- or
- CIS 111 - Introduction to Computer Programming **Credits:** (3)
Select an emphasis in Exercise Physiology or Public Health Physical Activity Behavior.

**Exercise Physiology Emphasis (12 credit hours)**

Select one course (3 credit hours) from the biological basis of human movement.
- KIN 601 - Cardiorespiratory Exercise Physiology Credits: (3)
- KIN 603 - Cardiovascular Exercise Physiology Credits: (3)
- KIN 607 - Muscle Exercise Physiology Credits: (3)

Select three courses from the following (9 credit hours)
- KIN 601 – Cardiorespiratory Exercise Physiology Credits: (3)
- KIN 603 – Cardiovascular Exercise Physiology Credits: (3)
- KIN 605 – Topics in the Biological Basis of Kinesiology Credits: (1-3)
- KIN 607 – Muscle Exercise Physiology Credits: (3)
- KIN 609 – Environmental Physiology Credits: (3)
- KIN 635 – Nutrition and Exercise Credits: (3)
- KIN 657 – Therapeutic Use of Exercise in the Treatment of Disease Credits: (3)
- KIN 796 – Topics in Exercise Physiology Credits: (3)

**Public Health Physical Activity Behavior Emphasis (12 credit hours)**

Select three courses from the following (9 credit hours)
- KIN 600 – Interpersonal Aspects of Physical Activity Credits: (3)
- KIN 602 – Social Structural Determinants of Physical Activity Credits: (3)
- KIN 612 – Policy, Built Environment and Physical Activity Credits: (3)
- KIN 614 – Physical Activity Behavior Settings: Youth Sport to Senior Centers Credits (3)
- KIN 655 – Individual Physical Activity Promotion Credits: (3)

Select one course from the following (3 credit hours)

### Exercise Physiology (3 credit hours)

Select one course (3 credit hours) from the following.
- KIN 601 - Cardiorespiratory Exercise Physiology Credits: (3)
- KIN 603 - Cardiovascular Exercise Physiology Credits: (3)
- KIN 607 - Muscle Exercise Physiology Credits: (3)

### Exercise Behavioral Science (3 credit hours)

Select one course (3 credit hours) from the following.
- KIN 600 – Interpersonal Aspects of Physical Activity Credits: (3)
- KIN 602 – Social Structural Determinants of Physical Activity Credits: (3)
- KIN 612 – Policy, Built Environment and Physical Activity Credits: (3)
- KIN 614 – Physical Activity Behavior Settings: Youth Sport to Senior Centers Credits (3)
- KIN 655 – Individual Physical Activity Promotion Credits: (3)

**Kinesiology Electives (6 credit hours)**

- 300 level or above

### Human Nutrition (3 credit hours)

- HN 132 - Basic Nutrition

**Unrestricted electives (28-32 credit hours)**

- 300 level or above (>2 hours)

**Total hours required for graduation (120 credit hours)**

---

**Rationale:** The kinesiology major has streamlined the core by combining the emphasis areas, thus allowing students more flexibility in the major. Also, Math 150 has been added as an option for part of the quantitative requirement for students who would benefit from this course.

**Impact:** Math. Department Head Andrew Bennett was contacted 12/2/2014 with no response given on the addition of the Trig requirement. Human Nutrition. Kathy Grunewald and Mark Haub were emailed the proposed changes on 2/2/2015 and no objections were raised.

**Effective:** Fall 2015

Kinesiology Elective course (3 credit hours)

300 level or above

Kinesiology Elective Courses 300 level or higher (9 credit hours)

Select 9 credit hours of additional upper level KIN courses.

Total credit hours required for graduation (128-132)

Total credit hours required for graduation (130-134)

Rationale: Nutrition and Kinesiology is a dual-degree curriculum between the Department of Human Nutrition and the Department of Kinesiology. The Department of Kinesiology has proposed the following course changes that affect the Nutrition and Kinesiology curriculum:

“The Kinesiology major has streamlined the core by combining the emphasis areas, thus allowing students more flexibility in the major. Also, Math 150 has been added as an option for part of the quantitative requirement for students who would benefit from this course.”

Additionally, changes in credit hours for HN 631 and KIN 310 shown in this new NUKIN curriculum were previously approved in the Human Ecology Academic Affairs meetings on 11.21.14 and 10.24.14, respectively.

Impact: Department of Kinesiology. Response was received from Craig Harms, Department Head, on February 11, 2015. No objections to proposed changes. Note: Department of Kinesiology contacted Math Department Head, Andrew Bennett 12/22/14 regarding the addition of Math 150. A response was not received at that time.

Effective: Fall 2015
Non-expedited course proposals 000-599

Dean of Arts and Sciences

ADD: DAS 148 – Basic English Language Orientation. (1) I, II. Emphasizes the basic cultural and academic understanding necessary for new international students to be successful in ELP and university classes at K-State. Introduction to cultural differences, campus resources, health and safety, study skills, housing issues, plagiarism, basic immigration rules, classroom expectations. Pr.: Placement by the English Language Program. K-State 8: None. Repeat for Credit: This is not a repeatable course (Retake rules apply when student reenrolls). Grading Basis: Graded.

RATIONALE: Currently in the ELP, we have one orientation class (DAS 158 – Orientation to the American Education System) for students in the intermediate through upper levels (DAS 140,150, 152, 154). Those international students who have just arrived at the university and are placed in levels intermediate and above, and students who have moved into DAS 140 (Intermediate English I) from the lower levels are placed in this class. This class is 1 credit hour and guest lecturers from across campus cover topics that will help these students.

Problem 1: Having taught this class for several years, we have noticed that the lower intermediate (DAS 140) students do not have the English skills necessary to understand these lectures.

Problem 2: Students who start in our lowest level may not get orientation information until their 3rd semester in the English Language Program.

Problem 3: Due to changing demographics, over 80% of our students now continue to the university to get a degree, requiring not only a basic orientation to the ELP and life in the US, but also orientation to assist them through a smooth transition into academic classes.

Problem 4: Finally, as the ELP has grown, the DAS 158 class has become quite large, sometimes with 120 to 150 students, and it has become impossible to focus on specific student needs, or have small group work/activities.

Proposed Solution: To address all of the above problems, a 2-level orientation system is necessary. Our new proposed course, DAS 148 – Basic ELP Orientation, will meet the needs of ELP students with low English skills by presenting topics relevant to recently arrived international students, such as cultural expressions of respect, American academic classroom expectations, especially plagiarism, and basics of healthy and safe living in the US using a basic level of English. As a result of the new, lower level course, DAS 158—Orientation to the American Education System will be better able to focus on the needs of international students’ transition to academic classes.

IMPACT: None

EFFECTIVE DATE: Spring 2016
ADD: DAS 151 – Advanced English Speaking I for Non-native Speakers of English. (3) I, II, S. Comprehension and appropriate response to non-academic discourse; development of accurate pronunciation, oral grammar, and vocabulary usage. Development of fluency. Pr.: placement by the English Language Program. K-State 8: Global Issues and Perspectives; Human Diversity within the US. Repeat for Credit: This is not a repeatable course (Retake rules apply when student reenrolls). Grading Basis: Graded.

K-State 8 RATIONALE: Human Diversity in the U.S. – Non-native English speaking students enroll in the Advanced English I, II and III classes (DAS 151, 152, 153, 154, 162, 163, 164, 165, 166) to prepare for academic study in the U.S. Since these students come from countries around the world, learning the academic conventions of U.S. higher education, such as cultural understandings of plagiarism and an interactive classroom environment are an integral part of the courses. The course textbooks introduce students to diverse issues and themes important in the American classroom. Assignments and assessments (see syllabi) build on these topics to help ensure that students are prepared for the content of courses such as English 100. Global Issues and Perspectives – Students enroll in the Advance English I, II, and III classes because they need to acquire the academic English skills necessary for success at Kansas State University. As non-native English speakers, students enrolled in these courses bring diverse global perspectives to the classroom. In classroom interactions, assignments and assessments students share from their cultural perspectives and interact in discussions with other students from around the world.

RATIONALE: In 2010, DAS 152 and 154 courses were changed from Credit/No Credit to letter grades so that students could demonstrate their English proficiency by passing the exit level courses (DAS 152 and 154) rather than by a standardized test such as the EPT or TOEFL. Grades of C or better clear undergraduate students from the ELP and demonstrate English proficiency. A grade of D of F means the student must retake and get a grade of C or better in order to clear the ELP. (Graduate students must earn a grade of A or B in order to demonstrate English proficiency.) We assume that when students retook and received a grade of C or better, the new grade replace the previous grade on the GPA. However, it has come to light that topics courses cannot be retaken to improve the GPA. Therefore, to follow through with the original idea of these advanced courses being exit courses from the ELP, with retakes and refigured GPAs, each of the 152 and 154 topics classes (Writing, Reading, Listening, and Speaking) must be submitted as separate new courses.

EFFECTIVE DATE: Spring 2016

ADD: DAS 153 – Advanced English Reading I for Non-native Speakers of English. (6) I, II, S. Introduction to advanced critical reading skills in at level reading passages; introduction to unsimplified academic readings; development of an academic vocabulary; increase of reading speed to approach that of U.S. undergraduates. Pr.: placement by the English Language Program. K-State 8: Human Diversity in the U.S.; Global Issues and Perspectives. Repeat for Credit: This is not a repeatable course (Retake rules apply when student reenrolls). Grading Basis: Graded.
K-State 8 RATIONALE: Non-native English speaking students enroll in the Advanced English I, II, and III classes (DAS 151, 152, 153, 154, 162, 163, 164, 165, 166) to prepare for academic study in the U.S. Since these students come from countries around the world, learning the academic conventions and culture of U.S. higher education, such as cultural understandings of plagiarism and an interactive classroom environment are an integral part of the courses. The course textbooks introduce students to diverse issues and themes important in the American classroom. Assignments and assessments (see syllabi) build on these topics to help ensure that students are prepared for the content of courses such as English 100.

Students enroll in the Advance English I, II, and III classes (DAS 151, 152, 153, 154, 162, 163, 164, 165, 166) because they need to acquire the academic English skills necessary for success at Kansas State University. As non-native English speakers, students enrolled in these courses bring diverse global perspectives to the classroom. In classroom interactions, assignments, and assessments students share from their cultural perspectives and interact in discussions with other students from around the world.

RATIONALE: In 2010, DAS 152 and 154 courses were changed from Credit/No Credit to letter grades so that students could demonstrate their English proficiency by passing the exit level courses (DAS 152 and 154) rather than by a standardized test such as the EPT or TOEFL. Grades of C or better clear undergraduate students from the ELP and demonstrate English proficiency. A grade of D or F means the student must retake and get a grade of C or better in order to clear the ELP. (Graduate students must earn a grade of A or B in order to demonstrate English proficiency.) We assume that when students retook and received a grade of C or better, the new grade replace the previous grade on the GPA. However, it has come to light that topics courses cannot be retaken to improve the GPA. Therefore, to follow through with the original idea of these advanced courses being exit courses from the ELP, with retakes and refigured GPAs, each of the 152 and 154 topics classes (Writing, Reading, Listening, and Speaking) must be submitted as separate new courses.

EFFECTIVE DATE: Spring 2016
ADD: DAS 168 – Technical Communication for International Students. (3) I, II. Addresses the needs of non-native English speakers studying in the STEM fields. Introduces technical vocabulary, conventions, forms of documents, and practices of written, oral and online technical communication in the United States. Grammar and pronunciation support provided as needed. Student portfolio will include a resume, project proposal, memos, technical report, poster presentation, and personal website. Pr.: placement by the English Language Program. K-State 8: Human Diversity within the US; Global Issues and Perspectives. Repeat for Credit: This is not a repeatable course (Retake rules apply when student reenrolls). Grading Basis: Graded.

K-State 8 RATIONALE: In discussing appropriate communication strategies and conventions, this course will take into account and give validity to the technical conventions of the enrolled students from around the world. It will then teach these students the norms and convention of the United States STEM world, so that they can become equally adept at navigating the professional environments of their own country and of the country in which they are studying/working. As non-native English speakers, students enrolled in this course will bring diverse global perspectives to the classroom. In classroom interactions, assignments, and assessments students will share technical information from their cultural perspectives and interact in discussions with other students from around the world. The focus of the course will be effective technical communication, while recognizing the diverse cultural perspectives present in professional technical environments.

RATIONALE: In recent years at Kansas State University, a large number of international students who are non-native speakers of English are taking classes in the STEM fields either as degree-seeking students or short term non-degree students. Even though the English Language Program prepares these students for general academics, non-native speakers of English in the STEM fields often struggle with technical vocabulary, communication styles (verbal, written and online) and professional culture in the United States. Grammar and style topics unique to non-native speakers will also be covered. This course will help non-native speakers of English studying in the STEM fields to better prepare themselves for higher education and the global workplace.

IMPACT: The English Language Program will provide resources for this course. No other units will be impacted.

EFFECTIVE DATE: Spring 2016

CHANGE:

TO: DAS 152 – Advanced English Writing I. (6) I, II, S. Review of advanced grammatical structures; practice in writing using academic style, organization and rhetorical conventions; transition to an academic vocabulary in writing; introduction to conventions of research writing and citation. K-State 8: Global Issues and Perspectives; Human Diversity within the
US. Repeat for Credit: This is not a repeatable course (Retake rules apply when student reenrolls). Grading Basis: Graded.

K-State 8 RATIONALE:  Non-native English speaking students enroll in the Advanced English I, II, and III classes (DAS 151,152, 153, 154,162, 163, 164, 165, 166) to prepare for academic study in the U.S. Since these students come from countries around the world, learning the academic conventions and culture of U.S. higher education, such as cultural understandings of plagiarism and an interactive classroom environment are an integral part of the courses. The course textbooks introduce students to diverse issues and themes important in the American classroom. Assignments and assessments (see syllabi) build on these topics to help ensure that students are prepared for the content of courses such as English 100.

Students enroll in the Advance English I, II, and III classes (DAS 151,152, 153, 154,162, 163, 164, 165, 166) because they need to acquire the academic English skills necessary for success at Kansas State University. IMPACT: None

EFFECTIVE DATE: Spring 2016

FROM: DAS 159 – Digital English for International Students. (2) I, II. Instruction in online language and communication for international students in order to develop strategies and skills for working effectively in academic digital interaction and collaboration. Includes study of function and use of different web 2.0 tools. Communication skills for intercultural collaboration, and the English language styles and rhetoric appropriate in specific online settings. CoR: Concurrent enrollment in DAS 154 or DAS 152. K-State 8: None.

TO: DAS 169 – Digital English for International Students. (2) I, II. Instruction in online language and communication for international students in order to develop strategies and skills for working effectively in academic digital interaction and collaboration. Includes study of function and use of different web 2.0 tools. Communication skills for intercultural collaboration, and the English language styles and rhetoric appropriate in specific online settings. CoR: Advanced English II. K-State 8: Global Issues and Perspectives.

K-State 8 RATIONALE: Many K-State classes have online components, and many students will take online courses before they complete their degrees. International students come to K-State with different cultural norms and academic experiences that may adversely affect their ability to succeed in the digital environment where non-verbal cues and the familiarity of face to face communication are absent. In the language components of this course
students study how to choose the correct vocabulary and register to present themselves well and work collaboratively in the US academic environment. In the cultural components, students study the different elements of culture that affect online communications, such as differing perceptions of time, authority, personal responsibility and conflict. Many assignments, leading up to and including the final project, are based in a study of the characteristics of culture and in helping the students think about how their own cultures might interact with others. Learning to use online tools is an important part of this class, but language and cultural perspectives are integral parts of knowing what tools to choose and how to use them effectively.

RATIONALE: The English Language Program is changing the numbering of its upper level courses. In order to be consistent with the new system, this course needs to change to 169 to indicate that it is of equivalent level to other classes beginning with 16X. Please see attached renumbering rationale. This form also includes a request for adding K-State 8 tag.

IMPACT: None

EFFECTIVE DATE: Spring 2016

English

ADD: ENGL 575 – Holocaust Literature. (3) I, II, S. Examines texts that represent and react to the experience of Jews during the Holocaust. Emphasis on historical and cultural contexts. K-State 8: Aesthetic Interpretation; Historical Perspectives.

K-State 8 RATIONALE: This course helps students understand the aesthetics that emerge from the contemplation of a horrific event, helping students to analyze, interpret, and respond to those texts. It also provides in-depth consideration of an historic period of great consequence, helping students to understand the past and to respond to it.

RATIONALE: The Department of English has taught Holocaust Literature as a rubrics course for many years. We wish to give it an official place in the Catalogue.

IMPACT: None

EFFECTIVE DATE: Fall 2015

Music, Theatre, and Dance

K-State 8 RATIONALE: Theatre production requires backstage crews, including Wardrobe Crew which takes care of the costumes. Without these backstage workers, theatre productions would not run smoothly.
RATIONALE: Our practicum requirements for undergraduates have always been listed under THTRE 211 and students were required to take 2 credits of it (in 1 credit installments). For one of those credits, they were assigned to the Run Crew of a show and for the other, they were assigned to Wardrobe Crew. We have decided that we will be able to track which assignment students have completed/still need to do more clearly – and students will more clearly know what to expect, if we separate the Run Crew credit from the Wardrobe Crew credit under different numbers and different names (see change form for THTRE 211).

IMPACT: None

EFFECTIVE DATE: Fall 2015

Psychological Sciences

TO: PSYCH 350 – Experimental Methods in Psychology. (3) I, II. Introduction to basic principles of research design and scientific methodology as applied to psychological sciences. Pr.: PSYCH 110 (Psychology majors only). K-State 8: Empirical and Quantitative Reasoning; Ethical Reasoning and Responsibility.

K-State 8 RATIONALE: Students are given an introduction to data analysis, particularly the conceptual aspects of descriptive and inferential statistics (Q). Significant time is also spent dealing with the ethical and moral implications of using both animals and humans as research subjects (E).

RATIONALE: The PSYCH 350 Experimental Methods course is currently a 5 credit hour, lecture and lab course that is required of all Psychological Sciences majors. We would like to separate the lecture and lab into courses to be taken consecutively. Students will first take the lecture class (PSYCH 350, 3 credits) and then the following semester, they will take the laboratory (PSYCH 351, 2 credits; this will be a new course). Pedagogically, it makes more sense to have students learn about experimental design first (PSYCH 350) and then use that information to become involved in the generation, execution, and evaluation of experimental methods (PSYCH 351).

IMPACT: None

EFFECTIVE DATE: Fall 2016

ADD: PSYCH 351 – Experimental Methods Laboratory. (2) I, II. Application of experimental design and data analysis emphasized in the psychological literature,
procedures, and reporting of research findings. Pr.: PSYCH 350. K-State 8: Ethical Reasoning and Responsibility.

K-State 8 RATIONALE: Students engage in direct experimentation. The ethics of research are heavily emphasized.

RATIONALE: We are proposing to separate the laboratory component of PSYCH 350 Experimental Methods in Psychology into its own, 2 credit hour course. Pedagogically, it makes more sense to have students learn about experimental design first (PSYCH 350) and then use that information to become involved in the generation, execution, and evaluation of experimental methods (PSYCH 351). The laboratory will meet for 1 hr 50 min, twice a week. Please see syllabus for content.

IMPACT: None

EFFECTIVE DATE: Spring 2017
Non-Expedited
Course Proposals 000-599

Computing and Information Sciences

Requisites:
Prerequisite: MATH 100 and either CIS 115 OR ECE 241. Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

When Offered: Fall, Spring

Requisites:
Prerequisite: CIS 111, CIS 115, OR ECE 241.  
Prerequisite or concurrent: MATH 205 or MATH 220.
Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

When Offered: Fall, Spring

Rationale: A number of non-majors take CIS 111 prior to taking CIS 200. This course provides more than enough programming background to prepare students for CIS 200. On the other hand, we are seeing more students who do poorly in CIS 200. These students are often those with weaker mathematical preparation. Requiring a calculus course as a prerequisite or concurrent course will ensure better preparation in the logical thinking needed for programming. Requiring this preparation also may be helpful for students in determining which major is best for them. Each of the programs that require or recommend CIS 200 also requires either MATH 205 or MATH 220.

Effective: Fall 2015.

Impact: The following programs list this course as either required or recommended: Agricultural Economics (Quantitative Option), Applied Mathematics, Business Administration Pre-Professions Program, Computer Engineering, Industrial Engineering, Management Information Systems, Mathematics, and Statistics.
From: CIS 300 - Data and Program Structures (3). A study of common data and program structures together with associated algorithms. Topics include interfaces, design patterns, arrays, stacks, queues, lists, trees, hash tables, recursion, binary search, and tree traversals. Experience with both use and implementation of these structures and algorithms using a modern programming language. Discussion of tradeoffs involving performance and software maintainability.

Note
Six hours lab a week.

Requisites
Prerequisite: CIS 200.
Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

When Offered
Fall, Spring

To: CIS 300 - Data and Program Structures (3). A study of common data and program structures together with associated algorithms. Topics include interfaces, design patterns, arrays, stacks, queues, lists, trees, hash tables, recursion, binary search, and tree traversals. Experience with both use and implementation of these structures and algorithms using a modern programming language. Discussion of tradeoffs involving performance and software maintainability.

Note
Six hours lab a week.

Requisites
Prerequisite: CIS 200 and either MATH 205 or MATH 220.
Students may enroll in CIS courses only if they have earned a grade of C or better for each prerequisite to those courses.

When Offered
Fall, Spring

Rationale: We are seeing more students who do poorly in CIS 300. These students are often those with weaker mathematical preparation. Requiring a calculus course as a prerequisite will ensure better preparation in the logical thinking needed for programming. Requiring this preparation also may be helpful for students in determining which major is best for them. Each of the programs that require or recommend CIS 300 also requires either MATH 205 or MATH 220.

Effective: Spring 2016

Impact: The following programs list this course as either required or recommended: Business Administration Pre-Professions Program, Computer Engineering, Management Information Systems, and Statistics.
General Engineering

From:

DEN 160 – Engineering Concepts Credits: (1)

An introduction to engineering and engineering design. Students work in teams, practice communication skills, and apply problem-solving methods to the design, build, test process. Related topics include a review of the various fields of engineering and career opportunities. The availability of campus resources and the use of academic skills such as time management and goal setting are also emphasized.

Note: One recitation and one seminar a week.

Requisites: None.

When Offered: Fall, Summer

UGE course: No K-State 8: None

To:

DEN 160 – Engineering Orientation Credits: (1)

An introduction to engineering; general orientation; policies; student organizations; study skills and time management; departmental degree programs and careers.

Note: One recitation a week.

Requisites: None.

When Offered: Fall

UGE course: No K-State 8: None

Rationale: This is a change to the title and course catalog description. They are being changed to better reflect the fact that the course is an orientation and overview for students who are interested in a College of Engineering degree program.

Effective: Fall 2015

Impact: None outside the College of Engineering and the General Engineering program.
New Course
ADD:

DEN 161. Engineering Problem Solving (1). Introduction to application-oriented engineering problem solving skills using fundamental engineering problems specific to each discipline, teamwork, and communication skills.

Note: 2 hour lab a week

Requisites:

Prerequisite: MATH 100 and MATH 150  (or Prerequisite or concurrent enrollment: MATH 220 or MATH 205)

When Offered: Fall, Spring

UGE course: No       K-State 8: None

Rationale: This is a new required course, for General Engineering students, intended to introduce basic problem solving concepts and engineering problems. Retention is a key component.

Impact: None

Effective Date: Fall 2015
Graduate course and curriculum changes (4-7-15)

Non-Expedited New Courses

DMP 802. Environmental Health. (3) I. This is a three-credit graduate-level course consisting of a 3-hour meeting per week. Students will be exposed to professional practice of environmental sciences, epidemiology, toxicology, occupational health and industrial hygiene, and consumer health and safety. Topics include the methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; ameliorating hazards; and protecting the population through waste management, regulatory programs, environmental inspections, food and product safety, and environmental policy. Includes interaction with professionals in public health practice. There will be 3 one hour lectures each week. Participation is required. No pre-requisites.

RATIONALE: To recognize major public health issues for populations on a social, community, and global scale; to describe multidisciplinary and ecological public health issues and concerns; to discuss lifestyle behaviors that promote individual and population health and well-being; to apply multidisciplinary strategies and interventions in addressing public health issues; to apply concepts of planning and management in public health programs; and to integrate and apply knowledge, skills, and principles for health improvement.

IMPACT: None.

EFFECTIVE DATE: Fall 2015

MPH 802. Environmental Health. (3) I. This is a three-credit graduate-level course consisting of a 3-hour meeting per week. Students will be exposed to professional practice of environmental sciences, epidemiology, toxicology, occupational health and industrial hygiene, and consumer health and safety. Topics include the methods for defining environmental contamination; identifying contaminants, pathogens and toxins; assessing risks and causality; determining health impact; ameliorating hazards; and protecting the population through waste management, regulatory programs, environmental inspections, food and product safety, and environmental policy. Includes interaction with professionals in public health practice. There will be 3 one hour lectures each week. Participation is required. No pre-requisites. Cross-listed: DMP - 802 Environmental Health

RATIONALE: To recognize major public health issues for populations on a social, community, and global scale; to describe multidisciplinary and ecological public health issues and concerns; to discuss lifestyle behaviors that promote individual and population health and well-being; to apply multidisciplinary strategies and interventions in addressing public health issues; to apply concepts of planning and management in public health programs; and to integrate and apply knowledge, skills, and principles for health improvement.
