

An illustration of a hand with a large mole on the back, rendered in black and purple. The text "GET YOUR SPOTS CHECKED" is written in a large, purple, outlined font to the right of the hand.

# GET YOUR SPOTS CHECKED

Skin cancer is the most common cancer in the U.S. It is estimated that one in five Americans will develop skin cancer in their lifetime. The good news is that skin cancer is highly treatable when detected early.

Lafene Health Center is offering a skin cancer screening clinic for faculty and staff this summer. There will be a \$50 charge that will be submitted to insurance. Because skin cancer screening is a preventative service, there may be no cost for eligible employees. Lafene Health Center is in-network for the State Employee Health Plan (SEHP) but is NOT in-network for Medicaid or Medicare. If you are not on the SEHP, you may want to check your policy to see if this is a covered service.

Rosanne Kreller, Lafene's certified dermatology nurse practitioner, will provide the screenings in private exam rooms at Lafene Health Center. Kreller will examine exposed skin areas and will note findings and make recommendations for next steps, if needed. The screenings will take approximately 10 minutes to complete.

A limited number of appointments are available on June 23, 24 and 25, and can be made through the [myLAFENE+ patient portal](#) or by calling 785-532-6544. Any K-State employee is eligible for this service. Patients will need to check in at Lafene 10 minutes prior to their appointment.

## SKIN CANCER SCREENING CLINIC
