students complete basic agribusiness course work, study another language, and participate in an international experience. This is crucial to grasp the wide range of issues facing international agribusinesses and their place in the global economy.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. - MATH 205 - General Calculus **Credits:** 3 *KSC-030*
- STAT 250 - Business and Economic Statistics I **Credits:** 3

Geography: (3 credit hours)

- GEOG 100 - World Geography & Globalization **Credits:** 3

International Experience Overlay

Students are required to have an approved international experience. This course may also fulfill other requirements.

Please see departmental list.

Finance Overlay: (3 credit hours)

Must take one of the following courses which can be used in other parts of the curriculum as well.

- AGEC 513 - Agricultural Finance **Credits:** 3
  OR
- FINAN 450 - Principles of Finance **Credits:** 3

Unrestricted electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Agricultural Economics - Farm Management (BS)

The agricultural economics program balances the theoretical and practical applications of agricultural economics to give students the best grasp on emerging issues facing professionals in food and agriculture today. Students earn a BS with a major in agricultural economics.

The Farm Management Option teaches how to apply agricultural economics to the management of the farm, ranch, or commercial feedlot. This program includes course work in livestock and crop production, agricultural technology, and agricultural economics.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

- AGEC 598 - Farm Management Strategies **Credits:** 3

Agricultural Economics Electives: 15 credit hours

Include at least three credit hours numbered 600 or above.

No more than 3 combined total credits from AGEC 460, AGEC 751, and GENAG 515 can be used toward Ag Econ Electives.

- AGEC 411 - Agricultural Policy **Credits:** 3
- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 470 - Cooperative Management **Credits:** 3
- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
- AGEC 516 - Agricultural Law and Economics **Credits:** 3
- AGEC 520 - Market Fundamentals and Futures/Options Trading **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGEC 535 - Agricultural Sales **Credits:** 3
- AGEC 560 - Data Analytics for Agricultural Economics **Credits:** 3
- AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics **Credits:** 3
- AGEC 599 - Food and Agribusiness Management Strategies **Credits:** 3

Choose at least one course from the list below:

- AGEC 605 - Price Analysis and Forecasting **Credits:** 3
- AGEC 610 - Current Agriculture and Natural Resource Policy Issues **Credits:** 3
- AGEC 615 - Global Agricultural and Economic Development **Credits:** 3
- AGEC 623 - International Agricultural Trade **Credits:** 3
- AGEC 632 - Agribusiness Logistics **Credits:** 3
- AGEC 680 - Risk Management **Credits:** 3
- AGEC 710 - Comparative Food and Agriculture Systems **Credits:** 3
- AGEC 712 - Optimization Techniques for Agricultural Economics **Credits:** 3
- ECON 631 - Principles of Transportation **Credits:** 3

Cannot take more than 3 credit hours from the courses listed below:

- AGEC 460 - International Food and Agribusiness Study Tour **Credits:** 0-6

- AGEC 751 - Risk Management Fellows Seminar **Credits:** 1
- GENAG 515 - Honors/Scholars Project **Credits:** 0-1

Agriculture: 15 credit hours

- AGRON 120 - Crop Science **Credits:** 3
- AGRON 121 - Crop Science Laboratory **Credits:** 1
- AGRON 205 - Soils **Credits:** 3
- AGRON 206 - Soils Laboratory **Credits:** 1
- ASI 102 - Principles of Animal Science **Credits:** 3
- ATM 160 - Engineered Systems and Technology in Agriculture **Credits:** 3

Select 1 credit hour

- ASI 105 - Livestock Lab **Credits:** 1
- ASI 106 - Dairy Lab **Credits:** 0.5
- ASI 107 - Companion Animal Lab **Credits:** 0.5
- ASI 108 - Poultry Lab **Credits:** 0.5
- ASI 109 - Horse Lab **Credits:** 0.5

Agricultural and Food Science Technology Electives: 6 credit hours

See department list for courses.

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

Communication: 3 credit hours

Communication elective is required to be at the 300-level or above.

Courses in this block cannot be used to meet K-State Core requirements.

- COMM 311 - Business and Professional Speaking **Credits:** 3
- COMM 321 - Advanced Public Speaking **Credits:** 3
- COMM 130 - Interpersonal Communication **Credits:** 3
- COMM 323 - Nonverbal Communication **Credits:** 3
- COMM 326 - Group Communication **Credits:** 3
- COMM 535 - Communication and Leadership **Credits:** 3
- ENGL 417 - Written Communication for the Workplace **Credits:** 3
- ENGL 516 - Written Communication for the Sciences **Credits:** 3

Any Modern Language course at the 300-level or above.

Economics/Business: 12 credit hours

- ACCTG 231 - Introduction to Managerial Accounting **Credits:** 3
- ACCTG 241 - Introduction to Financial Accounting **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 510 - Intermediate Macroeconomics **Credits:** 3

Math and Statistics: 3 credit hours

The courses with a KSC designation are required if not met through University Core Requirements.

Statistics

- STAT 250 - Business and Economic Statistics I **Credits:** 3

Math: Select 1 course

- MATH 205 - General Calculus **Credits:** 3
  KSC-030
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Unrestricted electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Agricultural Economics - Specialty (BS)

The agricultural economics program balances the theoretical and practical applications of agricultural economics to give students the best grasp on emerging issues facing professionals in food and agriculture today. Students earn a Bachelor of Science with a major in agricultural economics.

By combining agricultural economics with another degree, minor, or pre-professional program, students can develop a program that fits their interests and career goals. Students have combined agricultural economics with political science, computer science, nutrition, journalism, statistics, animal science, agronomy, grain science, accounting, and business.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Agricultural Economics: 18 credit hours

- AGEC 105 - Agricultural Economics and Agribusiness Orientation **Credits:** 1
- AGEC 115 - Decision Tools for Agricultural Economics and Agribusiness **Credits:** 2
- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
  OR
- AGEC 121 - Honors Agricultural Economics and Agribusiness **Credits:** 3
- AGEC 315 - Contemporary Issues in Global Food and Agricultural Systems **Credits:** 3

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Specialty: 15 credit hours

A Specialty may be defined in generally any focus area. Typically, all 15 credit hours are from the same department/field, however, it can be possible to use credits from multiple-closely aligned fields; students should work with their advisor in defining their Specialty and courses. A Specialty will consist of 15 total credit hours with a minimum of 3 hours 300 level or above, and 6 hours 500 level or above. (Minors, Certificates, Modern Languages, and Accounting are exempt from the course level requirement). Specialty areas may include but are not limited to political science, computer science, nutrition, journalism,

statistics, animal science, agronomy, grain science, accounting, finance, business, leadership, various modern languages, pre-veterinary medicine, pre-law, natural resources and environmental sciences, and agricultural communications.

Finance Overlay: 3 credit hours

Students must take at least one of the courses below. Course can fulfil other curriculum requirements.

- AGEC 513 - Agricultural Finance **Credits:** 3
  OR
- FINAN 450 - Principles of Finance **Credits:** 3

Unrestricted electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Minor

Agribusiness Minor

To earn the Agribusiness Minor students must complete the following 15 credit hours of required Ag Econ courses. In addition prerequisites associated with the minor must be followed. No more than six credit hours of transfer courses may be used for the minor requirements. Students cannot also be earning a major within the same department. **Students must earn a minimum 2.0 cum GPA in the required courses.**

Program requirements

Prerequisites (in addition to any prerequisites required for specific AGEC courses taken)

- ACCTG 231 - Introduction to Managerial Accounting **Credits:** 3
- MATH 205 - General Calculus **Credits:** 3

Choose from the following:

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
  or
- ECON 120 - Principles of Microeconomics **Credits:** 3

Required

- AGEC 318 - Food and Agribusiness Management **Credits:** 3

- AGEC 500 - Production Economics **Credits:** 3
- AGEC 505 - Agricultural Market Structures **Credits:** 3
- AGEC 513 - Agricultural Finance **Credits:** 3

At least 3 credit hours from the following list

- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
- AGEC 535 - Agricultural Sales **Credits:** 3

Total credit hours: (15)

Agricultural Economics Minor

To receive the Agricultural Economics minor, students must complete the following 15 credit hours of required Ag Econ courses. In addition prerequisites associated with the minor must be followed. No more than six credit hours of transfer courses may be used for the minor requirements. Students cannot also be earning a major within the same department. Students must earn a minimum 2.0 cum GPA in the required courses.

Program requirements

Prerequisites (in addition to any prerequisites required for specific AGEC courses taken)

- MATH 205 - General Calculus **Credits:** 3

Choose from the following:

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3

or

- ECON 120 - Principles of Microeconomics **Credits:** 3

Required

- AGEC 500 - Production Economics **Credits:** 3
- AGEC 505 - Agricultural Market Structures **Credits:** 3

Select 9 credits with at least 3 credits above 500:

- AGEC 308 - Farm and Ranch Management **Credits:** 3

or

- AGEC 318 - Food and Agribusiness Management **Credits:** 3
- AGEC 315 - Contemporary Issues in Global Food and Agricultural Systems **Credits:** 3
- AGEC 411 - Agricultural Policy **Credits:** 3
- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 470 - Cooperative Management **Credits:** 3

- AGEC 501 - Data Analysis and Optimization **Credits:** 3
- AGEC 513 - Agricultural Finance **Credits:** 3
- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
- AGEC 516 - Agricultural Law and Economics **Credits:** 3
- AGEC 520 - Market Fundamentals and Futures/Options Trading **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGEC 535 - Agricultural Sales **Credits:** 3
- AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics **Credits:** 3
- AGEC 598 - Farm Management Strategies **Credits:** 3
- AGEC 599 - Food and Agribusiness Management Strategies **Credits:** 3
- AGEC 605 - Price Analysis and Forecasting **Credits:** 3
- AGEC 610 - Current Agriculture and Natural Resource Policy Issues **Credits:** 3
- AGEC 615 - Global Agricultural and Economic Development **Credits:** 3
- AGEC 623 - International Agricultural Trade **Credits:** 3
- AGEC 632 - Agribusiness Logistics **Credits:** 3
- AGEC 680 - Risk Management **Credits:** 3
- AGEC 710 - Comparative Food and Agriculture Systems **Credits:** 3
- AGEC 712 - Optimization Techniques for Agricultural Economics **Credits:** 3
- ECON 510 - Intermediate Macroeconomics **Credits:** 3
- ECON 631 - Principles of Transportation **Credits:** 3

Total credit hours: (15)

Agricultural Sales Minor

To earn the Agricultural Sales Minor students must complete the following **15 credit hours** of courses. In addition, prerequisites associated with the minor must be followed. No more than six credit hours of transfer courses may be used for the minor requirements. **Students must earn a minimum 2.0 cum GPA in the required courses.**

Program requirements

Prerequisites (in addition to any prerequisites required for specific courses taken)

Choose one of the following:

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3
- AGEC 121 - Honors Agricultural Economics and Agribusiness **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3

Required courses

- AGEC 515 - Food and Agribusiness Marketing **Credits:** 3
- AGEC 535 - Agricultural Sales **Credits:** 3

Choose 6-9 credits from the following list:

- AGEC 318 - Food and Agribusiness Management **Credits:** 3
- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 470 - Cooperative Management **Credits:** 3
- AGEC 570 - Food Manufacturing, Distribution, and Retailing Economics **Credits:** 3

Choose 0-3 credits from the following list:

- AGEC 632 - Agribusiness Logistics **Credits:** 3
- ASI 422 - Livestock Sales Management **Credits:** 0-1
- MKTG 250 - Introduction to Marketing **Credits:** 3
- MKTG 450 - Consumer Behavior **Credits:** 3
- SALES 300 - Fundamentals of Professional Selling **Credits:** 3
- SALES 450 - Sales Technology **Credits:** 3
- SALES 451 - Sales Force Leadership **Credits:** 3
- SALES 455 - Sales Negotiation **Credits:** 3
- SALES 457 - Cooperation Selling **Credits:** 3
- SALES 453 - Advanced Selling **Credits:** 3

Total credit hours: 15

Undergraduate Certificate

Integrated Risk Management Undergraduate Certificate

The Certificate in Integrated Risk Management is designed as a multidisciplinary specialization for students whose career interest include making business decisions involving risk. The purpose of the Certificate is to provide undergraduate Student Fellows in the Center for Risk Management Education & Research (CRMER) with the opportunity to participate in a concentrated curriculum in integrated risk management concepts, tools, and applications. The course sequence of this Certificate complements and leverages the experiential learning activities Student Fellows participate in through the CRMER.

Objectives

Upon completion of the Certificate students will be prepared to:

- Identify and prioritize the types of complex and interconnected risks present in business decision making.
- Recognize how and why different firms have divergent risk tolerances and risk management strategies.
- Effectively communicate with risk management business executives to understand the rational for risk management plans, the nature of risk assessment and prioritization, and methods used to measure and monitor risk.
- Use appropriate quantitative decision tools to identify and measure risk including stochastic simulation, decision analysis, game theory, and statistical modeling.
- Understand tools companies use to manage risk including insurance, futures and derivative markets, portfolio concepts, scenario analyses, market intelligence, and redundancy and backup systems.
- Conduct risk management research and effectively communicate risk management analyses and findings in written form and in oral presentations to business executives.

Course Requirements

The Certificate in Integrated Risk Management consists of 18 credit hours. The four core courses and elective course options are currently offered from the Departments of Agricultural Economics, Finance, and Industrial Manufacturing and Systems Engineering. All courses must be taken for a letter grade to qualify for the Certificate.

Core Courses (12 credits required)

- AGEC 680 - Risk Management **Credits:** 3
- AGEC 751 - Risk Management Fellows Seminar **Credits:** 1
  Note: Students enroll in course for 1 credit hour for 3 semesters.
- FINAN 654 - Derivative Securities and Markets **Credits:** 3
- IMSE 751 - Normative Theory of Decisions and Games **Credits:** 3

Electives Courses (6 credit hours)

6 credits required not from student's major department).

- AGEC 420 - Commodity Futures **Credits:** 3
- AGEC 520 - Market Fundamentals and Futures/Options Trading **Credits:** 3
- AGEC 605 - Price Analysis and Forecasting **Credits:** 3
- AGEC 712 - Optimization Techniques for Agricultural Economics **Credits:** 3

- FINAN 623 - Financial Modeling **Credits:** 3
- FINAN 520 - Investments **Credits:** 3
- FINAN 643 - International Financial Management **Credits:** 3
- FINAN 653 - Security and Portfolio Analysis **Credits:** 3

- IMSE 560 - Introduction to Operations Research I **Credits:** 3
  or
- IMSE 680 - Quantitative Problem Solving Techniques **Credits:** 3
- IMSE 633 - Production Planning and Inventory Control **Credits:** 3
- IMSE 641 - Quality Engineering **Credits:** 3
- IMSE 643 - Industrial Simulation **Credits:** 3

Certificate Completion Notes

- Students must be accepted and either actively engaged, or completed the program, as a Student Fellow in the Center for Risk Management Education & Research to qualify for Certificate.
- The 6 credits of Elective Courses used to fill requirements for the Certificate cannot be taken in the student's primary major department.
- Students must earn a minimum of 3.0 grade point average on courses taken in the Certificate to fulfill the requirements of the Certificate in Integrated Risk Management.
- No more than 25% of total credit hours required for the Certificate may be transfer credits.
- The Certificate is offered only to degree seeking students and is not available for non-degree seeking students.

Total credit hours: (18)

The Department of Agronomy provides statewide leadership in teaching, research, and extension in crop, soil, and range sciences. Weed science, crop breeding, climatology, precision agriculture, and protecting soil and water resources are also important components of the departmental mission. Advances in these sciences have major impact on transforming the bounty of the natural resources of Kansas into the present standard of living enjoyed by its people.

Agriculture is of preeminent importance to the economy of Kansas. Responsibilities of the department relate directly to the production inputs of 65,000 farms on 47.5 million acres of cropland and rangeland in the state. Many research and extension activities are conducted cooperatively with faculty at outlying research centers, in other Departments in the College of Agriculture, other Colleges at Kansas State University, and with colleagues and organizations beyond Kansas.

Agronomists use science and natural resources like soil, water, and plants to sustain the world's food supply and maintain a quality environment. Their challenge is to understand, manage, and protect earth's vital resources while addressing humanity's basic concerns about quality of life. Agronomy is basic to food production and offers an exciting career to those interested in food, feed, and fiber production.

Bachelor of Science

Agronomy - Business and Industry (BS)

Agronomy includes crop, soil, weed, range, and environmental sciences. Students in agronomy have diverse interests, including crop production and physiology; crop breeding; soil management, fertility, and conservation; soil and water quality; physical and chemical properties of soils; forages; and range management.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Agronomy (BS) - Business and Industry Option

Agronomy: 24 credit hours

- AGRON 101 - Agronomy Orientation **Credits:** 1
- AGRON 120 - Crop Science **Credits:** 3
- AGRON 121 - Crop Science Laboratory **Credits:** 1
- AGRON 205 - Soils **Credits:** 3
- AGRON 206 - Soils Laboratory **Credits:** 1
- AGRON 330 - Weed Science **Credits:** 3
- AGRON 360 - Crop Growth and Development **Credits:** 3
- AGRON 375 - Nutrient Cycling and Fertilizer Management **Credits:** 3
- AGRON 405 - Internship in Agronomy **Credits:** 0-3 *(Required to complete one internship for 3 credit hours)*

Agronomy Integration Course - Choose one (3 credit hours):

- AGRON 502 - International Experience in Agronomy **Credits:** 0-6
- AGRON 602 - Agronomy Capstone Experience **Credits:** 3
- AGRON 640 - Cropping Systems **Credits:** 3
- AGRON 655 - Site Specific Agriculture **Credits:** 3
- GENAG 582 - Natural Resources/Environmental Science Project (NRES) **Credits:** 3

Agronomy Electives: 9 credit hours

Any AGRON courses with 6 credit hours at 300-level and above.

Business & Communications: 21 credit hours

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

- Any course in ACCTG or BUS 251 or BUS 252
  Choose from Communications elective (Departmental) list: 3 credit hours
  Select one of the following:
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3
- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- AGEC 121 - Honors Agricultural Economics and Agribusiness **Credits:** 3
- Select 300-level and above courses from Business and Economics electives: AGEC, ACCTG, BUS, ECON, ENTRP, MANGT, MIS, MKTG, SALES: 12 credit hours.

Agriculture: 9 credit hours

- ENTOM 250 - Economic Entomology **Credits:** 3
  OR
- ENTOM 312 - General Entomology **Credits:** 3
- PLPTH 500 - Principles of Plant Pathology **Credits:** 3
- Any 300-level and above course within the College of Agriculture or ATM or BAE.

Credits / Units: 3

Natural and Applied Sciences: 22 credit hours

If not met through K-State Core requirements, STAT 225 is required.

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

- STAT 225 - Introduction to Statistics **Credits:** 3
  KSC-030
- BIOL 198 - Principles of Biology **Credits:** 4
  Choose 1 course
- CHM 210 - Chemistry I **Credits:** 4
- CHM 220 - Honors Chemistry I **Credits:** 5
  Choose 1 course
- CHM 230 - Chemistry II **Credits:** 4
- CHM 250 - Honors Chemistry II **Credits:** 5
  Choose 1 course
- MATH 100 - College Algebra **Credits:** 3
- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- Choose from Natural and Applied Science elective (Departmental) List: 6 credit hours (with 3 cr at 300-level and above)

Credits / Units: 6

Unrestricted Electives as needed to meet 120 credit hours.

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Agronomy - Consulting and Production (BS)

Agronomy includes crop, soil, weed, range, and environmental sciences. Students in agronomy have diverse interests, including crop production and physiology; crop breeding; soil management, fertility, and conservation; soil and water quality; physical and chemical properties of soils; forages; and range management.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

Choose 1 course from Natural and Applied Science electives (Departmental) List.: 3 credit hours at 300-level or above.

Unrestricted Electives as needed to meet 120 Credit Hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Agronomy - Soil and Environmental Sciences (BS)

Agronomy includes crop, soil, weed, range, and environmental sciences. Students in agronomy have diverse interests, including crop production and physiology; crop breeding; soil management, fertility, and conservation; soil and water quality; physical and chemical properties of soils; forages; and range management.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional

general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program

Agronomy: 33 credit hours

- AGRON 101 - Agronomy Orientation **Credits:** 1
- AGRON 120 - Crop Science **Credits:** 3

  Select courses from Natural and Applied Science elective
  See Departmental List:
  12 credit hours (select 9 cr hr at 300-level or above).

Unrestricted Electives as needed to meet 120 credit hours.

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Minor

Agronomy Minor

Students enrolled in any primary undergraduate major (or completed, or non-degree seeking student) will be admitted by filing a notice of intent with the Agronomy Department's teaching office. Intent to complete a minor should be filed prior to enrollment in the final nine credit hours of course work. No more than seven hours of transfer courses may be used for the minor. Prerequisites and requisites associated with courses for the minor must be followed.

Program requirements

To earn an undergraduate minor in agronomy, students are required to complete 16 or 17 credit hours consisting of the following courses:

- AGRON 205 - Soils **Credits:** 3
  AND
- AGRON 206 - Soils Laboratory **Credits:** 1

Choose from the following:

- AGRON 120 - Crop Science **Credits:** 3
  OR
- AGRON 251 - Range Management **Credits:** 3

Note

An additional 9 credit hours of agronomy courses numbered 202 or greater (not including AGRON 405), selected by the student in consultation with an agronomy advisor.

Total credit hours: (16-17)

E-mail: asi@k-state.edu
www.asi.k-state.edu

The K-State ASI department serves students, livestock producers and the animal and food industries through teaching, research and education. KSU ASI prepares students for careers in the animal and food industries. The curriculum includes the study of nutrition, reproduction, genetics, behavior, meat science and dairy processing with production, management, and agribusiness skills.

Bachelor of Science

Animal Sciences and Industry - Management/Industry (BS)

The Animal Sciences and Industry major prepares students for a variety of careers related to animal care and production. Students may continue their education in veterinary or graduate school or start their careers in areas like animal health, nutrition, breeding and genetics, reproduction, meat science, or milk processing within the industry, education, or government. Coursework focuses on the science and business of raising animals, with an emphasis on domesticated animals of importance to the lives of Kansans. There are two options of study to choose from based on a student's target career: Prevet/Science or Management/Industry, both of which are available on the Manhattan campus or online.

The ASI major is housed in the Northeast corner of the main Manhattan campus, but its reach is far beyond classrooms, offices, and laboratories located in Weber Hall and Call Hall. The Department maintains teaching and research units within two miles of campus, where students take courses and apply concepts with hands-on education. There are separate units and farms for horses, sheep and meat goats, swine, dairy, poultry, purebred beef cattle, cow/calf, stocker cattle, and feedlot cattle. Animal products are further processed on campus through the Department's meats and milk processing facilities. Finally, the ASI Dept. enjoys a collaborative relationship with the College of Veterinary Medicine, other Departments in the College, and its stakeholders so students can gain experience in the veterinary health center, feed mill and pet food processing facilities, and state/federal government facilities all located within a few miles of campus.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Science and Math: 8-9 credit hours

The courses with a KSC designation are required if not met through University Core Requirements.

- BIOL 198 - Principles of Biology **Credits:** 4

Select 4 credit hours

- CHM 110 - General Chemistry **Credits:** 3
- CHM 111 - General Chemistry Laboratory **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
- CHM 220 - Honors Chemistry I **Credits:** 5

Select 1 course

KSC-030

- MATH 100 - College Algebra **Credits:** 3
- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Animal Science Courses: 44-45 credit hours

Animal Science Foundations: 0-1 credit hours

- ASI 101 - Foundations in Animal Sciences & Industry **Credits:** 1

OR

- ASI 301 - Transfer Foundations in ASI **Credits:** 0

Animal Science Courses: 19 credit hours

- ASI 102 - Principles of Animal Science **Credits:** 3
- ASI 105 - Livestock Lab **Credits:** 1
- ASI 106 - Dairy Lab **Credits:** 0.5
- ASI 107 - Companion Animal Lab **Credits:** 0.5
- ASI 108 - Poultry Lab **Credits:** 0.5
- ASI 109 - Horse Lab **Credits:** 0.5
- ASI 150 - Anatomy and Physiology of Domestic Animals **Credits:** 3
- ASI 202 - Domestic Animal Nutrition **Credits:** 3
- ASI 300 - Animal Sciences and Industry Career Preparation **Credits:** 1
- ASI 400 - Farm Animal Reproduction **Credits:** 3
- ASI 595 - Current Issues in Animal Science **Credits:** 3

Animal Science Concentration: 25 credit hours

Animal Products Course: 3 credit hours

Choose one course from the list below:

- ASI 350 - Meat Science **Credits:** 3
- ASI 361 - Meat Animal Processing **Credits:** 3
- ASI 405 - Fundamentals of Milk Processing **Credits:** 3
- ASI 601 - Endocrinology and Lactation **Credits:** 3
- ASI 640 - Poultry Products Technology **Credits:** 3
- ASI 695 - Principles of Equine Exercise Physiology **Credits:** 3

Animal Breeding & Genetics Course: 4 credit hours

Select 4 hours: (ASI 500 and ASI 501) OR ASI 511

Select one course:

- ASI 500 - Genetics **Credits:** 3

AND

- ASI 501 - Principles of Animal Breeding **Credits:** 1
- ASI 511 - Applied Animal Breeding and Genetics **Credits:** 4

Animal Management Courses: 6 credit hours

Select two courses from the list below:

- ASI 515 - Beef Science **Credits:** 3
- ASI 520 - Companion Animal Management **Credits:** 3
- ASI 521 - Horse Science **Credits:** 3
- ASI 524 - Sheep and Meat Goat Science **Credits:** 3
- ASI 535 - Swine Science **Credits:** 3
- ASI 621 - Dairy Cattle Management **Credits:** 3
- ASI 645 - Poultry Management **Credits:** 3

Animal Sciences Specialization Courses: 12 credit hours

Specialization courses in ASI (must be at the 300+ level)

Major Support Courses: 30 credit hours

Major Concentration Courses: 15 credit hours

Block A: Ag Course at 300-level and above: 3 credit hours

see departmental list A

https://www.ag.k-state.edu/student-success/academic-services/student-handbook/departcourselists.html

Block B: Business Courses: 6 credit hours

3 credits must be at 300-level or above.
see departmental list B

https://www.ag.k-state.edu/student-success/academic-services/student-handbook/departcourselists.html

Block C: Applied and Foundational Science courses: 6 credit hours

see departmental list C

https://www.ag.k-state.edu/student-success/academic-services/student-handbook/departcourselists.html

Major Specialization Courses: 15 credit hours

Block D: Specialization courses: 15 credit hours

Courses used in this block must not also be used in K-State Core Requirements 1 or 2.

At least 7 credits must be at 300+ level

see departmental list D

https://www.ag.k-state.edu/student-success/academic-services/student-handbook/departcourselists.html

Applied Learning Experience Overlay

Student must take at least one course designated as an applied learning experience. See departmental list.

Unrestricted Electives as needed to meet 120 credit hours.

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Animal Sciences and Industry - Pre-Veterinary/Science (BS)

The Animal Sciences and Industry major prepares students for a variety of careers related to animal care and production. Students may continue their education in veterinary or graduate school or start their careers in areas like animal health, nutrition, breeding and genetics, reproduction, meat science, or milk processing within the industry, education, or government. Coursework focuses on the science and business of raising animals, with an emphasis on domesticated animals of importance to the lives of Kansans. There are two options of study to choose from based on a student's target career: Prevet/Science or Management/Industry, both of which are available on the Manhattan campus or online.

The ASI major is housed in the Northeast corner of the main Manhattan campus, but its reach is far beyond classrooms, offices, and laboratories located in Weber Hall and Call Hall. The Department maintains teaching and research units within two miles of campus, where students take courses and apply concepts with hands-on education. There are separate units and farms for horses, sheep and meat goats, swine, dairy, poultry, purebred beef cattle, cow/calf, stocker cattle, and feedlot cattle. Animal products are further processed on campus through the Department's meats and milk processing facilities. Finally, the ASI Dept. enjoys a collaborative relationship with the College of Veterinary Medicine, other Departments in the College, and its stakeholders so students can gain experience in the veterinary health center, feed mill and pet food processing facilities, and state/federal government facilities all located within a few miles of campus.

K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Minor

Animal Sciences and Industry Minor

An academic minor in animal sciences and industry can be earned by completing a minimum of 15 hours of credit with the ASI designation. The courses that comprise the minor will be determined by the minor coordinator in the Department of Animal

Sciences and Industry. No more than 6 non-KSU transfer credits can be applied towards the minor. For additional information visit the website.

Requirements

Required Courses	Credits
ASI 102	3 credits
ASI courses 200 level and above	5 credits
ASI courses 400 level and above	5 credits
ASI electives (100-777 level)	0-2 credits

Total credit hours: (15)

Undergraduate Certificate

Animal Health Undergraduate Certificate

The certificate program will require the completion of a minimum of 15 credit hours relevant to the animal health industry. Elective courses in this curriculum may require prerequisites.

Required Courses: 6-7 credit hours

- Animal Anatomy and Physiology **Credits:** 3-4
- ASI 150 - Anatomy and Physiology of Domestic Animals **Credits:** 3
  OR
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- ASI 533 - Physiology of Domestic Animals **Credits:** 3

Concentration in Animal Health: 8-9 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 560, ASI 561 and ASI 599) to the certificate. The courses must be animal health related.

- AAI 797 - U.S. Animal Politics and Policymaking **Credits:** 2
- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- AP 711 - Stem Cells and Comparative Biomedicine **Credits:** 2
- ASI 210 - Intro to Animal Biotechnology **Credits:** 3
- ASI 402 - Calving **Credits:** 1
- ASI 444 - Equine Health **Credits:** 3
- ASI 600 - Applied Animal Biotechnology **Credits:** 3
- ASI 655 - Behavior of Domestic Animals **Credits:** 3
- BIOL 513 - Physiological Adaptations of Animals **Credits:** 4

- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOL 670 - Immunology **Credits:** 3
- DMP 313 - Introduction To Epidemiology **Credits:** 3
- DMP 611 - Cow-Calf Health Systems **Credits:** 2
- DMP 690 - Essential Practices for BSL-3 Research Settings **Credits:** 1
- DMP 691 - Introduction to High Containment Laboratory Topics and Techniques **Credits:** 3
- DMP 754 - Introduction to Epidemiology **Credits:** 3
- ENTOM 305 - Animal Health Entomology **Credits:** 2
- ENTOM 306 - Animal Health Entomology Laboratory **Credits:** 1
- GRSC 615 - Animal Food Safety **Credits:** 1

Total Hours Required: 15

Animal Nutrition Undergraduate Certificate

The certificate program will require the completion of a minimum of 15 credit hours relevant to the animal nutrition industry. Courses in this certificate may require prerequisites.

Required Courses: 8 credit hours

- ASI 202 - Domestic Animal Nutrition **Credits:** 3
- ASI 302 - Advanced Animal Nutrition **Credits:** 3
- ASI 675 - Monogastric Nutrition **Credits:** 1
- ASI 680 - Ruminant Nutrition **Credits:** 1

Concentration in Animal Nutrition: 7 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 560, ASI 561 and ASI 599) to the certificate. The courses must be animal nutrition related.

- ASI 676 - Avian Nutrition **Credits:** 1
- ASI 677 - Companion Animal Nutrition **Credits:** 1
- ASI 678 - Equine Nutrition **Credits:** 1
- ASI 679 - Swine Nutrition **Credits:** 1
- ASI 681 - Dairy Cattle Nutrition **Credits:** 1
- ASI 682 - Formulation of Livestock and Poultry Diets **Credits:** 1
- ASI 683 - Grazing Livestock Nutrition **Credits:** 1
- ASI 684 - Nutrition of Feedlot Cattle **Credits:** 1
- ASI 685 - Stored Forage Systems for Ruminant Animals **Credits:** 1
- AGRON 251 - Range Management **Credits:** 3
- AGRON 260 - Field Identification of Range and Pasture Plants **Credits:** 1
- AGRON 462 - Range Grasses **Credits:** 2
- AGRON 550 - Forage Management and Utilization **Credits:** 3
- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3
- GRSC 313 - Intro to Feed and Pet Food Processing Lab **Credits:** 1

- GRSC 615 - Animal Food Safety **Credits:** 1
- GRSC 645 - Pet Food Processing **Credits:** 3
- GRSC 650 - Nutritional Impacts of Processing **Credits:** 3
- GRSC 661 - Qualities of Feed Ingredients **Credits:** 3

Total Hours Required: 15

Beef Cattle Feedlot Management Undergraduate Certificate

The certificate program will require the completion of a minimum of 15 credit hours relevant to the beef cattle feeding industry. Courses in this certificate may require prerequisites.

Certificate: 18 credit hours

Required Courses: 12-14 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 561, 599, and 660) to the certificate. Additional courses may be approved by the department on case by case bases, i.e. ASI 261 and 661 Animal Sciences and Industry Problems. The courses must be beef cattle feedlot related.

- AGEC 420 - Commodity Futures **Credits:** 3
- ASI 315 - Livestock and Meat Evaluation **Credits:** 3
- ASI 515 - Beef Science **Credits:** 3
- ASI 680 - Ruminant Nutrition **Credits:** 1
- ASI 684 - Nutrition of Feedlot Cattle **Credits:** 1

Elective Courses: 4-6 credit hours

- ASI 650 - Identification and Data Management of Food Animals **Credits:** 2
- ASI 662 - Special Topics in Animal Science **Credits:** 0-6 (must be beef-cattle related)
- ASI 682 - Formulation of Livestock and Poultry Diets **Credits:** 1
- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3
- GRSC 313 - Intro to Feed and Pet Food Processing Lab **Credits:** 1
- MANGT 220 - Principles of Management **Credits:** 3

Beef Cattle Ranch Management Undergraduate Certificate

The certificate program will require the completion of a minimum of 18 credit hours relevant to the beef cattle ranching industry. Courses in this certificate may require prerequisites.

Certificate: 18 credit hours

Required Courses: 16-17 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 561, 599, and 660) to the certificate. The courses must be beef cattle ranch management related.

- AGEC 308 - Farm and Ranch Management **Credits:** 3
  OR
- AGEC 318 - Food and Agribusiness Management **Credits:** 3
  Select one course:
- ASI 500 - Genetics **Credits:** 3
  AND
- ASI 501 - Principles of Animal Breeding **Credits:** 1
  OR
- ASI 511 - Applied Animal Breeding and Genetics **Credits:** 4
- ASI 515 - Beef Science **Credits:** 3
- ASI 680 - Ruminant Nutrition **Credits:** 1
- ASI 683 - Grazing Livestock Nutrition **Credits:** 1
- DMP 611 - Cow-Calf Health Systems **Credits:** 2
  Select one course:
- AGRON 251 - Range Management **Credits:** 3
- AGRON 462 - Range Grasses **Credits:** 2
- AGRON 550 - Forage Management and Utilization **Credits:** 3

Elective Courses: 1-2 credit hours

- ASI 402 - Calving **Credits:** 1
- ASI 512 - Bovine Reproductive Technologies **Credits:** 2
- ASI 620 - Beef Systems Management **Credits:** 2
- ASI 650 - Identification and Data Management of Food Animals **Credits:** 2
- ASI 662 - Special Topics in Animal Science **Credits:** 0-6 (must be beef-cattle related)

Dairy Science Undergraduate Certificate

The certificate program requires the completion of a minimum of 18 credits, focusing primarily on dairy cattle management. Courses in this certificate may have prerequisites.

Certificate: 18 credits hours

Required Courses: 11.5 credit hours

- ASI 106 - Dairy Lab **Credits:** 0.5
- ASI 396 - Dairy Cattle Judging **Credits:** 2
- ASI 400 - Farm Animal Reproduction **Credits:** 3
- ASI 621 - Dairy Cattle Management **Credits:** 3
- ASI 680 - Ruminant Nutrition **Credits:** 1
- ASI 681 - Dairy Cattle Nutrition **Credits:** 1
- ASI 685 - Stored Forage Systems for Ruminant Animals **Credits:** 1

Electives: 6.5 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 561, ASI 599, ASI 661, and ASI 662) to the certificate. The courses must be dairy related.

- ACCTG 231 - Introduction to Managerial Accounting **Credits:** 3
  OR
- AGEC 308 - Farm and Ranch Management **Credits:** 3
- AGEC 420 - Commodity Futures **Credits:** 3
- AGRON 550 - Forage Management and Utilization **Credits:** 3
- AGRON 551 - Forage Management and Utilization Laboratory **Credits:** 1
- ASI 405 - Fundamentals of Milk Processing **Credits:** 3
- ASI 420 - Advanced Dairy Cattle Judging **Credits:** 1
  Select one course:
- ASI 500 - Genetics **Credits:** 3
  AND
- ASI 501 - Principles of Animal Breeding **Credits:** 1
  OR
- ASI 511 - Applied Animal Breeding and Genetics **Credits:** 4
- ASI 512 - Bovine Reproductive Technologies **Credits:** 2
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- ASI 601 - Endocrinology and Lactation **Credits:** 3
- ASI 308 - Dairy Foods Processing and Technology **Credits:** 3
- ASI 655 - Behavior of Domestic Animals **Credits:** 3
- ASI 682 - Formulation of Livestock and Poultry Diets **Credits:** 1

Note

To receive the certificate students must have a cumulative GPA of 2.0 in the 18 required credit hours. Course(s) from junior college and/or technical school programs will not be applied toward the certificate unless the course(s) are equivalent to a K-State course(s).

Total Hours Required for Certificate: 18

Equine Science Undergraduate Certificate

The certificate program will require the completion of a minimum of 18 credit hours of relevant to the equine industry. Courses in the certificate may have prerequisites.

Certificate: 18 credit hours

Required Courses: 7.5 credit hours

- ASI 109 - Horse Lab **Credits:** 0.5
- ASI 333 - Equine Enterprise Management **Credits:** 1

- ASI 444 - Equine Health **Credits:** 3
- ASI 521 - Horse Science **Credits:** 3

Concentration: 10.5 credit hours

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 261, 262, 560, 561, 599, 660, 661, 662) to the certificate. The courses must be equine related.

- ASI 325 - Beginning Horse Evaluation **Credits:** 2
- ASI 326 - Advanced Horse Evaluation **Credits:** 2
- ASI 345 - Beginning Horse Training and Management **Credits:** 2
- ASI 395 - Intermediate Horse Training & Management **Credits:** 2
- ASI 403 - Foaling **Credits:** 1
- ASI 445 - Advanced Horse Training and Management **Credits:** 2
- ASI 504 - Equine Reproduction Management **Credits:** 3
- ASI 505 - Equine Reproduction Management Lab **Credits:** 1
- ASI 602 - Equine Breeding and Genetics **Credits:** 2
- ASI 678 - Equine Nutrition **Credits:** 1
- ASI 695 - Principles of Equine Exercise Physiology **Credits:** 3

Total Hours Required: 18

Meat Science Undergraduate Certificate

The second largest industry in Kansas is the Meat Processing Industry, and Kansas ranks second in the nation in meat processing. This certification program will allow the Animal Sciences and Industry department to better identify, advise, and prepare students for the numerous and various kinds of jobs in the Meat Processing Industry.
Courses in this certificate may require prerequisites.

Certificate (15 credits)

Core Courses (6 credits)

- ASI 350 - Meat Science **Credits:** 3
- FDSCI 690 - Principles of HACCP and Preventive Controls for Human Food **Credits:** 3

Concentration (9 credits)

In addition to the courses listed below, students may apply up to 3 credits of experiential learning courses (ASI 560, ASI 561 and ASI 599) to the certificate. The courses must be meats related.

- ASI 315 - Livestock and Meat Evaluation **Credits:** 3
- ASI 361 - Meat Animal Processing **Credits:** 3
- ASI 370 - Principles of Meat Evaluation **Credits:** 2
- ASI 495 - Advanced Meat Evaluation **Credits:** 2
- ASI 610 - Processed Meat Operations **Credits:** 2

- ASI 640 - Poultry Products Technology **Credits:** 3
- ASI 658 - Animal Growth and Development **Credits:** 3
- ASI 777 - Meat Science and Muscle Biology **Credits:** 3

Communications and Agricultural Education

Jason Ellis, Department Head

301 Umberger Hall
785-532-5804
Fax: 785-532-5633
E-mail: communications@k-state.edu
www.communications.k-state.edu

The agricultural communications and natural resources communications (ANRC) egree program allows you to combine your passion for agriculture with enhanced communication and journalism skills. The ANRC curriculum includes courses challenging courses that will enhance your communications skills and your knowledge of natural and applied sciences, emphasizing the connection between agriculture and natural resources.

Agricultural education involves the broad study of agriculture including a core of course work in agribusiness; animal science; biotechnology; environmental service; food products and processing; natural resources; plant science; and power, structural and technical systems.

Agricultural education is designed for students who wish to meet requirements to teach agriculture in a public school setting or work in other areas where education and teaching are integral (i.e. extension, agribusiness, etc.). Graduates of this program meet Kansas State Department of Education licensure requirements.

Sixteen weeks during the second semester of the senior year are devoted to full-time student teaching.

Bachelor of Science

Agricultural and Natural Resources Communications (BS)

The agricultural and natural resources communications major prepares students for various communications positions related to agricultural and natural resources areas. Careers can be targeted in public relations, journalism, broadcasting, advertising, marketing, and advocacy. Students in the major experience applied learning through project-based coursework and opportunities to engage with industry professionals and alumni, developing their portfolio and network.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: (15-16 credit hours)

Natural and Physical Sciences elective: (3-4 credit hours)

Separate from the GE requirements, we are requiring one course (3-4 credit hours) in natural or physical sciences. Students can choose from a department list.

Analytical Reasoning elective: (3 credit hours)

A math, statistics, or research-focused course from department list

If not met through K-State Core requirements, STAT 225 is required.

KSC-030

- STAT 225 - Introduction to Statistics **Credits:** 3

Business/Econ Requirements: (6 credit hours)

Business/Econ Elective from department list

- MKTG 250 - Introduction to Marketing **Credits:** 3

AG/Natural Resources Science Elective: (3 credit hours)

Students choose a agriculture-related science elective from department list

Agriculture Core: (18-19 credit hours)

Agriculture Foundations: (6-7 credit hours)

Two agricultural introductory courses from two different prefixes, from department list.

Agricultural electives: (12 credit hours)

12 hours of agricultural electives, from department list. 9 of the 12 hours must be at the advanced level (300+)

AGCOM Core Courses: (28 credit hours)

Agricultural communications core courses (28 credit hours)

- AGCOM 100 - Agricultural Communications Orientation **Credits:** 1
- AGCOM 110 - Introduction to Agricultural Communications **Credits:** 2
- AGCOM 210 - Layout and Design Principles **Credits:** 3
- AGCOM 300 - Careers in Agricultural Communications **Credits:** 3
- AGCOM 345 - Application of Layout and Printing Techniques in Agriculture and Natural Resources **Credits:** 3
- AGCOM 410 - Agricultural Student Magazine **Credits:** 1-5
  Must take 3 hours of AGCOM 410
- AGCOM 435 - Video in Agriculture and Food **Credits:** 3
- AGCOM 550 - Internship in Agricultural Communications **Credits:** 1-3
  Must take at least 1 hour of AGCOM 550
- AGCOM 590 - New Media Technology **Credits:** 3
- AGCOM 600 - Capstone Seminar in Agricultural Communications **Credits:** 3
- AGCOM 610 - Crisis Communication **Credits:** 3

Mass Comm Core Courses: (10 credit hours)

- MC 130 - Writing Conventions and Mechanics **Credits:** 1
- MC 340 - Editing for Print and Online Media **Credits:** 3
  Choose 1 of the following principles courses:
- MC 120 - Principles of Advertising **Credits:** 3
- MC 160 - Principles of Journalism **Credits:** 3
- MC 180 - Principles of Public Relations **Credits:** 3
  Choose 1 of the following writing courses:
- MC 200 - News Reporting and Writing Across Platforms **Credits:** 3
- MC 280 - Writing for Advertising & Public Relations **Credits:** 3

Communication and Marketing Electives: (9 credit hours)

Choose advanced (300+) communications and/or marketing electives from a department list.

Free electives: (4-6 credit hours)

Free elective credit hours to meet 120 total hours required for the degree

Total Hours Required for Graduation: 120

Agricultural Education (BS)

Agricultural education involves the broad study of agriculture including a core of course work in agribusiness; animal science; biotechnology; environmental service; food products and processing; natural resources; plant science; and power, structural and technical systems.

Agricultural education is designed for students who wish to meet requirements to teach agriculture in a public school setting or work in other areas where education and teaching are integral (i.e. extension, agribusiness, etc.). Graduates in this option meet Kansas State Board of Education licensure requirements.

Sixteen weeks during the second semester of the senior year are devoted to full-time student teaching.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Chemistry or Additional Science: (4 credit hours)

If Chemistry was taken within the General Education KSC-050 an additional Science must be taken. Biology 198 is recommended.

- CHM 110 - General Chemistry **Credits:** 3
- CHM 111 - General Chemistry Laboratory **Credits:** 1
  KSC-040
- BIOL 198 - Principles of Biology **Credits:** 4

Math Requirement

If not met through K-State Core requirements, MATH 160 is required.

KSC-030

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

Agriculture Core: (17 credit hours)

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- ASI 102 - Principles of Animal Science **Credits:** 3
- AGRON 205 - Soils **Credits:** 3
- AGRON 206 - Soils Laboratory **Credits:** 1
- ASMS 260 - Agricultural Metal Processes Education **Credits:** 3

Plant Systems Foundations Courses:

- AGRON 120 - Crop Science **Credits:** 3
  AND
- AGRON 121 - Crop Science Laboratory **Credits:** 1
  OR
- HORT 201 - Principles of Horticultural Science **Credits:** 4

Power Structural and Technical Systems: (2 credit hours)

Select 2 Credit Hours

- ASMS 213 - Emerging Technologies in Power, Structural, and Technical Systems **Credits:** 1
- ASMS 214 - Agricultural Engine Systems **Credits:** 1
- ASMS 215 - Agricultural Electrical Systems **Credits:** 1
- ASMS 216 - Agricultural Structures Education **Credits:** 1

Food Products and Processing: (3 credit hours)

Select course from departmental list

https://www.ag.k-state.edu/student-success/academic-services/student-handbook/departcourselists.html

Agricultural Science Electives: (12 credit hours)

Complete 12 credit hours of College of Agriculture (or ATM) courses. Of these, at least 9 credit hours must be at the 200 level or higher. Courses must be selected from at least three College of Agriculture (or ATM) prefixes.

Ag Ed Pre Professional: (7 credit hours)

- AGED 100 - Orientation in Agricultural Education **Credits:** 1
  Transfer students may substitute AGED 300 for AGED 100
- AGED 305 - Field Experience in Agricultural Education **Credits:** 1
- AGED 620 - Principles and Philosophy in Agriculture and Career and Technical Education **Credits:** 2
- EDCI 110 - Foundations of Education **Credits:** 3

Ag Ed Block I: (11 credit hours)

- AGED 400 - Leadership and Professional Development in Agricultural Education **Credits:** 2
- EDCI 315 - Educational Psychology **Credits:** 3
- EDCI 318 - Educational Technology for Teaching and Learning **Credits:** 1
- EDCI 320 - Core Teaching Skills and Lab **Credits:** 3
- EDSP 323 - Exceptional Students in the Secondary School **Credits:** 2

Ag Ed Block II: (15 credit hours)

- AGED 500 - Methods of Teaching Agriculture in the Secondary and Middle Schools **Credits:** 3
- AGED 520 - Block II Lab: Content Area Methods and Field Experience **Credits:** 2
- AGED 600 - Senior Seminar in Agricultural Education **Credits:** 1
- AGED 621 - Program Planning in Agricultural Education **Credits:** 3
- AGED 625 - Inquiry-Based Curriculum in Agricultural STEM and Biotechnology Education **Credits:** 2
- EDSEC 455 - Teaching in a Multicultural Society **Credits:** 1

- EDSEC 477 - Content Area Literacies and Diverse Learners **Credits:** 2
- EDSEC 525 - Interpersonal Relations in the Schools **Credits:** 1

Ag Ed Block III: (12 credit hours)

- EDSEC 586 - Teaching Internship in Secondary Schools **Credits:** 1-12

Free Electives: (3 credit hours)

Total Hours Required for Graduation: 120

Diversified Agriculture (BS)

The Bachelor of Science in Diversified Agriculture is a multidisciplinary program in agriculture. Students in this program will develop their knowledge base and skills in agriculture, communications, and business. Students will have the opportunity to select a concentration within the area of agriculture that best aligns with their career goals. The curriculum blends together both general and specific career education. Upon completion of the program, students should be ready to enter the workforce with a broad and diverse knowledge of agricultural industries, as well as a solid basis in communications and business management skills.

No additional admission criteria for this program.

Effective Spring 2026.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: 45 Credit Hours

Natural and Physical Sciences: (4 credit hours)

An additional 4 hours to what is completed in Requirement #4 of the K-State Core. Course list will include all courses listed in Requirement #4 of the K-State Core.

Agriculture Foundations: (14 credit hours)

Select 14 hours from courses from five of the eight categories:

1) Plant Science

- AGRON 120 - Crop Science **Credits:** 3
  AND
- AGRON 121 - Crop Science Laboratory **Credits:** 1
- HORT 201 - Principles of Horticultural Science **Credits:** 4
  AND
- HORT 202 - Principles of Horticultural Science Lab **Credits:** 1

UFS

2) Natural Resources

- PMC 210 - Intro to Outdoor Recreation **Credits:** 3
- PMC 275 - Introduction to Natural Resource Management **Credits:** 3
- WOEM 350 - Fauna and Flora of the Great Plains **Credits:** 3

3) Communications and Agricultural Education

- AGCOM 110 - Introduction to Agricultural Communications **Credits:** 2
- AGED 533 - Educating the Public about Agriculture **Credits:** 3

4) Agricultural Economics

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3

5) Animal and Food Science

- ASI 102 - Principles of Animal Science **Credits:** 3
- FDSCI 202 - Introduction to Food Science **Credits:** 3

6) General Agriculture

- GENAG 210 - Human and Cultural Diversity in the Food and Agricultural Sciences **Credits:** 3
- GENAG 225 - Fundamentals of Global Food Systems Leadership **Credits:** 3

7) Grain Science

- GRSC 101 - Fundamentals of Grain Processing **Credits:** 3
- GRSC 150 - Principles of Milling **Credits:** 2
  AND
- GRSC 151 - Principles of Milling Laboratory **Credits:** 1
- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3

8) Entomology

- ENTOM 101 - Insects and People **Credits:** 3
- ENTOM 125 - Introduction to Entomology **Credits:** 3
- ENTOM 135 - Introduction to Animal Health Entomology **Credits:** 3
- ENTOM 150 - Introduction to Plant Health Entomology **Credits:** 3
- ENTOM 202 - Art and Insects **Credits:** 3
- ENTOM 305 - Animal Health Entomology **Credits:** 2
  AND
- ENTOM 306 - Animal Health Entomology Laboratory **Credits:** 1
- ENTOM 325 - Pollinators **Credits:** 3

Agriculture Electives: (12 credit hours)

Select 12 hours from any College of Agriculture course prefix or ATM, BAE, ENSCI prefix courses.

These courses cannot *also be used to meet the agriculture foundations requirements.*

AGCOM, AGEC, AGED, AGRON, AGTEC, ASI, ASMS, ATM, BAE, ENSCI, ENTOM, FDSCI, FFM, GENAG, GRSC, HNR, HORT, PMC, WOEM

Business, Economics, Management, and Leadership: (15 credit hours)

Select 1 Management Course: See Departmental List

Business, Economics, and Leadership Electives: Select 12 hours, 6 of those hours must be 300 level or above:

ACCTG, AGEC, BUS, ECON, ENTRP, FINAN, MANGT, MKTG, MIS, SALES, PFP, LEAD

Program: 38-40 Credit Hours

Communications and Agricultural Education: (19 credit hours)

- AGED 101 - Foundations of Diversified Agriculture **Credits:** 1
  OR
- AGED 301 - Diversified Agriculture Foundations **Credits:** 1
- AGCOM 222 - Agricultural Business Communications **Credits:** 3
- AGCOM 300 - Careers in Agricultural Communications **Credits:** 3
- AGED 433 - Agricultural Project Management **Credits:** 3
  Non-formal Education:
  Select 1 course:
- AGED 533 - Educating the Public about Agriculture **Credits:** 3
- AGED 537 - Planning Programs in Extension & Non-Formal Education **Credits:** 3
  Communications and Agricultural Education Electives:
  Select 6 Additional Hours:
- AGCOM 310 - Communicating in the Agricultural Industry **Credits:** 3
- AGCOM 345 - Application of Layout and Printing Techniques in Agriculture and Natural Resources **Credits:** 3
- AGED 533 - Educating the Public about Agriculture **Credits:** 3
- AGED 537 - Planning Programs in Extension & Non-Formal Education **Credits:** 3
- AGED 305 - Field Experience in Agricultural Education **Credits:** 1
  AND
- AGED 620 - Principles and Philosophy in Agriculture and Career and Technical Education **Credits:** 2
- AGED 790 - Agricultural Education Methods and Practicum for Teaching and Learning **Credits:** 3

Occupational Health and Safety in Agriculture: (3 credit hours)

Select 3 hours 300-level or above:

ASMS

Agriculture Concentration: (15 credit hours)

Select 300 level or above courses from one prefix:

AGCOM, AGEC, AGED, AGRON, ASI, ASMS, ATM/BAE, ENTOM, FDSCI, GRSC, HORT, PMC, UFS, WOEM, (one PLPTH class may be used in the AGRON, HORT, or ENTOM concentration) or 15 hours in Global Food Systems (must include GENAG 325 and 425). A student wishing to have a customized program with more than one prefix used (with the exception of

Global Food Systems) will need approval from the program director. Concentration must be exclusive to courses in Agriculture (with the exception of BAE, ATM, or ENSCI) unless completing an interdisciplinary certificate and minor which will also need director approval.

Applied Learning Experience Overlay: (1-3 credit hours)

Student must take at least one course designated as an applied learning experience. Course may be used to fulfill other degree requirements. See departmental list.

Unrestricted Electives

Additional hours needed to meet 120 hour requirement.

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Minor

Communications and Education for Agriculture Minor

A minor in Communications and Education for Agriculture is designed to provide base knowledge of theories and techniques of working with the public in the agricultural industry, while giving students a chance to build skills in areas of their choosing. Students pursuing a minor in Communications and Education for Agriculture must complete at least 15 total hours from the electives list; the 15 total hours must include at least two of the three required core courses. This is intended for educating people in non-fomal settings.

Required (15 credit hours):

Six (6) credit hours must be at the 500 course level or above.

Required Core Classes:

Choose two from the following:

- AGCOM 110 - Introduction to Agricultural Communications **Credits:** 2
- AGCOM 222 - Agricultural Business Communications **Credits:** 3
- * AGED 533 - Educating the Public about Agriculture **Credits:** 3

Elective Courses

No course can be used for more than three (3) hours towards the minor.

See minor advisor for list of elective courses.

Total Hours Required: 15

Undergraduate Certificate

Agricultural and Occupational Safety and Health Undergraduate Certificate

This certificate will provide students with knowledge and skills to fulfill the workplace safety and health management duties they will encounter during their careers in agriculture and related industries. Safety and health management is a rapidly growing field. Qualified workers are needed to fill new openings and to replace the aging workforce. Safety and health professionals enter the field from a variety of scientific, manufacturing, health, technical, and social science disciplines. Completion of this certificate will help qualify students for safety-related employment in conjunction with their undergraduate degrees from Kansas State University.

Required Courses: 12 credit hours

- ASMS 423 - Agricultural and Occupational Safety I **Credits:** 3
- ASMS 424 - Agricultural and Occupational Health I **Credits:** 3
- ASMS 453 - Agricultural and Occupational Safety II **Credits:** 3
- ASMS 454 - Agricultural and Occupational Health II **Credits:** 3

Total Hours Required: 12

Entomology

Brian McCornack, Head

123 Waters Hall
785-532-6154
Fax: 785-532-6232
E-mail: entomology@k-state.edu
www.entomology.k-state.edu

Entomology is the study of insects and related arthropods. Applied entomology stresses their relations to plants and animals, including humans. Courses fall into two groups: broad, general courses suitable for any student; and professional courses that provide training for research, teaching, and administration in colleges, experiment stations, health services, government agencies, industry, foundations, and private practice.

Students majoring in other fields may have a special interest in entomology as part of their curriculum. ENTOM courses ENTOM 250, ENTOM 312, and ENTOM 305 are recommended.

Bachelor of Science

Entomology (BS)

Enter Bachelor's Program description here.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program

Entomology Requirements: (30 credit hours)

Entomology Core: (11 credit hours)

- ENTOM 100 - Entomology Foundations **Credits:** 1
- ENTOM 312 - General Entomology **Credits:** 3
  OR
- ENTOM 305 - Animal Health Entomology **Credits:** 2
  AND
- ENTOM 306 - Animal Health Entomology Laboratory **Credits:** 1
- ENTOM 399 - Undergraduate Research Experience **Credits:** 0-3
  Must have at least 1 credit hour of ENTOM 399
- ENTOM 595 - Capstone Experience **Credits:** 3
- ENTOM 695 - Insect Taxonomy **Credits:** 3

Entomology Restricted Electives: (4 credit hours)

Select 4 credit hours from:

- ENTOM 200 - Insect Sampling and Surveillance **Credits:** 2
- ENTOM 205 - Introduction to Insect Data Analysis **Credits:** 1
- ENTOM 210 - Introduction to Insecticides **Credits:** 1
- ENTOM 250 - Economic Entomology **Credits:** 3
- ENTOM 312 - General Entomology **Credits:** 3
- ENTOM 399 - Undergraduate Research Experience **Credits:** 0-3 **If ENTOM 399 is selected, must enroll in 1-2 credit hours.**

Entomology Electives: (15 credit hours)

Select an additional 15 credit hours of ENTOM 200 or higher, not used in the Restricted Electives Section

Entomology Professional Specialization: (15 credit hours)

A specialization may be defined in any focus area. All 15 credit hours may come from the same department (including Entomology), or from multiple departments/fields depending on student interests and goals. Students should work with their advisor in defining their specialization and courses.

Agriculture Elective: (6 credit hours)

Any College of Agriculture courses outside of Entomology, or ATM.

Natural and Physical Sciences/Mathematics: (13-16 credit hours)

Science and Math Requirements: (8 credit hours)

MATH 160 is the designated **Math Pathway course** *for this program.* **Any course in KSC-030, including those on the Advanced Math list, may be applied to meet this requirement.**

- BIOL 101 - Concepts of Biology **Credits:** 4
  OR
- BIOL 198 - Principles of Biology **Credits:** 4
- CHM 110 - General Chemistry **Credits:** 3
  And
- CHM 111 - General Chemistry Laboratory **Credits:** 1
  OR
- CHM 210 - Chemistry I **Credits:** 4
  KSC-030
- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

Science and Math Electives: (5-8 credit hours)

Select 5-8 credit hours from:

BIOL 200 or above, BIOCH, CHM, GEOL, MATH, STAT, PHYS

Unrestricted Electives as needed to total 120 credit hours

Unrestricted electives as needed to total 120 credit hours

Total Hours Required for Graduation: 120

Minor

Entomology Minor

The Department of Entomology offers an undergraduate minor in entomology. This minor enables students to diversify their educational experiences that complement other academic programs, especially those in disciplines such as animal science, agronomy, horticulture, or biology. To pursue a minor in entomology students must: (1) file a declaration of intent to

pursue the minor and (2) consult an entomology advisor to develop a plan of study. Advisors not only ensure that requirements of the minor are met but will also tailor course work to the interests, educational aims, and employment goals of the individual student.

General requirements (3 Credit Hours)

3 Credit hours from one of the following introductory courses:

- ENTOM 250 - Economic Entomology **Credits:** 3
- ENTOM 101 - Insects and People **Credits:** 3
- ENTOM 305 - Animal Health Entomology **Credits:** 2
  and
- ENTOM 306 - Animal Health Entomology Laboratory **Credits:** 1
- ENTOM 312 - General Entomology **Credits:** 3
  (2) 12 Credit hours from any Entomology course not taken above, including at least 3 Credit hours at or above the 300 level.
  (i) up to 3 Credit hours, at or above 300 level, from any department, in the student's area of entomological interest can be applied to these 12 hours. Approval by Entomology is required.
  (ii) in special circumstances, up to 3 additional Credit hours from a non-Entomology STEM course directly related to Entomology, or covering Entomological topics, can also be applied to these 12 Credit hours. Approval by Entomology is required.

Entomology Elective (12 Credit Hours)

12 Credit hours from any Entomology course not taken above, including at least 3 Credit hours at or above the 300 level.

(i) up to 3 Credit hours, at or above 300 level, from any department, in the student's area of entomological interest can be applied to these 12 hours. Approval by Entomology is required.

(ii) in special circumstances, up to 3 additional Credit hours from a non-Entomology STEM course directly related to Entomology, or covering Entomological topics, can also be applied to these 12 Credit hours. Approval by Entomology is required.

Total Hours Required: 15

General Agriculture

Dan Moser, Associate Dean

135 Waters Hall
785-532-6151
www.ag.k-state.edu

General agriculture is a non-degree exploratory program. Students who are undecided about a major within the College of Agriculture are encouraged to select general agriculture as a major. During the first several semesters, students can investigate their potential interests through course selection and research on career opportunities with the assistance of their academic advisor from the College of Agriculture Academic Programs Office. By the junior year, students should select a specific major because a degree cannot be awarded in general agriculture.

Bachelor of Science

Veterinary Medicine (BS)

The Bachelor of Science in Veterinary Medicine (BVMA): College of Agriculture students admitted into a College or School of Veterinary Medicine accredited by the Council on Education as a member institution of the American Association of Veterinary Medical Colleges and the American Veterinary Medical Association without a Bachelor of Science degree from Kansas State University will be granted a Bachelor of Science in Veterinary Medicine (BVMA) after successfully completing two years (minimum 60 credit hours) of the professional program.

Degree Requirements:

Students enrolled in the Doctor of Veterinary Medicine (DVM) program at Kansas State University or another AVMA accredited institution:

1. Must have been enrolled in the College of Agriculture for a minimum of one semester as an undergraduate student immediately prior to entering the DVM program.
2. Must have completed 12 hours of College of Agriculture courses or transfer courses that are evaluated with a College of Agriculture prefix (students are encouraged to complete a minor in the College of Agriculture).
3. Must have completed a minimum of 30 resident credit hours at Kansas State University.
4. Must have completed a minimum of 60 undergraduate credit hours.
5. Cannot have already received a bachelor's degree.
6. Must have successfully completed (C or better in DVM Core classes) the first 2 years of the DVM program.
7. Must submit official transcripts showing successful completion of the first 2 years of the DVM program to Kansas State University Office of Recruitment and Admissions by the university deadline for transfer work to be received for spring graduates (if attending a veterinary school other than Kansas State University).

Requirements: (64-65 credit hours)

Communications: (9 credit hours)

The courses with a KSC designation are required if not met through University Core Requirements.

- ENGL 100 - Expository Writing I **Credits:** 3
  KSC-010
- ENGL 200 - Expository Writing II **Credits:** 3
  KSC-010
  KSC-020
- COMM 106 - Public Speaking I **Credits:** 3

Social Science/Humanities: (12 credit hours)

Social Sciences and/or Humanities are fulfilled by courses focused on the study of human behavior and interaction in social, cultural, environmental, economic and political contexts. The Humanities and Social Sciences have a historical and contemporary focus, from personal to global contexts and consider challenges for the future. (Areas of study: law, history, ancient languages, modern languages, philosophy, religion, appreciation of visual/performing arts, anthropology, criminology, administration, archaeology, education, economics, psychology, linguistics, political science). See KSU Vet School Admission Requirements.

Science: (35-36 credit hours)

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4

- CHM 350 - General Organic Chemistry **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
- BIOCH 521 - General Biochemistry **Credits:** 3
- PHYS 113 - General Physics I **Credits:** 4
- PHYS 114 - General Physics II **Credits:** 4
- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 255 - General Microbiology **Credits:** 4
- ASI 500 - Genetics **Credits:** 3
  OR
- BIOL 398 - Principles of Genetics **Credits:** 4

Agriculture: (12 credit hours)

College of Ag courses 12 credit hours

- ASI 500 may count here as an overlay.

DVM credits: (minimum 60 hours)

Must have successfully completed the first two years (minimum 60 hours) of an AVMA accredited DVM program and be in good academic standing to progress to third year.

DVM First Year Curriculum

Must have C or better in each required DVM course.

DVM Second Year Curriculum

Must have C or better in each required DVM course.

Total Hours Required for Graduation: 120

Minor

International Agriculture Minor

Experiential learning through international study and travel broadens horizons and increases understanding of global issues by allowing students to examine different agricultural systems, the global marketplace, and the role of social values in food consumption patterns. This minor will add value to undergraduate degree programs, enhance employment opportunities with multinational corporations, and prepare students to function in diverse communities.

Program requirements

The program is open only to majors in the College of Agriculture.

The program consists of:

- One foundation course.
- A modern language.
- An international experience.
- A capstone seminar.
- Students are required to complete at least two semesters of university-level modern language courses.
- The international experience may consist of a travel study course, study abroad, community service, or internship. Academic credit can be granted for international experiences.

Foundation course (3 credit hours)

- AGEC 315 - Contemporary Issues in Global Food and Agricultural Systems **Credits:** 3
  or
- AGEC 710 - Comparative Food and Agriculture Systems **Credits:** 3

Modern language courses (8-10 credit hours)

Students must complete or quiz out of two semesters of one modern language.

International experience (1-3 credit hours)

- GENAG 505 - Comparative Agriculture **Credits:** 1-4
  or
- departmental internship, problems, or topic course or departmental travel course

Capstone seminar (1 credit hour)

- GENAG 690 - Seminar in International Agriculture **Credits:** 1

Elective courses

Students are encouraged to select elective courses in agriculture, social science, and humanities areas and/or free electives that complement their study of the region or country selected as the focus of their program.

Note

Students must complete a "declaration of intent" form describing their plan to fulfill the course work, language, and international experience requirements for the minor. The form will be submitted to and approved by the Office of Agriculture Academic Programs.

Total credit hours: (15)

Non-Degree Seeking

Agriculture: Pre-Veterinary Medicine

The pre-veterinary medicine program in the College of Agriculture benefits students working toward admission to veterinary school. Students work with a faculty advisor to find the best classes for their individual needs. While fulfilling the pre-vet curriculum, students can take additional courses to apply their skills.

The College of Veterinary Medicine does not offer a Bachelor of Science degree. The Doctor of Veterinary Medicine (DVM) is awarded following the successful completion of a minimum of 64 hours in pre-professional requirements and four years in the professional curriculum.

The Bachelor of Science in Agriculture-Veterinary Medicine (BVMA): College of Agriculture students admitted into a College of Veterinary Medicine without a Bachelor of Science degree from Kansas State University will be granted a Bachelor of Science in Agriculture-Veterinary Medicine (BVMA) after successfully completing two years of the professional program.

Degree Requirements for Bachelor of Science - Veterinary Medicine in Agriculture (BVMA)

Students enrolled in the Doctor of Veterinary Medicine (DVM) program at Kansas State University:

1. Must have been enrolled in the College of Agriculture for a minimum of one semester as an undergraduate student prior to entering the DVM program
2. Cannot have already received a bachelor's degree at Kansas State University
3. Successfully completed the first 2 years of the DVM program

Students enrolled in a Doctor of Veterinary Medicine (DVM) program at an accredited institution other than Kansas State University:

1. Must have been enrolled in the College of Agriculture for a minimum of one semester as an undergraduate student prior to entering the DVM program
2. Must have completed 30 undergraduate credit hours at Kansas State University
3. Must have completed a total of 3 years (90 credit hours) of undergraduate coursework acceptable to Kansas State University
4. Cannot have already received a bachelor's degree from Kansas State University
5. Successfully completed the first 2 years of a DVM program
6. Must have submitted transcripts showing successful completion of the first 2 years of the DVM program to the Kansas State University Admissions Office, 119 Anderson Hall, by the university deadline for transfer work to be received for Spring graduates (typically the first Friday in June)

Students that intend to meet the above requirements should apply for graduation for the BVMA degree during the first 4 weeks of Kansas State University's Spring semester of their second year of their DVM program.

Current College of Agriculture students who have been admitted to the DVM program, but who have not completed their bachelor degree at Kansas State University, will be moved into the BVMA degree plan the Fall semester of their first year in the DVM program at Kansas State University. Students attending a DVM program at an institution other than Kansas State University, should go to the Ag Student Records Office in 135 Waters, prior to leaving Kansas State University, to have their major changed to BVMA as well as notify the student records office of their new email address.

*Please note the BVMA will present on the student's transcript as listed below:

DEGREE BACHELOR OF SCIENCE IN AGRICULTURE

CONFER DATE XX/XX/XXXX

PLAN BACHELOR – VETERINARY MEDICINE (B.S.)

The student's transcript will not show the degree plan the student was majoring in prior to entering the DVM program (i.e. Animal Sciences and Industry). Students should understand this is not a degree in their previous undergraduate major and that completion of this degree has a separate set of requirements than does their previous major prior to entering the DVM program.

Grain Science and Industry

Joseph Awika, Department Head

201 Shellenberger Hall
785-532-6161
Fax: 785-532-7010
E-mail: grains@k-state.edu
www.grains.k-state.edu

The Department of Grain Science and Industry offers three curricula: a bachelor of science in bakery science and management; a bachelor of science in feed science and management; and a bachelor of science in milling science and management. In the baking science curriculum, options are available in cereal chemistry or production management. In the feed science curriculum, options are available in biofuels production or feed production. In the milling science curriculum, options are available in chemistry or operations.

Associate of Applied Science

Food and Feed Manufacturing (AAS)

The AAS in Food and Feed Manufacturing degree program is designed to prepare students with the knowledge and skills for a successful career in the grain, food, and feed industries. The curriculum is designed to prepare learners for entry or supervisory positions in the rapidly advancing, diverse grain, food, and feed industries. The coursework, in addition to providing a solid technical and applied science foundation for ingredient purchasing, equipment maintenance and operation, and facility management, also provides students with invaluable hands-on learning experiences. This curriculum is designed to accommodate two different types of learners: 1) Current learners working in the industry who would like to obtain their degree online while maintaining their job; 2) traditional students who would like to complete a two-year degree in technical education to join the food and feed manufacturing and/or grain processing workforce as soon as possible.

The objective of the Associates of Applied Science in Food and Feed Technology is to train students in grain processing, flour milling, commercial baking, feed manufacturing, and pet food processing.

Kansas Board of Regents (KBOR) General Education Requirements: 16 credit hours

Food and Feed Manufacturing Major Requirements: 18 credit hours

Food and Feed Manufacturing Requirements: 6 credit hours

- FFM 100 - Foundations in Food and Feed Manufacturing **Credits:** 1
- FFM 110 - Introduction to Grain and Food Manufacturing Industries **Credits:** 1
- FFM 111 - Introduction to Feed and Pet Food Manufacturing Industries **Credits:** 1
- FFM 120 - Ingredient Identification and Quality: Cereal Grains **Credits:** 1
- FFM 121 - Ingredient Identification and Quality: Oil Seeds and Legumes **Credits:** 1
- FFM 122 - Ingredient Identification and Quality: Co-products and Additives **Credits:** 1

Manufacturing Basics: 4 credit hours

Select 1 Group:

1) Milling Basics

- FFM 150 - Preparing Grains **Credits:** 1
- FFM 151 - Milling Process **Credits:** 1
- FFM 152 - Milling Specialty Grains **Credits:** 1
- FFM 159 - Intro to Milling Practicum **Credits:** 1

2) Baking Basics

- FFM 160 - Bakery Ingredients **Credits:** 1
- FFM 161 - Bakery Processes **Credits:** 1
- FFM 162 - Bakery Products **Credits:** 1
- FFM 169 - Intro to Baking Practicum **Credits:** 1

3) Feed and Pet Food Basics

- FFM 170 - Feed Processing **Credits:** 1
- FFM 171 - Pet Food Processing **Credits:** 1
- FFM 172 - Finished Feed and Pet Food Quality Assurance **Credits:** 1
- FFM 179 - Intro to Feed and Pet Food Practicum **Credits:** 1

Equipment Maintenance: 3 credit hours

- FFM 210 - Food and Feed Manufacturing Equipment Maintenance **Credits:** 1

Select 1 Group:

1) Milling Equipment Maintenance

- FFM 215 - Preventative and Predictive Maintenance: Milling Specific **Credits:** 1
- FFM 225 - Milling Equipment Maintenance Practicum **Credits:** 1

2) Baking Equipment Maintenance

- FFM 216 - Maintenance Programs: Bakery Specific **Credits:** 1
- FFM 226 - Baking Equipment Maintenance Practicum **Credits:** 1

3) Feed and Pet Food Equipment Maintenance

- FFM 217 - Maintenance Programs: Feed and Pet Food Specific **Credits:** 1
- FFM 227 - Feed Equipment Maintenance Practicum **Credits:** 1

Advanced Manufacturing Management: 3 credit hours

- FFM 250 - Advanced Food and Feed Manufacturing Management **Credits:** 1

Select 1 Group:

1) Advanced Milling Management

- FFM 251 - Advanced Milling Management **Credits:** 1
- FFM 252 - Advanced Milling Manufacturing Management Practicum **Credits:** 1

2) Advanced Baking Management

- FFM 261 - Advanced Bakery Management **Credits:** 1
- FFM 262 - Advanced Baking Manufacturing Management Practicum **Credits:** 1

3) Advanced Feed and Pet Food Management

- FFM 271 - Advanced Feed and Pet Food Management **Credits:** 1
- FFM 272 - Advanced Feed and Pet Food Manufacturing Management Practicum **Credits:** 1

Food and Feed Safety: 2 credit hours

- FFM 280 - Introduction to Food and Feed Safety **Credits:** 1
  Select 1 course:
- FFM 285 - Food Safety Principles in Milling and Baking **Credits:** 1
- FFM 287 - Advanced Feed and Pet Food Safety **Credits:** 1

Major Support Courses: 25-27 credit hours

Agricultural Safety: 3 credit hours

- ASMS 120 - Intro to Food and Feed Manufacturing Employee Safety **Credits:** 1
- ASMS 220 - Employee Safety in Grain Handling Facilities **Credits:** 1
- ASMS 221 - Safety Applications Practicum **Credits:** 1

Computer Applications: 1-3 credit hours

Select 1 course:

(other computer applications courses as approved by the program director)

- ASI 290 - Computer Applications for Animal Sciences and Industry **Credits:** 3
  CIS

Specialization Electives: 9 credit hours

Select 9 hours:

AGRON AGTEC ASI ASMS ATM ECET ENTOM FDSCI FFM FNDH GRSC IMSE MET

Management Electives: 12 credit hours

Select 1 Course:

- LEAD 212 - Introduction to Leadership Concepts **Credits:** 2-3
- MANGT 220 - Principles of Management **Credits:** 3
  Select 9 hours:
  ACCTG AGEC BUS ENTRP FINAN LEAD MANGT MIS MKTG SALES

Free Electives

Complete additional courses, if needed, to total 60 hours.

Total Hours Required for Graduation: 60

Bachelor of Science

Bakery Science and Management - Cereal Chemistry (BS)

A major in bakery science trains students for administrative, research, production, and executive positions in the baking industry. Bakery science offers students two options; production management or cereal chemistry. Students selecting the production management option will take classes to prepare them for jobs in sales, product development or production management. Those choosing the cereal chemistry option learn about quality control or research and development.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program

Major Required Courses: 32-34 credit hours

- GRSC 100 - Foundations in Grain Science and Industry **Credits:** 1
- GRSC 150 - Principles of Milling **Credits:** 2
- GRSC 151 - Principles of Milling Laboratory **Credits:** 1
- GRSC 405 - Grain Analysis Techniques **Credits:** 2
  OR
- FDSCI 625 - Food Analysis **Credits:** 3
- GRSC 591 - Internship in Grain Science **Credits:** 1
- GRSC 600 - Practicum in Bakery Technology I **Credits:** 1
- GRSC 602 - Cereal Science **Credits:** 3
- GRSC 625 - Flour and Dough Testing **Credits:** 3
- GRSC 635 - Baking Science I **Credits:** 2
- GRSC 636 - Baking Science I Laboratory **Credits:** 2
- GRSC 637 - Baking Science II **Credits:** 3
- GRSC 638 - Baking Science II Laboratory **Credits:** 1
- GRSC 651 - Food and Feed Product Protection **Credits:** 2
  OR
- FDSCI 690 - Principles of HACCP and Preventive Controls for Human Food **Credits:** 3

Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Feed and Pet Food Science - Science (BS)

A degree in feed and pet food science covers areas such as grain handling, regulatory compliance, feed formulation, quality and safety, and pet food processing. This program prepares students for careers in the growing animal food production area. The science option provides core classes needed for veterinary or graduate school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program

Major Support Courses (44-48 credit hours)

Natural Sciences: (32-36 credit hours)

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 255 - General Microbiology **Credits:** 4
- BIOCH 521 - General Biochemistry **Credits:** 3

  Select 1 course
- PHYS 113 - General Physics I **Credits:** 4
- PHYS 213 - Engineering Physics I **Credits:** 5

  Select 1 course
- PHYS 114 - General Physics II **Credits:** 4
- PHYS 214 - Engineering Physics II **Credits:** 5

  Select 1 course
- CHM 210 - Chemistry I **Credits:** 4

- CHM 220 - Honors Chemistry I **Credits:** 5
  Select 1 course
- CHM 230 - Chemistry II **Credits:** 4
- CHM 250 - Honors Chemistry II **Credits:** 5
  Select 1 group
- CHM 350 - General Organic Chemistry **Credits:** 3
  AND
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
- CHM 531 - Organic Chemistry I **Credits:** 3
  AND
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2

Quantitative Studies: (3-4 credit hours)

The courses with a KSC designation are required if not met through University Core Requirements.

Statistics

- STAT 225 - Introduction to Statistics **Credits:** 3 *KSC-030*
  Mathematics
  (Select 1 course)
- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Management Electives: (9 credit hours)

(Select 9 hours)

See departmental list

Major Required Courses: (42 credit hours)

- ASI 202 - Domestic Animal Nutrition **Credits:** 3
- GRSC 100 - Foundations in Grain Science and Industry **Credits:** 1
- GRSC 101 - Fundamentals of Grain Processing **Credits:** 3
- GRSC 112 - Feed and Pet Food Experience **Credits:** 1
- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3
- GRSC 591 - Internship in Grain Science **Credits:** 1
- GRSC 612 - Advanced Feed Technology II and Laboratory **Credits:** 3
- GRSC 615 - Animal Food Safety **Credits:** 1
- GRSC 620 - Extrusion Processing in the Food and Feed Industries **Credits:** 4
- GRSC 645 - Pet Food Processing **Credits:** 3
- GRSC 650 - Nutritional Impacts of Processing **Credits:** 3
- GRSC 651 - Food and Feed Product Protection **Credits:** 2
- GRSC 655 - Feed Mill Plant Design **Credits:** 2
  Specialization Electives Credits / Units: 8
  (Select 8 hours) Credits / Units: 8
  See departmental list **Credits / Units:** 8

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html **Credits / Units:** 8

- GRSC 661 - Qualities of Feed Ingredients **Credits:** 3

Unrestricted Electives as needed to meet 120 credit hours

Unrestricted Electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Food Science and Industry - Business and Operations Management (BS)

This curriculum deals with all aspects of the food industry—both theoretical and practical—from producing raw materials through processing and packaging to marketing finished foods. The curriculum balances fundamental principles and practical applications of food science within a flexible program that permits students to tailor education to personal career goals. Students choose between three options, science, food business and operations management, or technology for their degree.

Graduates are needed to manage and supervise sophisticated food manufacturing industries that produce poultry, fresh and processed meat, dairy products, bakery goods, frozen and canned fruits and vegetables, confections, and snack foods. Job placement and starting salaries have been excellent.

Imaginative and well-trained people are needed in research and product development to create new and innovative products and processes. Some graduates work with producers to improve the quality of raw materials. Persons trained in HACCP and food safety, microbiology, quality assurance, and evaluation are needed to help food processors meet more stringent consumer and government requirements. Others are involved in selling, merchandising, advertising, or managing food operations. Government regulatory agencies also hire food scientists to assure public health, nutrition, and food labeling. If students have foreign language capabilities, international food industry jobs are available.

Very important to the student's course of study is the flexibility of restricted electives that the student selects by consultation with their academic advisor. This gives the student an opportunity to design a personalized, well-rounded curriculum. Often students can obtain a minor in such areas as business, cereal chemistry, economics, agribusiness, and leadership by careful selection of required minor courses.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

- FDSCI 695 - Quality Assurance of Food Products **Credits:** 3
- FDSCI 625 - Food Analysis **Credits:** 3
- GRSC 540 - Process Calculations in Food Systems **Credits:** 3

Processing Electives: minimum 8 credits

Minimum 8 hrs from at least 2 commodity areas – Dairy, Grain, Meat, or Fruit/Vegetable. Both lecture and lab components are required in instances where lecture and lab components are separate course numbers.

See departmental list

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

Unrestricted electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Food Science and Industry - Science (BS)

This curriculum deals with all aspects of the food industry—both theoretical and practical—from producing raw materials through processing and packaging to marketing finished foods. The curriculum balances fundamental principles and practical applications of food science within a flexible program that permits students to tailor education to personal career goals. Students choose between three options, science, food business and operations management or technology for their degree. The program is approved by the Institute of Food Technologists.

Graduates are needed to manage and supervise sophisticated food manufacturing industries that produce poultry, fresh and processed meat, dairy products, bakery goods, frozen and canned fruits and vegetables, confections, and snack foods. Job placement and starting salaries have been excellent.

Imaginative and well-trained people are needed in research and product development to create new and innovative products and processes. Some graduates work with producers to improve the quality of raw materials. Persons trained in HACCP and food safety, microbiology, quality assurance, and evaluation are needed to help food processors meet more stringent consumer and government requirements. Others are involved in selling, merchandising, advertising, or managing food operations. Government regulatory agencies also hire food scientists to assure public health, nutrition, and food labeling. If students have foreign language capabilities, international food industry jobs are available.

Very important to the student's course of study is the flexibility of restricted electives that the student selects by consultation with their academic advisor. This gives the student an opportunity to design a personalized, well-rounded curriculum. Often students can obtain a minor in such areas as business, cereal chemistry, economics, agribusiness, agricultural technology management, and leadership by careful selection of required minor courses.

The nature of the courses required in this curriculum is very compatible with course requirements of **students interested in pre-veterinary medicine and other pre-professional curriculums such as dentistry, pharmacy, and nursing**. A BS in food science provides excellent training for these students and offers them other job opportunities if needed.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
  Select 1 group (5 credit hours)
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  AND
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
- CHM 531 - Organic Chemistry I **Credits:** 3
  AND
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2

Quantitative Studies: 3-4 credit hours

The courses with a KSC designation are required if not met through University Core Requirements.

Statistics

- STAT 225 - Introduction to Statistics **Credits:** 3
  KSC-030

Math (select 1 course)

- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Management Electives: 6 credit hours

Management Electives 3 credit hours must be 300 or above:

See departmental list

https://www.ag.k-state.edu/academics/student-handbook/departcourselists.html

Unrestricted Electives as needed to meet 120 credit hours

Unrestricted Electives as needed to meet 120 credit hours

Total Hours Required for Graduation: 120

Unless the requirement block specifies otherwise, courses in the K-State Core can be used to meet one additional degree requirement, with the exception of a degree requirement that is specified as an overlay. K-State Core classes cannot be used to meet requirements for unrestricted electives. Courses outside the K-State Core can only be used to meet one degree requirement, unless the degree requirement is specified as an overlay.

Minor

Bakery Science Minor

This minor is available to students working toward a bachelor's degree at Kansas State University, to graduates of Kansas State University or to non-K-State graduates who hold a baccalaureate or advanced degree.

Requirements

Grain science majors cannot use courses required in their major as part of a bakery science minor.

- GRSC 101 - Fundamentals of Grain Processing **Credits:** 3
- GRSC 602 - Cereal Science **Credits:** 3
- GRSC 625 - Flour and Dough Testing **Credits:** 3
- GRSC 635 - Baking Science I **Credits:** 2
- * GRSC 636 - Baking Science I Laboratory **Credits:** 2
- GRSC 637 - Baking Science II **Credits:** 3
- * GRSC 638 - Baking Science II Laboratory **Credits:** 1

*Note

Requirements for the Laboratory class taken by distance will require the student to complete the same work as on campus students. This work may be done on campus or at appropriate industry locations.

Total credit hours: (16)

Cereal Chemistry Minor

Available for on-campus students only.

Requirements

Grain science majors cannot use courses required in their major as part of a cereal chemistry minor.

- GRSC 150 - Principles of Milling **Credits:** 2

- GRSC 405 - Grain Analysis Techniques **Credits:** 2
- GRSC 602 - Cereal Science **Credits:** 3
- GRSC 625 - Flour and Dough Testing **Credits:** 3

Minimum 8 credit hours from the following list:

- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- FDSCI 501 - Food Chemistry **Credits:** 3
- GRSC 620 - Extrusion Processing in the Food and Feed Industries **Credits:** 4
- GRSC 635 - Baking Science I **Credits:** 2
- GRSC 636 - Baking Science I Laboratory **Credits:** 2

Total hours required: (17)

Feed Science Minor

Available for on-campus students only.

- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3
- GRSC 612 - Advanced Feed Technology II and Laboratory **Credits:** 3
- GRSC 615 - Animal Food Safety **Credits:** 1
- GRSC 655 - Feed Mill Plant Design **Credits:** 2
- GRSC 661 - Qualities of Feed Ingredients **Credits:** 3
- Minimum 3 credit hours from GRSC 300 and above.

Total Minimum Hours Required for Graduation: 16

Food Science and Industry Minor

Students enrolled in any primary undergraduate major can be admitted to the Food Science minor. Intent to complete a minor should be filed prior to enrollment in the final nine credit hours of course work. Selection of the final 9 credits should be done in consultation with the Food Science minor advisor. No more than 6 hours of transfer courses may be used for the minor. Prerequisites and requisites associated with courses for the minor must be followed.

Core Courses (6 credit hours)

- FDSCI 202 - Introduction to Food Science **Credits:** 3
- FDSCI 305 - Fundamentals of Food Processing **Credits:** 3

Food Science elective courses (9 credit hours)

- FDSCI courses greater than 101 (9 credit hours)
    - FDSCI 300 or higher – **minimum one course**

- The following FDSCI courses cannot be applied towards the Food Science minor: FDSCI 101, FDSCI 301, FDSCI 310, FDSCI 500
- up to 6 credits 200-level and above from a non-FDSCI prefix that are directly related to Food Science, or covering topics directly relevant to Food Science, can be applied. **Prior approval of the Food Science minor advisor is required.**

Total credit hours: (15)

Pet Food Science Minor

Available for on-campus students only.

- ASI 520 - Companion Animal Management **Credits:** 3
- GRSC 312 - Introduction to Feed and Pet Food Processing **Credits:** 3
- GRSC 645 - Pet Food Processing **Credits:** 3

Minimum 5 credit hours from the following list:

- ASI 675 - Monogastric Nutrition **Credits:** 1
- ASI 677 - Companion Animal Nutrition **Credits:** 1
- FDSCI 600 - Food Microbiology **Credits:** 2
- FDSCI 690 - Principles of HACCP and Preventive Controls for Human Food **Credits:** 3
- SENS 711 - Pet Food Sensory Analysis **Credits:** 2
- GRSC 612 - Advanced Feed Technology II and Laboratory **Credits:** 3
- GRSC 620 - Extrusion Processing in the Food and Feed Industries **Credits:** 4
- GRSC 661 - Qualities of Feed Ingredients **Credits:** 3
- GRSC 750 - Pet Food Formulation for Commercial Production **Credits:** 1

Total Minimum Hours Required for Graduation: 16

Undergraduate Certificate

Baking Technology Undergraduate Certificate

Baking Technology Certificate offers focused training in areas such as ingredient functionality, dough preparation, baking operations, and quality control, ensuring that graduates are well-prepared to manage and innovate within commercial baking environments. By covering both the technical and practical aspects of baking, the certificate program prepares students to produce high-quality baked goods, adhere to industry standards, and optimize baking operations for consistency and efficiency.

Required Courses: 8 credit hours

- ASMS 120 - Intro to Food and Feed Manufacturing Employee Safety **Credits:** 1
- FFM 110 - Introduction to Grain and Food Manufacturing Industries **Credits:** 1
- FFM 120 - Ingredient Identification and Quality: Cereal Grains **Credits:** 1
- FFM 160 - Bakery Ingredients **Credits:** 1

- FFM 161 - Bakery Processes **Credits:** 1
- FFM 162 - Bakery Products **Credits:** 1
- FFM 169 - Intro to Baking Practicum **Credits:** 1
- FFM 280 - Introduction to Food and Feed Safety **Credits:** 1

Specialization Electives: 7 credit hours

Select 7 hours from the following:

AGRON, AGEC, AGTEC, ASMS, ATM, ENTOM, ETEC, FDSCI, FFM, FNDH, GRSC, IMSE, MET

Total Credit Hours Required: 15

Feed and Pet Food Manufacturing Undergraduate Certificate

This program offers targeted training in areas such as ingredient handling, formulation, processing techniques, and quality control, equipping graduates to manage and innovate within feed and pet food production environments. By covering both the technical and operational aspects of manufacturing, the certificate prepares students to produce high-quality feed and pet food products while adhering to industry standards and safety regulations.

Required Courses: 9 credit hours

- FFM 110 - Introduction to Grain and Food Manufacturing Industries **Credits:** 1
- FFM 111 - Introduction to Feed and Pet Food Manufacturing Industries **Credits:** 1
- FFM 120 - Ingredient Identification and Quality: Cereal Grains **Credits:** 1
- FFM 121 - Ingredient Identification and Quality: Oil Seeds and Legumes **Credits:** 1
- FFM 122 - Ingredient Identification and Quality: Co-products and Additives **Credits:** 1
- FFM 170 - Feed Processing **Credits:** 1
- FFM 171 - Pet Food Processing **Credits:** 1
- FFM 172 - Finished Feed and Pet Food Quality Assurance **Credits:** 1
- FFM 179 - Intro to Feed and Pet Food Practicum **Credits:** 1
- FFM 210 - Food and Feed Manufacturing Equipment Maintenance **Credits:** 1

Specialization Electives: 6 credit hours

Select 6 hours from the following:

AGRON, AGEC, AGTEC, ASI, ASMS, ATM, ENTOM, ETEC, FDSCI, FFM, FNDH, GRSC, IMSE, MET

Total Hours Required: 15

Food Safety and Quality Undergraduate Certificate

A non-degree undergraduate certificate in Food Safety and Quality requires the completion of 20 K-State semester credit hours of Food Science or closely related courses (transfer credit will not be applied).

Eligibility

The Food Safety and Quality non-degree undergraduate certificate is open to students who live in the United States or are active duty American military.

Prerequisite course requirements: College chemistry, biology, and microbiology must be completed before starting the certificate program. Additional course prerequisites may exist for elective courses.

Application Process

The Food Safety and Quality non-degree undergraduate certificate program has an application fee. Apply online and pay the application fee using the undergraduate application. You must be admitted at least 30 days prior to the semester beginning.

Starting Dates

Fall semester begins in late-August, spring semester begins in mid-January, and summer semester begins in mid-May.

Courses

A current listing of courses (and cost per course) can be accessed at the K-State Global Campus website (click on search for an online class). Courses can be used towards a Bachelor Degree.

All information on degrees and courses offered can be accessed via the Food Science Institute website.

Certificate: 20 credit hours

Required Courses: 14 credit hours

- FDSCI 202 - Introduction to Food Science **Credits:** 3
- FDSCI 305 - Fundamentals of Food Processing **Credits:** 3
- FDSCI 600 - Food Microbiology **Credits:** 2
- FDSCI 690 - Principles of HACCP and Preventive Controls for Human Food **Credits:** 3
- FDSCI 695 - Quality Assurance of Food Products **Credits:** 3

Elective Courses: 6 credit hours

- FNDH 132 - Basic Nutrition **Credits:** 3
  OR
- ASI 202 - Domestic Animal Nutrition **Credits:** 3

- ASI 350 - Meat Science **Credits:** 3
- ASI 640 - Poultry Products Technology **Credits:** 3
- FDSCI 501 - Food Chemistry **Credits:** 3
- FDSCI 625 - Food Analysis **Credits:** 3
- FDSCI 710 - Kosher and Halal Food Regulations **Credits:** 2
- FDSCI 730 - A Multidisciplinary Overview of Food Safety and Security **Credits:** 2
- FDSCI 731 - Food Protection and Defense--Essential Concepts **Credits:** 2
- GRSC 602 - Cereal Science **Credits:** 3
- GRSC 645 - Pet Food Processing **Credits:** 3

Total Hours Required: 20

Grain Processing Undergraduate Certificate

This program provides focused training in key areas such as grain cleaning, milling techniques, equipment operation, and quality control, ensuring that graduates are prepared to handle the complex processes involved in transforming raw grain into high-quality flour products. By covering the technical and operational aspects of grain processing and milling, the certificate program prepares students to meet industry standards, improve efficiency, and maintain product consistency and safety.

Required Courses: 9 credit hours

- FFM 110 - Introduction to Grain and Food Manufacturing Industries **Credits:** 1
- FFM 120 - Ingredient Identification and Quality: Cereal Grains **Credits:** 1
- FFM 121 - Ingredient Identification and Quality: Oil Seeds and Legumes **Credits:** 1
- FFM 150 - Preparing Grains **Credits:** 1
- FFM 151 - Milling Process **Credits:** 1
- FFM 152 - Milling Specialty Grains **Credits:** 1
- FFM 159 - Intro to Milling Practicum **Credits:** 1
- FFM 210 - Food and Feed Manufacturing Equipment Maintenance **Credits:** 1
- FFM 280 - Introduction to Food and Feed Safety **Credits:** 1

Specialization Electives: 6 credit hours

Select 6 hours from the following:

AGRON, AGEC, AGTEC, ASMS, ATM, ENTOM, ETEC, FDSCI, FFM, FNDH, GRSC, IMSE, MET

Total Hours Required: 15

Horticulture and Natural Resources

Steve Keeley, Head

2021 Throckmorton Hall
785-532-1401
Fax: 785-532-6949
E-mail: hnrinfo@k-state.edu
www.hnr.k-state.edu

The Department of Horticulture and Natural Resources is a multi-disciplinary department offering undergraduate programs in horticulture, park management and conservation, and wildlife and outdoor enterprise management. Each of these programs offers multiple options to meet the career objectives of a wide variety of individuals. Departmental faculty participate in research, extension, and academic programs in these diverse fields which have a positive impact on the quality of life and enhancing the environment. Individual students may have opportunities working with faculty on research or extension programs.

Horticulture programs

K-State offers a four-year curriculum in horticulture. The Department of Horticulture and Natural Resources also participates in an interdepartmental program in food science and industry.

Horticulture is the science and art of growing plants for environmental improvement, aesthetic value, intensive food production, or social-therapeutic effects. The horticulture program is designed for those seeking to move into the production or service sectors of horticulture or pursue careers in science. Students completing this program also meet requirements for entrance into graduate programs across the United States and can meet the education requirements for certification by the American Registry of Certified Professionals in Agronomy, Crops, and Soils.

All students are required to take a core of general courses in addition to the agricultural, horticultural, and business courses. Students in the horticulture program will be expected to choose a specialization in production, golf course and sports turf operations, horticulture science, and landscape horticulture. The horticulture science specialization provides a stronger foundation in basic sciences for graduate studies. Students interested in pursuing careers in industry research or extension can also follow this specialization. After the sophomore year, students are required to complete a three- or six-month internship at an approved site.

Career opportunities for students graduating with a degree in horticulture exist in various arenas, including production, landscape and management, floral design, botanic gardens, arboreta, garden center operation, athletic grounds management, and golf course operations.

Opportunities exist with the various support industries in the area of sales of fertilizers, chemicals, plant material, seeds, containers, and various other supplies; product development; breeding and seed production companies; and trade magazines. Horticulture majors obtaining a minor in plant pathology or entomology will also find opportunities in horticultural pest diagnosis and consulting. Students considering a career in extension should consider pursuing a Master of Science degree.

Horticulture minor

The department offers a minor in horticulture consisting of 16 credit hours of course work. The minor is available to undergraduate students in any primary major. To be considered a candidate for the minor, the student must file an application with supervisor of the horticulture minor program. This should be done prior to completion of the final 9 credit hours required for the minor.

Park Management and Conservation program

K-State offers a four-year curriculum in park management and conservation. All students are required to take a core of courses deemed central to the outdoor recreation profession.

The park management curriculum prepares young people to manage the resource where outdoor recreation takes place including the soil, water, flora, fauna and human visitors. A broad array of course work including wildlife management, history, entomology and other social and natural sciences equip the individual for this resource management task.

Society faces a future of making potentially infinite demands upon finite natural resources. Appropriate management of America's natural and recreation resources will require the best efforts of dedicated, trained professional managers. A basic objective of recreation resource managers is to provide essential goods and services while maintaining the highest environmental

standards. A primary focus of recreation and park professionals is the supply of quality leisure opportunities that lead to an enhanced "quality of life."

Career choices for the park management professional include a wide array of governmental and non-governmental options. The majority of graduates pursue employment as program specialists and unit managers at municipal and recreation agencies; state park, wildlife and natural resource departments, and land management agencies of the federal government such as the U.S. Army Corps of Engineers and the National Park Service. Others choose to work for outdoor and environmentally based associations and organizations. A few utilize the entrepreneurial training to operate their own enterprises.

Wildlife and Outdoor Enterprise Management program

The Kansas State University Wildlife and Outdoor Enterprise Management (WOEM) degree program is the first Bachelor of Science (B.S.) degree to train professional operational managers for hunting/shooting preserves and resorts, gamebird production companies, fishing resorts and outdoor experience companies. Wildlife and related outdoor enterprises exist in all 50 states, Canada, Central and South America, Europe, Africa, Australia and New Zealand.

While students take courses in wildlife and fisheries management, this program is not a traditional wildlife and fisheries biology program of study. To create professional managers, this program incorporates a series of business, hospitality management, natural resources, wildlife and fisheries management courses with training in selected outdoor skills.

Outdoor skills courses in the WOEM Program include: firearms and firearms maintenance; rifle and handgun range design construction and operations; bowhunting equipment and skills; sporting clays range development and operations; trap and skeet range development and operations.

The students also take the following operations courses: big game management, upland gamebird management, waterfowl and wetlands management, and principles and practices of freshwater fishing.

Bachelor of Science

Horticulture - Golf Course and Sports Turf Operations Management (BS)

K-State offers a four-year curriculum in horticulture. The Department of Horticulture and Natural Resources also participates in an interdepartmental program in food science and industry.

Horticulture is the science and art of growing plants for environmental improvement, aesthetic value, intensive food production, or social-therapeutic effects. The horticulture program is designed for those seeking to move into the production or service sectors of horticulture or pursue careers in science. Students completing this program also meet requirements for entrance into graduate programs across the United States and can meet the education requirements for certification by the American Registry of Certified Professionals in Agronomy, Crops, and Soils.

All students are required to take a core of general courses in addition to the agricultural, horticultural, and business courses. Students in the horticulture program will be expected to choose a specialization in production, golf course and sports turf operations, horticulture science, and landscape horticulture. The horticulture science specialization provides a stronger foundation in basic sciences for graduate studies. Students interested in pursuing careers in industry research or extension can also follow this specialization. After the sophomore year, students are required to complete a three- or six-month internship at an approved site.

Career opportunities for students graduating with a degree in horticulture exist in various arenas, including production, landscape and management, floral design, botanic gardens, arboreta, garden center operation, athletic grounds management, and golf course operations.

Opportunities exist with the various support industries in the area of sales of fertilizers, chemicals, plant material, seeds, containers, and various other supplies; product development; breeding and seed production companies; and trade magazines. Horticulture majors obtaining a minor in plant pathology or entomology will also find opportunities in horticultural pest diagnosis and consulting. Students considering a career in extension should consider pursuing a Master of Science degree.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Horticulture Support Requirements: (24 credit hours)

MATH 160 is the designated **Math Pathway course** *for this program.* **Any course in KSC-030, including those on the Advanced Math list, may be applied to meet this requirement.**

Horticulture - Science (BS)

K-State offers a four-year curriculum in horticulture. The Department of Horticulture and Natural Resources also participates in an interdepartmental program in food science and industry.

Horticulture is the science and art of growing plants for environmental improvement, aesthetic value, intensive food production, or social-therapeutic effects. The horticulture program is designed for those seeking to move into the production or service sectors of horticulture or pursue careers in science. Students completing this program also meet requirements for entrance into graduate programs across the United States and can meet the education requirements for certification by the American Registry of Certified Professionals in Agronomy, Crops, and Soils.

All students are required to take a core of general courses in addition to the agricultural, horticultural, and business courses. Students in the horticulture program will be expected to choose a specialization in production, golf course and sports turf operations, horticulture science, and landscape horticulture. The horticulture science specialization provides a stronger foundation in basic sciences for graduate studies. Students interested in pursuing careers in industry research or extension can also follow this specialization. After the sophomore year, students are required to complete a three- or six-month internship at an approved site.

Career opportunities for students graduating with a degree in horticulture exist in various arenas, including production, landscape and management, floral design, botanic gardens, arboreta, garden center operation, athletic grounds management, and golf course operations.

Opportunities exist with the various support industries in the area of sales of fertilizers, chemicals, plant material, seeds, containers, and various other supplies; product development; breeding and seed production companies; and trade magazines. Horticulture majors obtaining a minor in plant pathology or entomology will also find opportunities in horticultural pest diagnosis and consulting. Students considering a career in extension should consider pursuing a Master of Science degree.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

The curriculum for this major assumes students enter college prepared to take Calculus.

Horticulture Major Support Requirements: (24 credit hours)

The courses with a KSC designation are required if not met through University Core Requirements.

Total Hours Required for Graduation: 120

Park Management and Conservation (BS)

K-State offers a four-year curriculum in park management and conservation. All students are required to take a core of courses deemed central to the outdoor recreation profession.

The park management curriculum prepares young people to manage the resource where outdoor recreation takes place including the soil, water, flora, fauna and human visitors. A broad array of course work including wildlife management, history, entomology and other social and natural sciences equip the individual for this resource management task.

Society faces a future of making potentially infinite demands upon finite natural resources. Appropriate management of America's natural and recreation resources will require the best efforts of dedicated, trained professional managers. A basic objective of recreation resource managers is to provide essential goods and services while maintaining the highest environmental standards. A primary focus of recreation and park professionals is the supply of quality leisure opportunities that lead to an enhanced "quality of life."

Career choices for the park management professional include a wide array of governmental and non-governmental options. The majority of graduates pursue employment as program specialists and unit managers at municipal and recreation agencies; state park, wildlife and natural resource departments, and land management agencies of the federal government such as the U.S. Army Corps of Engineers and the National Park Service. Others choose to work for outdoor and environmentally based associations and organizations. A few utilize the entrepreneurial training to operate their own enterprises.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

Wildlife and Outdoor Enterprise Management (BS)

The Wildlife and Outdoor Enterprise Management (WOEM) degree program offers students the ability to earn a Bachelor of Science (B.S.) degree and train them to be professional operational managers for hunting/shooting preserves and resorts, gamebird production companies, fishing resorts and other outdoor experience companies. To create professional managers, this program takes an interdisciplinary approach and incorporates a series of business, hospitality management, natural resources, wildlife and fisheries management courses with training in selected outdoor skills, such as firearms maintenance, bowhunting skills, and wildlife habitat maintenance.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional

general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

Credit Grand Total for Program of Study: 120

Minor

Floral Design Minor

The minor in floral design expands skill sets to incorporate floristry into event planning, and explores floral design as a profession.

Required Courses: 9 credit hours

- HORT 210 - Concepts of Floral Design **Credits:** 3
- HORT 391 - Independent Study in Floral Design **Credits:** 3
- HORT 410 - Floral Planning for Special Events **Credits:** 1
- HORT 415 - Wedding Flowers **Credits:** 1
- HORT 420 - Unique Floral Designs **Credits:** 1

Electives: 6 credit hours

Choose 6 credit hours from the following elective list:

- HORT 377 - Interior Plantscaping **Credits:** 3
- HM 363 - Event Management **Credits:** 3
- HM 370 - The Business of Wedding Consulting **Credits:** 3

Total Hours Required: 15

Horticulture Minor

Program requirements

A minor in horticulture will provide the student with a breadth of knowledge in horticulture.

- HORT 201 - Principles of Horticultural Science **Credits:** 4
- HORT 350 - Plant Propagation **Credits:** 3

Horticulture Electives (9 credit hours)

Choose any combination of Horticulture courses to reach 9 credit hours of electives.

Total credit hours for Minor: (16)

Park Management and Conservation Minor

The Park Management and Conservation Minor focuses on natural resource management. This involves developing advanced understanding of effective management practices and exploring associated social and economic dimensions. Primary application involves career pathways within national, state, and local agencies including the National Park Service, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, USDA Forest Service, state park departments, and local park and recreation departments. Other popular career trajectories include outfitters, retailers, and associations.

Required Courses: 6 credit hours

- PMC 210 - Intro to Outdoor Recreation **Credits:** 3
- PMC 275 - Introduction to Natural Resource Management **Credits:** 3

PMC Elective: 3-4 credit hours

1 course in PMC

Electives: 5-6 credit hours

Plant Pathology

Megan Kennelly, Head

1712 Claflin Rd
4024 Throckmorton Hall
785-532-6176
Fax: 785-532-5692
E-mail: plantpath@k-state.edu
www.plantpath.k-state.edu

Plant pathology is the study of plant diseases and their causes, effects, nature, and control. Opportunities for graduates in plant pathology include basic and applied research, development, and teaching.

Minor

Plant Pathology Minor

Plant pathology is the study of plant diseases, their causes, effects, and management. Keeping plants healthy requires an understanding of the organisms and agents that cause disease as well as an understanding of how plants grow and are affected by disease. The expanding interest in the quality of our global environment and increasing global demand for high quality food, fiber, tree and ornamental plants provides many opportunities for graduates with training in plant pathology.

Teaching and research faculty specialize in wheat, corn, sorghum, soybean, sunflower, rice, turf and horticultural diseases caused by bacteria, fungi, nematodes, and viruses. In addition, departmental teaching and research efforts integrate the crops and pathogen groups important to Kansas, the U.S., and the world through the study of bioinformatics, cytogenetics/germplasm improvement, disease diagnostics, disease physiology, epidemiology, microbial ecology, fungal genetics, host-parasite

interactions, modeling/statistics, molecular genetics/genomics, plant biotechnology, sustainable agriculture, and environmental science.

Careers

A plant pathologist is a professional who specializes in plant health much as a physician specializes in human health or a veterinarian in animal health. Opportunities for graduates with plant pathology minors include basic and applied research, international development, teaching, crop consulting, and extension. In addition, plant pathology expertise is useful for farm and greenhouse managers, park and golf course superintendents, agribusiness sales representatives, and other biological science positions requiring a bachelor's degree.

Academics

Training available in plant pathology at KSU includes the following areas:

- Diseases of Kansas crops (wheat, corn, sorghum, soybean, sunflower, turf, and horticultural plants)
- Ecology and evolution
- Genetics/biotechnology/genomics/bioinformatics
- Host-plant resistance
- Molecular biology of host-pathogen interactions
- Pathogen biology

Program requirements

Students interested in the study of plant diseases should consider the plant pathology minor. Please get in touch with plant pathology minor coordinator to discuss the course plan and completer the enrollment paperwork. Contact information of the coordinator can be found on department of plant pathology website.

Required courses (5 credit hours):

- PLPTH 500 - Principles of Plant Pathology **Credits:** 3
- PLPTH 585 - Crop Diseases **Credits:** 2
  or
- PLPTH 590 - Landscape Diseases **Credits:** 2

Plus at least two additional hours in plant pathology, such as:

- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3
- PLPTH 587 - Turfgrass Diseases and Their Management **Credits:** 1
  or
- HORT 587 - Turfgrass Diseases and Their Management **Credits:** 1
- PLPTH 610 - Biotechnology **Credits:** 3
  or
- AGRON 610 - Biotechnology **Credits:** 3
- PLPTH 732 - Introduction to Plant Resistance to Pests **Credits:** 2
- PLPTH 755 - Plant Resistance to Diseases **Credits:** 2
- PLPTH 765 - Integrated Plant Disease Management **Credits:** 2

At least 8 additional credit hours from the following:

- Any other course in Plant Pathology
- AGRON 330 - Weed Science **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 500 - Plant Physiology **Credits:** 3
- BIOL 501 - Plant Physiology Lab **Credits:** 1
- BIOL 580 - Molecular Biology of Genes and Genomes **Credits:** 3
- BIOL 604 - Biology of the Fungi **Credits:** 3
- BIOL 675 - Genetics of Microorganisms **Credits:** 3
- BIOL 676 - Molecular Genetics Laboratory **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- BIOL 705 - Eukaryotic Genetics **Credits:** 3
- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4
- ENTOM 250 - Economic Entomology **Credits:** 3
  or
- ENTOM 312 - General Entomology **Credits:** 3
- ENTOM 350 - Crops, Insects, and Agroecosystems **Credits:** 3
- ENTOM 200 - Insect Sampling and Surveillance **Credits:** 2
- ENTOM 205 - Introduction to Insect Data Analysis **Credits:** 1
- ENTOM 210 - Introduction to Insecticides **Credits:** 1
- ENTOM 612 - Insect Pest Diagnosis **Credits:** 2
- ENTOM 620 - Pesticides, People, and the Environment **Credits:** 2
- ENTOM 621 - Introduction to Biological Control **Credits:** 3
- HORT 282 - Foundations of Horticultural Pest Management **Credits:** 1
- HORT 588 - Turfgrass Weeds and Their Management **Credits:** 1
- HORT 589 - Turfgrass Insects and Their Management **Credits:** 1

Total credit hours: (15)

College of Architecture, Planning and Design

Michael McClure, Dean
Katie Kingery-Page, Associate Dean
Karina Taufi, Director of Student Recruitment
Katrina Lewis, Director of International Programs and Director of Environmental Design Studies
Mitzi Farmer, Director of Academic Services and Academic Advisor

1127 Regnier Hall

Fax: 785-532-6722
E-mail: myapd@k-state.edu
www.apdesign.k-state.edu

The College of Architecture, Planning and Design offers accredited professional degree programs in architecture, interior architecture, industrial design, landscape architecture, and regional and community planning. The College also offers a Bachelor of Science in Real Estate and Community Development.

The college consists of three academic departments: architecture, interior architecture and industrial design, and landscape architecture and regional and community planning.

The curriculum in architecture is accredited by the National Architectural Accrediting Board (NAAB). The interior architecture curriculum is accredited by Council for Interior Design Accreditation (CIDA). The interior architecture and industrial design curricula are approved by National Association of Schools of Art and Design (NASAD). The landscape architecture curriculum is accredited by the Landscape Architectural Accreditation Board (LAAB). The planning curriculum is accredited by the American Institute of Certified Planners (AICP) in cooperation with the Association of Collegiate Schools of Planning (ACSP).

Accredited, five-year graduate degrees are offered in Architecture, Interior Architecture, Industrial Design, Landscape Architecture, and Regional and Community Planning to students who have not completed a bachelor's degree (high school or transfer students).

Accredited graduate degrees in Architecture, Interior Architecture, Landscape Architecture, and Regional and Community Planning are also available to students who already hold an undergraduate degree in different fields.

The Master of Science in Architecture degree is intended for students who already hold an accredited Bachelor of Architecture degree.

The Master of Science in Community Development is an on-line degree offered to students who already hold an undergraduate degree.

A PhD in Environmental Design and Planning is also offered, with the primary objective of supporting graduate research which employs an interdisciplinary view of design and planning.

Admission Policies and Procedures

Application Process

High school applicants

In addition to meeting the university's admission requirements, selective admission to the College of Architecture, Planning and Design five-year master's degrees are based upon the review of high school cumulative GPA. We highly encourage students to submit ACT or SAT scores to maximize scholarship opportunities. Students who do not submit test scores should contact the admissions office for further information on how to apply for scholarships. The number of students who can enter the first-year program for the accredited, 5-year master's degrees is limited and admission is competitive. The college does not admit freshman or transfer students for the spring semester. Application does not guarantee admission.

To be considered for admission, all application materials must be sent to the Office of Admissions no later than February 1. Late applicants are considered only if space is available.

Applicants to the 4-year, Bachelors of Science in Real Estate and Community Development should meet K-State's qualified admissions. Other applicants may apply and will be considered holistically. Application does not guarantee admission.

Application materials and deadline

Materials

1. Application for undergraduate admission with the College of Architecture, Planning and Design clearly marked as your intended major.
2. University application fee.
3. Provide your self-reported GPA and ACT or SAT score (if submitting) on the university application.
4. Students will be required to submit an official or unofficial transcript for review of their application by the College of Architecture, Planning and Design.
5. Students will need to provide official transcripts and test scores after completion of their high school academic year.

Deadline: February 1

Applicants who apply before the deadline and have a 3.50 GPA and above will be offered early admission to the College of Architecture, Planning and Design. Others should still apply; eligible applicants will be considered through February 1.

(Late applications are considered if space is available.)

College preparatory curriculum

Students are advised to take a full academic course load each year of high school to meet requirements for the recommended college preparatory curriculum. Students are encouraged to take honors and advanced placement courses if they are available. Advanced Placement courses in calculus, physics, and English are helpful. Courses that develop creative abilities should be taken if time permits. The faculty strongly recommends taking a course in freehand drawing. If a choice must be made between technical drawing, computer aided drafting, or freehand drawing, the faculty prefers freehand drawing.

The following high school curriculum is highly recommended but not required for admission:

Course	Units
Mathematics (Algebra I, geometry, Algebra II, and trigonometry (pre-calculus or calculus is also recommended, but not required)	3–4
English (emphasis on critical thinking, reading, and writing)	4
Science (including Physics)	3–4
Social studies	3–4

Foreign language	2–4

Transfer applicants

A student's academic achievement in college-level course work is an important indicator of future academic performance. Students should have a college grade point average of at least a 3.0 to be considered for admission. However, being considered does not guarantee admission. Please note that all admission decisions are contingent upon maintaining or exceeding the standards. Placement of transfer students will be determined on a case by case basis.

Students should contact the College of Architecture, Planning and Design's Office of Student and Academic Services at 785-532-5047 for advice about the transfer process. It is advised to establish contact with the College before enrolling in university courses.

Second-, third-, fourth-, or fifth-year placement
Students who have attended another National Architectural Accrediting Board (NAAB), Landscape Architectural Accreditation Board (LAAB), or Council for Interior Design Accreditation (CIDA) accredited program may apply to be considered for placement in the second-, third-, fourth-, or fifth-, year of one of our degree programs. Prospective transfer students should follow the procedures described in this document and submit a personal statement describing the reason for considering transfer to APDesign, course descriptions for all the professional program courses and a digital portfolio of work completed in design studios. Studio placement will be determined by means of individual portfolio review by the faculty. Portfolios must be sent to myapd@k-state.edu no later than February 1.

Accelerated Pathway for Transfer Students

Students who did not attend an accredited program and who are interested in pursuing a degree in architecture, interior architecture, industrial design, or landscape architecture may seek admission to an intense 10-week summer design studio. Upon successful completion, students will enter the second year of the five-year degree program. Specific prerequisites must be completed to qualify for admission to this summer studio. You can learn more about the studio and the prerequisites at: https://apdesign.k-state.edu/academics/admissions/.

Students who have attended an accredited planning program as well as students who did not attend an accredited program may be considered for placement in the second-, third-, fourth-, or fifth-, year of the regional and community planning program. Prospective transfer students who are seeking admission to regional and community planning should follow the procedures described in this document and contact the Director of Student Recruitment for further information.

Application materials and deadline

Materials

1. Application for undergraduate admission with College of Architecture, Planning and Design clearly marked as your intended major.
2. University application fee.
3. Official college transcript(s) for all schools, including the most recent courses and grades.

Send application materials directly to:

Office of Admissions
Kansas State University
119 Anderson Hall
Manhattan, KS 66506–0102

Deadline: February 1
To ensure consideration, application materials must be postmarked by February 1

(Late applicants are considered if space is available.)

Student academic creations

All programs involve extensive project work. Students are advised to budget sufficient funds to cover the cost of equipment, materials, and supplies. Material costs will be higher than those published for non-studio curricula.

Student academic creations are subject to Kansas State University and Board of Regents intellectual property policies. The Regents policy states:

The ownership of student works submitted in fulfillment of academic requirements shall be with the creator(s). The student, by enrolling in the institution, gives the institution a non-exclusive royalty-free license to mark on, modify, retain the work as may be required by the process of instruction, or otherwise handle the work as set out in the institution's intellectual property policy or in the course syllabus. The institution shall not have the right to use work in any other manner without the written consent of the creator(s). Otherwise handle, as referenced in this policy, includes display of student work in various media and use for accreditation purposes.

K-State's intellectual property policy.

Education Abroad

Students have opportunities to earn academic credit by studying abroad. APDesign collaborates with programs in in Italy, Australia, Austria, Denmark, England, Germany, the Czech Republic and Spain. Specific information is available from the Director of International Programs. Requirements vary among the departments.

Internship

Internships opportunities at design and planning firms allow students to spend a semester and/or a summer working with private practitioners, corporations or government agencies. Students earn academic credit and a salary while on internship. Specific requirements vary among the departments.

Kansas City Design Center (KCDC)

The opportunity to study in the heart of downtown Kansas City, at a nationally recognized non-profit partnership among local civic leaders, professional designers and planners and students who are actively seeking urban design and planning solutions for this major metropolitan area. http://www.kcdesigncenter.org/

Extracurricular activities

The college offers opportunities for students to become involved in such activities as student government, student chapters of professional societies, college ambassadors, peer educators, Open House, and the student journal, *OZ*.

Master of Science

Environmental Design Studies (MS)

The curriculum for the first year forms the foundation of the accredited professional programs in architecture, interior architecture and product design, landscape architecture, and regional and community planning.

Environmental Design Studies - First semester (17 credit hours)

- K-State 8 General Education elective **Credits:** 3
- COMM 105 - Public Speaking IA **Credits:** 2

- ENVD 201 - Environmental Design Studio I **Credits:** 4
- ENVD 203 - Survey of the Design, Planning and Community Development Professions **Credits:** 1
- ENVD 204 - Studio Seminar **Credits:** 1
- ENVD 250 - History of the Designed Environment I **Credits:** 3
- MATH 100 - College Algebra **Credits:** 3

Environmental Design Studies - Second semester (15 credit hours)

- ENGL 100 - Expository Writing I **Credits:** 3
- ENVD 202 - Environmental Design Studio II **Credits:** 4
- ENVD 251 - History of the Designed Environment II **Credits:** 3
- PHYS 115 - Descriptive Physics **Credits:** 5

Total hours required: 32

Notes

High school mathematics prerequisites: Entering freshmen or transfer students must have fulfilled the minimum high school prerequisites: algebra I (one unit): plane geometry (one unit); algebra II (one unit); and trigonometry (one-half unit) before entering the College of Architecture, Planning and Design. The prerequisites may be fulfilled at Kansas State University, or elsewhere, with the exception of geometry, which is not taught at K-State. Completing these courses at K-State will extend the time required to complete the degree program.

After satisfactory completion of the Environmental Design Studies Program, students are eligible to apply for admission to the programs of Architecture, Interior Architecture and Product Design, Landscape Architecture or Regional and Community Planning.

Due to accreditation standards and limited resources, each professional program has limited studio space available. Therefore, positions in second year are awarded on a competitive basis.

Architecture

Matthew Knox, Head

1088 Seaton Hall
785-532-5953
Fax: 785-532-1086
E-mail: architecture@ksu.edu
www.arch.k-state.edu/arch

The nationally-ranked Department of Architecture, situated within the interdisciplinary College of Architecture, Planning and Design offers two degree options: an accredited professional Master of Architecture and a post-professional Master of Science in Architecture.

Master of Architecture (M.ARCH)

The NAAB-accredited Master of Architecture is based firmly upon the complementary foundations of general and architectural education. We emphasize mastery of the knowledge, skills and understandings essential to the artful creation of buildings, spaces and places. The faculty seeks to assure that our students receive extensive exposure to social, political, economic and technological perspectives that will aid them in functioning as effective leaders in a rapidly changing global context.

In emphasizing the architect's role as a designer of environments that responsibly address individual and societal needs, the professional Master of Architecture curriculum includes a sequence of design studios providing holistic examination of environmental design issues. Courses in history, theory, human behavior, construction, structural and environmental systems, planning, programming, and professional practice compliment students' work in the carefully orchestrated series of design studios.

The M.ARCH degree has two entry points. Undergraduate students should apply for the five-year plus Non-Baccalaureate Master of Architecture. Students who currently have a Bachelor's Degree, regardless of field of study, should apply for the Post-Baccalaureate Master of Architecture program or to the Master of Science in Architecture program. See Department of Architecture page in the Graduate Catalog.

Special Activities and Programs
Short, carefully structured visits to cities in Kansas and nearby states during the first year of study introduce students to techniques of urban and architectural analysis and extend the range of their experience. Longer trips are taken in subsequent years. Second year students typically travel to Dallas; third year students travel to major cities such as New York, Boston, Chicago, San Francisco, and Seattle. Led by faculty, students visit leading architectural firms, contemporary and historical buildings of importance, and examine critical urban design features. Design studio projects are often located in the city visited, so the trips are also site visits, which provide opportunities for detailed urban analysis.

Fourth-year students have access to extended elective field study opportunities, including the semester-long Architectural Internship program and study abroad programs in Italy, the Czech Republic, Denmark, Germany or other countries. Architectural internship and study abroad students return with renewed purpose and fresh insights to share with fellow students and faculty during their final year in the Master of Architecture program.

Fifth year students have the option of international travel based on the focus of their studio projects. The College also offers a year-long fifth year urban design studio at the Kansas City Design Center in Kansas City, Missouri.

Accreditation and Professional Practice
The completion of the Master of Architecture degree and then a professional experience qualify our graduates to sit for the Architectural Registration Examination administered by each American state and territory to candidates who wish to become licensed as architects.

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree.

Kansas State University, College of Architecture Planning and Design, Department of Architecture offers the following NAAB-accredited degree programs:
M.ARCH (139 undergraduate credits + 31 graduate credits)

M. ARCH. (non-pre-professional degree + 72 undergraduate credits + 31 graduate credits)
Next accreditation visit for all programs: 2025
From the 2016 NAAB Conditions for Professional Degree programs in Architecture.

Resources

College of Architecture, Planning and Design resources include the Paul Weigel Library, a professionally staffed branch of the university's main facility. It includes over 44,000 bound volumes and approximately 200 periodical subscriptions as well as audio-visual resources. K-State's Library has subscriptions to a broad range of scholarly databases, including architecture and design-oriented scholarship. Among other facilities supporting instruction and research in the College are a computer laboratory, a photography studio, and an artificial sky. The College has an extensive shop for woodworking, metalwork, and other materials. The shop can accommodate everything, from small-scale model building activities to full-scale prototyping. The shop includes CAD/CAM equipment such as a large-bed CNC machine and laser cutters. Faculty from the College's other departments, including planning, landscape, interiors, and industrial design, often offer expert criticism for student projects and help foster a holistic approach to the designed environment. Students in the college enjoy a diverse range of lectures, seminars, exhibits, and guest critics throughout the academic year.

Master of Architecture

Architecture (MARCH) (Non-Baccalaureate track)

First semester (17 credit hours)

- COMM 106 - Public Speaking I **Credits:** 3
- ENVD 201 - Environmental Design Studio I **Credits:** 4
- ENVD 203 - Survey of the Design, Planning and Community Development Professions **Credits:** 1
- ENVD 204 - Studio Seminar **Credits:** 1
- ENVD 250 - History of the Designed Environment I **Credits:** 3
- MATH 100 - College Algebra **Credits:** 3
- *General Studies Elective **Credits:** 2

Second semester (15 credit hours)

- ENGL 100 - Expository Writing I **Credits:** 3
- ENVD 202 - Environmental Design Studio II **Credits:** 4
- ENVD 251 - History of the Designed Environment II **Credits:** 3
- PHYS 115 - Descriptive Physics **Credits:** 5

Third semester (18 credit hours)

- ARCH 248 - Fundamentals of Architectural Technology **Credits:** 3
- ARCH 274 - Digital Architecture I **Credits:** 1
- ARCH 302 - Architectural Design Studio I **Credits:** 5
- ARCH 325 - Introduction to Architectural Theory **Credits:** 3
- ENGL 213 - Writing Arguments for Architecture Students **Credits:** 3
- *General Studies Elective **Credits:** 3

Fourth semester (16 credit hours)

- ARCH 304 - Architectural Design Studio II **Credits:** 5

- ARCH 347 - Structural Systems in Architecture I **Credits:** 4
- ARCH 252 - History of Contemporary Architecture **Credits:** 3
- ARCH 373 - Digital Architecture II **Credits:** 1
- ARCH 433 - Building Construction Systems in Architecture I **Credits:** 3

Supplemental Study (6 credit hours)

- *General Studies Electives **Credits:** 6

Fifth semester (17 credit hours)

- ARCH 374 - Digital Architecture III **Credits:** 1
- ARCH 403 - Architectural Design Studio III **Credits:** 5
- ARCH 413 - Environmental Systems in Architecture I **Credits:** 4
- ARCH 448 - Structural Systems in Architecture II **Credits:** 4
- *General Studies Elective **Credits:** 3

Sixth semester (17 credit hours)

- ARCH 404 - Architectural Design Studio IV **Credits:** 5
- ARCH 434 - Building Construction Systems in Architecture II **Credits:** 3
- ARCH 514 - Environmental Systems in Architecture II **Credits:** 3
- LAR 500 - Site Planning and Design **Credits:** 3
- *General Studies Electives **Credits:** 3

Seventh semester (16 credit hours)***

- ARCH 605 - Architectural Design Studio V **Credits:** 5
- **Planning Elective **Credits:** 3
- *General Studies Elective **Credits:** 5
- **Professional Support Elective **Credits:** 3

Eighth semester (14 credit hours)

- ARCH 606 - Architectural Design Studio VI **Credits:** 5
- **Professional Support Electives **Credits:** 9

Ninth semester (17 credit hours)

- ARCH 805 - Comprehensive Design Preparation **Credits:** 3
- ARCH 817 - Architectural Design Studio VII **Credits:** 5
- ARCH 853 - Professional Practice: Professional Responsibility **Credits:** 1
- ARCH 854 - Professional Practice: Office Practices **Credits:** 1
- ARCH 855 - Professional Practice: Discipline-Specific Topics **Credits:** 1

- *General Studies Elective **Credits:** 3
- Architecture Seminar **Credits:** 3

Tenth semester (17 credit hours)

- ARCH 818 - Architectural Design Studio VIII **Credits:** 5
- **Architecture Seminar **Credits:** 6
- *General Studies Elective (Undergraduate Level) **Credits:** 3
- **Professional Support Elective **Credits:** 3

Notes

A minimum of twenty-eight (28) general studies elective credits must be in non-architectural studies courses. Courses in addition to any course in communications, history, humanities, social sciences, natural sciences, foreign languages, or mathematics will fulfill this requirement. They may be taken in pursuit of a minor. They may be taken any time prior to or during the Architecture program and may include KSU approved AP, IB, CLEP and transfer credit. A maximum of 3 credits of English Language Program courses and a maximum of 3 credits in recreation courses may be used to fulfill general studies requirements. General studies electives may include KSU approved extracurricular work as allowed by university regulations.

** The M.Arch degree requires twenty-seven (27) hours of professional support (PSE) electives, twelve (12) for undergraduate credit and fifteen (15) for graduate credit. Of the undergraduate credits, at least three (3) hours must be planning elective credits; the other nine (9) are usually fulfilled in the 8th semester as part of the 4th year study options. At least nine (9) hours of the graduate level PSE must be architecture seminars. See the M. Arch Handbook for further details. Students may not count more than three (3) total hours of department approved extracurricular PSE credits (such as Oz, NOMAS, Plot Club etc.) toward graduation. PSE credits correspond to optional studies as listed in the 2014 NAAB Conditions for Accreditation.

*** Students are encouraged to participate in off-campus study in the 4th year of the program. Alternative study options for ARCH 606 include study abroad or attending the Kansas City Design Center. An optional academic internship program is also available. Students interested in participating in one or more of these options should meet with their academic advisor.

Undergraduate Hours: 139

Graduate Hours: 31

Total Degree Requirement: 170

Interior Architecture and Industrial Design

Nathan Howe, Department Head

1087 Seaton Hall
785-532-5992
Fax: 785-532-1086
E-mail: iaid@k-state.edu
apdesign.k-state.edu/iaid/

The Interior Architecture & Industrial Design department offers two master's degrees, one that focuses on Interior Architecture, or MIARC, and another on Industrial Design, or MINDD. These degrees engage our students to (re)envision building interiors and the consumer products of the future. Our students are instructed in the essential process of inquiry, design and the making of

space and form. With innovative curriculums, our degrees prepare our students to become professional leaders in their industry to shape places we live and work and the products we use every day.

Bachelor of Science

Interior Design (BS)

The Bachelor of Science in Interior Design is accredited by the Council for Interior Design Accreditation https://www.accredit-id.org/.

Graduates of the interior design program are prepared to work in interdisciplinary teams with architects, engineers, contractors, and other building industry professionals to meet the needs of clients and users.

Admission to the interior design program is selective and competitive. High school graduates and transfer students who have completed applications submitted to the K-State Office of Admissions www.k-state.edu/admissions/apply are considered for acceptance to the program for the next fall semester. Current K-State students wanting to change major to Interior Design should contact the College of Architecture, Planning, and Design Office of Student Services at capdss@ksu.edu or 785-532-5047.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: 86 credit hours

* If any of the following courses are applied towards University Core Requirements, please consult your advisor on additional courses to meet the 120 hours.

Professional Studies: 72 credit hours

Grades of 'C' or higher required for Professional Courses.

- IDSN 210 - Design and Behavior in the Interior Environment **Credits:** 3
- IDSN 225 - Interior Design Studio 1 **Credits:** 4
- IDSN 245 - Interior Design Studio 2 **Credits:** 4
- IDSN 300 - Global Experiences in Interior Design **Credits:** 0-6
- IDSN 310 - Construction Methods and Materials for Interior Design **Credits:** 4
- IDSN 315 - Digital Visualization I **Credits:** 2

- IDSN 320 - History of Interior Design I **Credits:** 3
- IDSN 325 - Interior Design Studio 3 **Credits:** 4
- IDSN 330 - Textiles for Interior Design **Credits:** 3
- IDSN 345 - Interior Design Studio 4 **Credits:** 4
- IDSN 360 - History of Interior Design II **Credits:** 3
- IDSN 399 - Interior Design Practicum **Credits:** 0-2
- IDSN 415 - Digital Visualization II **Credits:** 2
- IDSN 425 - Interior Design Studio 5 **Credits:** 4
- IDSN 435 - Systems and Technology for Interior Design I **Credits:** 3
- IDSN 445 - Interior Design Studio 6 **Credits:** 4
- IDSN 530 - Interior Design Practices and Procedures **Credits:** 3
- IDSN 545 - Interior Design Studio 7 **Credits:** 4
- IDSN 599 - Interior Design Internship **Credits:** 3-4
- IDSN 600 - Interior Design Study Tour **Credits:** 1-3
- IDSN 630 - Topics in Advanced Interior Design Theory **Credits:** 3
- IDSN 645 - Interior Design Studio 8 **Credits:** 4
- IDSN 651 - Design for Supportive Environments **Credits:** 4

Major Support Courses

If not met through K-State Core requirements, MATH 160 and a PHYS course are required.

Choose PHYS 101 and PHYS 103 or either PHYS 113 or PHYS 115.

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3
  KSC-030
- PHYS 101 - The Physical World **Credits:** 3
  AND
  KSC-040
- PHYS 103 - The Physical World Laboratory **Credits:** 1
  OR
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 115 - Descriptive Physics **Credits:** 5

Sustainability Studies: 3 credit hours

Choose one of the following courses.

- IDFS 350 - Our Sustainable World **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- GEOG 360 - Sustainability Concepts & Issues **Credits:** 3

Professional Electives: 14 credit hours

- GERON 215 - Introduction to Gerontology **Credits:** 3
- HDFS 250 - Interpersonal and Family Relationships **Credits:** 3
- IAID 299 - History of Furniture **Credits:** 3

- IDSN 300 - Global Experiences in Interior Design **Credits:** 0-6
- IDSN 399 - Interior Design Practicum **Credits:** 0-2
- IDSN 599 - Interior Design Internship **Credits:** 3-4
- IDSN 600 - Interior Design Study Tour **Credits:** 1-3
- IDSN 630 - Topics in Advanced Interior Design Theory **Credits:** 3
- INDD 292 - Design Thinking **Credits:** 3
- LAR 211 - Unlocking Creativity **Credits:** 3
- PLAN 215 - World Cities **Credits:** 3

Total Hours Required for Graduation: 120

Minor

Industrial Design Minor

The Industrial Design Minor is intended to equip students with the basic knowledge, skills, of the Industrial Design profession, history, and creative process. The minor enables students majoring in fields other than Industrial Design to gain the fundamental Industrial Design competencies to complement their disciplines.

Required Courses (9 credit hours)

- INDD 292 - Design Thinking **Credits:** 3
- INDD 325 - Human Factors in Industrial Design **Credits:** 3
- INDD 350 - Product Semantics **Credits:** 3

Electives (6 credit hours)

Choose TWO of the following courses:

- IAID 290 - Design and Material Culture **Credits:** 3
- IAID 299 - History of Furniture **Credits:** 3
- INDD 500 - Materials and Manufacturing Processes **Credits:** 3
- INDD 605 - Problems in INDD **Credits:** 1-18

Total hours required: 15

Master of Industrial Design

Industrial Design (Non-Baccalaureate MINDD)

The Master of Industrial Design is a five-year non-baccalaureate degree. It is designed to give students a diverse exposure in the industrial design profession. Students will focus on ergonomics, human factors, manufacturing processes, product semantics and design theory. Throughout the curriculum there will be a series of workshop courses to expose students to furniture design and fabrication skills. This degree will also have built into the curriculum field trips to major metropolitans, study abroad experiences and internship opportunities. This is a hands-on degree where students are given a balance of design theory, the hard science of manufacturing and the art of craft. This degree will also provide students with three courses toward an entrepreneurship minor. With just two more courses students can opt to receive their minor in entrepreneurship with their general electives.

Housed within the College of Architecture, Planning and Design and in the department of Interior Architecture and Product Design this degree will leverage a wide variety of expertise in designing products for the built environment. Our building in Seaton and Regnier Hall boast large well-appointed design labs. We also have a 20,000 square feet state of the art Fabrication Lab allowing our students to create products as small as a flash drive to as large as the interior cabin of a helicopter.

Our faculty care deeply about teaching students how to innovate for the future needs of the consumer, while still maintaining practices that are sustainable and responsible for our environment. Our Master of Industrial Design is a 170 credit hour degree which will give students a full spectrum of exposure to industry partnerships, study abroad and internship experiences. Our students learn to not only dream up what is next to come tomorrow but learn how to execute that dream today.

Master's Degree Requirements

Environmental Design Studies Program

First Semester (17 credit hours)

- COMM 106 - Public Speaking I **Credits:** 3
- ENVD 201 - Environmental Design Studio I **Credits:** 4
- ENVD 203 - Survey of the Design, Planning and Community Development Professions **Credits:** 1
- ENVD 204 - Studio Seminar **Credits:** 1
- ENVD 250 - History of the Designed Environment I **Credits:** 3
- MATH 100 - College Algebra **Credits:** 3
- General Elective **Credits:** 2

Second Semester (15 credit hours)

- ENGL 100 - Expository Writing I **Credits:** 3
- ENVD 202 - Environmental Design Studio II **Credits:** 4
- ENVD 251 - History of the Designed Environment II **Credits:** 3
- PHYS 115 - Descriptive Physics **Credits:** 5

Industrial Design Program

Third Semester (17 credit hours)

- IAID 290 - Design and Material Culture **Credits:** 3
- IAID 299 - History of Furniture **Credits:** 3
- IAID 430 - Visual Communication I **Credits:** 3
- INDD 307 - INDD Design Studio I **Credits:** 5
- INDD 325 - Human Factors in Industrial Design **Credits:** 3

Fourth Semester (18 credit hours)

- INDD 320 - INDD Design Studio II **Credits:** 5
- INDD 350 - Product Semantics **Credits:** 3
- INDD 500 - Materials and Manufacturing Processes **Credits:** 3
- IAID 407 - Design Workshop I **Credits:** 4
- IAID 431 - Visual Communication II **Credits:** 3

Fifth Semester (17 credit hours)

- INDD 310 - INDD Digital Applications **Credits:** 2
- INDD 435 - INDD Design Studio III **Credits:** 5
- INDD 520 - Materials and Manufacturing Processes II **Credits:** 3
- IAID 432 - Visual Communication III **Credits:** 3
- IAID 602 - Furniture Design II **Credits:** 4

Sixth Semester (17 credit hours)

- INDD 433 - User Interface and User Experience Design **Credits:** 3
- INDD 440 - INDD Design Studio IV **Credits:** 5
- INDD 600 - Professional Practice **Credits:** 3
- ENGL 200 - Expository Writing II **Credits:** 3
- LAR 211 - Unlocking Creativity **Credits:** 3

Summer Option (7 credit hours)

- IARC 664 - Summer Internship **Credits:** 6
  AND
- IARC 665 - Summer Internship Report **Credits:** 1
  OR
- Study Abroad **Credits:** 7
  OR
- **Focus Courses **Credits:** 7

Seventh Semester (14 credit hours)

- INDD 606 - INDD Design Studio V **Credits:** 5

- IARC 645 - Internship Report **Credits:** 5

Eighth Semester (15 credit hours)

- ENTRP 340 - Business Innovation and the Entrepreneurial Mindset **Credits:** 3
- INDD 801 - INDD Design Studio VI **Credits:** 5
- INDD 811 - Design Research **Credits:** 3
- IAID 814 - Furniture Design III **Credits:** 4

Ninth Semester (18 credit hours)

- INDD 810 - INDD Capstone Studio **Credits:** 5-6
- INDD 815 - Advanced Studio Programming **Credits:** 2-3
- ENTRP - Any ENTRP course level 300 or above **Credits:** 3
- *General Elective **Credits:** 6

Tenth Semester (15 credit hours)

- INDD 822 - Advanced Industrial Design Studio **Credits:** 6
  or
- IAID 824 - Advanced Furniture Design Studio **Credits:** 6
- IAID 891 - Contemporary Design Seminar **Credits:** 3

- *General Elective **Credits:** 6

Notes

*A minimum of fourteen (14) general elective credits must be taken. General electives may be taken in pursuit of a minor. They may be taken any time prior to or during the Interior Architecture and Product Design program and may include K-State approved AP, IB, CLEP, K-State Core if selected, and transfer credit. Students may not count more than three (3) total hours of recreation credits toward graduation.

**Focus Course includes INDD 605, as well as other department head approved courses, including those associated with a minor program. Petition process required.

***Electives taken in the seventh semester should support student interest including professional electives and study abroad courses. These may also be associated with a minor program.

  or
- IAID 824 - Advanced Furniture Design Studio **Credits:** 6
- IAID 891 - Contemporary Design Seminar **Credits:** 3
- *General Elective **Credits:** 6

Notes

*A minimum of eleven (11) general elective credits must be taken. General electives may be taken in pursuit of a minor. They may be taken any time prior to or during the Interior Architecture program and may include K-State approved AP, IB, CLEP and transfer credit. Students may not count more than three (3) total hours of recreation credits toward graduation.

**Focus Courses include such courses as IARC 605 Problems in IARC courses, as well as other department head approved courses, including those associated with a minor program.

***Electives taken in the eighth semester should support student interest including professional electives and study abroad courses. These may also be associated with a minor program.

Undergraduate Hours: 140

Graduate Hours: 30

Total Degree Requirement: 170

Landscape Architecture and Regional & Community Planning

Huston Gibson, Head

1086 Seaton Hall
785-532-5961
Fax: 785-532-6722
E-mail: larcpadvising@k-state.edu
apdesign.k-state.edu/larcp

The Department of Landscape Architecture and Regional & Community Planning (LARCP) offers two accredited professional degree options: a Master of Landscape Architecture and a Master of Regional & Community Planning; an online Master of Science in Community Development and Graduate Certificate in Community Development; a Bachelor of Science in Real Estate and Community Development; and a Community Planning Minor. The programs provide nationally recognized and affordable education, real world engagement, and a strong LARCP community. Graduates of the programs are in demand throughout the country in private practice, governmental service, and academic setting.

The Master of Landscape Architecture (MLA) and Master of Regional & Community Planning (MRCP) degrees have two entry points. Undergraduate students complete a five-year plus Non-Baccalaureate Track. Students who have completed a bachelor's degree, regardless of the field of study, complete a Post-Baccalaureate Track of study (3-years plus for the MLA and 2-years for the MRCP), see the Department of Landscape Architecture and Regional & Community Planning page in the Graduate Catalog.

The MLA program prepares students to create and protect outdoor places of significance to the human experience; address ecological and social needs; plan for inclusive and equitable communities: to design landscape. Information about the resources and opportunities supporting students' preparation for professional practice is available at https://apdesign.k-state.edu/larcp/la/.

The MRCP program prepares students to be advocates for resilient cities that enhance quality of life in ways that are sustainable, equitable, and accessible to all citizens. We help communities address challenges related to resource conservation, growing of diverse populations, and continually changing technologies and value systems. Information about the resources and opportunities supporting students' preparation for professional practice is available at https://apdesign.k-state.edu/larcp/rcp/.

The Master of Science in Community Development prepares students to promote participatory democracy, sustainable development, rights, equality, economic opportunity, and social justice, through the organization, education and empowerment of people within their communities. Information about the fully online degree is available at https://online.k-state.edu/programs/community-development-masters/.

The new Bachelor of Science in Real Estate and Community (BS RECD) program uniquely bridges community development and business, preparing students to: bring together expertise in community development/social values and business/real estate, focusing on people and place; prepare for future workforce areas in downtown development programs, business improvement districts, environmental groups, in the public, private, and non-governmental organizational sectors; and, make connections between programs in APDesign and the College of Business.

Bachelor of Real Estate and Community Development

Real Estate and Community Development (BS)

The Bachelor of Real Estate and Community Development (RECD) program uniquely bridges community development and business. The degree prepares students to: bring together expertise in community development/social values and business/real estate (focusing on people and place) and prepare for future workforce areas such as downtown development programs, Business Improvement Districts, environmental groups, in the public, private, and non-governmental organizational sectors.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Total Hours Required for Graduation: 120

Minor

Community Planning Minor

The minor in community planning is for students who wish to expand their knowledge of community planning and development processes. The minor is open to all majors and is especially suited for students in architecture, business, engineering, landscape architecture, political science, sociology and others interested in the quality of life in communities. To earn the minor in community planning, students are required to complete 15 credit hours of planning courses with grades of C or better.

Program requirements

Core requirements

Successful completion of the following planning courses:

- PLAN 115 - Introduction to Regional and Community Planning **Credits:** 3
- PLAN 215 - World Cities **Credits:** 3

Additional requirements

Successful completion of 9 credit hours of planning (PLAN) electives.

Criteria for admission

Students may declare this minor by contacting the LARCP Advising Liaison. To receive certification of the minor, declaration must be completed before enrolling in the 9 credit hours of planning electives.

For more information

Department of Landscape Architecture and Regional & Community Planning, College of Architecture, Planning and Design 785-532-5961.

Master of Landscape Architecture

Landscape Architecture (MLA) (Non-Baccalaureate)

Landscape architects design places that connect people to the natural world, creating landscapes for people's everyday lives and their most memorable moments. The Master of Landscape Architecture degree prepares students to address the present and future environmental and urbanization challenges of our world.

Landscape architecture encompasses analysis, planning, design, management and stewardship of urban, suburban and rural environments. The profession includes the design of green spaces such as plazas, gardens and parks. On a broader scale, landscape architects analyze sites to determine their most appropriate future uses and management practices, including the arrangement of buildings, transportation, and pedestrian and green infrastructure systems.

The degree is offered through two tracks:

- The non-baccalaureate track for students without a previous degree allows students to enter as freshmen and progress through the professional graduate degree in landscape architecture
- The post-baccalaureate track for students with a previous degree allows completion of a first professional degree in landscape architecture.

Both lead to an MLA degree fully accredited by the Landscape Architectural Accreditation Board of the American Society of Landscape Architects.

Notes

All required courses taught in the landscape architecture and regional & community planning programs that are counted toward the degree must be passed with a grade of C or better. Graduate School admission is contingent upon completion of all required courses in the 3rd - 6th semesters.

*A minimum of five (5) general elective credits must be taken. General elective may be taken in pursuit of a minor. They may be taken any time prior to or during the Landscape Architecture program and may include KSU approved AP, IB, CLEP and transfer credit. Students may not count more than 3 total hours of recreation credits toward graduation.

**Off-campus semester: Two distinct study opportunities are offered, requiring 11-14 credit hours. The study abroad and the internship options have course requirements that substitute for the 9 professional elective credit requirements. If the internship option is not selected during the seventh or eighth semester, a summer internship is required before graduation.

*** Six (6) credit hours of the required graduate level professional electives must be LARCP courses. Students may petition for an exception to this policy if there is a demonstrated academic benefit.

Undergraduate Hours: 118

Graduate Hours: 35-37

Total Degree Hours: 153-155

Master of Regional and Community Planning

Regional & Community Planning (Non-Baccalaureate MRCP)

Program Definition

The Master of Regional & Community Planning integrates the concept of comprehensive community development planning in an environmental context with considerations for social, economic, cultural and political issues in the community while recognizing the importance of financial management, private enterprise-government relations, and citizen participation in community decision making. Core courses reflect the impact of these key concerns on traditional planning activities, while exploring related ethical issues in depth.

With a firm educational foundation in basic planning and analytical techniques, management, human relations, and ethics, today's MRCP graduate will have the skills and judgment to become tomorrow's successful practicing planner.

Graduates of our program become directors or managers of community development / city planning departments, economic development agencies, housing or related departments and agencies in cities, small communities, counties and regions. Some graduates may use the same educational background to become directors of planning or related activities in private consulting firms and research organizations, while others may enter the field of real estate development and a host of related disciplines.

Program Mission and Objections

We prepare graduates to be effective advocates of resilient cities and responsible for community growth and redevelopment. We engage in the exchange of ideas that develop strategic visioning to enhance quality of life in ways that are sustainable, equitable, and accessible to all our citizens. We contribute to the expansion of knowledge through research and its dissemination, outreach to various constituents, and professional education grounded in creative and critical thinking. Students and faculty engage in

exploration, analysis, synthesis, and resolution of planning, design and management issues. Our aim is to help communities effectively address challenges related to resource conservation, growing of diverse populations, and continually changing technologies and value systems.

First semester (15 credit hours)

www.k-state.edu/artsci

The College of Arts and Sciences is the home of a wide range of disciplines in the arts and humanities, social sciences, and natural and quantitative sciences—representing the foundational areas of a university education. An Arts & Sciences education provides a broad base of educational experience and general readiness for a variety of life and job options; discipline-specific knowledge and career skills; and opportunities for interdisciplinary study, involvement in cutting-edge research, and preparation for graduate or professional school. Most undergraduate degree programs offer a Bachelor of Science (B.S.) or a Bachelor of Arts (B.A.). The college also offers specialized degrees such as the Bachelor of Fine Arts (B.F.A.), the Bachelor of Music (B.M), and the Bachelor of Music Education (B.M.E). All B.A. and B.S. programs in Arts and Sciences contain a set of requirements meant to ensure student success, breadth of training, and a general foundation for civic and global responsibility.

Orientation Requirement (1 credit):

An orientation is required for all Arts & Science majors. The orientation supports student success by introducing them to resources and tools for effective learning within and beyond their primary major. The orientation will introduce students to other students across the college to foster and model interdisciplinary exchange and collaboration.

Outside Concentration requirement for B.A. and B.S. (9 credit hours)

Arts & Science students are expected to study another area of their choice outside of their major. Many A&S students earn second majors, minor, or certificates that broaden their knowledge base and provide them additional context and skills that might enhance their careers or lives more generally. At a minimum, students must pursue at least 9 credit hours of an outside concentration, though some credits may overlap with their own major.

Overlays (9 credit hours total)

The college requires all students in all Arts and Sciences degree programs to take a total of three courses in the areas below. These courses may "overlay" other requirements for the degree, and be satisfied by courses taken for the K-State Core, courses in the major or other B.A. or B.S. program requirements, the outside concentration, or general electives.

Ethical Reasoning (3 credit hours)
This overlay provides students with the tools for reasoning about moral behavior and just social arrangements, including forms of government and legal and social conventions. It provides a wide basis for negotiating moral complexity and for critically reflecting upon fundamental issues that shape social institutions and individual actions.

US Multicultural Overlay (3 credit hours)
This overlay ensures that students learn about historical and contemporary cultural contexts and societal realities of race and ethnicities that are considered as non-white in the United States.

Global Perspectives Overlay (3 credit hours)
This overlay equips students better to become citizens of the world and learn how to understand and approach global issues.

Other Requirements

All B.S. and B.A. programs must ensure that their majors take a distribution of courses in several areas, typically as at least a second or upper-level class in the subject areas. For example, all B.A. students must fulfill a language requirement, additional arts and humanities and social science courses, and an additional natural and quantitative course. B.S. programs must ensure that their students earn sufficient natural and quantitative credits, as well as a minimum of additional arts & humanities and social sciences. Depending on the major and the requirement category, particular courses in these areas may be required as part of the core major requirements, or students may be given a choice to pick from a wide range of "restricted electives" in these areas.

Arts & Sciences offers the following interdisciplinary credentials that are not housed in or listed under any particular unit:

Bachelor of Arts

Life Science (BA)

Life Science is an interdisciplinary major that deals with studies of living organisms and life processes. It is a flexible major combining biology, psychology, chemistry, and biological anthropology. It provides students a well-rounded approach to the science of people and associated career paths with its interdisciplinary approach. Life Sciences promotes critical thinking and problem solving skills that can be applied to real-world issues. The flexibility and content within this major provide training and readiness for those interested in health, research, non-profit, and other people and science centered careers.

This major combines a series of fundamental courses key in the life sciences along with open major electives so that students have the flexibility to build an academically diverse educational experience across the life science disciplines in a way that highlights their interests and career goals.

Towards the end of the major, students will participate in an applied experience. The applied experience for the Life Science major allows students to engage in an experience (i.e. internship, practicum, research, project, etc) and have opportunities to connect it to their life science studies and career goals through guided reflection.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Arts & Sciences common degree requirements for the BA are satisfied by the following:

- BIOL 300-799 (at least one course at 300 level or above)
- Quantitative Requirement (either MATH or STAT)
- Psychological Requirement
- BA Arts, Humanities, and Social Sciences Restricted Electives
- BA Second Language Requirement

Orientation: 1 credit hour

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 9 credit hours

Outside credential of at least 9 credit hours (May be from any unit, **except Biology, Biochemistry, Psychology, and Chemistry,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for BIOL, ANTH [only biological anth courses], BIOCH, PSYCH, CHM**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Major Requirements

Life Science Foundation: 37-45 credit hours

Foundational knowledge in the primary Life Science disciplines: Biology, Chemistry, Psychology, and Biological Anthropology.

- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4
- BIOL 198 - Principles of Biology **Credits:** 4
- PSYCH 110 - General Psychology **Credits:** 3

Biology Requirement: 12 credit hours

12 credits of any Biology course level 300-799, including BIOL 198

- BIOL 198 - Principles of Biology **Credits:** 4

Anthropology Requirement: 4 credit hours

- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4

Psychology Requirement: 6 credit hours

6 credits of any Psychology course level 300-799, including PSYCH 110

- PSYCH 110 - General Psychology **Credits:** 3

Quantitative Requirement: 3 credit hours

Choose one MATH or STAT course from below.

If not met through K-State Core requirements, MATH 100 is required.

- MATH 100 - College Algebra **Credits:** 3
  KSC-030
- MATH 150 - Plane Trigonometry **Credits:** 3
- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- STAT 225 - Introduction to Statistics **Credits:** 3
- **Courses below do not count for KSC-030** STAT 240 - Biometrics I **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Organic (Bio)chemistry Requirement: 9-16 credit hours

Choose one option from below

Option 1: 9 credit hours

- CHM 110 - General Chemistry **Credits:** 3
- CHM 111 - General Chemistry Laboratory **Credits:** 1
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5

Option 2: 13 credit hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 350 - General Organic Chemistry **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2

Option 3: 16 credit hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- CHM 550 - Organic Chemistry II **Credits:** 3

Option 4: 13 credit hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5

Integrated Elective and Applied Experience: 4 credit hours

Integrated Medicine, Health, or Life Elective: 3 credit hours

Choose one of the following:

- AMETH 351 - African American Perspectives **Credits:** 3
- ANTH 315 - Introduction to Medical Anthropology & Global Health **Credits:** 3
- ECON 688 - Health Economics **Credits:** 3
- ENGL 392 - Literature and the Body **Credits:** 3
- GWSS 435 - Race/Sex/Science **Credits:** 3
- HIST 534 - Social History of Medicine **Credits:** 3
- PHILO 365 - Medical Ethics **Credits:** 3
- PSYCH 470 - Principles of Neuroscience **Credits:** 3
- SPAN 531 - Professional Spanish: Health and Human Services **Credits:** 3

Applied Learning: 1 credit hour

Choose one of the following:

- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3

- BIOL 698 - Research in Biology **Credits:** 0-8
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 240 - Practicum in Pre-Health **Credits:** 1
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 497 - Integrated Health Studies Capstone **Credits:** 0-2
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- PSYCH 599 - Research in Psychology **Credits:** 0-18

Major Electives: 12 credit hours

The 12 elective credit hours must be at or above the 300 level and they must be selected from two or more fields, which may include the following areas in Arts & Sciences:

- Biochemistry - BIOCH 300 TO BIOCH 799
- Biology - BIOL 300 TO BIOL 799
- Organic Chemistry - CHM 531,CHM 532,CHM 550,CHM 551
- Biological Anthropology - ANTH 380 TO ANTH 389, ANTH 580 TO 589, ANTH 680 TO 689, ANTH 780 TO 789
- Psychology - PSYCH 300 TO PSYCH 799

While all 12 hours may be taken from the A&S disciplines listed above, up to two elective courses, totaling no more than six credit hours may be chosen from selected courses in other college from the approved list below:

- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- ASI 500 - Genetics **Credits:** 3
- ASI 533 - Physiology of Domestic Animals **Credits:** 3
- DAS 501 - Health Science Clinical Training **Credits:** 3-12
- DMP 710 - Introduction to One Health **Credits:** 2
- FNDH 400 - Human Nutrition **Credits:** 3
- FNDH 510 - Life Span Nutrition **Credits:** 2
- FNDH 553 - Pharmacology in Athletic Training **Credits:** 2
- GERON 425 - Introduction to Physical Health & Well-Being of Older Adults **Credits:** 3
- KIN 330 - Biomechanics **Credits:** 3
- KIN 335 - Physiology of Exercise **Credits:** 4
- KIN 336 - Physiology of Exercise Lab **Credits:** 1
- KIN 345 - Exercise Behavioral Science **Credits:** 5
- KIN 387 - Introduction to Integrative Human Pathophysiology **Credits:** 3
- KIN 591 - Psychology of Exercise and Sport Injury **Credits:** 3

  For students in the WSU Nursing Pathways program, up to 6 credit hours of approved WSU nursing courses may be counted towards life science electives. To be counted within the degree, a placeholder of DAS 001 may be enrolled in.
  *Approved courses from WSU - HS 301, HS 400, NURS 320, NURS 341, NURS 349, NURS 375, NURS 479

BA Arts, Humanities, and Social Sciences Requirement: 12 credit hours

3 credit hours in each of the following, with at least 3 credit hours at 300 level or above OR at any level with a prerequisite in the same discipline.

(The other 6 hours are fulfilled in program)

One course in Humanities Credits: 3 credit hours

Any course or combination of courses in Fine Arts Credits: 3 credit hours

BA Second Language Requirement: 6 credit hours

Choose one of the following:

Option 1: 3-14 credit hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 credit hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 credit hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 0-52 credit hours

Once college and major requirements are fulfilled, the remaining hours to hit a baseline of 120 may be of your choosing.

Pre-vet option

Students who complete the College of Arts and Sciences basic requirements, the preveterinary prerequisites, all the life science major requirements except the electives, and a minimum of 84 credit hours prior to enrolling in the College of Veterinary Medicine at K-State may earn a life science degree after successful completion of the first year of veterinary medical school.

WSU Nursing Pathways option

Students who complete the K-State CORE, College of Arts and Sciences restricted electives, the pre-nursing prerequisites, all the life science major requirements prior to enrolling in the WSU Nursing Pathway program specific to KSU students may earn a life science degree after successful completion of nursing school.

Additional Professional Option

Students who already hold a baccalaureate- or graduate-level health professional degree (e.g., nursing, dental hygiene, chiropractic, etc) may be allowed to transfer up to nine hours of upper-level health-related courses from the health professional school to the life science degree for elective credit. Such transfers must be approved by the Life Science Steering Committee.

Notes

*A minimum of 15 credit hours in the major must be taken at K-State. Only transfer courses accepted by departments to meet requirements in their majors will be accepted to meet requirements in the life science major.

To obtain a life science degree a student must earn a C or better in all courses (including transfer work) used to fulfill the Life Science Foundational Degree Requirements, Integrated Elective, and Major Elective Block.

The life science degree is not available to students who will earn a degree in biochemistry, biology, or microbiology.

Total Hours Required for Graduation: 120

Physical Science (BA)

The Physical Science Interdisciplinary major focuses primarily on the study of nonliving matter. It concerns itself with the theoretical and observable natural phenomena of our world and universe.

Cutting across a variety of Physical Science disciplines, it intentionally trades depth of learning for broader scope of inquiry. By offering more latitude in its curriculum design, it often allows students to prepare for less traditional or unique scientific ventures. It also occasionally serves as an undergraduate pathway to certain professional programs.

To best meet individual needs and interests, career goals and the requirements of the major, close cooperation with your advisor is highly recommended.

Students majoring in Physical Science must earn grades of C or better in all courses required for the major in the areas Physical Science Foundation, Physical Science Electives, and Senior Capstone, including transfer work applied to these areas.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: (10 credit hours)

Orientation: (1 credit hour)

Outside Concentration: (9 credit hours)

Outside credential of at least 9 credit hours (May be from any unit, **except CHM, PHYS, GEOG, GEOL),** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for CHM, PHYS, GEOG, GEOL**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Program

The curriculum for this major assumes students enter college prepared to take Calculus.

Physical Science Foundation: (31-35 credit hours)

Complete the following foundational requirements. Note that several requirements have options

Math Requirements: (8 credit hours)

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4

Chemistry Requirement: (8-10 credit hours)

Take either version of both Chemistry I and Chemistry II

- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5

Physics Requirement: (8-10 credit hours)

Take either version of both Physics I and Physics II

- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR

- PHYS 214 - Engineering Physics II **Credits:** 5

Physical Geography or Geology: (4 credit hours)

Physical Geography or Geology Requirement. Choose one combination of lecture and lab.

Either both of the following Physical Geography courses

- GEOG 121 - Introductory Physical Geography: Earth Systems Science **Credits:** 3
- GEOG 122 - Introduction to Physical Geography: Earth Systems Science Laboratory **Credits:** 1

OR both of the following Geology courses

- GEOL 100 - Earth in Action **Credits:** 3
- GEOL 103 - Geology Laboratory **Credits:** 1

Statistics Requirement: (3 credit hours)

- STAT 225 - Introduction to Statistics **Credits:** 3

OR

- STAT 240 - Biometrics I **Credits:** 3

OR

- STAT 410 - Probabilistic Systems Modeling **Credits:** 3

OR

- STAT 510 - Introductory Probability and Statistics I **Credits:** 3

Physical Science Electives: (12 credit hours)

Select 12 credit hours from the following disciplines at 300+ level. 9 of the credits must come from CHM, GEOG, GEOL, PHYS.

- CHM 300-799
- GEOG 300-799
- GEOL 300-799
- PHYS 300-799
- MATH 300-799
- STAT 300-799
- CIS 300-799

Senior Capstone: (1 credit hour)

Students will complete a senior report/capstone experience in DAS 499.

- DAS 499 - Physical Sciences Senior Report **Credits:** 1

BA Arts, Humanities, and Social Sciences Restricted Electives: (12 credit hours)

3 credit hours in each of the following, with at least 6 credit hours at 300 level or above OR at any level with a prerequisite in the same discipline.

One course in Humanities: (3 credit hours)

Any course or combination of courses in Fine Arts: (3 credit hours)

One Non-Quantitative Social Science; Any Social course that does NOT have a MATH or STAT prereq: (3 credit hours)

BA Second Language Restricted Electives: (3-16 credit hours)

Choose one of the following:

Option 1: (3-14 credit hours)

At least 3 credit hours of coursework culminating with level 4 or above (i.e., French 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: (16 credit hours)

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: (3 credit hours)

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: (0-17 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Bachelor of Science

Life Science (BS)

Life Science is an interdisciplinary major that deals with studies of living organisms and life processes. It is a flexible major combining biology, psychology, chemistry, and biological anthropology. It provides students a well-rounded approach to the science of people and associated career paths with its interdisciplinary approach. Life Sciences promotes critical thinking and problem solving skills that can be applied to real-world issues. The flexibility and content within this major provide training and readiness for those interested in health, research, non-profit, and other people and science centered careers.

This major combines a series of fundamental courses key in the life sciences along with open major electives so that students have the flexibility to build an academically diverse educational experience across the life science disciplines in a way that highlights their interests and career goals.

Towards the end of the major, students will participate in an applied experience. The applied experience for the Life Science major allows students to engage in an experience (i.e. internship, practicum, research, project, etc) and have opportunities to connect it to their life science studies and career goals through guided reflection.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 9 credit hours

Outside credential of at least 9 credit hours (May be from any unit, **except Biology, Biochemistry, Psychology, and Chemistry**, OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for BIOL, ANTH [only biological anth courses], BIOCH, PSYCH, CHM**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Program

Life Science Foundation: 37-45 credit hours

Foundational knowledge in the primary Life Science disciplines: Biology, Chemistry, Psychology, and Biological Anthropology.

Biology Requirement: 12 credit hours

12 credits of any Biology course level 300-799, including BIOL 198

- BIOL 198 - Principles of Biology **Credits:** 4

Anthropology Requirement: 4 credit hours

- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4

Psychology Requirement: 6 credit hours

6 credits of any Psychology course level 300-799, including PSYCH 110

- PSYCH 110 - General Psychology **Credits:** 3

Quantitative Requirement: 6 credit hours

Math

Choose one:

If not met through K-State Core requirements, MATH 100 is required.

- MATH 100 - College Algebra **Credits:** 3
  KSC-030
- MATH 150 - Plane Trigonometry **Credits:** 3
- MATH 205 - General Calculus **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Statistics

Choose one

- STAT 225 - Introduction to Statistics **Credits:** 3
- *Courses below will not count for KSC-030* STAT 240 - Biometrics I **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Organic (Bio)chemistry Requirement: 9-16 credit hours

Choose one option from below

Option 1: 9 credit hours

- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- CHM 110 - General Chemistry **Credits:** 3

- CHM 111 - General Chemistry Laboratory **Credits:** 1

Option 2: 13 credit hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 350 - General Organic Chemistry **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2

Option 3: 16 credit hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- CHM 550 - Organic Chemistry II **Credits:** 3

Option 4: 13 credit hours

- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4

Integrated Elective and Applied Experience: 4 credit hours

Integrated Medicine, Health, or Life Elective: 3 credit hours

Choose one

- AMETH 351 - African American Perspectives **Credits:** 3
- ANTH 315 - Introduction to Medical Anthropology & Global Health **Credits:** 3
- ECON 688 - Health Economics **Credits:** 3
- ENGL 392 - Literature and the Body **Credits:** 3
- GWSS 435 - Race/Sex/Science **Credits:** 3
- HIST 534 - Social History of Medicine **Credits:** 3
- PHILO 365 - Medical Ethics **Credits:** 3
- PSYCH 470 - Principles of Neuroscience **Credits:** 3
- SPAN 531 - Professional Spanish: Health and Human Services **Credits:** 3

Applied Learning: 1 credit hour

Choose one

- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3

- DAS 240 - Practicum in Pre-Health **Credits:** 1
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 497 - Integrated Health Studies Capstone **Credits:** 0-2
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- PSYCH 599 - Research in Psychology **Credits:** 0-18

Major Electives: 12 credit hours

The 12 elective credit hours must be at or above the 300 level and they must be selected from two or more fields, which may include the following areas in Arts & Sciences:

- Biochemistry - BIOCH 300 TO BIOCH 799
- Biology - BIOL 300 TO BIOL 799
- Organic Chemistry - CHM 531, CHM 532, CHM 550, CHM 551
- Biological Anthropology - ANTH 380 TO ANTH 389, ANTH 580 TO 589, ANTH 680 TO 689, ANTH 780 TO ANTH 789
- Psychology - PSYCH 300 TO PSYCH 799

While all 12 hours may be taken from the A&S disciplines listed above, up to two elective courses, totaling no more than six credit hours may be chosen from selected courses in any other college from the approved list below:

- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- ASI 500 - Genetics **Credits:** 3
- ASI 533 - Physiology of Domestic Animals **Credits:** 3
- DAS 501 - Health Science Clinical Training **Credits:** 3-12
- DMP 710 - Introduction to One Health **Credits:** 2
- FNDH 400 - Human Nutrition **Credits:** 3
- FNDH 510 - Life Span Nutrition **Credits:** 2
- FNDH 553 - Pharmacology in Athletic Training **Credits:** 2
- GERON 425 - Introduction to Physical Health & Well-Being of Older Adults **Credits:** 3
- KIN 330 - Biomechanics **Credits:** 3
- KIN 335 - Physiology of Exercise **Credits:** 4
- KIN 336 - Physiology of Exercise Lab **Credits:** 1
- KIN 345 - Exercise Behavioral Science **Credits:** 5
- KIN 387 - Introduction to Integrative Human Pathophysiology **Credits:** 3
- KIN 591 - Psychology of Exercise and Sport Injury **Credits:** 3

  For students in the WSU Nursing Pathways program, up to 6 credit hours of approved WSU nursing courses may be counted towards life science electives. To be counted within the degree, a placeholder of DAS 001 may be enrolled in.
  *Approved courses from WSU - HS 301, HS 400, NURS 320, NURS 341, NURS 349, NURS 375, NURS 479

BS Arts, Humanities, and Social Sciences Restricted Electives: 3 credit hours

3 credit hours in each of the following, at any level

Fine Arts or Humanities: Any course or combination of courses: 3 credit hours

Free Electives: 0-20 credit hours

Once college and major requirements are fulfilled, the remaining hours to hit a baseline of 120 may be of your choosing.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

- BIOL 300-799 (at least two courses, both at 300 level or above)
- Quantitative Requirement (one course each in MATH and STAT)
- BS Arts, Humanities, and Social Sciences Restricted Electives
- Psychological Requirement

Pre-vet option

Students who complete the College of Arts and Sciences basic requirements, the preveterinary prerequisites, all the life science major requirements except the electives, and a minimum of 84 credit hours prior to enrolling in the College of Veterinary Medicine at K-State may earn a life science degree after successful completion of the first year of veterinary medical school.

WSU Nursing Pathways option

Students who complete the K-State CORE, College of Arts and Sciences restricted electives, the pre-nursing prerequisites, all the life science major requirements prior to enrolling in the WSU Nursing Pathway program specific to KSU students may earn a life science degree after successful completion of nursing school.

Additional Professional Option

Students who already hold a baccalaureate- or graduate-level health professional degree (e.g., nursing, dental hygiene, chiropractic, etc) may be allowed to transfer up to nine hours of upper-level health-related courses from the health professional school to the life science degree for elective credit. Such transfers must be approved by the Life Science Steering Committee.

Notes

*A minimum of 15 credit hours in the major must be taken at K-State. Only transfer courses accepted by departments to meet requirements in their majors will be accepted to meet requirements in the life science major.

To obtain a life science degree a student must earn a C or better in all courses (including transfer work) used to fulfill the Life Science Foundational Degree Requirements, Integrated Elective, and Major Elective Block.

The life science degree is not available to students who will earn a degree in biochemistry, biology, or microbiology.

Physical Science (BS)

The Physical Science Interdisciplinary major focuses primarily on the study of nonliving matter. It concerns itself with the theoretical and observable natural phenomena of our world and universe.

Cutting across a variety of Physical Science disciplines, it intentionally trades depth of learning for broader scope of inquiry. By offering more latitude in its curriculum design, it often allows students to prepare for less traditional or unique scientific ventures. It also occasionally serves as an undergraduate pathway to certain professional programs.

To best meet individual needs and interests, career goals and the requirements of the major, close cooperation with your advisor is highly recommended.

Students majoring in Physical Science must earn grades of C or better in all courses required for the major in the areas Physical Science Foundation, Physical Science Electives, and Senior Capstone, including transfer work applied to these areas.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: (10 credit hours)

Orientation: (1 credit hour)

Outside Concentration: (9 credit hours)

Outside credential of at least 9 credit hours (May be from any unit, **except CHM, PHYS, GEOG, GEOL, etc**, OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for CHM, PHYS, GEOG, GEOL**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Program

The curriculum for this major assumes students enter college prepared to take Calculus.

Physical Science Foundations: (31-35 credit hours)

Complete the following foundational requirements. Note that several requirements have options

Math Requirements: (8 credit hours)

MATH 220 and 221

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4

Chemistry Requirement: (8-10 credit hours)

Take either version of both Chemistry I and Chemistry II

- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5

Physics Requirement: (8-10 credit hours)

Take either version of both Physics I and Physics II

- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5

Physical Geography or Geology: (4 credit hours)

Physical Geography or Geology Requirement. Choose one combination of lecture and lab: GEOG 121 and 122 OR GEOL 100 and 103

Either both of the following Physical Geography courses

- GEOG 121 - Introductory Physical Geography: Earth Systems Science **Credits:** 3
- GEOG 122 - Introduction to Physical Geography: Earth Systems Science Laboratory **Credits:** 1

OR both of the following Geology courses

- GEOL 100 - Earth in Action **Credits:** 3
- GEOL 103 - Geology Laboratory **Credits:** 1

Statistics Requirement: (3 credit hours)

Statistics Requirement--Choose one from the following list: STAT 225, 340, 410, OR 510

- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 410 - Probabilistic Systems Modeling **Credits:** 3
- STAT 510 - Introductory Probability and Statistics I **Credits:** 3

Physical Science Electives: (18 credit hours)

Select 18 credit hours from the following disciplines at 300+ level. 9 of the credits must come from CHM, GEOG, GEOL, PHYS.

CHM 300-799, GEOG 300-799, GEOL 300-799, PHYS 300-799, MATH 300-799, STAT 300-799, CIS 300-799

Senior Capstone: (1 credit hour)

Students will complete a senior report/capstone experience in DAS 499.

- DAS 499 - Physical Sciences Senior Report **Credits:** 1

BS Arts, Humanities, and Social Sciences Restricted Electives: (6 credit hours)

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: (3 credit hours)

Non-Quantitative Social Science: Any social course that does NOT have a MATH or STAT prereq: (3 credit hours)

Any social science course that does NOT have a MATH or STAT prereq

Free Electives: (0-20 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Minor

Pre-Health Designations

Students interested in health professions are advised in the College of Arts and Sciences Dean's Office.

As careers in health professions continue to be plentiful, applicants to the health professional schools become more numerous and requirements for admission become more competitive. One of the universal requirements is a high grade point average (GPA). Therefore, after completing 24 or more semester hours at K-State, students with a K-State GPA below 3.0 will have their pre-health designation removed from their academic plan. It is necessary to have academic standards because most health professions

programs require a minimum GPA in order to apply. Only under rare circumstances is the GPA below 3.0. In order to be competitive, students should work to earn a GPA at or above 3.5.

Creating a competitive applicant profile takes time and includes more than academics. Therefore, students who are considering a health profession should consult with the appropriate health professions advisor in the College of Arts and Sciences Health Professions Advising Office early in their undergraduate career.

Advising is available for the following health careers:

Programs:

- Pre-chiropractic
- Pre-dentistry
- Pre-health information management
- Pre-medicine
- Pre-nursing
- Pre-occupational therapy
- Pre-optometry
- Pre-pharmacy
- Pre-physical therapy
- Pre-physician assistant
- Pre-respiratory care
- Pre-veterinary medicine
- Medical Laboratory Science BA or BS

Completing pre-health prerequisites prepares students to make application to health professional schools. It does not result in the completion of a degree, with the exception of Medical Laboratory Science.

Students interested in Athletic Training, Dietetics, Communications Sciences and Disorders, or Kinesiology may prepare for these careers through the College of Health and Human Sciences.

Students are encouraged to contact the Career Center to obtain additional information about health careers and to explore the majors offered at K-State.

Secondary Major

International Studies Secondary Major

Kathleen Antonioli, Director
108 Eisenhower Hall

785-532-6760
E-mail: ias@k-state.edu
www.k-state.edu/ias

The international studies program promotes understanding of the international community. The program encourages a substantial distribution of foreign and international course work under the direct, personal guidance of an interdisciplinary faculty committee. Students must enroll in another major before taking international studies as a secondary major.

General requirements

The BS program is obtained by following the curriculum of the College of Arts and Sciences.

Students who complete the secondary major in international studies are expected to include the following within their areas of knowledge or competency: speaking capability in a foreign language; basic geographic knowledge of the world; ability to understand and analyze cultures other than their own; some understanding of developmental processes; some understanding of international relations and processes of interaction; and some integration of their program of study into a meaningful and coherent whole. Please check the website for any program changes or announcements.

I. Language requirement

Students must complete the equivalent of four semesters of a modern foreign language.

Students must also complete 24 credit hours of course work, distributed as follows:

II. Core

During the senior year, the student will write a research paper or complete a project on an international topic. The research may be an honors thesis or design project in one of the participating colleges or it may involve independent study. Students may enroll in DAS 425 (effective Fall 2018) or in an approved alternative course. In all cases, the student must have the permission of a faculty member to supervise and evaluate the work. All students enrolled in Senior Research in International Studies must have their topics approved by the director of the secondary major in international studies.

Geographic knowledge

- GEOG 100 - World Geography & Globalization **Credits:** 3

Cultural understanding

- ANTH 200 - Introduction to Cultural Anthropology **Credits:** 3
  or
- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3
  or
- ANTH 210 - Introduction to Cultural Anthropology, Honors **Credits:** 3

International relations

At least one course marked with an asterisk in the approved course list found on the website.

Program integration

- DAS 525 - Senior Research in International Studies **Credits:** 3
  or approved alternative

II. Electives

The remaining 12 credit hours may be taken from the approved course listing. No more than 6 elective credit hours may be applied from a single discipline, and no more than 6 credit hours may be counted toward both a secondary major in an area studies program and in international studies. Students are encouraged to take courses in more than one college and are required to consult with the international studies director on the design and coherence of their international studies program.

Courses approved for the secondary major in international studies are found on the website. The website listing is revised each semester as new courses are added and changed and hers are removed from the curriculum.

Please note that other international studies courses are offered as ‘‘special studies,’’ ‘‘topics,’’ ‘‘problems,’’ or ‘‘seminar’’ categories. Intersession offerings may sometimes be acceptable. Transfer credits from approved study abroad programs, or other institutions, may be accepted as part of the student’s program of study.

Elective offerings

Courses are generally available in the following fields:

Agriculture
Anthropology
Architecture, Planning and Design
Art
Communication Studies
Economics
Education
English
Finance
Gender, Women, and Sexuality Studies
Geography
History
Human Ecology
Modern Languages
Political Science
Sociology

Please see website for a current list of courses.

Total credit hours required for graduation: (124)

Latin American Studies Secondary Major

Kathleen Antonioli, Director
108 Eisenhower Hall
785-532-6760
E-mail: ias@k-state.edu
www.k-state.edu/ias

The secondary major in Latin American studies provides opportunities for students to examine issues related to Latin America from a variety of perspectives. This interdisciplinary approach is designed to help students understand the systematic nature of political, socioeconomic, technological, and environmental problems in Latin America and the value systems of the people involved.

The program allows students to work with specialists in the humanities and social sciences, and to benefit from the expertise and experience of scientists and engineers who are engaged in research or development projects related to Latin America. Students who complete the secondary major will be qualified to pursue graduate work in Latin American studies. The curriculum will enhance student qualifications for employment in research, economic development, social action, trade, and diplomacy related to Latin America.

A student from any college may choose the secondary major in Latin American studies to complement course work in his or her major. Many courses may simultaneously meet the student's own college or major degree requirements. In this way, electives and required courses within a college curriculum may count toward the secondary major in Latin American studies.

Please note that other Latin American studies courses are offered as "special studies," "topics," "problems," or "seminar" categories." Intersession offerings may sometimes be acceptable. Transfer credits from approved study abroad programs, or other institutions, may be accepted as part of a student's program of study. Please check the website for any program changes or announcements.

General requirements for undergraduate major

A total of 124 credit hours are required for graduation. The BS program is obtained by following the curriculum of the College of Arts and Sciences.

Courses approved for the secondary major in Latin American studies are found on the website. The website listing is revised each semester as new courses are added or changed and others are removed from the university curriculum.

I. Language requirement

Students must complete Spanish IV or its equivalent, or demonstrate more advanced competence in Spanish or Portuguese.

II. Area courses

Students must complete 21 credit hours of area courses, including Senior Research. Courses must be taken in a minimum of four departments, with no more than 9 credit hours in any one department.

Courses are generally available in the following disciplines:

- Anthropology
- Geography
- History
- Modern languages
- Political science
- Sociology

Senior research

During the senior year, the student will write a research paper or complete a project on a Latin American studies topic. The research may be an honors thesis or design project in one of the participating colleges or it may involve independent study.

Students may enroll in DAS 407 or in an approved alternative course. In all cases, the student must have the permission of a faculty member to supervise and evaluate the work. All students enrolled in Senior Research in Latin American Studies must have their topics approved by the director of the secondary major in Latin American studies.

- DAS 507 - Senior Research in Latin American Studies **Credits:** 3

Total hours required for graduation (124 credit hours)

Natural Resources and Environmental Sciences Secondary Major

Shawn Hutchison, Interim Director
118 Seaton Hall
785-532-6727
www.k-state.edu/nres

The natural resources and environmental sciences secondary major prepares students to apply broadly-based scientific knowledge to the use, management, sustainability, and quality of soil, air, water, mineral, biological, and energy resources. The NRES program offers a timely and relevant academic emphasis to broaden the environmental perspective students receive in their primary major.

Government, corporate, and public concerns about natural resource and environmental issues abound. These concerns translate into career opportunities for individuals with interdisciplinary training on how humanity affects global functions.

Because natural resource and environmental issues tend to be so extensive and complex, they exceed the scope of any single discipline. Students in the NRES secondary major study environmental issues from a wide base of academic viewpoints. Involvement with students and professors from other disciplines adds skills typically required in environmental careers.

Enroll by appointment with the director or by electronic form on the webpage.

Major degree requirements

I. Entry requirements

Students must successfully complete the following courses to become eligible to pursue the NRES secondary major. One course in the entry or block elective requirements must qualify as a life science course.

a. Four basic science courses (or their more advanced equivalent)

- CHM 110 - General Chemistry **Credits:** 3
  and
- CHM 111 - General Chemistry Laboratory **Credits:** 1
  or
- CHM 210 - Chemistry I **Credits:** 4
- MATH 100 - College Algebra **Credits:** 3

Choose one from the following:

- PHYS 101 - The Physical World **Credits:** 3
  and

- PHYS 103 - The Physical World Laboratory **Credits:** 1
  or
- PHYS 113 - General Physics I **Credits:** 4
  or
- PHYS 115 - Descriptive Physics **Credits:** 5

Choose one from the following:

- AGEC 120 - Agricultural Economics and Agribusiness **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3

b. Two of the following basic NRES courses

These courses must be from different departments and total a minimum of 6 credit hours. Courses used to meet this requirement may not be used to meet NRES block elective requirements.

- AGRON 205 - Soils **Credits:** 3
- AGRON 335 - Environmental Quality **Credits:** 3
- BIOL 198 - Principles of Biology **Credits:** 4
- GEOG 121 - Introductory Physical Geography: Earth Systems Science **Credits:** 3
- GEOG 340 - Natural Resources **Credits:** 3
- GEOL 100 - Earth in Action **Credits:** 3
- GEOL 105 - Oceanography **Credits:** 3
- GEOL 115 - Environmental Geology **Credits:** 3
- GEOL 125 - Natural Disasters **Credits:** 3
- PMC 275 - Introduction to Natural Resource Management **Credits:** 3

c. One life science course

- AGRON 120 - Crop Science **Credits:** 3
- ANTH 280 - Introduction to Biological Anthropology **Credits:** 4
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- BIOCH 521 - General Biochemistry **Credits:** 3
- BIOCH 700-799
- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 263 - Ecology of Environmental Problems **Credits:** 3
- BIOL 330 - Public Health Biology **Credits:** 3
- BIOL 441 - Human Body I **Credits:** 4
- BIOL 333 - Introduction to Fisheries, Wildlife, Conservation and Environmental Biology **Credits:** 3
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 500-799
- HORT 201 - Principles of Horticultural Science **Credits:** 4
- GEOL 650 - Geomicrobiology **Credits:** 3
  This course may be used to meet other requirements

II. Block elective requirements

From the following lists, students must successfully complete a minimum of 5 courses (15 credit hours minimum) from at least four departments. One course must be taken from each of the designated areas (natural, applied, and social sciences/humanities), two courses must be numbered 500 or greater, and three courses must have a prerequisite. These lists are continuously being revised, See the director for the most recent version.

Natural science courses

- AGRON 205 - Soils **Credits:** 3
- AGRON 665 - Soil Genesis and Classification **Credits:** 3
- BIOL 333 - Introduction to Fisheries, Wildlife, Conservation and Environmental Biology **Credits:** 3
- BIOL 529 - Ecology **Credits:** 3
- BIOL 612 - Freshwater Ecology **Credits:** 4
- BIOL 642 - Principles of Conservation Biology **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- CHM 315 - Environmental Science: A Chemistry Perspective **Credits:** 3
- CHM 316 - Environmental Science: A Chemistry Perspective Laboratory **Credits:** 1
- ENTOM 101 - Insects and People **Credits:** 3
- ENTOM 312 - General Entomology **Credits:** 3
- ENTOM 692 - Insect Ecology **Credits:** 3
- GEOG 235 - Atmospheric Science **Credits:** 4
- GEOG 535 - Global Climatology and Climate Change **Credits:** 4
- GEOG 740 - Fluvial Geomorphology **Credits:** 3
- GEOL 305 - Sustainable Earth Resources **Credits:** 3
- GEOL 399 - Honors Seminar in Geology **Credits:** 1-3
- GEOL 506 - Environmental Studies **Credits:** 3
- GEOL 315 - Geology of the National Parks **Credits:** 3
- GEOL 520 - Geomorphology **Credits:** 3
- GEOL 540 - Geologic Record of Climate Change **Credits:** 3
- GEOL 611 - Hydrogeology **Credits:** 3
- GEOL 711 - Water Resources Geochemistry **Credits:** 3

Applied science and technology courses

- AGRON 330 - Weed Science **Credits:** 3
- AGRON 335 - Environmental Quality **Credits:** 3
- AGRON 375 - Nutrient Cycling and Fertilizer Management **Credits:** 3
- AGRON 251 - Range Management **Credits:** 3
- AGRON 635 - Soil and Water Conservation **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1
- AGRON 655 - Site Specific Agriculture **Credits:** 3
- AGRON 746 - Environmental Soil Physics **Credits:** 3
- ATM 558 - Hydrology and Soil Erosion Management **Credits:** 3
- ATM 653 - Water Management and Irrigation Systems **Credits:** 2

- ATM 661 - Watershed Assessment and Management **Credits:** 3
- BAE 560 - Hydrology for Biological Systems **Credits:** 3
- BAE 620 - Topics in Biological Systems Engineering **Credits:** 1-18
- BAE 643 - Life Cycle Assessment **Credits:** 3
- BAE 651 - Air Pollution Engineering **Credits:** 3
- BAE 660 - Hydraulic Transport in Biological Systems **Credits:** 3
- BAE 664 - Green Stormwater Infrastructure Design and Assessment **Credits:** 3
- BAE 768 - Geoenvironmental Engineering Design **Credits:** 3
- BIOL 263 - Ecology of Environmental Problems **Credits:** 3
- BIOL 684 - Wildlife Management and Techniques **Credits:** 4
- BIOL 696 - Fisheries Management and Techniques **Credits:** 4
- CE 550 - Water Resources Engineering **Credits:** 3
- CE 552 - Hydraulic Engineering **Credits:** 3
- CE 563 - Environmental Engineering Fundamentals **Credits:** 3
- CE 565 - Water and Wastewater Engineering **Credits:** 3
- CE 625 - Principles of Geoenvironmental Engineering **Credits:** 3
- CE 654 - Design of Groundwater Flow Systems **Credits:** 3
- CE 766 - Wastewater Engineering: Biological Processes **Credits:** 3
- CE 768 - Geoenvironmental Engineering Design **Credits:** 3
- CHE 650 - Hazardous Waste Engineering Seminar **Credits:** 1
- CHE 670 - Sustainability Seminar **Credits:** 1
- CHE 715 - Biochemical Engineering **Credits:** 3
- GEOG 508 - Geographic Information Systems I **Credits:** 4
- GEOG 605 - Remote Sensing of the Environment **Credits:** 3
- GEOL 745 - Exploration Geophysics **Credits:** 3
- GEOL 731 - Petroleum Geology **Credits:** 3
- LAR 420 - Socio-Ecological Systems Studio **Credits:** 5
- LAR 734 - Rivers: Processes & Forms **Credits:** 3
- PMC 575 - Water Management for Natural Resource Managers **Credits:** 3
- PMC 635 - Methods of Environmental Interpretation **Credits:** 3
- PMC 740 - Advanced Environmental Interpretation **Credits:** 3

Social sciences/humanities courses

- AGCOM 712 - Environmental Communication **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGEC 610 - Current Agriculture and Natural Resource Policy Issues **Credits:** 3
- ANTH 260 - Introduction to Archeology **Credits:** 3
- ANTH 310 - Environmental Anthropology: Living with Change in the Anthropocene **Credits:** 3
- AT/ID 350 - Our Sustainable World: Current Challenges and Future Opportunities **Credits:** 3
- ECON 527 - Environmental Economics **Credits:** 3
- ENGL 270 - American Literature **Credits:** 3
- ENGL 399 - Honors Seminar in English **Credits:** 1-3
- ENGL 680 - Topics in American Literature **Credits:** 3
- GENAG 670 - Introduction to Agricultural Resources and Environmental Management **Credits:** 2
- GEOG 340 - Natural Resources **Credits:** 3

- GEOG 360 - Sustainability Concepts & Issues **Credits:** 3
- GEOG 460 - Human Dimensions of Global Change **Credits:** 3
- GEOG 600 - Mountain Geography **Credits:** 3
- GEOG 718 - Geography of Public Lands **Credits:** 3
- GEOG 720 - Geography of Land Use **Credits:** 3
- GEOG 725 - Geography of Water Resources **Credits:** 3
- GEOG 761 - Human Impact on the Environment **Credits:** 3
- GEOG 765 - Geography of Natural Hazards **Credits:** 3
- GEOG 770 - Perception of the Environment **Credits:** 3
- GWSS 480 - Seminar in Gender, Environment and Justice **Credits:** 3
- HIST 511 - Environmental History **Credits:** 3
- HIST 557 - History of American Agriculture **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- LAR 646 - Community Engagement Studio **Credits:** 5
- MC 712 - Environmental Communications **Credits:** 3
- PHILO 595 - Environmental Ethics **Credits:** 3
- PLAN 115 - Introduction to Regional and Community Planning **Credits:** 3
- SOCIO 536 - Society and Natural Resources **Credits:** 3

III. Capstone course requirement

All students must successfully complete the NRES capstone course. This course should be scheduled during the senior year.

Choose one from the following:

- BAE 582 - Natural Resources/Environmental Sciences Project (NRES) **Credits:** 3
- DAS 582 - Natural Resources Environmental Sciences Project **Credits:** 3
- GENAG 582 - Natural Resources/Environmental Science Project (NRES) **Credits:** 3

Undergraduate Certificate

Nonviolence Studies Undergraduate Certificate

To earn the Certificate in Nonviolence Studies (NVS), students will examine violence and nonviolence within a holistic context. Students will look at social justice issues as they relate to individuals, the community, and the world. Students will take a comprehensive and far-reaching view of issues as they exist within the context of the culture and the world that surrounds them--as they exist through time and within a continuum that includes the precursors that lead to actual physical violence. They will imagine ways to apply nonviolence methodology to achieve better "cultural and social health" similarly to the way "public health" officials apply a preventative, contextual model.

Upon completion of an undergraduate certificate in nonviolence studies, student will be able to demonstrate their understanding of:

- systems theory
- the differences between a mechanistic and organic worldview
- basic anthropological perspectives and concepts of holism
- history and theories of past and current nonviolence movements, including major writers
- their positionality in the social order and in what ways their life choices make a difference

their ability to apply:

- the concepts and methodologies of nonviolent resistance and direct action
- holistic thinking to human issues ranging from local to global
- the basic skills of conflict resolution, mediation, and arbitration
- critical thinking to real-world issues

General requirements

Course requirements (6 credit hours)

- DAS 355 - Introduction to Nonviolence Studies **Credits:** 3

And One Capstone class:

- DAS 455 - Violence, Nonviolence and Social Change **Credits:** 3
  or
- DAS 590 - Applied Nonviolence **Credits:** 3

Electives (9 credit hours)

Selected from a list of courses that have been approved by Arts and Sciences Dean in past:

- ANTH 200 - Introduction to Cultural Anthropology **Credits:** 3
- CNRES 531 - Interpersonal Conflict Resolution **Credits:** 3
- CNRES 532 - Conflict Resolution across Cultures & Contexts **Credits:** 3
- CNRES 533 - Prevention & Intervention of Violence **Credits:** 3
- COMM 130 - Interpersonal Communication **Credits:** 3
- COMM 480 - Intercultural Communication **Credits:** 3
- DANCE 325 - Ballet II **Credits:** 2 (Anatomy for Dancers)
- EDCEP 311 - Interaction and Guidance for the Paraprofessional **Credits:** 3 (Proactive Educators for the Elimination of Rape and Sexual Violence)
- HDFS 700 - Problems in Human Development and Family Science **Credits:** 1-6 (Peace and Conflict)
- GWSS 105 - Introduction to Gender, Women, and Sexuality Studies **Credits:** 3
- GWSS 380 - Global Struggles for Feminist, Queer, and Trans Justice **Credits:** 3
- GWSS 480 - Seminar in Gender, Environment and Justice **Credits:** 3 (Women and Environmentalism)
- GWSS 700 - Advanced Topics in Gender, Women, and Sexuality Studies **Credits:** 1-3 (Independent Study in Nonviolence Studies)
- IARC 391 - Topics in Contemporary Design Seminar **Credits:** 3
- LEAD 502 - Independent Study in Leadership Studies **Credits:** 0-3 (International Community Service Seminar)
- SOCIO 363 - Global Problems **Credits:** 3
- SOCIO 500 - Sociological Perspectives on Contemporary Issues **Credits:** 1-3 (Human Trafficking)
- SOCIO 507 - International Development and Social Change **Credits:** 3
- SOCIO 423 - Methods of Social Research I **Credits:** 4
- SOCIO 545 - The Sociology of Women **Credits:** 3
- SOCIO 633 - Gender, Power, and Development **Credits:** 3
- SOCIO 635 - Sociology of Human Trafficking **Credits:** 3

- SOCWK 100 - Social Work: The Helping Profession **Credits:** 3
- SOCWK 568 - Macro Practice and Theory **Credits:** 3
- THTRE 664 - Creative Drama **Credits:** 3
- THTRE 665 - Drama Therapy with Special Populations **Credits:** 3

Total credit hours: (15)

Aerospace Studies (Air Force ROTC)

Lieutenant Colonel Kristin Clinger , Head

101 General Richard B. Myers Hall
785-532-6600
Fax: 785-532-7049
E-mail: afrotc@k-state.edu
www.k-state.edu/usaf

The Air Force Reserve Officer Training Corps provides the best means for undergraduate students to become officers in the United States Air Force. Upon completion of the university program, students are commissioned as second lieutenants, and then enter active duty in one of the four rated flying positions or a technical or nontechnical career field; are deferred for graduate

study, to enter active service after degree completion; or enter into Air Force-sponsored graduate study at full pay while serving as Air Force officers.

Any undergraduate student with at least five semesters left in their degree program and who is a U.S. citizen may apply to become a cadet by enrolling in both AERO 110 and AERO 099. The duration of the program is typically four years but can be condensed into three for students without prior military service. Students with prior military service can be condensed into two years. Program length depends on an applicant's previous experience and the availability of different options.

Members attending any K-State affiliated school or campus (KSU Polytechnic, etc.) are able attend and be part of the program. Additionally, members of affiliated schools may have a cross town agreement with K-State and can attend and be part of the program (Manhattan Christian College, Kansas Wesleyan University, etc.)

Scholarships

Full-time students who qualify to become Air Force officers, with five or more semesters left for degree completion (including graduate study), are eligible to apply for scholarships. If selected, students will have their tuition, fees, and book allowance paid for by the U.S. Air Force; they will also receive a $300 to $500 monthly stipend while in school. All payments are tax free.

High school students considering the Air Force ROTC High School Scholarship Program must be highly motivated toward becoming Air Force officers. To qualify, students should be above-average scholars, be physically capable, possess leadership potential, and apply before 31 January of their senior year. Financial benefits are the same as the undergraduate scholarships mentioned earlier. Applicants should contact their high school counselor or an AFROTC officer for applications and further information. Visit the website for more details.

Four-year program

Basic course

Students electing the four-year program normally will begin with the General Military Course during the freshman or sophomore year. This program consists of four courses of 1 credit hour each over a period of two or four semesters and enrollment in AERO 099. Aerospace Studies GMC courses are open to all students at the university without obligation to military service. Students in the GMC are provided uniforms, texts, and other equipment needed for their AFROTC courses.

Advanced course

The Professional Officer Course is the upperclass program and consists of four courses of 3 credit hours each, over a period of four semesters and enrollment in AERO 099. All cadets in the POC become members of the Air Force Reserve and receive $400 to $500 a month and all necessary AFROTC texts and equipment. Upon completion of the POC and their degree requirements, students are commissioned as second lieutenants in the United States Air Force.

Field training

Cadets practice their leadership and management skills in a Cadet Wing. Cadets who are in the four-year program attend 17 days of field training at an Air Force base during the summer prior to entering the POC. During training, cadets are paid and receive travel pay to and from the training base.

Extracurricular activities

Students enrolled in Air Force ROTC may participate in many activities including detachment-sponsored events and social functions. Cadets pursuing officers' commissions are eligible for membership in the Arnold Air Society, a national honorary

professional and service organization established to foster good relations among Air Force ROTC, the Air Force, the campus, and the local community. Participation in the Arnold Air Society is voluntary. Students are also eligible to participate in Honor Guard, a team that presents the colors at University and local community events.

Aerospace Studies Minor

The Aerospace Studies Minor is designed to enhance an individual's leadership skills by increasing the understanding of both current political issues and historical events that built modern societies. The courses enhance both leadership character traits and communication strategies. Primary application is for individuals who desire to become officers in the United States Air Force or Space Force. Secondary application is for any student desiring to grow in their understanding of military history and culture, while bolstering their personal leadership skills.

No more than six transferable credit hours may be used for this minor.

Required Courses: 12 credit hours

- AERO 310 - Officer Leadership Studies 3A **Credits:** 3
- AERO 311 - Officer Leadership Studies 3B **Credits:** 3
- AERO 410 - Regional Studies and Defense Policy **Credits:** 3
- AERO 411 - Aerospace Studies/Civil Military Relationships **Credits:** 3

History elective: 3 credit hours

Select one history course from the list below for 3 credit hours.

- HIST 155 - Introduction to US Military History **Credits:** 3
- HIST 301 - Topics in History **Credits:** 3
- HIST 510 - World War I **Credits:** 3
- HIST 513 - Battles and Leaders **Credits:** 3
- HIST 526 - The American Revolution **Credits:** 3
- HIST 529 - Civil War and Reconstruction **Credits:** 3
- HIST 545 - War in the Twentieth Century **Credits:** 3
- HIST 593 - The Vietnam War **Credits:** 3

General elective: 3 credit hours

Select one general elective course from the list below for 3 credit hours.

- COMM 311 - Business and Professional Speaking **Credits:** 3
- COMM 425 - Organizational Communication **Credits:** 3
- COMM 480 - Intercultural Communication **Credits:** 3
- LEAD 200 - Foundations of Leadership of Society **Credits:** 1-3
- LEAD 212 - Introduction to Leadership Concepts **Credits:** 2-3
- LEAD 320 - Theories of Leadership **Credits:** 3
- POLSC 343 - American Foreign Policy **Credits:** 3
- POLSC 390 - Middle East Politics **Credits:** 3

Total Hours Required for Minor: 18

Art

Art education

Students Interested in teaching art in elementary or secondary schools should complete the Bachelor of Science in Education degree offered through the College of Education. This degree includes 45 credits of Studio Art courses.

Transfer students

Art courses transferred to K-State will be reviewed by the art department for application of appropriate credit. A detailed syllabus must be supplied.

Laptop Requirement:

All Art students are required to have a laptop or access to a laptop computer during their time as a student in the department. In general, the laptop needs to support the full Adobe Creative Cloud Suite subscription.

Specific technology requirements for Department majors in these areas of study

Photo area - Required hardware and software:

- Mac (preferred) or PC Laptop
- Screen Size: 14 inch and above
- At least 16GB unified memory
- At least 512 GB memory
- At least 1 portable hard drive: 500GB to 1TB for backup
- Adobe CreativeCloud Suite (Use "Students and Teachers" Pricing)
- DSLR/mirrorless camera with at least 1 lens: at least 24 megapixel or above, with full manual controls, RAW file and HD video capability
- Durable tripod (aluminum or carbon fiber)

Graphic design area - Required hardware and software:

Mac laptop, minimum 13 inch screen (Apple is the industry standard for graphic design); 14 inch, preferred

- Minimum Specifications: Apple Macbook Pro with 13 inch screen M1 Chip with 8-Core CPU and 8-Core GPU 256GB SSD Storage

- Dell XP13 or Microsoft Surface Book 3 laptops (not the surface tablet) are equivalent minimum Windows computer
- Complete Adobe Creative Cloud Suite, all applications (Use "Student and Teachers" Pricing)
- Cloud-based backup service and/or minimum 1TB backup drive

Bachelor of Arts

Art - Art History (BA)

The Art Department offers a BA degree with concentration areas in both Art History and Studio Art. Both degree concentrations require fulfillment of the College of Arts and Sciences requirements for the B.A. The Art B.A. requires core foundations in both Studio and Art History in addition to further study in one concentration. Students majoring in Art must earn a total of 120 credit hours for graduation.

The BA prepares students for graduate work and academic careers in a wide range of arts-related fields, including arts administration, cultural entrepreneurship, museum studies, arts, community development and other fields outside the arts that require expertise in art, problem-solving, and creative thinking.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 3 Credit Hours

- ART 105 - AandD: Career and Creative Industry Seminar **Credits:** 1

Outside Concentration: 9 Credit Hours

Outside credential of at least 9 credit hours (May be from any unit, **except ART,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for ART) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Programs

Math Requirement

If not met through K-State Core requirements, MATH 160 is required.

KSC 030

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

A&D Foundation Courses: 9 Credit Hours

- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 200 - AandD: Visual Representation and Fabrication **Credits:** 3

Art History Required Courses: 12 Credit Hours

- ART 195 - Survey of Western Art History I **Credits:** 3
- ART 196 - Survey of Western Art History II **Credits:** 3

20th Century Art History Courses:

Choose any two courses from the list below for a total of 6 credit hours,

- ART 545 - Twentieth Century Art History I: Post-Impressionism to Cubism **Credits:** 3
- ART 550 - Twentieth Century Art History II: Dada to Surrealism **Credits:** 3
- ART 602 - Twentieth Century Art History III: Abstract Expressionism to Pop Art **Credits:** 3
- ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art **Credits:** 3

Art History Concentration Courses: 15 Credit Hours

Choose any five Art History Courses from the Department Approved List:

https://art.ksu.edu/academics/undergrad/AH_courses.html

Fulfils A&S Fine Arts BA Requirement

BA Arts, Humanities, and Social Sciences Requirement: 6 Credit Hours

3 credit hours in each of the following areas below, with at least 3 credit hours at 300 level or above **OR** at any level with a prerequisite in the same discipline.

One course in Humanities Course: 3 Credit Hours

One Non-Quantitative Social Science Course: 3 Credit Hours

BA Natural and Quantitative Requirement: 6 Credit Hours

One course in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Natural Science or Quantitative Course: 3 Credit Hours

Natural Science, or Quantitative, or Social Science: 3 Credit Hours

with MATH or STAT

BA Second Language Requirement: 6 Credit Hours

Choose one of the following options below:

Option 1: 3-14 Credit Hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 Credit Hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 Credit Hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 11-21 Credit Hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Art - Studio Art (BA)

The Art Department offers a BA degree with concentration areas in both Art History and Studio Art. Both degree concentrations require fulfillment of the College of Arts and Sciences requirements for the B.A. The Art B.A. requires core foundations in both

Studio and Art History in addition to further study in one concentration. Students majoring in Art must earn a total of 120 credit hours for graduation.

The BA prepares students for graduate work and academic careers in a wide range of arts-related fields, including arts administration, cultural entrepreneurship, museum studies, arts, community development and other fields outside the arts that require expertise in art, problem-solving, and creative thinking.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

- ART 105 - AandD: Career and Creative Industry Seminar **Credits:** 1

Outside Concentration: 9 Credit Hours

Outside credential of at least 9 credit hours (May be from any unit, **except ART,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for ART) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Programs

Math Requirement

If not met through K-State Core requirements, MATH 160 is required.

KSC 030

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

A&D Foundation Courses: 9 Credit Hours

- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 200 - AandD: Visual Representation and Fabrication **Credits:** 3

Art History Required Courses: 12 Credit Hours

- ART 195 - Survey of Western Art History I **Credits:** 3
- ART 196 - Survey of Western Art History II **Credits:** 3

20th Century Art History Courses:

Choose any two courses from the list below for a total of 6 credit hours.

- ART 545 - Twentieth Century Art History I: Post-Impressionism to Cubism **Credits:** 3
- ART 550 - Twentieth Century Art History II: Dada to Surrealism **Credits:** 3
- ART 602 - Twentieth Century Art History III: Abstract Expressionism to Pop Art **Credits:** 3
- ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art **Credits:** 3

Studio Art Concentration Courses: 15 Credit Hours

Choose any five Studio Art Courses from Department approved list https://art.ksu.edu/academics/undergrad/Studio_courses.html

Fulfils A&S Fine Arts BA Requirement

BA Arts, Humanities, and Social Sciences Requirement: 6 Credit Hours

3 credit hours in each of the following, with at least 3 credit hours at 300 level or above OR at any level with a prerequisite in the same discipline.

One course in Humanities Course: 3 Credit Hours

One Non-Quantitative Social Science; Any Social Course: 3 Credit Hours

Choose a course from this category that does NOT have a MATH or STAT prereq

BA Natural and Quantitative Requirement: 6 Credit Hours

One course in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Natural Science or Quantitative course Credits: 3

Natural Science, or Quantitative, or Social Science Course: 3 Credit Hours

BA Second Language Requirement: 3-16 Credit Hours

Choose one of the following options below:

Option 1: 3-14 Credit Hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 Credit Hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 Credit Hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 12-25 Credit Hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Bachelor of Fine Arts

Art - Studio Art (BFA)

The Bachelor of Fine Arts degree is a professionally oriented undergraduate degree in art or design. It is designed primarily for those planning to become professional artists, artist-teachers, or visual communication designers. Greater emphasis is placed on actual practice in the creative art disciplines.

The BFA in Art is a 4-year, 120-credit hour program with concentrations possible in Studio Art or Visual Communication Design. Areas of focus within the Studio Art BFA include Ceramics, Drawing, Metalsmithing and Jewelry, Painting, Photography and Printmaking. The BFA degree is considered the appropriate preparation for the Master of Fine Arts degree, which is recognized as the terminal degree in Studio Arts and Visual Communication Design. The BA and BFA can also be used as preparation for:

- Master of Fine Arts Degree in Studio Arts or Visual Communication Design
- A career as a Professional Artist, Professional Photographer, or Professional Visual Communication Designer
- A Master's degree in Art Therapy when a portfolio of artwork is presented and additional coursework, generally consisting of 12-credit hours in Psychology is completed. Required Psychology credits commonly include Developmental and Abnormal Psychology. Requirements for admission may include other preliminary coursework as defined by individual graduate programs. Potential candidates should contact programs directly for admission requirements.
- A Master's degree in Artistic and Historic Conservation. North American Education programs offer a Master's degree in Conservation or Historic Preservation as well as Master's degrees in related disciplines, along with a certificate or diploma in Conservation. Many graduate programs in Conservation of Cultural Property require preliminary coursework that commonly includes one year of General Chemistry and one year of Organic Chemistry, courses in the humanities such as Art History, Anthropology, Architecture, and Archeology, and coursework in Studio Art. Many programs also require a portfolio of art. Potential candidates should contact programs directly for Admission requirements.

NOTE: Students interested in teaching art in elementary or secondary schools should complete the Bachelor of Science in Education degree offered through the College of Education. This degree includes the Art (EDART) Teacher Licensure Program and 42-credit hours of studio art courses.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation - 1 Credit Hour

Introduction to art concentrations and professions.

- ART 105 - AandD: Career and Creative Industry Seminar **Credits:** 1

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Programs

Math Requirement

If not met through K-State Core requirements, MATH 160 is required.

KSC 030

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

A&D Foundation: 13 Credit Hours

- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 194 - A and D: Community and the Environment Experience **Credits:** 3
- ART 200 - AandD: Visual Representation and Fabrication **Credits:** 3
- ART 205 - Portfolio Review **Credits:** 1
  Formal evaluation of student work prior to admission to a chosen area of concentration, Studio Art or Visual Communication Design, is required upon completion of the Art and Design Foundation courses. Visual course work must meet faculty approval, and students must pass ART 205 (previously 298) in order to be admitted to a concentration and continue with a BFA degree. Student enrollment in some art courses may depend on having passed the ART 205 and being admitted to a concentration.

Studio Art Concentration Required Courses: 21 Credit Hours

- ART 291 - Introduction to Drawing **Credits:** 3
- ART 331 - Introduction to Digital and Expanded Media **Credits:** 3
- ART 335 - Introduction to Printmaking Techniques **Credits:** 3
- ART 345 - Introduction to Oil Painting **Credits:** 3
- ART 365 - Introduction to the Ceramics Spectrum **Credits:** 3
- ART 370 - Introduction to Metals and Jewelry **Credits:** 3
- ART 395 - Introduction to Digital Photography **Credits:** 3

500, 600 Level Art Courses: 9 Credit Hours

Choose three from any 500 and 600 level Art courses. Enroll in one 500 or 600 level Studio course in the Spring semester of Senior year.

Research Studios: 6 Credit Hours

- ART 405 - A and D: Undergraduate Research Studio **Credits:** 3
- ART 505 - A and D: Senior Research Studio **Credits:** 3

Art History: 15 Credit Hours

ART 195, ART 196 and 2 courses in 20th C Art History, and one Art History Elective

Art History Survey Courses: 6 Credit Hours

- ART 195 - Survey of Western Art History I **Credits:** 3 Eligible for KSC #6
- ART 196 - Survey of Western Art History II **Credits:** 3 Fulfills Global Perpsectives Overlay

20th Century Art History Courses: 6 Credit Hours

Choose any two from the following courses

- ART 545 - Twentieth Century Art History I: Post-Impressionism to Cubism **Credits:** 3
- ART 550 - Twentieth Century Art History II: Dada to Surrealism **Credits:** 3
- ART 602 - Twentieth Century Art History III: Abstract Expressionism to Pop Art **Credits:** 3
- ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art **Credits:** 3

Art History Elective: 3 Credit Hours

Choose any 1 Art History course - From Department approved Art History List
- https://art.ksu.edu/academics/undergrad/AH_courses.html

Art Electives: 15 Credit Hours - above 200 Level

Choose any 5 Art courses above 200 level. Course may not duplicate with the above requirements.

Free Electives in addition to K-State Core #7: 9 Credit Hours

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

- ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art **Credits:** 3

Art Electives: 18 credit hours

Choose any 6 Art courses at a 200 level or higher. The course may not duplicate the above program level requirements.

Free Electives: 7 credit hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Minor

Art History Minor

The Art History minor is open to all K-State students majoring in an area outside Art who want to develop skills to analyze images and artifacts critically and in historical context. Through an emphasis on understanding visual culture, minors in Art History complement their major area of study with a deeper knowledge of how and what images mean.

Art History Courses: 15 credit hours

Required ART 195 OR ART 196; Select 4 additional 3 credit hour courses from the list below

- ART 195 - Survey of Western Art History I **Credits:** 3
  OR
- ART 196 - Survey of Western Art History II **Credits:** 3
- ART 197 - Survey of Non-Western Art History **Credits:** 3
- ART 545 - Twentieth Century Art History I: Post-Impressionism to Cubism **Credits:** 3
- ART 550 - Twentieth Century Art History II: Dada to Surrealism **Credits:** 3
- ART 601 - Graphic Design History/Theory/Criticism **Credits:** 3
- ART 602 - Twentieth Century Art History III: Abstract Expressionism to Pop Art **Credits:** 3
- ART 603 - Twentieth Century Art History IV: Conceptual Art to Contemporary Art **Credits:** 3
- ART 608 - Special Studies in Art **Credits:** 3
- ART 612 - History of Italian Renaissance Art **Credits:** 3
- ART 613 - History of Northern Renaissance Art **Credits:** 3
- ART 614 - Italian Renaissance Architecture: Patronage and Construction **Credits:** 3
- ART 622 - Baroque Art History **Credits:** 3
- ART 628 - Foreign Studies in Art History **Credits:** 3-6
- ART 634 - History of Modern Sculpture **Credits:** 3
- ART 675 - History of Ceramics **Credits:** 3
- ART 695 - Topics in Art History **Credits:** 3

Total Hours Required: 15

Art Minor

Requirements

Foundation courses (3 credit hours)

Choose at least one course from this list:

- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
- ART 190 - Drawing I **Credits:** 3
- ART 194 - A and D: Community and the Environment Experience **Credits:** 3
- ART 200 - AandD: Visual Representation and Fabrication **Credits:** 3
- ENVD 201 - Environmental Design Studio I **Credits:** 4
- IDSN 225 - Interior Design Studio 1 **Credits:** 4

Art History (3 credit hours)

- ART 195 - Survey of Western Art History I **Credits:** 3
  or
- ART 196 - Survey of Western Art History II **Credits:** 3

Art Electives (6 credit hours)

Any Art or Art History classes (choose those that are the prerequisites for the 500/600-level classes that you wish to take to complete the minor).

Upper Level ART Classes (6 credit hours)

Take 6 credit hours at 500 level or above of Studio Art credits. Note that some of these classes have multiple prerequisites.

Total credit hours: 18

Visual Communication Design Minor

The Visual Communication Minor provides students with knowledge, training, and skills that make them more prepared for a host of professional and educational opportunities that complement many other academic disciplines.

Requirements

Foundation Course (3 credit hours)

Choose one of the following 3 Credit Hour courses

- ART 180 - AandD: Color, Light, and Perception Lab **Credits:** 3
  or
- IDSN 225 - Interior Design Studio 1 **Credits:** 4
  or
- ART 174 - A and D: Mixed Media Process and Exploration Lab **Credits:** 3
  or
- ENVD 201 - Environmental Design Studio I **Credits:** 4

Visual Communication Design Requirement Courses (6 credit hours)

- ART 303 - Visual Communication Design Techniques I **Credits:** 3
- ART 503 - Visual Communication Design Techniques II **Credits:** 3

Visual Communication Design Electives (9 credit hours)

- ART 104 - Digital Photography for Non-majors **Credits:** 3
- ART 304 - Digital Illustration **Credits:** 3
- ART 330 - Digital Techniques in Visual Art **Credits:** 3
- ART 335 - Introduction to Printmaking Techniques **Credits:** 3
- ART 395 - Introduction to Digital Photography **Credits:** 3

- ART 407 - Visual Communication Design Topics **Credits:** 1-3
- ART 601 - Graphic Design History/Theory/Criticism **Credits:** 3
- ART 621 - Advanced Concepts in Digital Video **Credits:** 3
- ART 629 - Foreign Studies in Visual Communication Design **Credits:** 3-6

Total hours required: 18

Biochemistry and Molecular Biophysics

Michal Zolkiewski, Head

141 Chalmers Hall
785-532-6121
Fax: 785-532-7278
E-mail: biochem@k-state.edu
www.k-state.edu/bmb

Biochemistry and Molecular Biophysics seek to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

The Department of Biochemistry and Molecular Biophysics offers work leading to bachelor of arts and bachelor of science degrees with majors in biochemistry, including areas of emphasis in medical biochemistry and molecular biophysics. The BA degree provides a liberal education with sufficient emphasis on science for students who wish to prepare for certain professional schools. The BS degree prepares students for professional careers in biochemistry or entry into graduate biochemistry training programs.

To graduate, a student must have a grade of C or better in all science and mathematics courses required for the degree, including transfer courses, as specified below. In addition, to graduate a student must have a 2.2 GPA in required science and mathematics courses taken at K-State.

Transfer students

Community college students who plan to transfer into either of the biochemistry curricula at the junior level should take the following science courses during their first two years of college:

- A year of freshman chemistry—lecture and laboratory
- A semester of analytical chemistry—lecture and laboratory
- A year of organic chemistry—lecture and laboratory
- A year of analytic geometry and calculus
- A year of biology—lecture and laboratory

Completion of these science courses should allow students to go directly into biochemistry and advanced biology courses upon entry into a biochemistry curriculum.

Concurrent BS/MS program

A combined BS/MS program provides exceptional undergraduates an opportunity to obtain both a bachelor of science and a master of science in biochemistry in five years.

For details of application procedures and the program of study toward the MS degree, see the graduate catalog. Admission and retention in the program requires a 3.0 GPA. Students may apply after they have accumulated 45–90 hours towards the BS degree.

Bachelor of Arts

Biochemistry (BA)

Biochemistry and Molecular Biophysics seek to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

The Department of Biochemistry and Molecular Biophysics offers work leading to bachelor of arts and bachelor of science degrees with majors in biochemistry, including areas of emphasis in medical biochemistry and molecular biophysics. The BA degree provides a liberal education with sufficient emphasis on science for students who wish to prepare for certain professional schools. The BS degree prepares students for professional careers in biochemistry or entry into graduate biochemistry training programs.

To graduate, a student must have a grade of C or better in all science and mathematics courses required for the degree, including transfer courses, as specified below. In addition, to graduate a student must have a 2.2 GPA in required science and mathematics courses taken at K-State.

Transfer students

Community college students who plan to transfer into either of the biochemistry curricula at the junior level should take the following science courses during their first two years of college:

- A year of freshman chemistry—lecture and laboratory
- A semester of analytical chemistry—lecture and laboratory
- A year of organic chemistry—lecture and laboratory
- A year of analytic geometry and calculus
- A year of biology—lecture and laboratory

Concurrent BS/MS program

A combined BS/MS program provides exceptional undergraduates an opportunity to obtain both a bachelor of science and a master of science in biochemistry in five years.

For details of application procedures and the program of study toward the MS degree, see the graduate catalog. Admission and retention in the program requires a 3.0 GPA. Students may apply after they have accumulated 45–90 hours towards the BS degree.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: [20] Credit Hours

*Chemistry Minor

Students in the BS in Biochemistry Degree complete a chemistry minor based on the course requirements for the major.

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biochemistry Requirements: 15 Credit Hours

- BIOCH 110 - Biochemistry and Society **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3
- BIOCH 755 - Biochemistry I **Credits:** 3
- BIOCH 765 - Biochemistry II **Credits:** 3

Chemistry Requirements: 17 Credit Hours

- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4

- CHM 350 - General Organic Chemistry **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
- CHM 371 - Chemical Analysis **Credits:** 4

Biology Requirements: 11 Credit Hours

- BIOL 198 - Principles of Biology **Credits:** 4
  KSC-040
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3

Physics Requirements: 8 Credit Hours

- PHYS 113 - General Physics I **Credits:** 4
- PHYS 114 - General Physics II **Credits:** 4

Mathematics Requirements: 4 Credit Hours

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  KSC-030
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4

Statistics Requirement: 3 Credit Hours

Students may choose any 3 credit hours of statistics (STAT 200 or higher)

Free Electives (if needed)

Take any course to complete the required total of 120 credits. The department recommends that students complete their electives, where possible, with upper division (>500 level) courses in BIOCH, BIOL, CHM, CIS, MATH, PHYS, or STAT.

BA Arts, Humanities, and Social Sciences Requirement: 9 Credit Hours

3 credit hours in each of the following, with at least 6 credit hours at 300 level or above **OR** at any level with a prerequisite in the same discipline.

One Humanities Course: 3 Credit Hours

Any course or combination of courses in Fine Arts: 3 Credit Hours

Non-Quantitative Social Science Course: 3 Credit Hours

Choose any social science course that does NOT have a MATH or STAT prereq

BA Second Language Requirement: 14 Credit Hours

Choose one of the following:

Option 1: 3-14 Credit Hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 Credit Hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 Credit Hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Total Hours Required for Graduation: 120

Biochemistry - Medical Biochemistry (BA)

Biochemistry and Molecular Biophysics seek to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

Non-Quantitative Social Science Course: 3 Credit Hours

Choose any social science course that does NOT have a MATH or STAT prereq

Free Electives

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120. The department recommends that students complete their electives, where possible, with upper division (>500 level) courses in BIOCH, BIOL, CHM, CIS, MATH, PHYS, or STAT.

Total Hours Required for Graduation: 120

Biochemistry - Medical Biochemistry (BS)

Biochemistry and Molecular Biophysics seek to understand the molecular events of life processes. It applies chemical and physical techniques to elucidate the structure and organization of molecules, particularly macromolecules that are responsible for the structural organization as well as operation and control of all cellular processes. The emerging knowledge has broad importance and consequences for all areas of the life sciences.

The Department of Biochemistry and Molecular Biophysics offers work leading to bachelor of arts and bachelor of science degrees with majors in biochemistry, including areas of emphasis in medical biochemistry and molecular biophysics. The BA degree provides a liberal education with sufficient emphasis on science for students who wish to prepare for certain professional schools. The BS degree prepares students for professional careers in biochemistry or entry into graduate biochemistry training programs.

To graduate, a student must have a grade of C or better in all science and mathematics courses required for the degree, including transfer courses, as specified below. In addition, to graduate a student must have a 2.2 GPA in required science and mathematics courses taken at K-State.

Transfer students

Community college students who plan to transfer into either of the biochemistry curricula at the junior level should take the following science courses during their first two years of college:

- A year of freshman chemistry—lecture and laboratory
- A semester of analytical chemistry—lecture and laboratory
- A year of organic chemistry—lecture and laboratory
- A year of analytic geometry and calculus
- A year of biology—lecture and laboratory

Completion of these science courses should allow students to go directly into biochemistry and advanced biology courses upon entry into a biochemistry curriculum.

Concurrent BS/MS program

A combined BS/MS program provides exceptional undergraduates an opportunity to obtain both a bachelor of science and a master of science in biochemistry in five years.

For details of application procedures and the program of study toward the MS degree, see the graduate catalog. Admission and retention in the program requires a 3.0 GPA. Students may apply after they have accumulated 45–90 hours towards the BS degree.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: [21] Credit Hours

Outside credential of at least 9 credit hours:

*Biology Minor

Students in the BA in Biochemistry Degree - Medical Track complete a Biology minor based on the course requirements for the major.

Overlays: [9] Credit Hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biochemistry Requirements: 18 Credit Hours

Students may take any 700- or higher-level course [3 credit hour BMB classes] as alternatives to BIOCH 755 and BIOCH 765

- BIOCH 110 - Biochemistry and Society **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3
- BIOCH 571 - Medical Biochemistry **Credits:** 3
- BIOCH 755 - Biochemistry I **Credits:** 3
- BIOCH 765 - Biochemistry II **Credits:** 3

Chemistry Requirements: 17 Credit Hours

- CHM 371 - Chemical Analysis **Credits:** 4
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  OR
- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2

Biology Requirements: 14 Credit Hours

- BIOL 198 - Principles of Biology **Credits:** 4
  KSC-040
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3
- BIOL 670 - Immunology **Credits:** 3

Physics Requirements: 8 Credit Hours

- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5

Mathematics Requirements: [4] Credit Hours

KSC-030

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4

Statistics Requirements: 6 Credit Hours

Students may choose any 6 credit hours of statistics, with 3 credit hours at a 300+ or higher

Upper-Division Electives: 8 Credit Hours

Students must complete any upper-division (500 or higher) courses in BIOCH, *BIOL, CHM, CIS, MATH, PHYS, STAT

ASI 533, BIOL 410, BIOL 441, BIOL 442, MATH 221, 222, 340, PHILO 365, and PSYCH 470 are allowed

*BIOL - students will need to choose 3 more hours in biology to receive the biology minor

BS Arts, Humanities, and Social Sciences Requirements: 6 Credit Hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above **OR** at any level with a prerequisite in the same discipline.

Fine Arts or Humanities Course: 3 Credit Hours

Non-Quantitative Social Science Course: 3 Credit Hours

Free Electives: 2 Credit Hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Web Address: www.k-state.edu/biology

The biology undergraduate requirements provide students a basic understanding of biological principles and methods and allow students to build on that base by further intensive or extensive study.

Course offerings and curricula accurately reflect both recent developments in the field of biology and changing requirements of students. Undergraduate majors are offered in biology; microbiology; and fisheries, wildlife, conservation, and environmental biology, plus the professional (paramedical) and pre-professional areas. Students majoring in areas of the Division of Biology are assigned advisors to assist in planning their academic programs. Course offerings and degree requirements are sufficiently broad to allow great flexibility in tailoring a program of study to the interests and needs of an individual student. Undergraduate curriculum planning, including choice of areas of emphasis and elective courses, is ultimately the responsibility of students in consultation with their advisors.

Pre-professional curricula

Students preparing to seek admission to veterinary, medical, dental, optometry, physical therapy, medical technology, and other professional schools may major in biology (or another discipline) provided the specific pre-professional requirements are met. Students should work with both an appropriate pre-professional advisor in the Pre-Professional and Exploratory Advising Center and a biology advisor in the College of Arts and Sciences dean's office to assure the proper planning of an academic program to meet their professional goals.

Students preparing to be biology teachers in secondary education are encouraged to pursue a degree program in the Division of Biology. Students should utilize both an advisor in the College of Education (regarding certification requirements and education courses) and a biology advisor.

Undergraduate research

The Division of Biology encourages exceptionally motivated students to participate in biology research, as a way of using information obtained in the classroom. This is especially encouraged for students intending to apply to graduate programs or professional programs following graduation. Students may receive course credit for these activities, which can be used to fill major elective requirements. Opportunities are available in the laboratories of individual faculty members, often with funding provided from research grants obtained by faculty efforts. Students may learn of these opportunities by discussion with faculty members having interests in biology which are similar to their own.

Bachelor of Arts

Biology (BA)

The Biology BA combines the study of biological sciences with the study of language. It provides an excellent foundation in biology for students wishing to have interdisciplinary careers, including in education, policy, and law. In addition to the requirements of the University and College of Arts and Sciences, students earning a biology BA must take courses indicated below to meet graduation requirements.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of

100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  OR
- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 4-9+ credit hours

Outside credential of at least 9 credit hours (May be from any unit, **except BIOL,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except BIOL) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Biology (BA) Major Requirements

The curriculum for this major assumes students enter college prepared to take Calculus.

Biology Requirements: 37-45 credit hours

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 529 - Ecology **Credits:** 3
- CHM 210 - Chemistry I **Credits:** 4

- CHM 230 - Chemistry II **Credits:** 4
- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
  Choose One Organic Chemistry Set:
- CHM 350 - General Organic Chemistry **Credits:** 3
  OR
- CHM 531 - Organic Chemistry I **Credits:** 3
  AND
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
  AND
- CHM 550 - Organic Chemistry II **Credits:** 3
  OR
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
  Choose One Math Course from the list below:
- MATH 100 - College Algebra **Credits:** 3
- MATH 150 - Plane Trigonometry **Credits:** 3
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  Choose One Physics Course from the list below:
- PHYS 113 - General Physics I **Credits:** 4
- PHYS 115 - Descriptive Physics **Credits:** 5
- PHYS 213 - Engineering Physics I **Credits:** 5
  Choose One Statistics Course from the list below:
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Major Electives: 15 credit hours

Select a total of 15 credit hours. No course used here can be used elsewhere.

- BIOL 365 - Practicum in Biology **Credits:** 1-4
  Note: No more than 2 credits from BIOL 365 can be used toward BIOL electives.
  Biology courses numbered 400 or above (other than BIOL 695 and BIOL 698).
  Biology course listing can be found in the University Course Catalog.
  Research Courses - Choose no more than 3 credit hours from the list below:
  Choose from the Course list below, no more than 3 credit hours from all Research Courses combined can be used toward BIOL electives.
- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3
- BAE 499 - Honors Research in Biological Systems Engineering **Credits:** 1-18
- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8

- CHE 497 - Undergraduate Research Experience **Credits:** 0-3
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- DMP 680 - Problems in Pathobiology **Credits:** 1-5
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- GEOG 497 - Undergraduate Research in Geography **Credits:** 1-3
- KIN 597 - Research Experience in Kinesiology **Credits:** 0-3
- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3

BA Arts, Humanities, and Social Sciences Restrictive Electives: 9 credit hours

3 credit hours in each of the following, with at least 6 credit hours at 300 level or above OR at any level with a prerequisite in the same discipline.

One course in Humanities: 3 credit hours

Any course or combination of courses in Fine Arts: 3 credit hours

One Non-Quantitative Social Science Course: 3 credit hours

Choose any Social course that does NOT have a MATH or STAT prereq.

BA Second Language Requirement: 3-16 credit hours

Choose one of the following:

Option 1: (3-14 credit hours)

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: (16 credit hours)

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: (3 credit hours)

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 3-8 credit hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative (at least one at the 300 level or with a prerequisite)

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Biology Degree)
- Additional Natural Science, Quantitative, or Quantitative Social Social: covered by Quantitative: BIOL 450

Bachelor of Science

Biology - Animal Biology (BS)

A degree in biology provides students with the skills to succeed in diverse careers and tackle the challenges faced by society. Biology is a valuable major for students going into human health and veterinary disciplines, and graduate programs ranging from molecular biology to organismal biology to ecology, as well as a diversity of bachelor's-level jobs. In addition to the curriculum requirements of the University and College of Arts and Sciences, students earning a biology BS must take courses indicated below and choose one of the seven tracks to complete.

Pre-vet option - Biology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Animal Biology, Cellular and Molecular Biology, Ecology and Evolutionary Biology, Human Health Biology, Integrative Biology, Plant Biology, or Computational Biology) and Biology Elective requirements, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  OR
- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 4-9+ credit hours

Outside credential of at least 9 credit hours (May be from any unit, **except for Biology** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for BIOL**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biology Requirements: 38-47 credit hours

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  KSC-030
- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  Alternatively, BIOCH 755, with BIOCH 765 recommended for students planning on further study in cellular or molecular areas of biology or in biochemistry.
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531, with CHM 550 recommended for students planning to attend medical school or to pursue further study in cellular or molecular areas of biology or in biochemistry.
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2

- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5
  Choose one course from the list below:
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CIS 200 - Programming Fundamentals **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 551 - Applied Matrix Theory **Credits:** 3
- MATH 615 - Introduction to Digital Image Processing **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3
- CC 110 - Introduction to Computing **Credits:** 2
  AND
- CC 111 - Elements of Computer Programming **Credits:** 1

Animal Biology Option: 12 credit hours

- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 513 - Physiological Adaptations of Animals **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3

Major Electives: 14 credit hours

Choose 14 credit hours from the lists below, including no more than 3 credits numbered 399 or lower. BIOL 255 Microbiology can be included and will not be counted toward the allowed 3 credits numbered 399 or lower. Must include one lab class. Courses used here may not be used elsewhere.

Biology courses (other than BIOL 695 and BIOL 698).
Biology course listing can be found in the University Course Catalog.
Research Courses - Choose no more than 3 credit hours from the list below:
Choose from the Course list below. No more than 3 credit hours from all Research Courses combined can be used toward BIOL electives.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3

BS Arts, Humanities, and Social Sciences Restrictive Electives: 6 credit hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities Course: 3 credit hours

Any course or combination of courses.

Non-Quantitative Social Science Course: 3 credit hours

Choose any social science course that does NOT have a MATH or STAT prereq

Free Electives: 5-10 credit hours

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Biology Degree)
- Quantitative: STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 (listed in Courses Required for the Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 450 (listed in Courses Required for the Biology Degree)

Biology - Computational Biology (BS)

A degree in biology provides students with the skills to succeed in diverse careers and tackle the challenges faced by society. Biology is a valuable major for students going into human health and veterinary disciplines, and graduate programs ranging from molecular biology to organismal biology to ecology, as well as a diversity of bachelor's-level jobs. In addition to the curriculum requirements of the University and College of Arts and Sciences, students earning a biology BS must take courses indicated below and choose one of the seven tracks to complete.

Pre-vet option - Biology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Animal Biology, Cellular and Molecular Biology, Ecology and Evolutionary Biology, Human Health Biology, Integrative Biology, Plant Biology, or Computational Biology) and Biology Elective requirements, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional

general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  OR
- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 4-9+ credit hours

Outside credential of at least 9 credit hours (May be from any unit except for Biology, OR approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for BIOL) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with the program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biology Requirements: 38-43 credit hours

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  KSC-030
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  Alternatively, BIOCH 755, with BIOCH 765 recommended for students planning on further study in cellular or molecular areas of biology or in biochemistry.
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531, with CHM 550 recommended for students planning to attend medical school or to pursue further study in cellular or molecular areas of biology or in biochemistry.
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5

Computational Biology Option: 30 credit hours

- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4
- CC 110 - Introduction to Computing **Credits:** 2
- CC 111 - Elements of Computer Programming **Credits:** 1
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CC 310 - Data Structures and Algorithms I **Credits:** 3
- CC 410 - Advanced Programming **Credits:** 4
- MATH 312 - Finite Applications of Mathematics **Credits:** 3
- CIS 531 - Introduction to Programming Techniques for Data Science and Analytics **Credits:** 3
  OR
  Choose two courses (6 credits) from BIOL, STAT, CC, CIS, or MATH at course level 400 or above
- CC 535 - Applied Data Science **Credits:** 3

Major Electives: 10 credit hours

Choose 10 credit hours from the lists below, including no more than 3 credits numbered 399 or lower. BIOL 221 Organismic Biology and BIOL 255 Microbiology can be included and will not be counted toward the allowed 3 credits numbered 399 or lower. Courses used here may not be used elsewhere.

Biology courses (other than BIOL 695 and BIOL 698).
Biology course listing can be found in the University Course Catalog.
Research Courses - Choose no more than 3 credit hours from the list below:

Choose from the Course list below. No more than 3 credit hours from all Research Courses combined can be used toward BIOL electives.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18

BS Arts, Humanities, and Social Sciences Restrictive Electives: 6 credit hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above **OR** at any level with a prerequisite in the same discipline.

Fine Arts or Humanities Course: 3 credit hours

Any course or combination of courses.

Non-Quantitative Social Science Course: 3 credit hours

Choose any social science course that does NOT have a MATH or STAT prereq

Free Electives: 5-10 credit hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Biology Degree)
- Quantitative: STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 (listed in Courses Required for the Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 450 (listed in Courses Required for the Biology Degree)

Biology - Human Health Biology (BS)

A degree in biology provides students with the skills to succeed in diverse careers and tackle the challenges faced by society. Biology is a valuable major for students going into human health and veterinary disciplines, and graduate programs ranging from molecular biology to organismal biology to ecology, as well as a diversity of bachelor's-level jobs. In addition to the curriculum requirements of the University and College of Arts and Sciences, students earning a biology BS must take courses indicated below and choose one of the seven tracks to complete.

Pre-vet option - Biology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Animal Biology, Cellular and Molecular Biology, Ecology and Evolutionary Biology, Human Health Biology, Integrative Biology, Plant Biology, or Computational Biology) and Biology Elective requirements, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  OR
- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 4-9+ credit hours

Outside credential of at least 9 credit hours (May be from any unit, except for Biology**,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for Biology) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biology Requirements: 38-47 credit hours

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  KSC-030
- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  Alternatively, BIOCH 755, with BIOCH 765 recommended for students planning on further study in cellular or molecular areas of biology or in biochemistry.
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531, with CHM 550 recommended for students planning to attend medical school or to pursue further study in cellular or molecular areas of biology or in biochemistry.
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5
  Choose one course from the list below:
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CIS 200 - Programming Fundamentals **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 551 - Applied Matrix Theory **Credits:** 3
- MATH 615 - Introduction to Digital Image Processing **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3
- CC 110 - Introduction to Computing **Credits:** 2
  AND

- CC 111 - Elements of Computer Programming **Credits:** 1

Human Health Biology Option: 15 credit hours

- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 441 - Human Body I **Credits:** 4
- BIOL 442 - Human Body II **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3

Major Electives: 11 credit hours

Choose 11 credit hours from the lists below, including no more than 3 credits numbered 399 or lower. BIOL 221 Organismic Biology can be included and will not be counted toward the allowed 3 credits numbered 399 or lower. Courses used here may not be used elsewhere.

Biology courses (other than BIOL 695 and BIOL 698).
Biology course listing can be found in the University Course Catalog.
Research Courses - Choose no more than 3 credit hours from the list below:
Choose from the Course list below. No more than 3 credit hours from all Research Courses combined can be used toward BIOL electives.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18

BS Arts, Humanities, and Social Sciences Restrictive Electives: 6 credit hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above **OR** at any level with a prerequisite in the same discipline.

Fine Arts or Humanities Course: 3 credit hours

Non-Quantitative Social Science Course: 3 credit hours

Choose any social science course that does NOT have a MATH or STAT prereq

Free Electives: 5-10 credit hours

In addition to the K-State Core Free Electives requirement, take any course so that the total number of credit hours completed is 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Biology Degree)
- Quantitative: STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 (listed in Courses Required for the Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Biology Degree)

- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 450 (listed in Courses Required for the Biology Degree)

Biology - Plant Biology (BS)

A degree in biology provides students with the skills to succeed in diverse careers and tackle the challenges faced by society. Biology is a valuable major for students going into human health and veterinary disciplines, and graduate programs ranging from molecular biology to organismal biology to ecology, as well as a diversity of bachelor's-level jobs. In addition to the curriculum requirements of the University and College of Arts and Sciences, students earning a biology BS must take courses indicated below and choose one of the seven tracks to complete.

Pre-vet option - Biology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Animal Biology, Cellular and Molecular Biology, Ecology and Evolutionary Biology, Human Health Biology, Integrative Biology, Plant Biology, or Computational Biology) and Biology Elective requirements, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 credit hour

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  OR
- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 4-9+ credit hours

Outside credential of at least 9 credit hours (May be from any unit **except for Biology** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for BIOL**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] credit hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Biology Requirements: 38-47 credit hours

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  KSC-030
- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  Alternatively, BIOCH 755, with BIOCH 765 recommended for students planning on further study in cellular or molecular areas of biology or in biochemistry.
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531, with CHM 550 recommended for students planning to attend medical school or to pursue further study in cellular or molecular areas of biology or in biochemistry.
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5
  Choose one course from the list below:

- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CIS 200 - Programming Fundamentals **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 551 - Applied Matrix Theory **Credits:** 3
- MATH 615 - Introduction to Digital Image Processing **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3
- CC 110 - Introduction to Computing **Credits:** 2
  AND
- CC 111 - Elements of Computer Programming **Credits:** 1

Plant Biology Option: 15 credit hours

- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 500 - Plant Physiology **Credits:** 3
- BIOL 551 - Taxonomy of Flowering Plants **Credits:** 4
  Choose one course (at least 3 credits) from the list below:
- BIOL 461 - Phage Hunters I **Credits:** 3
- BIOL 676 - Molecular Genetics Laboratory **Credits:** 3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8

Major Electives: 11 credit hours

Choose 11 credit hours from the lists below, including no more than 3 credits numbered 399 or lower. BIOL 255 Microbiology can be included and will not be counted toward the allowed 3 credits numbered 399 or lower. Must include two lab classes. Courses used here may not be used elsewhere.

Biology courses (other than BIOL 695 and BIOL 698).
Biology course listing can be found in the University Course Catalog.
Research Courses - Choose no more than 3 credit hours from the list below:
Choose from the Course list below. No more than 3 credit hours from all Research Courses combined can be used toward BIOL electives.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3
- BAE 499 - Honors Research in Biological Systems Engineering **Credits:** 1-18
- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- CHE 497 - Undergraduate Research Experience **Credits:** 0-3
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1

- DMP 680 - Problems in Pathobiology **Credits:** 1-5
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- GEOG 497 - Undergraduate Research in Geography **Credits:** 1-3
- KIN 597 - Research Experience in Kinesiology **Credits:** 0-3
- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3
- PSYCH 599 - Research in Psychology **Credits:** 0-18
- WOEM 495 - Undergraduate Research in Wildlife and Outdoor Enterprise Management **Credits:** 0-3

Courses From Other Departments (except research courses):

Choose from the Course list below. No more than 6 credits that can be used from "Courses From Other Departments (except research courses)". Research courses do not count toward 6 credit total limit.

- AGCOM 712 - Environmental Communication **Credits:** 3

- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 450 (listed in Courses Required for the Biology Degree)

Fisheries, Wildlife, Conservation, and Environmental Biology - Conservation Biology (BS)

A degree in fisheries, wildlife, conservation, or environmental biology provides a strong biological background allowing graduates to contribute to managing and protecting the natural world. In addition to the requirements of the University and the College of Arts and Sciences, Fisheries, Wildlife, Conservation, and Environmental Biology majors must take the courses indicated below and choose one of the four tracks to complete. Students who wish to qualify for professional certification as fisheries or wildlife biologists should consult their academic advisors about specific courses needed for certification.

Pre-vet option - Fisheries, Wildlife, Conservation, and Environmental Biology

Students who complete K-State Core, College of Arts and Sciences Program requirements and the Fisheries, Wildlife, Conservation, and Environmental Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Fisheries Ecology and Management, Wildlife Ecology and Management, Conservation Biology,

or Environmental Biology) and Fisheries, Wildlife, Conservation, and Environmental Biology electives, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Fisheries, Wildlife, Conservation, and Environmental Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

BS Arts, Humanities, and Social Sciences Restrictive Electives: (6 credit hours)

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: (3 credit hours)

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq: (3 credit hours)

Free Electives: (1-4 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Required Courses for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Quantitative: STAT 225, STAT 240, STAT 250, or STAT 703 (listed in Required Courses for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq (4 credit hours): CHM 230 or CHM 250 (listed in Required Courses for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq (3 credit hours): BIOL 333 (listed in Required Courses for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)

Fisheries, Wildlife, Conservation, and Environmental Biology - Environmental Biology (BS)

A degree in fisheries, wildlife, conservation, or environmental biology provides a strong biological background allowing graduates to contribute to managing and protecting the natural world. In addition to the requirements of the University and the College of Arts and Sciences, Fisheries, Wildlife, Conservation, and Environmental Biology majors must take the courses indicated below and choose one of the four tracks to complete. Students who wish to qualify for professional certification as fisheries or wildlife biologists should consult their academic advisors about specific courses needed for certification.

Pre-vet option - Fisheries, Wildlife, Conservation, and Environmental Biology

Students who complete K-State Core, College of Arts and Sciences Program requirements and the Fisheries, Wildlife, Conservation, and Environmental Biology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (Fisheries Ecology and Management, Wildlife Ecology and Management, Conservation Biology, or Environmental Biology) and Fisheries, Wildlife, Conservation, and Environmental Biology electives, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Fisheries, Wildlife, Conservation, and Environmental Biology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional

general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: (1 credit hour)

Alternatively, DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation

- BIOL 100 - Biology First-Year Orientation **Credits:** 1

Outside Concentration: (4-9+ credit hours)

Outside credential of at least 9 credit hours (May be from any unit, except Biology OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for BIOL) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

Required Program Courses: (44-48 credit hours)

Credit total assumes MATH 100, MATH 150, or MATH 220 counted as part of K-State Core #3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 333 - Introduction to Fisheries, Wildlife, Conservation and Environmental Biology **Credits:** 3
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 529 - Ecology **Credits:** 3
- BIOL 632 - Ecology Laboratory **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
  Alternatively, CHM 220

- CHM 230 - Chemistry II **Credits:** 4
  Alternatively, CHM 250
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531 with CHM 550 recommended additionally
  AND
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  Alternatively, CHM 532
  OR
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- MATH 100 - College Algebra **Credits:** 3
  OR
- MATH 150 - Plane Trigonometry **Credits:** 3
  OR

  Alternatively, PHYS 213
  AND
- PHYS 114 - General Physics II **Credits:** 4
  Alternatively, PHYS 214
  OR
- PHYS 115 - Descriptive Physics **Credits:** 5

Choose one of the following: 3 credit hours

- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 250 - Business and Economic Statistics I **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Choose one of the following: 3 credit hours

- STAT 341 - Biometrics II **Credits:** 3
- STAT 351 - Business and Economic Statistics II **Credits:** 3
- STAT 705 - Regression and Analysis of Variance **Credits:** 3

Required for Environmental Biology option: (15 credit hours)

3 credits from any BIOL course at the 400-level or above
AND
12 credits from the following list, including at least two laboratory courses:

- BIOL 435 - Environmental Biology **Credits:** 3
- BIOL 500 - Plant Physiology **Credits:** 3
- BIOL 501 - Plant Physiology Lab **Credits:** 1
- BIOL 510 - Developmental Biology **Credits:** 3
- BIOL 513 - Physiological Adaptations of Animals **Credits:** 4
- BIOL 515 - Behavioral Ecology **Credits:** 3
- BIOL 520 - Evolution **Credits:** 3
  OR

- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOL 612 - Freshwater Ecology **Credits:** 4
- BIOL 640 - Population Biology **Credits:** 3
- BIOL 642 - Principles of Conservation Biology **Credits:** 3
- BIOL 682 - Fish Ecology **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4

Major Electives (12 credit hours)

Choose 12 credit hours from the lists below. No more than 3 credits below the 400-level. Courses used here may not be used elsewhere.

Biology courses numbered 400 or above (other than BIOL 695 and BIOL 698). *Biology course listing can be found in the University Course Catalog.*

- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 263 - Ecology of Environmental Problems **Credits:** 3
  Only 1 credit from BIOL 263 can be used toward FWCEB electives.
- BIOL 365 - Practicum in Biology **Credits:** 1-4
  No more than 2 credits from BIOL 365 can be used toward FWCEB electives.
  Research Courses. *A total of up to 3 credits from all Research Courses combined can be used toward FWCEB electives.*
- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18

Outside credential of at least 9 credit hours (May be from any unit, except Biology OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for BIOL) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

Required Program Courses (44-48 credit hours)

Credit total assumes MATH 100, MATH 150, or MATH 220 counted as part of K-State Core #3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 221 - Organismic Biology **Credits:** 5
- BIOL 333 - Introduction to Fisheries, Wildlife, Conservation and Environmental Biology **Credits:** 3
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 529 - Ecology **Credits:** 3
- BIOL 632 - Ecology Laboratory **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
  Alternatively, CHM 220
- CHM 230 - Chemistry II **Credits:** 4
  Alternatively, CHM 250
- CHM 350 - General Organic Chemistry **Credits:** 3
  Alternatively, CHM 531 with CHM 550 recommended additionally
  AND
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  Alternatively, CHM 532
  OR
- BIOCH 265 - Introductory Organic and Biochemistry **Credits:** 5
- MATH 100 - College Algebra **Credits:** 3
  OR
- MATH 150 - Plane Trigonometry **Credits:** 3
  OR
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- PHYS 113 - General Physics I **Credits:** 4
  Alternatively, PHYS 213
  AND
- PHYS 114 - General Physics II **Credits:** 4
  Alternatively, PHYS 214
  OR
- PHYS 115 - Descriptive Physics **Credits:** 5

Choose one of the following: 3 credit hours

- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 250 - Business and Economic Statistics I **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Choose one of the following: 3 credit hours

- STAT 341 - Biometrics II **Credits:** 3
- STAT 351 - Business and Economic Statistics II **Credits:** 3
- STAT 705 - Regression and Analysis of Variance **Credits:** 3

Courses Required for Wildlife Ecology and Management option: (21 credit hours)

- BIOL 513 - Physiological Adaptations of Animals **Credits:** 4
- BIOL 543 - Ornithology **Credits:** 3
- BIOL 544 - Mammalogy **Credits:** 3
- BIOL 551 - Taxonomy of Flowering Plants **Credits:** 4
- BIOL 640 - Population Biology **Credits:** 3
- BIOL 684 - Wildlife Management and Techniques **Credits:** 4

Major Electives: (6 credit hours)

Choose 6 credit hours from the lists below. Courses used here may not be used elsewhere.

Biology courses numbered 400 or above (other than BIOL 695 and BIOL 698). *Biology course listing can be found in the University Course Catalog.*

- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 263 - Ecology of Environmental Problems **Credits:** 3
  Only 1 credit from BIOL 263 can be used toward FWCEB electives.
- BIOL 365 - Practicum in Biology **Credits:** 1-4
  No more than 2 credits from BIOL 365 can be used toward FWCEB electives.

Research Courses. *A total of up to 3 credits from all Research Courses combined can be used toward FWCEB electives.*

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- GEOG 497 - Undergraduate Research in Geography **Credits:** 1-3
- WOEM 495 - Undergraduate Research in Wildlife and Outdoor Enterprise Management **Credits:** 0-3

Courses From Other Departments (except research courses). *No more than 6 credits can be used from "Courses From Other Departments (except research courses)".*

- AGCOM 712 - Environmental Communication **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGRON 205 - Soils **Credits:** 3
- AGRON 251 - Range Management **Credits:** 3
- AGRON 335 - Environmental Quality **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1
- AGRON 660 - Grassland Monitoring and Assessment **Credits:** 2
- AGRON 661 - Grassland Monitoring and Assessment Lab **Credits:** 1
- AGRON 680 - Plant Genetics **Credits:** 3
- AGRON 681 - Range Ecology **Credits:** 3
- AGRON 682 - Grassland Fire Ecology **Credits:** 3
- AGRON 695 - Climate Change and Agriculture **Credits:** 3

- AGRON 781 - Ecology of Invasive Species **Credits:** 3
- ASI 218 - Fundamentals of Nutrition **Credits:** 3
- ASI 533 - Physiology of Domestic Animals **Credits:** 3
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- ASI 560 - Course-Based Undergraduate Research in Animal Sciences & Industry **Credits:** 2
- BIOCH 521 - General Biochemistry **Credits:** 3
- CHM 315 - Environmental Science: A Chemistry Perspective **Credits:** 3
- ECON 527 - Environmental Economics **Credits:** 3
- ENTOM 312 - General Entomology **Credits:** 3
- ENTOM 625 - Integrative Behavioral Ecology **Credits:** 3
- ENTOM 635 - Insect Evolution **Credits:** 3
- ENTOM 660 - Introduction to Insect Genetics **Credits:** 3
- ENTOM 675 - Introduction to Insect Physiology **Credits:** 3
- ENTOM 692 - Insect Ecology **Credits:** 3
- ENTOM 695 - Insect Taxonomy **Credits:** 3
- GEOG 445 - Biogeography **Credits:** 3
- GEOG 460 - Human Dimensions of Global Change **Credits:** 3
- GEOG 508 - Geographic Information Systems I **Credits:** 4
- GEOG 605 - Remote Sensing of the Environment **Credits:** 3
- GEOG 608 - Geographic Information Systems II **Credits:** 3
- GEOG 761 - Human Impact on the Environment **Credits:** 3
- GEOL 650 - Geomicrobiology **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- PHILO 595 - Environmental Ethics **Credits:** 3
- WOEM 400 - Pond and Sportfish Management **Credits:** 3
- WOEM 555 - Big Game Management **Credits:** 3
- WOEM 560 - Upland Game Bird Management **Credits:** 3
- WOEM 561 - Waterfowl and Wetlands Management **Credits:** 3
- WOEM 562 - Advanced Wildlife Habitat Management **Credits:** 4
- WOEM 620 - Human-Wildlife Conflicts **Credits:** 3

BS Arts, Humanities, and Social Sciences Restrictive Electives: (6 credit hours)

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: (3 credit hours)

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq: (3 credit hours)

Free Electives: (1-4 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Quantitative: STAT 225, STAT 240, STAT 250, or STAT 703 (listed in Courses Required for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Fisheries, Wildlife, Conservation, and Environmental Biology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 333 (listed in Courses Required for the Wildlife Ecology and Management Option)

Microbiology - General Microbiology (BS)

A degree in microbiology provides an excellent foundation for students moving directly into the job market, going into medical, dental, medical technology, and veterinary programs, or going into graduate programs in the biological sciences. Students can choose electives in prokaryotic microbiology, eukaryotic microbiology, biotechnology/genetic engineering, immunology, and infectious diseases. In addition to the requirements of the University and the College of Arts and Sciences, Microbiology majors must take the courses indicated below and choose one of the following two tracks to complete: General or Medical Microbiology.

Pre-vet option - Microbiology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Microbiology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (General Microbiology or Medical Microbiology) and Microbiology Electives, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Microbiology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: (1 credit hour)

- BIOL 100 - Biology First-Year Orientation **Credits:** 1
  Alternatively, DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation

Outside Concentration: (4-9+ credit hours)

Outside credential of at least 9 credit hours (May be from any unit **except for Biology** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix **except for BIOL** (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Required for the Microbiology Degree: (45-49 credit hours)

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  OR
- BIOCH 755 - Biochemistry I **Credits:** 3
  Alternatively, BIOCH 755 with BIOCH 765 recommended additionally but not required
- BIOCH 765 - Biochemistry II **Credits:** 3
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  OR
- CHM 531 - Organic Chemistry I **Credits:** 3
  Alternatively, CHM 531 with CHM 550 recommended additionally but not required

- CHM 550 - Organic Chemistry II **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  OR
- MATH 250 - Mathematical Scholars Calculus 1 **Credits:** 4
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
- PHYS 214 - Engineering Physics II **Credits:** 5

Choose one course from the following (credit hours included in total Required for the Microbiology Degree)

Choose one course from the following for 3-4 Credit Horus (CC 110 and CC 111 must be taken together to meet this requirement)

- CC 110 - Introduction to Computing **Credits:** 2
  AND
- CC 111 - Elements of Computer Programming **Credits:** 1
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CIS 200 - Programming Fundamentals **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 551 - Applied Matrix Theory **Credits:** 3
- MATH 615 - Introduction to Digital Image Processing **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Required for the General Microbiology option: (9 credit hours)

- BIOL 520 - Evolution **Credits:** 3
  OR
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOL 675 - Genetics of Microorganisms **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3

Major Electives for the Microbiology Degree: (11 credit hours)

Choose 11 credit hours from the lists below. At least 5 of the 11 credit hours must be laboratory. No more than 6 credits can be counted from courses outside of BIOL (**Research Courses** do not count toward this limit). Courses used here may not be used elsewhere.

Courses in this section count as all lecture credit (0 toward lab credit).

- BIOL 365 - Practicum in Biology **Credits:** 1-4
  No more than 2 credits from BIOL 365 can be used toward MICRO electives
- BIOL 410 - Biology of the Cancer Cell **Credits:** 3
- BIOL 462 - Phage Hunters 2 **Credits:** 2
- BIOL 495 - Topics in Biology **Credits:** 1-6
  OR
- BIOL 697 - Topics in Biology **Credits:** 1-6
  No more than 3 credit hours from BIOL 495 plus BIOL 697 can be used toward MICRO electives.
- BIOL 520 - Evolution **Credits:** 3
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOL 545 - Human Parasitology **Credits:** 3
- BIOL 580 - Molecular Biology of Genes and Genomes **Credits:** 3
- BIOL 609 - Cellular and Molecular Biology of Human Diseases **Credits:** 3
- BIOL 670 - Immunology **Credits:** 3
- BIOL 675 - Genetics of Microorganisms **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- BIOL 705 - Eukaryotic Genetics **Credits:** 3
- BIOL 707 - Advanced Cell Biology **Credits:** 3
- BIOL 730 - General Virology **Credits:** 3
- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4
- AGRON 610 - Biotechnology **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- AP 711 - Stem Cells and Comparative Biomedicine **Credits:** 2
- ASI 218 - Fundamentals of Nutrition **Credits:** 3
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- BAE 445 - Biological Engineering Fundamentals **Credits:** 3
- BIOCH 571 - Medical Biochemistry **Credits:** 3
- BIOCH 755 - Biochemistry I **Credits:** 3
- BIOCH 765 - Biochemistry II **Credits:** 3
- BIOCH 775 - Molecular Biophysics **Credits:** 3
- DMP 691 - Introduction to High Containment Laboratory Topics and Techniques **Credits:** 3
- DMP 710 - Introduction to One Health **Credits:** 2
- DMP 754 - Introduction to Epidemiology **Credits:** 3
- DMP 770 - Emerging Diseases **Credits:** 3
- ENTOM 649 - Introduction to Arthropod Vectors of Human Pathogens **Credits:** 3
- FDSCI 600 - Food Microbiology **Credits:** 2
- FNDH 654 - Pathophysiology and Clinical Evaluation **Credits:** 3
- GEOL 650 - Geomicrobiology **Credits:** 3
- PLPTH 610 - Biotechnology **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3
  Courses in this section count 1 credit toward lab credit.
- BIOL 441 - Human Body I **Credits:** 4
- BIOL 530 - Pathogenic Microbiology **Credits:** 3
- BIOL 546 - Human Parasitology Laboratory **Credits:** 1
- BIOL 604 - Biology of the Fungi **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1

- ASI 560 - Course-Based Undergraduate Research in Animal Sciences & Industry **Credits:** 2
- BIOCH 757 - NMR Laboratory **Credits:** 1
- BIOCH 758 - Protein Structure Laboratory **Credits:** 1
- BIOCH 766 - Recombinant DNA Laboratory I **Credits:** 1
- BIOCH 767 - Recombinant DNA Laboratory II **Credits:** 1
- DMP 690 - Essential Practices for BSL-3 Research Settings **Credits:** 1
- PLPTH 500 - Principles of Plant Pathology **Credits:** 3
- PLPTH 585 - Crop Diseases **Credits:** 2

  Courses in this section count 2 credits toward lab credit.
- BIOL 461 - Phage Hunters I **Credits:** 3
- BIOL 671 - Immunology Lab **Credits:** 2
- BIOCH 756 - Biochemistry I Laboratory **Credits:** 2
- ENTOM 652 - Introduction to Insect Molecular Techniques **Credits:** 2
- FDSCI 601 - Food Microbiology Lab **Credits:** 2

  Courses in this section count 3 credits toward lab credit.
- BIOL 676 - Molecular Genetics Laboratory **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3

  Research Courses: A total of up to 3 credits from all Research Courses combined can be used toward MICRO lab electives.
- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3
- BAE 499 - Honors Research in Biological Systems Engineering **Credits:** 1-18
- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- CHE 497 - Undergraduate Research Experience **Credits:** 0-3
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- DMP 680 - Problems in Pathobiology **Credits:** 1-5
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3

BS Arts, Humanities, and Social Sciences Restricted Electives: (6 credit hours)

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: (3 credit hours)

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq: (3 credit hours)

Free Electives: (4-9 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Microbiology Degree)
- Quantitative: STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 (listed in Courses Required for the Microbiology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Microbiology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 255 (listed in Courses Required for the Microbiology Degree)

Microbiology - Medical Microbiology (BS)

A degree in microbiology provides an excellent foundation for students moving directly into the job market, going into medical, dental, medical technology, and veterinary programs, or going into graduate programs in the biological sciences. Students can choose electives in prokaryotic microbiology, eukaryotic microbiology, biotechnology/genetic engineering, immunology, and infectious diseases. In addition to the requirements of the University and the College of Arts and Sciences, Microbiology majors must take the courses indicated below and choose one of the following two tracks to complete: General or Medical Microbiology.

Pre-vet option - Microbiology

Students who complete the K-State Core, College of Arts and Sciences Program requirements and Microbiology Major Requirements, with the exception of up to 15 credit hours from courses under their declared degree sub-option (General Microbiology or Medical Microbiology) and Microbiology Electives, and have a minimum of 90 undergraduate credit hours prior to enrolling in the College of Veterinary Medicine at K-State, may earn a Microbiology degree after successful completion of at least 30 credit hours in veterinary medical school.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: (1 credit hour)

Alternatively, DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation

- BIOL 100 - Biology First-Year Orientation **Credits:** 1

Outside Concentration: (4-9+ credit hours)

Outside credential of at least 9 credit hours (May be from any unit, **except for Biology** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for BIOL**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Program

The curriculum for this major assumes students enter college prepared to take Calculus.

Required for the Microbiology Degree: (45-49 credit hours)

Credit total assumes MATH 220 counted as part of the K-State Core 3

- BIOL 198 - Principles of Biology **Credits:** 4
- BIOL 255 - General Microbiology **Credits:** 4
- BIOL 398 - Principles of Genetics **Credits:** 4
- BIOL 541 - Cell Biology **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
  OR
- BIOCH 755 - Biochemistry I **Credits:** 3
  Alternatively, BIOCH 755 with BIOCH 765 recommended additionally but not required
- BIOCH 756 - Biochemistry I Laboratory **Credits:** 2
- CHM 210 - Chemistry I **Credits:** 4
  OR
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 230 - Chemistry II **Credits:** 4
  OR
- CHM 250 - Honors Chemistry II **Credits:** 5
- CHM 350 - General Organic Chemistry **Credits:** 3
  OR

- CHM 531 - Organic Chemistry I **Credits:** 3
  Alternatively, CHM 531 with CHM 550 recommended additionally but not required
- CHM 550 - Organic Chemistry II **Credits:** 3
- CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
  OR
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
  OR
- MATH 250 - Mathematical Scholars Calculus 1 **Credits:** 4
- PHYS 113 - General Physics I **Credits:** 4
  OR
- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 114 - General Physics II **Credits:** 4
  OR
  A class chosen from STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 for at least 3 Credit Hours
- PHYS 214 - Engineering Physics II **Credits:** 5

Choose one course from the following (credit hours included in total Required for the Microbiology Degree)

Choose one course from the following for 3-4 Credit Horus (CC 110 and CC 111 must be taken together to meet this requirement)

- CC 110 - Introduction to Computing **Credits:** 2
  AND
- CC 111 - Elements of Computer Programming **Credits:** 1
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CIS 200 - Programming Fundamentals **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 551 - Applied Matrix Theory **Credits:** 3
- MATH 615 - Introduction to Digital Image Processing **Credits:** 3
- STAT 225 - Introduction to Statistics **Credits:** 3
- STAT 240 - Biometrics I **Credits:** 3
- STAT 701 - Fundamental Methods of Biostatistics **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Required for the Medical Microbiology option: (9 credit hours)

BIOL 670 required for 3 Credit Hours; Students may then select two of the other 3 credit hour courses from the list

- BIOL 670 - Immunology **Credits:** 3
  Two of the following:
- BIOL 530 - Pathogenic Microbiology **Credits:** 3
- BIOL 545 - Human Parasitology **Credits:** 3
- BIOL 675 - Genetics of Microorganisms **Credits:** 3
- BIOL 730 - General Virology **Credits:** 3

Major Electives for the Microbiology Degree: (11 credit hours)

Choose 11 credit hours from the lists below. At least 5 of the 11 credit hours must be laboratory. No more than 6 credits can be counted from courses outside of BIOL (**Research Courses** do not count toward this limit). Courses used here may not be used elsewhere.

Courses in this section count as all lecture credit (0 toward lab credit).

- BIOL 365 - Practicum in Biology **Credits:** 1-4
  No more than 2 credits from BIOL 365 can be used toward MICRO electives
- BIOL 410 - Biology of the Cancer Cell **Credits:** 3
- BIOL 462 - Phage Hunters 2 **Credits:** 2
- BIOL 495 - Topics in Biology **Credits:** 1-6
  OR
- BIOL 697 - Topics in Biology **Credits:** 1-6
  No more than 3 credit hours from BIOL 495 plus BIOL 697 can be used toward MICRO electives.
- BIOL 520 - Evolution **Credits:** 3
- BIOL 521 - Evolution of Infectious Diseases **Credits:** 3
- BIOL 545 - Human Parasitology **Credits:** 3
- BIOL 580 - Molecular Biology of Genes and Genomes **Credits:** 3
- BIOL 609 - Cellular and Molecular Biology of Human Diseases **Credits:** 3
- BIOL 670 - Immunology **Credits:** 3
- BIOL 675 - Genetics of Microorganisms **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- BIOL 705 - Eukaryotic Genetics **Credits:** 3
- BIOL 707 - Advanced Cell Biology **Credits:** 3
- BIOL 730 - General Virology **Credits:** 3
- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4
- AGRON 610 - Biotechnology **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- AP 711 - Stem Cells and Comparative Biomedicine **Credits:** 2
- ASI 218 - Fundamentals of Nutrition **Credits:** 3
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- BAE 445 - Biological Engineering Fundamentals **Credits:** 3
- BIOCH 571 - Medical Biochemistry **Credits:** 3
- BIOCH 755 - Biochemistry I **Credits:** 3
- BIOCH 765 - Biochemistry II **Credits:** 3
- BIOCH 775 - Molecular Biophysics **Credits:** 3
- DMP 691 - Introduction to High Containment Laboratory Topics and Techniques **Credits:** 3

- BIOCH 767 - Recombinant DNA Laboratory II **Credits:** 1
- DMP 690 - Essential Practices for BSL-3 Research Settings **Credits:** 1
- PLPTH 500 - Principles of Plant Pathology **Credits:** 3
- PLPTH 585 - Crop Diseases **Credits:** 2

Courses in this section count 2 credits toward lab credit.

- BIOL 461 - Phage Hunters I **Credits:** 3
- BIOL 671 - Immunology Lab **Credits:** 2
- BIOCH 756 - Biochemistry I Laboratory **Credits:** 2
- ENTOM 652 - Introduction to Insect Molecular Techniques **Credits:** 2
- FDSCI 601 - Food Microbiology Lab **Credits:** 2

Courses in this section count 3 credits toward lab credit.

- BIOL 676 - Molecular Genetics Laboratory **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3

Research Courses: A total of up to 3 credits from all Research Courses combined can be used toward MICRO lab electives.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3
- BAE 499 - Honors Research in Biological Systems Engineering **Credits:** 1-18
- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- CHE 497 - Undergraduate Research Experience **Credits:** 0-3
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- DMP 680 - Problems in Pathobiology **Credits:** 1-5
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3

BS Arts, Humanities, and Social Sciences Restricted Electives: (6 credit hours)

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: (3 credit hours)

Non-Quantitative Social Science: Any social science course that does Not have a MATH or STAT prereq: (3 credit hours)

Free Electives: (4-9 credit hours)

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BS are satisfied by the following:

Natural and Quantitative

- Natural Science: CHM 210 or CHM 220 (listed in Courses Required for the Microbiology Degree)
- Quantitative: STAT 225, STAT 240, STAT 701, STAT 703; MATH 221, MATH 551, MATH 615; CC 110 plus CC 111, CC 210; CIS 200 (listed in Courses Required for the Microbiology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) CHM 230 or CHM 250 (listed in Courses Required for the Microbiology Degree)
- Natural Science, or Quantitative, or Social Science w/MATH or STAT prereq: (3 credit hours) BIOL 255 (listed in Courses Required for the Medical Microbiology Degree Option)

Minor

Biology Minor

Biology is the study of life. A minor in biology covers biology basics and provides the opportunity to explore a biological area or areas of interest.

Program requirements

The Biology minor requires 17 credits in addition to BIOL 198. At least 11 of the 17 credits must be from BIOL courses (List 1). Up to 3 credit hours of Research Credits (List 2) may count toward the minor. Up to 3 credit hours of Courses From Other Departments (except research courses) (List 3) may count toward the minor. Note that this means that only 3 credit hours of List 3 courses that are 4 credit hours or above will be counted. No more than 6 hours of transfer course work can count toward the minor.

Required Courses (4 credit hours)

- BIOL 198 - Principles of Biology **Credits:** 4

Biology Courses (at least 11 credit hours)

Any BIOL course (other than BIOL 198, BIOL 695 or BIOL 698). Biology course listing can be found in the University Course Catalog.

Research Courses - Choose no more than 3 credit hours from the list below.

Choose from the course list below. No more than 3 credit hours from all Research Courses combined can be used toward the biology minor.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- AP 790 - Problems in Anatomy and Physiology **Credits:** 1-18
- ASI 561 - Undergraduate Research in Animal Sciences & Industry **Credits:** 0-3
- BAE 497 - Undergraduate Research Experience **Credits:** 0-3
- BAE 499 - Honors Research in Biological Systems Engineering **Credits:** 1-18
- BIOCH 599 - Research Training in Biochemistry **Credits:** 1-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- BIOL 698 - Research in Biology **Credits:** 0-8
- CHE 497 - Undergraduate Research Experience **Credits:** 0-3
- CHM 497 - Research in Undergraduate Chemistry **Credits:** 1-3
- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- DAS 506 - Undergraduate Cancer Research **Credits:** 1
- DMP 680 - Problems in Pathobiology **Credits:** 1-5
- ENTOM 399 - Undergraduate Research Experience **Credits:** 0-3
- ENTOM 482 - Research Experience in Entomology **Credits:** 1-3
- GEOG 497 - Undergraduate Research in Geography **Credits:** 1-3
- KIN 597 - Research Experience in Kinesiology **Credits:** 0-3
- PLPTH 495 - Undergraduate Research in Plant Pathology **Credits:** 0-3
- PSYCH 599 - Research in Psychology **Credits:** 0-18
- WOEM 495 - Undergraduate Research in Wildlife and Outdoor Enterprise Management **Credits:** 0-3

Courses From Other Departments (except research courses)

Choose from the course list below. No more than 3 credits can be used from Courses From Other Departments (except research courses). Research courses do not count toward 3 credit total limit.

- AGCOM 712 - Environmental Communication **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- AGRON 205 - Soils **Credits:** 3
- AGRON 251 - Range Management **Credits:** 3
- AGRON 335 - Environmental Quality **Credits:** 3
- AGRON 610 - Biotechnology **Credits:** 3
- AGRON 620 - Applied Crop Physiology **Credits:** 3
- AGRON 630 - Crop Improvement and Biotechnology **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1
- AGRON 660 - Grassland Monitoring and Assessment **Credits:** 2
- AGRON 661 - Grassland Monitoring and Assessment Lab **Credits:** 1
- AGRON 680 - Plant Genetics **Credits:** 3

- AGRON 681 - Range Ecology **Credits:** 3
- AGRON 682 - Grassland Fire Ecology **Credits:** 3
- AGRON 695 - Climate Change and Agriculture **Credits:** 3
- AGRON 781 - Ecology of Invasive Species **Credits:** 3
- AP 600 - Introduction to Pharmacology for Health Professionals **Credits:** 3
- AP 641 - Histology for Health Professions **Credits:** 3
- AP 711 - Stem Cells and Comparative Biomedicine **Credits:** 2
- ASI 218 - Fundamentals of Nutrition **Credits:** 3
- ASI 533 - Physiology of Domestic Animals **Credits:** 3
- ASI 540 - Principles of Animal Disease Control **Credits:** 3
- ASI 560 - Course-Based Undergraduate Research in Animal Sciences & Industry **Credits:** 2
- ASI 658 - Animal Growth and Development **Credits:** 3
- BAE 445 - Biological Engineering Fundamentals **Credits:** 3
- BIOCH 521 - General Biochemistry **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3
- BIOCH 571 - Medical Biochemistry **Credits:** 3
- BIOCH 755 - Biochemistry I **Credits:** 3
- BIOCH 756 - Biochemistry I Laboratory **Credits:** 2
- BIOCH 757 - NMR Laboratory **Credits:** 1
- BIOCH 758 - Protein Structure Laboratory **Credits:** 1
- BIOCH 765 - Biochemistry II **Credits:** 3
- BIOCH 766 - Recombinant DNA Laboratory I **Credits:** 1
- BIOCH 767 - Recombinant DNA Laboratory II **Credits:** 1
- BIOCH 775 - Molecular Biophysics **Credits:** 3
- CHM 315 - Environmental Science: A Chemistry Perspective **Credits:** 3
- DMP 690 - Essential Practices for BSL-3 Research Settings **Credits:** 1
- DMP 691 - Introduction to High Containment Laboratory Topics and Techniques **Credits:** 3
- DMP 710 - Introduction to One Health **Credits:** 2
- DMP 754 - Introduction to Epidemiology **Credits:** 3
- DMP 770 - Emerging Diseases **Credits:** 3
- ECON 527 - Environmental Economics **Credits:** 3
- ENTOM 312 - General Entomology **Credits:** 3
- ENTOM 625 - Integrative Behavioral Ecology **Credits:** 3
- ENTOM 630 - Introduction to Molecular Entomology **Credits:** 2
- ENTOM 635 - Insect Evolution **Credits:** 3
- ENTOM 649 - Introduction to Arthropod Vectors of Human Pathogens **Credits:** 3
- ENTOM 652 - Introduction to Insect Molecular Techniques **Credits:** 2
- ENTOM 660 - Introduction to Insect Genetics **Credits:** 3
- ENTOM 675 - Introduction to Insect Physiology **Credits:** 3
- ENTOM 692 - Insect Ecology **Credits:** 3
- ENTOM 695 - Insect Taxonomy **Credits:** 3
- FDSCI 600 - Food Microbiology **Credits:** 2
- FDSCI 601 - Food Microbiology Lab **Credits:** 2
- FNDH 400 - Human Nutrition **Credits:** 3
- FNDH 620 - Nutrient Metabolism **Credits:** 3
- FNDH 654 - Pathophysiology and Clinical Evaluation **Credits:** 3

- GEOG 445 - Biogeography **Credits:** 3
- GEOG 460 - Human Dimensions of Global Change **Credits:** 3
- GEOG 508 - Geographic Information Systems I **Credits:** 4
- GEOG 605 - Remote Sensing of the Environment **Credits:** 3
- GEOG 608 - Geographic Information Systems II **Credits:** 3
- GEOG 761 - Human Impact on the Environment **Credits:** 3
- GEOL 650 - Geomicrobiology **Credits:** 3
- KIN 601 - Cardiorespiratory Physiology **Credits:** 3
- KIN 603 - Cardiovascular Physiology **Credits:** 3
- KIN 607 - Muscle Physiology **Credits:** 3
- KIN 609 - Environmental Physiology **Credits:** 3
- KIN 611 - Autonomic Neurophysiology **Credits:** 3
- KIN 615 - Cardiorespiratory/Comparative Physiology in Health and Disease **Credits:** 3
- KIN 617 - Signaling Pathways in Physiology **Credits:** 3
- KIN 657 - Integrative Human Pathophysiology **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- PHILO 595 - Environmental Ethics **Credits:** 3
- PLPTH 500 - Principles of Plant Pathology **Credits:** 3
- PLPTH 585 - Crop Diseases **Credits:** 2
- PLPTH 610 - Biotechnology **Credits:** 3
- PSYCH 470 - Principles of Neuroscience **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3
- WOEM 400 - Pond and Sportfish Management **Credits:** 3
- WOEM 555 - Big Game Management **Credits:** 3
- WOEM 560 - Upland Game Bird Management **Credits:** 3
- WOEM 561 - Waterfowl and Wetlands Management **Credits:** 3
- WOEM 562 - Advanced Wildlife Habitat Management **Credits:** 4
- WOEM 620 - Human-Wildlife Conflicts **Credits:** 3

Biology - Human Health Biology (BS) Academic Degree Map

The curriculum for this major assumes students enter college prepared to take Calculus.		
First Year	**Hours**	**K-State Core**
Semester 1		
BIOL 100 - Biology First-Year Orientation **OR**	1	
DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation	1	
BIOL 198 - Principles of Biology	4	**KSC 040**
CHM 210 - Chemistry I	4	
Arts and Humanities and Moral Reasoning Overlay	3	**KSC 060**
Social and Behavioral Science Requirement	3	**KSC 050**
Total Credits: 15		
Semester 2		
BIOL 255 - General Microbiology	4	

CHM 230 - Chemistry II	4	
COMM 106 - Public Speaking I	3	**KSC 020**
ENGL 100 - Expository Writing I	3	**KSC 010**
Free elective	1	
Total Credits: 15		
Second Year		
Semester 1		
CHM 350 - General Organic Chemistry	3	
CHM 351 - General Organic Chemistry Laboratory	2	
ENGL 200 - Expository Writing II	3	**KSC 010**
MATH 220 - Analytic Geometry and Calculus I	4	**KSC 030**
Social and Behavioral Science and Global Perspectives Overlay	3	**KSC 050**
Total Credits: 15		
Semester 2		
BIOCH 521 - General Biochemistry	3	
BIOL 398 - Principles of Genetics	4	
PHYS 113 - General Physics I	4	
Arts and Humanities	3	**KSC 060**
Total Credits: 14		
Third Year		
Semester 1		
BIOL 441 - Human Body I	4	

PHYS 114 - General Physics II	4	
Outside concentration - A&S requirement	3	
STAT 225 - Introduction to Statistics (or other Statistics option)	3	
Free elective	1	
Total Credits: 15		
Semester 2		
BIOL 442 - Human Body II	4	
BIOL 541 - Cell Biology	3	
Outside concentration - A&S requirement	3	
Biology elective	3	
Fine Arts or Humanities - A&S requirement	3	
Total Credits: 16		
Fourth Year		
Semester 1		
BIOL 520 - Evolution **OR**	3	
BIOL 521 - Evolution of Infectious Diseases	3	
Biology elective	3	
Non-Quantitative Social Science and US Multicultural Overlay - A&S requirement	3	
Outside concentration - A&S requirement	3	
Free Elective {Institutionally Designated Area}	3	**KSC 070**
Total Credits: 15		
Semester 2

Chemistry

Christer B. Aakeröy, Head

213 CBC Building
785-532-6665
Fax: 785-532-6666
chemdept@k-state.edu
www.k-state.edu/chem

The Department of Chemistry occupies modern research and teaching facilities in two adjoining buildings: the CBC Building and the H. H. King Chemical Laboratory. The chemistry faculty possess a wide range of expertise in both traditional and cross-disciplinary areas of the chemical sciences, and are committed to excellence in their teaching. The department offers programs leading to the BS and BA degrees in chemistry. In addition to the undergraduate program, the department offers MS and PhD degrees: the graduate program includes approximately 60 students.

Chemistry is a vibrant discipline whose broad impact extends from fundamental inquiry about molecular structure and interaction, to the design and syntheses of new pharmaceuticals, to the creation of new materials for energy conversion, to the detection and remediation of environmental threats. An education in chemistry provides both a satisfying conceptual framework with which to understand the workings of the material world and the practical skills with which to explore it. A degree in chemistry provides many different career possibilities. For example, a research chemist might synthesize and explore new compounds and materials, or develop new analytical instrumentation and techniques. Other chemists work in federal- or state-sponsored activities broadly concerned with health, the environment, forensic science, energy, and safety. Students often use chemistry degrees as preparation for advanced study in medicine, pharmacy, and related areas. Students who plan to become high school science teachers may choose to earn dual degrees in chemistry and education.

High school preparation

High school students who plan to major in chemistry must have a good background in mathematics and science. Trigonometry and two years of algebra are essential, as are courses in chemistry and physics.

Transfer students

Community college students should take a year of general chemistry, two to three semesters of calculus, a year of physics for scientists and engineers (i.e. physics with calculus) English composition, and communication studies (speech) classes for transfer credit.

Independent study and research

Many chemistry students are engaged in independent study and research, some beginning as early as their first year. Two credit hours of research experience, under the supervision of a faculty member of the student's choice, are required for the BS degree in the chemistry program. A formal, written report describing the research is also required.

General requirements for undergraduate majors

Students majoring in chemistry must earn grades of C or better in all courses prescribed for this curriculum, as outlined below. A total of 120 credit hours are required for graduation. The BA program is obtained by following the curriculum for the BS degrees with the additional modern language requirement of the College of Arts and Sciences.

Bachelor of Science

Chemistry (BS)

The BS degree in chemistry consists of two programs: the chemistry program and the chemical science program.

The chemistry program is the preferred program for students who are preparing for graduate study in chemistry or who plan for employment as chemists. This program leads to the professional degree in chemistry and leads to a degree that is certified by the American Chemical Society.

Students majoring in chemistry must earn grades of C or better in all courses prescribed for this curriculum as outlined below. A total of 120 credit hours are required for graduation.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

- CHM 200 - Frontiers in Chemistry **Credits:** 1

Outside Concentration: 9 Credit Hours

Outside credential of at least 9 credit hours (May be from any unit, **except Chemistry**, OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for CHM**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Programs

The curriculum for this major assumes students enter college prepared to take Calculus.

Chemistry (CHM) Requirements: 39-41 Credit Hours

Choose between Options 1 and 2 for Chemistry Foundational coursework and complete the Chemistry Advanced coursework.

Chemistry (CHM) Foundational Requirements - Option 1: 8 Credit Hours

Credit hours adjusted due to CHM 200 counting as Arts & Sciences College Orientation requirement; CHM 210 fulfilling requirement for K-State Core (Bucket #4)

- CHM 200 - Frontiers in Chemistry **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 371 - Chemical Analysis **Credits:** 4

Chemistry (CHM) Foundational Requirements - Option 2: 5 Credit Hours

Enrollment in CHM 220 and 250 requires one year of high school chemistry, MATH 100 (or two years of high school algebra), and an ACT composite score of 26 or higher

Credit hours adjusted due to CHM 200 counting as Arts & Sciences College Orientation requirement; CHM 220 fulfilling requirement for K-State Core (Bucket #4)

- CHM 200 - Frontiers in Chemistry **Credits:** 1
  CHM 200 is a required foundation course for majors - Fulfills the A&S 1 Credit Hour Orientation requirement
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 250 - Honors Chemistry II **Credits:** 5

Chemistry (CHM) Advanced Requirements: 29 Credit Hours

- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- CHM 550 - Organic Chemistry II **Credits:** 3
- CHM 566 - Instrumental Methods of Analysis **Credits:** 3
- CHM 585 - Physical Chemistry I **Credits:** 3
- CHM 595 - Physical Chemistry II **Credits:** 3
- CHM 596 - Physical Methods Laboratory **Credits:** 1-2
  Chemistry majors are required to enroll in 2 credit hours of CHM 596
- CHM 599 - Senior Thesis Research **Credits:** 1-3

Chemistry majors are required to enroll in 2 credit hours of CHM 599

- CHM 611 - Inorganic Chemistry I **Credits:** 3
- CHM 612 - Inorganic Chemistry II **Credits:** 3
  CHM 612 may be replaced by
- CHM 652 - Organic Chemistry III: Reactions and Mechanisms **Credits:** 3
- CHM 657 - Inorganic Techniques **Credits:** 2
  Chemistry majors are required to enroll in 2 credit hours of CHM 657

Biochemistry (BIOCH) Requirements: 3 Credit Hours

- BIOCH 521 - General Biochemistry **Credits:** 3
  Or
- BIOCH 755 - Biochemistry I **Credits:** 3

Mathematics (MATH) Requirements: 12 Credit Hours

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4
- MATH 222 - Analytic Geometry and Calculus III **Credits:** 4

Physics (PHYS) Requirements: 10 Credit Hours

- PHYS 213 - Engineering Physics I **Credits:** 5
- PHYS 214 - Engineering Physics II **Credits:** 5

BS Arts, Humanities, and Social Sciences Requirements: 6 Credit Hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses Credits: 3

Fine Arts or Humanities: Any course or combination of courses Credits: 3

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq Credits: 3

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq Credits: 3

Free Electives: 0-44

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Chemistry - Chemical Science (BS)

The BS degree in chemistry consists of two programs: the chemistry program and the chemical science program.

The chemical science program serves students who want a strong background in chemistry but who do not require as much specialization as provided by the chemistry program.

Students majoring in chemical science must earn grades of C or better in all courses prescribed for this curriculum as outlined below. A total of 120 credit hours are required for graduation.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

- CHM 200 - Frontiers in Chemistry **Credits:** 1

Outside Concentration: 9 Credit Hours

Outside credential of at least 9 credit hours (May be from any unit, **except Chemistry,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (**except for Chem**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Program

The curriculum for this major assumes students enter college prepared to take Calculus.

Chemistry (CHM) Requirements: 25-28 credit hours

Choose between Options 1 and 2 for Chemistry Foundational coursework, complete the advanced requirements, and complete an advanced lecture and laboratory.

Chemical Science Foundational Requirements - Option 1: 13 credit hours

- CHM 200 - Frontiers in Chemistry **Credits:** 1
- CHM 210 - Chemistry I **Credits:** 4
- CHM 230 - Chemistry II **Credits:** 4
- CHM 371 - Chemical Analysis **Credits:** 4

Chemical Science Foundational Requirements - Option 2: 11 credit hours

Enrollment in CHM 220 and 250 requires one year of high school chemistry, MATH 100 (or two years of high school algebra), and an ACT composite score of 26 or higher

- CHM 200 - Frontiers in Chemistry **Credits:** 1
- CHM 220 - Honors Chemistry I **Credits:** 5
- CHM 250 - Honors Chemistry II **Credits:** 5

Chemical Science (CHM) Advanced Requirements: 11 credit hours

Complete all courses listed below.

- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- CHM 550 - Organic Chemistry II **Credits:** 3
- CHM 500 - General Physical Chemistry **Credits:** 3
  CHM 500 may be replaced by
- CHM 585 - Physical Chemistry I **Credits:** 3

Chemical Science (CHM) Advanced Lecture and Lab Electives: 4-5 credit hours

Complete one lecture course and one lab course from the following list.

Choose one lecture course:

- CHM 315 - Environmental Science: A Chemistry Perspective **Credits:** 3
- CHM 372 - Forensic Chemistry and Criminalistics **Credits:** 3
- CHM 566 - Instrumental Methods of Analysis **Credits:** 3
- CHM 611 - Inorganic Chemistry I **Credits:** 3

Choose one lab course:

- CHM 316 - Environmental Science: A Chemistry Perspective Laboratory **Credits:** 1

- CHM 551 - Advanced Organic Laboratory **Credits:** 2
- CHM 596 - Physical Methods Laboratory **Credits:** 1-2
  Chemical Science majors may enroll in 1 credit hour of CHM 596
- CHM 657 - Inorganic Techniques **Credits:** 2

Biochemistry (BIOCH) Requirements: 6 credit hours

- BIOCH 521 - General Biochemistry **Credits:** 3
- BIOCH 522 - General Biochemistry Laboratory **Credits:** 3

Mathematics (MATH) Requirements: 8 credit hours

- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- MATH 221 - Analytic Geometry and Calculus II **Credits:** 4

Physics (PHYS) Requirements: 8 credit hours

- PHYS 113 - General Physics I **Credits:** 4
- PHYS 114 - General Physics II **Credits:** 4

BS Arts, Humanities, and Social Sciences Requirements: 6 credit hours

3 credit hours in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Fine Arts or Humanities: Any course or combination of courses: 3 credit hours

Non-Quantitative Social Science: Any social science course that does NOT have a MATH or STAT prereq: 3 credit hours

Free Electives: 11-12 credit hours

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Minor

Chemistry Minor

Program requirements

Chemistry courses

- * CHM 350 - General Organic Chemistry **Credits:** 3
- ** CHM 351 - General Organic Chemistry Laboratory **Credits:** 2
- *** CHM 500 - General Physical Chemistry **Credits:** 3

Choose from the following:

- CHM 220 - Honors Chemistry I **Credits:** 5
  and
- CHM 250 - Honors Chemistry II **Credits:** 5

Or

- CHM 210 - Chemistry I **Credits:** 4
  and
- CHM 230 - Chemistry II **Credits:** 4
  and
- CHM 371 - Chemical Analysis **Credits:** 4

Note

*CHM 531 (Organic Chemistry I, 3 credits) may be substituted for CHM 350.

**CHM 532 (Organic Chemistry Lab, 2 credits) may be substituted for CHM 351.

***CHM 585 (Physical Chemistry I, 3 credits) may be substituted for CHM 500.

- CHM 531 - Organic Chemistry I **Credits:** 3
- CHM 532 - Organic Chemistry Laboratory **Credits:** 2
- CHM 585 - Physical Chemistry I **Credits:** 3

A minimum grade of C for all courses in the minor is required.

Total credit hours: (18-20)

Dean of Arts and Sciences

Bachelor of Arts

Humanities (BA)

Humanities is a multidisciplinary major that deals with human thought and culture. Cultural study enables students to understand their own places in existing traditions and contribute positively to the development of new ones. Creativity, imagination, and interpretation are central to humanistic study. The humanities disciplines include American ethnic studies, anthropology, art, art history, communication studies, creative writing, dance, gender, women, and sexuality studies, history, literature, mass communications, modern languages, music, philosophy, and theater.

A student works closely with an interdisciplinary humanities advisor in the College of Arts and Sciences deans' office to develop a plan of study with a thematic emphasis. The student's humanities advisor may encourage him or her to confer with other humanities faculty members who have expertise in the area of the student's interest. (Students who select music as a thematic emphasis must seek additional advising in the music department.)

Students must earn a C or better in all coursework applied to the Humanities Core, Humanities Concentration Area 1, Humanities Concentration Area 2, and Practicum/Applied Learning, including transfer work.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: (1 Credit Hour)

Outside Concentration: (9 Credit Hours)

Outside credential of at least 9 credit hours (May be from any unit, except **Art, Media & Communication, Music, Theatre, and Dance, English, Modern Languages, Philosophy,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix except A**RT, COMM, DANCE, ENGL, HIST, MLANG, ARAB, CHINE, CLSCS, FREN, GRMN, JAPAN, SPAN, PHILO, MUSIC, THTR** (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] Credit Hours)

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Program

Math Requirement

If not met through K-State Core requirements, MATH 160 is required.

KSC-030

- MATH 160 - Introduction to Contemporary Mathematics **Credits:** 3

Humanities Foundational Courses: (9 Credit Hours)

Select 9 hours from below (3 credits from 3 different disciplines)

- ART 106 - Art Appreciation **Credits:** 3
- ART 195 - Survey of Western Art History I **Credits:** 3
- ART 196 - Survey of Western Art History II **Credits:** 3
- ART 197 - Survey of Non-Western Art History **Credits:** 3
- COMM 120 - Introduction to Human Communication **Credits:** 3
- COMM 260 - Introduction to Trial Advocacy **Credits:** 3
- DANCE 205 - Dance as an Art Form **Credits:** 3
- ENGL 185 - Race, Film, and American Stories **Credits:** 3
- ENGL 227 - Video Games as Literature **Credits:** 3
- ENGL 251 - Introduction to Literature **Credits:** 3
- ENGL 280 - Studies in World Literature and Culture **Credits:** 3
- ENGL 287 - Great Books **Credits:** 3
- ENGL 310 - Introduction to Literary Studies **Credits:** 3
- ENGL 315 - Introduction to Popular Culture **Credits:** 3
- ENGL 326 - Introduction to Digital Humanities **Credits:** 3
- HIST 100 - Introduction to History **Credits:** 3
- HIST 101 - Western Civilization I: Ancient Greece to Early Modern Europe **Credits:** 3
- HIST 102 - Western Civilization II: Europe in the Modern World **Credits:** 3
- HIST 111 - World History to 1450 **Credits:** 3
- HIST 112 - World History From 1450 **Credits:** 3
- HIST 151 - History of the United States to 1877 **Credits:** 3
- HIST 152 - History of the United States Since 1877 **Credits:** 3
- MLANG 106 - Legal Terminology: Latin and French for Law Professions **Credits:** 2
- MLANG 120 - Multilingualism in the U.S. **Credits:** 3
- MLANG 301 - Languages and Your Future **Credits:** 1
- MUSIC 100 - Introduction to Music Theory **Credits:** 3
- MUSIC 160 - Experiencing Live Music **Credits:** 2-3
- MUSIC 249 - Introduction to Music of the World **Credits:** 3
- MUSIC 250 - Introduction to Music **Credits:** 3
- PHILO 100 - Introduction to Philosophical Problems **Credits:** 3
- PHILO 105 - Introduction to Critical Thinking **Credits:** 3
- PHILO 110 - Introduction to Formal Logic **Credits:** 3
- PHILO 115 - Introduction to Philosophy of Religion **Credits:** 3
- PHILO 120 - Introduction to Philosophy of Art **Credits:** 3
- PHILO 130 - Introduction to Moral Philosophy **Credits:** 3
- PHILO 135 - Introduction to Social and Political Philosophy **Credits:** 3
- PHILO 140 - Introduction to Philosophy of Mind **Credits:** 3
- PHILO 145 - Historical Introduction to Philosophy **Credits:** 3
- PHILO 150 - Introduction to Philosophy of Feminism **Credits:** 3
- PHILO 160 - Introduction to Philosophy of Law **Credits:** 3
- THTRE 235 - Introduction to the Art of Film **Credits:** 3
- THTRE 263 - Oral Interpretation of Literature **Credits:** 3
- THTRE 270 - Introduction to Theatre **Credits:** 3

Humanities Concentration Area 1: (12 Credit Hours)

12 credits from one of the following disciplines; minimum 9 credits at the 300-level or above; course topics must be humanistic in nature: ARAB, ART, CHINE, CLSCS, COMM, DANCE, ENGL, FREN, GRMN, HIST, JAPAN, MLANG, MUSIC, PHILO, SPAN, THTRE

Humanities Concentration Area 2: (12 Credit Hours)

12 credits from one of the following disciplines AND not duplicated above in Concentration Area 1; minimum 9 credits at the 300-level or above; course topics must be humanistic in nature: ARAB, ART, CHINE, CLSCS, COMM, DANCE, ENGL, FREN, GRMN, HIST, JAPAN, MLANG, MUSIC, PHILO, SPAN, THTRE

Practicum / Applied Learning: (1-3 Credit Hours)

Select one of the following course options

- DAS 400 - Undergraduate Research in Arts and Sciences **Credits:** 0-3
- ENGL 597 - Career Paths in English and the Humanities **Credits:** 1

BA Arts, Humanities, and Social Sciences Restricted Electives: (6 Credit Hours)

3 credit hours in each of the following at any level or above OR at any level with a prerequisite in the same discipline.

Any course or combination of courses in Fine Arts: (3 Credit Hours)

May not duplicate any course taken in the concentration areas above.

One Non-Quantitative Social Science; Any Social course that does NOT have a MATH or STAT prereq Credits: 3

Any Social course that does NOT have a MATH or STAT prereq

BA Natural and Quantitative Requirement: (6 Credit Hours)

One course in each of the following, with at least 3 credit hours total at 300 level or above OR at any level with a prerequisite in the same discipline.

Natural Science or Quantitative course: (3 Credit Hours)

Natural Science, or Quantitative, or Social Science with MATH or STAT: (3 Credit Hours)

BA Second Language Requirement: (3-16 Credit Hours)

Choose one of the following:

Option 1: (3-14 Credit Hours)

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: (16 Credit Hours)

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: (3 Credit Hours)

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: (12-27 Credit Hours)

Additional courses so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Integrated Computer Science (BA)

Integrated Computer Science integrates computer science with domain knowledge in some external area of concentration. The degree combines a student-selected concentration from any field of study outside of computer science with computational courses focused on real-world programming skills, electives expanding those skills and providing additional cultural and ethical knowledge, and a capstone project applying those skills to the concentration area. Integrated Computer Science equips students to apply computational thinking and methods in a wide variety of possible careers and to become academic, cultural, and industrial leaders who integrate the breadth and depth of an arts and sciences education with technical expertise in computer science.

Students majoring in Integrated Computer Science must earn grades of C or better in all courses required for the program in the Computational Courses, Computational Course Electives, Integration Electives, and Integrated Computer Science Capstone.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements

Orientation: 1 Credit Hour

DAS 101 or other approved A&S orientation

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Programs

Math Requirement

If not met through K-State Core requirements, MATH 100 is required.

KSC-030

- MATH 100 - College Algebra **Credits:** 3

Computational Courses 17 Credit Hours

- CC 110 - Introduction to Computing **Credits:** 2
- CC 111 - Elements of Computer Programming **Credits:** 1
- CC 120 - Web Page Development **Credits:** 3
- CC 210 - Fundamental Computer Programming Concepts **Credits:** 4
- CC 310 - Data Structures and Algorithms I **Credits:** 3
- CC 410 - Advanced Programming **Credits:** 4
  CIS 115 (2cr) and CIS 116 (1cr) can be used in place of CC 110 (2cr) and CC 111 (1cr) respectively. CIS 200 (4cr) can be used in place of CC 210 (4cr)

Computational Electives 12 Credit Hours

Pick 4 courses; 12 credit hours

- CC 510 - Computer Systems Administration **Credits:** 3
- CC 515 - Full Stack Web Development **Credits:** 3
- CC 520 - Database Essentials **Credits:** 3
- CC 535 - Applied Data Science **Credits:** 3
- CC 590 - Special Topics in Applied Computer Science **Credits:** 1-4

Integration Electives 12 Credit Hours

Students must complete four courses from the list of integration areas below, with at least one in each integration area, and at least one Moral Reasoning course being either PHILO 386 or PHILO 492

Integration Areas:

Digital Arts and Humanities

Cultural Impacts of Technology

Moral Reasoning and Professional Ethics

Digital Arts and Humanities

- ART 330 - Digital Techniques in Visual Art **Credits:** 3
- ENGL 326 - Introduction to Digital Humanities **Credits:** 3

Cultural Impacts of Technology

- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3
- CRIM 550 - Cybercrime, Security, and Society **Credits:** 3
- GWSS 435 - Race/Sex/Science **Credits:** 3
- HIST 320 - History of Technology **Credits:** 3
- HIST 519 - Science and Technology in the United States **Credits:** 3
- PSYCH 625 - Human Factors Psychology **Credits:** 3

Moral Reasoning and Professional Ethics

- PHILO 330 - Moral Philosophy **Credits:** 3
- PHILO 185 - Engineering Ethics **Credits:** 3
- PHILO 386 - Philosophy of Computer Science and Software Engineering **Credits:** 3
- PHILO 492 - Computers and Society **Credits:** 1-2

Concentration 18 Credit Hours

Students must choose a concentration area (not in a computing discpline) with a minimum of 18 credit hours, to be completed in 1 of 3 ways.

Note: If existing credentials (e.g., minor, certificate) for one of the options does not require 18 or more credits hours, a student may satisfy this requirement by completing the credential and enough additional credits to complete at least 18 credits total in the field. If no minor is offered at all in a given field, a student may take 18 credits in that field to satisfy the requirement. Courses counted toward the ICS core cannot count toward the concentration.

Option 1: Minor, Undergraduate Certificate, or Secondary Major

Option 2 Double Major

Option 3: Interdisciplinary Concentration

Take 18 additional credits from the three integration areas or from the list below to complete an interdisciplinary concentration. These credits must include six classes from three different fields, two at the 500 level or above. Courses used for the Integration Electives cannot also count in the Interdisciplinary Concentration.

- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3
- ANTH 715 - Research Methods in Digital Ethnography **Credits:** 3
- ART 330 - Digital Techniques in Visual Art **Credits:** 3
- ART 331 - Introduction to Digital and Expanded Media **Credits:** 3
- ART 390 - Design for Digital Media I **Credits:** 3
- ART 523 - Digital and Expanded Media Special Topics **Credits:** 3
- ART 575 - Web Art **Credits:** 3
- ART 590 - Design for Digital Media II **Credits:** 3

- ART 623 - Advanced Concepts in Digital and Expanded Media **Credits:** 3
- BIOL 734 - Introduction to Genomics and Bioinformatics **Credits:** 4
- COMM 332 - Communication and Technology **Credits:** 3
- CRIM 550 - Cybercrime, Security, and Society **Credits:** 3
- ECON 605 - Economic Applications of Game Theory and Strategic Behavior **Credits:** 3
- ECON 630 - Introduction to Econometrics **Credits:** 3
- ECON 686 - Economics Forecasting **Credits:** 3
- ENGL 325 - Literature and Technology **Credits:** 3
- ENGL 326 - Introduction to Digital Humanities **Credits:** 3
- ENGL 415 - Written Communication for Engineers **Credits:** 3
- ENGL 430 - The Structure of English **Credits:** 3
- ENGL 455 - Exploring Creativity **Credits:** 3
- ENGL 510 - Introduction to Professional Writing **Credits:** 3
- ENGL 516 - Written Communication for the Sciences **Credits:** 3
- ENGL 695 - Topics in Literature **Credits:** 3
- GEOG 508 - Geographic Information Systems I **Credits:** 4
- GEOL 360 - Quantitative Methods in Geoscience **Credits:** 3
- GWSS 435 - Race/Sex/Science **Credits:** 3
- HIST 320 - History of Technology **Credits:** 3
- HIST 519 - Science and Technology in the United States **Credits:** 3
- MATH 312 - Finite Applications of Mathematics **Credits:** 3
- MC 316 - Interactive Journalism Design **Credits:** 3
- MC 370 - Social Media Strategy & Management **Credits:** 3
- MC 589 - Issues in Mass Communication **Credits:** 1-3
- MUSIC 734 - Technology of the Electronic Music Studio **Credits:** 2
- MUSIC 735 - Digital Sound Synthesis **Credits:** 2
- PHILO 330 - Moral Philosophy **Credits:** 3
- PHILO 185 - Engineering Ethics **Credits:** 3
- PHILO 386 - Philosophy of Computer Science and Software Engineering **Credits:** 3
- PHILO 492 - Computers and Society **Credits:** 1-2
- PHILO 510 - Symbolic Logic II **Credits:** 3
- PHILO 610 - Special Topics in Logic **Credits:** 3
- PHILO 625 - The Philosophy of Language **Credits:** 3
- PHYS 636 - Physical Measurements Instrumentation **Credits:** 4
- PSYCH 625 - Human Factors Psychology **Credits:** 3
- STAT 510 - Introductory Probability and Statistics I **Credits:** 3
- STAT 703 - Introduction to Statistical Methods for the Sciences **Credits:** 3

Capstone Project 1 Credit Hour

- DAS 496 - Integrated Computer Science Capstone **Credits:** 1

BA Arts, Humanities, and Social Sciences Requirement: 6 Credit Hours

3 credit hours in each of the following, with at least 6 credit hours at 300 level or above OR at any level with a prerequisite in the same discipline.

B.A. Humanities requirement met by Moral Reasoning and Professional Ethics - Integration Elective.

Any course or combination of courses in Fine Arts Credits: 3

Requirement could be fulfilled by an Integration Elective.

One Non-Quantitative Social Science; Any Social course that does NOT have a MATH or STAT prereq Credits: 3

Requirement could be fulfilled by an Integration Elective.

BA Second Language Requirement: 3-16 Credit Hours

Choose one of the following:

Option 1: 3-14 Credit Hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., Frech 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 Credit Hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 Credit Hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 5-22 Credit Hours

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Social Science (BA)

The Social Science interdisciplinary major focuses primarily on the critical examination of society's institutions—their structures, theoretical foundations, evolution, and interrelationships—and how they affect and are affected by human behavior.

Cutting across a variety of social science disciplines, including American ethnic studies, anthropology, economics, geography, gender, women, and sexuality studies, mass communications, political science, psychology, social transformation studies, and sociology, the major intentionally trades depth of learning for broader scope of inquiry. By offering more latitude in its curriculum design, the program allows students to prepare for a range of pathways, including admission to certain professional programs.

Students are expected to select a thematic emphasis that is bridged by the two concentration areas selected in consultation with their advisor. To best meet individual needs and interests, career goals and the program requirements, close collaboration with the advisor is expected.

Students majoring in Social Science must earn grades of C or better in all courses required for the program in Social Science Foundational Courses, Social Science Concentration Area 1, Social Science Concentration Area 2, Thematic Elective and Social Science Capstone.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: 10 credits

Orientation: 1 Credit Hour

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: 9 Credit Hours

Outside credential of at least 9 credit hours (May be from any unit, **except ****, etc,** OR from approved interdisciplinary credentials within the unit).

OR

Any 9 credit hours in a single prefix (except for ****) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hours in a microcredential (up to 5 credit hours may overlap with program).

Overlays: [9] Credit Hours

May be fulfilled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay **Credits:** [3]
- Global Perspectives Overlay **Credits:** [3]
- US Multicultural Overlay **Credits:** [3]

Program: 52-65 Credits

Statistics Requirement

If not met through K-State Core requirements, STAT 225 is required.

KSC-030

- STAT 225 - Introduction to Statistics **Credits:** 3

Social Science Foundational Courses: 9 credit hours

Students choose 3 courses (9 credits) from the following list in three different disciplines:

- AMETH 160 - Introduction to American Ethnic Studies **Credits:** 3
- ANTH 200 - Introduction to Cultural Anthropology **Credits:** 3
- ANTH 204 - A General Education Introduction to Cultural Anthropology **Credits:** 3
- ANTH 210 - Introduction to Cultural Anthropology, Honors **Credits:** 3
- ANTH 220 - Introduction to Linguistic Anthropology **Credits:** 3
- ANTH 260 - Introduction to Archeology **Credits:** 3
- CRIM 261 - Introduction to Criminology and Criminal Justice **Credits:** 3
- ECON 110 - Principles of Macroeconomics **Credits:** 3
- ECON 111 - Principles of Macroeconomics - Honors **Credits:** 3
- ECON 120 - Principles of Microeconomics **Credits:** 3
- GEOG 100 - World Geography & Globalization **Credits:** 3
- GEOG 200 - Human Geography **Credits:** 3
- GEOG 201 - Human Geography (Honors) **Credits:** 3
- GWSS 105 - Introduction to Gender, Women, and Sexuality Studies **Credits:** 3
- MC 110 - Mass Communication in Society **Credits:** 3
- MC 120 - Principles of Advertising **Credits:** 3
- MC 160 - Principles of Journalism **Credits:** 3
- MC 180 - Principles of Public Relations **Credits:** 3
- POLSC 110 - Introduction to Political Science **Credits:** 3
- POLSC 111 - Introduction to Political Science, Honors **Credits:** 4
- POLSC 115 - U.S. Politics **Credits:** 3
- POLSC 135 - Introduction to Comparative Politics **Credits:** 3
- POLSC 145 - World Politics **Credits:** 3
- POLSC 155 - Introduction to Political Thought **Credits:** 3
- PSYCH 110 - General Psychology **Credits:** 3
- SOCIO 211 - Introduction to Sociology **Credits:** 3
- SOCWK 100 - Social Work: The Helping Profession **Credits:** 3
- SOCWK 200 - Basic Skills for Working with People **Credits:** 3

Social Science Concentration Area One: 12 Credit Hours

12 credit hours from one Social Science discipline: ADC, AMETH, ANTH, CRIM, ECON, GEOG, GWSS, MC, POLSC, PSYCH, STRAN, SOCWK, SOCIO. 9 credits of the 12 must be at the 300 level or higher. Coursework may not overlap with Concentration Area Two or with Foundational Courses.

STRAN may be combined with AMETH or GWSS, but not both. Students cannot choose both AMETH and GWSS as their two disciplines.

ADC may be combined with SOCWK.

Social Science Concentration Area Two: 12 Credit Hours

12 credit hours from one Social Science discipline: ADC, AMETH, ANTH, CRIM, ECON, GEOG, GWSS, MC, POLSC, PSYCH, STRAN, SOCWK, SOCIO. 9 credits of the 12 must be at the 300 level or higher. Coursework may not overlap with Concentration Area One or with Foundational Courses.

STRAN may be combined with AMETH or GWSS, but not both. Students cannot choose both AMETH and GWSS as their two disciplines.

ADC may be combined with SOCWK.

Thematic Elective: 3 Credit Hours

In consultation with advisor, select a minimum 3 credit hours, at or above the 300 level, enhancing one or both concentration areas through research, applied learning, or other experiential learning opportunities. Other courses may be substituted so long as approval is obtained and elective demonstrably aligns with thematic focus. Must be 300-799.

ADC 300-799

AMETH 300-799

ANTH 300-799

CRIM 300-799

DAS 400

ECON 300-799

GEOG 300-799

GWSS 300-799

MC 300-799

POLSC 300-799

PSYCH 300-799

STRAN 300-799

SOCWK 300-799

SOCIO 300-799

Social Science Capstone: 1 Credit hour

- DAS 498 - Social Sciences Capstone **Credits:** 1

BA Arts and Humanities Restricted Electives: 6 Credit Hours

3 credit hours in each of the following, at any level

One course in Humanities Credits: 3

Any course or combination of courses in Fine Arts Credits: 3

BA Natural and Quantitative Restricted Electives: 6 Credit Hours

One course in each of the following at any level

Natural Science or Quantitative course Credits: 3

Natural Science, or Quantitative, or Social Science with MATH or STAT Credits: 3

BA Second Language Requirement: 3-16 Credit Hours

Choose one of the following:

Option 1: 3-14 Credit Hours

At least 3 credit hours of coursework culminating with level 4 or above (i.e., French 4, German 4, Spanish 4, etc.) or the equivalent of level 4 in a second language sequence.

Option 2: 16 Credit Hours

At least 16 credit hours of coursework in which student takes the first and second levels of two different languages, selected from any language offered within the department of Modern Languages, ASL, or from any other second language transferred in at an equivalent level.

Option 3: 3 Credit Hours

Students whose first language is not English may satisfy this requirement by meeting the English Proficiency Admission Standards for K-State or by completing the appropriate level of exit courses with the English Language Program.

Free Electives: 7-14 Credit Hours

In addition to K-State Core Free Electives requirement, take any course so that the total credit hours completed equals 120.

Total Hours Required for Graduation: 120

Arts & Sciences common degree requirements for the BA are satisfied by the following:

- BS Natural and Quantitative Restricted Electives
- BS Fine Arts and Humanities Restricted Elective (two courses at any level)

- Social Science Concentration Area 1 (at least one course will be at 300 level or above)
- BA Second Language Requirement

Bachelor of Science

Environmental Science (BS)

The Environmental Science degree prepares students for careers with specialization in water resources, earth systems, conservation and sustainability, analytical and geospatial methods, or agroecosystems. Curriculum is designed so students will accomplish the following:

• Develop an understanding of the Earth as an integrated system and an appreciation for how humans and social systems shape our environment.

• Engage in impactful experiential learning opportunities to include undergraduate research and internships as well as laboratory, computer-based, and field methods.

• Add focused depth to their learning to target specific career fields with strong workforce demand and societal need.

Kansas State University Core: 34-36 Credit Hours

K-State Core is the foundation for an impactful life and career after time at K-State.

The K-State Core framework covers six disciplinary areas: **English, Communications, Mathematics & Statistics, Natural & Physical Sciences, Social & Behavioral Sciences, and Arts and Humanities**. In addition, a seventh area is reserved for institutionally designated use, which K-State is keeping as free electives. In total, the framework takes up 34-35 credit hours of 100 and 200-level coursework. Students who complete their general education elsewhere cannot be required to take additional general education coursework in the disciplinary areas of the framework without permission from KBOR to continue requiring courses in the K-State Core.

General Education: K-State Core

Program Requirements: (minimum of 5 credit hours not overlapping program)

Orientation: (1 credit hour)

DAS 101 or any other 1 credit orientation course

- DAS 101 - Discover, Create, and Thrive: Arts and Sciences Orientation **Credits:** 1

Outside Concentration: (4-9+ credit hours)

Outside credential of at least 9 credit hours (May be from any unit).

OR

Any 9 credit hours in a single prefix (**except for DAS**) (all must be 300 level or above OR at any level with a prereq in the same prefix; up to 5 credit hours may overlap with program).

OR

Any 9 credit hour microcredential (up to 5 credit hours may overlap with program).

Overlays: ([9] credit hours)

May be filled in K-State Core, Outside Concentration, electives, or the Program itself.

- Ethical Reasoning Overlay, 1 course **Credits**: [3]
- Global Perspectives Overlay, 1 course **Credits**: [3]
- US Multicultural Overlay, 1 course **Credits**: [3]

Environmental Science Degree Requirements - 80-82 Credit Hours

The curriculum for this major assumes students enter college prepared to take Calculus.

Fundamental Science and Math: (11 credit hours)

Credit total assumes MATH 205 OR MATH 220 counted as part of the K-State Core 3

- MATH 205 - General Calculus **Credits:** 3
  OR
- MATH 220 - Analytic Geometry and Calculus I **Credits:** 4
- STAT 225 - Introduction to Statistics **Credits:** 3
- CHM 110 - General Chemistry **Credits:** 3
  AND
- CHM 111 - General Chemistry Laboratory **Credits:** 1
  OR
- CHM 210 - Chemistry I **Credits:** 4
- PHYS 101 - The Physical World **Credits:** 3
  AND
- PHYS 103 - The Physical World Laboratory **Credits:** 1
  OR
- PHYS 113 - General Physics I **Credits:** 4

Environmental Foundations: (24 credit hours)

- AGRON 205 - Soils **Credits:** 3
- AGRON 206 - Soils Laboratory **Credits:** 1
- BIOL 198 - Principles of Biology **Credits:** 4
- GEOG 121 - Introductory Physical Geography: Earth Systems Science **Credits:** 3
- GEOG 122 - Introduction to Physical Geography: Earth Systems Science Laboratory **Credits:** 1
- GEOL 100 - Earth in Action **Credits:** 3
  OR
- GEOL 115 - Environmental Geology **Credits:** 3
- GEOL 103 - Geology Laboratory **Credits:** 1

- GEOG 508 - Geographic Information Systems I **Credits:** 4
- ENSCI 101 - Introduction Environmental Sciences **Credits:** 1
- DAS 582 - Natural Resources Environmental Sciences Project **Credits:** 3
  OR
- GENAG 582 - Natural Resources/Environmental Science Project (NRES) **Credits:** 3

Environmental Science Degree Customization Areas

Natural Environmental Systems: (12-14 credit hours)

Students must complete one course from each group: Atmosphere, Biosphere, Geosphere, and Hydrosphere.

Atmosphere (3-4 Credit Hours)

Choose one of the following courses

- AGRON 700 - Agricultural Meteorology **Credits:** 3
- GEOG 235 - Atmospheric Science **Credits:** 4
- GEOG 535 - Global Climatology and Climate Change **Credits:** 4
- GEOL 540 - Geologic Record of Climate Change **Credits:** 3

Biosphere (3 Credit Hours)

- AGRON 645 - Soil Microbiology **Credits:** 3
- BIOL 529 - Ecology **Credits:** 3
- BIOL 687 - Microbial Ecology **Credits:** 3
- GEOG 445 - Biogeography **Credits:** 3
- GEOL 650 - Geomicrobiology **Credits:** 3

Geosphere (3 Credit Hours)

Choose one of the following courses

- AGRON 665 - Soil Genesis and Classification **Credits:** 3
- GEOG 440 - Spatial Analysis of Surface Water Hydrology **Credits:** 3
- GEOL 502 - Mineralogy **Credits:** 3

Hydrosphere (3-4 Credit Hours)

Choose one of the following courses

- ATM 558 - Hydrology and Soil Erosion Management **Credits:** 3
- ATM 661 - Watershed Assessment and Management **Credits:** 3
- BIOL 612 - Freshwater Ecology **Credits:** 4
- GEOL 611 - Hydrogeology **Credits:** 3

Individual Experiential Learning: (3 credit hours)

Students must complete 3 credits of an internship OR research course from those listed below.

Research Course Codes

Research may be completed in separate semesters and add up to 3 total credits.

- AGRON 598 - Undergraduate Research in Agronomy **Credits:** 0-18
- BIOL 698 - Research in Biology **Credits:** 0-8
- GENAG 515 - Honors/Scholars Project **Credits:** 0-1
- GEOG 497 - Undergraduate Research in Geography **Credits:** 1-3
- GEOG 709 - Geography Field Research Techniques **Credits:** 2-3
- GEOL 599 - Senior Thesis **Credits:** 1-3
- GEOL 680 - Field Geology **Credits:** 3

Internship Course Codes

- AGRON 405 - Internship in Agronomy **Credits:** 0-3
- BIOL 695 - Internship in Biology **Credits:** 1-3
- ENSCI 410 - Environmental Sciences Internship **Credits:** 3
- GEOG 610 - Geography Internship **Credits:** 1-6

Humans and the Environment: (15 credit hours)

Students are required to take SOCIO 536 and one additional class from the Social Systems list, one class from the Ethics list, and two classes from the Human-Environment Interactions list.

All three A&S overlays may be fulfilled through approved courses in this section. A&S approved overlay list may be found at: College degree requirements, electives and overlays

Social Systems: (6 credit hours)

Students are required to take one additional class from the Social Systems list in addition to SOCIO 536

- SOCIO 536 - Society and Natural Resources **Credits:** 3
  AND one of the follow courses
- AGCOM 712 - Environmental Communication **Credits:** 3
- AGEC 525 - Natural Resource and Environmental Economics **Credits:** 3
- ECON 527 - Environmental Economics **Credits:** 3
- GEOG 360 - Sustainability Concepts & Issues **Credits:** 3
- GEOG 370 - Environmental Justice **Credits:** 3
- GEOG 770 - Perception of the Environment **Credits:** 3
- HIST 511 - Environmental History **Credits:** 3
- IDFS 350 - Our Sustainable World **Credits:** 3
- LAR 298 - Ethics and Environmental Dilemmas **Credits:** 3
- PMC 635 - Methods of Environmental Interpretation **Credits:** 3
- POLSC 250 - Environmental Political Thought: The Future of Food, Air, Water, and Soil **Credits:** 3

Ethics: (3 credit hours)

- PHILO 295 - Introduction to Environmental Ethics **Credits:** 3
  OR
- PHILO 595 - Environmental Ethics **Credits:** 3

Human-Environment Interactions: (6 credit hours)

Students choose two courses from the list below

- AGRON 335 - Environmental Quality **Credits:** 3
- AGRON 695 - Climate Change and Agriculture **Credits:** 3
- ANTH 310 - Environmental Anthropology: Living with Change in the Anthropocene **Credits:** 3
- BIOL 263 - Ecology of Environmental Problems **Credits:** 3
- BIOL 435 - Environmental Biology **Credits:** 3
- CHM 315 - Environmental Science: A Chemistry Perspective **Credits:** 3
- GEOG 340 - Natural Resources **Credits:** 3
- GEOG 460 - Human Dimensions of Global Change **Credits:** 3
- GEOG 761 - Human Impact on the Environment **Credits:** 3
- GEOL 105 - Oceanography **Credits:** 3
  OR
- GEOL 125 - Natural Disasters **Credits:** 3
- GEOL 305 - Sustainable Earth Resources **Credits:** 3
- PMC 275 - Introduction to Natural Resource Management **Credits:** 3

Specialization: (15 credit hours)

Select 12 credits from one specialization and an additional 3 credits from any of the specialization lists.

These courses may not be counted toward fulfilling any other requirement within the degree other than the ouside concentration.

Agroecosystems Specialization

- AGRON 375 - Nutrient Cycling and Fertilizer Management **Credits:** 3
- AGRON 385 - Soil Analysis and Nutrient Recommendations **Credits:** 2
- AGRON 415 - Soils Judging **Credits:** 0-1
  Repeatable
- AGRON 251 - Range Management **Credits:** 3
- AGRON 635 - Soil and Water Conservation **Credits:** 3
- AGRON 640 - Cropping Systems **Credits:** 3
- AGRON 645 - Soil Microbiology **Credits:** 3
- AGRON 646 - Soil Microbiology Laboratory **Credits:** 1
- AGRON 655 - Site Specific Agriculture **Credits:** 3
- AGRON 665 - Soil Genesis and Classification **Credits:** 3
