Classroom management

IT IS NOT JUST

- ✗ “discipline” in the classroom
- ✗ handling problems
- ✗ controlling problem students

IT IS

Designing, implementing, and **supporting a classroom environment where students can engage and be successful**, and which includes things like:

- ✓ respect
- ✓ consistency
- ✓ communication
- ✓ freedom to try and not worry about mistakes
- ✓ physicality of the classroom (proximity, seating arrangements)

Dilemma

- How can a teacher make an online classroom feel real?
- How can a teacher build the same (or similar) rapport with students?
- How can a teacher help students establish a learning community and even find friends?

How can a teacher make the online class feel real?

- Organized appearance for consistency

Personal Teaching Philosophy: Ethics of Teaching

“Teachers help students learn the academic basics, but they also teach valuable life lessons by setting a positive example... Above all, teachers must demonstrate integrity, impartiality, and ethical behavior. Teachers must model strong character traits, such as perseverance, honesty, respect, lawfulness, patience, fairness, responsibility and unity”
