Tribune Tower Ballroom of
the Alumni Center, with
accompanied remarks.
The director of the King's
Commonwealth of King's
Visitation will deliver
a keynote address. The
violence will be held.

Certified for our protection

Diagnostic Laboratory is the state's first line of defense against avian flu

If the highly pathogenic strain of avian influenza ever comes to Kansas, diagnosticians at K-State's Veterinary Diagnostic Laboratory will be the first to know.

The lab, which is part of K-State's College of Veterinary Medicine, is the first place samples will be tested if there is ever a confirmed case of avian influenza in Kansas. The lab works closely with the FDA and other agencies to ensure the lab can test avian influenza samples.

K-State's Veterinary Diagnostic Laboratory is a national leader in diagnostic testing and is consistently cited as providing reliable and timely results.

"From a poultry standpoint, we are the first to know," said Greg Grauer, a professor of diagnostic virology at K-State's Veterinary Diagnostic Laboratory.

"If there were a suspected case of avian flu, we would want to get the results to the state and federal agencies as quickly as possible," said Grauer. "This is a very important role for us as a state entity."

Rebel named top wind turbine adviser
K-State professor Eric Shappee was named one of 15 individuals appointed to a national Wind Turbine Guidelines Advisory Committee established by U.S. Department of Energy.

New ways to recognize faculty

Alumni Association creates two annual awards

T he K-State Alumni Assocation has created two annual awards aimed at recognizing K-State faculty of distinction.

The K-State Alumni Association has established the Distinguished Service Award and the Distinguished Achievement Award. Both awards will be presented annually to K-State faculty and held by the Alumni Association.

The Distinguished Achievement Award will be presented to a full-time faculty member who has contributed significantly through research and teaching to the educational experience of students.

The Distinguished Service Award will be presented to a full-time faculty member who has contributed significantly through research, teaching and service to the university.

Both awards will be presented April 9 during a reception at the K-State Alumni Center.

Dr. Ron E. Reef was named the first Distinguished Service Award winner. Reef earned his bachelor’s degree in marine science in 1962. He is a past member of the K-State Alumni Association Board of Directors.

Week of festivities planned to honor King

Agriculture

Wayne A. Geyer, professor of forest science, has been elevated to fellow status in the Society of American Foresters for his outstanding accomplishments.

New Orleans trip features education, entertainment

Students and faculty members will have an opportunity to attend an academic conference, meet with local New Orleans residents and experience local culture during a trip to New Orleans this spring.

The trip is sponsored by the McNair Scholars Program and is designed to provide students from underrepresented groups with an opportunity to experience the city and enjoy its culture.

“A trip to New Orleans can be a once-in-a-lifetime experience,” said Dale Herspring, K-State McNair program director.
