Grad Program

Tufts University, Professional Masters Program in Sustainable Water Management (SWM).

Accepting applications for Sep 2018. “Generous funding and financial support are still available, and will be considered on a rolling basis.” SWM is a 12-month program with four tracks: WASH in International Development and Humanitarian Response; Water, Food, and Energy; Water Diplomacy; Water Infrastructure for Human Settlements. Students are mentored by top-tier water scholars and practitioners. Summer term is dedicated to a
practical experience in a real-world setting, with a guaranteed stipend of up to $3,000. All application fees have been waived for this round. For more information, visit swm.tufts.edu/.

Position

**University of Idaho, Geoscience Manager-Digital Mapping Laboratory.** Full time; pay commensurate with Experience, up to $70,000. Position Summary:
The Geoscience Manager for the Digital Mapping Laboratory of the Idaho Geological Survey (IGS) is stationed at the Moscow campus of the University of Idaho. The incumbent will manage and maintain production, publication, and delivery of geologic and other IGS maps, products, and data. The Geoscience Manager will supervise the Digital Mapping Laboratory staff, which includes GIS Analysts and Digital Cartographers. Incumbent also oversees Information Technology contractors. Maintenance and purchasing of lab software and hardware and co-management of the IGS website and Windows network domain are additional responsibilities of the position. A strong understanding and demonstrated work experience in geologic mapping are important skills for the incumbent to successfully interface with geologic staff on IGS research projects. Light travel will be required as needed to attend professional or state meetings and to visit the Boise office of IGS. Preferential review of applicants began 16 Apr (but it's still posted). See more/apply at https://uidaho.peopleadmin.com/postings/20763.

**Shameless advertising**

In thinning belongings, Harringtons are divesting of a bunch of antique geography (and other) books, and atlases. These go back to the mid-1800s, anyway. A newer example includes a swastika-bearing picture of the German flag. Some are in kind of rough shape (I expect that happens to a lot of people when they're over 100, too), but they're cool. Rather than putting them in a garage sale or taking time with ebay, they are available in Lisa's office (with more to be added). If interested, peruse and make an offer (big bucks not expected). We appreciate books going to people who appreciate them.
