**To increase the vase life of cut flowers, use these strategies**

- Add 2 teaspoons each of white vinegar and sugar to water. These ingredients help slow the rate the flowers take up water, prolonging their life.
- Add a spoonful of bleach to water to kill bacteria that can cause cut flowers to rot.
- Cut flowers at a 45-degree angle, as this helps the flowers take up water.

---

**Noteworthy, continued**

The story, set in Manhattan in 1905, revolves around the life of the Desirability of Specific Per

Valentine’s Day staples convey meaning in a special way

Water lilies are a diverse flower, with a single flower in bloom throughout the year. They have a unique beauty that adds to the natural landscape of a pond or lake. Water lilies are a symbol of purity, simplicity, and natural beauty. They are often found in clear, shallow waters and require a warm climate to thrive. Their flowers can be white, pink, or purple, and they bloom during the summer months. Water lilies are also known for their fragrance, which can be enjoyed by both humans and animals. The flowers are typically large and showy, with a long stem that supports the bloom. They are often used as an ornamental plant in gardens and parks, and they are also popular in floral arrangements.

Design programs ranked among best in the U.S.

A recent survey of architecture and design firms has ranked K-State’s Bachelor of Interior Design program as the best in the nation, with three other architecture degree programs ranked among the top ten. The survey was conducted by Architectural Record magazine and evaluated the quality of the curriculum, faculty, and student outcomes.

The survey found that K-State’s Bachelor of Interior Design program is distinguished by its strong emphasis on critical thinking, design theory, and real-world experience. The program is also known for its diverse and experienced faculty, who bring a wealth of knowledge and expertise to the classroom. In addition, the program offers a range of elective courses and opportunities for students to specialize in areas of interest. The survey also noted that K-State’s Bachelor of Interior Design program is well-connected to the architecture and design industry, with a strong network of alumni and industry partners.
