

Biographical Sketch- Viktor Chikan, PhD in experimental physical chemistry/material science/spectroscopy

Brief summary of past research areas/experiences/interests: Colloidal synthesis of magnetic, semiconducting and metal nanomaterials, physical chemical and optical characterization of nanoparticles, magnetic hyperthermia, magnetic field induced drug release, magneto-liposomes, magneto optic effects in colloidal nanoparticles, chemical dynamics, terahertz spectroscopy, chemical dynamics, ultrafast spectroscopy, transient absorption spectroscopy

Professional Preparation:

- University of Szeged, Szeged, Hungary, Organic Chemistry, MSc, 1998
- Kansas State University, Manhattan, KS, Physical Chemistry, PhD 2002
- University of California and LBNL, Berkeley, CA, Chemical Dynamics, postdoc 2005

Appointments:

Associate Professor in chemistry

Kansas State University 2011-Present

Consultant Extreme Light Infrastructure-Attosecond Light Pulse Source (ELI-ALPS), Hungary

2020-

Group Leader, Extreme Light Infrastructure-Attosecond Light Pulse Source (ELI-ALPS), Hungary

2016-2019

Sabbatical in Hungary: Visiting Professor

Department of Optics and Quantum Electronics/University of Szeged/Hungary (with prof. Karoly Osvey)

2014

Assistant Professor in chemistry

Kansas State University

2005-2011

Postdoctoral Researcher (advisor: Stephen R. Leone)

University of California and LBNL, Berkeley, CA

2003-2005

Graduate Research Assistant (advisor: David F. Kelley)

Kansas State University

1999-2002

Analytical Chemist

Bend Research Inc., Bend, OR

1999

Experience and Brief Summary of Accomplishments:

Assistant Professor and Associate Professor, Kansas State University, USA (2005 – present):

- Teaching experience: Physical Chemistry I and II, Chemistry I and graduate nano-science, Material Chemistry
- Train undergraduate students and graduate students, supervised postdocs
- Developed several new graduate and undergraduate course: Nanophotonics, Introduction to nanotechnology, Material Chemistry, Chemical Kinetics
- Built and constantly develop research program in the field of nano- and biotechnology
- Built/managed research lab, built many spectroscopic equipment, developed electromagnets
- Established collaborations with academia and industry (Nanoscale Inc, University of Kansas, ELI-ALPS)
- Obtained funding from various agencies (NSF, NIH, ACS, DOE, Johnson Cancer Center)
- Developed control, analysis and modelling programs in MATLAB/LabVIEW, Arduino C
- Developed several new nanomaterials (doped CdSe, iron silicide, gold-iron alloy nanoparticles etc.) and new methodologies to synthesize nanomaterials
- Studied efficiencies of solar cell components by single molecule microscopy
- Developed magneto liposomes drug delivery system
- Developed magnetic hyperthermia treatment for cancer
- Developed magnetic pulse induced microporation technique for cancer treatment
- Formal and Informal Oral Presentations at international/national conferences at universities at high school/middle school level
- Serving in Campus Laser Safety Committee (8 years), and Departmental Safety Committee (3 years), Integrity in Research and Scholarly Activity (started now), Graduate Research Council from 2021
- Served on various university committees: recruiting committee (10 years), Chair and councilor of the Local Chapter of ACS (7/4 years)

- Directly awarded 2 million dollars for individual research, and raised over 20 million dollars collaboratively for research

Group Leader of Ultrafast Dynamic and Reaction Control at ELI-ALPS, Szeged, Hungary (2016-2019)

- **Management and administration of ULTRAFAST DYNAMICS GROUP (formerly known as Ultrafast Dynamics and Reaction Control Group)**
- Developed conceptual plans for building transient absorption spectrometer and implemented the design and construction, software development for device integration
- Constructed an ultrafast laser laboratory to study the impact of terahertz on physical and chemical process, developed in situ chemical reactor for integrated transient absorption and reflectivity measurements
- Developed/implemented FT-VIS to study XUV photofragmentation of small molecules, studied terahertz generation from 2 color laser induced air plasmas
- Hired/Trained team members for the group, assisted procurement process for physical infrastructure
- Supervises group members and manages the direction of laboratory
- Developed plans for XUV/Terahertz beamline at ELI-ALPS
- Collaborate/negotiate with external and internal users

Postdoctoral Work – UC, Berkeley and Lawrence Berkley National Lab (2003-2005)

Postdoctoral Advisor: Prof. Steve Leone

- Performed Time-resolved FTIR/VIS emission studies of combustion dynamics by excimer lasers
- Developed high-resolution Fourier Transform Visible Spectroscopic methodology to study combustion processes
- Worked with femtosecond lasers and synchrotron source at the Advanced Light Source

PhD Graduate Research - Kansas State University, USA (1999 – 2002)

PhD Dissertation title: Layered semiconductor nanoparticles

PhD Graduate Advisor: Professor David F. Kelley (UC, Merced)

- Developed the synthesis of GaSe (and InSe) and MoS₂ quantum dots
- Investigated the carrier dynamics in nanostructures by ultrafast laser spectroscopy
- Gained hands on experience with several Ti:Sapphire femtosecond and picosecond laser systems, including regenerative amplifiers and optical parametric amplifiers
- Designed and built instrumentation for optical measurements and interfaced analog instruments to computers
- Served as Vice President of Alpha Epsilon chapter of Phi Lambda Upsilon, received several classroom and research awards, published 7 papers

Analytical Chemist - Bend Research Inc., Oregon, USA (1999)

- Developed automated GC to analyze solvent and gas
- Built membrane testing equipment to characterize the permeability of separation membranes
- Studied drug release capability of biopolymers

Graduate work - University of Szeged, Hungary (MSc graduation: 1998)

Master thesis title: Atmospheric synthesis of MIBK over MgO supported Cu catalysts

Master Graduate Advisor: Professor Arpad Molnar

- Developed industrial catalysts to produce MIBK
- Characterized catalysts by various analytical techniques and explored reaction mechanism

Soft Skills: Team leadership skills including project development/management, training/motivating of postdocs, researchers, students, project reporting, financial managements, presentations skills, international collaborative work, strong work ethic, flexibility

Technical Skills:

Programming skills: Matlab, Labview, C, C++, Pascal, Basic, Fortran, Arduino C, Origin C

Simulation: COMSOL Multiphysics, Monte Carlo simulation, Zemax, Kinetics, diatomic Spectroscopy, PGopher

Instrumentation (expert level): Transient absorption spectroscopy, ultrafast pulse characterization (auto correlator, FROG), time correlated single photon counting spectroscopy, Measurement of steady-state and particularly time-resolved fluorescence anisotropy, time-domain terahertz spectroscopy, time-resolved FTIR/FTVIS emission and absorption spectroscopy, Gas chromatography/mass spectrometry, optical rotation (Faraday) measurements, in situ spectroscopic measurement tools, TEM/HRTEM, electron diffraction, magnetic AC susceptibility measurement, high vacuum systems, pulsed electromagnets (rotating and underdamped), induction heating electromagnets,

Hands on experience with coherent and incoherent light sources: ultrafast light sources (Ti:sapphire regenerative amplified or cavity dumped laser systems), CEP stabilized pulses, Generation of terahertz radiation from 2 color laser induced plasma, Generation of terahertz radiation from optical rectification, Generation of terahertz radiation from GaP and ZnTe, Generation of high-power terahertz pulses by tilted-pulse-front excitation, Synchrotron radiation (5-20 eV), nanosecond flash lights, excimer laser, YAG laser, diode lasers (built own fiber coupler)

Analytical tools: Single molecule spectroscopy, Raman spectroscopy, XRD, SAXS, NMR, SQUID, EDX, XPS, time of flight mass spectrometry, Thermal Analysis (DTG, DTA) Dynamic Light Scattering (DLS), Atomic Absorption Spectroscopy, SEM, TEM, SEM and AFM

Electronics: picosecond timing electronics, National Instrument and other DAQ boards and cards, nanosecond transient cards, piezo valves, lock in amplifiers, voltage and current amplifiers, timing electronics, Arduino controllers, digital (I2C and SPI) and analog sensors, motion control (stepper motor and servo controllers), optical delay lines (mechanical and piezo), temperature controllers, mass flow controllers, microwave generators

Detectors: avalanche diodes, silicon detectors, CCDs, balanced detection systems, cooled IR detectors, XUV detectors, MCP, ultrasound detection with hydrophones, integrating spheres, fiber optic spectrometers

Colloidal Nanoparticle Synthesis: magnetic, semiconductor, and insulator materials, gold coating of magnetic nanoparticles (hot injection method, single precursor synthesis, induction heating synthesis, room temperature precipitation)

Awards Received:

Ervin W. Segebrecht Teaching award (2020), Faculty Development Award (2009), Phi Lambda Upsilon Graduate Research Award (2002), International Graduate Student Award (2002), Phi Lambda Upsilon Graduate Classroom Achievement Award (2001), Chemistry Merit Fellowship at KSU (1999 and 2000), Hungarian Chemical Society Award (1998)

Teaching:

Graduate and Undergraduate Classes Taught at Kansas State University:

Advances in Nanotechnology (CHM 955) - Fall of 2005, 2006, 2007

Chemistry II (CHM 230) - Summers of 2007, 2011, 2013, 2015

Chemical Kinetics (CHM 955)-Spring of 2010, 2013, 2015, 2018

Introduction to Nanophotonics (CHM 955)-Spring of 2011, Fall of 2013, 2014, 2017, 2019

Physical Chemistry I (Thermodynamics/Chemical Kinetics) (CHM 585) – Falls of 2008, 2009, 2010, 2011, 2012, 2016, 2020

Physical Chemistry II (CHM 595) (Quantum mechanics, Spectroscopy, Statistical thermodynamics) - Springs of 2007, 2008, 2012, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021

Physical Methods Lab (CHM 596) - Spring of 2006

Material Science course (CHM 820) - Spring of 2006

General Chemistry (CHM 110)-Summers of 2008, 2009

Novel teaching approaches: Introducing Matlab Programming into a graduate level Chemical Kinetics and Nanophotonics Course, Implementing i-Clicker for various courses for interactive learning

Professional Memberships and Affiliations:

American Chemical Society, Hungarian Chemical Society, Phi Lambda Upsilon Honorary Chemical Society, Alpha Chi Sigma chemistry fraternity, Johnson Center for Basic Cancer Research, Midwest Institute for Comparative Stem Cell Biology

Recent Services:

Magnetochemistry editorial board, Chair of ACS local chapter (2005-2014); ACS Alternate Councilor (2013-2016), ACS Councilor (2017-Present), Member of Graduate Recruiting Committee (2005-2014); Member of Faculty Search Committee for theoretical chemistry position; Recruiting talks at regional colleges; Doctoral and Masters Committees (KSU 54 total, 1 University of Szeged, 2 IIT Roorkee); Organizing Physical Chemistry Seminar; Reviewer duties for several domestic (DOE, NSF, ACS, Maryland Industrial Partnerships Program) and international funding agencies (L'Agence Nationale de la Recherche (ANR), Czech Academy of Sciences, Estonian Research Council) and journals, Campus Laser Safety Committee, Faculty advisor for Alpha Chi Sigma

Graduate Advisors and Postdoctoral Sponsors:

MSc - Prof. Arpad Molnar (University of Szeged, Hungary)

PhD - Prof. David F. Kelley (UC, Merced)

Postdoc - Prof. Stephen R. Leone (UC, Berkeley)

Current and Former Undergraduate Students:

Fadzai Fungura (Process Engineer at Intel Corporation), Curt Hamphill (Senior Process Engineer at Burns & McDonnell), Brett Vaughn (Professional Research Assistant at University of Colorado Denver), Christopher Lewis (Laboratory Technologist II at Halliburton), Alicia Aguirre (PhD student Iowa State University), Saralyn Ogden (Software Engineer, Seattle area), Nathan Young (Kaplan GRE teacher and former engineer at Graphene Frontiers), Dr. Lorinc Sarkany (finished PhD University of Tübingen interviewing in Japan for postdoc), Alec Todd (not known), Amanda Baxter (Ph.D. Candidate at University of Southern California), Joshua Shipman (PhD student University of Kansas), Emery Brown (graduated from KSU), Dr. John Moore (postdoc, University of Barcelona), Chris Ramirez (Test Engineer, Washington DC), Matthew Taw (Technical Lab Coordinator Louisville, Kentucky Area), Krisztina Sarosi (University of Szeged), Daniel Tye (KSU), Karan Mehra (RF Design Engineer at ViaSat Phoenix, Arizona Area), Zachary Sliefert (Software Engineer at Decision Resources Group Kansas City, Missouri Area), Noah Hollinger (KSU), Nathan Flesher (KSU), Erwin Petracs (University of Szeged), Mathew Davis (KSU)

Current and Former Graduate Students:

Dr. Pinard Dagtepe (Boston Turkish Embassy), Dr. Naweem Dahal (Environmental Health And Safety specialist University of Texas, Austin), Dr. Christopher Tuinenga (Adjunct Professor at Elmhurst College), Dr. Raj Kumar Dani (Senior Lecturer, Trinity International College, Dillibazar, Kathmandu, Nepal), Dr. Santanu Roy (Assistant Professor Dimapur, St John College, Nagaland, India), Dr. Hongfu Luo (Toronto/Canada currently seeking employment), Dr. George Podaru (Works at Nitech is one of the top Romanian suppliers of high-end technology instruments for general laboratory, diagnostic and research purposes.), Krisztina Sarosi (currently PhD student at ELI-ALPS), Basanta Acharya (currently PhD student at KSU), Pratikshya Sharma (currently PhD student at KSU), Laszlo Bodnar (MSc 2019 KSU), Roland Flender (University of Szeged/ELI-ALPS co-adviser with Adam Borzsonyi), Mohammad Sadegh Yazdanparast (finished 2018), Omid Shafiee

Current and Formal Postdoctoral trainees:

Dr. Pankaj Kanti Mandal (Associate Professor IISER Pune, India <http://www.iiserpune.ac.in/~pankaj/>), Dr. Karoly Mogyorosi (senior research fellow at ELI-ALPS)

PhD advising (committee member, but not major professor): 50 (Kansas State University, University of Szeged, IT Roorkee)

PhD Dissertations:

1. Dr. Yazdanparast, M. S.2018.PhD, Kansas State University Complementary Tuning Semiconductor NCs Properties Using Precursor Reactivity, Doping, and Post-synthetic Modification post-synthetic modification. McLaurin, E. J.; Chikan, V.
2. Dr. Podaru, G.2017.PhD, Kansas State University Exploring Controlled Drug Re-lease from Magneto Liposomes. Chikan, V.
3. Dr. Luo, H.2016.PhD, Kansas State University Understanding and controlling defects in quantum confined semiconductor systems. Chikan, V.
4. Dr. Roy, S.2013.PhD, Kansas State University Spectroscopic study of defects in cadmium selenide quantum dots (QDs) and cadmium selenide nanorods (NRs). Chikan, V.
5. Dr. Dani, R. K.2012.PhD, Kansas State University Exploring physical properties of nanoparticles for biomedical applications. Chikan, V.
6. Dr. Tuinenga, C. J.2011.PhD, Kansas State University Indium, tin, and gallium doped cadmium selenide quantum dots. Chikan, V.
7. Dr. Dahal, N.2010.PhD, Kansas State University Synthesis and characterizations of novel magnetic and plasmonic nanoparticles. Chikan, V.
8. Dr. Dagtepe, P.2010.PhD, Kansas State University Quantized growth of semi-conductor nanoparticles, investigation of aggregation dynamics and the growth kinetics. Chikan, V.
9. Sharma, Pratikshya 2017-current, before PhD candidacy, Kansas State University, Inductive heating synthesis of nanoparticles

10. Acharya, Basanta 2016-current, candidate for PhD, Kansas State University, Pulsed magnetic field induced drug delivery
11. Bodnar, Laszlo, 2017-2019, MSc, Kansas State University, Manipulation of magnet-ic nanoparticles with rotating and pulsed magnetic field
12. Sarosi, Krisztina, 2014-2015, MSc in physics, University of Szeged, Hungary, Két hullámhosszú ultrarövid impulzussal plazmában keltett terahertzes sugárzás vizsgálata a spektrális fázisderiváltjainak függvényében
13. Sarosi, Krisztina, 2016-present, before PhD candidacy, ELI-ALPS, Tentative title: Terahertz probe frequency in transient pump-probe experiments
14. Flender, Roland, 2017-current, after PhD candidacy, ELI-ALPS, Hungary, tentative title: Terahertz generation from MID IR lasers (co-advised with Adam Borzsonyi)

Oral Presentations (excluding contributed presentations):

1. Characterization of the CN(B) and CH(A) radical formation in plasma generated by femtosecondlaser pulses via step-scan FT-UV-VIS spectroscopy, International laser-induced breakdown spectroscopy (LIBS) workshop, Szeged, December 1-2, ZOOM
2. Playing with Intense THz Electric and Magnetic Fields, UC Davis, 2020, November 10th, Zoom
3. Ultrasound from magnetic pulses/magnetic nanoparticles for effective drug delivery with liposomes and for cancer treatment, Pittsburg State, 2020, October 6th, Zoom
4. Shaping magnetic fields for effective drug transport across liposome membranes, Spring 2019 National Meeting & Expo, April 3rd, 2019, Orlando, Florida
5. Manipulating Nanoparticles with Intense Electric and Magnetic Fields, March 29th, 2019, KTH Royal Institute of Technology in Stockholm, Sweden
6. Manipulating Nanoparticles/Molecules with Intense Electric and Magnetic Fields, Cymer, Sand Diego, CA, March 10th, 2019
7. Manipulating Nanoparticles/Molecules with Intense Electric and Magnetic Fields, Hebrew University at Jerusalem, Israel, November 11th, 2018
8. Manipulating Nanoparticles/Molecules with Intense Electric and Magnetic Fields, Tel Aviv University, Israel, November 8th, 2018
9. Building a Better Nanoparticle, Fraunhofer-Institut für Silicatforschung ISC, Wurtzburg, Germany, November 14th, 2017
10. (Magnetic) Nanoparticles in intense Electric and Magnetic Fields, Foundation for Research and Technology – Hellas, Crete, Greece, October 26th, 2017
11. Exploring the impact of intense THz electric fields on molecular and electronic processes at the Extreme Light Infrastructure, Department of Chemistry, Kansas State University, August 31st, 2017
12. Scientific Advisory Committee 9th Meeting: Terahertz Reaction Control Group, ELI-ALPS, Szeged, 13-14th July, 2017, ELI-ALPS, Szeged
13. 23rd Scientific Management Meeting: Terahertz Reaction Control Group, 10-11th July, 2017, ELI-ALPS, Szeged
14. 3rd ELIP-ALPS Science Day, Terahertz Reaction Control Group, ELI-ALPS, July 12th, 2017
15. 23rd Scientific Management Meeting: First Terahertz Experiments, 10-11th July, 2017, ELI-ALPS, Szeged
16. Exploring the Impact of Large THz Electric Fields on Molecular and Electronic Processes in Gas and Solid Phase – Terahertz Reaction Control Group at Extreme Light Infrastructure, Chemical Dynamics Beamline seminar at Advanced Light Source, Lawrence Berkeley Laboratory, April 3rd, 2017
17. Induction and microwave heating in syntheses of CdSe quantum dots: Effects of extreme high heating rate on their nucleation and growth kinetics, ACS 253rd National Meeting in San Francisco, April 2nd, 2017
18. Exploring the Impact of Large THz Electric Fields on Molecular and Electronic Processes in Gas and Solid Phase – Terahertz Reaction Control Group at Extreme Light Infrastructure, Atomic, Molecular, and Optical Physics (AMO) Seminar at JR. Macdonald Laboratory at KSU, January 18, 2017
19. Terahertz Beamlines& Applications, 4thELI-ALPS User Workshop, Szeged, Hungary,10–11 November 2016, Jozsef Fulop
20. Computer simulation of magnetic nanoparticles using 4th order Runge Kutta for magnetic heating and ultrasound production. K. Mehra, Z. Sliefert, V. Chikan, 2016 October 26-28, ACS Midwest Meeting

21. Induction and microwave heating in syntheses of CdSe quantum dots: Effects of extreme high heating rate on their nucleation and growth kinetics. H. Luo, B. Kebede, E.J. McLaurin, V. Chikan, 2016 2016 October 26-28 ACS Midwest Meeting
22. Aszimmetrikus levegőplazmában keltett terahertzes rövidimpulzusok vizsgálata, Magyar Fizikus Vándorgyűlés 2016, Sárosi Krisztina , Flender Roland , Börzsönyi Ádám , Chikán Viktor
23. The impact of dispersion of the ultrashort light pulses on the THz radiation formation from asymmetric air plasmas, Attosecond Light Pulse Source (ELI-ALPS) fourth User Workshop on November 10-11, 2016, in Szeged, Hungary, Roland Flender , Krisztina Sárosi , Ádám Börzsönyi , Viktor Chikán
24. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, Extreme Light Infrastructure, Budapest, WIGNER FK SZFI SZEMINARIUM, November 3rd, 2015
25. 250th American Chemical Society National Meeting & Exposition, Boston, Synthesis and characterization of gallium doped CdSe quantum dots (final paper number: PHYS 413), 2015 August 19th
26. 250th American Chemical Society National Meeting & Exposition, Boston, Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation (final paper number: COLL 454), 2015 August 19th
27. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, Extreme Light Infrastructure, Szeged, December 5th, 2014
28. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, "Ecole d'ingénieur", "Ecole Supérieure de Physique et de Chimie Industrielles", ESPCI, Paris, November 24th, 2014
29. American Higher Education, University of Szeged, Szeged, Hungary, November 13th 2014
30. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, University of Szeged, Szeged, Hungary, November 6th 2014
31. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, University of Gdańsk, Gdansk, Poland, October 16th 2014
32. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, Jagiellonian University, Krakow, Poland, October 10th 2014
33. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, University of Pecs, Pecs, Hungary, September 25th 2014
34. Building a Better Nanoparticle: Part I Doping Colloidal Quantum Dots Part II: Pulsed magnetic field induced fast drug release from magneto liposomes via ultrasound generation, Koc University, Istanbul, Turkey, September 11th 2014
35. Investigation of Fluorescence Emission from CdSe Nanorods in PMMA and P3HT/PMMA Films, 57th Midwest Solid State Conference, Lawrence, KS, September 28th, 2013
36. Building a Better Nanoparticle, Truman State University, Kirksville, September 13th, 2013
37. Indium, tin, and gallium doped CdSe quantum dots for use in hybrid photovoltaic devices, 245th ACS National Meeting & Exposition, New Orleans, April 7th, 2013
38. Challenges of controlling defects and composition of semiconductor quantum dots, 245th ACS National Meeting & Exposition, Industrial and Engineering Chemistry Fellow: Symposium in Honor of Larry Erickson, New Orleans, April 8th, 2013
39. Building a Better Nanoparticle, University of North Carolina, Chapel Hill, February 14th, 2013
40. Fluorescence blinking of single CdSe Nanorods in P3HT/PMMA film, 16th International Conference on Solid Films and Surfaces, Genoa, Italy, July 1st-July 6th, 2012
41. Fluorescence blinking of single CdSe Nanorods in P3HT/PMMA film, 3rd Annual Program Review NSF EPSCoR Kansas Center for Solar Energy Research, Wichita, Kansas, June 10-12, 2012
42. Sustainable materials for solar energy conversion, 6th Annual Chemistry & Physics High School Symposium Kansas State University, April, 12th, 2012
43. 1st Chemistry and Physics Symposium at Kansas State University for Middle school students interested in renewable energy, 2011 October 6th
44. 243th ACS National Meeting, Denver, Fluorescence intermittency of CdSe nanorods in PMMA/P3HT polymer blend, 2011 August 29th-September 1st
45. EuroNanoForum, Budapest, Doping Semiconductor Quantum Dots, 2011 May 30th –June 1st

46. 56th ACS Pentasectional Meeting, Bartlesville, OK, Magnetic Hyperthermia: Integrating Nanotechnology with Biology for Cancer Therapy and Doping Semiconductor Quantum Dots, 2011 March 12th
47. University of Ohio, Athens, Doping Semiconductor Quantum Dots, 2011 March 11th
48. Pittsburg State University, Doping Semiconductor Quantum Dots, 2011 February 11th

Poster Presentations (student presentations not considered here):

1. Impact of Gallium Doping on CdSe Quantum Dots, 57th Midwest Solid State Conference, Lawrence, KS, September 28th, 2013
2. 239th ACS National Meeting & Exposition, San Francisco, Doping semiconductor quantum dots, 2009 March 22nd-25th
3. Gordon Research Conference Mount Holyoke College Clusters, Nanocrystals & Nanostructures, Doping Semiconductor Quantum Dots (QD), Effect of Indium Doping on the Growth Kinetics of CdSe Quantum Dots, Terahertz Spectroscopy of Charged Quantum Dots, 2009 July 19-24
4. SOLAR Workshop in Boulder Colorado, Doping Semiconductor Quantum Dots (QD), Effect of Indium Doping on the Growth Kinetics of CdSe Quantum Dots, Terahertz Spectroscopy of Charged Quantum Dots, 2008 August 15th
5. Gordon Research Conference Lake Tahoe, Atomic and Molecular Interactions, (U. California Berkeley) "Product state distributions of vibrationally excited CO(v) for the CH(X2Π) and CH(A2Δ) channels of the C2H + O(3P) reaction", 2004

Financial Awards and Contracts:

1. Startup funds, Kansas State University, \$540,000
2. COBRE Center for Cancer Experimental Therapeutics, \$98,000, 05/01/2007-12/31/2008 Targeting cancer with protein-nanoparticle complexes, Stefan Bossmann, Viktor Chikan, Paul Smith
3. Terry C. Johnson Center for Basic Cancer Research, \$12,000, 2007, Magnetic Hyperthermia Apparatus, Viktor Chikan and Deryl Troyer (Department of Anatomy and Physiology, KSU)
4. KSU-University Small Research Grant, \$1000, 2007, Melting Au/Fe Core/Shell Metal Nanoparticles on Silicon for Catalyzing Radial Nanowire and Nanotube Growth, Viktor Chikan
5. American Chemical Society Doctoral New Investigator, \$100,000, 05/01/2009-05/01/2011, Investigation of Dopant Incorporation in Semiconductor Nanoparticles by *in situ* Time-resolved Fluorescence Spectroscopy and Terahertz Spectroscopy, Viktor Chikan
6. KSU-Faculty Development Award, \$500, Travel to Gordon Research Conference on Clusters, Nanocrystals & Nanostructures to be held 07/19/2009 - 07/24/2009 at Mount Holyoke College in South Hadley, MA, Viktor Chikan
7. National Science Foundation STTR/SBIR phase I, \$250,000 (50,000 matching funds from Kansas Bioscience Authority), 7/1/2009 - 12/01/2010, Intelligent Low Toxicity Materials for Cancer Diagnosis and Treatment, Stefan Bossmann, Viktor Chikan, Deryl Troyer, NanoScale Co.
8. National Science Foundation, \$23,000,000, 10/01/2009-09/30/2014, Phase VI: Climate Change and Energy: Basic Science, Impacts, and Mitigation Science Initiative, Collaborative (full list of personnel is here: http://www.nsfepscor.ku.edu/ph6_personnel.html) (#0553722)
9. Retired General Harvey McCarter, \$5000
10. National Science Foundation (#1128570), \$333,810, 08/01/2011-07/31/2014 Exploring Controlled Drug Release from Magneto-Liposomes by Alternating and Pulsed Magnetic Fields, Viktor Chikan, Stefan Bossmann
11. National Science Foundation (#1608344), \$345,000, 09/01/2016-08/31/2019 Exploring Controlled Drug Release from Magneto-Liposomes by Alternating and Pulsed Magnetic Fields, Viktor Chikan
12. Department of Energy, Basic Energy Sciences (EC9980), \$598,86.0 09/15/2016-09/14/2019 Step Catalysis to Synthesize Fossil-Free Ammonia at Atmospheric Pressure, Peter Pfromm, Viktor Chikan, Bin Liu
13. Building Terahertz User facility at the Extreme Light Infrastructure (ELI ALPS), startup funds (350k euro) plus 1 student and postdoc salary
14. Synergist Therapy for Enhanced Anticancer Agent Delivery: Magnetic Field Facilitated Nanoparticle Microporation., Terry C. Johnson Cancer Center Affiliate, \$22,000, 04/01/2018, Ryan Rafferty, Viktor Chikan
15. MRI: Acquisition of high-power 100 kHz laser for recording real-time movies of ultrafast molecular reactions, NSF MRI (#2019150), \$1,156,700.00, 08/11/2020-8/31/2022, Lead P.I: Artem Rudenko, PI: Chikan

16. Pulse magnetic field induced drug release from hard silica magnetic rattle cages, Johnson Cancer Center, \$18,000, 2021, Viktor Chikan
