Description of Dissertation Research and Statement of Research Interest

Objectives of study

Significance of research

Description of the methodology as related to molecular biological techniques

Research progress to date

Publications (Please only include accepted publications that are related to your dissertation).

Presentations (Please only include presentations that are related to your dissertation).

Anticipated future results of research and their implications

Fellowship Award Statement

Statement (250-500 words) that describes how the funds will be used to support research and professional development. Fellowship funds may be expended at the recipient's discretion for his or her dissertation, future research, and travel, planning postdoctoral moves or other purposes. The fellowship is not intended to provide funds for current research, but is instead intended to assist with the recipient's transition to the next stage of his or her career beyond the Ph.D. Although a formal budget is not required, a general idea of how the recipient plans to spend the funds should be included in the statement.

Research Summary

Statement (150 words) that describes applicant's research and its importance. Please use terms that can be understood by the general public and suitable for publication (i.e., K-State Today).
