

AI Services and Roadmap

The Division of IT actively follows and reviews current and new technologies to find opportunities to incorporate them into our technology architecture and learning environment.

Note: Before using these tools, please check with your department for any specific policies or guidelines. Additionally, before using them, you should know where your data is being stored, who has access to it, and the context of the level of security in meetings where it is being used. Sensitive and confidential discussions, data, and records should not be used with generative AI. The following tools should be used as tools, not to replace one's job.

Public Records Notice: Keep in mind that any data entered, or generated by, AI tools may be subject to public records laws. If the information you input or the information you obtain qualifies as a public record, it could be requested and disclosed under applicable regulations.

To see a list of tools that are more commonly used or have been approved by K-State visit [Guidance on the Use of Artificial Intelligence with University Owned Data and Records](#)

Examples of AI tools not approved by K-State

(note: no AI tools have been approved by K-State other than those shown at [Guidance on the Use of Artificial Intelligence with University Owned Data and Records](#))

Apple Intelligence	Generative AI features within iPhone, iPad and Mac devices	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Baidu AI	Multi-modal AI-generation chatbot with the ability to search, execute code, and "reason."	<i>Not Approved</i>	Very Low level. Uses Deepseek by default for web search. Users do not have control over their data. Should not be used with sensitive or protected data.
Canva AI	Text to image	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.

ChatGPT	Multi-modal AI-generation chatbot with the ability to search, execute code, and “reason.”	<i>Not Approved</i>	Low-mid level. The default is to use submitted data for training, but this can be turned off. Should not be used with sensitive or protected data.
Claude	Multi-modal AI-generation chatbot with the ability to search, execute code, and “reason.”	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
CopyLeaks Writing Assistant	AI-powered writing assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Cursor	AI-powered coding assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Elicit	AI-powered academic search engine that provides search overviews	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Gamma	AI-powered slide deck generation	<i>Not Approved</i>	Low level. De-identified user data is used for training by default. It should not be used for work.
GitHub Copilot	AI-powered coding assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Google Gemini	Multi-modal AI-generation chatbot with the ability to search, execute code, and “reason.”	<i>Not Approved</i>	Low-mid level. The default is to use submitted data for training, but this can be turned off. Should not be used with sensitive or protected data.

Google NotebookLM	AI-powered research, notetaking, study, and podcast generation tool.	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Grok	Multi-modal AI-generation chatbot with the ability to search, execute code, and “reason.”	<i>Not Approved</i>	Low-mid level. The default is to use submitted data for training, but this can be turned off. Should not be used with sensitive or protected data.
Ideogram	Text to image generator	<i>Not Approved</i>	Low level. User prompts and creations are used for training. Should not be used with sensitive or protected data.
Meta AI	Multi-modal AI-generation chatbot with the ability to search, execute code, and “reason.”	<i>Not Approved</i>	Low level. Users have very limited ability to control how their data is used. Should not be used with sensitive or protected data.
Midjourney	Text to image generator.	<i>Not Approved</i>	Low level. User prompts and creations are used for training. Should not be used with sensitive or protected data.
Napkin AI	Text to diagram, figure, and infographic generator	<i>Not Approved</i>	Low level. User prompts and creations are used for training. Should not be used with sensitive or protected data.
Paperpal	AI-powered writing assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Perplexity	AI-powered search engine that provides overviews. It can also be used as a text generator.	<i>Not Approved</i>	Low-mid level. Default is to use submitted prompts (but not files) for training, but this can be turned off. Should not be used with sensitive or protected data.

Qanda	AI-powered learning assistant	<i>Not Approved</i>	Low level. Collects data and does not provide users with control over how data is used. Should not be used with sensitive or protected data.
Quillbot	AI-powered writing assistant	<i>Not Approved</i>	Low level. User inputs are used for training. Should not be used with sensitive or protected data.
ResearchPal	AI-powered academic search engine and writing assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Runway	Text to video generator	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
SciSpace	AI-powered academic search engine that provides search overviews	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Scite	AI-powered academic search engine that provides search overviews	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Sora	Text to video generator	<i>Not Approved</i>	Low-mid level. Default is to use submitted data for training, but this can be turned off. Should not be used with sensitive or protected data.
Stable DiffusionWeb	Text to image generator	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Suno	AI-assistant for music generation	<i>Not Approved</i>	Low level. User inputs are used for training. Should not

			be used with sensitive or protected data
Udio	AI-assistant for music generation	<i>Not Approved</i>	Low level. User inputs are used for training. Should not be used with sensitive or protected data
Undermind	AI-powered academic search engine that provides search overviews	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Veo 3	Text to video generator	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
Wordtune	AI-powered writing assistant	<i>Not Approved</i>	Low-mid level. Default is to use submitted data for training, but this can be turned off. Should not be used with sensitive or protected data.
Wordvice AI	AI-powered writing assistant	<i>Not Approved</i>	Low-mid level. User data is not used for training. Should not be used with sensitive or protected data.
