LGBTQA COMMUNITY

LGBTQ* politics occupy an increasingly prominent place in our social worlds. In this CAT community, we explore the history and present of political movements such as transgender rights, lesbian and gay organizing, the reclamation and reinvention of queer through activism, and more. Through our work together, students will develop stronger understandings of how to build communities through shared commitments, mentorship, and allyship where folks who identify as queer, trans, genderfluid, allies, and more, can thrive.
