## Status of iSIS Task Force Brainstorming Issues – Updated December 2010

No.	Category	Issue	Status
		A. Requests for iSIS Changes and/or Process	
A.1	Advising	Advisors need to know what students and faculty are seeing.	Completed. Go to ADV Center, then Student Center to see Shopping Cart. Concern: takes a long time to load and navigate if there is a long list of advisees.
A.2	Advising	Easier access to test credit details (AP, DANTES, etc.)	Will email handout. Can drill down to see detail. Everything but ACT/SAT is in transfer credit in Adviser Center. ACT/SAT is in the Student Service Center. AP/CLEP/IB scores are available in transfer report.
A.3	Usability	Provide way to print student schedule by hitting a print button.	Still some problems.
A.4	Usability/ Advising	Ability to leave comments on various pages. Need ability for advisors to leave notes so next advisor knows the history.	Requires meeting with Univ. attorney. Students also want a comments site.  Meeting not yet scheduled.
A.5	Usability	Unofficial transcript preferred over Academic History.	Planned for February 2011 roll-out. Will be available to advisers. Will act like DARS; request by student. Some need BATCH run.
A.6	Usability/ Defaults	Add Final Exam Schedule (day/time) to Student Class Schedule.	In process for Spring; may have update in Jan. <i>Not yet addressed</i> .
A.7	Student Enrollment Process	Results for students need to display additional info – reserve capacity needs to be displayed.	Top priority after upgrade.  Implementation planned for March.  Need icon for "open only for reserved." See handout for proposals.  Prop 1 and 2 were favored, with edits.  Total Class Capacity = Seats Taken = Reserved Seats Available = Unreserved seats Available=
A.8	Advising	Cumulative GPA on Academic History	Will look better in February report; repeat testing continues. Will be fixed in February.
A.9	Advising	Total hours in academic tab/retakes.	After upgrade. Continuing.
A.10	DCE	Batch load DCE classes into iSIS.	Recommend using Course and Curriculum approval process. <i>Continuing.</i>
A.11	Usability	Ability to make batch request (such as term history)  – by group,	Need specs for report. Continuing? Looking at individual report, but one request. Plan/SubPlan/EmplID  1) Batch of individuals 2) Reports
A.12	Usability	Return to search button on both top and bottom of page.	F5 Use different browsers if opening multiple windows. Add to Student Service. John Letourneau may have a fix; will work on it.

		B. Process/Needs/Requirements/Analysis Initiatives	
B.1a	Advising	Too many screens for advising with students present – need to condense to one screen.	Additional analysis needed to understand requirements.  DARS/Academic History/Class Schedule – need 3-4 windows open to advise. Need "open new window" button.
