Public Forum: Finding Common Ground

Community Solutions to Affordable Housing (CSAH)
A Project funded by the Kansas Health Foundation (KHF)

May 4, 2019 3:00-5:00 Leadership Studies Building

Summary Report

Background

Since the first forum on affordable housing was held April 2018 by the KHF-funded CSAH project1, there have been multiple opportunities provided for public learning and interaction on this issue. The April 2018 forum featured round-table discussions among a cross-section of 94 residents who shared their stories of searching for a home in Manhattan, Kansas, then characterized the local housing environment based on their experiences.

From that convening, fourteen residents volunteered to meet in two Study Circle groups over the summer of 2018, to read and discuss information on housing affordability approaches taken in other communities. The two groups came together in September to develop and apply criteria for selecting three solutions for further investigation by the community. The criteria for solutions included: increasing the number of persons “at home” in Manhattan; resulting in real improvement in residents’ lives; empowering under-represented groups; having clear targets for implementation; and monitoring and improving the quality of Manhattan housing stock. The solutions selected were: 1) rental code enforcement, 2) neighborhood revitalization programs, and 3) housing trust fund development.

Results of the forum and Study Circles were presented at Manhattan City Commission meetings, and free workshops for learning about other towns’ programs for each solution were offered through early January 2019. During this time, Facebook blog (S.A.H.A. - Safe and Affordable Housing Action) and an association of tenants (Renters Together) independently hosted community conversations to inform and inspire residents pursuing improvements. CSAH organizers attended meetings of agencies and groups dedicated to housing, and proposed that a collective conversation among these and other stakeholders could generate specific proposals for change.

Accordingly, the 2019 forum featured a “world café” rotation of all participants among a collection of housing interest groups, followed by break-out sessions investigating the three solutions identified in 2018. The break-out sessions ended with a plenary summary session and opportunities to sign up for two additional work sessions per solution over the summer.

1 For more information on Community Solutions to Affordable Housing, please visit www.ksu.edu/cecd/civic/csah/
World Café

The objective of the World Café session was to maximize interaction with task-oriented visits to as many discussion tables as possible within a short time. Each table was hosted by a housing interest group². Fifteen local government, non-profit, and business interest groups associated with housing were invited. Of those, nine offered tables, and two city agencies sent pairs of representatives without tabling. The task of each roving participant was to interact with the housing interest group then leave a vote (colored dot) on a Values Matrix of terms the housing group maintained at its table. Value terms were collected in advance from website or Facebook pages of all groups invited.

² Flint Hills Association of Realtors; Flint Hills Metropolitan Planning Organization & ATA Bus; Manhattan Area Habitat for Humanity; Manhattan Area Housing Partnership; Manhattan Area Technical College; Manhattan Emergency Shelter, Inc; Manhattan Housing Authority; Region Reimagined; Renters Together
Value terms from invited housing interest groups:

accessibility
accountability
advocacy
affordability
assistance
choice
community involvement
community outreach
community vitality
compassion
democratic participation
dignity
diversity
economic development
efficiency
equity
ethics
faith-based
financial solvency
growth
habitability
health equity
home ownership
hope
housing rights
jobs
low-income
minorities
mobility
partnerships
professionalism
property maintenance
quality of life
renters
safety
self-sufficiency
seniors
shelter
skilled, qualified work[ers]
smart growth
social equity
students
support
transformational development
sustainable community
transportation
volunteerism
workforce

Values matrix after visits: Sample from the Manhattan Area Habitat for Humanity table:

**HOUSING VALUES MATRIX – MAHFH**
A Word Cloud illustrates by font size the number of times a word has been selected. Before visits by the participants, the value terms that were selected by a third or more of the nine housing interest groups were: Affordability(5), Safety(4), Choice(4), Seniors(4), Community Involvement(3), Community Vitality(3), Partnerships(3), Low-Income(3), Quality of Life(3), and Renters(3). Thirty-four participants were given 10 voting dots per person, and the value terms most selected after roving among the tables were Affordability(31), Safety(12), Homeownership(12), Mobility(12), Qualified skilled workers(12), and Sustainable Development(11).

Notably, both housing groups and participants gave highest rankings to affordability and safety, but participants did not overlap with housing organizations in the remainder of value terms that had more than a third of their votes. Housing groups recognized the closely related values of community involvement, community vitality, and partnerships to goal achievement, and their appearance at this forum was a testimony to that. They also showed a marked interest in renters, while participants selected homeownership as a high-ranking value. Quality of Life was a significant value signaled by housing interest groups, and qualified skilled workers was a value highlighted by participants.

These distinct value choices are not so dissimilar as to suggest that the preferences of Manhattan residents as a whole (not represented in this sample) are not reflected in the approaches of housing interest groups. But the value frames that engaged residents “bring to the table” when addressing this issue can influence agendas and broader involvement. When the scores were combined, the primary values that might inform future joint conversations were Affordability(36), Safety(16), Sustainable Development(14), Qualified Skilled Workers(13), Mobility(13), Homeownership(13), along with Assistance(11) and Low Income(11) focus.
Break-out Sessions

After a plenary review of the profile of housing values and priorities, participants were asked to select a breakout session to attend based on the solution that seemed to them most aligned with their own values. Each of those sessions began with an exercise in introductions that involved stating one’s name and a strongly-held housing value, then tossing a ball of twine to a person in the circle who indicated they also prioritized that value, until a visible network including all individuals was formed. Following a template, facilitators issued questions to each solution group that paired current [undesirable] situations with future [desired] outcomes, assets/resources with challenges/barriers, and a short list of potential projects to be developed in more detail during the summer Study Circles. The following pages contain templates of notes from the three solution break-out groups.

### Potential Projects (to be developed in detail during June, July)

- Certification (“approved” rentals) -> Scorecard (e.g., military)
- Include info in lease re: rights and resources (Ordinance)
- Amendment to current registration process

### Focused Outcome for: Neighborhood Revitalization Programs

<table>
<thead>
<tr>
<th>Current Situation</th>
<th>Desired Future (Outcomes)</th>
</tr>
</thead>
</table>
| NORTHVIEW -
  education access
  elementary school size | Every apartment allowing 10% Section 8 /4142 vouchers
  Change community perception |
| Section 8 Stigma | Improved housing quality ->
  Seamless neighborhood transitions
  Continuity of place/quality of place
  Sense of vitality, pride, care
  Infrastructure & roads |
| Transitional state ->
  KSU enrollment down
  Ft. Riley deployments
  Med. income up (MHK, MSA)
  Long-term landlords retiring
  Rental rates down (+affordability –stock) | Property owner accountability ->
  maintenance |
| Lower quality for price compared with others
  in Midwest (quality, character, price point) | Renter rights/agreement awareness |
| Talent retention problem | Needs based, collaborative grassroots plan
  Adopted by city, incorporated in CIP
  Focus on CORE³ area |
| What is affordability? -
  > HUD cost burden,
  > 30% monthly income spent on housing | Prevent apartment oversaturation |
| EAST CAMPUS –
  Unsafe housing; dilapidated houses; broken windows; drug issues
  Lack of housing for large household size that is affordable & safe
  Campus Edge up-zoned | City MHK has bldg. codes; surrounding areas don’t, but will -> prevent sprawl |
| | Taxes and specials – Higher costs; Unknown, Misconceptions |

³ CORE area – East and West campus, Downtown focus
### Assets / Gifts / Resources vs. Challenges / Barriers

<table>
<thead>
<tr>
<th>Assets / Gifts / Resources</th>
<th>Challenges / Barriers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Neighborhood MHK launched – organic structure</td>
<td>Income based/owner assistance can’t help large # of rental property generally</td>
</tr>
<tr>
<td></td>
<td>Heavy rental demand w/ few owners -&gt; single family zones to attract owners failed</td>
</tr>
</tbody>
</table>

### Potential Projects (to be developed in detail during June, July sessions)

- Recommendations on type of development should be part of the neighborhood revitalization plan
- Get neighborhood buy-in on plans/projects
- Leverage grant funds (to help broader population) -> equitability
- Incentivize maintenance / buy in (small gifts) -> younger population
- Secondary dwelling unit to harness rental demand: affordable; attentive; attractive
- Incentives to afford renovations? Grants; matching; involve homeowners & landlords
- Neighborhood associations -> collective action
- Code enforcement

### Focused Outcome for: Community Housing Trust 113

<table>
<thead>
<tr>
<th>Current Situation</th>
<th>Desired Future (Outcomes)</th>

</tr>
<tr>
<td>Unoccupied, deferred maintenance properties – Existing stock could be sold cheaply. City could put pressure on landlords to sell/donate</td>
<td></td>
</tr>
<tr>
<td>As a non-profit developer, can get representation</td>
<td></td>
</tr>
</tbody>
</table>
### Potential Projects (to be developed in detail during June, July sessions)

- Establish the legal foundation for a land bank/trust.
- Put a plan in place for the non-profit entity (proposal).
- Identify and inventory tax foreclosed properties.
- Reach out to owners of unoccupied/deteriorating properties.
- Determine if Habitat for Humanity works with land trusts.

### Summary

Before adjourning, participants from the three break-out sessions reconvened to share the desired outcomes and potential projects they discussed. As in 2018, an invitation was extended by the CSAH project team to anyone interested in meeting for further development of project proposals, in June and July. These meetings will be scheduled two times per solution interest group and will also update participants on parallel developments happening through other government, private, and non-profit housing interest groups. To track progress of the Community Solutions to Affordable Housing project, please visit the project website ([www.ksu.edu/cecd/civic/csah/](http://www.ksu.edu/cecd/civic/csah/)) or contact any of the CSAH investigators listed below.

This forum was funded by a two-year grant by the Kansas Health Foundation to the Center for Engagement and Community Development in support of housing studies and the engagement of residents and public officials around affordable housing issues in Riley County.
