NOTES:

1. Level 1 rodent rates include ventilated/static micro-isolator cages, conventional shoebox cages, and wire-bottom cages.
2. Level 2 rodent rates include breeding colony cages, aseptic micro-isolator cages (autoclaved-in), and ABSL-2 micro-isolator cages (autoclaved-out) @ 125% of level 1 rate.
3. Level 3 rodent rates include aseptic ABSL-2 micro-isolator cages (autoclaved in & out) @ 150% of level 1 rate.
4. Level 4 rodent rates include ABSL-3 micro-isolator cages @ 200% of level 1 rate.
5. Large cage rates for each rodent species care level is 120% of small cage rate for that species & care level.
6. Level 1 guinea pig rate is based on 125% of the calculated Level 1 rat rate.
7. Goat rate is based off of sheep rate (similar small ruminant species)
8. Deer rate is based off of sheep/goat rate (similar small ruminant species).
9. Proposed rate is CMG Director's best estimate due to small data set for calculating a valid rate, small % of total animaldays/cagedays, and small/negligible impact on overall CMG budget.
10. Proposed FY17 livestock per diem rates (Codes 400-699) don't include feed, hay, or bedding which will be billed separately in addition to per diem charges @ 105% of cost.
11. The extramural rate for non-KSU investigators is the intramural rate multiplied by the applicable full KSU F&A rate (see <http://www.k-state.edu/research/preaward/indirect.html>)
12. Off campus transportation rates is calculated at tech time rate + mileage rate.
