Individual Differences in Drug Abuse: Connecting Neuroscience and Prevention Science

Monday, April 23rd, 3:30 p.m.

Bluemont Hall, Room 5102

Mike Bardo is the Director of the NIDA funded Center for Drug Abuse Research Translation at the University of Kentucky. Mike has received numerous awards for his research and student mentoring. To date, he has over 200 peer reviewed journal articles in the area of drug abuse. Mike will be discussing some of his recent work using preclinical rodent models that connects neuroscience and prevention science.
