The Global Citizenship CAT Community is a unique, year-long academic experience for first-year students at Kansas State University. Unlike most other CAT Communities and other universities' first-year experiences, the Global Citizenship CAT Community includes an education abroad component and unfolds over the entirety of students' first year at Kansas State.

"Since our class is focused on Global Citizenship, I learned how to open my mind and look at the culture of a new place from a different perspective. I felt less like a tourist and more like someone who was there to embrace and learn the culture."
