

Applying Activator Talents in Careers

- People with exceptional Activator talents like to jump right in and start, so your best approach to career planning is to try out various roles. Look for part-time jobs, work-study on campus, or volunteer opportunities where you can “try on” a career that looks interesting to you.
- Identify formal or informal leadership roles on campus where your Activator talents can flourish.
- Powerful Activator talents make you good at the starting line. Look for work environments that will reward you for getting people out of the blocks quickly.
- Consider becoming an entrepreneur. Make a list of possible businesses you could start, grow, and sell once they show a profit. Understand that you may lose interest once an enterprise is so fine-tuned to the point that it runs on its own.
- Understand that some supervisors and managers may feel threatened by your insistence on making decisions and acting without delay. Your Activator talents will flourish best in an environment where quick decision-making is valued and there is not a lot of hierarchical structure.

Applying Activator Talents in Academics

- Initiate classroom discussions. Suggest topics. Take sides in debates. Help your fellow students learn faster and learn more.
- Find the answers to questions that you anticipate the instructor will ask on upcoming tests and quizzes.
- Instigate conversations with your peers outside the classroom. Center these on topics related to a recent lecture given by your instructor or a visiting professor.
- Take charge of small-group conversations, projects, presentations, and experiments. Distinguish yourself by transforming plans into tangible results.
- Waste no time finishing the first draft of a writing assignment. Immediately seek feedback from a teaching assistant or your professor. Incorporate some of their constructive suggestions in your second draft.
