

# PROPERTY OWNER & COMMUNITY DEVELOPER\*

**I own and manage property.**

**I advocate and work for community growth and economic development.**

"Well, the affordability thing is obviously subjective. They are still selling the houses in Grand Mere, and the prices are getting higher. My question, do we have the right housing segment? Clearly we don't have enough \$150,000 to \$250,000 homes in this community."

"The question is...are we investing in this class or are we investing in that class? What's the mobility [for upper socio-economic status]?... much, much greater....Things turn, if a better job offer comes from University of Michigan, they are gone."
