K-State at Salina to offer bachelor’s degree in family studies and human services.

K-State at Salina will offer a general option bachelor’s degree in family studies and human services beginning in fall 2008. The degree programs, the judicial system, Cooperative Extension Service, elder-youth development, nutrition and food preparation, physical education, and environmental education, are as diverse as the projects the institute has developed in its 20-year history. It has developed a campus master plan. It has been the single focus of all fundraising efforts. The Salina campus has received state approval to start construction on the Student Life Center, scheduled to open in 2009. "It is fantastic that the construction clock has finally started ticking," Dennis Kuhlman said. "It has been the single focus of all fundraising efforts. The need for the student center has been apparent 20 years ago — before K-State came to Salina in 1991. When Dennis Kuhl was appointed dean of K-State at Salina in 1993, when K-State opened the Community Relations Office, the student center was a high priority," Kuhlman said. "We have put a great deal of effort into planning, fund raising and constructing the Student Life Center." Kuhlman said, "It is a wonderful facility that will benefit generations of students for many years to come."

K-State at Salina offers students a broad range of academic opportunities and manages a number of programs, including the Modern Army Combines, K-State Alumni Association, and various student affairs and engagement programs. "We have put a great deal of effort into planning, fund raising and constructing the Student Life Center," Kuhlman said. "It is a wonderful facility that will benefit generations of students for many years to come."
