

Data Governance Steering Committee Charter

The *Data Governance Steering Committee* provides strategic oversight for university institutional data governance and management. Its responsibilities include:

- **Planning:** Define the strategic vision and goals for data governance aligned with university objectives and goals.
- **Policy and Standards:** Establish data policies, procedures, standards and definitions for consistency, compliance and operational excellence.
- **Resource Advocacy:** Identify, discuss and advocate for resource needs to sustain effective data governance.
- **Guidance and Oversight:** Identify best practices and lead initiatives to enhance data quality, communication, process standardization, and usage.
- **Cross-Committee Collaboration:** Ensure the alignment of data governance work with related activities and projects initiated by other university committees.
- **Alignment:** Provide a collaborative conduit for improving the efficiency of data governance at the university.
