FIRE EXTINGUISHER TRAINING

During the month of June, Facilities personnel participated in Fire Extinguisher Training. Hats Off to Fred Bammes with the fastest extinguishing time of 3.6 seconds.

A special thanks to co-trainers Jay Gilmore, Adam Ukena, and to Bill Spiegel for all their assistance.

Using a fire extinguisher

The following steps should be followed when responding to incipient stage fire:

- Sound the fire alarm and call the fire department, if appropriate.
- Identify a safe evacuation path before approaching the fire. Do not allow the fire, heat, or smoke to come between you and your evacuation path.
- Select the appropriate type of fire extinguisher.
- Discharge the extinguisher within its effective range using the <u>P.A.S.S.</u> technique (pull, aim, squeeze, sweep).
- Back away from an extinguished fire in case it flames up again.
- Evacuate immediately if the extinguisher is empty and the fire is not out.
- Evacuate immediately if the fire progresses beyond the incipient stage.

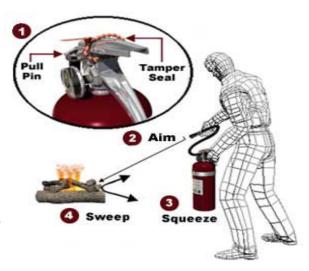

Most fire extinguishers operate using the following P.A.S.S. technique:

- PULL... Pull the pin. This will also break the tamper seal.
- AIM... Aim low, pointing the extinguisher nozzle (or its horn or hose) at the base of the fire.

Note: Do not touch the plastic discharge horn on CO2 extinguishers, it gets very cold and may damage skin.

- SQUEEZE... Squeeze the handle to release the extinguishing agent.
- 4. SWEEP... Sweep from side to side at the base of the fire until it appears to be out. Watch the area. If the fire re-ignites, repeat steps 2 - 4.

If you have the slightest doubt about your ability to fight a fire....EVACUATE IMMEDIATELY!

I CHOSE TO LOOK THE OTHER WAY

A poem about Health and Safety written by **Don Merrell**

I could have saved a life that day, But I chose to look the other way. It wasn't that I didn't care, I had the time, and I was there.

But I didn't want to seem a fool, Or argue over a safety rule. I knew he'd done the job before, If I spoke up, he might get sore.

The chances didn't seem that bad, I'd done the same, He knew I had. So I shook my head and walked on by, He knew the risks as well as I.

He took the chance, I closed an eye, And with that act, I let him die. I could have saved a life that day, But I chose to look the other way.

Now every time I see his wife, I'll know, I should have saved his life. That guilt is something I must bear, But it isn't something you need share.

If you see a risk that others take, That puts their health or life at stake. The question asked, or thing you say, Could help them live another day.

If you see a risk and walk away, Then hope you never have to say, I could have saved a life that day, But **I chose**, to look the other way.
