**Job Search Resources for KINESIOLOGY Majors**

Kinesiology is the study of human movement, and its goal is to discover strategies for human health and performance. The work of kinesiologists benefits all those who move, including high-performance athletes, people suffering from chronic injury or disease, and those wanting to improve their overall physical health. Kinesiology is a multidisciplinary science encompassing anatomy, biomechanics, physiology, psychomotor behavior, and social and cultural factors. It is this multidisciplinary approach to movement and human performance that makes Kinesiology an important contributor to health and wellness, as well as to high performance sport.
