"What I’m trying to do this year, our goal is to identify the students most likely to need information," Kuhn said. "We’re going to be looking into how to engage them in the experience of being taught something."

UNA's board of directors

The board of directors, which oversees the university's financial affairs, has 12 members: eight members elected by the university community and four members appointed by the governor. The board's primary functions are to establish the university's policies and objectives and to supervise the president in the execution of those policies.

McKinney Center for Entrepreneurship

The McKinney Center for Entrepreneurship is a new center at Kansas State University that will be housed in the Quinlan School of Business Administration. The center will work with students and faculty, as well as with local businesses, to help them start and grow their businesses.

Energy harvesting technologies could increase safety, continued

Energy harvesting technologies, which convert the natural vibrations and movements of objects into electric power, could help improve safety in a variety of settings, researchers say. They could be used to power sensors in highways, bridges and other infrastructure.

The goal of the McKinney Center is to create an entrepreneurial ecosystem that will enable students and faculty to translate their ideas into successful businesses.

Nancy Mutur, assistant professor of journalism and mass communication, was chosen to present a program at the Annual Conference of the National Communication Association (NCA) Nov. 9 to 12 at the Nashville Marriott in Nashville, Tenn.

Mutur traveled to Africa last year to study several programs, including the National Institute of Communicable Diseases and the University of Stellenbosch in South Africa. She recently spoke about her experience with the University of Nairobi and the National Society Psychiatric Hospital in Kenya.

Mutur said she started working in the area of African media when she was a student at the University of Nairobi.

“I began doing research on the communication and psychological effects of the AIDS epidemic,” Mutur said. “Most of my research was in Kenya. I have done extensive research on the impact of AIDS on Africa and how communication strategies can be used to combat the epidemic.”

Mutur received her Master of Science degree in journalism and mass communication from the University of Nairobi in 1993 and her Doctor of Philosophy degree in journalism and mass communication from the University of Colorado in 1999.

“I have been working in the area of African media and AIDS since 1991,” Mutur said. “I have been doing research and writing about the impact of AIDS on Africa and how communication strategies can be used to combat the epidemic.”

Mutur said she has been working in the area of African media and AIDS since 1991. She has been doing research and writing about the impact of AIDS on Africa and how communication strategies can be used to combat the epidemic. She has been working with several organizations, including the National Institute of Communicable Diseases and the University of Stellenbosch in South Africa.
